AND CYCLE-TRADE JOURNAL

A Weekly Record and Review of Cycling and the Cycle Trade

No. 15

CHICAGO AND NEW YORK, AUGUST 12, 1892.

\$2 Per Year

Columbia,

11

World's Record for the Mile.

RIDER --- George F. Taylor.

TRACK --- Hampden Park, Springfield, Mass.

DATE --- August 3rd, 1892.

WHEEL---Columbia with Columbia Pneumatic Tires.

Taylor first lowered the 2:15 record (made by Willie Windle on a Columbia) to 2:14 1-5. Then his own by 3 1-5 seconds, making the one mile world's record 2:11.

The fastest riders ride the fastest wheels ; Taylor rides a Columbia.

BOSTON. NEW YORK. POPE MFG. CO. CHICAGO. HARTFORD.

LOOKING BACKWARD.

Is what riders of the 2:10 are accustomed to do when they want to see the rest of the crowd.

THE natural tendency of the 2:10 is to come to the front. You are not tied down to one style of tire, but have four of the BEST to choose from. Everyone knows of the strength and speed of UNION wheels. If you want your speed developed you should have one. There is no excuse for your not being a flyer if you choose.

UNION CYCLE MFG. CO.,

166-170 Columbus Ave., BOSTON, MASS.

P. S.—YOU CAN'T BREAK THE 2:10.

TL 1. R 33

THE OWL (D) RELIABLE.

THE PILGRIM.

We have never sacrificed
Strength for lightness, and while

THE PILGRIM

Is not a heavy wheel,
We guarantee you cannot break
It with any ordinary use.

It is built for Service.

PHILIP S JUSTICE & CO., 14 N. 5th Street, PHILADELPHIA, Penn.

The Michelin Pneumatic.

Ridden by **CHARLES TERRONT**, the Winner of the Paris-Brest Race.

The Most Resilient and the Quickest Repaired.

THE AIR CHAMBER CAN BE CHANGED IN LESS THAN 4 MINUTES.

A The Steel Rim. B Outer Covering. b The Beared Edges. C The Air Chamber. D Square Tubular Steel Rings, to keep the outer covering in its place in the groove. E Hooks, ending the Steel Ring D. F Nut and Screw to keep in place the ends of Ring D, though the tire may be deflated. Fig. 1 With Solid Rim. Fig. 2 With Hollow Rim. Fig. 3 The whole Tyre and Rim, such as delivered.

In the great race from Paris to Clermont-Ferrand, 242 miles of mostly rough and hilly roads purposely strewn with nails in many places, 64 men finished out of 73 starters, all mounted on the Michelin Tyre. Farman of Boulogne-sur-Mer arrived first in 17 hrs. 52 min., although stopping several times for repairs to his tires.

A FEW RECORDS AND VICTORIES

TO THE CREDIT OF THE "MICHELIN" PNEUMATIC:

The 50 Kilometres Record, in 1 hr. 37 min. 46 sec.

The 100 Kilometres Record, in 3 hr. 25 min. 16 sec.

Paris-Brest and back, 750 miles, in 71 hr. 37 min; Charles Terront finishing 8 hours in front of the second man, Jiel Laval. Corre, on the "Michelin," rode from Basle to Strasburg and back, 300 kilometres, in 13 hr. 10 min. record, beating by 2 hours all the German competitors.

In the "LYON-RIJMBLICAIN" race, 326 miles, the first, third, fourth, fifth and seventh men were on the "Michelin" Pneumatic.

In the great race from Paris to Clermont-Ferrand, 242 miles of mostly rough and hilly road, purposely strewn with nails in many places, 61 men finish out of the 75 starters; the largest percentage ever known in competition. All mounted the Michelin Pneumatic Tyre, and had to do their own repairs on the road.

In the Paris-Nantes race, 620 miles, the five first in were on the Michelin Tyre, and the best riders of the day, on other tyres, were hopelessly left.

Sole Agency Great Britain, **PAUL HARDY**, 27 Alfred Pl., Bedford Sq., London, W.C.

THE PREMIER CRANK.

ented in U. S., England and Germany. Weight 9 oz.

in a "jiffey" when required, and are being sold in thousands of pairs to English makers.

Licenses granted to large wheel makers. Correspondence is invited from Jobbers.

The usual method of fixing cranks with a "key" or "cotter" is far behind the times, as, whenever the necessity arises for their removal, it is always the cause of expense to the rider, time and temper to the repairer, and brings discredit upon the wheel maker. These "PREMIER" Cranks may be removed

W. A. LLOYD & CO., — (SOLE PROPRIETORS) — Clyde Works,
BIRMINGHAM, ENGLAND.

THE FIRST

RALEIGH

Came to America and discovered part of it 300 years ago. He was the wonder of his age. The Raleigh of modern times has been renowned in Europe for years, and the demand there for it was so great that it could not get to America till the fall of 1891. Shortly it was discovered by

A. A. ZIMMERMAN

New York Athletic Club,

who, after trying it and others, came to the conclusion, that, like its great original, Sir Walter Raleigh, it was ahead of all others, and he proved it by winning upon it in America and Europe his title,

Champion of the World.

This title he has proved right up to date. On the 5th and 6th inst. at Asbury Park, he won six races, defeating GEORGE F. TAYLOR (hot from his world's record) in FOUR races, viz: 1 mile, safety; 1 mile, handicap; quarter-mile, safety, and 5 mile, safety.

RALEIGH ROADSTERS AND RACERS ARE

the Easiest Running and, therefore, the Fastest wheels built. Their specialties are OUR PATENT BEARINGS, OUR PATENT SPROCKET WHEEL which can be changed in 5 minutes to suit the nature of the road or track to be ridden; Semi-Tangent Spokes to driving wheel, which take the strain every way and will not break.  SEND FOR CATALOGUE.

THE RALEIGH CYCLE CO., LIMITED,

ARTHUR A. ATTY, Manager.

1790 Broadway, New York City.

A REWARD
OF HONOR

will be given to riders who sufficiently distinguish themselves either on the road or path, during the season of 1892, upon HUMBERS.

The reward will be in the shape of a gold medal, suitably engraved.

We will pass upon the records of the various Humber riders at the end of the season, and will present the medals to those whom we consider best entitled to wear them.

As Humbers are ridden by men who have bought and paid cash for them, we feel disposed to do the right thing by them, and at the same time encourage the sport to a certain degree.

We do not give away racing machines, nor loan them—except to our regular patrons in exceptional cases—therefore it is all the more remarkable that fast men use them when they can get other racing machines for nothing. The Humber is five seconds to the mile faster than any other machine the world has yet seen—that is why racing men buy them. More than 60 per cent. of all the races in the world are won upon Humbers.

THE HUMBER-ROVER CYCLE CO.,

S. A. MILES, - - - - - Editor.
CHAS. P. ROOT, - - - - - Associate Editor.
R. M. JAFFRAY, - - - - - Business Manager.

THE TRADE—TIME TO ACT.

The REFEREE has for six months or more been impressing upon the cycle trade of the United States the necessity of forming an association, and other journals have been somewhat active in the same direction. This paper went so far as to make inquiries as to the advisability of such a scheme, and in almost every answer—and they came from every prominent manufacturer and dealer—came a hearty approval of the idea. In the United States and Canada the cycle trade has seen three failures within ten days. There are small dealers by the score needing capital. These facts merely show that, in some ways at least, the cycle trade has been overdone. During the past season prices have been cut, auction sales have taken place to dispose of old stock, and while there was a big spring rush the business in most parts is at a standstill. Traveling men have been called in and help discharged in order to keep down the expenses. Cheap wheels have flooded the market, but this has not caused the present dullness, for high grades are always in demand, and many firms are still unable to fill orders in some lines. There is necessity for the formation of a dealers' association to protect themselves. Cutting prices and discounts will ruin any business, and, sooner or later, the former, probably, the manufacturers, importers, jobbers and retailers will wish they had taken the REFEREE's advice and formed the association as long ago as January or February of this year.

"WESTWARD THE COURSE OF EMPIRE," ETC.

Mr. Davis, chief consul of Kansas, recently offered to the members of his division some suggestions as to the conduct of the official organ of the league, suggesting among other things that the publication of that very necessary weekly budget in some western city (of course he mentioned Chicago—they all do that) might be of benefit to organizations at large. Now, the Kansas division is a small one, and Mr. Davis, as those people who have heard him know, is just a trifle tiresome in his prolixity. But "great oaks from out small acorns grow," and Kansas is by no means without energy, nor Mr. Davis without the average amount of common sense.

We are led to these observations by the remarks of The Commentator—rightly he of pen and tongue—in the last issue of *Sporting Life*, who, after describing Mr. Davis as the "would-be Solomon of Sockless Jerry's domain," proceeds to castigate that gentleman unmercifully. We are inclined to believe

that when Mr. Davis expressed the opinion that the *Bulletin* should be moved further west, he voiced the opinion of many men of influence and good judgment. It is true, as Mr. Commentator says, that a few eastern states contain more than one-half the league membership, but that is no reason why the *Bulletin* should be published in a city which has about the poorest facilities of any large city in the United States. The *Bulletin* published, say in Chicago, St. Louis or Cincinnati, could reach every eastern league member before Sunday, while the western edition could be delivered as far west as Frisco by Tuesday, the earliest day on which it is now received in Chicago. Better results, however, may be obtained when the long-promised new plant materializes.

We are emphatically of opinion that, as soon as the present contract expires, the league should publish its own organ. The fact that an attempt to do so, years ago, resulted in failure, proves nothing. In the hands of a good business man we believe the *Bulletin* can be made not only self-supporting, but a source of substantial profit. With such an arrangement in force, the league would not be tied to any particular locality, and could locate its headquarters wherever it deemed advisable. It may, and doubtless will, be a long time ere any such move will come, but as Mr. Davis says, "it must come in time." We have not heard the last of this agitation.

CONTROLS ROAD RACING NOW.

There is no denying the fact now that the racing board of the league has decided to control road racing, to a considerable extent at least. Only this week the Chicago member of the national body, W. C. Thorne, sent the REFEREE notice of the suspension of certain men who competed in an unsanctioned race at Parkside July 23, and a part of the notice said: "All amateurs are warned against competing with these persons in a *cycle race of any kind* during the period of suspension." Mr. Thorne, in fact, stated outright that the racing board proposed to control road racing, at least so far as league members are concerned, and, indirectly, so far as anybody else is concerned. Chairman Raymond's decision in the Massachusetts case as much as settled the matter. Road races may not have to be sanctioned by the board, but when anybody rides for cash, or competes with a professional or suspended league member, the racing board will not hesitate to inflict punishment on the offender. We cannot help thinking that it is a round-about way of doing business, however. If the league proposes to assume control of road events as well as track races, why does it not come out and say so and formulate rules whereby the road races may be governed? It is not fair to keep people guessing as to what the result will be in case a road event takes place without the authority of the league. The Century Road Club, a short time since, made something of an attempt to boss road racing, but those who proposed to carry out the idea have evidently gone asleep. Riders and the press have been begging the league to take some steps in the matter, and if it really intends to boss things it should get down to business and say so. The Century Road Club evidently is losing its enthusiasm, and little may be expected from it, inasmuch as its attempt to elect officers has fallen through.

Joe Gunther and H. C. Wilson, of the Lincoln Club, and C. W. Davis of the C. C. C. spent a very enjoyable two weeks touring in Wisconsin and northern Illinois.

FACTS AND FANCIES.

Graves' Buffalo Record—The Racing Board and the Amateurs.

So some disinterested (?) people "think it about time that the Detroit papers let up on Rands' twenty-five mile record," and refer to the performance of Graves at Buffalo May 30, claiming that Rands' friends can not claim that record for him under the circumstances. In the light of the above-mentioned article, some statements I heard from a prominent man in Buffalo trade circles, just after the date of the race, sound somewhat queer. Said the gentleman: "The so-called twenty-five mile course never was measured except by a cyclometer on the wheel of one of the promoters of the race; it was not surveyed before the race and has not been surveyed since. Another interesting incident was an occurrence at the finish. It is deemed by several people, whose names I can give you and who were mere spectators, that Graves never passed Crooks, and these same people aver that Crooks rode around the "meadow" once more than Graves did. Now if these statements are facts, who won the fastest time prize and who should have credit for the record if the course was correct?"

One thing more which has caused some comment was this remark of Graves, when he started to dismount and several people called to him to go on: "I have ridden far enough and I won't ride any further." If he had ridden the full course, this was all right, but if, as my informant quoted above says, Crooks was never passed by Graves, either Graves did not ride the full course or Crooks rode more than the distance. No one can say absolutely how far each man rode after coming upon the "meadow" circle.

There's another instance of the folly of running a road race to finish upon a track; it is absolutely impossible to avoid mistakes in the checking under all previous arrangements where the men ride more than one lap on the track at the finish. This is proven by almost numberless instances in the past, prominent among which I recall the Quaker City in 1890 and the Springfield, Mass., race last year, in addition to the Buffalo case. It is an injustice to the riders who compete for any race promoter to permit even the possibility of such a discussion, for some one is likely to fail getting the glory (and prize) which he has earned. In the present case Graves should have been spared any chance of losing the record, but even if he made it there is no way of proving the fact, for even if the course should be surveyed and found correct, there will always be a doubt in the minds of many people as to the distance he rode in comparison to Crooks.

It seems a trifle queer, too, that the Buffalo people have not taken the necessary steps to have the course surveyed. With this doubt hanging over them, one would think a surveyor would be almost the first man hunted for.

* * *

How soon are we to expect a ruling from the racing board regarding what constitutes a novice? It really makes an old-timer feel dizzy, after being imbued with the belief that the L. A. W. never knew there was such a thing as road racing, to find that he might be snapped up at almost any minute by the "minions of the law" if he should go back to former practices, for certainly in his earlier days he competed in several road races with men who were under the ban and with one or two who had even indulged in the pleasure for the sake of what the true amateur now calls the "long green." What is meant by "recognizing" road racing? My personal

idea has been that the L. A. W. took cognizance of road racing as it does of other sports outside of its own peculiar province—that is, recognized it as a sport the same as baseball, skating or rowing, but withheld any attempt to govern road racing any more than it governs the other sports mentioned. I believe, and always have believed, that if a man races on the road for money he is as much a professional as if the race occurred on the track, and should be treated in the same manner. If the L. A. W. will not admit a professional baseball player to its membership, why should it admit a professional in any other branch of sport?

If the league is to bar from novice races every man who has won a prize on the road, as one of the official handicappers stated last month in my hearing, we shall see cut from the entries in novice races not only winners of prizes in road races, but every man who sports a club mileage medal on Century Road Club badges. Is this intended as a blow to road racing, or is it to prevent the development of any more 2:32 novices.

* * *

1. Are you now paying, or have you at any time in the past paid the expenses of, or in any way remunerated, directly or indirectly, one, two or any number of racing men?

2. If so, will you give us the names of such men, and any further information which you feel disposed to add?

Such is the text of the last shot from the racing board, a letter sent to each importer and manufacturer. I wonder if it would develop what made Taylor take the Peoria trip so suddenly last fall; why Windle rode one wheel during his racing last summer and another for the record; how certain men sell wheels enough to be kept "in the road" during the racing circuits; how Munger came to be discharged; Berlo's experiences with and without home-made wheels; and some of the many other odd things that come to our eyes and ears so frequently? Seriously, I am delighted to see a chairman of the racing board who seems inclined to show as much backbone as did Charlie Davol, and I only hope his backbone will not lose its stiffness. There are certainly many cases which need his attention, and surely with so little attempt at concealment in some of them, the obtaining of sufficient proof can not be a very difficult task; but who thinks the manufacturers will tell the "truth, the whole truth," unless in some case like the one which led to Windle's expulsion a couple years ago? VER.

The Lake View C. C. Races.

The Lake View Cycling Club's short distance road races, run at Thorndale last Saturday were interesting inasmuch as they brought together such likely young flyers as Helmich, Steele, Stillwell, Fox and Callan. The first heat of the quarter-mile scratch was an easy victory for Steele in 36 seconds, Stillwell, Goodenough and Hoffman finishing in the order named. The second heat was likewise an easy victory for Helmich in 35 seconds, Fox, Callan and Bruhman finishing next. The final was a hot contest between the first three in the heats, Helmich winning in the sprint two lengths ahead of Steele; time, 34 seconds; Fox and Goodenough, third and fourth.

The half-mile scratch was another victory for Helmich, C. D. Fox, O. Bruhman, C. Deely, B. Hoffman, F. Holland and J. Arenz well up in the order named; Helmich's time, 1:18.

The mile scratch was really over a mile and no time was taken. Fox beat Helmich over the tape, Steele third, Bruhman, Goodenough, McElroy and Deely in the order named. The finish was close and exciting.

NEW YORK, Aug. 7.—This has been a week of record excitement, commencing Tuesday with the young ex-college man, George F. Taylor, doing 2:14 1-5, and a promise that he would eclipse that performance before the season was over, a promise that he hastened to fulfill by startling the cycling world the following day with 2:11 flat. Of course it was done at historic Springfield; where else would it be expected? The pacemakers were not of the flying column of first-raters, but they did nobly. The fact that the watches were in the hands of Andy McGarrett and Charlie Whipple is enough to stamp the performance as a hall trade mark one. Taylor was very despondent at Concord, N. H., and was worrying because he could not equal his past brilliant work, and wondered if his change of gear from sixty-four to sixty-eight had anything to do with his lack of finishing power. Asking my opinion, I strongly advised Taylor to go back to his sixty-four gear, and a week later he did so, and improvement was noticed at Washington and Baltimore. There is no doubt that his temporary loss of speed was due to his gear more than a belief he also had that he was stale and needed rest. I have stated before that more than one of the good men now on the path are throwing away their chances by an absurdly high gear used for sprinting purposes, and from a talk with Munger at Philadelphia I found even "Birdie" was all at sea as regards gear and stated he would experiment until he got a gear that suited him. My advice was, "Come down to sixty-four or sixty-six, the former gear preferred," for it seems impossible that a man can sprint or jump the last 100 yards with a gear from seventy to seventy-five inches. If a man can pedal fast he will have more chance with a sixty-four gear than one higher in the scramble. In ordinary races of the past, men who rode fifty-two to fifty-six inch wheels were, as a rule, the sprinters and winners of the greater number of races; and in early English racing the Palmers, Spreckels, Morse, Gaskill, Lisle, all rode about fifty-four-inch wheels. Then take Windle, Rowe, Burnham, Lumsden, Temple and nearly all the best riders of their day, they rode from fifty-three to fifty-five-inch wheels. Anybody of fair speed can "hang on" in a race, but the last quick jump is what is wanted to win, and with a high ordinary or high-g geared safety it is almost impossible to get that last quick rush. Of course, there are a few exceptions, but the rule is in favor of a low-g geared wheel. The favorite path gear will be between sixty and sixty-six in the future, and the seventy to eighty gear will not win the path races. Taylor was overjoyed at the change he found in his finish, and alluded to the fact at Baltimore, and the recent wonderful mile will serve to strengthen Taylor's opinion on the benefits of a low gear.

FOR GOOD ROADS.

In the book, "A Memorial to Congress, on the subject of a comprehensive exhibit of roads, their construction and maintenance, at the World's Exposition," Mr. Rice, the road secretary of Colonel Albert Pope, has shown his ability as a newspaper man by cramming the 110

pages of the book full of arguments in favor of good roads, and a World's Fair proposition for an appropriation for a special exhibit, and letters from President Harrison, cabinet ministers, senators and congressmen, and an introductory appeal by Colonel Pope. Extracts from all the leading papers of America, commendatory are also printed, and here Mr. Rice compliments the REFEREE by selecting an editorial from this paper and printing some on page 67 of the book, the compliment being a rare one, as the REFEREE is the only strictly cycling journal quoted. What an outlay, what tireless energy the Boston cycling philanthropist has shown, and his labor will have the thanks of the entire American cycling public, for the object of his ambition is entirely unselfish, and *pro bono publico*.

PRESIDENT BURDETTE.

I met President Burdette at 21 Park Row to day. He was after a copy of the REFEREE which had some criticisms on the Washington races in, and unfortunately all that issue had been sent out, so the energetic Burdette consoled himself by a visit to Bro. Prial, who keeps the REFEREE constantly on tap and swears by and at it at times. It proves one thing, Colonel Burdette reads the REFEREE religiously, for he explained by saying that someone had "hooked" his copy, and somebody had drawn his attention to the REFEREE criticism, which again proves there is no confine or boundary to the paper's circulation and influence, and it is gratifying to note that the league president is an intelligent president and reads the papers, and is not above reading criticisms of his own acts or those of his subordinates. The Hartford man is much alive.

CHAIRMAN RAYMOND'S ROAD RACING RULING.

From the tone of the papers and personal observations by some of the leading eastern authorities, Chairman Raymond stepped outside the jurisdiction of the L. A. W. (according to its past professions) when he laid hands on road racing men and road races. Colonel Burdette in Hartford recently stated to the writer that the league could not uphold or countenance road racing, for the simple reason that it is not legitimate, and that in case damage suits were brought in the courts the case would to a certainty go against a rider who caused damage during a race; "Why," said President Burdette, "the lawyer on the other side would say to the judge and jury, 'Here is a large body of intelligent men actually setting at defiance the laws and usages of the country,' and the league would get a nice black eye."

But Chairman Raymond, notwithstanding past professions of the league, says, "Yes, we control racing, and if a man transgress our laws on the road, why, we will make him sit up for it." The league had better not notice road races at all, but if it does, condemnation in the strongest language should be its only part in the participation in an evil that will eventually bring discredit on the sport, and place the active participants in the category with law-breakers and enemies of cycling. Special events like the Irvington, Milburn, Pullman and Martin road races, seem to have some excuse, also a relay for scientific or demonstrative purposes; but when every little town in the country, and some of them on Sunday, undertake to turn the

public highway into a race course, a halt by either cyclists or the civil powers should be called. Cyclists have no more right to use the public highway for racing purposes than horsemen, and the latter will be the people who will be the cyclists arrogating to themselves privileges (?) they (the horsemen) never dreamed of taking advantage of.

SHAKING THE AMATEURS (?) UP.

"They are after us," is a favorite song these days with many of the fast divisions, but the unsigned circular letter purporting to come from the racing board chairman does not seem to have brought much grist to the racing board's electrocuting machine for many reasons. The unsigned, weak document of the racing board no doubt would not strike terror to the manufacturer. Although the dog days are here and manufacturers are not rushed with orders, many—in fact, the majority—have, I'm told, ignored the unsigned queries of Mr. Raymond. Possibly some of the manufacturers are at the sea-side and too busy fishing to send their compliments to Mr. Raymond, but one Massachusetts firm ignored dog days and fish and showed enough proof to warrant the suspension of one of the least of the sinners, Graves, of Springfield, who has been asked to rest for thirty days, pending a peep into check-book stubs, etc. Now why select Graves? Is the Springfield lad the only sinner? As I understand it, Graves was "employed" at the factory, that is he went there once in a while, possibly nearly every day; but he was employed and received a salary. Why, some of the others do not even go near the factory, and the question is, How do they see the cashier Saturdays? Said a well posted racing man the other day, "You are evidently up to the latest wrinkle." "What's that?" I inquired. "Why, several of the manufacturers contribute a weekly sum to the clubs which their riders hail from, and the club pays its man's "expenses," so that when the racing board asks the wily manufacturer if he pays or fees a certain man for racing he can answer truthfully that he does not; the club pays the man and the maker charges up weekly contributions to the bicycle club, which, of course, is supposed to be used—well, never mind what it is used for. Truly, with the help of the racing board, the clubs and the makers, to find a true bill against an amateur these days is harder work than discovering people on the planet Mars by the astronomers. But there is much to admire in some of the modern amateurs, his expense account being one of the strong points. There seems to be absolutely no way to circumvent men from receiving money for their ability, and why should they be? In any profession ability commands price, be it a railroad president, like Depew or Van Horn, or a preacher, like Professor Swing or Doctor Talmage. Money is the reward for ability, mental or physical, and it has remained for a race called cyclists to discover that it is a crime to receive cash for hard labor performed. It is well that the signs of the times point to a change of opinion among the race of cyclists, and sentiment is giving way to sense, and within five years to receive cash as a reward for meritorious work will be looked upon naturally as it should and is in other walks in life, and people will wonder why men raced for baubles so long, while their uncles paid their board and men called a racing board asked them if they lived on suspicion or sufferance by a club or manufacturer. Which, think you, is the more honorable of the two propositions?

THE PEOPLE OF MARS.

The astronomers, with the aid of the

New York World, have for the past week been trying to prove that the planet Mars is peopled by a race far more advanced in the sciences and civilization generally than the people of this earth and maintain that a high degree of culture exists on the Mars planet. Signals to earth are thought to have been discovered the past week, the men up there trying all in their power to make us "look up." As Mars on Thursday was only about 35,000,000 miles away by telescope, it might be that the powerful Lick telescope might yet enable us to discover pure amateur, pedalling a mile in less than two minutes, as no doubt cycle construction and training have arrived at a very fine point on the neighboring world, and the tracks no doubt are an improvement on the Washington one. Of course it goes without saying that the men of Mars race for cash, and possibly receive their expenses also.

W. F. MURPHY'S SICKNESS.

Hearing that the smiling "Billy" Murphy was in danger of taking passage for the other shore (a false alarm) I went over to Brooklyn last night to investigate, and with the aid of Fulton Ferry and a record-breaking horse car, found myself in thirty minutes at William's brown stone front, 738 Putnam avenue, and found the popular eastern racer propped up in bed, receiving the best of attention from a devoted mother and sister. Murphy looked far from being ready to "cash in his chips," and, barring his luxuriant whiskers of two weeks' growth, he looked and acted the same chipper boy as of yore. That ordinary race at Washington did the business, and that bottom corner the cause. It almost broke Murphy's heart because he could not join in the welcome home to his old chum Zimmerman. But a letter from McDermott asking him to hurry up and get well and join Zimmerman in training cheered the winged boot representative very much. Murphy's bedroom is a thing of beauty, and turn which way you will, a glittering array of prizes meet the eye, some five hundred being arranged interlarded with photos of prominent cyclists all around the room, and many through the house. One large drawer is full of medals, and Murphy says he is proud of them all and means to keep them. The mother and sister said that one thing surprised them in regard to Willie's racing, and that was "he thinks as much of the last prize he won as he did of the first, and zealously treasures the last." A large room adjoining the racer's bed room is fitted up as a gymnasium, provided with punching bag, gloves, rowing machines (two), home trainers, dumb bells, clubs, etc., which accounts for Murphy's getting fit so early in the season. The patient expects to be on early next week, but at one time of his sickness he was in a bad way. In a general talk Murphy spoke very highly of Willie Windle, his gameness, his fair riding and other good qualities, and believes Windle was never afraid of any other man on the path. Murphy corroborates what Asa Windle told me recently, which was that Windle got up in the piano race at Springfield while a very sick boy, and the fear that people would say that he was afraid to meet Zimmerman was what prompted him to give the long boy from New Jersey battle in that famous race. Murphy says that a well-known eastern racing man approached both him and others more than once to enter into a scheme to pocket Windle to prevent him from winning, but the scheme was rejected, as they all like Windle.

COLLEGE STUDENTS IN TROUBLE.

What a fascination there is in a bicy-

NOTE TWO DAYS' RECORD OF.....

“Imperial Wheels”

ECLIPSING EVERYTHING YET MADE in the way of FIRST PRIZES, taken in TWO DAYS, July 4th and 5th.
OUT OF ALL EVENTS IN WHICH “IMPERIALS” WERE ENTERED
2nd or 3rd PRIZES WERE IN ORDER WHEN 1sts WERE NOT TAKEN.

FIRST PRIZES.

1st Prize,	1 Mile,	Ill. Div. Championship.
1st “	2 Miles,	“ “ “

Three Extra Special Values.....

.....THE LIKE NEVER BEFORE SEEN OR HEARD OF.

Dealers and Agents will Find it to Their Interest to Investigate.

VALUE NO. 1.	{ 1891 Three Part Sylph, Spring Frame, Cushion Tired, Light-Weight and Strictly High-Grade Safety Unequaled for Easy Riding and Running Qualities, and the BEST VALUE OFFERED. }	Popular Price, \$125. OURS, \$95.00.
VALUE NO. 2.	{ 1891 Juno Safeties, almost identical with the '92 Juno and \$20 Lower in Price. Better Value in a Cycle has never been offered. }	Cushion Tire, \$55.00. Solid Tire, \$48.00.
VALUE NO. 3.	{ 1891 American Ramblers. Direct Spokes, Cushion or Solid Tires, Diamond or Drop Frames; and Light Ramblers. Tangent Spokes, Solid Tires, Diamond or Drop Frames, one of the best and most popular makes on the market, and so well known that further description is unnecessary. }	\$90.00. \$95.00 And \$110.00.

DISCOUNTS TO THE TRADE. We have some other equally attractive bargains, besides being Importers of Rud re Cycles, manufacturers of the Sylph and Overland, manufacturer's largest jobbing agents for the entire Western Wheel Works' line in the West. Agents wanted. Catalogue Free.

ROUSE, HAZARD & CO., 89 G St., Peoria, Ill.

ele, not only for a natural born thief, but, like a serpent, the wheel claims young men who would never think of stealing a horse or anything else, but they run the risk of jail and dishonor for a bicycle. Here is a case in point. Charles Stevens, nineteen years old, of 410 West Twenty-sixth street, and Clarence Mortimer, twenty years old, living at new Canaan, Conn., both graduates of the New York University, were arraigned before Justice White in the Jefferson Market police court yesterday, charged with the larceny of two bicycles, worth \$135 each. The two youths went to Albany and had "a good time." They ran short of funds and were unable to pay their fares back to the city. In their extremity they hit upon the scheme of hiring a bicycle and riding home. They called on a Mr. Young, dealer in bicycles, and leased machines. As they were well-dressed, gentlemanly looking fellows, Mr. Young deferred asking for payment until they should return. The stranded youths rode as far as Castleton, where they boarded a hay barge and slept in clover till they reached New York. Meanwhile Chief of Police Willard, of Albany, had been notified by Young, and one of his detectives traced them as far as the barge wharf at Castleton. Then the chief telegraphed to Acting Superintendent Steers, who detailed Detectives Sergeants, Aloncie and Formosa to arrest the pair. The detectives found them just preparing to leave the barge at the pier, foot of West Thirty-fourth street. They had the bicycles with them, and were locked up over night at police headquarters. Justice White committed the prisoners to await the arrival of the Albany police. Detective Nolan duly arrived and both students were taken to Albany for trial and disgrace.

FRANK EGAN AS A "SLOPPER."

Wheeling accuses the only "Aranza" of being a "sloppist," and gives Frank the palm for "slopping over" in his writings. Never was a charge more unfounded, for Egan's writings as a whole have that sting and crispness that possibly caused the London criticism. It has been so long since Egan commenced writing for the cycle papers that he has earned the distinction of "the nester" of the cycling press correspondents of America, and "slopping over" has never been a feature of Egan's work. He has a happy knack of discouraging the microbes in current news and events, and is a close reader and observer, and when Frank probes for anything he generally hits the object sought for, be it the "Am-chor" question, or Evenin *Post* comments on a man who could not ride "for nut." No, *Wheeling* is entirely mistaken, and Mr. O'Reilly looked through the wrong end of the telescope when he discovered "slopping," for Frank Egan's writings are luminous, voluminous and delightful.

MORGAN.

PHILADELPHIA, Aug. 8.—The "Cycling Authority" and other papers that came out with the positive assertion that the grounds of the Tioga Athletic Association had been sold, and as a consequence the new cycle track ruined, prided themselves upon the "scoop," but the rumor—and it was only a rumor—has not yet been verified. The entire tract of some forty acres belongs to an estate and cannot be sold for several years without the consent of all the heirs. H. R. Schrack, the big builder, who owns a great deal of property in the vicinity, has been trying to buy the property for a number of years, but when interviewed by officials of the T. A. A. stated frankly that, while anxious to purchase the ground, he had no reason to believe that there was any

present likelihood of accomplishing his object. The association managers know pretty well how affairs stand, and have no fear of any trouble whatever. The track and grounds will be continually improved, with the ultimate object of making it one of the finest in the country.

Mayor Stuart was one of the guests at the Zimmerman banquet Aug. 3, and in responding to a toast said, among other things: "I am proud to say that I come from a city which has the reputation of having the cheekiest and most nery bicycle riders in the country. Some time since, when a mild suggestion was made that they should carry lamps and bells through the streets, they, after having in the meantime run over and killed several people and also knocked a locomotive off its track, held a meeting and decided that if people did not want to get hurt they (the people) should be compelled to carry lamps in order that the wheelmen could see them at night." Mr. Stuart also, in the course of his remarks, referred to the Lord Mayor's cup, won by Zimmerman, and this set one of the cheeky Philadelphians present to thinking. After the supper was over Mr. Stuart was approached by Mr. O. S. Bunnell, who, after apologizing for his nerve, asked the mayor if he did not think it would be a nice thing for the mayor of Philadelphia to follow the example of his English lordship. The mayor was inclined to treat the matter facetiously at first, but—well, to make a long story short, the Park Avenue Wheelmen will offer a handsome and valuable silver urn at their meet Sept. 24.

The latest proposal is a team road race between Philadelphia and Wilmington riders. Whether it will be brought about or not is a matter only of conjecture. The riders of each place excell on different roads, and it might be somewhat difficult to select a neutral course.

PAUL BERWYN.

PORTLAND, Me., Aug. 5.—Considerable interest is being felt over the match road race of E. H. Gargan, of Portland, and John G. Lawrence, of Saco. This race is the result of one July 4, when Gargan beat Lawrence about 250 feet and overcoming a lead in the last three miles of about a half mile. The race will be run over the same course for a \$50 gold watch, and other races will be held at the same date. Lawrence holds the Maine mile championship.

The cycle business in this section for the last two or three weeks has been very quiet, but the indications are that it will be much better for the next few weeks, as there is a growing interest among new riders now that pneumatic tires are a go. With the exception of one agent in this city no cushion tires of any account are reported sold, ninety-five per cent of the trade being in pneumatics. There is a strong probability that the Portland Wheel Club will disband and go in a body to the new athletic club which is being formed; and if it is a success, which now seems assured, it will be a great thing for the sport in this city, as it has upwards of 600 applications for membership. The REFEREE is the first of the bicycle papers to reach this city, arriving here always Monday on the first mail and some times Saturday night.

FOREST CITY.

BUFFALO, Aug. 8.—There has been very little of importance done this past week of special interest to the cyclist. Many of the wheel clubs have had their regular monthly meetings, and others have transacted business of more or less importance. At its regular monthly meeting, the Wanderers Bicycle Club accepted the resignation of the Buse brothers, who were at the same time ac-

cepted as members of the Ramblers Bicycle Club. The Wanderers will give a road race for its members on Saturday, and will endeavor to have an interesting event. This club is still holding forth in its old quarters on Fillmore avenue, and although there has been and is considerable talk about "getting rooms up town," nothing has been done, nor is it at all likely will be done till the chilly blasts of cold winter are upon us. There are such peculiar ideas of east and side west side here, that to be popular and a go you must be centrally located and on the west side or nearly so. This idea, though popular, is not always correct and we do not see why the Wanderers cannot be as prosperous in one place as in another. But we understand that an effort will be made to secure a favorable up-town location. At its last regular outing this club, the Wanderers, took thirteen of its members over to Ridgeway, about twelve miles from Buffalo, where a most delightful day was spent. The destination was a certain farm house where ample provision, in the shape of iced beer, cigars, ice cream, cold chicken and other dainties had been prepared for the boys, and it is not necessary to add that the boys showed their appreciation by doing justice to what was placed before them. The annual dip in the lake was indulged in, and a more satisfied lot of boys could not be found when the good-byes were uttered.

The Ramblers Bicycle Club, with the Tonawanda Bicycle Club as its guest, on Saturday night took a boat, a great big boat, too and had a stag party, and went somewhere, just where we don't know, and we have heard that they had a good time; a right royal good time, just as they always do, but we were given to understand that there was to be nothing said about it, so we regret that we cannot be more explicit. Now, for the life of us, we cannot see why the scheme and the enjoyable time was kept so dark, but we suppose there was a good reason for it.

The near future has two very grand banquets in store for us, and one of them will be an event of the season, the supper given in honor of Zimmerman. That it will be the success of the season goes without comment from the fact that the Ramblers B. C. will have its active men upon the committee. The other will be given to the wheelmen, delegates from the several wheeling clubs who go to make up the Buffalo Cycling Exposition Association. This will be tendered them by the manager of the fair, G. M. Robinson, and we trust that the boys will have a most enjoyable time.

WILLIE DUNN.

ST. LOUIS, Aug. 8.—The Retail Grocers' Association held its annual picnic yesterday at the fair grounds, and among the athletic events were two bicycle races, a one-mile novice and a two-mile handicap. The track, as usual, had not been prepared in any way for the races, and a hard rain the night before had not helped matters. Cal M. Rosborough, of the Cycling Club, won the novice in 3:31 1-4, with J. M. McDaniel's second. The two-mile handicap was won by Will Lang, of the Cycling Club, from the 150 yard mark, with Charles Bowman, 150 yards, second. Will Cox started on scratch, but on account of the poor track was not able to catch his men. These two races lost fully two-thirds of their entries on account of the track.

The principal topic among wheelmen is the trip to Quincy next Saturday night on the steamer Gem City. Quite a large number of men have already handed in their names, and as the open-hearted hospitality of the Quincy boys is well

known, the trip is pretty sure to be a big success.

George M. Wilder, of the Cycling Club, is hard at work on his latest fad, and it promises to be a big success. His idea is a military cycle corps, and it is understood that the gentlemen in charge at Jefferson Barracks have promised their assistance. The principal part of the programme is a trip from Jefferson Barracks to Ballwin and return, a distance of sixty miles over hilly roads. The squad of wheelmen must start together and finish together at the Barracks. It is not to be a scorch, as fifty to sixty miles is considered a good forced march for cavalry to cover in a day, and all the wheelmen want to do is to demonstrate that bicycles can do this work just as well, if not better, than horses. The local riders are very enthusiastic over the affair.

R. H. Laing, John A. Weaver and E. N. Sanders are touring through the country around Denver this week, and intend to tackle the coast down Pike's Peak before they return.

PEORIA, Aug. 9.—The Y. M. C. A. Bicycle Club will hold a road race on or about Sept. 1. The club has a membership of about fifty, all active members. They are very nicely fixed financially, and the membership is rapidly increasing. All the bicycle houses in the city have promised to give them a prize for the race, and its success is thereby assured.

The Peoria Bicycle Club will ride to Henry on the 21st of this month, at which point they will meet a party of Chicago tourists. Both parties will then ride to Chillicothe. "All the members in the club are requested to turn out and swell the list to a good round number.

At the last regular meeting of the Peoria Bicycle Club the constitution was revised, and the regular monthly dues will now be \$1.25 in place of \$1 as heretofore. After January the initiation fee will be \$10, and the gentlemen who want to belong to the Peoria Bicycle Club after hat time will have to be the owners of and riders of wheels.

Fred Patee is home on the sick list.

A number of Canton, Ill., tourists, on their way to Chillicothe, stopped over in Peoria last Sunday. The P. B. C. threw open its doors to the tourists and endeavored to make their stay in the city a pleasant one. They were indeed a jolly lot, and the latch string of the Peoria club house will always be hung on the outside for them. LAUREL.

MILWAUKEE, Aug. 8.—Tippecanoe Lake, situated about four miles from Milwaukee's business centre, presented an appearance last Saturday evening which will long be remembered by those fortunate enough to be present. The lake is an artificial one, and although miniature in size is exceedingly beautiful. All around the shore were suspended Chinese lanterns, while the dancing pavilion was strikingly illuminated by almost every conceivable shape of lantern manufactured. A brass and string band discoursed music for entertainment and dancing, while those who enjoyed aquatic sports availed themselves of the numerous boats at hand. It was the summer night's festival of the Milwaukee Wheelmen, and was participated in by 100 members and their lady friends. The members assembled at the club room and were provided with Chinese lanterns, and the run to the lake took the form of a lantern parade.

There is a remarkable activity in Racine bicycle circles since Hueffner won the Milwaukee road race. It is reported that they have arranged a road race

from Kenosha to Racine, but have taken the precaution of limiting the entries to Racine wheelmen. The event will no doubt end in being a purely local affair, and will create no stir outside of Racine.

The Comet Cycling Club at its last meeting decided to secure new quarters and fit them up in first-class style.

John Reitzner, of the Reitzner-Pritchard Cycle Company, who distinguished himself so well in the Milwaukee road race, is playing in hard luck. He intended entering the Parkside races, but will have to postpone it now until next year. On Wednesday last he received notification of his suspension for sixty days from the league for riding a race on Sunday.

The schedule of the Milwaukee Wheelmen for the month of August is as follows: Sunday, 14th, 8 a. m. sharp, "Cooney," thirty-three miles; Sunday, 21st, 8 a. m., basket picnic to Donge's Grove, ten miles. Colonel Andrae will furnish the ham won in the Milwaukee road race, and General Seward will furnish the bread, etc. Sunday, 28th, 8 a. m. Cedar Lake. JACK ROYAL.

CANTON, Ill., Aug. 8—The Canton Cycle Club is in the throes of reorganization, and about thirty men will form the new club. Canton has an elegant half-mile track that is free to local wheelmen when not in use by the horsemen. Anderson, Perkins, Dean, Plattburg, Heald, Stevens, Gaulbault, Myers and others train nightly. Anderson and Plattburg for the mile, and Heale for the longer distance, are the fastest men.

Sid Stevens attends the conclave at Denver and will return across country on a wheel.

A. H. Overman has a namesake at Canton in Albert H. Overman, his nephew, a member of Canton C. C.

The Peorians dined at Washington Sunday, the 21st, with Meade of the Humber-Rover Company as a guest. Meade anathematized those Peoria roads as the toughest he had seen.

FOR CHICAGO READERS.

Club News and Notes, Personal Gossip and Interesting Paragraphs.

B. G. Printz, of Springfield, O., passed through Chicago awheel last week, on his way to Dixon, Ill.

J. Petstyle has resigned as president of the Plzen Cycling Club, and F. Liska has been elected to the vacancy.

J. C. Starr's resignation as captain was laid on the table by the Englewood Cycling Club, and it refuses to accept it.

The Ravenswood Cycling Club is giving ladies' nights with dancing and refreshments every Wednesday evening.

When Taylor's new record for the mile was made known to R. D. Garden, he rubbed his hands and exclaimed, "Columbia!"

Captain Walter Bray of the Aeolus club left for Wisconsin on Tuesday to recuperate from a four weeks' attack of typhoid fever.

The Plzen Cycling Club runs for August are, 14, Irving Park; 21, Schutze Park; 28, Riverside. In September the club goes to St. Joe.

By Aug. 15 the Columbia Wheelmen will be in their new club house at 311 West Division street, built for them this summer at an expense of \$20,000.

W. C. Thorne returned last week from Oconomowoc, where he has been since the Washington meet, ridding himself of the effects of Washington water.

Sam Danziger, one of the famous Big Four party of g. o. o. days, seeks a partner for a two weeks' tour, beginning August 14. Mr. Danziger may be found at the Tribune office.

One hundred members of the Columbia Wheelmen attended the stag picnic at Franklin Park Sunday last, spending the day in athletic sports, boating, fishing, swimming, and at the well-laden tables of good things from the club house larder. Most of the party wheeled it out while others went out in the bus.

These annual stag affairs of the Columbia Wheelmen are enjoyable, and could be copied to advantage by other local clubs.

Wesley Reedy, of Ottawa, Ill., is in Chicago, probably to stay. Reedy was a prominent worker at the division meet held at Ottawa, but has been on the road constantly ever since.

The Lake View Cycling Club gives a party on the pretty lawn of its club property Aug. 19. A platform will be erected for dancing, and refreshments will be served throughout the evening.

E. J. Righter, of Lincoln, Neb., one of that state's most prominent wheelmen, stopped over in Chicago last Thursday. Mr. Righter spent two months in San Francisco, and was on his way to New York for a six months' visit.

In the absence of Chief Consul Gerould, Secretary-Treasurer White gave instructions to C. R. Francois, of this city, to take the case of Joe D. Guinea and C. W. Platt, and to sue the Cicero policemen who clubbed Guinea and arrested Platt.

W. H. McCormick, of the Buffalo Press Club, was a visitor of G. W. Cusman last week. Mr. McCormick states that his club is the great Buffalo club. They may ask for the L. A. W. meet of 1894, but he can not say. Baltimore is their opponent.

P. W. Yoos, of this city, returned from Denver and Pike's Peak on Saturday. He saw Mrs. Candy start on her perilous trip down the peak, and declares it a suicidal attempt. She bound her M. & W. tire with felt a quarter of an inch thick, and wound tire tape around that.

The north side has another cycling club, the North Chicago Wheelmen. This organization was formed July 1, with twenty-seven charter members, and now has eighty odd enrolled. The club has in prospect a house at 1717 Belmont avenue. The officers for the ensuing year are as follows: President, A.

G. King; vice-president, George Davis; secretary, Zilach; treasurer, Leyden; captain, J. Ulrich; first lieutenant, J. Schoenberg; second lieutenant, L. Strausser. The dues are \$1.50, or \$1 when paid by the first of the month.

Illinois club runs for August are: Aug. 7, Wheeling; 21, St. Joe, and 28, Ottawa. On the latter run the party leaves the club house at 2:30 Saturday afternoon, stopping over night at Joliet and reaching Ottawa Sunday in time for a trip to Starved Rock, Deer Park and the many beautiful canons of this region.

Chicago has seven cycling clubs in the Y. M. C. A. These the South Chicago Y. M. C. A. Cycling Club entertained at a banquet this week, Thursday evening, and later escorted through the rolling mills. The seven organizations are the Madison Street, Medical, German, Ravenswood, California Avenue, and Englewood.

The Lincoln Cycling Club's run card for the months of August, September and October indicates the long distance nature of the club's riders. Over a dozen long runs are scheduled, most of them centuries. The runs are to every available point around the city. Aug. 7, century, Fox Lake; Aug. 14, century, Lake Zurich and fifteen miles on boulevard; Aug. 21, century, open; Aug. 27 and 28, Waukesha; Sept. 4, century, fourth annual souvenir; Sept. 11, Fort Sheridan; Sept. 18, century, Joliet; Sept. 25, ladies' run; Oct. 2, century, Milwaukee to Chicago, train up Saturday night; Oct. 9, century, Elgin course; Oct. 16, century, Wheeling and Waukegan; Oct. 23, century, open; Oct. 30, finale, century, Elgin course. The Lincoln's annual road race occurs Aug. 20, entries closing Aug. 13. The annual track championships will probably occur Aug. 27.

The Detroit Wheelmen held a lantern parade Monday night. On the same evening the Wheeling (W. Va.) Cyclers had a big parade.

Outlook for Next Season.

The frightful heat has taken the place of the June rains, and the bicyclist feels the one as much as the other and will not ride. Furthermore, he will not buy, and so 1892 is evidently going to rank with 1891 as a disastrous year for the trade. The failure of a big Philadelphia house will be widely felt, and many small houses may go down in the crash, while one or two English manufacturers may find it difficult to keep above water. I also understand that a Chicago manufacturer of some note has closed his doors, and there are rumors that another is in a bad way. All this trouble is the perfectly legitimate outcome of the foolish business policy that seems to be the style in the cycle trade. Credits, discounts, prices and integrity have none of them been respected, but every man has built and sold to suit himself, and always with the idea that his profits were going to be so large that loss was not to be taken into account.

The bicycle business is in a bad way, a very bad way; there is ruin in the air. The market is glutted with machines of all grades; public confidence is impaired, and the World's Fair takes place next year! I fear that this very simple sentence means a good deal more than appears on the surface. The World's Fair may be a good thing for the country; in my humble opinion, however, the reverse will be true. The amount of money that will be drained from the small cities and the country, and deposited in Chicago in the hands of railroads, hotel people, amusement establishments and saloons will play particular whack with the bicycle business, and many another business, too, I am afraid. That the concentration of vast crowds, and enormous sums of money in one place, is not conducive to general prosperity I think can be easily proved by reference to the

financial reports after the fair in London, Philadelphia, New Orleans and Paris, and we all know that special lines of trade always suffer first and greatest. It is therefore with very great forebodings that I at least look forward to '93.

There has never been a time in the history of the trade when, at this season of the year, there was such stagnation as is exhibited just now. Business is absolutely at a stand-still. Right in the midst of what should and what always has been the busy season, dealers are overstocked and buyers are absolutely nil. Some are living on hope and trusting that the fall will bring trade, which hope, it seems to me, is misplaced. Some are living on the leniency of their creditors and may close at any moment, while the makers, poor devils, are quaking in their boots and wondering how they shall weather through the "cool and cruel winter."

LA COTE MAL TAILE.

The New Howe Coming.

It more than probable that Stephen Golder and a sample New Howe machine will be in America by the first day of next month, for he is to sail on the 20th inst. from Liverpool. The New Howe has probably become better known than any wheel on the market in the length of time it has been out. It is, unquestionably, a splendid wheel, and it has been advertised in a very thorough manner. The New Howe is very like the Humber; at any rate it takes awfully well. It scores everywhere. Arthur Du Cros lowered the Irish half-mile to 1:09 4-5 on a New Howe, and the Manchester Center N. C. U. championship for fifty miles also went to a New Howe rider. It has recently won races at the Isle of Man, Clyde, Leeds and other places in Scotland and northern England.

Broke the Elgin-Aurora Record.

Charlie Cutting claims to have broken the Elgin-Aurora record Sunday, doing the distance in 7:56, seventeen minutes inside Ulbrecht's record of 8:15 made last year. Cutting started on the Cook County Wheelmen's century run, left the parties early and reached Aurora at 8:35 and Chicago at 11:56. The roads were horrible, and Cutting says almost unrideable in places. Sixty started the ride and owing to accidents but thirty finished, most of them by 6 o'clock. Preident Graham fell at Naperville and was forced to ride in, using but one pedal, but finishing. The finishers were, C. D. Cutting, W. F. Pieronnet, W. M. Shumway, P. H. Green, H. Misbach, F. W. Osmun, W. A. Thompson, Boxley, A. G. Moore, Foster, J. Hrach, R. C. Craigie, J. E. Dickinson, Salvage, R. F. Clark, Reinhardt, C. Grundseth, Holdthaefer, Ed Grundseth, Verhoeven, Ed. Furner, W. E. Skinner, W. L. Whitson, Frankenthal, R. Renter, Fred Howard, W. Montross, C. E. Graham, G. E. Moshier, James Levy.

Cycle Races at Summer Resorts.

One would think that the popular seaside summer resorts with their vast fun-seeking population would be able to offer the best of inducements for the holding of successful race meetings, yet with poor tracks, notwithstanding an abundance of material close at hand with which to build cheaply the finest in the land, and with seemingly no competent management to take charge of a tournament, the seaside visitors are left to while away their idle moments with wild west shows, base ball matches and occasional athletic tournaments. Asbury Park is a notable exception in this matter, and with a fine track and a wide-awake club has held and will on Friday and Saturday of this week again give

first-class sport, with valuable prizes to attract the fast men. Long Branch is too much addicted to horse racing to take much interest in such matters, but at some of the other resorts a cycle meet would be a profitable venture if properly managed. A venturesome young man at Atlantic City, one of the largest resorts on the coast, recently made an attempt to run a series of race meetings but apparently having not the slightest idea how to conduct the same secured an audience of only 200 people at his first venture, and having scarcely any entries was compelled to ask several wheelmen spending their vacation there to ride in order to help him out. This ended the series.

Another fellow, at Cape May, had a laudable scheme of which he gave one week's notice, that of having races, a parade, drill, etc., with cash prizes to the clubs taking the largest number of men down. As he failed to offer any prizes whatever for the races, no notice was taken of his proposal by anyone, and the great event was called off with less notice than it was announced.

It is seldom the case that there is a strong club at any seaside town, but there is a splendid opportunity for some first-class hustler to step in and furnish good amusement and make a neat profit at one and the same time.

Room for Work.

B. F. White, secretary-treasurer of the Illinois division, has been taking a list of cyclists who do not belong to the league in Illinois. He has a list completed as far as possible outside of Chicago, and has between 5,000 and 6,000 names enrolled. Verily a great chance for missionary work among the heathen in this locality.

Eastern Race Notes.

Manager Bowden, of the Raleigh company, left New York Saturday night in company with Zimmerman for Hamilton, Ont., where the latter raced Monday. Mr. Bowden will visit his two sisters in Buffalo while in that region.

Zimmerman looked tired and completely run out after the finishes at Asbury Park races last Saturday, being completely exhausted after one finish with Taylor, which makes many think that he is getting stale. Zimmerman is a glutton for work and would do well to leave many of the handicaps alone.

C. Fred Coope, of the Common Sense Bicycle Company, of Philadelphia, is undoubtedly as fine a safety trick rider as there is in America. His performances at Philadelphia and Asbury Park races on the Common Sense Hickory wheel surprised even Dan Canary. In his travels for the company Coope frequently gives exhibitions in public places free.

Tyler is resting at his home, Highlandville, Mass., and Berlo, Hoyland Smith and others are keeping out of Jimmy's way. Windle is training, and we might see all of them together at Springfield. One thing seems certain, and that it will remain for either Tyler or Windle to lower Zimmerman's colors. If neither of the former can do it, why, then the Jersey "skeeter" will be boss of the world.

Taxis looked completely off at Asbury Park, and he stated to a REFEREE man that he had been dancing and swimming more than training. George (or "River-side") Smith, Elliott Mason's protege, rode well, and is a wonderfully plucky and well-built young man. Carl Hess, of the M. A. C.—he of the breechlet—rode with a dash that surprised everybody, and the young man from Ger-

many is pretty speedy. George Taylor gave Jimmy a terrible race in the quarter, and Asa Windle's push came in handy in giving George a decided lead at the start. Of course Taylor was favored with the inside position, but Zimmy rode lopped on his side, not losing a bit more ground than he could help, and what a jump he made on the straight! It was a great finish; Taylor sat up about five yards from the finish, stating he thought he had crossed. Taylor, as a rule, don't make excuses for defeat, but if he had hustled a bit more he would have beaten Zimmerman, who was completely exhausted at the finish, and it was only run by a foot.

The writer likes to hear from George Lacy Hillier at all times, and when Hillier speaks he generally says something worth listening to; but when "Jurge" pretends that he knows nothing of the festive "bookey" on English racing paths, he is and has been shutting his eyes at nearly every important cycle race meeting in England for years. Why, at the Alexandria Park jubilee tournament at London in 1887, the writer, who was present, counted fourteen book makers who were yelling their "odds" and doing a fair business. It was right at the club house entrance, too, and George Lacy Hillier was a judge at that meeting. I'm afraid our friend across the water is pretending blindness in his devotion to the pure amateurism and the lively corpse, maker's amateur-

ism. I would recommend the editorial of Priol of three columns in length in this week's *Wheel* as an antidote for blindness to G. L. H. If there ever was a pure amateur and true sportsman, Hillier is the man; but you commenced when the game was young. Mr. Hillier, and manufacturers few. Times change, speed commands price, and lack of speed at critical times receives reward from an

English book-maker. The chances of corruption, when men race outright for "the stiff," will be less than they are at present. They will try the cash system last of all in England, like all other, or nearly all other great things first tried and approved of on this side. Australia says cash is a success, and the charge that it has produced roping is unfounded and contradicted by both Australian press and public. MORGAN.

A Meet for St. Johns, Mich.

ST. JOHNS, Mich., Aug. 8.—Preparations are being made for the meet of the St. Johns Wheelmen, Thursday, Sept. 8. The programme and prize list will be out in a few days, and it is the intention of the boys to far surpass all previous efforts. Those who attended our meets in 1888 and 1890 know what that means. We have splendid athletic grounds and the best quarter-mile bicycle track in the state. Work on the track is progressing finely and it will be kept in the best of condition. The prizes offered will attract the flyers, and some good time is confidently looked for. Marshall, that "St. Johns farmer," is in training and is beginning to show up some of his old-time form, which carried him to the front two or three years ago. His record in the Ann Arbor-Ypsilanti-Saline road race of 1889 still holds for the course. His jolly good-nature has won for him many friends who rejoice to again see him on the path.

Coming Events at Rochester.

ROCHESTER, August 9.—On Labor Day the Ramblers' Bicycle Club will hold a tournament at the Driving Park. There will be a large list of elegant prizes to be awarded in the following events: One-mile, novice, club members only (safety); one-mile, safety, open; two-mile, handicap, safety, club members; half-mile,

safety, open; one-mile, club-championship, safety; one-mile, safety, city championship; three-mile team race, open to Rochester clubs; one-mile lap race, open to all men on grounds.

Sometime in September the Genesee Bicycle Club will conduct a road race from Buffalo to Rochester. Many attempts have been made to hold a race over this course, made memorable by the big race of October 22, 1889, when the local riders almost exterminated the Buffalo boys. Prizes tempting enough for the best riders in the state will be offered, and every effort will be made to make the contest even greater than the one in the snow storm of '89.

There is a probability that the Lake Views and Genesees will run a joint tournament here some time in September. If the project is carried through it will mean one of the best meetings of the year. PANHANDLE.

Holbein's Big Road Record.

On Wednesday the Coventry Machinists' Company received a cablegram from Coventry, stating that Holbein had ridden 359 miles in twenty-four hours on the road, breaking the previous record by twenty-three miles. He rode a Swift.

Hunter and Ullery Won All.

Piedmont, Ind., had a small sized tournament last week Thursday. F. E. Hunter won the mile race in 2:43 2-5, closely followed by Ullery and E. P. Roll, of Indianapolis. In the two-mile race Ullery won with ease in 5:59 2-5, his closest contestant being Frank Hornidy of Anderson. The four mile race was won by Hunter, with C. A. Kirkle, of Richmond, second. Lester McFaugh of Pendleton won the Madison County half-mile race in 1:22 1-5.

Zimmerman Wins Everything.

Asbury Park, one of the best-known New Jersey summer resorts, is a great place. The drinking water is bad, the beach is dangerous, no one is permitted to bathe on Sunday after 9 a. m., and the sale of liquor is prohibited at all times. Still, thousands of people live there during the heated term and are presumably happy. The place is popularly supposed to belong to a gentleman by the name of Bradley, familiarly known as "Founder" Bradley, who, having at one time owned nearly the entire town, sold such portions as he felt disposed to different parties, with the restriction that they should never do anything which he considered objectionable. Fortunately, bicycle riding and racing were not included in this class; but even if they had been it would have made but little difference this week, as Proprietor Bradley stepped down and out, and the whole place—hotels, boardwalks, beach and ocean—belonged by general consent to Arthur A. Zimmerman. Ever since he was landed last week from the deck of the Silver Stream he has been the observed of all observers; nothing has been too good for him; no one else has been mentioned. Ladies stop talking fashions to turn and look at him on the street; every wagon, every cart, every horse-car, every fence has "Zimmer" plastered on its side, and those who are not up in cycling are at a loss to know—as Mayor Stuart of Philadelphia said at the Coleman house banquet—"whether it is a tooth wash, a cough syrup, or something new in the wild west show business." Not only is Zimmer here, but Zimmer's father, his mother and his trainer, Joe McDermott, also—and Mr. Bradley is forgotten by everyone.

The Asbury Park wheelmen are a hustling crowd and know well the effect that the presence of their favorite rider would have. A fine three-lap track, commodious grand stand and good prizes drew forth both audience and talent, although the familiar faces of Tyler and Berlo were absent. A goodly number of prominent wheelmen were present to witness the "American speed merchant's" first reappearance, amongst whom were Joe and Harry Goodman of Hartford; Bunnell, Crowther, Frank Egan, G. Carleton Brown (referee second day), F. Z. C. Martin, Dr. T. N. Gray, Samuel Clark, Kluzer, George Atwater, George D. Gideon, S. Wallis Merrihew, D. E. Miller, F. P. Prial, J. J. Prial and "Senator" Morgan.

FRIDAY'S RACES.

Zimmerman made his first appearance in the fourth event of the day, the second heat of the one-mile, handicap, starting from scratch with G. W. Coffin, 120 yards; H. Hawthorn, 160 yards; J. Blake, 165 yards; W. J. Mooney, 180 yards; N. H. Mooney, 180 yards; W. J. Blake, 180 yards; Paul Grosch, 120 yards; H. B. Martin, 170 yards; L. D. Dexter, 160 yards, and F. C. Doup, 180 yards. Before starting for the track he evidently had no desire to ride, and said that he was going to do it as a favor to the club. The audience was waiting for him 4,000 strong and when he came out in the same off-hand, careless way, regardless of everyone, as of old, there went up a mighty

cheer, which was repeated again and again as the band quickly started to play "Yankee Doodle." He wore the Asbury Park Wheelmen's colors exclusively, and feeling carefully of his tires mounted in his old lumbering position. At the crack of the pistol he got off well, although, apparently, a bit nervous and evidently anxious to win. On the first lap he had made some headway, but not enough to arouse any great enthusiasm. But on the backstretch he began to pick up his men slowly. On the second lap he was half way through the field, and entering the straight on the finish sped away from them all, although Grosh made an effort to keep first position. Then, while audience, press, track officials and police went wild with enthusiasm, he dismounted and disappeared once more into the dressing room. He did not start in the final, as it came directly after the finish of the mile, open.

His next appearance was in the team race, where he had an easy thing in winning first on each lap; but his presence was not sufficient to make the home team a winner. The event of the day was the one-mile, scratch, with prizes for the laps and Zimmerman, Hess, G. C. Smith, Taylor, Munger and Mulliken for starters. "Riverside" Smith set out for the first lap prize, which he took without opposition, Carl Hess coming up and capturing the second, Zimmerman and Taylor riding together twenty yards back. Then up came the Jerseyman with a rush, passing all and making his own pace, Taylor following at fifteen yards. Around they went, faster and faster, into the stretch, Zimmer constantly increasing his lead and evidently running Taylor clear off his legs, won with thirty yards to spare and not looking back until he crossed the tape. This spurt was nearly one-third of a mile in length.

His fourth race was a two-mile, handicap, for New Jersey riders only, in which Paul Grosh and Coffin made a fight for place, but in which the champion once more distinguished himself. Munger has added a doll's bonnet to his already outlandish rig, and was greeted by the band with "Where did You Get that Hat?" He met with no success, being evidently again out of shape.

Following is the summary:

One-mile, novice—F. Stone, W. W., 1; E. Montgomery, Windsor Locks, 2; time, 2:44 2-5.
One-mile, handicap, first heat—A. B. Rich, 70 yards, 1; Carl Hess, 60 yards, 2; H. C. Wheeler, 65 yards, 3; time, 2:22 1-5. No scratch men rode.
Second heat—A. A. Zimmerman, A. P. W., scratch, 1; Paul Grosh, 2; George W. Coffin, 3; time, 2:26 1-5.
Third heat—J. R. Hazleton, 70 yards, 1; H. Watson, 120 yards, 2; J. H. Draper, 70 yards, 3. Munger, scratch.
Final heat—Hess, 60 yards, 1; Grosh, 2; Rich, 70 yards, 3; time, 2:29 3-5.
Two-mile, handicap—H. C. Wheeler, 100 yards, 1; Carl Hess, 100 yards, 2; A. T. Himrichs, 280 yards, 3; time, 5:08. No scratch men, Munger 30 yards.
One-mile, team—Orange Athletic Club, eighty-six points, 1; Asbury Park Wheelmen, eighty-four points, 2.
One-mile, 2:50 class—G. C. Smith, R. W., 1; A. B. Waters, Brooklyn, 2; H. Bonum, K. C. W., 3; time, 2:45 2-5.
One-mile, scratch—A. A. Zimmerman, 1; George F. Taylor, 2; Carl Hess, 3; time, 2:31 1-5. Ten starters.
One-mile, 2:40 class—Paul Grosh, O. W., 1; A. H. Rogers, M. C. W., 2; G. B. Walters, Brooklyn, 3; time, 3:01. Seven starters.
Two-mile, handicap—A. A. Zimmerman, 1; G. W. Coffin, 2; time, 5:06 2-5.

SECOND DAY.

On the second day the crowd was

equally large, but the suspense was over. There seemed to be no doubt on the part of anyone that Zimmer would continue to win, and in one instance some carried the enthusiasm to the extension of cheering Zimmerman and hissing Taylor; but it was promptly sat upon by the balance. In the one-mile, safety handicap, there were twenty two starters, with Zimmerman, Munger and Taylor on scratch. Munger set out for the field at the start, and on the second lap gave way to Zimmer. On the last quarter the struggle began. The three had worked their way half through the field, and Zimmerman let out with a terrible spurt, passing man after man, but was unable to get better place than third.

The quarter-mile dash was an exciting event, with Munger, Mullikin, Martin, Zimmerman and Taylor starting. Taylor took the lead, but Zimmer soon got after him, and they fought it out on the stretch, Taylor making a game fight and finishing a good second.

The *pace de resistance* of the meet was the five-mile scratch, in which Wheeler, Hawley, Hess, Zimmerman, Coffin, Taxis, Mullikin, Rich, Taylor, Campbell and Hazleton started. The bunch hung well together, Hess, Wheeler and Hazleton doing most of the pacing. On the last lap all let out at a terrific pace, Mullikin leading for a short distance. Zimmer took the lead on the back stretch, closely followed by the bunch. As they rounded into the stretch it looked as if any of the leaders might claim first place, but the champion held his own, although Taxis, who had not ridden previously, finished a good second, with Taylor third.

After this event a number of enthusiasts made an attempt to carry their hero around on their shoulders, but he, divining their intention, showed his sprinting capacities by running down the track and losing himself in the crowd.

Following is the summary:

One-mile, three minute class, first heat—C. S. Thompson, New Haven, 1; L. Z. Coyt, B. C. W., 2; H. B. Martin, A. P. W., 3; time, 2:51 1-5. Six starters.
Second heat—A. C. Watson, 1; H. Bonum, K. C. W., 2; H. Hawthorn, O. A. C., 3; time, 2:44 3-5. Seven starters.
Third heat—F. Stone, O. W., 1; H. E. Himrichs, P. B. C., 2; L. D. Dexter, Chadwick Mills, N. Y., 3; time, 2:41 2-5. Ten starters.
Final heat—L. C. Coyt, 1; F. C. Hawley, 2; C. S. Thompson, 3; time, 2:45 1-5.
One-mile, handicap—H. C. Wheeler, M. A. C., 65 yards, 1; J. R. Hazleton, R. A. C., 70 yards, 2; A. A. Zimmerman, scratch, 3; time, 2:24. Twenty-three starters.
One-mile, 2:35 class—H. C. Wheeler, M. A. C., 1; G. W. Coffin, O. A. C., 2; J. R. Hazleton, R. A. C., 3; time, 3:00 2-5. Six starters.
Two-mile, handicap—Carl Hess, M. A. C., 100 yards, 1; F. Hawley, K. C. W., 2; J. R. Parlor, F. C., 3; time, 5:13 2-5. Munger thirty yards; no scratch men.
Quarter-mile, open—A. A. Zimmerman, A. P. W., 1; George F. Taylor, M. A. C., 2; W. H. Mullikin, Baltimore, 3; time, 3:41 1-5. Five starters.
One-mile, 2:45 class—G. B. Waters, Brooklyn, 1; A. H. Rogers, M. C. W., 2; C. L. Conklin, B. C. W., 3; time, 2:46. Ten starters.
Five-mile, scratch—A. A. Zimmerman, 1; W. W. Taxis, 2; G. F. Taylor, 3; time, 15:05. Time—mile, 2:58 4-5; two, 5:57 4-5; three, 9:15 4-5; four, 12:17; five, 15:05.
One-mile, consolation—A. C. Watson, W. C. R. 1; H. B. Martin, A. P. W., 2; time, 2:46 1-5.

England's Twenty-Four Hour Race.

LONDON, July 27.—Zimmerman has left us. His departure was made very quickly, and scarcely had he gone when men found a new topic in the grand performance done by Frank Shorland in the twenty-four hour path race at Herne Hill, for which the enterprising proprietors of the Caca Cocoa had given a challenge cup, valued at a hundred guineas. It was anticipated by many that should the weather be favorable, 400 miles would be done, but no one was prepared for such a big total as 413 miles 1,615 yards. Yet this is what Frank Shorland did on his little front-driven Crypto-

geared machine, which, although it has a front wheel of thirty inches only, some people will persist in calling a geared ordinary. More than this, in twelve hours Shorland covered 220 miles 140 yards, and beat the record from ninety miles right away to the finish. In the last hour he covered eighteen and a half miles. The race was a grand one in many respects, and this, in spite of the absence of T. A. Edge and the early retirement of Holbein, S. F. Edge and Bates.

Holbein, who, like Shorland, had been training in the fresh sea air at Brighton, had been riding very fast during the last few days of his preparation, and his friends were very confident of his success. But, strangely enough, the man who has overcome all sorts of inconveniences on the road, who has ridden miles and miles on a so-called spring frame safety with a cushion tire gradually cutting itself to pieces and flapping on the rim, failed to stick it out on the perfect smoothness of the Herne Hill track, and retired after going 167 miles, the victim of saddle soreness, which was attributed to a badly fitting saddle. After this J. M. James, another member of the North Road Club, a mercurial, flippertygibbet sort of youth with a cracked voice and a merry smile, whom his friends delight to dub "Jimmie James," to distinguish him from other Jameses in the club, headed the safety riders proper, and in the end finished up some six miles only behind Shorland, with a total of 407 miles 285 yards. He was mounted on a New Howe safety, for which he had paid, and his success was received with much satisfaction by those who still believe in the virtues of true amateurism and think that all men attached to the trade should be classed as professionals.

Only two tricyclists started, both of them being amateurs of the best sort. Both of them regarded the race as a good opportunity for making records under favorable conditions, and neither had any great intention of going right through. At any rate their desire for records was satisfied. They began cutting the old records made by Dr. Turner and A. L. Bower on solid tired machines, at twenty-six miles. At forty-four miles Moorhouse retired, but Bidlake, who was on a Marlboro Club tricycle, kept at his work and cut all records up to 200 miles, which he accomplished in 14 hrs. 10 min. 14 2-5 sec, and then he also gave up. Besides Shorland and James, two other men completed the twenty-four hour, one of them, J. F. Walsh, the old ordinary rider, who was now mounted on a Premier safety, doing 384 miles, and the other, a Yorkshireman named Brundrett, who came with a big local reputation, doing 379 miles.

The weather throughout was simply perfect, and the track was in first-class order. The whole of the conditions were most favorable, and the general arrangements, which were in the hands of Lacy Hillier, were simply perfect. It might have been supposed that on the first occasion of running a big race like this on the path, there would be many little hitches, but there was not a single one. Everything was as it should be—a striking testimonial to the organizing capacity of the man who practically ran the whole show. It is worthy of note that altogether about 8,000 spectators paid gate. About four hundred of these remained throughout the race, which began at 8:05 on Friday evening and ended at the same hour on Saturday. As early as 3 o'clock on Saturday morning spectators were arriving at the grounds, and between that hour and 5 o'clock no fewer than seventy people passed the turnstiles.

THE TOURIST.

The Highest Grade Bicycle in the World. Perfect in Material, Construction and Finish.

Made at Colt's West Armory, Hartford, Conn., under the same system and with the same attention to detail followed in the manufacture of Colt's fine fire arms. Gun steel forgings; all cones and bearing cups cut from the bar, not stamped.

WEIGHT: { Road Racer, 34 lbs., } PRICE, \$150
 { Roadster, 42 lbs., }

Fitted with BIDWELL (THOMAS) PNEUMATIC TIRES, guaranteed against puncture, bursting and leakage.

A GENUINE NOVELTY.

THE TOURIST BALL-BEARING LAMP

WITH EQUIPOISE BRACKET.

THE MOST PERFECT LAMP MADE

WILLIAM BOWN, BIRMINGHAM, ENGLAND, Manufacturer.

A Few of its Strong Points

- Ball-Bearing Bracket.
- Ball-Bearing Equipoise Attachment, preventing the spilling of oil.
- Double Convex Lens.
- Saulsbury Non-Breakable Side Lights.
- Detachable Top, Bottom and Reflector.

Since the end of the race men have been endeavoring to prove that the result shows the front driven machine to be faster than the rear-driven, but I can not help thinking that a careful analysis leads to an almost exactly opposite deduction. Hitherto, when both have been mounted on a rear driver in road races, James has never been anything like so good as Shorland, and yet when the latter, after undergoing a special preparation and doing lots of path work, exploits the front driver to the best advantage, James finished within seven miles of him. Of course, on the other hand, it may be said that Shorland knew exactly what advantage he possessed, and did not trouble himself so long as he did a good performance and won decisively. At any rate, I fancy that further evidence will be required before the point can be finally settled. Men's thoughts are now of holidays and holiday making, and great preparations are being made for the southern and northern camps.

The leaders at each hour and the score for the twenty four hours was as follows:

Hrs.	Miles.	Yds.	Hrs.	Miles.	Yds.

A Meet at Toledo Sept. 10.

The Toledo Bicycle Club has made arrangements with the Toledo Exposition Company to hold a large bicycle tournament at the Toledo driving park Saturday, Sept. 10, which will follow the Columbus meet, Sept. 5 and 6. Some thousand dollars' worth of prizes will be given. The programme has been arranged as follows: One-mile, safety, novice, open; one-quarter mile, safety, open; five-mile, safety, handicap, open; half-mile, safety, boys fourteen years or under, restricted to twenty-seven inch wheels; one-mile, safety, T. C. C. championship; one-mile, safety, open; half-mile, safety, open; one-mile, safety, 2:50 class, open; three-mile, safety, lap race, open.

Good Programme at Columbus, Ohio.

The Columbus Cycling Club boys, having met with such great success with their tournament last year, have decided to give a larger and better one this fall. It will be held at the new Gentlemen's Driving Park on Tuesday and Wednesday, Sept. 5 and 6. This (the 5th) being Labor day, and a general holiday, will naturally attract a large crowd. The track at the driving park has just been completed, and experienced men say that is the fastest in America. The various committees are hard at work, and intend to make this the most successful meet ever held in Ohio. Dr. G. G. Thomen is the greatest hustler on record, for it has been principally through his efforts that so many, and valuable, prizes have been donated. So far these have been donated: An elegant upright piano, a fine buggy, a valuable city lot, two fine gold watches, five high grade bicycles, an elegant silver cup by the Columbus Board of Trade, a full-dress suit made to order, \$75; two \$100 gold medals, two complete toilet sets, pair of trousers made to order, bicycle suits, and many other valuable articles. Several other

fine prizes have been promised, which at this writing have not been announced, but the aggregate value, when they are all in, will exceed \$3,000. The programme will consist of but of few local races, the majority of them being class, handicap and open. Since the date is at a time when there are but few meets over the country, there will probably be a great many entries from the crack riders from the east and from Chicago. George W. Smith, who handled the races so successfully last year, is again in charge of the races of the coming meet. Entry blanks can be had by addressing George W. Smith, 32 East Spring street, Columbus, Ohio.

ARION. West Gave Up.

"Professor" John West, of the Minnette Cycling Corps, a professional, started to establish a twenty-four hour record last Friday evening at the Elgin Driving Park. He failed after riding 13 hrs. 10 min. 14 sec., and having done but 189 1-2, 30 miles behind the record. For four months West has been steadily training under his own system, for he himself is a practical trainer of athletes and cyclists. Big and muscular, he gives one the impression, at first sight, that 400 miles in twenty-four hours would be an easy thing for him. It had been raining Friday and the track was heavy when the rider started. He looked weary at the end of the first hour and got "bull-headed," one of his pacers said, at midnight. A heavy fog made him groggy and he refused to mind the pace-makers. Rhodes, Buchanan and Slusser were with him during the night, but he would not mind them or Fox, his manager. When he had covered 189 miles at 7:41 in the morning, his eyes closed repeatedly, and he dismounted, admitting he was foolish for starting, and giving up then and there. It was currently reported that he would start at 3 o'clock next Saturday on Parkside track in another attempt. Track authorities say he will not be able to get the track. Another aspirant for twenty-four hour-record honors was made known this week. Horace Baine, of Goshen, Ind., formerly of Chicago, starts on the Warsaw track in Indianapolis Aug. 18. F. J. Wagner, of this city, was sent for to take charge of the track, and left this week. Baine is a good rider, but a mere boy, who will do himself much harm in such a contest. He would do better a year from now or even later. While Englishmen and Frenchmen are breaking his record, and Americans are trying to do so, Spooner smiles serenely, and declares on his oath that he'll never start again. On top for even so short a time, but there just the same, has settled his long-distance aspirations, and another season he will devote his entire time to short-distance contests.

Berwyn's Race Gossip.

It is not often that a crowd—that is, a crowd of self-respecting people who are supposed to know the difference between gentlemanly and ungentlemanly conduct—so far forgets itself as to treat ungraciously a man whose only fault is that he dared compete with their favorite, and took second in a number of good finishes. Yet this is exactly what a portion of the Asbury Park gathering did on Saturday last. So much were they "gone" on their hero, Jimmy, that they actually hissed George Taylor, the popular Manhattan man, for no other reason than that he made a most magnificent struggle in the quarter-mile dash, and lost by only a few inches in one of the most exciting contests of the two days' meeting. Taylor, who is undoubtedly

one of the most popular men on the path at the present time, had ridden a fair race upon its merits; he had neither fouled Zimmerman nor had he claimed ill treatment, yet as he returned to the dressing room he was greeted with a chorus of hisses instead of the applause he deserved for his brilliant showing. Fortunately the better class of the audience put an end to the disgraceful conduct by loud cries of "shut up" and threats of personal vengeance, but it was certainly a most unfortunate occurrence that there were even a few hundred present whose ideas of hero worshiping were carried to this extreme. Taylor was very much hurt and showed it plainly. After his second performance there were many who thought it possible for him to beat Zimmerman. To lose, after making a game struggle in race after race, and then be hissed for his best effort, was enough to disgust any man.

Should the racing board, during its present investigations, discover that any racing men of reputation have been breaking the rules, and suspend or expel any of the real cracks, thus practically breaking up the sport in its height, the Park Avenue Wheelmen of Philadelphia will change their programme to suit, and immediately offer cash prizes, so as to secure the attendance of the men.

George Smith, of the Riverside Wheelmen, riding in and winning the 2:50 class at Asbury Park after riding a quarter in :33 2-5 two weeks previously, is a queer interpretation of the class system.

W. W. Taxis, who has for years represented the A. C. S. N., states that the rumor is true that he proposes to leave it. If it does not give him his release he will resign from the club. Taxis says the navy has not been able to pay his expenses for some time, yet he has continued to represent it at his own expense, knowing its financial condition. Of late, however, his entrance fees have not been paid, and he has received letters from different sections of the country so frequently, complaining of the neglect, that he has become sick of the matter and decided not to be so good natured hereafter. He may ride unattached, but it is more than likely that he will join the fold of one of the big New York organizations.

"If I had had charge of Zimmerman in England," said Stillman G. Whittaker, recently, "I would have made him wear a spiked dog collar with the spikes on the inside. Then if he had tried to look around in a race he would have been reminded of his danger by one of the spikes and changed his mind."

PAUL BERWYN.

Jacksonville's Tournament.

The Lockwood club members are working hard to make their meet a success. It has already been advertised far and wide and entries are coming in, having been received from Chicago, St. Louis, Columbus, O., and a good many other places. The entry blanks are ready and will be mailed on application. They are getting up an illustrated forty-page pamphlet containing views of the principal buildings, streets, the fair grounds and club rooms, which will be ready in a few weeks. The piano given by Camp & Phillips has arrived and is a beauty.

On the first day there are \$1,585 worth of prizes offered, and \$1,015 on the second, making a total of \$3,500, among them being an \$800 piano, a \$300 surry, a dress suit, typewriter, desk, several wheels, medals, etc. Jacksonville is a very nice little city of 15,000 inhabitants and is sometimes called the "Athens of the West." It is noted for its education-

al advantages. It contains one of the best colleges for young men in the west, several seminaries for young ladies, Central Hospital for the Insane, state institutions for the blind and deaf and dumb, the latter being the largest institution of its kind in the world.

The Second Milwaukee Race.

A great deal of interest is being manifested in the road race which is to take place soon between Johnson, of Minneapolis, and Ulbrecht, of Chicago, to decide the tie for second time in the Milwaukee road race. It is now understood the race will occur immediately after the Chicago club's meet at Parkside the latter part of this month. A despatch from Milwaukee, dated Saturday last, says: "The racing board of the Milwaukee Wheelmen, which had charge of the last Waukesha road race, to-day announced that Hueffner, the Beloit college athlete, who finished first from the thirteen-minute mark, won his race by fraud, and would not be permitted to participate in any future races here. The board says that Hueffner had four pace-makers along the road; that friends secretly helped him up Stone Quarry hill, and that he told a deliberate falsehood when he gave his record to the handicappers. The first place, it is declared by the board, belongs to G. F. Kuenzel, of Milwaukee, second to G. F. Reitzner, of Milwaukee, and third place to Fred Nessel, of Chicago, who won time prize."

Canadians Easy for Jimmy.

Monday Zimmerman pounced down upon the Canucks at the meet of the Hamilton B. C. and secured a first in every event he entered, besides lowering some records. The day was perfect and there was a good attendance. Jimmy was the observed of all observers—it was Jimmy, Jimmy, Jimmy. He appeared in town in an awfully English rig, checked trousers and all. Hyslop was cheered to the echo and cries of "Palmer's day is past," "He ain't in it," while hurrahs for Zimmerman were heard frequently. W. S. Campbell, of New York, and C. H. Callahan, of Buffalo, were also present, besides the Canadian cracks, Wells, Carman and Hyslop. Zimmerman cut the quarter-mile record to 36 sec. from 39 1-5 sec., held by Wells. He also reduced the mile record from 2:43 4-5 to 2:42 2-5. The summary follows:

Two-mile, novice—W. Nichol, 1; A. McMahon, 2; time, 5:42.
Half-mile—Zimmerman, 1; Campbell, 2; time, 1:12 2-5.
One-mile, 2:45 Class—D. Nasmith, 1; J. G. Gauld, 2; time, 2:41 1-5.
One-mile—Zimmerman, 1; Callahan, 2; Wells, 3; time, 2:42 2-5.
Quarter-mile—Zimmerman, 1; Hyslop, 2; time, :36.—Record
One-mile, three-minute class—R. B. Griffith, 1; D. Nasmith, 2; time, 2:43 1-5.
Two-mile, lap—Zimmerman, 1; Hyslop, 2; time, 5:30. Time limit 5 min., consequently no race.
Three-mile—Campbell, 1; Callahan, 2; time, 8:51.
Ten-mile, invitation—G. M. Wells, 1; A. W. Palmer, 2; time, 33:11 3-5.

Chicago Race Notes.

Montgomery Ward & Company's employees will hold their road race August 20 over the north side course.

Frank Bodach claims he can defeat Ulbrecht despite his recent defeat at the hands of the Columbia Wheelmen.

This Saturday afternoon at the Parkside track the Cook County Wheelmen hold their second annual race meet. Two open events, one and five-mile handicaps, will be run, and six club events, one half, one and two-mile handicaps, one-mile, 3:10 class; one-mile, novice, and one-mile, ordinary, handicap. Handsome gold medals will be given to

SHINE 'EM UP

Is the finish on your wheel commencing to grow dull or show signs of wear? If so, it needs a coat of

Berry Brothers' Bicycle Enamel,

which will restore it to its original brilliancy, one bottle being sufficient to finish a bicycle. The only perfect article of its kind in the market. Prepared ready for use; easily applied, and dries quickly with a jet black and lustrous finish. Ask your dealer for **Berry Brothers' Bicycle Enamel.**

THE “QUADRANT” CYCLE COMPANY,
297 WABASH AVENUE.
CHICAGO.

first men, good prizes to second, and five prizes in the five-mile, open.

Aug. 20 the Ravenswood Cycling Club gives a number of races at Diamond's track, Sulzer road and the river. These will be half, one, two and five-mile handicaps.

The Minnette Cycling Corps is soon to receive a challenge from the lately organized Garden City Wheelmen to a team race, any number of men to a side, and any distance.

The Columbia Wheelmen hold their annual road race Aug. 28. They may decide to postpone the event, that the old course between Douglas and Humboldt Parks may be used.

A club trainer is being secured by the the Illinois club, and Captain Gray is selecting the men who are to go into active training for the fall races. The Illinois will bid lively to be in it.

W. A. Rhodes contemplates returning to the east. Losing his job through the Moffat failure, and ill luck on the road and path, have convinced the big fellow that luck is against him in the World's Fair City.

The Illinois Cycling Club has postponed its annual ten-mile handicap road race scheduled for August 13 to September 17, when the old course between Humboldt and Douglas Park, now in course of repairs and rebuilding, can be used. Forty entries are already secured.

W. A. Rhodes expects to start for the 100-mile world's record on Parkside track Aug. 28, immediately following the tournament. Rhodes has hardly been fit for short distance work this season, but is confident he can lower Shorland's record of 5:05 3-5.

Secretary Walpole, of the Ames & Frost Manufacturing Company, is in receipt of a letter from the chairman of the racing board, in which the latter says, that with the best interests of the league at heart, he would like to inquire whether the Ames & Frost Company has in its employ a racing man or racing men who devote their entire time to racing, drawing a salary meantime. Mr. Walpole answered Mr. Raymond, in substance stating that they had in their employ traveling men who were doing a very satisfactory business on the road, and showed that business was not being neglected; that these men might, and undoubtedly did have some degree of speed on the road and path, and that he did not doubt for an instant that when they arrived in a town where races were being held they competed, with what success he was not prepared to say.

Comrades B. C. Road Race.

The handicap road race of the Comrades B. C. of Buffalo took place Saturday afternoon. Fifteen men were entered, and good time was made. Sanger, Schler and Schultz met with accidents to their machines and dropped out. The finishers were as follows:

Posn.	Hdcp.	Time.
Nick Mader.....	scratch	1:26:30
George Englehardt.....	3 min.	1:33:50
Theodore Freitag.....	6 "	1:37:30
Henry Smith.....	4 "	1:38:30
Jul Schultz.....	3 "	1:39
John Schler.....	5 "	1:41
Albert Connors.....	9 "	1:43:20
F. J. Morelock.....	11 "	1:45:15
Charles Laas.....	14 "	1:46

Buse Won From Scratch.

The Buffalo Ramblers sealed handicap road race over the Martin course Saturday afternoon was a fairly successful event. Out of ten entries seven men started and six finished. Good time was made on the way out, but on the return there was a strong wind. Buse broke his saddle the first half, but finished the race, coming in first. Sugnet was taken ill. The start was made at 2:46 p. m.,

and Buse finished at 4:16:40. The following shows the order of finish:

Posn.	Hdcp.	Time.
Buse.....	scratch	1:30:40
Scully.....	8 min.	1:38:50
Vincent.....	7 "	1:39:42
Schuster.....	8 "	1:48:30
Wagner.....	7 "	1:54
Reister.....	7 "	2:17:40

Several Bicycle Events.

The South Side A. C., of Buffalo, held its annual games Saturday at Sheenwater, a good crowd being present. Great interest was taken in the bicycle races, which resulted as follows:

One-mile, closed John Eigenbrod, 1; T. J. Sayles, 2; time, 3:10 3-4.
One-mile, novice Tony Roeder, 1; F. E. Watters, 2; time, 2:58.
One-mile, 3:30 class—F. A. Callahan, 1; Dan Buse, 2; time, 2:54.
One-mile, 3:30 class—F. A. Callahan, 1; John Pensyres, 2; time, 3:30.
Half-mile, Erie County championship—F. A. Callahan, 1, 1; Dan Buse, 2; time, 1:35.

Montana's Meet To-morrow.

The Helena Wheelmen's tournament will be held to-morrow (and Sunday, according to announcement), the programme being as follows: Quarter-mile, novice; one-mile, open; quarter-mile, for boys; half-mile, novice; one-mile, Helena Wheelmen championship; half-mile, 1:50 class; half-mile, open; two-mile, lap; quarter-mile, open; one-mile, ordinary; half-mile, H. W. championship; one-mile, four-minute class; half-mile, handicap; quarter-mile, H. W. championship; two-mile, open; half-mile, consolation.

Won By Hewitt.

The third race of the Ramblers Bicycle Club of Rochester, to Charlotte and return, was held Thursdny evening. The riders started from the club house and the run to the lake and return was quickly made, the men keeping well in a bunch and finishing very close together, as is shown by their time. The time was, Hewitt, 7:58:00; Van Houten, 7:59:15; Grashof, 8:01:00; Dukelo, 8:10:00; Kelly, 8:01:45; Zimmerman, 8:01:42.

Coming Race Meets.

Canton, Ill., cyclists will soon give a big meet.

On Labor day Studley & Barclay of Grand Rapids, Mich., will give several track and road events, the prizes aggregate \$300 in value. The programme has not as yet been arranged.

The Harlem Wheelmen hold their fall races on Labor day, Sept. 5. The Manhattan B. C. will also hold races on that day, a one-mile, novice, and one, two and four-mile handicaps.

The Minnesota division races occur Sept. 6, 7 and 8 at Winona, on the new \$1,500 track. The prize list will surpass anything of the kind in the northwest. There will be twenty events, nearly all of them being open.

Nov 9 is the date set for the seventh Austral race at Melbourne, Australia. The prizes for this event amount to 250 sovereigns. In addition there will be a mile, ordinary, and one and three mile, safety, events. Only solid tired wheels will be permitted in the Austral.

The Englewood Cycling Club holds a road race from Normal Park to the club house, Seventy-first and Yale streets, next Saturday. Prizes will be given to first and second, and a time prize will also be given. The entries close to-morrow with J. I. Marsh or H. F. Pyle.

The Dodge County (Wis.) Fair Association will offer \$150 in prizes for bicycle races, as follows: Fifty dollars for the person equaling the mile record on half-mile track, with an additional \$35 if the record is broken; \$50 for an amateur race, to be divided \$20, \$15, \$10, \$5;

\$15 for a race of boys under fifteen; \$15 for a race of girls under fifteen.

Rainsville, Ky., is to have a tournament Sept 30 or Oct. 1, the Louisville C. C. being the instigator of the affair. It is the idea to include it in the western fall circuit and have Zimmerman, Tyler, Taylor, Taxis, Berlo, Munger and the other cracks there. The dealers have already subscribed liberally, and great interest is being taken in the affair.

Next Saturday the South Bend (Ind.) C. C. will give a tournament, the prize list for which aggregates \$2,000. The programme follows: One-mile, novice; quarter-mile, open; half-mile, handicap; one-mile, open; two-mile, handicap; boys' race, fifteen years and under, one-mile; one-mile, handicap; half-mile, open; one-mile, team race, open; five-mile, handicap; one-mile, club race, and consolation race.

The first annual tournament of the Crescent C. C. of Birmingham, Conn., will occur at the Derby Driving Park Friday, Sept. 2, at 2:30 o'clock. Over \$1,000 worth of prizes will be offered for the eight races, which are to be as follows: One-mile, handicap, for riders of Ansonia, Derby, Shelton, Seymour and Birmingham; half-mile, handicap, open; mile, 2:35 class; mile, open; mile, three-minute class; mile, handicap, open; quarter mile, open; consolation.

The Batavia Wheelmen will hold a field day at Agricultural Park, Batavia, N. Y., next Wednesday. The events will be: One-mile, novice; half-mile, ordinary, open; two-mile, Genesee County championship; half-mile, handicap; one-mile, open to Batavia wheelmen; half-mile, boys' race, under sixteen, open; three-mile, lap race, open; one-mile, open; one-mile, championship, Rochester vs. Buffalo; "plowboys' race," open only to rural cyclists who follow the plow; team race, Le Roy vs. Batavia.

Buffalo's tournament next Saturday, at the driving park, promises to be a successful affair, for besides the \$2,000 worth of prizes some of the best men in the country will compete. The programme is as follows: One-mile, novice, open; one-mile, handicap, open; two-mile, handicap, open; one-mile, 3:10 class, open; half-mile, closed; one-mile, flying start, fifty yards, open; one-mile, handicap, closed; half-mile, open; three-mile, lap race, open; two-mile, team, closed; one-mile, ordinary; half-mile, obstacle. A special prize, valued at \$100, will be given to any one breaking the mile competition record.

Race Chat.

La Salle, Ill., will have cycle races under the auspices of the Caledonia clans Sept. 5.

At the firemen's tournament at Elkhart, Ind., last Friday, A. Miles won the bicycle race in 6:15.

Alma, Mich., will have a bicycling tournament August 19-20. More than \$800 in prizes is offered.

Baltimore proposes to have another big tournament in September, and on Sept. 19 the Chesapeake club will give ten events.

An effort will soon be made by the Grand Forks (N. D.) Cycling Club to arrange for a big meet this fall, prizes to the amount of \$4,000 being offered.

Frank Rough, of South Bend, Ind., won the five-mile bicycle race at Elkhart Friday. Time, 17:50. Brown, of Goshen, second. Baine, of the same place, third.

The Peoria Y. M. C. A. C. C. holds its first annual ten-mile road race on the Knoxville course Sept. 1. The first prize is a gold medal presented by Rouse Hazard & Company.

The Canton (Ill.) fair is talking up a race meet at the fair this fall, while the cyclists themselves are heartily in favor

of holding a meet in the western circuit on their own hook.

An appropriation of \$1,200 has been by the park commissioners for the commissioners for the completion of the the bicycle track at the Genesee Valley Park in Rochester.

The Wheelmen of Waverly, Ill., are preparing to give a big tournament on Wednesday, August 31. They offer \$1,000 worth of prizes and expect to have some of the best racing men of the west present.

The Michigan State Fair Society has offered to set aside \$400 to be used by the bicycle club in carrying out a successful day's sport during fair week. The club wants \$500, but will no doubt accept the former amount.

The Tioga Athletic Association will hold a race meeting on Columbus day. The following committee will have charge: C. A. Dimon, chairman; Walt Gilbert, Oscar Liser, M. F. Statz and James Ottoman.

In a race at Marshalltown, Ia., last Friday evening, four miles into the country over very hilly roads, stop, register and return, Burt Sutton won in thirty-four minutes, D. Graveland second and M. M. Dudley third.

At a meeting of the Minnesota state fair board of managers, it was decided to have the bicycle races take place on Saturday, and \$400 were set aside for prizes. The races will be under the auspices of the two cities, and Collie Bell will have charge of them.

The Manhattan Athletic Club proposes to outdo the Riversides, and, in fact, all previous New York race meets, judging from the preparations it is making. The prize list is a whopper, including as it does two building lots, a house and piano and some bicycles. Now what more can the racing men want? They will win the lot (or house) place therein the piano, and in wet weather drive out in the Springfield horse and coach, and in fine weather use the wheel. Truly the racing men want little else here below.

St. Paul Cyclists Happy.

Last week the new bicycle ordinance for St. Paul was reported favorably by the committee on streets, but was amended to death. Ald. Zimmerman had several streets in his ward added to the district, in which no bicycles were allowed on the sidewalk. Ald. Warren had an amendment put on which prevented bicycles from being allowed on the sidewalk on the Sabbath day. Ald. Cullen, however, capped the climax by offering an amendment which allowed pedestrians no right on the sidewalks when bicyclists desired to use them. This was unanimously adopted, and, with several other provisions tacked on, the ordinance was passed.

The Moffat Sale.

The Moffat Cycle Company's plant was sold at auction Wednesday morning to Mark W. Hill, the only bidder, for \$6,000. The retail store on Wabash avenue was sold Thursday. The fixtures, etc., were bought by Frank T. Fowler for \$30. The store contents were sold separately, a Columbia cushion going for \$10. Moffat threatens to fight the case to a bitter end.

The Menotony Wheel Club, at Arlington Heights, Boston, was organized last week. The club started with a large membership, efficient, and experienced officers and lots of enthusiasm, and its emblem, a white shield with initials in blue, will soon become familiar in local cycling. Its officers are: President, Lemuel Pope, Jr.; vice-president, Clarence Brockway; secretary and treasurer, Hartford Beaumont; captain, Clarence Brockway; lieutenant, Edward Bailey; bugler, Lemuel Pope, Jr.

A Fair Field, No Favor,

And May the Best Man Win !

The work performed on the MORGAN & WRIGHT Pneumatic Tire proves that it has adequate durability and speed. We add this week the record made in Milwaukee-Waukesha race, and others, and shall be glad to add to the list when our friends see fit to favor us.

We beg leave to offer the following records. The list is incomplete and may contain some errors. We shall be happy to correct and add to the list, if our friends will kindly send us the proper data:

NAME.	EVENT.	WHEEL.	DISTANCE.	TIME.	REMARKS.

MORGAN & WRIGHT,
MANUFACTURERS OF RUBBER GOODS,
331-339 West Lake Street,
CHICAGO.

The Recent Failures.

That "all is not gold that glitters" has been forcibly demonstrated in the cycle business lately. There have been failures on a large scale in the United States, Canada and England, and if report be true, these are likely to hasten the downfall of others whose fate has been hanging in the balance for some time.

The Sweeting failure, in Philadelphia, seems to be the most disastrous the trade has experienced for some time. People in a position to know state that Mr. Sweeting is absolutely ruined. The failure is due, in part, to overstocking, the house having been caught with an immense stock of solids when the pneumatic came in fashion. There has also been large deterioration in other channels. Added to this, Sweeting has suffered severely by the failures of others, one smash having cost him, we learn, in the neighborhood of \$15,000. The Gormully & Jeffery Company, which was reported to be among the creditors asks us to deny the report. Beside the houses named last week, we understand that the Manchester Cycle Company loses heavily, one report placing its claim at about \$20,000. Bayliss, Thomas & Company, for whose wheels Sweeting was given the United States agency about a year ago, are also said to be heavy losers, but from other sources we learn that all the business of this firm was conducted through a Philadelphia banking house, and that their loss, if anything, is comparatively small.

The trouble over the affairs of the Moffat Cycle Company can not be fairly called a failure. It is a squabble among the stockholders. Messrs. Hill and Fowler say that Moffat does not own a dollar's worth of stock in the company, that his personal account is considerably over drawn, and speak of the founder of the company, his dealings and his abilities in anything but a complimentary manner. Mr. Hill claims to have made an offer to Moffat to retire from the business for \$5,000 less than he had put into it. The reason the business had been closed up, he said, was that he didn't propose to lay out another dollar so long as Moffat was connected with the concern. He did not explain why Moffat could not have been removed by other means. Meanwhile Moffat has succeeded in having the Chicago Title and Trust Company appointed a receiver, and we understand that a large number of outstanding accounts have been unearthed, which will go a long way toward liquidating the claims of the creditors. Whether the factory will be operated by any of the parties connected with the company is uncertain. Hill says he has no desire to continue, but that should he be forced to purchase the place, he will probably continue to run it.

The Sweeting Failure.

PHILADELPHIA, Aug. 8.—The stock and fixtures of the Sweeting Cycle Company, at both the main store, 815 Arch street, and the branch, at 2135 North Broad, were sold at sheriff's sale this morning. There was a fair attendance of trade people, mostly representatives

of local houses, who, however, purchased but little. Smith, of the Indiana company, Hughes, of the Quadrant company's Chicago house, and Wilcox and Atwater, of the Stover company, were present looking after their respective interests. Howard A. Smith, of Newark, was also present, and a frequent bidder. Mr. Smith, however, was the largest purchaser, buying the greater portion of the stock and the fixtures. The goods went at pretty stiff prices, in many cases, fifty to seventy-five per cent of their actual value, and some sundries bid for by small speculators were bringing almost full cost prices. The Arch street store contained a large stock stored on the three floors of the building, a large proportion being second-hands and old solid and cushion tires. The up-town branch was sold out in a few minutes, the stock being small.

The Quadrant company claimed its goods, and these were not sold, the company, being permitted to make a deposit equal to the invoiced valuation, as a guarantee that it would pay for and remove the wheels. The general sentiment seems to be, however, that they will lose more by this deal than had they permitted the sale to take its regular course, as the stock consists principally of 1891 pattern solids and cushions. Nothing is known at this writing as to the future of Mr. Sweeting. It is generally believed that Mr. Smith intends to re-open the Arch street store to dispose of the goods purchased and to push the Indiana Bicycle Company's line.

PAUL BERWYN.

WARMAN & HAZELWOOD NOT AFFECTED.

In last week's account of the failure it was stated that a number of cheap wheels in the Sweeting stock were thought to have been supplied by Warman & Hazelwood, though no name was on them. Mr. Warman states that his house never furnished Sweeting with wheels that did not bear the stamp of his firm or that of Sweeting; in fact, he had furnished scarcely any but high grade wheels. The indebtedness of Sweeting had nothing to do with the present house, but was contracted before the firm of Warman & Hazelwood was incorporated, and would in no way affect the house. It was an old debt which they had never been able to collect.

Dull Trade in the East.

Trade is dull all over the east, so say many drummers of leading houses, and so say nearly all the trade people that have been seen. Many firms will carry over to next year a goodly stock of 1892 wheels if trade does not pick up, and here it can be said that the extreme hot weather of the past few weeks has had a good deal to do with the falling off in sales. But lack of supply in the early months of the season will be the cause of many having wheels on their hands, as there is not the slightest doubt that thousands of sales were lost in February, March, April and May, through the makers being unable to fill orders. In a trip through the west in March and April the writer saw agent after agent who was cancelling orders right and left, owing to their customers either giving up the idea of riding or having gone elsewhere to buy, and these orders had been sent in several months before. The big makers, especially the Columbia people, seemed to have anticipated the early season's demand, and sold a tremendous

number of wheels. I was told by Howard A. Smith, of Newark, the other day, that he could have sold at least a hundred more wheels early in the season, and the Ormonde company, of New York, says it could have sold hundreds if it had had them. It cannot be estimated how many sales were lost in March and April through lack of supply.

During a talk with George S. McDonald, the well-known secretary of the American Ormonde Company, last week, he said: "While our company was in a fair way as regards supplies, we could have done much more, and the fact that others were worse off than we were enabled us to introduce our goods in a thorough manner. The English manufacturers will suffer principally, as they counted on a brisk demand for their goods, notwithstanding the McKinley bill; and right here I will say that the protective tariff is not an unmixed evil, for it surely has prevented the flooding of the American market with a cheap and nasty grade of English wheels which would in a measure retard the progress of the first-class English makes, such as are well known and have been tried and not found wanting. We propose, however, to be very early in the field next year, and as soon as Christmas has come and gone we will be ready to supply for the 1893 season. By the way," continued Mr. McDonald, "there is no regular season now like there was in the past, but there is business now from January to January, with, of course, a natural rush in the spring; but there is a dripping trade nearly all the year around."

This statement, by a man who is pretty well posted through actual knowledge of the subject, finds an echo among others. A member of the George R. Bidwell staff said: "Yes, we have been run to death since April; yes, since March, for wheels, and orders for a wheel were booked in rotation, and it was weeks before we could satisfy orders, and we were ashamed to meet people who haunted our salesroom. Of course, we started in to make the "Tourist" rather late, and did not anticipate the tremendous rush for the wheel, and in other makes we handle the same thing occurred. We could not meet the demand, and in this, of course, the demand exceeded the supply. But we are now about caught up and Mr. Bidwell will be ready for the anticipated early rush next year."

English manufacturers, according to the English *Cyclist*, complain of dullness and being overstocked with wheels, which to an extent is their own fault, as thousands of English wheels could have been sold if they had been this side in time; but to promise by February and then land them here in June will not suit the American trade, nor the English, for that matter. It would seem, now that the tire question is about settled, for a year at least, and frames have reached comparatively a definite style, the diamond, manufacturers would from now on push forward the building of next season's wheels, and endeavor to keep their promises to deliver on or as near time as possible.

Of course the extreme wet season in the west hurt the trade somewhat, but the lack of supply before the rain came did the most damage. Neither was the lack of supply confined to the wheel. Sundries, vital to the turning out of a complete wheel, were away behind. Saddles, pedals, bells and many important parts could not be had for love or money. There is no doubt that the tire question staggered a lot of people, and the non-arrival of tubing and parts upset the calculation of others, causing vexatious delays; but this should be remedied now with the extra competition in parts and

sundries; so it seems that the firm which will not be ready to market its 1893 wheels the first of February next will be likely to complain of "dull times" while the "early worm" maker will jingle his coin merrily—the result of "getting ready."

A New Chainless Wheel.

We have had the bicycle with the plain crank movement, the safety with a chain and gear wheels, the Star with its ratchet gear, the Broncho without chain, and the geared ordinary, and now comes another new gear for the safety, and chainless, at that. The invention is not exactly new, but in this country a patent was not granted until Aug. 2.

The inventor and maker is Arthur J. Battersby of Nottingham, Eng., and already he has a wheel upon the market which he calls the New Loco chainless safety. Whether this wheel will take the place of the chain wheel remains to be seen, but if it will do as the inventor claims, it will lead them all, for he says: "This machine is geared to eighty inches and is guaranteed to run much easier and faster than a chain machine at sixty inches." The cut of the wheel herewith gives a good idea of how it looks with this new gear, and the drawings, together with the inventor's specifications, will give an excellent idea of what the scheme consists of:

I employ a two-armed bracket (A) secured to the frame (B B) of each bicycle. The bracket forms bearings for the pedal axle (A 1), which is somewhat longer than usual and provided on one side of the bicycle with an interiorly-toothed wheel (A 2). The arms projecting from the back of the bracket carry bearings for a second axle (C), having two cranks (C 1) provided at one end with a toothed spur-wheel (A 3) gearing into the teeth of the wheel (A 2). The arms of the bracket

are secured to the front ends of the usual framing (B 1 B 1) of the bicycle. The back ends form bearings for the axle (D) of the back driving-wheel (D 2). Between the bearings and the driving-wheel the axle (D) forms two cranks (D 1), each revolving in a bearing at the back of a connecting rod (D 3). The front ends of the rods form bearings in which the crank (C 1) of the second axle revolve. The back-stays (B 2) of the bicycle have their lower ends bolted to the bearings at the back ends of the frame (B 1) in the usual way.

To prevent access of dust to the teeth of the wheels (A 2 A 3) I employ a cover-plate (A 4). A portion of the plate is broken away at figure 1 to show the wheels gearing into each other. The plate is provided with two holes (shown at figure

3), in which the axles (A 1 and C) revolve and keep in position.

The pedal-axle is provided with the usual pedal arms (A 1 A 1) (only part shown at figures 1 and 2). Each revolution of the pedal-axle carrying the wheel (A 2) causes the wheel (A 3) and the two cranked axles (C and D) and driving-wheel (D 2) to revolve thrice.

By the addition of the above-described parts to

Chillington Villa, Peuge Road,

S. Norwood.

MESSRS. BUCKINGHAM & ADAMS, LTD.

Gentlemen:

Having tried your new safety fitted with cushion tyres, I have much pleasure in saying that I consider it to be faster than any cushion tyred safety I have ridden, and, in fact, perfect in every detail.

Yours faithfully,

F. J. OSMOND.

The New Swift Tire.

The Coventry Machinists' Company has just received a pair of wheels fitted with the company's own pneumatic tire, a cut of which is shown herewith. The tire is on the clincher order, being pushed well up into the rim, where it is

held when inflated. It is the work of but a moment to make a repair. The rubber used is good, and the valve seems to be a splendid one.

For Riders of the James.

Those who ride the James and are prize winners will have a chance at a very nice prize toward the end of the season. The agents of the James have sent out a circular letter which sets forth that a racing wheel is to be drawn for by these prize winners. When a man wins a first, second or third place, he notifies the agent, and in proportion to the number of wins he has, draws for the bicycle. It is a good plan to keep posted on the winnings made on the wheel, as well as being an encouragement to the riders.

New English Inventions.

These abstracts are prepared immediately after the patents are applied for, by G. Douglas Leechman, consulting engineer, Coventry, England:

All persons interested in opposing the grant of a patent of any one of the undermentioned applications, may at any time within two months from July 6, give notice in the prescribed form of such opposition.

No. 13240, [J. A. Wilson's improvements in and relating to the tires of cycles or other road vehicles; Aug. 5, 1891.—The object of this invention is to prevent pneumatic tires from being punctured, and when punctured to render them still rideable. One arrangement consists in filling the air tube (b) with powdered cork or a compound of this with other ground light, elastic material, such as vulcanized india rubber, and with compressed air. The air tube is contained within a canvas cover (a) and an outer cover (c). Another arrangement is to fill an ordinary cushion tire

with compressed ground cork, the tire thus filled being secured to the rim in a usual manner; but the principal method consists in securing a canvas tube (B) filled with compressed cork (c) on the face of the air tube (a), the outer rubber (g) covering in both. The tire in this case is secured to the rim by circumferential wires (d) threaded through loops in the edges of the restraining canvas (b), the ends of the wires being brought out through holes in the rim (f), and having screws and nuts for tightening them up. The cords (e, e) are inserted in loops of the lower covering (b2), to assist in holding on the edges of (sic ? sr) the rim.

14679, R. M. Woodhead & P. Angois' improvements in and connected with pneumatic tires for wheels; Aug. 31, 1891.—This invention consists of an improved method of fixing the outer covering (a) of a pneumatic tire to the rim (f) of a wheel, and the device is to turn over the edges of the outer covering and strengthening them with canvas so as to form the loops (c, c), through which wire cord or other suitable material (i, i) may be passed and their ends joined; holes (d, d) or gaps (e, e) are made at intervals round the edges, and engage with studs (h, h) which are fixed upon or into the sides of the rim (f) at intervals corresponding with the holes. Another arrangement is to attach hooks or loops to the wires through small holes in the outer covering, and to fasten them into holes in the rim or flanges, or to studs thereon, or into the spokes in such a way that when the tire is inflated the cover becomes taut and is thereby held securely in position upon the rim. The principal motive of this invention is that the inner tube may be expeditiously removed for repairs; and as it is not necessary for that purpose to apply the method of securing the outer cover to both sides of the wheel. As an alternative, one side of the cover may be secured to the side of the rim by solution or by canvas, or other suitable material, solutioned or vulcanized to the cover and then fastened in like manner to the rim, the other, or reversible side of the cover, being secured by any of the several devices already described. Various forms of rims or studs or hooks, or the equivalents for studs or hooks, may be used in combination with any kind of inner tube, binding hoops or section of outer cover, the essential points of the device being that the said cover and the means for securing it are arranged entirely outside and upon the side of the rim.

Eastern Trade Notes.

Elliott Mason, manager of the Pope Manufacturing Company's Warren street house, has done a wonderful business this season, and, unlike many others, could get a fair supply at all times.

William Le Messurier, of Rochester, N. Y., the winner of the following road races, rode a Rochester bicycle, manu-

factured by the Rochester Cycle Manufacturing Company: First prize in Genesee B. C. road race, Churchville to Rochester, twelve and one-half miles, time, 37 min. 10 sec.; first prize, Genesee B. C. road race, Batavia to Rochester, thirty-five miles, time, 1 hr. 50 min. 45 sec.; first prize at Richfield Springs, N. Y., twenty-five mile road race; time, 1 hr. 24 min. 45 sec. Twenty miles of this was in the rain, and Le Messurier secured also second time prize, being twenty-two seconds slower than Hazel ton, the scratch man. Le Messurier's machine weighs less than twenty-nine pounds, and stood the roads beautifully.

Charlie Schwalbach, of Brooklyn, is himself once more, and now has two large stores and a riding school in the City of Churches. Phoenix-like, the pioneer Brooklyn dealer arose from his trouble, and steadfast friends flocked around him. Charlie is "one of the boys," and is shaping his course toward Albany, being quite a politician with some "influence" among the bosses of Brooklyn. Schwalbach made a clever move early in the season by issuing 30,000 one-lesson complimentary riding tickets through a leading dry goods house, and the scheme resulted in his school being crowded all day with people who, once started, came again, and not infrequently bought wheels as the result of becoming proficient. Alex. Schwalbach, the elder brother, is very successful as the manager of the Gendron Wheel Company's New York house, and reports business booming.

Making Pneumatic Sulky Wheels.

The wheels on all the bicycle sulkies thus far used have been those made by Sterling Elliott. They have wooden spokes, and are the same as those used on the Hickory bicycle. To-day Charles S. Green, the well-known driver and part owner of Sprague Golddust, Illinois Egber, Lucille's Baby, Wilkes Golddust and The Raven, will try the bicycle wheel with wire spokes. He has obtained from the Buffalo Cycle Works two regular wheels such as they use on their well-known light roadster, fitted with the Thomas pneumatic tires, and will use them this afternoon on a sulky. Much interest is attached to the trial, as it will be the first time a regular bicycle wheel has been used on a sulky.—Buffalo Courier.

Milwaukee Trade Notes.

The weather, although exceedingly warm in Milwaukee for some time past, has produced no visible impression on the trade. A visit among the dealers found them all in jolly spirits, and there was no exception to the report of doing a good business. Milwaukee is undoubtedly one of the foremost cycling centres in the country, and with a little more spirit displayed by her local wheelmen, dealers and manufacturers will soon place her in the van guard, at the head of the "push."

P. H. Sercombe, secretary of the Sercombe-Bolte Manufacturing Company, was the heaviest rider in the Milwaukee road race. He rode one of the company's twenty-seven pound racers and finished in forty-fourth place. The company had seventeen of its racers in the race, and every one finished without accident. This is a good showing, and a flattering testimonial for the merit of the wheel.

P. H. Sercombe is a hustler. He has just incorporated a company with a capital stock of \$20,000 for the manufacture of the Bolte automatic time-keeper. The incorporators are James K. Hilsley, Parker H. Sercombe and Harry J. Paine. The organization will be known as the National Time Recorder Company. The

machine which the company will manufacture is a patent of F. H. Bolte, and is one of great merit. It is designed to keep a daily record of the employees' time, and is to be used in factories, mills, stores, etc.

Andrae & Company have received from the Pope Manufacturing Company a sample of the new Relay Columbia, actual weight twenty-seven and three-quarters pounds. The wheel is a beauty and has already attracted many favorable comments from wheelmen.

Peoria Trade.

The midsummer bicycle trade in Peoria is what might be called good. Wheels are being sold in fairly large numbers by all the houses in the city. During the latter part of July the retail trade was booming. Of course it is falling off a little, but not so much as in former years.

J. W. Steinfield, representing the St. Louis Refrigerator and Wooden Gutter Company, was in Peoria last week with a line of cheap bicycles manufactured by this concern. It is manufacturing a very nice line of juvenile wheels and has had them on the market all this season. It expects to go into the business on a larger scale next year.

H. G. Rouse sails for England in September. He expects to be away about one month, and will combine business with pleasure.

Arthur L. Atkins, who looks after the agents in the state of Illinois for Rouse, Hazard & Company, reports business in a very fair condition. Mr. Atkins covers the state very closely and is in a position to know. He has been connected with the bicycle business for a number of years and is one of the best posted men on the road. LAUREL.

Chicago Trade Gossip.

E. C. Bode returned home this week, until the Moffatt company's affairs are untangled.

C. D. Rice, assistant superintendent of the Pope Manufacturing Company's factory, Hartford, was in Chicago last week.

The Ames & Frost company found it necessary last week to order 10,000 more catalogues of the Imperials, a total of 50,000 catalogues this season.

The Humber-Rover Cycle Company may add another story to the building now occupied this season, to accommodate the rapidly increasing business.

The Sercombe-Bolte Manufacturing Company, Milwaukee, contemplates manufacturing for itself and the bicycle trade another season, bicycle hubs and axles.

A Mueller, representing Hulbert Brothers and Company, of New York, manufacturers of wrenches and trousers guards, was along Cycle Row Monday. He reported business in sundries very dull.

Since the Liberty safety was given up by the Spooner-Peterson Company, the Rockaway Manufacturing Company has opened negotiations with several large local firms with a view to next year's business.

J. D. Adams, of the Fulton Machine Works Company, has taken charge at the factory in the absence of his partner, Mr. Leith. Mr. Adams formerly had charge of the Spooner-Peterson Company's repair shops.

The two top floors of 261 Wabash avenue have been rented by the George E. Bidwell Cycle Company, of New York, for the manufacture and repair of Bidwell (Thomas) tires. Two hundred tires a day will be turned out here and prompt service guaranteed. Ed. Barrett,

A Pronounced Success, Boys.

An Honest Wheel, the Best that Brains Can Devise or Money Can Buy.

THE "BUFFALO"

Light Weight - - - Full Roadster.

THE PROOF OF THE PUDDING IS THE DIGESTING THEREOF.

BUFFALO CYCLE WORKS,
Buffalo, N. Y.

Jamestown, N. Y., April 20, 1892.

GENTLEMEN:—It affords me great pleasure at all times to speak of the Buffalo Light Roadster, that you built for me last year. I have been riding ten years now and have owned and ridden a number of different kinds and styles of bicycles. I have tried about all the different wheels on the market, and ought to know what the best wheel should be like. I know which wheel suits me best. I can conscientiously say that your wheel, or rather my wheel, is the strongest for the weight (37 lbs) of any wheel I have known. It is finely built on the most practical lines, and aside from being a specially handsome bicycle it is complete, durable, and simplicity itself. I want no better safety. I used to think in common with hundreds of others that the "grand old ordinary" was about as near the ideal as we could ever get, but the times demanded a low-down wheel that was safer than the "sky-sweeper" and yet as durable. Of all the hundreds of "rovers," whether chain or gear, ratchet or crank, long or short centres, long or short wheel base, two sizes of wheels and the hundred and one little details that make up the individualities of modern bicycles, I think you have embodied the essentials in the Buffalo Light Roadster in such a manner that it cannot be beaten. To me it is the sine quo non.

Fraternally yours, CHAS. E. GATES.

(Well known to readers of the cycling press by his non de plume, "SETAGEO.")

BUFFALO CYCLE WORKS, Buffalo, N. Y.

J. J. WARREN COMPANY,

RAT TRAP PLATES.

Price, \$2.00 per Set of Four, Postpaid.

3 5-8 inches Long.

We wish to call the attention of bicycle riders and dealers to the fact that we can furnish them with a rat trap plate that can be put into the same pedals as the rubbers are used in.

HAVE YOU SEEN THE

CURTIS COMBINATION PEDAL? Either Rubber or Rat Trap,

The best pedal in the market. Absolutely dust proof. Price, \$7.00.

REED & CURTIS MACHINE SCREW CO., Worcester, Mass.

foreman, Fred Fehler and Harry Spellman have been sent on from the New York factory to take charge. A tire repair shop in the basement of the Taylor Cycle Company's store has been conducted temporarily, but now all work is done at the new establishment.

Ames & Frost sold a bill of goods last week, surprisingly large for this time of year, to W. D. Womack, of Kansas City. This included 500 Imperial A's. Mr. Womack will open a large cycle store at Kansas City, and branch houses in Wichita, Atchison and other towns.

The Taylor Cycle Company will greatly enlarge its business next season, and especially the jobbing business. The latter branch has proven a paying investment this season. A large and complete repair department, under charge of competent workmen, will also be a feature.

W. R. Walpole, secretary of the Ames & Frost Manufacturing Company, and Chas. H. Sieg of the Sieg & Clementi Company, left with their families on Saturday last for the Lakesides near Burlington, Wisconsin, where with rod and cycle they will spend a much needed summer's vacation.

The elliptical sprocket wheel is practical, say old and experienced riders, and many are the inquiries for sprocket wheels at the Marble Cycle Company's store. These sprocket wheels only come on Freepart wheels and will be fitted to no other. The dead center, with these wheels, is entirely done away with.

The Eclipse Factory to Move.

The Eclipse Bicycle Factory, located now at Indianapolis, will soon be moved to Beaver Falls, Pa. At a recent meeting of New Brighton business men and those interested in the Indianapolis wheel, it was decided to organize a new company and to move the machinery, stock and employees to the Pennsylvania town. All the arrangements have been made, and as soon as the new charter is received and the proper papers drawn up, the shop will be moved. All the stock subscribed has been paid up, and the new company will start out with a capital stock of \$200,000. At present the company is employing 150 men at Indianapolis, who will be taken east with their families. It is expected that a large number of additional men will be employed when the factory gets located. Sept. 1 it is expected the works will be running full blast in the new location.

New Bicycle Makers.

The New Britain Hardware Company of Hartford, Conn., is contemplating the manufacture of a high grade bicycle in connection with its present business. No definite plans have as yet been made, but the project is strongly talked of by the management.

A despatch from Beaver, Pa., says: "A committee, headed by J. S. Duss of the Economy Society, has gone to Indianapolis to negotiate for the purchase of a bicycle manufacturing concern there and its removal to this place. The stock has all been subscribed, a large block being taken by the Economites."

Predicts More Failures.

Said a prominent dealer: "I watch for many more failures in the cycling trade, and find that backers for small cycle businesses are in greater demand than the supply. Many of these small manufacturers will go under this winter, mark my words."

Lisle's New Bottom Bracket.

One of the most important patents, relating to cycles, is that recently grant-

ed Edward Lisle, of Sharratt & Lisle of Wolverhampton, Eng., being a new bottom bracket. The new style is now in use by Singer & Company as well as by Sharratt & Lisle, and is giving the best of satisfaction.

A bottom bracket, as ordinarily attached to the frame is brazed direct to the middle tube, and the bearings formed therein are liable to be injured by the heat employed in brazing. Moreover, a bracket so fixed cannot be removed for packing or repair. These inconveniences have been avoided by the use of what is known as a "swing bracket," which is connected with the framing by means of a transverse pin, which passes through ears on the bracket and through a block which is brazed to the middle of the tube, just as the ordinary bracket is usually brazed thereto. The swing bracket, however, being connected with the block is not found to be as rigid as is desirable, notwithstanding that an adjusting pin for use in tightening the chain is employed. This invention has for its object simple means by which the bottom bracket may be secured with perfect rigidity to the frame and be readily detached and replaced with the utmost facility.

This above purpose is effected by brazing the end of the middle tube and fixing the bracket independently to such block by means of a screw or cottor bolts or shanks formed with or rigidly fixed to the bracket and passing through holes formed to receive them in the block, such bolts or shanks being readily unscrewed

when the bracket is to be removed. In the accompanying drawings, figure 1 is side elevation of the bracket and fixed block, showing the bracket secured removably to the block. Figure 2 is a front elevation of the same. Figure 3 is a plan of the same. Figure 4 is a view similar to figure 1, illustrating a slightly different arrangement of the parts, and figure 5 is a front elevation of the construction seen in figure 4.

The block (A) is preferably stamped in steel and is formed with projections or plugs (a), as is usual with parts of like character, which are to be brazed to the tubes. These plugs enter within the ends of the respective tubes (d) by brazing the plugs (a) therein. The main length of the block is transverse to the longitudinal axis of the machine, and through the ends (b) thereof are formed taper holes (f), as indicated by dotted lines in figures 1, 2, and 4. The bottom bracket (B) has taper shanks (h) formed therewith, and to fix the bracket to the block (A) these taper shanks are pushed up into the taper holes through the respective eyes in the end (b) of the block (A), and the bracket is securely held to the block by nuts (c) screwed onto the end of the

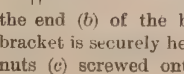

Fig. 1

Fig. 2

Fig. 4

Fig. 5

Fig. 6

Fig. 7

shanks, which project above the block for this purpose. A perfectly rigid connection is thus formed between the bracket (B) and block (A) and the bracket may be readily removed by simply unscrewing the nuts (c) and drawing the shanks out of the holes in the block. The block (A) is employed to unite the ends of the tubes (d) of the frame and to provide apertured branches or parts (b) to receive the shanks (h) on the bracket (B). Usually the arrangement will be such that the axes of the tapered apertures or holes (f) will be vertical.

Business is Quiet.

"I do not think a traveling man in the cycle business can earn his car fare and expenses on the road," said a prominent dealer in cycle row. "I have no men out, and shall send none until time for next winter's business."

A Successful Light Wheel.

The James is proving a very capable wheel in every respect, and even the path racers, weighing but twenty-three pounds, have been used on the road without mishap and with great success. In the Waukesha-Milwaukee road race one of these very light wheels went over the hilly and rocky course without a scratch, and it carried the rider into third place and ninth time. The fork crowns of the James look delicate, but in every instance of a smash-up they have not been even bent. It is really remarkable how these light wheels stand the racket. In the Waverly fifty-mile handicap road race, in Scotland, the James made the best time, and Russell, on a James tri-cycle, broke the Scottish road tri-cycle record doing 151 miles; previous record, 155 miles. A number of Milwaukee men are now mounted on James, and others say they shall select that for their next season's wheel.

Mr. Bridger has received some very flattering letters, among them these:

I made 132 miles Sunday on my twenty-seven pounds James. It went through without a scratch; didn't have to tighten a nut or adjust a bearing.

THEODORE W. SMITH.

LA CROSSE, WIS.

I am touring through the northern part of this state, and wish you to know how well the "Jimmy" stands these poor roads. Have made eighty miles to-day over almost impassable roads. Just think of it, a seventy-six gear on a track racer, up and down hills 600 feet high! Not a single part out of order. The James is all right. Every wheelman here is in love with it. Off to St. Paul, ninety two miles, tomorrow. A. E. POWELL.

Trade Jottings.

Horace Bell is in England seeking a situation.

William A. Rubey is a new repairer who has opened in Louisville, Ky.

Stokes & Leeming, bicycle and gun repairing, 253 Dearborn street, room 1. We solicit difficult repairs.—Adv.

The Common Sense Cycle Manufacturing Company is making preparations to place on the market a diamond frame machine, built on Humber lines.

Bettys & Smith, of Rochester, have one of their new B. & H. wheels nearly finished. It will be as light and graceful looking as any in the market. It resembles the Humber.

The New Departure Bell Company of Bristol, Conn., has had a good season with its products. The Gentlemen's Rotary, No. 1, Ladies' Rotary, No. 2, and the Little Giant, No. 4, have all proved excellent goods and have taken well with the trade.

In the twelve-mile road race at Lansing, Mich., last week, the Holbein Swift took first, second and third place, together with the time prize. The roads were bad, but the time, 36:30, is good considering. The Swift has proved as good

a road wheel as is on the market, and its many successes this season bear out this statement.

The Coventry Machinists' Company has received word that a crate containing some new Swift twenty-two-pound racers is on the water. There can be no doubt that these wheels will be extremely popular with the racing fraternity, for Swifts always take well.

If the young man who has from \$80 to \$135 to invest in a bicycle will put it into a first quality colt, and take care of it, he will have a machine that will constantly increase in value and can travel as well over sand and up grade as elsewhere. A wheel is soon worn out and becomes a dead loss.—N. Y. Farm Journal.

William J. Seadly, assignee of W. J. Percival & Company, Rochester, N. Y., dealers in bicycles, have filed an inventory of the value of the business in the clerk's office. The nominal value of the stock, contracts, etc., is \$5,863.22; actual value, \$2,992.75. The largest creditor is the Rockaway Manufacturing Company, New York, whose claim is \$3,482.63.

The advertising department of the Overman Wheel Company has recently hit upon a novel method of advertising, arrangements for which were lately completed with one of the largest wholesale selling dry goods agents in New York, whereby a cycle brand of bleached and unbleached cotton goods is to bear the Victor bicycle catch phrase, "Victors lead the world."

The sale of the Sylph cycles this season has so far been very gratifying to the Rouse-Duryea Cycle Company. Although a little late getting this year's wheel on the market they report a nice business, and the receipt of many flattering testimonials regarding the easy riding and running qualities of their machines. While they do not cater very much for foreign trade, they have, nevertheless, sold some of these wheels in Canada, Mexico and England, besides scattering them all over the United States.

Now that Jimmy has returned with his Raleigh, it looks as if he is going to carry off all the prizes, judging from his performances at Asbury Park on Friday and Saturday last. We also notice that on July 16 Bate won the St. Helen's championship, and on the same date, in the fifty kilometres (31 1/4 miles) road races of Italy, Melegnagno to Lodi, Secugno and back, Signorini Ballerio, Galbani and Ruscelli, riding Raleighs, were first, second and third. Again on the 18th, at Sheffield, thirteen more prizes were won on this wheel, including the N. C. U. local center championship.

The success of rubber tires on bicycles has frequently led to attempts to increase the comfort of buggy and carriage riding by fixing tires on the wheels, but in the majority of instances the attempt was not a success, as the tire either came off or wore out in a very short space of time. Since, however, pneumatic tires have displaced the solid ones on bicycles, the attempt is being renewed, and buggies and other vehicles are likely to be seen on the boulevards in large numbers before long, as noiseless and free from vibration as bicycles. Carriage builders think there is an immense amount of money to be made out of vehicles with rubber tires on the wheels, and they are likely to keep on experimenting until they finally succeed in producing the desired article.—N. Y. Journal. The feasibility of the scheme has been already demonstrated by Mr. Overman and others. That gentleman drives a cushion-tired, ball-bearing buggy regularly.

THE WORTH

CONVERTIBLE TO A PERFECT LIGHT SINGLE BICYCLE IN 30 SECONDS.

From C. A. Coleman, Kearney, Neb.

July 19, 1892.

GENTLEMEN:—I have just received a Worth, and have tried it, and I find it one of the easiest riding and finest wheels that I have ever seen. You have the right thing in the right place.

From F. Huffman, President Winona Bicycle Company.

July 25, 1892.

GENTLEMEN:—Although I have other wheels in stock, I will say that I would far rather walk than to ride any other wheel but my Worth, which is certainly the most perfect wheel made. I do not say this with the experience of only a few wheels, as I have ridden almost every wheel made, and I am in a position to judge. I would not part with my Worth for its weight in gold if I could not get another.

“LADY WORTH.”

THE ONLY PERFECT WHEEL FOR LADIES' USE.

CHICAGO BICYCLE COMPANY,

Office and Factory, 250-260 Jackson Boulevard, S. E. Cor. Sangamon Street, CHICAGO.

ENGLISH TRADE DOINGS

THE GEARED ORDINARY AS COMPARED WITH THE CHAIN MACHINE.

Shorland Rode a Front Driver Safety—A New Premier Race—A New Dunlop Racing Tire—Southern Safeties Winning.

LONDON, July 30.—The association of the Crypto geared ordinary with Frank Shorland's magnificent path feat at Herne Hill last week, when the sturdy road flyer pedaled 413 mile, 1,615 yards in a natural day, will not only prove a splendid advertisement for the new type of cycle, but will come as a sound confirmation of the sanguine hopes of those who knew its merits. Attempts have been made in a few quarters to ignore the significance of the sign. "On a nice, light rear driver" we are told that Frank Shorland would have piled up a higher score. Of course this is not Mr. Boothroyd's opinion. He thinks that "on a nice, light front driver" J. M. James might have succeeded in hunting Shorland home and forced him to eclipse his performance, grand as it was. Among persons who have not taken the trouble to ascertain, there exists an erroneous impression that the machine ridden by Shorland was considerably heavier than those used by the safetyists. The New Howe safety ridden by James weighed twenty-eight pounds, while the Premiers used by Walsh and Brundrett certainly scaled as much. From Mr. Boothroyd himself I have learned that Shorland's mount (i. e., the machine upon which he rode the greater part of the distance) weighed twenty-nine pounds. Its racing Boothroyd tires scale four pounds. Every part is made as light as prudence and experience allow. The hubs are of steel, the tangent spokes of fifteen gauge, and the forks of twenty gauge steel. When the possibilities of the new arrival become generally known, and some of our short-distance path riders find leisure and inclination to experiment with it, there will be some havoc made among the everyday path times and distances.

Quite a number of makers whom I have recently visited or met have confessed their intention of making a front driver their 1893 novelty, and are now quietly experimenting with various gears. Cocks of Ealing, Rickard of Kensington (who builds the famous Westminster light safeties) and the great New Howe firm, are among these converts determined to take time by the forelock.

The Premier Cycle Company, whose coming light safety I alluded to in my last letter, have at last allowed the outside world to hear some particulars concerning the mystery. Not yet has a single machine reached London, but the news comes from Coventry. The novelty differs from other machines in being produced of an entirely new patent tube, made by the company in their works. Instead of being drawn in a straight length, the tube is made in the form of a scroll or spiral, a strip of thin steel being so wound that the lower edge is slightly overlapped by the upper, in which position it is brazed. It is stated that tubing so constructed is two or three times as strong as the weldless tube of the same weight, because the steel employed is of a much tougher quality than in the case of weldless tube after it is drawn. The difference in the appearance of the frame is scarcely noticeable and certainly does not detract from the machine's appearance. The full roadsters of the new pattern, complete with mud guards, brake, etc., will be under thirty two pounds in weight. The reputation of the Premier people for strong cycles is so well known that few will doubt the

stability of the novelty, which I hope to describe more fully in a future letter.

Messrs. Taylor, Cooper & Bednell have done well this season with the Raglans. Not merely hundreds, but thousands of the No. 12, a well stayed, semi-diamond safety, strong, smart and moderate in price, have been sold. The Raglan Leader, too, a high class thirty-pound roadster, has been in considerable request. Up to the present the Raglan firm has no intention of touching a front driver for next season's trade. They regard the new type as a passing eccentricity, doomed to sink into oblivion in the course of a season.

The other day I met Mr. Harry Travers, who controls Mr. Marston's Wolverhampton factory, whence the Sunbams issue. The twenty two pound Sunbeam safety naturally cropped up in conversation, and I heard that two French racing men had just been supplied with these machines. Mr. Travers has the fullest confidence in their durability, and informed me that the sixteen-pound, solid tire safety, upon which he used to race three or four years back, was still running about on the road. Coming on rapidly is the Sunbeam extra light tricycle, which will weigh thirty-four pounds for a gentleman's use and a trifle more when adapted for a woman's riding. Mr. Travers has experimented with aluminum, but thinks little of it, although he admitted that in certain parts of a cycle it might be introduced with advantage.

The Ormonde Cycle Company are highly satisfied with the immediate favor accorded to their Model D (Humber type) safety. The new pattern has sold well, and little wonder. Calling at their depot in Wells street, Oxford, this week, I had a chat with Mr. R. L. Ede, whose racing career received an unpleasant interruption this summer, the little wonder being prostrated with rheumatism, from which he has only recently recovered. If he can get fit he will pay some attention to the hour safety record. I was shown a tricycle weighing forty-four pounds, suitable for either road or path work, which looked a well-designed, strong mount. There was also a juvenileracing safety, with twenty-four inch and twenty-six inch wheels, scaling twenty-four pounds, built to the order of a fond father. The Ormonde firm keep an immense stock at all times and sell no end of cushions.

Another depot where cushioned mounts have been going very freely is that of Bayliss & Thomas, in Oxford street. A cycling club, division of the members of a west end formed of police, recently purchased thirty Excelsior safeties, and over 100 of these machines have been supplied this year to the London City Mission for the use of district visitors. Such purchasers as these are not usually fastidious and are content with sound, good machines at a reasonable price. The high grade models of the firm are conspicuous for their elegant finish, there being no stint in the nickel bestowed about their parts.

Have you heard of the latest form of Dunlop racing tire? Instead of the canvass tube, or pocket, being entirely covered by a jacket of rubber, it is left partially exposed, protection from weather being secured by a coat of varnish. A strip of rubber, little more than an inch in width, surrounds the tire and forms the running surface. At present very few are in use, and only on the best tracks. A well-known crack who is using a pair declares them fifty yards in a mile faster than ordinary racing Dunlops, while their weight is under three pounds the pair.

I recently dropped in at Gamage's, the cyclist's provider, in Holborn, and found

a host of novelties since my last visit. The enterprise of Gamage, and his alacrity in supplying the latest and best things that cyclists need, at bottom prices, are a constant wonder to me. Mr. Gamage has succeeded in gaining the confidence and patronage of nearly every road and path man of note, and the public follow as a natural result. Mr. Gamage knows how to advertise, and never conceals his latest good lines. The word trouble does not exist in his vocabulary, nor is its meaning known to his assistants. He sells everything—and more particularly shoes. Exquisite racing shoes of brown ooze calf, lined with chamois leather, made to fit perfectly, and fitted with blocks to order, are in great favor. The Shorland shoe is a new thing, fastened by a single strap instead of by lacing. It looks cool and comfortable, as also does the ventilated shoe, wherein the air circulates freely without risk of rain penetrating.

The Toy's Hill climb, promoted by the Catford Club last Saturday, resulted in a victory for the Southern safety, a capital machine for hill work, made by the Southern Cycle Company, Southampton. Wale, the Folkestone cycling gymnast who won the competition, had nine-inch cranks on his Southern, but the second man, Napier, used a Southern with ordinary cranks. This is the second year that the Southern have made a conspicuous show among other first class makes at Catford climbs. As the safety in question is quite equal in general merit, lightness and appearance to any other high class mount, those who desire to shine at hill riding should make a note of it.

STANLEY.

Pneumatic Sulkies.

Pneumatic-tired sulkies have scored a great success in the races in which they have been used this summer, and it is predicted that they will speedily supersede the present style of trotting machines. Budd Dobble is the principal promoter of the new sulky and is a stockholder in the Boston firm which makes them.

The wheels of the new sulky resemble those of a pneumatic bicycle. They are less than three feet in diameter, are fitted with large rubber tires, inflated with air, and the axles are placed on ball bearings. The advantages derived are a diminution of weight, and absence of friction and an added facility in rounding turns. Another advantage is a decrease of the shocks and jars the driver is subjected to on the ordinary sulky over the smoothest courses.

The inflated tire was first used in competition at the Detroit meeting, where Ed. Geers, the Village Farm trainer, won with Honest George in 2:16 before the queer looking vehicle, half a second below the record he had made the day before with the ordinary sulky. At the same meeting Doble hitched Jack to the small wheels in the free-for-all trot, and won in the best time made for four consecutive heats this season, winning the last three in 2:13 1-4, 2:15 3-4 and 2:15 1 4, the first heat going to Ryland T. in 2:15 3-4. The pneumatic tire was also used with success by Geers, Starr, Doble and other trainers at Cleveland and again at Buffalo this week.—Rochester Union and Advertiser.

A Century With Many Mishaps.

A century run over the Elgin-Aurora course is easy as compared with the trip to Fox Lake and return. Sunday twenty Lincoln men started, thirteen finished the 120 miles to the city, and two, Barwise and Stokes, finished at Lake Geneva. Five of the party rode across country to Waukegan, thence Chicagoward. Pollock, Heywood, Cay-

ler, King and Howard were in this party. Dr. Barker, Brown, Cox, Kinkead, Parker, Herrick, F. L. Chase and others returned via Libertyville and Wheeling. None finished until long after nightfall. Colonel Lippincott treated the cyclists royally, setting a special dinner. Newman broke his wheel, Berger punctured his tires, Vogt and Guinea gave up, and Spooner's right knee troubled him so much he returned by train. Heywood broke his wheel at Winnetka, and Wittstein, who was riding in from Fox Lake, loaned him his. A Winnetka boy loaned Jule Howard his wheel to finish on, when he had broken down at Winnetka. Newman punctured his tire near Libertyville but fixed it temporarily.

Peoria's One-Day Tournament.

PEORIA, Aug. 9.—The tournament which will be held here September 27 promises to be no small affair, considering the fact that it is only a one-day meet. All the Chicago fast riders and a number of the eastern flyers, the most prominent among them being Taylor and Zimmerman, have promised to be on hand. The prize list is being rapidly made up, and is already running into thousands of dollars. It is a well known fact that all the prizes given by the Peoria club at its tournaments were first-class in every respect, being both costly and useful. We do not intend to fall behind the times this year, and whatever prizes we put up will be well worth some hard riding. On the evening of the 27th the club will give a grand smoker to the visiting wheelmen and we can assure all visitors that the P. B. C.'s cup of hospitality will be full to overflowing during this meet, the same as in the past.

"Jimmy" can well afford to come to the tournament city, as it means success to him in every race he enters. He has carried away more prizes from Peoria than any other racing man in the world ever carried away from one city, and when he visits here in September he will certainly go away loaded (with prizes). There is also another attraction in this city for young men besides racing. One of Peoria's fairest ladies, and, by the way, a very wealthy one, thinks that the boy from New Jersey is "rather a nice sort of lad." This in a manner accounts for Jimmy's regular attendance at the Peoria meets.

LAUREL.

Nearly Ready.

After a good long wait, the Illinois division road book is at last in sight. The seventeen maps are completed and in the hands of the printers, and the reading matter, nearly ready, is in L. W. Conkling's desk. The job has proven a long and arduous one to "Conk" and Steen, who have upset many difficulties which would have discouraged most men. Conkling has just returned from a trip through "Egypt," in the southern portion of the state, where he was surprised to find many good roads. His discoveries will all be made known between the covers of this valuable book, which appears not later than September 1. "It will be the best road book by long odds that was ever issued," said its enthusiastic compiler and author.

Suspended for Sixty Days.

W. C. Thorne, of the racing board, announces the suspension for sixty days from July 23, of C. D. Cutting, M. Schmitt, C. Henry Larsen, G. W. Cooper, O. Olson and W. H. Bennett for competing in the unsanctioned races of the Y. M. C. A. at Parkside, July 23. "All amateurs are warned against competing with these persons in a cycle race of any kind during the period of suspension," adds Mr. Thorne.

HERE AND THERE.

Miscellaneous Notes and Paragraphs About Wheelmen.

Anderson, Ind., has 400 cyclists, eighty of them being females.

Penville, Minn., has a new bicycle club, with twelve members.

The city ordinances prevent the Grand Rapids wheelmen from coasting. Poor fellows! What next?

It is estimated that there are some 6,125 wheelmen and wheelwomen in Minneapolis, whose machines are worth \$646,700.

The Louisville C. C. wants to have 100 active members by September, and has dropped the initiation fee from \$16 to \$10 temporarily.

A Waukesha, Wis., cyclist ran into Dr. I. O. Summers on the sidewalk, and the gentleman of medicine flogged the youth with a walking-stick.

The Winona, Minn., council has just passed an ordinance regulating bicycle riding. In certain portions of the city, however, wheels will be permitted on the sidewalks at a rate of speed not exceeding six miles an hour.

Will Wynne and Will Caldwell, of Raleigh, N. C., and Columbia, S. C., respectively, have agreed to ride across the continent on bicycles. They are to commence at Charleston, S. C., battery and finish at San Francisco, Cal. They start August 25.

The Louisville C. C. has decided to hold a fall tournament, and Dr. H. B. Tileston, W. A. Watts and W. B. Earle have been named as a committee to arrange matters. Arrangements will be made to hold the meet on the Auditorium track, and already several valuable prizes have been secured, two bicycles and a piano being on the list.

Peoria's race track, on which so many records have been broken, would be put in condition for record breaking this fall, had H. G. Rouse the assurance that the Chicago men would go down. A few days given to record breaking would make an excellent drawing card, no doubt Peoria merchants would subscribe the prizes for such contests.

The Logansport, Ind., wheelmen, are complaining because they are brought to time for riding on the sidewalks of the place, and for scorching through the streets, while storekeepers are permitted to block the walks with boxes, barrels and the like, and horsemen are not hindered in their fast driving escapades. It would seem as if they really had some cause for complaint.

The Montana division of the L. A. W. holds a state meet and tournament tomorrow at Helena. Chief Consul Duerfeldt is very enthusiastic, and states that the track is in readiness and will give all lovers of the sport a chance to try their speed. The committees appointed are: Arrangements—F. W. Mettler, Dr. D. Wait and G. R. Fisher. Race track—W. L. Swendemann, J. A. Harb and C. H. Cooper. Advertising—A. E. Holmes, H. B. Gibson and Gus Ehrenberg.

A call at a certain cycling club house in Chicago recently revealed a state of filth in the lower regions which should put any cyclist interested at all in the club's welfare to shame, and yet a janitor was employed. Filthy and over-filled spittoons adorned the floor, and an old pool table of many summers was seen. It was in horrible trim, all up-hill and down. In the kitchen was found filth and disorder galore; the stove was flowing over with rubbish and the sink full of filth from past lemonade treats and watermelon deals, while on the floor reclined three or four empty beer bottles and a dirty glass. Look up your

surroundings, fellow-club men, and if the cap fits, why, put it on, and see that the janitor is fired or a different order of things exists, if you would have strangers carry away a good impression.

CHICAGO TO PORTLAND, ME.

Pullman Vestibuled Buffet Sleeping Car Service.

Commencing June 26, and continuing through the tourist season, the Chicago and Grand Trunk Railway will run a Pullman Vestibuled Buffet sleeping car of the most modern pattern through, without change, from Chicago to Portland, via Toronto and Montreal, leaving Chicago at 3:00 p. m. daily except Saturday, arriving at Portland for breakfast second morning. On this train there will be a Pullman car for Old Orchard Beach, and tourists for all north Atlantic seaside and mountain resorts will find this improved through service worthy of patronage. Secure sleeping car reservations and further information by applying to

A Prize Hen Party.

If three hundred hens lay three hundred eggs in three hundred days, how many hens will it take to lay one hundred eggs in one hundred days? To the first person answering the above problem correctly the publishers of the *Ladies' Pictorial Weekly* will give an elegant Upright Piano, valued at \$325, or its equivalent in cash, as preferred. To the second person will be given an elegant Safety Bicycle, valued at \$125, or its equivalent in cash. To the third person, a handsome Gold Watch, valued at \$75, or its equivalent in cash. The next fifty persons sending correct answers will each receive a prize, valued at from twenty-five dollars to five dollars. Prizes awarded in the U. S. will be sent free of duty. Contestants must enclose with their answer a U. S. postal note for thirty cents (or fifteen U. S. two-cent stamps) for one-month's trial subscription to the *Ladies' Pictorial Weekly*, which is one of the handsomest and best ladies' weekly publications on this continent; the object in offering this prize contest is to introduce it to new families and increase its permanent subscription list. We guarantee that prizes will be awarded strictly in order of merit. The date of postmark on letters is given precedence, so that persons living at a distance have just as good an opportunity of securing a valuable prize. Address, LADIES' PICTORIAL COMPANY, "E," Toronto, Canada.—14-2.

ARE YOU IN THE SWIM?

If you are a Bicycle Rider or Dealer we would advise you to look up the Sprinter Safety, manufactured by the Luburg Mfg. Co., of Philadelphia. It is one of the neatest designs, and best finished wheels that we have ever seen, and from what we can see and learn the material and workmanship is the best that money can produce. The Closure Self-Healing Tires are certainly a great success. We were shown a pair of tires that have been in use nearly six months, with about fifty punctures, made by pins, tacks, knives, nails, etc., no air has escaped and they seem to be very resilient. The Luburg Company are up to the times; they are soliciting good representatives all through the United States, and are allowing liberal discounts on these machines, also on sundries. A handsome 40 page catalogue has just been issued, which they will mail on application.

CHICAGO, December 2, 1891.

LOUIS JORDAN, 71 and 73 East Randolph St.

Dear Sir:—Your Bolte Indestructible Pneumatic Tires fitted to my Singer wheel last week, I think are a success. I do not say so because they are on my wheel and "I am in it," but because I feel satisfied after riding a century upon them, that they are good, honest, practical tires; well made, well applied, easy to repair and renew, and last, but not least, the valves are **ARE AIR-TIGHT**. To me the tires ride just as easily as does the Dunlop tire, which I have ridden this past season. Your application of these tires to my solid tired wheel, alteration of frame, etc., for same at moderate expense, shows me what can be done and that the people in Milwaukee are, or have, A "HEAD" as to Pneumatic Tires for **ROUGH ROADS**. You have my hearty recommendation. Respectfully,

H. D. WARD,
With CHAS. T. WILT.

To Athletes, Cyclists, Baseball and Footballists, Horse-back Riders, Boxers and Oarsmen, when you want to ride, run, walk, row, skate or swim a long distance, USE

ANTI-STIFF

It is a marvelous preparation for Strengthening the Muscular System. With Anti-Stiff there is no faith required; it goes straight for the muscles, and you can feel it at work. It has a peculiarly warming, comforting, and stimulating effect on all weak or stiff muscles and sinews. Quick in its action, cleanly and pleasant in use.

Rub it into the muscles every night for a fortnight, and you will be pleased at its supporting and strengthening properties. There is not, nor has been, anything like it till now. It differs from all Oils, Embrocations and Liniments, both in substance and effect. Some Athletes are so fond of it that they rub it all over them.

Price, 20c. and 35c. per box.
Trainer's Size, \$1.00.

HILLIARD CYCLOMETER CO.,

1230 Filbert St.

PHILADELPHIA, PA.

Missed his Opportunity! DON'T Miss Yours, Reader. The majority neglect their opportunities, and from that cause live in poverty and die in obscurity! Harrowing despair is the lot of many, as they look back on lost, forever lost, opportunity. **Life is passing!** Reach out. Be up and doing. Improve your opportunity, and secure prosperity, prominence, peace. It was said by a philosopher, that "The Goddess of Fortune offers a golden opportunity to each person at some period of life; embrace the chance, and she pours out her riches; fail to do so and she departs, never to return." How shall you find the golden opportunity? Investigate every chance that appears worthy, and of fair promise; that is what all successful men do. Here is an opportunity, such as is not often within the reach of laboring people. Improved, it will give, at least, a grand start in life. The golden opportunity for many is here. Money to be made rapidly and honorably by any industrious person of either sex. All ages. You can do the work and live at home, wherever you are. Even beginners are easily earning from \$5 to \$10 per day. You can do as well if you will work, not too hard, but industriously; and you can increase your income as you go on. You can give spare time only, or all your time to the work. Easy to learn. Capital not required. We start you. All is comparatively new and really wonderful. We instruct and show you how free. Failure unknown among our workers. No room to explain here. Write and learn all free, by return mail. Unwise to delay. Address at once, H. Hallett & Co., Box 880, Portland, Maine.

RED CROSS POCKET CEMENTING OUTFIT.

These metallic cases are nickel plated and are very neat and attractive. Can be conveniently carried in the pocket or placed in the tool bag. Each case contains a double tube of Red Cross Cement, a roll of our Pure Gum Patching, a sheet of Emery and a sheet of Friction Cloth. Sent to any address upon receipt of regular price, 75c. Cycles with Attachments.

1789-1892.

THE material for digest of U. S. Patents of all characters for "Cycles with Attachments" from 1789 to 1892, is in course of preparation for publication in two vols., to be issued early in 1892. The 2,500 patents are to be arranged under 36 or more arbitrary sub-classes, with 40 or more cross-indices under Attachments, and from 10 to 20 cross-indices under Propulsion. EACH and every sheet and figure of the drawings of the patents will be given together with the claims, all chronologically arranged, whereby an examination of the art, can be made with ease and certainty. From what we know of the compiler and the digest issued by him, we feel confident he will sustain his good reputation, and produce a digest to be desired by all interested in the invention, manufacture and use of Cycles. Those desiring a Prospectus of the work, or wishing to subscribe, should address the compiler,

What Makes A Good Wheel?

Road King, \$135.

*Road Kings and Road Queens are
Fitted with the Celebrated
Dunlop Patent Pneumatic
Tires.*

TO BUILD a good wheel, a truly high grade one, requires several things—experience, good workmanship, good tools, good material and from good designs. Without these points depend upon it a **good bicycle** cannot be constructed.

WE ARE not praising ourselves too much when we say we have all of these requisites, and, consequently, are able to build good wheels.

WE EMPLOY only the best mechanics, use only the best materials, have nothing but the best designs, and consequently we turn out a wheel equal to any made in this country or abroad; but the price is somewhat less with the **Road King** and **Road Queen** than with any other strictly **high grade wheel**.

IT WOULD be an easy matter to build these wheels cheaper. We might put them together with less care; we could use cheaper material, or we might put on a cheaper finish. But it would not pay. We would not get the many flattering testimonials we now receive and we would be under constant expense in keeping wheels in repair.

WE BELIEVE it pays to build a **good** wheel and receive our reward later. This we do, and if you desire proof of this statement call on some of these, our agents, for the information:

R. M. JAFFRAY, - - - - - Business Manager.

IS HE THE CHAMPION?

Zimmerman bears the title of champion of England for three distances, one five and fifty miles, and every paper throughout the land calls him "the champion bicyclist" of the world. Though he may be such, he has not as yet earned the title. Since he has been in this country he has easily won every event he started in save one handicap, and he finished third in that. He has met Taylor of 2:11 fame; Munger, the great handicap rider; Taxis, all the Canadian cracks, and he has conquered them all. But he has not been matched against Tyler, Berlo and Windle, and without doubt these three men rank ahead of the others named, at least in competition. Zimmerman easily defeated the English cracks, save Osmond, whom he did not meet, but that is no evidence he can wipe up the earth with Tyler, et al., for the records in competition show the Americans to be far superior to our friends across the water. Tyler is regarded by many to be the best man in America today, not barring Zimmerman either. He is young in this racing business, but he is a flyer of the first order. Berlo has probably been more successful than any other American except Zimmerman this year, and Windle—well, he has always been a winner, and when he goes into a race he thinks he is going to win. Zimmerman has beaten him and may do so again, but unless the Milbury lad knows he can win he will not ride.

Until the Jerseyman has defeated these cracks in good style he cannot be called the champion. The chances, it must be admitted, are in his favor, and if he does not win against Berlo, Tyler and Windle he will make them ride as they never rode before. If he beats them he may well be called the champion of champions; but until then these men are entitled to as much consideration as Zimmerman.

TRY THE FLYING START.

For years the wheelman has been striving to equal the trotting record for one mile, and just as he had it in sight it takes a jump that puts it almost beyond reach. Nancy Hanks' mile in 2:07 1-4 is remarkable speed, but that time was made possible only by the advent of pneumatic tired wheels and a flying start. When a horse of Nancy's calibre crosses the tape it is pretty nearly at its full gait, and it certainly would be two and a half seconds ahead of a bicycle at fifty yards if the latter started just as the horse reached the tape. If it is a fact that Taylor rode a trial mile in 2:09 4-5, his time, allowing the difference in starting to be two and a half seconds,

would be just about the equal of that of the famous mare's. The subject of comparative speed of the trotter and the bicycle has become almost threadbare, but now it will likely be revived. As has been said hundreds of times before, it is not fair to give the horse a flying start and the bicycle a standing one. Tyler or Taylor or Windle could, with a flying start and good racing, equal Nancy Hanks' time or lower it a fraction. Taylor's time for the three-quarters was 1:36 1-5 and Nancy Hanks' 1:36 3-4, a very small fraction apart. With a flying start Taylor would have been well ahead of this. While Nancy Hanks trotted the last quarter in 30 3-4 sec., it took Taylor 34 1-5 sec. Bicycle riders are not trained as the horses are, or they might be capable of holding the pace for the last quarter. They do not seem to get down to business and train properly—they like good things and have them, little thinking that harm will result. If a bicycle rider could have the same care that is given the horse, the latter would never hold the trotting record.

LOOK OUT FOR SANGER.

Zimmerman has beaten all the country's best men except Tyler, Windle and Berlo; he is certainly pretty near their equal if not their superior; but the man that has pushed him the hardest this year is Sanger, of Milwaukee. No matter what this paper has said of the Badger state flyer, it had admitted that he is a good rider, and having covered a mile in 2:26 stamps him a rider of the first order. He had only twenty yards on Zimmerman at Samia and beat the champion for place, while his time was but one-fifth of a second better, from the twenty-yard mark. Look out for Sanger!

Denver's Lantern Parade.

The lantern parade in connection with the Knights Templar conclave at Denver was a brilliant affair—in two senses of the word. There were not less than a thousand wheels in line, and it took a half-hour for the procession to pass a given point. According to the *News* every rider who could buy, beg, borrow or ride a wheel was in line, the outside contingent almost doubled the number of club members. There was probably never a more unique procession of the kind witnessed before on top of earth. The grotesque and graceful out-vied each other, the latter class being almost entirely in the line of Masonic emblems, while the other stopped short of nothing in the created kingdom. All the things that fly, swim and creep were there. Hartman had a framework of a house with "Rooms to Let" on the side, while Louis Block rode a full-rigged brigantine. Al Blanche was caparisoned as a sir knight, and was astride of a horse-bicycle, while a "Pike's Peak or bust" oxen cart rigged up on a tricycle followed. Cassidy's design was a cross and crown, but, unfortunately, the light was extinguished before the parade was over.

Cycling Killing Base Ball.

Base ball managers of the east, says a Louisville paper, realizing that there is no longer any money in the national game, are seriously considering the advisability of building bicycle tracks on their ball grounds, and holding race tournaments. Bicycle races are the fad in the east now, and they will continue popular for a long time to come. The base ball men realize this, and they are now anxious to take advantage of it. Dr. Stucky of the Louisville club had an offer early this season to put a track on the Louisville grounds, but did not see the advantage of it.

A NEW IDEA FOR RACING.

Tom Eck Thinks an Association the Proper Thing.

EDITOR REFEREE:—A great many columns of matter have been written in regard to race meets, their management, makers' amateurs and the protection and maintenance of good racing. Still, the racing continues in the same old rut, and the cry goes up, "professional amateurism!" Now I agree with Mr. Prial, in his editorial in the *Wheel* of Aug. 5, that we must have makers' amateurs, in order to show cycle racing to its best speed. The public must see something for its money, and the makers' amateurs are the drawing cards; but at the same time the public wants a change, and it does not care to see two or three men take first, second and third in every race, and the only way to remedy this is to make class races and handicaps, the slowest being a three-minute class, up to 2:20, and free for all, while the handicaps would bring all the men together. As it is now, four or five men scoop all the prizes, and the racing is too much one-sided. Any person posted can pick the winner. We want races where there is a contest between equal men, and class racing produces this. How long would trotting races exist if the fastest horses could compete in each race? It would break up every track association in one year.

The racing board should be in charge of a national track association; it should appoint a man to act as secretary and treasurer of the association, and every track should join this association at a fee of \$10 or \$20 a year. This association is for the protection of racing and race-meet managers. The secretary of each track would send a copy of all heats in three minutes and better to the secretary of the board, who could keep a book with the records of all men who have beaten three minutes, and he would provide each track with a statement of the best record held by each racing man who has beaten three minutes, and handicappers could have such a list. There is no protection now to any association. For instance: Springfield announces a race meet; racing men from all over America send in their entries, and Springfield advertises the largest number of any meet in America. But on the day of the race only half the men who enter make their appearance. The club is disappointed and the public asks: "Where is so-and-so from New York?" His name is down but he is not here," and the public is disappointed. But the cute racing man had his name in the papers and on the programme, and the club is out half its entrance fees. That is one reason why the racing board should take charge of the track association. A rule should be made that any man sending in an entry, if not accompanied by the fee, should be liable for it and barred from competing on any other track belonging to the association until he pays his entrance fee, which amount should go, half to the club and half to the racing association, which pays for the secretary and treasurer.

One reason why race meets are not profitable to clubs which manage them is because they have too many events on the programme for one day's racing. At trotting or running meetings from four to six events each day is all that is on the score card.

I believe in heat racing. It always gives the man who could have won, if he had not lost his pedal or been pocketed, a second chance, and especially in the slower class races it is more satisfactory and interesting, and makes from two to five heats in each class race. Handicaps should always be dashes and

an inducement offered scratch men outside of the prizes, as these men must have something at stake to finish. Novice racing should be confined to the three-minute class. Why class racing is so essential is this: Philadelphia gives a tournament with the following events: One-mile, novice; quarter-mile, open; one mile, 2:40 class; half-mile, handicap; third-mile, open; one-mile, open; one-mile, handicap; one-mile, lap, open. Here are four open events, and the three fastest men romp off with the first three prizes in each race. They also have a chance in two handicaps, and all in one day. This does not give the new aspirant any courage to train or become a racing man, so the public has to look at the same crowd of flyers in each race. More class races, gentlemen, if you expect to bring out young blood and see races from start to finish. The same thing is tiresome, though fast. The Philadelphia meet will not include a hundred racing men; but if Springfield gives class races from three-minute to the 2:20 class, they will receive 300 or 400 entries. They would get all the racing talent from north, south, east and west. Men must have a chance to win a prize or they will not compete at any meet.

I am a strong believer in the flying start in all scratch races; it will add to the interest. Even a false start is exciting and causes interest. But it is all nonsense to compare the flying start on bicycles to horse racing. A man only has his wheel to govern; he has not a horse before him who has several different gaits. He must come up wheeling every time, while some horses come to the wire pacing, running, single-footing and hitching, and a good judge will not start a horse when he is off his gait, even if all the others are even when they pass under the wire. That is what often bothers those who are not up to horse racing, and that is what often causes so much scoring and time lost. There need be no bad actors in starting a bicycle race—a whole regiment of men can come up even; why not a few wheelmen? A time for jockeying at the score could be imposed, which would hurt a rider's pocket more than he could gain by fooling at the mark, and by having the flying start it would be an inducement for faster time. It would also do away with so many people being on a track during the starting of a race, and in records would put us on an even footing with the trotter. The day is close at hand when the trotter will come in third for speed, and the bicycle will be second to the running horse.

Taylor's quarter-mile (28 2-5 sec.), with flying start, is better than any trotter has ever made, while Taylor's mile (2:11), with standing start, is only two and a fraction seconds slower than Sunol's record, while the difference in standing and flying start would have placed him on even terms with the record. I look to see 2:09, with standing start, this year; twenty-four miles in the hour, 100 miles in less than five hours, and 425 miles in twenty-five hours. T. W. Eck.

Wagner's New Role.

F. J. Wagner, of Chicago, has been secured by the A. B. C. to train H. G. Baine for the twenty-four hour bicycle race. Mr. Wagner comes highly recommended as an expert in his profession. Mr. Baine is required to ride from one to one hundred and fifty miles per day, and has so far accomplished a wonderful record. He will ride in the bicycle race at Elkhart to-day.—Goshen (Ind.) Times.

The Washington club closes its regular card Sunday with a run to Joliet, leaving the club house at 7 a. m.

NEW YORK, Aug. 13.—My respects to George Lacy Hillier, and while it is unpleasant to disagree with such an authority on racing matters, I cannot pass over his statement in the REFEREE that betting is not prevalent at race meets in England now, or that the makers' amateur does not exist. As Mr. Hillier quoted a few of my statements and tried to refute some with apparent success to himself, I must have a short round with him on those two subjects. As regards makers' amateurism in England, I can refer Mr. Hillier to the editorial statement of the *Cycle Record* of Coventry (which is edited by a man who is in a position to know whereof he speaks) which says: "The entire English system is impregnated with makers' amateurism, and the amateur definitions of the N. C. U. and the L. A. W. are dead letters." I cross to Mr. Hillier's own ground and allow his own paper to tell him, which all English cyclists know, that nearly all the best of England's racing men and record breakers have been for years dependent on manufacturers for support. The manufacturer will not invite George Lacy Hillier to inspect their ledgers or gaze on the advertising accounts, for they know that Mr. Hillier is a N. C. U. young man who wears robes of amateur purity, and they mean to juggle a bit more with rules which are elastic, lax, and easily got around, so they cater to humbuggery and hypocritical sentiment. And supposing this state of things did not exist from where would England get her racing? Not from "gentlemen amateurs." Why, that creature is as scarce as hen's teeth. Look at the crowd that competed for the Cuca Cocoa cup, and see if you can spot any son of an earl, lord or baronet in the throng.

No, they bore the names of the plebeian and Jones and Price are better known on the British path than Fitz Hugh or Edgerton. Mind you, I have great respect for the amateur, be he a "gentleman amateur" or a common every-day "am-achoor," as Frank Egan calls him, and it is for the genuine amateur (and therefore ninety-nine per cent. of this country's cyclists), I am continually agitating for, as it is from the majority we must expect the best results. But would it not be unfair and unwise to put a fast roadster in a race against Sunol or Nancy Hanks? Of course it would, and that is what the L. A. W. and the N. C. U. are doing. These two bodies are giving the cream of racing to the one per cent. of racing men, and expect the ninety-nine per cent. of the fast stock of the path to compete with men who are supported by clubs and manufacturers.

Turning to Mr. Hillier's denial as to the speculating fraternity at English race meets, I can only give what came under my notice during a seventeen month's active experience with the American team on the paths of Great Britain. My first experience in England of this kind was at the Alexandria Palace Royal international three days' tournament in 1877, at which Mr. Hillier was judge, and I counted fourteen gentlemen with book and bag doing business right in front of the club house, and at various provincial meetings, anybody

who wanted to bet could easily find a book-maker, as they were numerous enough. Only this spring I read the O'Reilly of *Wheeling* experience, when he told in *Wheeling* of laying odds on Du Cros and the good gold "never came back." Ah, yes, the O'Reilly can tell Mr. Hillier where to find a "booky" at most London or Irish meets at least. My experience was in 1887, but here is what E. C. Carter, the official A. A. U. of America handicapper, says, and Carter ought to know. Writing from Bristol to the *New York Sporting Times*, he says:

Judging from some of the stories I have heard, athletics in England have not improved much of late. A good many of the London clubs make their races open only to hospital athletic clubs, universities, and few other athletic clubs like the Blackheath, South London and Finchley Harriers by invitation.

Betting is still quite a feature at some of the games, and has a good deal to do with the interest taken in athletics by the objectionable class.

It is not so bad in the Southern District, but it is carried on there on the quiet, even under the very noses of the Amateur Athletic Association. At its own championship meeting the first words I heard when I entered the grounds at Stamford Bridge were "six to one bar one." The bookies were good judges, too, for the one barred was Bradley, and he won the hundred all the way.

A good illustration of athletics in the north of England is the story told that in one of the many boys' races held in that district this season, a boy came running up to one of the contestants just as the pistol was about to be fired and said: "Father, thee'st got to win, for they got the money on thee."

So you see, Mr. Hillier, I have only to quote people on your own ground to bear out my statement that makers' amateurism and betting is a prominent feature of the sport in England, and that the same have brought the sport to a low ebb also is true. Makers' amateurism is a good thing; let's have more of it, but call it by its right name and give everybody a show to become a makers' amateur and speedy, and away with what Gladstone would call "a nebulous hypothesis."

WOMEN GOING IT ALONE.

Women are learning to cut loose from male escorts, although a young man in an "ad." in the *Herald* offers to escort "lady cyclists" anywhere they wish to go, and possibly this is the same young man Frank Egan perpetrated a cruel joke on the other day. Frank saw the "ad." and got his best girl to reply to it, "hoping that she would be the favored one," etc., and appointed a meeting place up town on one of those hot days. The bait took and a meeting arranged, and Frank, from the cool shade of an elevated station, saw the expectant and longing dupe waiting for the "favored one" who never came. But I was going to say that women cyclists are going it alone, and it looks as if Lou. Peck's occupation as the guide and philosopher of the sex, in Boston at least, would soon be gone.

Three Brooklyn young women, Miss Alice Mitchell, Miss Agnes Becker and Miss Mabel Stout, returned to Brooklyn yesterday from a bicycle trip to Albany. They started two weeks ago and each took a lunch basket, a water flask and a change of clothing. It took them just a week to reach the state capital. When they started they intended to cover thirty miles a day, but they found this impossible on account of the condition of the roads. They made thirty-five miles on the first day, but not much more than twenty during the rest of the time. At one point the road led through nine

miles of marsh and the fair bicyclists had to walk their wheels through the swamp. They met with a warm reception all along the line and were frequently invited into houses by the farmers and other people. At one town they were taken for the advance of a circus which was billed to appear the next day, and received a great ovation from the inhabitants. The young women all weighed more when they got home than when they started.

SCHWALBACH'S BAD BOY.

Alex. Schwalbach and Quinlan, of the Gendron company's force, told me a funny story Friday about their office boy, which illustrates the importance and age of the average American youth. Ben Bianchi is the lad's name, and he draws salary as office boy, his father being a member of the New York stock exchange. The father wished the Gendron people to give his son a six weeks' vacation, and Cashier Getz told the boy he could have it, providing he supplied a suitable substitute in his absence. The next morning when Schwalbach and Quinlan arrived at the office a row of boys, all ages, nationalities and color, extended from the sidewalk up stairs to the second story, where the office of the Gendron company is, and the crowd had overflowed into offices on the second floor where doors had to be barred to keep out sundry stray ones. They had overflowed the Gendron second floor and were experimenting with pneumatic tires, deflating some and blowing others up, and some of them learning to ride around the spare room. "Great Scott, what is this?" exclaimed Alex. Schwalbach, "I wonder if they have mistaken this place for the battery free baths!" "Possible they think we have the fresh-air fund tickets," suggested Quinlan. "What in the devil does this mean?" exclaimed infuriated Cashier Getz, who was overcome with the sight of his office boy calmly seated at the treasurer's desk and quietly investigating the careers and characters of the boys as they passed in review before him, while the office force looked on in amazement. At last a well-dressed, red-headed lad of sixteen caught the fancy of Mr. Bianchi, the office boy, and he mounted a chair and addressing the struggling mob, exclaimed: "I have engaged a boy who will suit our firm; you can now go. Sorry I can't give you all a job." Bianchi is fifteen. He had advertised in the *New York World* for a substitute without consulting his superior officers, and told applicants to apply to "Mr. Ben Bianchi, Gendron Wheel Company, before 8 o'clock in the morning," and that solved the mystery. Cashier Getz and Alex. Schwalbach now think that the selection by Bianchi, Jr., was a wise one, as the substitute is equal, if not superior to the boy who they think will have a running chance some day for the chair at the White House.

A NEW DRIVE WANTED.

The *Brooklyn Citizen* is stirring up a daily agitation for a cyclists' path or road which will, if made, extend from Prospect Park to Coney Island, five and a half miles, and be built by Brooklyn, just as the bridge paths for horsemen have been built. The *Citizen* prints an interview with some prominent cyclist daily, and among those who have given their testimony on the subject have been Dunn, Luscomb, Schwalbach, Whymp, Backman, Bates, and many others. The majority of Brooklyn cyclists favor the move, which they say will relieve the park drives and boulevards of the danger of collisions between cyclists and carriage drivers, and think if the horse men can have a special road they can. Luscomb, I hear, strongly disapproves of the idea, and Barney Whymp is my

authority, as Luscomb was out when I called on him in the Stewart building. His principal objection is, now that cyclists have fought for and have been placed and classed as ordinary vehicles, and have every right to the public roads they will injure their cause by demanding special rights and privileges. But it must be remembered that the cyclists are not demanding it; they are only seconding the efforts of the well-meaning citizens proper.

THE SCORCHER'S ATTITUDE

If I thought that it would be necessary and binding upon me to ride a bicycle on all-fours, and my eyes always fixed on the earth, I would prefer to walk and look up. What a spectacle the man cuts as he rides with nose on the tire as if he were trying to smell out a puncture.

BICYCLE TRACKS IN BALL GROUNDS.

I was told last week by a very responsible agent about a racing scheme, which if acted upon, will do wonders for American path racing. My informant said that he had got the news from an inside source, and that it was this: A. G. Spalding, seeing the decadence of base ball was going to build a first-class bicycle track in every ground that was operated by the National Association of base ball, and that Spalding was going to encourage racing for cash, and would probably form a racing association with iron clad rules to govern same. I had heard a rumor to this effect some time ago, and therefore called at Browne street to see if John Spalding, the brother, could authenticate the rumor. I missed Mr. Spalding, so collared A. B. Barkman, and he said: "I have not heard anything, but there might be something in it, as A. G. Spalding don't tell all his plans in advance, still I fancy that if there was much in it I would have heard. I hope it is true, for if A. G. Spalding goes into the cycle racing business you can safely wager he will make a big success of it." There is no doubt he will, and it wants just such a man to control professional cycling. Spalding has controlled thousands of professional base ball players, and it would be a picnic to control bicycle racing compared to professional ball.

MORGAN.

New York Trade Matters.

Hearing that J. F. Friedenstien of the Anglo-American Iron Metal Company of Platt street had returned from his European trip, a REFEREE correspondent waited on the Anglo-American hustler last Friday and found Secretary Friedenstien wallowing in a pile of correspondence, the result of Manager Jarvis Brown's two days' sickness, due to the extremely hot weather and hard work during his partner's absence. Mr. Friedenstien, in response to the interviewer's query as to the success and observations that had attended his trip abroad said: "My appearance must indicate that from a social and pleasure standpoint my trip was a success" (and the ruddy glow of the face was testimony enough), "and the most I can say for the Birmingham and Coventry people is that they try to make you forget all about the business which brought you there. I fell in with Thomas Saunders, W. Bown, W. D. Teal, and that jolly man "Billy" Loudon, of cement fame. I had a great time with these people, and toured North Wales in the company of Mr. Saunders and wife, and stopped at Rhyl, Flandudra, Abenestwyth and other famous watering places. In Birmingham I was the guest of William Bown, who has a magnificent residence and one of the finest art galleries in all Birmingham. An American cannot but leave such people with only the most grateful and pleasant memories, and really at times wish you lived there

NOTE TWO DAYS' RECORD OF...

"Imperial Wheels"

ECLIPSING EVERYTHING YET MADE in the way of FIRST PRIZES, taken in TWO DAYS, July 4th and 5th.
OUT OF ALL EVENTS IN WHICH "IMPERIALS" WERE ENTERED
2nd or 3rd PRIZES WERE IN ORDER WHEN 1sts WERE NOT TAKEN.

FIRST PRIZES.

1st Prize,	1 Mile,	Ill. Div. Championship.
1st "	2 Miles,	" " "
*1st "	1-2 Mile,	" " "

*BREAKING WORLD'S COMPETITIVE RECORD.

1st Prize,	5 Miles,	Ill. Div.
1st "	1-2 Mile,	" "
1st "	1-4 Mile,	" " Championship.
*1st "	1 Mile,	" " "

BREAKING WORLD'S COMPETITIVE RECORD.

1st Prize,	1 Mile,	Mo. Div. Championship.
1st "	2 Miles,	" " "
1st "	2 Miles,	" " "
1st "	1 Mile,	" " "
1st "	20 Miles, Road-Maine	" "
1st "	5 Miles,	Road-Janesville, Wis.
1st "	1-2 Mile,	Battle Creek, Mich.
1st "		Houston, Texas.
1st "		Wauseon, Ohio.
1st "		Alameda, Cal.
1st Prize,	1,760 feet, 1st class,	Van Couver, Wash.
1st "	1,760 feet, 2nd class	" " "
1st "		Belle Plaine, Iowa.

MORE TO FOLLOW.

SUMMARY

"Imperials" Entered in 28 Events. **TAKING 20 FIRST PRIZES. BREAKING**
TAKING 3 SECOND PRIZES. TAKING 5 THIRD PRIZES. TWO WORLD'S RECORDS.

CATALOGUE FREE.

AMES & FROST COMPANY,

302 Wabash Avenue, Chicago.

"THERE'S REASON IN ALL THINGS.."

THE REASON WHY

SYLPH CYCLES RUN EASY is because the bearings are of correct shape, made of Best Material obtainable; properly fitted and adjusted in forks set at proper angles.

THE REASON WHY

SYLPH CYCLES RIDE EASY and are a pleasure and comfort to their riders is because they have a properly constructed Spring Frame—one in which the load is directly over the Springs, and which is rigid in every direction except UP and DOWN. This makes the springs very sensitive, and the hinge joint in the frame permits each wheel separately to pass over both large and small obstructions smoothly, thus saving the wheel and bringing that pleasure and enjoyment which all riders of Sylph Cycles discover after a trial of the machine.

THE REASON WHY

OLD RIDERS TAKE TO THE SYLPH is because they find it a more satisfactory mount for road and general use, and that it combines more new features of merit than any other two or three makes.

Positively No Loss of Power, because the saddle and crank shaft are always the same distance from each other whether the load be 75 or 200 pounds. We can't tell you All About It here, but Our Catalogue will. Send for one. Agents wanted.

ROUSE-DUYEA CYCLE CO., 89 G. Street, PEORIA, ILL.

to be among such a jolly lot as Bown, Saunders, Teal and Loudon—a quartette hard to beat."

"What is my opinion of the trade? Well, the English manufacturer seems to be well satisfied with their American and other foreign trade; it is the home market they complain of, which this year showed a decided falling off, and to my mind and from what I could gather, the cause is entirely founded by the rapid multiplication of the small manufacturer, who is not strong enough to open up foreign connections, so he unloads at home and is helping himself to the old maker's trade in every way possible. Next year will see nearly all the best makers represented in America. The pattern of next year's wheel (safety) will be the true diamond, and the Humber company is already preparing for next season on the old lines. The tire which is most popular to-day in England is the Boothroyd, beyond a doubt, with a great deal of respect for the Dunlop improved, which has quite a hold. The Crypto geared ordinary is a grand success, so much so that we have arranged for a complete line of parts for America for that wonderful wheel. What do Englishmen think of the McKinley bill? Well, naturally, they don't like it, and would no doubt like to see Cleveland elected and a modification of the tariff result. The English makers are close students of the American market. I made some important deals over there for my company, and the result of one will be that the Anglo-American company will carry the largest stock of the best English tubing of any firm or combined firms in America. A complete line of stampings throughout, all the stock being new and of the very latest pattern as used over there. We can now supply large and small makers with complete frames, the tubing cut into exact lengths and specifications as used in next year's Humber.

Our rim business has increased wonderfully, and here's something new (showing a twenty-eight inch aluminum alloy cushion rim, which only weighed six ounces, and being almost white in color). We are experimenting with these, and expect to know shortly the result of our experiments. Our Hercules chain will be a feature in the chain business, but we will also carry foreign chains, and from what I could learn on the other side, the black chain will lead in popularity next season. Our purchases abroad will almost be a cargo for the steamer that brings them, but we have plenty of warehouse room."

THE S. P. PROTECTION TIRE.

The New York Belting & Packing Company is busy and "fired" these days, and its "tire" is likely to be of the enduring kind, from what Manager Strauss and his assistant, T. F. Stillwell, tell. This firm is going into the tire business next season for keeps, and Manager Strauss' frequent trips to the new factory which is building are for the purpose of seeing that the bricks are laid quickly. "We will give the public the choice of three tires for next season," said T. F. Stillwell, "and our new protection strip with thickened tread will be a candidate for first pneumatic honors of any tire on the market. We will have an inner tube tire for those who prefer the more complicated tire, and we will have a self-healer which will be shut up by looking at it. Oh, yes, Manager Strauss don't get left much on the tire question, and there is no end to his seeking for the best. What do you think of this?"—showing a pedal rubber of aluminum lightness, which is dark, slightly corrugated, quite pliable, and it takes ten of them to weigh a pound, and is a

new rubber solution of extreme toughness and lightness.

A GOOD SEASON'S TRADE.

George R. Bidwell could not be seen, but Secretary Loucks, the old Kings County Wheelmen man, was in a position to talk trade. "Yes, the past season was a great one, in wheels, tires and cyclometers; and, in fact, in all our several cycle departments. This quiet spell just now is quite acceptable. It will give us a breathing time before the fall trade commences next month. We sold all the wheels we turned out at our own factory and thousands of different makes. Our tire factory has been running night and day, and we now have commenced at our new factory in Chicago, and expect to keep both factories going without let-up. Why, we could have sold several thousand tires if we could have turned them out in time, but for next season we are going to be ready, and our western factory will lift the extreme pressure off our New York factory."

Mr. Bidwell had run down to his summer house at Travers Island, and if there is anybody who deserves his present prosperity it is George R. Bidwell. Said an old-timer to me the other day: "I thought of going into partnership once with Bidwell. He wanted a man with a thousand dollars. That was the time he left Horseman's store and started up on Fifty-eighth street in the little store," but, luckily for himself, the millionaire saw in him the success which has followed, and you mark me, in five years George R. Bidwell will be a millionaire and will retire at that time.

SCHWALBACH'S FINE STORE.

What a splendid place Charles Schwalbach, of Brooklyn, has. I was prepared to see something fine, but was not prepared to find the most complete retail cycle establishment in New York state, and this statement will be borne out by all who have or will see it. The place is on Flatbush avenue, right opposite an entrance to Prospect Park. The building, which was constructed for Schwalbach, covers a large area, and the salesroom, office and riding school are said to be the largest in the state. What makes the place peculiarly attractive is that everything is on the first or ground floor, and there are no steps to climb. The other Brooklyn dealers are doing nicely. Young Fred Coningsby, also on Flatbush avenue, is doing well, being recently joined by his father. William Schmacker, the Brooklyn dealer, contemplates selling out, while J. W. Bate & Company report business good. The Schwalbach Cycle Company is a standing advertisement for Charles Schwalbach & Company, and the old house which Charlie built up would do well to change its trading title, which is met by Charlie Schwalbach with his advertisement, "the only Schwalbach in the retail cycle trade." The advertisements of both firms can be seen side by side in nearly all the cars.

GENERAL EASTERN TRADE NOTES.

F. E. Marsland of West Broadway says that he is now arranging with Hobart, Biddle & Company, Washington, to handle the Hobart in America, and if success attends the present negotiations he will be ready to supply the American trade with a good, medium-priced wheel. He will have a well-known English racing man for salesman, as Mr. Marsland is practically a novice in the cycle trade, although an old rider of the ordinary.

Elliot Mason and his assistants, Richards, Smith & Company, of Columbia and 12 Warren street fame, draw crowds who compare one of Sterling Elliot's best efforts in hickory, steel and hose pipe to

a racing sulky the next door neighbor is shrewd enough to place as near the Newton product as possible, and the hickory wheel of Newton is always the center of attraction to the pedestrian, who asks all sorts of questions about the combination wheel.

A. B. Barkman is now quite settled in Spalding's wholesale department on Broome street. An enquiry at the Spalding retail house on Broadway, regarding the workings of the so-many-cents-a-day system of purchase, elicited the reply that the plan has not caught on as well as they expected it would.

Manager Frank Bowden and Paul Angois of the Raleigh company will sail in the City of Paris for home next Wednesday. Mr. Angois came to America to assist Manager Atty in running things this side, but his health has been poor in our record-breaking climate. Angois is a Frenchman by birth and a very clever engineer and mechanic, who, with Morris Woodhead (the present superintendent at Nottingham) founded the now famous Raleigh company. Manager Bowden told me recently that Mr. Woodhead was in the employ of the federal government during the war as engineer, and took part in the siege of Vicksburg, being one of seven engineers who left New York for the war, only himself and one other returning alive.

Person & Muller of this city have placed a light-weight racing saddle on the market, and which they think will be used by all scorchers. The firm expects to be able to supply the trade with a large number soon.

T. Henry Sweeting's failure is much regretted in trade and other circles here. It seems the Quaker City man has many friends in this section, who feel disposed to suspend judgment on the failure and its causes until Sweeting shall have made his promised statement.

Ex-Chairman George S. Atwater of the racing board has just returned from a trip in the interests of the Stover company, and reports trade as being fair considering the hot weather.

The Liberty has had quite a run in Brooklyn and New York. Schwalbach of Brooklyn making a record for Liberty sales.

Godfrey, of Warren street, is the special agent for William Read & Son's New Mails and the Lovell Diamond, and has done good business for some time.

The new oiler made by the Metal Turning Company, of New Haven, is taking well, so Salesman Kennedy reports, in this city. Representative Morgan of the New Haven Company called on the REFEREE recently.

A. T. Brooks, of Chambers street, New York, shows samples of steel tubing for cycle making turned out by the Hartford Manufacturing Company, of Ellwood, Pa., a city of mushroom growth, fostered by Mr. Hartman. The firm will put in plenty of plant to make tubing in quantities, and some English tubing makers have been secured.

MORGAN.

MEN WE ALL KNOW.

No. 2.—W. S. Bull.

A man whom you all know came to town last week.

Did I say all? Well, nearly all, for to confess a lack of acquaintance with William Sheldon Bull is to argue one's self unknown.

Billy Bull his friends call him. His good nature has even led men to speak of him as "Buffalo Bull."

But his good-nature stops short at a certain point—usually, for example, when the crowd overruns a race track when he is refereeing a race meet.

Bull is famous as a referee. He is the individual who put a time limit of 2:23 on the world's record race at Springfield

last year, and got roasted by the crowd for awarding the race to the winner, who finished on fifth of a second outside of that time.

But Billy Bull never weakens. When he tells a small boy to get off the track

the small boy usually gets. When he tells a competitor to clothe himself decently and in accordance with the rules, the competitor usually does it—or don't ride.

The REFEREE played a dirty trick on Bull once—and blamed it on the compositor, of course. It got him mixed up with some English celebrity, and among other things said: "He has a keen appreciation of pretty women and dinners, and dances find him in his element!"

The air turned blue in Buffalo. Bull went to the office and wrote this:

"Friend Sam:—For heaven's sake square me. I don't dare go home."

Somebody said that Bull "has blue eyes, open and ingenious, as if their owner had just stepped into the world and wanted to know what all the fuss was about." He tells us he is thirty-nine years old—and I believe it, every day of it.

He has been riding a dozen years, and eighteen months ago conceived the idea that "if those other fellows can build bicycles for \$40 and sell 'em for \$150, I can too."

So he braced up to the colonel and talked about "we" manufacturers and "our" output for next season. And sure enough, "we" have not only turned out some good wheels, but have made some good records, "roasted" our competitors, and are getting along admirably, thank you.

Bull was once—yes, several times, chief consul of his state, and worked like a beaver. He has also been a V. P. of the league, and might even have been president if—ah, if—some people will add, the "colonel had so decreed." But then, that's all bosh; eh, Wilson? Eh, Robbins?

The possessor of the "ingenious blue eyes" finally saw that building wheels was more profitable than building the league membership. He was in the trade years ago, Bull & Bowen was the firm, but it wasn't profitable then, at least for Bull, and he put up his umbrella and his shutters.

As a road book compiler, tour promoter and general hard worker, Bull is well known. He shines as grand marshal of a lantern parade, and fears neither road hog nor the small boy nuisance on such occasions.

William is always popular, prosperous and happy. Long live Bull.

PHILADELPHIA, Aug. 15.—The long-looked-for souvenir medals of the Newark-Philadelphia century run, which have been longer in materializing than at the bars of the Century Road Club, at last are ready for distribution. The committee having the matter in charge did the best that was possible under the circumstances. The first work delivered was unsatisfactory and was refused. When a new design was submitted the die was broken before many impressions were struck off, thus causing further delay. Captain Schumacher announces that he can now obtain all that are required, and will give prompt attention to any request sent to 1,400 Oxford street. The medal is about the same size as those of former years, is made of coin silver and cost \$1. They will be furnished to survivors only.

The Captains' Association is making active preparations for the coming annual lantern parade. Owing to the improvement of Broad street with asphalt, the route will doubtless be changed so as to come further south on this magnificent street than has heretofore been the custom.

Al Allen, the well-known century man, who has clerked the course at all local race meetings this year, with one exception, and who has already been booked for several of the big fall meets, has gained a well-earned reputation with racing men, audience and the other track officials by the skillful manner in which he has filled this difficult position. At the South End meet, with an entry list of nearly 300, twenty-five trial heats and finals were run off in three hours and a quarter, old race meet goers saying that they never saw races run so quickly with such a field.

Last season at almost every race meeting held here H. Walter Schlichter, the sporting editor of the *Item*, officiated as announcer, but increased duties added to his interests as captain of a newly formed athletic club of phenomenal growth, have precluded his attendance this season. He was on deck again Saturday at the Mt. Vernon meet, and that clear, ringing voice that penetrates every nook and corner of the grand stand was once more used by its owner as of old. Probably no one regrets his enforced absence from things bicyclicular than the ever popular "Slick," and no one knows better the firm hold which cycling has taken on the general public over and above general athletics, than the versatile pen-pusher and all-around sportsman to whom is so largely due the success of the Philadelphia amateur swimming club.

PAUL BERWYN.

BUFFALO, Aug. 15.—The Ramblers B. C. is enjoying a well-earned season's prosperity, and all things considered, is in a most prosperous condition. Its ambitions have been such that, governed by its long line of experiences, there has been nothing but success to follow every venture. To-day the Ramblers stand alone, almost, among the clubs which are above all financial difficulties, and, although there have been times when the management has been called down for its seeming conservatism, yet the standing of the club to-day fully com-

pensates. This club is adding to its membership roll every month men noted for their speed, pluck, and endurance, and also men of solid business habits.

Yesterday Klipfel, the "undaunted," made his thirtieth century of the season. He was accompanied by a number of local wheelmen, among whom was a large delegation from his club, the Ramblers, and Foell of the Press. His superiority manifested itself when he arrived at the club house ahead of all his companions by several hours. This century was made over the Buffalo-Le Roy course, and this year its roads are generally in a very poor condition. The strong head wind prevailing prevented the riders from making anything like fair time, and also hindered some of them from finishing at all.

There is quite a bit of talk about a consolidation of all the east side wheel clubs into one grand organization. The present names of all to be dropped and the new union to be christened with a new name. Such a scheme looks quite feasible and would infuse new life into many of our wheelmen, could the change but be consummated under the best management. Should such a change take place, it would involve the Wanderers, who have at present a membership of about forty-five; the Columbias, with a membership of thirty-eight, and the Comrade C. C., with thirty-five men. There is considerable doubt in the minds of many as to the success of such a scheme. Many protest against large clubs and affirm that a better furtherance of the true sport of cycling, touring and pleasure-bent excursions is best maintained by a small club whose members are all thoroughly well acquainted, and from whose small numbers factions are unknown. Every one knows that factions are the natural enemies to the peaceful continuance of club sociability and to the promulgation of club life, and the small club is less liable to factions than the large.

The Wanderers are at work upon another scheme whereby they may add to their popularity and longevity, and also make a change of headquarters. It will be desirable to make this change before the first of the coming month, and a special meeting will be called at an early date to take action in it. At a recent meeting of its board of managers, C. F. Keyser was elected captain to fill the vacancy caused by the resignation of G. G. Buse; Frank Woelfel was made first lieutenant and Edward Young second lieutenant, offices made vacant by resignations.

C. H. Callahan, the popular fast man of the Press C. C., has been elected to the office of captain, vice Newell, who has resigned the office. This week Wednesday the club will have a moonlight run to the Bedell House, where a good time generally will be in order.

We are happy to state that F. W. Russer, of the Columbia club, will soon be able to mount his wheel, as he has recovered from his slight indisposition. The Columbias will have a moonlight ride down the river on the evening of the 25th, and from the increasing demand for wheels, the prospects are good for a large attendance.

G. C. Sweet will leave on Wednesday for St. Auburn, Conn., where he will remain a month. His family will accompany him. Before his return Mr. Sweet will visit Springfield in time for the meet, where he expects to meet the

makers and agents of the Victors, and a general good time will be the result.

The Comrade C. C. has entered Maeder, Sanger and Englehardt for the exposition races. This club is growing so fast that the new quarters in William street are too small, and a committee will soon be appointed to look for larger.

WILLIE DUNN.

GRAND RAPIDS, Aug. 15.—The warm weather seems to have its effect on the club runs lately, as they have not been as largely attended as usual.

The Grand Rapids Bicycle Club has selected Miss Daisy Thompson collector, and several new members have been admitted lately.

The Second Infantry has organized a cycle corps, which will consist of a detail of two men from each company to do duty at camp this week. The riders detailed from this city are Lieutenant J. H. Taylor, A. Souser, Harry Hydrom, Erve Kemp, Charles Letts and William Leffinwell.

Fred N. Hyman made his second century for this season Sunday; actual riding time, 8 hrs. 23 min.

Most of the fast men in the city are in training for the Labor day races to be given by Studley & Barclay.

Harry Hydrom returned from a month's outing at Battle Creek last week.

A large number of the local cyclists are at the summer resorts enjoying the cool breezes of Lake Michigan. HAL.

RICHMOND, Ind., Aug. 15.—A club has been formed with eighteen charter members. It is the intention to make it an L. A. W. club. The officers are: Fred H. Fox, president; Frank M. Whitesell, secretary and treasurer; William G. Swain, captain; Robert Canby, lieutenant. It is to be called the Wayne County Wheelmen.

The second annual century on Aug. 18 is under the auspices of the W. C. W. The run to Muncie, by way of Winchester and return by New Castle and Cambridge City is one of the most delightful in this part of the country. The start will be from the Union depot at 4 a. m. Thursday, with Townsend and McCoy as pacemakers to Muncie, fifty miles; breakfast at Winchester; start from Muncie at 12:30 after two hours' rest and dinner for Cambridge, thirty eight miles, with fifteen minutes rest at New Castle; supper at Cambridge and start for home, sixteen miles, at 6 o'clock. The pace is to be eight miles an hour all the way through. On the back of the invitation is a map of the run showing a table set for meals and bed at home ready for occupancy when the rider reaches there.

CLUB MASCOT.

MILWAUKEE, Aug. 5.—At the last regular meeting of the Milwaukee Wheelmen the race track project was resuscitated, and several propositions offered by different members were discussed. The most prominent, and the one which received the most attention, was that of building a half-mile track inside the mile track at the new state fair grounds. National Park and Athletic Park were also up for consideration, and a committee consisting of O. E. Binner, A. C. Morrison and W. L. Simonds was appointed to confer with the officers and owners of the several parks, and ascertain just what can be done. While Milwaukee is advancing very rapidly in all other things appertaining to cycling, it is a matter for regret that her hundreds of riders who have more or less racing talent have no place at their disposal for the proper developing of speed. With a suitable track, such as is enjoyed by riders in other cities of even less population

than Milwaukee, will come an interest in racing heretofore unthought of which will add new lustre and fame to the reputation of the Cream City in the cycling world.

W. M. Breckenridge, of the Milwaukee Wheelmen, who has been spending the summer in Pittsburg, is shaking hands with Milwaukee friends. Breck was employed by a large bicycle house in that city, and devoted his spare time to racing, in which he was very successful. He rode under the colors of the Pittsburg Athletic Club, winning one first, two seconds and three thirds, all from scratch.

It is very gratifying to note the number of additional lady riders one sees this season. If I were to express myself according to the highest female cycling authority, Elizabeth Robins Pennell, I should have said "woman cyclers," but as many I refer to can not be classed under that category at the present writing, I take my chances of being understood. I recently had a conversation with a lady friend of mine, an excellent rider, who has just returned from a three months' trip to England. As she is very enthusiastic over the sport, she expected to find ladies equally so on the other side, but she was greatly disappointed, as the fair devotees of the wheel are rather limited in number. The roads are so good in all parts of England that ladies in company with gentlemen friends take more to the tricycle. American women hold in their hands the future and permanent prosperity of the wheel; if they continue to ride it, and throw around it their patronage, the glory as the years go by will extend until it will be the leading sport.

Gustave Liebscher, of the Milwaukee Wheelmen, has removed to Brooklyn.

The time Nessel made on the Milwaukee road race, 48:11, has been decided by the official clocker, E. J. Meisenheimer, to be absolutely correct. He is supported in his decision by three competent assistants, who acted as official timers. It seems a "great roar" has been made about nothing. Mr. Garden, of Chicago, who enjoys something of a reputation as timer, made the assertion that Nessel's time should have been 49:11, a difference of one minute. A careful investigation of the subject will prove that Mr. Garden has made a mistake. Apropos of the undeserved criticism heaped upon the racing board of the Milwaukee Wheelmen for limiting the handicap of L. J. Berger to two minutes in the race, I am at a loss to comprehend how so methodical a person could have made such blunders in reporting his time on the entry blank—fifteen miles in forty-eight minutes. Mr. Berger's treatment at the hands of the racing board borders on unwarranted liberality; by his own admission he should have been placed with the scratch men. A retrospective glance at the work of the racing board can not but call for admiration on the part of every one for the honest manner in which they handicapped the race. To such an extent did they carry their desire to treat visitors fairly that they made it impossible for a Milwaukee rider to win a place.

The annual century run of the Milwaukee Wheelmen will take place this year on the last Sunday in September, and will be a leading event. Last year it was a great success and largely attended by riders from all sections of the northwest.

Out of 300 members of the Milwaukee Wheelmen only four attended the regular scheduled run to Cooney Sunday. The big four consisted of Lieutenants Schmitbauer and Prachthausen and Private Becker. Silver King Johnson punctured his tire on Fifth street, but he

repaired it and followed later. This run cost the club \$6 for postage and printing, and the limited attendance should be a deep seated regret to the members.

JACK ROYAL

DES MOINES, Aug. 16.—Cycling hereabouts has been lulled by the extremely hot weather of the last three weeks, no regular club run having taken place. But as the cooler evenings approach, many interesting runs and rides have been planned, with a possibility of some kind of tournament.

The three firms here report business fair, while the Kenyon Bicycle Manufacturing Company is turning out some very fine specimens of cycles, two or three weighing only twenty-six, twenty-eight and thirty pounds, Edmonds, our crack rider, using a twenty-six pounder, geared to sixty-eight inches, fitted with Morgan & Wright's racing tire.

At the Iowa division meet held at Sioux City last week, A. B. Edmonds, of Des Moines, won four out of the five state championships, and can be rightly styled the Iowa champion. He is improving wonderfully and gave Johnson, of Minneapolis, and Merrill, of Chicago, a hard race in the open events. By the way, the meet in regard to visiting wheelmen was a failure; as to attendance of onlookers a success. As a state representative meet, a failure; as a local meet, a success. The boys hereabouts blame the officials for not advertising the affair until the very last moment. The league in Iowa is getting the strength of a man, and in the near future will be a power in its way in Iowa, and we hope the next state meet will be a grand rally of Iowa L. A. W.

JUDA.

FORT SCOTT, Kas., Aug. 13.—The cause of roads improvement received a great impetus here on the night of Aug.

12, when Henry E. Harris, the coming chief consul of the Kansas division, addressed a meeting of the editors of eastern Kansas on the subject of good roads.

The occasion was a banquet tendered to visiting editors who numbered about a hundred. Mr. Harris, who was down on the programme for a response to a toast, was permitted to choose his own subject, and he urged upon the newspaper men the importance of giving personal and professional aid to the cause. Full credit was claimed for the L. A. W. for the gallant fight it is making. There is no doubt that the speech did much good, as, after the banquet, a number of editors of the most important papers in the state came to Mr. Harris and promised him to keep up the agitation and to assist the Kansas division in lobbying a good roads bill through the next legislature.

SECK.

LONDON, Aug. 6.—I have just returned from the Harrogate meet and camp, one of the jolliest and most enjoyable functions of all the cycling year. As well as being the pleasantest, it is also one of the oldest-established events in the cyclist's calendar. Sixteen years ago the first cyclists' meet was held at Harrogate, a famous inland watering place in Yorkshire, where there is a spa famous for the curative properties of its waters. The place is situated high up on one of the cliff table-lands of England. The air is most bracing and invigorating, and within a few miles is some of the finest scenery in England. As years went on the north of England meet became of considerable importance. Men came not only from the surrounding district, but also from Scotland, the midlands and south. On one occasion, ten years ago, there was a row at one of the hotels, late in the evening, after the men began larking, as young men with plenty of health and spirits will do. The result was that the hotel proprietor sent in a bill for £40 for damage done, and it was intimated to the promoters of the meet that their patronage was not desired at that or any other hotel in the town. The

question then arose as to what should be done. The men were not going to give up the meet, and it was almost decided to hold it elsewhere when some one suggested a cyclist camp. The idea was at once taken up, and the field of the Harrogate Cricket Club, about a mile from the center of the town, was hired for the purpose of carrying it out.

The first camp was a great success, and since then it has been held every year, opening on the Friday before the August Bank holiday, and closing on the Wednesday after it, a period of five days. Of course at times it has suffered, owing to the weather, but however wet it may have been one year, the men have always turned up again with the greatest persistence twelve months later. Some of the old campers have come to regard it as a regular fixture, and they would not miss it for anything. They come from all parts—Scotland, London, Coventry, Manchester, Liverpool, Preston, Newcastle, Leeds and Bradford—and all regard it as a holiday where the cares of business are to be laid aside and one's whole energy devoted to the enjoyment of one's self and others.

The camp itself consists of some fifty bell tents, arranged in the shape of a double horse-shoe, at the top of which is a special tent reserved for the president. At the open end are the secretary's tent, the barber's tent, the social tent, the mess tent and the machine tent—all large, lofty marquees of varying shapes and sizes. Each of the smaller tents is occupied by four men. They are provided with wooden floors, and each man has allowed to him a rough mattress, a bolster of straw and a couple of army blankets. All the meals are served in the mess tent, the men taking coupons for them when they enter the camp, and the cost to each man is close on three dollars a day. In the early days of the affair the men were quite content to take their tents just as they were and make the best of them; but more recently a fashion has arisen for decorating them in the most elaborate manner. Flower beds are planted around the entrances; flags, lamps and curtains are used in profusion, and when the weather is fine the scene is a very gay one. This year the conditions were, on the whole, very favorable. It rained each night and the wind blew freshly each day, but neither

wind nor rain were heavy enough to cause any great discomfort. The president this year was Henry Sturme, the editor of the *Cyclist*, and it is worthy of note that this was the first occasion on which a press man has been so honored. It is said of Sturme that it was he who threw the bolster which began the row that ended in the starting of the camp. However that may be, he has only once missed being at the camp since the start, and that was in his racing days when he was in bed at home with a broken shoulder. His presidency this year has been a most popular and successful one. He brought with him as his *aide de camp* E. H. Godbold, the editor of *Bicycling News*, and while Sturme supported the dignity of the position in the public events Godbold assisted him admirably in the dispensation of the hospitality which rules within the more private precincts of the president's tent. Here each day they entertained a large number of visitors, and in the late hours of the evening they held receptions of the picked men of the camp. For my own part, I have seldom come across a more distinguished and talented set of men than gathered at Harrogate. There was scarcely one who had not gained honors in some line of life, or who was not possessed of some striking characteristic. And a more jolly and good-natured lot I never came across. Everybody seemed bent on making the best of everything, and the result was that everybody had a joyous, happy time. The meet has usually been noted for the presence of some cyclist from abroad. Years ago "Papa" Weston and his American touring party visited it; last year George Burston of Melbourne was the honored guest; this year one of the club visitors was R. M. Jaffray of the REFEREE, who was one of R. L. Philpott's party. He is not a man given to many words or great enthusiasm, but on this occasion he grew almost eloquent in his expressions of pleasure at the jollity and enjoyableness of the whole affair. Each day there was some special attraction on the programme. On Saturday there was racing, on Sunday there was a special church service followed by a sacred concert. On Monday there was more racing, and on Thursday there was a picnic to Studley Royal and Fountains Abbey, one of the most beautiful spots in England.

LONDON, 33 HOLBORN VIADUCT, E. C.

Harry Beckham, of the Illinois club, is in New Foundland on a month's tour.

Sam Danziger left Saturday for a tour in southern Wisconsin and northern Illinois.

The Wicker Park League Club has changed its name to the Wicker Park Cycling Club.

K. F. Peterson and wife are at Nago-wicka Lake, touring through the surrounding country.

H. M. Gardiner, of the Lake View Cycling Club, is after the twenty-four-hour record honors.

The Bowmanville band, which lately accompanied the Lincoln club to St. Joe, is to be mounted on cycles.

Miss Ada Graves, of the west side, rode to Elgin and return in 6:05, an excellent performance even for a man.

Long Lake to Chicago, fifty miles, was ridden Sunday last by Captain Harry Rose, of the Washington Club, in 3:43.

Sunday the Illinois club goes to St. Joe and the following week to Ottawa, where the day will be spent among the campers.

The Messrs. Stahl, on Thursday, Aug. 9, rode to Fox Lake, a distance of fifty-five miles, in 6:03. They rode home on Thursday.

The Lake View Cycling Club runs to Waukegan, starting Saturday afternoon. The Oak Park club rides up and back Sunday.

Miss Lizzie Stahl and Sam T. White rode to Fox Lake and return Sunday, a

century, in less than sixteen hours. The fifty-five miles to Fox Lake were done in 6:35.

The Lake View Cycling Club gives a lawn party this (Friday) evening in the club's yard. A large dancing platform has been erected. Refreshments will be served throughout the evening.

C. Smith, of the Columbia Wheelmen, rode 200 miles on the Oak Park ten-mile course in seventeen hours. He had neither time-keepers nor officials, and was out just to see what he could do.

This Saturday evening the Columbia Wheelmen expect to occupy their \$15,000 home at 311 west Division street. There will be no grand blow-out, but all friends will be given a cordial welcome.

Greenburg, Erickson, Tagholm, Paulsen, Schubbe, Doyle, Hand, Brandt, Olsen and Bartholdy, of the Columbia Wheelmen, rode over the Elgin-Aurora course Sunday, the first seven in less than twelve hours.

Being just too late to rescue a drowning man Sunday, a mile off Chicago avenue, in twenty feet of water, Harvey Pound, of the Quadrant company, spent two and a half hours diving before succeeding in getting the body.

Several members of the Minnette Cycling Corps are sadder but wiser men, for on Saturday last they staked their all on Woolas to beat Stillwell in the Lake View Club's McConnell race. Some \$500 or more changed hands, it is said.

The South Chicago Y. M. C. A. Cycling Club entertained forty members of the six other Y. M. C. A. cycling clubs in this city, at a banquet, Thursday evening last, conducting them through the great rolling mills for an appetizer.

F. J. McElroy, of the Lake View club, rode down the sandy beach of Lake Michigan in Monday's broiling sun to St.

Joe. Several members of the Kenwood Road Club lately rode a century to Michigan City and return on the beach.

Jimmy Goes to Cleveland.

NEW YORK, Aug. 17—(Special.)—Zimmerman and Windle won't meet here on the 27th. The former positively appears at Cleveland and the latter at Manhattan Field. Tyler's movements are unknown.

MORGAN.

The Pneumatic Responsible.

Amid great excitement at Washington Park, Chicago, on Wednesday, Nancy Hanks, driven before a pneumatic sulky weighing sixty and a half pounds, by Budd Doble, trotted a mile in 2:07 1-4, the

quarter being 31 1-2; half, 1:03 3-4; three-quarters, 1:36 1-2; mile, 2:07 1-4—last quarter, 30 3-4. Doble thinks the mare will do even better than this before the season ends.

As with the bicycle, the pneumatic tire for use on the sulky has now become a permanent thing, and no first class races are held with the old style vehicle. C. C. Jerome of Chicago is now using one behind his horses, Road Master and Pat Leg, and hopes to break their records of 2:22 and 2:25, respectively. This sulky was on exhibition at Kimball's carriage repository during the week and created considerable interest among horse owners. The new style wheel is a surprise to old-time drivers of trotters. One said, the other day, at Grand rapids:

I came simply to look on; I came here to attend

the races and to learn something. I have learned something to-day. You know the old saying, "never too old to learn." If any man had told me a year ago that I would have seen a horse lugging a bicycle around a race track I should have told him he was a lunatic; yet I saw that very thing to-day at the track.

In a recent race at Grand Rapids Bush was the only horse that appeared with a high wheel in the 2:19 trot, and she discarded it for the bicycle wheel after the first heat. In the free-for-all the four pacers were hitched to the fashionable rig, while Muggins was the only starter in the 2:27 trot with the ordinary, and she was distanced the first heat. This shows how well pneumatics work on sulkies.

C. J. Conolly, the Rochester bicycle agent, fitted three sulkies with pneumatic tires last week. The orders were from Dell Barker, owner of Nellie B, Emory Walter, owner of Kitty Bard, and E. H. Newcomb, owner of Chronos. The latter horse won a 2:20 pace in three straight heats with the new wheels.

The Toledo Cadets.

The first military cyclists in this country were the Toledo Cadets of the Ohio National Guard, though since their organization many similar bodies have been formed. While in camp last week about thirty of that company rode to Presque Isle on their wheels, and immediately after their arrival gave an exhibition drill on them. The drilling was done on the parade ground, which is a very rough stubble field, and one on which any whee man might hesitate to ride. There the company executed all the movements of a cavalry troop, wheeling and turning in both slow and fast time. They use wheels built especially for their use by the Gendron Iron Wheel Company, and notwithstanding some very severe use, the wheels have stood up wonderfully well; in fact, no trouble has been experienced by the soldier cyclists.

Eastern Race Matters.

The rumor that Windle would don racing clothes once more and at an early date has been generally discredited; but the following proves beyond a doubt that my statements weeks ago, that Windle would race this fall, and was training on his private track, were correct. The letter, fresh from a typewriter, was received from the little champion to-day:

WEST MILBURY, MASS., AUG. 13, 1892. W. J. MORGAN, NEW YORK.—Your letter of yesterday was duly received this morning. I shall probably race at all the meets of any account this fall. I intend to be down to the Manhattan Field the 27th, sure. Am not in very good form as yet, but trust that I will be so at that time. Call and see me when this time again. Thanking you for your kind enquiry, I am, very truly,

W. W. WINDLE.

Columbia vs. Raleigh of Great Britain, with the 2:10 for company; and warm company it will be, too. Whatever criticisms I may have launched at the fair lad of West Milbury in the past, have not been done because of any personal feeling, but was a fair statement of public opinion, and as such I stand by it, notwithstanding the shafts hurt a sensitive nature like Windle's. A champion must always expect criticism. But after the question I raised was satisfactorily explained, nothing else could be said, for Windle can never be accused of cowardice or unfair tactics on the path; and I am convinced that he is game. Why should he not be? Are not his parents Anglo-Saxon? His face reflects the pluck he possesses. Regarding his "not being in very good form," must be taken with a grain of salt, as the following, sent me by W. S. Warriner, of the Springfield Bicycle Club tournament committee, shows Windle to be racing tolerably fast—1:03 4/5, in a strong wind, is not bad. Mr. Warriner says:

W. W. Windle was in town yesterday, stopping off on his way home from Hartford, where he had been on business. He rode on Hampden Park both morning and evening, and made a half mile from a rolling start in 1:03 4/5. He was paced the first quarter by F. C. Graves and finished alone. He did not work very hard, and can undoubtedly go much faster, but this would be fast enough to beat Zimmerman's 1:05, which is the official record for the half mile. Moreover, Windle had a strong wind against him and is not yet in the best of condition. He had been in training only about a week, he said, though he had been riding more or less through the season. He is hankering after his lost mile record, and after riding a while longer on his Milbury track with his friend M. B. Arnold, he expects to come here about the middle of next month and spend two weeks. He admitted he would probably race in our tournament and wished to get used to our track before he raced here. If in suitable condition, he may also run in the Buffalo races this month. Windle is much pleased with our track and said it was so fast he had difficulty in gauging himself properly. Windle's friends are as confident as ever that he is the fastest man in America, and say he can easily beat 2:10 for the mile to-day, and his week yesterday would seem to justify the assertion.

Dan Canary and President Miller spend their spare moments breaking in the pair of 2:10 colts who go to the winners of the big race at Springfield; and from what I can learn the trotters are a great pair and brought Miller and Canary home in very fast time from Holyoke the other evening, where they had been to a picnic. A Springfield correspondent says:

George F. Taylor is expected to arrive in town to-day and will probably set to work reducing records again, and Harry Tyler is expected the last of the week. Thomas Relp is not been feeling well lately and has given up training for the present. The bicycle club has decided to

give up both the ordinary races in the tournament, and will substitute half-mile, open, races for them. The ordinary races were a mile, open, the first day, and a half-mile the second.

The clash of many tournament dates, August 27, is bound to scatter the cracks, and the pot hunter will have a picnic sure. What with Cleveland, Montreal, Chicago, Philadelphia, New York, the "blue rims" and other kind of rims will not go around for all places; but the present racing system is to blame. Tournament managers are at the mercy of a few cracks.

The M. A. C. people of this city are to issue 30,000 free invitations to their grand cycling blow-out, and with real estate, pianos and the suggestive names of Moneypenny and Betting as managers in charge, every blessed crack in these United States ought to be there. They say that the cracks of to-day want the earth, so the Moneypenny-Betting management will give them two sections of it on August 27.

NOTES.

Taxis and Zimmerman will go for tandem records this fall.

There is great hustling to secure the cracks for the various events Aug. 27.

The Union County Roadsters of Rahway give their races Sept. 5, writes Secretary Chamberlain.

Road racing in the main must be suppressed. *Wheeling's* suggestion that the united cycling press refuse to publish anything about them is worthy of consideration.

The appointment of a paid timer and referee by the L. A. W. is being discussed favorably.

A. B. Rich is evidently off training somewhere, as his desk in the Liberty Broadway store looks lonesome. They say "Quilly" is getting into his old form.

W. S. Campbell is a most generous fellow. He gives away a prize any friend might admire. His latest gift was a magnificent smoking set, to ex-Chairman Atwater of the racing board.

S. B. De Young, treasurer of the Manhattan Bicycle Club, is back from his European tour.

W. H. De Graff ("Pap"), J. B. Anderson and J. A. Atkinson are associate managers of the M. A. C. meet.

The M. A. C. has discontinued paying expenses for the Teuton, Carl Hess. Here's a chance for a club to get a very good man, for Hess is a clever handicap rider.

* * *

Coming Philadelphia Races.

The Quaker City Wheelmen, of Philadelphia hold their second annual race meet on the Tioga track Saturday, Aug. 27. The programme contains twelve events, as follows: One-mile, safety, novice, open; quarter mile, safety, scratch, open; one-mile, ordinary, handicap, open; one-mile, safety, 3:10 class, open; one-mile, safety, handicap, open; half-mile, safety, scratch, open; one-mile, safety, Q. C. W. championship, club; one-mile, safety, record (prize for each lap), open; one-mile, safety, 2:45 class, open; two-mile, safety, handicap, open; one-mile, safety, Q. C. W. handicap, club; one-mile, tandem, handicap, open. The prize list is an attractive one, containing a \$700 piano, numerous high grade wheels, gold watches and other articles of value. The Tioga track is being constantly improved and should be in record-breaking shape by the time of the Quakers' meet. Information or entry blanks can be obtained from Cap-

tain C. Z. Schumaker, 1400 Oxford street.

The committee in charge of the meet of the Associated Cycling Clubs, on Sept. 17, announces the following list of events for that occasion: One-mile, safety, novice; quarter-mile, safety, open; one-mile, safety, 2:40 class, open; half-mile, safety, handicap, open; one-third mile, safety, flying start, open; one-mile, safety, world's record, open; one-mile, tandem, handicap, open; one-mile, safety, handicap, open; one-mile, safety, lap race, open. The prize list will undoubtedly be the most valuable one yet offered this year, and in addition to the prizes for the winners a prize will be given to the leader on each lap in every race. Entries close Sept. 10 with F. H. Ganigues, 921 Chestnut street.

From the present outlook the meet of the season in Philadelphia will unquestionably be that of the Park Avenue Wheelmen, on Sept. 24. The committee in charge, headed by its indefatigable president, has been working for months on the coming event, and will leave no stone unturned to keep their position at the top of the heap. Its reputation was well established last season, and as a consequence, although their entry blanks are not yet out nor the prize list announced, they have received the positive promise of almost every crack rider to be present. Some startling novelties are promised for this meet, notice of which will shortly be made public.

The annual road race, which has been given for the past three years by the Wilmington Wheel Club, will be held this year on Saturday, Oct. 1, and will be held under the joint auspices of the Wilmington Wheel Club and the Warren Athletic Club. A specialty will be made of the track events, and the prize list will be sufficiently handsome to attract not only all the noted road riders of the country, but the path riders as well. On the Monday following the meet a trip will be taken to the new kite-shaped track at Kirkwood, Del., the proprietor of which has a standing offer of prizes for any records broken thereon.

The Tioga Athletic Association, at its last meeting decided to hold a tournament under its own auspices, on Columbus Day, Oct. 21, the proceeds of which are to be devoted to the further improvement of the track. Any information regarding the tournament can be obtained from C. A. Dimon, chairman committee, 1020 Walnut street, Philadelphia.

PAUL BERWYN.

* * *

Milwaukee Racing Gossip.

W. C. Sanger, of the Milwaukee Wheelmen, will attempt to lower the twenty-five-mile world's record. The latest bomb exploded in Milwaukee bicycle circles, and one that is causing no little excitement, is that Sanger, who has developed such remarkable form as a rider, will go against this record. Preparations are being made and all the essential details will be carefully looked after. The attempt will in all probability be made over the White Fish Bay road, which has a magnificent straightaway of three and one-third miles, and is as level as a floor. The only possible objection that can be argued is the numerous turns, but they would prove no serious objection. Twelve or fifteen of the fastest riders in the northwest will assist in the attempt to smash the record. The date for the event has not yet been decided, but will be in the near future.

The first annual century run of the North Side Cycling Club took place last Sunday over the Watertown course. The start was made from the club room at 5 o'clock, with twenty-three in line. The roads proved to be excellent and the

pace-making such as enabled all to finish, with the exception of one or two. Souvenirs were presented with handsome gold badges by the club.

Sanger, Nicel and Schmidtbauer will run off the Milwaukee championship race, which was postponed at the recent exposition races, at the Milwaukee Wheelmen's tournament, National Park, September 10. At the exposition races each rider won a heat, and the race is to determine who is the champion. The medal is of solid gold and valued at \$100.

Should Sanger be successful in defeating Lumsden in any of the races at Parkside on the 26th and 27th, he will loom up in all the greatness of a new silk tile, purchased at the expense of one of his friends, who is willing to lose the bet.

Among the Milwaukee riders who have signified their intention of competing at the races at Parkside, at Chicago, are Sanger, Andrae, Nicel, Price, Wegner and Schmitz.

W. C. Sanger, accompanied by his father, will attend the races at Cincinnati, and may have an opportunity to ride against Zimmy. From there he will attend race meets in Sarnia, Ont., and Buffalo, returning home for a few days' rest before starting for Chicago. Sanger is riding in wonderful form, and it is not idle talk to say that great things may be expected of him.

The racing board of the Milwaukee Wheelmen has decided to have a grand field day at National Park Saturday, Sept. 10. The half-mile track will be got into the best of condition and will be capable of fast time. The events will be twelve in number, embracing everything from a quarter to a ten-mile race. A good list of prizes will be offered, which it is expected will interest the fast men all over the country. The holding of the meet on the date selected is considered very opportune, as many of the leading men of the country will be in the west about that time, and it is hoped they can be induced to participate. This is the initial meet of the Milwaukee Wheelmen and every effort will be made to make it a grand success.

Notwithstanding the large expense contingent to the Milwaukee Wheelmen road race, F. J. Schroeder, chairman of the racing board, has turned over to the club's treasury \$100 as the profit of the race. This amount will be placed to the credit of the race track fund.

* * *

Meet of the Mt. Vernon Wheelmen.

The Mt. Vernon Wheelmen made their first attempt at holding a race meet on Saturday last, the result being an extremely interesting afternoon's sport, which was, however, not so well patronized as it should have been, the audience not numbering more than 1,200. The event of the day was its one-mile open, or the "piano race." Taxis, Carl Hess, Wheeler, Rich, Mulliken, R. H. Smith, Hazelton, Hanley and Bilyeu lined up for this event. Smith went for and captured the prizes offered for both the first and second laps. Taxis was easily the favorite for first place; but through evident over-confidence, added to fear of Rich, allowed Hess too much headway, and the flying Dutchman came down the stretch with such a magnificent spurt that it was impossible to catch him. After the programme was finished Taxis, paced by Bilyeu, Smith and Wheeler, made an attempt for the track record made in competition by Taylor on June 25 of 2:30, and out the figures down to 2:26 1/5. Following is the summary:

One-mile safety, novice—first heat—Alexander R. Mudgett, T. W., 1; F. G. Brick, unattached, 2; G. N. Rucker, O. C., 3; time, 2:56 2/5.

Second heat—C. H. Thomas, P. A. W., 1; H. W.

THE TOURIST.

The Highest Grade Bicycle in the World. Perfect in Material, Construction and Finish.

Made at Colt's West Armory, Hartford, Conn., under the same system and with the same attention to detail followed in the manufacture of Colt's fine fire arms. Gun steel forgings; all cones and bearing cups cut from the bar, not stamped.

WEIGHT: { Road Racer, 34 lbs., } PRICE, \$150
 { Roadster, 42 lbs., }

Fitted with BIDWELL (THOMAS) PNEUMATIC TIRES, guaranteed against puncture, bursting and leakage.

Final—W. N. Price, 1; J. A. Mead, 2; H. N. Swank, P. A. W., 3; time, 2:54 1-5.

One-mile, safety, open—Carl Hess, M. A. C., 1; W. W. Taxis, unattached, 2; A. B. Rich, 3; time, 2:30.

One-mile, safety, 2:40 class—G. B. Waters, Centaur C. C., 1; H. T. Wunder, 2; J. F. Cope, N. W., 3; time, 2:47 2-5.

One-mile, safety, championship, time wheelmen—C. M. Baily, 1; Morris Hunter, 2; time, 3:03 1-5.

One-mile, safety, handicap—first heat—A. B. Rich, 55 yards, 1; R. P. Rich, N. W. W., 110 yards, 2; J. W. Judge, R. W., 125 yards, 3; time, 2:26.

Second heat—H. C. Wheeler, M. A. C., 35 yards, 1; J. R. Hazelton, R. A. C., 45 yards, 2; G. W. Coates, A. C. S. N., 140 yards, 3; time, 2:30.

Final—H. C. Wheeler, 1; A. B. Rich, 2; J. W. Judge, R. W., 125 yards, 3; time, 2:22 4-5.

One mile, ordinary, handicap—C. L. Logen, un-

One mile, handicap, open—A. A. Zimmerman, N. Y. A. C., 1; W. Hyslop, Toronto B. C., 2; time, 2:28 2-5.

Club championship, two miles—W. Hyslop, 1; D. Nasmith, 2; F. W. Gullett, 3; time, 5:36 2-5.

Consolation race, one mile—C. A. Calahan, P. C. C., Buffalo, 1; G. S. Low, Montreal B. C., 2; time, 2:40 4-5.

SECOND DAY.

On the second day, Monday, fully 5,000 people were attracted to the Rosedale track, which was in excellent shape and the weather was grand. Zimmerman's handicaps were doubled, at his own request. The results were as follows:

Half-mile, handicap—G. M. Wells, 30 yards, 1; A. A. Zimmerman, scratch, 2; W. Hyslop, 30 yards, 3; time, 1:05 3-4.

One mile, handicap—W. S. Campbell, Manhattan Athletic Club, 30 yards, 1; W. Hyslop, 2; time, 2:26 3-5.

Quarter-mile, dash—G. M. Wells, 10 yards, 1; Zimmerman, scratch, 2; time, 33 3-5.

Five-mile, handicap—W. Hyslop, 150 yards, 1; W. S. Campbell, 130 yards, 2; time, 13:55 3-5.

One mile, open—Zimmerman, 1; S. M. Wells, 2; W. Hyslop, 3; time, 2:54.

Three miles, provincial championship—G. M. Wells, 1; W. Hyslop, 2; time, 8:47 3-5.

* * *

Iowa's State Meet.

The meet of the Iowa division at Sioux City last week resulted in some good racing and state record breaking. There were good crowds present on both

A. B. Edwards, 2; D. E. Halton, 3; time, 5:05 3-5.

One hundred yards slow race—A. B. Edwards, 1; George Lapps, 2; Thomas S. Morrison, 3; time, 2:08.

One-mile, state championship—A. B. Edwards, 1; N. McElvain, 2; H. A. F. Ford, 3; time, 3:02 1-5.

Quarter-mile, open, flying start—D. H. Halton, 1; H. L. Stacey, 2; William Schnell, 3; time, 34.

Half-mile, open, J. S. Johnson, 1; D. A. Halton, 2; Thomas Morrison, 3; time, 1:10 4-5.

Five-mile, state championship—A. B. Edmonds, 1; H. A. F. Ford, 2; N. McElvain, 3; time, 15:33 1-5.

* * *

Cutting's Chicago-Aurora Record.

There has been considerable discussion among century riders in Chicago over the record made by C. D. Cutting, of the Cook County Wheelmen, from Chicago to Aurora, via, Elgin, and return. According to report he started Sunday to beat his own record of 7 hrs. 56 min., made a short time since, and which was said to be some fifteen minutes better than Ulbrecht's record, made last fall. He started at Halsted and Washington streets at 5:10 o'clock, paced by A. R. March, and reached Aurora in 8 hrs. 50 min., notwithstanding a rest of thirty-six minutes at Elgin. This would make his riding time for the fifty-five miles just 3 hrs. 14 min., a performance Cutting is hardly capable of. Then Rogers of Aurora, Nelson of the Columbia Wheelmen, and Buchanan, of the Illinois club paced him back, reaching his

composed of various and good prizes, and Jacksonville's biggest prize is an \$800 piano. This promises to be a strong circuit, and from the way it is being boomed will surely be successful throughout.

* * *

The Chicago C. C. Tournament.

From all indications the two days' tournament of the Chicago Cycling Club at Parkside next Friday and Saturday will surpass anything of the kind given in Chicago. The arrangements are nearly all complete for the event, and with good weather the gate should be a large one. Already there is a big entry list, and to-morrow, when all entries must be in the hands of Charles P. Root, 334 Dearborn street, the list will include all the western and some of the eastern flyers. The track has been put in excellent shape, the turns having been re-built, so that there will be no longer danger from falls.

The prize committee has been diligent and very successful, and announces several bicycles, cyclers' clothing, gold and silver medals, silverware, sundries, e'c., a valuable and select lot of prizes for the sixteen events. The house committee of the club has been made one on entertainment and reception, and is making arrangements to receive outside riders and care

attached, 100 yards, 1; E. C. Bahl, Q. C. W., 155 yards, 2; J. L. Hanley, W. A. C., 115 yards, 3; time, 2:45.

Quarter mile, safety, open—first heat—W. W. Taxis, 1; F. A. Demorest, P. W., 2; H. C. Beebe, W. W. C., 3; time, 3:29 2-5.

Second heat—George C. Smith, R. W., 1; W. H. Mulliken, B. C. C., 2; time, 3:35 2-5.

Final—W. W. Taxis, 1; W. H. Mulliken, 2; time, 3:34 5. Smith finished second but was disqualified, as his trainer overstepped the mark.

One-mile, tandem, handicap—J. C. Donnelly and S. H. Bilyeu, 1; R. P. Rich and Frank Dampman, 2; time, 2:35 1-5.

PAUL BERWYN.

* * *

Zimmy at Toronto.

The first day of the Toronto, Ont., meet saw 4,000 in the grand stand to see Zimmerman and the Canadian cracks in the Toronto B. C.'s races last Saturday. There were threatening clouds hanging over all day, but the rain held off. Zimmerman was well received when he won his three firsts. The summary:

One-mile, novice—A. N. Budetan, Toronto B. C., 1; J. McKay, Kingston B. C., 2; time, 5:12 1-5.

Quarter-mile, flying start—A. A. Zimmerman, N. Y. A. C., 1; G. M. Wells, Toronto Wanderers B. C., 2; G. S. Law, Montreal B. C., 3; time, 3:23 3-5; previous Canadian record, 3:36.

One-mile, three-minute class—L. D. Roberts, Toronto Athenaeum Club, 1; W. G. McClelland, Toronto B. C., 2; time, 2:46.

Half-mile, handicap—A. A. Zimmerman, N. Y. A. C., 1; W. Hyslop, Toronto B. C., 2; time, 1:08 4-5; previous Canadian record, 1:12 1-5.

Club handicap, three miles—W. M. Cannon, 1; F. A. Bendelan, 2; time, 8:12 4-5.

days, Wednesday and Thursday, and much interest was taken in the events, which passed off smoothly. The summaries:

Half-mile, novice—H. A. Stacy, Chicago, 1; E. V. Friend, Brighton, Ia., 2; Charles Ashley, Sioux City, 3; time, 1:19 3-5.

Quarter-mile, state championship—A. B. Edmonds, Des Moines, 1; H. Clifford, Sioux City, 2; F. McElvain, Cedar Falls, 3; time, 37.

Half-mile, handicap—F. McElvain, Cedar Falls, 60 yds., 1; L. E. Halton, Omaha, 40 yds., 2; T. S. Morrison, Chicago, 60 yds., 3; time, 1:10. Johnson on scratch.

Quarter-mile, boys—Ralph Earl, 1; F. Schermerhorn, 2; James Jackson, 3; time, 39 1-4.

Quarter-mile, open—First heat—A. B. Edmonds, 1; W. Schnell, 2; H. J. Cassidy, 3; time, 36.

Second heat—J. S. Johnson, 1; Bird, 2; Merrill, 3; time, 34 4-5.

Final heat—Johnson, 1; Bird, 2; Halton, 3; time, 36.

Half-mile, Sioux City C. C. championship—Ford, 1; Kaump, 2; Harstad, 3; time not taken.

One-mile, handicap—Schnell, 100 yds., 1; Edmonds, 100 yds., 2; Morrison, 150 yds., 3; Johnson, scratch, 4; time, 2:23 2-5. Merrill quit on the first lap.

One-mile, three-minute class—Edmonds, 1; Ford, 2; Morrison, 3; time, 2:44 2-5. State record.

Half-mile, state championship—Edmonds, 1; Ford, 2; Hamiland, 3; time, 1:17 2-5. State record.

Two-mile, open—Johnson, 1; Halton, 2; Edmonds, 3; time, 5:56 2-5.

* * *

SECOND DAY.

One-mile, open—J. S. Johnson, 1; D. E. Halton, 2; William Schnell, 3; time, 3:38 3-5.

Two mile, handicap—J. S. Johnson, scratch, 1;

destination at 12:10, or exactly seven hours, and reducing the record by fifty-six minutes. The course is about 105 miles, and how Cutting can do fifteen miles an hour for seven hours is more than can be understood. The trip to Aurora would have to be done at a rate of about eighteen miles an hour. Somebody is terribly off, that's sure.

On the same day Fred Nessel rode to Milwaukee, ninety-six miles, in a little under seven hours, beating Munger's record of 7 hrs. 5 min.

* * *

The Western Circuit.

After considerable wrangling and changing of dates the western circuit has taken some definite form. The following cities will be in the circuit and will hold race meets: Peoria, Sept. 27; Louisville, Ky., Sept. 29 and 30; Jacksonville, Oct. 3 and 4; Evansville, Ind., Oct. 6 and 7. Chicago will probably follow Evansville with a second meet. All of these cities have arranged fine prize lists, varying from \$2,500 to \$3,500, and should draw the fastest men from all over the country; in fact, a number of the best men are already entered. Louisville will hold her races by electric light; Evansville's prize list will be bicycles and diamonds throughout. Jacksonville and Peoria will each have a list

for those who attend the races. Every member of the club has taken a bunch of tickets to sell, and all the cycle stores will have them on hand also, so that they may be procured before hand and avoid the rush at the gate. The programme will be as follows:

First day—One-mile, novice; half mile, handicap, first heat; half-mile, handicap, second heat; two-mile, team; one-mile, scratch; three-mile, handicap; half-mile, scratch; five-mile, handicap.

Second day—Quarter-mile, scratch; one-mile, three-minute class; two-mile, scratch; half-mile, handicap, final; one-mile, 2:30 class; three-mile, ordinary; one-mile, boys under fifteen; five mile, invitation, handicap.

Intending competitors should not forget the fact that entries must be made before midnight to-morrow, Saturday.

* * *

Races at Saco, Me.

The races under the auspices of the Saco Cycle Club occurred Saturday. The track was in splendid condition, having dried off quickly after the heavy rain. Between 500 and 600 people witnessed the events, which were very exciting. Interest centered in the very much discussed Lawrence-Gargan twenty-mile road race. It was the general opinion before the race that the bad condition of the roads was decidedly in Lawrence's favor. While he is not generally looked upon as fast on a spurt as

THE REFEREE.

Gargan, he has the name of not minding muddy roads in the least. When the two men came upon the track they were greeted with cheers from the crowd, both appearing to have many friends among the gathering. The start was made at 2:24 o'clock exactly, and the two men went away together very fast. It was exactly 3:24 by the timers' watches when Lawrence came up on the track, one hour from the time of leaving, in which time he covered sixteen and a half miles of bad road. Gargan had no excuses to make; he said his legs gave out and he was fairly beaten. The time of the race, including the portion covered on the track, was 1 hr. 10 min. 30 sec. According to the agreement entered into, Lawrence mee's Gargan in Portland for the third and final race, and it goes without saying that this will be a race for blood.

The second event on the card was the mile, novice. This was won easily by Charles Albert, of Boston; Getchell, Portland, second; time, 3:15 1-2. The mile, open, was between E. G. Scully, Portland, and L. C. Gilson, Portland. This was a loaf, and much disgust was expressed by the crowd, but the finish was vey good, Scully passing Gilson about forty feet from the tape, when Gilson, by a wonderful spurt, again took

One-mile, handicap—C. Brittingham, scratch, 1; R. S. Gundelfinger, 2; Clint McDermont, 3; time, 2:55 1-2.

One-mile, boys' handicap—Harry Brittingham, 130 yards, 1; Ad Iph Ferra, Danville, 120 yards, 2; Bert Jones, Danville, 250 yards, 3; time, 2:50.

One-mile, three-minute class—McDermont, 1; Ross McKibben, 2; Karl Palmer, Danville, 3; time 3:05 1-2.

One-mile, open, C Brittingham, 1; R. S. Gundelfinger, 2; H. W. Cadwallader, West Lebanon, 3; time, 3:04.

Five-mile, handicap—C. Brittingham, scratch, 1; R. S. Gundelfinger, 125 yards, 2; A. J. Banta, Ridgefarm, 690 yards, 3; time, 16:26.

Zimmerman and Sanger at Sarnia.

With fine weather, a good track and a big crowd, the meet of the Sarnia (Ont.) B. C. Wednesday was a great success. Zimmerman lowered three Canadian records, and Sanger, the Milwaukee crack, did well. The summaries:

Half-mile dash, handicap—W. C. Sanger, Milwaukee, twenty yards, 1; Zimmerman, scratch, 2; time, 1:07 3-5, and 1:07 4-5 for Zimmerman, who lowered the Canadian record one second.

Two-mile—W. C. Rands, Detroit, 1; T. B. McCarthy, Stratford, 2; time, 5:43.

One-mile, open—Zimmerman, 1; Sanger, 2; time, 2:37.

One-mile, three-minute class—first heat—McCarthy, 1; C. Manville, London, 2; Jeffers, Flint, 3; time, 3:05.

Second heat—William Hurlburt, Detroit, 1; C. Bens, Hamilton, 2; H. A. Cossett, Owosso, 3; time, 2:51 1-5.

Final heat—McCarthy, 1; Hurlburt, 2; time, 2:51 1-2.

two races limited to Louisville or Kentucky riders each day.

* * *

Milwaukee and Return in 20 hrs. 15 sec.

G. Paulsen, of the Columbia Wheelmen, rode the round trip to Milwaukee in 20 hrs. 15 sec. Sunday, Aug. 7. Paulsen is a steady rider and never seems to tire. He started Saturday at midnight, some of his club men accompanying him out of town. He came into the club rooms at 8:15, looking well. This is the first double century made by a Chicago rider in twenty-four hours. Two weeks before Paulsen accompanied L. Tagholm in a ride to Lake Geneva and return in 18 hrs. 45 sec.

* * *

Racing in The South.

The first annual race of the Chattanooga C. C. was held at the driving park on Thursday of last week. Denegre captured the half and two-mile events, with Loyd and Beaufort, respectively, second. Loyd was first in the mile and McKee second. Mosedale defeated Nelson by twenty yards in a half-mile match race, and in the half-mile boys' race McQuade was first and Neeley second. The event of the afternoon was the twenty-five mile race for a prize of a gold medal valued at \$50 and a silver cup

open; two-mile, handicap; one-mile, boys' race; one-mile, handicap; half-mile, open; one-mile, team, open; five-mile, handicap; one-mile, S. B. C. C. members; consolation race.

* * *

Races at Monticello, Ill.

Tuesday was given up to bicycle racing at the fair at Monticello. There was a good attendance, and outside riders grabbed all. Keator, of Chicago, rode a mile on a unicycle in 3:37. The races resulted as follows:

One mile, novice—W. B. Kingman, Peoria, 1; C. A. Sattley, Taylorville, 2; W. A. Powell, Taylorville, 3; time, 3:12.

One mile, open—Bert Myers, Peoria, 1; Clarence Brittingham, Danville, 2; Roy Keator, Chicago, 3; time, 2:46 1-2.

Two-mile, handicap—Bert Myers, scratch, 1; G. M. Booker, Champaign, 2; Clarence Brittingham, 3; time, 5:30.

One mile, Platt County championship Don Platt, 1; William Dighton, 2; Clyde Ryder, 3; time, 3:06.

* * *

The C. C. W. Races.

The second annual race meet of the Cook County Wheelmen, held Saturday at Parkside, was attended by less than 500 people. There was a good field of starters in each event and the contests were close and exciting at times. Cutting and Schmitt, having been suspended, could not ride, but Hart was looked

TOLEDO CADETS
OHIO NATIONAL GUARD

the lead and won by a wheel's length; time, 3:17. The fourth event was the mile, ordinary, and was won by M. F. Libby. The next race, half-mile, novice, was another picnic for Albert, he winning easily and Getchell coming in second; time, 1:33 1-2.

The half-mile, state championship, was between Gilson and Scully, and as there was kicking about the loafing in the mile there was a time limit of 1:25 put on this race. Gilson made pace until coming up the home stretch, when Scully passed him. Gilson made a hard effort to catch him, but his lead was too great to overcome, Scully winning by two wheels' lengths; time, 1:25 1-4, which was allowed, it being so near the limit.

* * *

Danville's "Little" Meet.

The "little" meet of the Danville (Ill.) C. C., held Thursday at the driving park, was well attended and some good sport was witnessed. Brittingham secured four firsts and showed himself to be a good man. The track was not in good shape, but good times were made. The summaries follow:

One-mile, novice—Clint McDermont, Attica, 1; Harry Barnes, Danville, Ill., 2; J. J. Bellon, Danville, 3; time, 3:12 1-2.

Quarter-mile, open—C. Brittingham, Danville, 1; Ross McKibben, Danville, 2; R. S. Gundelfinger, Terre Haute, 3; time, 36 sec

Quarter-mile, flying start—first heat—Sanger, 1; Wells, 2; time, :34 1-5.

Second heat—Sanger 1; Hyslop, 2; time, :52. Sanger thus lost the Canadian record by three-fifths of a second.

Two-mile, county championship—E. Ercrett, 1; time, 6:26 2-5.

Two-mile, handicap—Sanger, 1; Hyslop, 2; Wells, 3; Zimmerman, 4. A special prize of \$125 was offered for lowering the Canadian record and was won by Zimmerman in 2:26, lowering the record by 2 3-5 seconds. In the second mile he did not exert himself. Time of winner, 5:01 1-5. Zimmerman's time from scratch, 5:03 2-5, lowering the Canadian record nearly twenty seconds.

Three-mile, club team race, between Detroit and Hamilton—The Detroit team, Rands, Herrick and Hurlburt, won by 113 points, against Palmer, Skerrett and Griffith, 26 points.

* * *

Louisville's Tournament.

Sept. 29 and 30 Louisville, Ky., will have a tournament that will eclipse anything of the kind ever held in the south. Details have all been planned, and it now remains for the several committees having the affair in charge to carry out their part of the work. At least \$2,000 worth of prizes will be given, which will help to attract the best men. A piano, a lot and several wheels have already been donated. Mr. Quip has promised to put the Auditorium track in perfect condition. Racing by electric light will be a novelty to the fast men, and they will want to try it and do their best. There will be three open, two handicaps and

valued at \$35. The entries were Loyd, Beaufort, McKee and Denegre. They got away well and maintained a hot pace during the entire race. In the twenty-third mile Beaufort was seized with cramps and dropped out, and Denegre followed suit in the last quarter, being hopelessly in the rear. The race then narrowed down to McKee and Loyd, with Loyd leading, but McKee spurted over the tape just a few feet in advance of Loyd, amid great excitement. Time, 1 hr. 30 min.

* * *

Cleveland Offers Good Prizes.

The Cleveland Wheel Club's tournament Aug. 26 and 27 will undoubtedly attract a good many fast men, for a fine list of prizes is shown, including ten pneumatics, a piano, gold and silver medals, fire arms, etc. There are twenty events on the programme for the two days, and many entries have been received already.

* * *

At South Bend, Saturday.

Several of the Chicago men will attend the race meet Saturday of the South Bend C. C., for which some \$1,200 worth of prizes have been secured. The programme has been arranged as follows: One-mile, novice; quarter-mile, open; half-mile, handicap; one-mile,

upon as a sure winner. He did not get a first and Young secured only one. The summaries follow:

One-mile, novice—H. A. Klein, 1; W. M. Shumway, 2; W. Blair, 3; time, 3:05.

Half-mile, handicap—W. A. Thompson, 40 yds., 1; D. C. McLachlan, 30 yds., 2; Walter Scott, 40 yds., 3; time, 1:18 4-5.

Two-mile, handicap—W. F. Peironnet, 40 yds., 1; F. B. Hart, 40 yds., 2; E. Furner, 100 yds., 3; time, 5:45 4-5.

One-mile, 3:10 class—C. G. Sinsabaugh, 1; W. F. Pieronnet, 2; D. C. McLachlan, 3; time, 2:55 2-5.

Quarter-mile—C. G. Sinsabaugh, 1; W. B. Young, 2; P. H. Green, 3; time, :40 1-5.

One-mile, handicap—E. Furner, 60 yds., 1; W. A. Thompson, 50 yds., 2; D. C. McLachlan, 75 yds., 3; time, 2:47 4-5.

One-mile, handicap, ordinary—W. B. Young, scratch, 1; P. H. Green, 50 yds., 2; E. Furner, 40 yds., 3; time, 3:18 4-5.

Five-mile, handicap—W. F. Pieronnet, 60 yds., 1; W. A. Thompson, 175 yds., 2; F. B. Hart, 10 yds., 3; time, 14:58.

Gold medals were given as first prizes and sundries as seconds.

* * *

Postponed Again.

For the fourth time a change of date for the Zig-Zag's Indianapolis tournament is made necessary by reason of a multitude of uncontrollable complications. Money was paid early in May to secure the new mile track at the fair grounds, then incomplete, for the dates of July 4 and 5. Spring rains prevented the completion of the track, and

the date was advanced to the next holiday, Sept. 5 and 6. Then it transpired that the board of agriculture had leased the grounds to the labor organizations after the driving club had closed a contract with the cyclers. A compromise, with division of gate receipts, was refused by the Zig-Zag Club, which postponed the meet until Sept. 9 and 10. Just as advertising matter was about to be printed it transpired that the labor people had decided to celebrate elsewhere on account of internal dissensions. The dates will be decided positively tomorrow, and programmes and entry blanks will be out in a few days. Ten pneumatic safeties, including a Keating racer and a Victor, model B, have been secured as prizes. An \$800 piano will head the list in the mile, open, with diamonds for the quarters. The track has been at the disposal of the club from 4 to 8 p. m. for the past two weeks, and the fast men have been training steadily. The track records made in practice are as follows: Flying quarters, :30 1-4; standing, :33; half, 1:09; mile, 2:30.

Marmon will ride at Carthage, O., tomorrow; at either Cleveland or Chicago the 26th or 27th. Hunter has entered the Parkside tournament at Chicago.

YEO.

* * *

At Buffalo To-morrow.

This week will see the consummation of the united action of Buffalo's wheelmen, for on Saturday will be held the races at the exposition, to continue from the 17th to the 27th. That these races will draw well and an immense crowd will witness them, is an assured fact, as all the fast men are expected to be present. Zimmerman promises to be with us, and all the others have been secured. Everything is being done to secure the comfort and entertainment of all visitors, and the different committees have been diligent in their sections, so that, weather permitting, there will be a most gratified crowd and a full bill of interesting wheeling events. On Wednesday, the 17th, many of our prominent wheelmen will visit our sister city, Batavia, where a race meet will be held under the direction of the wheelmen of that place.

* * *

Harrisburg, Pa., Sept. 5.

The Harrisburg Wheel Club announces its first annual race meet at Island Park Sept. 5, Labor day. The club will use the fine half-mile track, which is in excellent shape. The grand stand seats 3,000 people, and all the accommodations are of the best. On Sunday several runs will be held, and on Monday morning, before the races, a parade will be seen. The following programme has been arranged: One-mile, safety, novice; half-mile, tandem, handicap; half-mile, ordinary, open; quarter-mile, open; two-mile, handicap; one-mile, H. W. C. championship; one-mile, safety, team; half-mile, open; half-mile, boys'; one-mile, handicap; one-mile, three-minute class; fifteen-mile road race—start with one lap on track and finish with four laps.

* * *

Harry Hull Wins Again.

The twelve-mile road race from Madison to Sun Prairie, Wis., on Monday was won by Harry Hull, of Oregon, who was the winner last year. There were eight of the starters who finished inside of last year's time: Harry Hull (time, 44:08), George Oakley, R. R. Stone, G. E. Geron, J. G. Noack, C. B. Chapman, A. M. Anderson, W. B. Park.

* * *

Twenty-four Hour Cranks.

The twenty-four hour cranks—and there are many of them just now—are as active as a lot of bees. Every day one hears of some one who is going for

that record. West is to make another attempt. Woolas, winner of the Pullman race, wants to kill himself; C. K. Smith of the Columbia Wheelmen will have a try inside of a month; Baine is training for a similar purpose at Indiana and two or three Chicago men are thinking about it. It is nearly time such nonsense was discouraged.

* * *

The Manhattan Carnival.

Arrangements are now about completed for the carnival to be held next Friday and Saturday, and an immense crowd is looked for, as 40,000 free tickets have been issued. The track has been rebanked and good times may be looked for. The fast men are all apt to be competitors. The prize list contains fine wheels, a lot in Sherman Park, silver ware, watches, etc. The five-mile eastern championship will be open only to riders from New York, New Jersey, Pennsylvania, Connecticut and Massachusetts.

* * *

Chicago Race Notes.

The Austin Wheelmen have a road race Saturday.

The Aëolus Cycling Club holds a road race next month.

Emil Ulbrecht rode the fastest mile of his life at Elgin, when he did 2:34.

Buffalo, N. Y., and South Bend, Ind., will be objective points for Chicago racing men this Saturday.

This Saturday afternoon the Minnette cycling corps holds a ten-mile road race over the west side course.

Githens, Van Sicken, Ballard, Young and Bliss, of the Chicago C. C., will be at South Bend, Ind., to-morrow.

The Turners give a cycle race at their picnic, Schultz Park, next Sunday. Several of the Plzen club are entered.

There are twenty-three entries for the Englewood club's road race, which will be run to-morrow. Ten prizes will be given.

The Ravenswood Cycling Club has postponed its tournament on Diamond's track from Aug. 20 to some time in September.

The Lake View Cycling Club wants a forfeit from the Kepwood Road Club for that team race, postponed from July 2 to September.

Montgomery Ward & Company's employees hold a ten-mile handicap road race this Saturday afternoon, over the Lake View club course.

Fred Nessel, of the Columbia Wheelmen, expects to try for the 100-mile world's record at Parkside in September. Nessel's time in the Waukesha race would indicate success.

The Englewood Cycling Club's annual road race occurs this Saturday. There are seven prizes. The course is from Morgan Park to the club house, at Seventieth and Yale streets.

At the Parkside track Sunday, Winship ran into Van Sicken and Bliss on the stretch, thinking they were on the other side of the track. He was badly cut up, particularly about the knees.

There are six club road races this Saturday afternoon. The non-riders of the Lake View Cycling Club contest a mile at Thorndale; the Lincoln Cycling Club's annual ten-mile handicap road race will be run from a point on North Halsted street, near Belmont avenue, ending at Grant's monument; Montgomery Ward & Co.'s employees hold their annual ten-mile handicap over the west side course; the Austin cyclists hold a handicap race; the Englewood Club gives its annual road race from Morgan Park to the club house at Seventieth and Yale streets, and on Sunday morning the Calumet

Bicycle Club gives its annual five-mile, handicap, road race over the Lake View course.

The date of the team road race between the Kenwood Road Club and the Lake View Cycling Club has been set for Sept. 21. Eight men will comprise each team. The distance will be five, and not ten miles, as had been decided on. The Lake Views have sixteen men who can ride the distance inside fifteen minutes.

The Illinois club has appointed a race committee, F. Morgan, E. Baumberger and A. D. F. Simmons. At a meeting of the above committee with the road officers and race committee, it was decided to at once send a team to Parkside to train. W. A. Rhodes, A. D. F. Simmons and Charlie Knisely will be in the team.

For Saturday a race has been arranged to be run by the members of the Lake View Cycling Club who do not own wheels and who have not ridden in a race this season. Any one caught training will be disqualified. The race will be one mile, to take place at the north end of the Lake View club's regular course.

Some time ago a team race was held on Washington boulevard. It was a ten mile handicap, with Buchanan, Fred Nessel, Ulbrecht and Freddie Wage on scratch, and C. H. Stephens, March and Trevis with four minutes' handicap. Buchanan won in 31 min., Nessel, Ulbrecht and Wage finishing two, three and four.

The Lake View C. C.'s five-mile road race for the McConnell medal, took place Saturday over the club's regular course. Stillwell, who won it the two previous years, was again the winner, doing the distance in 14:15. Woolas was second, a length behind, with Callan a length behind him. C. A. Fox, W. Goodenough, O. Bruhlman, F. L. Roach, C. Helle, and Rix finished in the order named. Steele and Helmich did not start, that Stillwell might win.

* * *

Race Notes.

Races are being held at Alma, Mich., to-day, and will continue to-morrow.

John M. Chase, of Janesville, Wis., covered the distance between that point and Beloit in fifty-three minutes, record.

It is said Windle has made a mile in 2:08 and Tyler 2:09 15; also that two novices at Springfield made the half in 1:05 and 1:06.

The Crescent Cycle Club will hold its annual field day at the half-mile track of Colonel E. Bloss Parsons in Brighton, N. Y., Tuesday p. m., Aug. 30.

The Southern Athletic Club Scorchers is the name of a New Orleans club which will hold a handicap road race shortly. The club was recently organized.

The twenty-five mile handicap road race of the Boston Athletic Club will be held on Sunday, Oct. 1, and entries close with A. D. Peck, 22 Columbus avenue, Sept. 24.

The York (Penn.) Cycle Club announces the following programme for its race meet on Saturday: Fifteen-mile road race, championship of York, Lancaster, Dauphin and Berks Counties; one-mile, novice, open; half-mile, novice; one mile, handicap; one-mile, safety; one-mile, ordinary; two-mile, handicap; quarter-mile; two-mile, lap; one-mile, three minute class; one-mile, 2:40 class; half-mile, scratch; one-mile, 2:25 class. This meet, following as it does between the two big meets at Philadelphia on Sept. 17 and 24, should attract a good proportion of the crack riders. Taylor,

Hoyland Smith, Berlo, Banker and Campbell have already promised to attend. The track is a half-mile and seventy feet wide.

The wheelmen of Grand Forks, N. D., are arranging for a two days' meet some time in September. There are some 150 wheelmen in the place and great interest is being taken in the coming event.

The Y. M. C. A. Bicycle Club, of Peoria, is making preparations for a ten-mile handicap road race, to be run on Thursday, Sept. 1, at 5 o'clock p. m. This race is open to all Peoria wheelmen.

The match race between Berry and Carl Abbott at Canton resulted in defeat for Berry by 100 yards. Berry's friends lost heavily on the event, and Berry now retires from the track permanently.

Austin Webb, C. W. Rogers, Fred Olsen, George Hobbs and L. D. Beamer competed in a twenty-five mile race at Aurora last Friday. The ten miles were covered in 31:15, and Webb won easily in 1:21:41, with Olsen second.

The Saginaw (Mich.) Cycle Club is arranging a programme for Labor day. There will be a one-mile, open; one-mile, novice; quarter-mile, open; five-mile, handicap, and half-mile, open. The prizes will aggregate in value over \$500. It is hoped to bring Reichle and Rands together.

The first relay run in California was that of a week ago, between Los Angeles and San Diego, a distance of 216 miles. The time was 20 h. 26 min., which will be admitted to be very good by everyone acquainted with the awful character of the roads in that section. It was conducted under the auspices of the Los Angeles Herald and San Diego Union.

The race meet to be held at Fort Scott, Kas., Oct. 6, has been sanctioned by the racing board. Following is a list of the races: Half-mile, novice; half-mile, open; one mile, open; quarter-mile, boys under sixteen years; half-mile, handicap, open; one-mile, club championship, S. C. W.; one-mile, handicap, open; quarter-mile, open. For prize list, entry blanks, etc., address Henry E. Harris, secretary, Fort Scott, Kas.

The Manhattan Athletic Club is sparing no expense to make at Manhattan Field, Aug. 27, the greatest meet of the year. Forty thousand invitations have been issued, and prizes consisting of lots, bicycles, gold watches, etc., are being offered to attract the best men. The four-lap track is being prepared for this event, and the Manhattan people hope to have it in tiptop shape. With a few improvements they will have one of the fastest four-lap tracks in the country.

F. B. Vogel, secretary of the Oakland Land Company, and one of the largest real estate operators in Philadelphia, has presented two lots, one at Oakland and one at Brighton, valued at \$300 each, to the Park Avenue Wheelmen, as prizes for their tournament. In making the present he writes: "The wheel is doing great work in bringing about better roads and in making all its votaries stronger men mentally and physically. My best wishes to you and all wheelmen."

The Old Men's Century.

Last winter "Papa" Ellis, "Pop" Brewster, "Bob" Garden and hustling Fay Tuttle scheduled a century run, with a champagne supper as the forfeit for non fulfillment of contract, for June 5 or the first good day when the roads were fair after that date. The Elgin-Aurora course was named. "Pa" Ellis claims several "cham" suppers, as he came to town and the others backed out, especially Garden and Brewster. The century may yet be ridden, when all loyal centurions will turn out to see fair play and share in the "fizz."

SOME of our friends have suggested that our Pneumatic Tires ought to have a brand to distinguish them from others. We have long desired a coat of arms, or something which would prove to the world that we were bigger than most anybody else. After some considerable night thought we have evolved the accompanying design and offer it for approval.

We also add to list of work and records made on Morgan & Wright Pneumatic Tires.

A Fair Field, No Favor,

And May the Best Man Win!

The work performed on the MORGAN & WRIGHT Pneumatic Tire proves that it has adequate durability and speed. We add this week the record made in Milwaukee-Waukesha race, and others, and shall be glad to add to the list when our friends see fit to favor us.

We beg leave to offer the following records. The list is incomplete and may contain some errors. We shall be happy to correct and add to the list, if our friends will kindly send us the proper data:

CHICAGO.

GLADSTONE ON CYCLING.

The "Grand Old Man" Thinks It a Manly and Healthful Sport.

The new number of *Answers* contains the report of an interview that a representative of that periodical had with Mr. Gladstone recently at Dalmeny. Referring to cycling, says the Aberdeen (Scotland) *Daily Press*, Mr. Gladstone said he had noticed with real and unfeigned pleasure the rapid growth of cycling in this country, for, not only did it afford to many to whom it would be otherwise unobtainable a healthy and pleasurable form of exercise, but it also enabled them to derive all those advantages of travel which, previous to the advent of cycling, were out of their reach. It provided them with the opportunity—he was speaking of those in business during the week—of leaving behind them the towns and thickly populated localities in which they carried on their work, and rapidly passing into the fresh, clear air of the country, with all its verdure, all its brightness, all its enjoyability. And it was far more profitable than the luxurious railway journey from the city to some definite point along some unalterable route, over which the traveler was whirled with no time for observation and no opportunity of examining the district through which he is carried. In cycling he had abundant opportunity for studying all things of interest in the country which he traversed—its natural features, its characteristics, its curiosities. At each halting place, when he arrived, he could find time to enter into conversation with those around him. Each expedition thus became an instructive and elevating voyage of discovery, revealing to the cyclist, and making him intimate with the nature, the claims, the wonders and the peculiarities of the country in which he lived, pleasures which in an equal extent are denied to all other tourists. Of the bodily good derived from so manly and healthy a form of exercise; of the blessing it bestowed, helping to maintain a sound mind in a sound body by the relaxation from desk or counter; of the recreation in the open air; of the energy it calls into play, he need hardly speak. He could only emphasize the fact that he considered that physically, morally and socially the benefits cycling conferred on the men of the present day were almost unbounded, and this belief he endeavored to act up to by heartily welcoming and assisting, as far as in him lay, the many cyclists who came to visit Hawarden and see the grounds. One of the features of his reception in Edinburgh which gave him much pleasure, was the escort of some thirty cyclists who kept pace with the carriage up to the very lodge gates, forming a voluntary body-guard. To the onlookers, two of the most attractive parts about cycling are the keenness of its devotee and the kind of freemasonry which existed amongst them.

The Peoria-Chicago Tour.

Everyone knows what enjoyment can be gotten out of a run in good company over good roads, but only those who have participated in a week's tour can realize how much more enjoyable such a trip is. The trip from Peoria to Chicago, now being arranged by A. L. Atkins, of the Peoria club, a veteran rider of considerable touring experience, will be no exception to the rule. The route lies through the most picturesque portion of Illinois, where the roads are reported to be in elegant condition, and the towns passed through contain some of the most hospitable and enthusiastic clubs in the state, who will meet the tourists outside their respective towns, bring them in in becoming style, so that they are made happy until their departure and escorted

part of the way to the next town, while at Chicago the sand-papery boulevards and all famous roads will be most tested. The tourists will comprise men from the principal cycle centres of central Illinois thorough good fellows in every way, and the Peoria contingent, with its usual push, will see that every thing goes with a vim, and that a good time is enjoyed by all. The party rendezvous at Peoria on Sunday. The club house will be thrown open to receive them, and the club will tender them a "dead easy" run to Prospect Heights in the afternoon. Monday the tourists dine at Elmwood and spend the night at Galesburg, where Sewall Dunn and his club mates will see they are happy. The next noon McClintock, of Galva, backed by all the cycling push of that city, will meet the riders, and, after a jolly dinner at Galva, will accompany the party to Ottawa and beyond. That afternoon Captain L. L. Wickersham and his riders will escort the tourists into Princeton for the night's stop, and will see them well on the way to La Salle, and a night at Ottawa completes the third day's journey. Marsailles and Morris wheelmen will escort the riders the next day to dine at Morris, and night will find the party under the care of Joliet and her cyclists. An early start the next morning will bring the trip into Chicago comfortably, where the Clifton House, two blocks from the boulevard, will be the headquarters. From here runs to the Parkside races, the parks, Pullman, Grant monument, World's Fair, etc., will be kept up constantly until Monday morning. The pace will be a steady, comfortable one, stops will be made at each town or village, and no scorching will be allowed.

Bicycle Tracks for Chicago.

From all that has transpired within the past week, Chicago will have no trouble about securing a fast track for use next year during the world's fair time and the international meet. There is considerable rivalry between the projectors of the Chatham Fields scheme and the World's Athletic Association. At a meeting held Monday evening at which Chief Consul Gerould of the Illinois division, W. C. Thorne of the racing board, C. E. Randall, president of the Associated Cycling Clubs, N. H. Van Sicklen, Thomas Sheridan, first vice-president of the league, William Herrick of the Century club and others were present, Mr. Short, president of the company, openly declared that his company would give \$10,000 in cash for the purchase of prizes, put up \$10,000 more as a guarantee of good faith that the wheelmen should have the fastest and best track in the world, and bond himself in \$50,000 to fulfil the promise. A committee was appointed to investigate the commercial standing of the company and report.

The Chatham Field people are also endeavoring to have their propositions accepted, and much interest is centered in the outcome of the affair.

White Got Judgment.

Burton F. White, secretary-treasurer of the Illinois division, secured judgment for \$200 this week against A. G. Garfield for salary and traveling expenses while on the road. While on a trip through the east in July, it was alleged, White was unable to obtain money from the Derby Cycle Company manager, A. G. Garfield, and immediately upon his return to the city commenced suit against the company, which he won in thirty minutes. It is stated that jealousy is at the bottom of the trouble. Mr. Garfield accuses him of endeavoring to obtain his position as manager of the Derby company.

FRENCH AND AMERICAN ROADS.

There is a Vast Difference Between Them Improvements.

In France, where they have the best roads of any country in the world, the highways are divided into several classes, but all of them are supervised by the national government, which maintains a bureau of roads and bridges and supports a school for the education of the engineers and inspectors who are employed in the bureau.

This method of building and maintaining roads in France was started by the first Napoleon, who appears to have been the earliest European statesman who clearly saw the great economic advantage of proper highways, and who at the same time had the power to carry out what he wished. The effect of these good roads in France has been wonderful. They have brought all the various parts of the country nearer together, they have made country life less lonely and they have reduced the cost of transportation of country produce to a minimum. France is the only country in Europe where the agricultural classes are not dissatisfied, and where they do not feel that they have a harder time than those who labor in other fields.

In America a sentiment was once worked up as to the necessity of good common roads. This was diverted by the birth of the railroad, which has now been developed to a greater extent than elsewhere in the world. But the necessity for good common roads is not a whit less because we have plenty of railroads, and the movement for the betterment of the ordinary country highways is now very much alive in all parts of the country. It was started by the League of American Wheelmen, the bicycle riders, and this association has been very active in its efforts to secure legislation in favor of good road-building. The country people have sometimes misunderstood the efforts of the wheelmen, and have pretended to think that the only persons who would be benefited would be the bicycle riders, whose sport does not seem to the rural mind to cut much of a figure in the economy of the countryside.

Such a contention as this is as wise as it would be to maintain that cellar doors were made for children to slide down and that gates were hung for little girls and boys to swing upon. These sportsmen were selfish, of course, in starting this movement, but if it be kept up until there be something done to make our roads worthy of our country, they will have accomplished so beneficial a work that we will be able to thank them right heartily without looking at all into the motives which first inspired them. The common roads of a country are at once the means and measure of its civilization, and no American has any right to feel proud when he thinks of the muddy and dusty ways which serve as our interior methods of communication.—*John Gilmer Speaks in Christian Union.*

The Century Road Club's Annual.

Sunday, Sept. 4, has been set for the great second annual century run of the Century Road Club of America, held each year over the famous Elgin-Aurora course, over which more century bars have been won than over any similar course in America. The starters on last year's race numbered 371, and 330 finished. This year the chief centurians counts on 806 starters and a large percentage of finishers. The course was never better, the pace will be moderate and suited to any rider, the arrangements will be very complete, and everything possible will be done to make this the greatest century ever held. The start is from the corner of Washington boulevard and Halstead

street, where, in Tom Hunt's place on the corner, the club register will be placed. Every starter must register here, giving the time of starting, club and make of machine ridden, and time of finish. Chief Marshal Herrick will be found there, and all club captains, after gathering their men in line along the right curb, facing south, will report to the marshal, that they may be placed in line according to numerical strength. The ladies will be formed in one division and unattached riders in another. Each club captain will act as an aid to the marshal, preventing all breaking of ranks and quelling all scorching. This is necessary for the success of the event. It should be very rider's aim to reach the starting point at least an hour before the starting time, to save confusion. Visiting and many local wheelmen will stop for the night at the Gault house, on West Madison street, where all will be called in time to secure breakfast before starting. The first stop will be at Elgin for breakfast, from 8 to 9. Aurora is scheduled for from 11 to 1, and the finish 6 to 7. Dinner will be obtained at Aurora. The arrangements will be very complete. This is an excellent opportunity for out-of-town wheelmen to see the famous course, with no "leg pulling." Such should send their names at once to William Herrick, 293 Wabash avenue, that he may know how to prepare. Club captains report probable attendance at least a week previous.

Notes.

This week Thursday the case of Sam T. White came up before Justice Glennon Colbeck. The road-hog in the question, who so brutally ran over White, has forfeited bonds twice and now languishes in durance vile. The L. A. W. is doing excellent work in pushing the matter to the bitter end.

The Colorado Wheelmen have organized in Denver, Colo., with seventeen charter members. Their colors are gold and silver, and costumes, the English bloomer suit. E. C. Bode, a Chicago man, was accepted as a non-resident member.

Chicago Trade Affairs.

A. P. Castle of the Louisville Bicycle Company was in the city last week, on business.

S. T. White leaves for the south this week in the interest of the C. F. Stokes Manufacturing Company.

The Quadrant Company still reports great sales. It was caught last week with but three Scorchers in stock and no high gears.

The Stover Bicycle Manufacturing Company will pattern its Phoenix after the Humber next year and make only the Phoenix.

Robert C. Lennie, for the last six months on the road for Thomas Kane & Company, will remain in the city until next season.

Charlie Cutting used a March twenty-six pound racer, with Morgan & Wright tires, in his ride for record over the Elgin-Aurora course.

W. M. Perriitt, representing the Bretz & Curtis Manufacturing Company, Philadelphia, was along cycle row this week with samples of saddles.

W. A. Fletcher has given up his line of wheels and now handles nothing but sundries in the cycle line. His storage business increases daily.

The Humber-Rover agency has been placed by Tom Roe with Clabrough, Golcher & Company of San Francisco. Tom is now in Los Angeles.

The John Wilkinson Company has been forced into the cycle business through having to replevin twelve wheels. These are all it will handle, though.

The March-Davis Cycle Company took orders last week for over forty March safeties. Twenty-five of these go to Denver, where the Marsh is all the rage.

Harry Cassady, of Thorsen & Cassady, returns from his present business trip about Sept. 1. This hustling drummer of the cycling trade is now in Minneapolis.

The T. D. Ganse Cycle Company has a large shipment of Marriott & Cooper geared ordinaries on the road. The dealers generally are on pins and needles as to the probable popularity of the g. o. another year.

C. H. Plumb, manager of T. D. Ganse's retail store, had a bad fall while teaching a lady to ride about ten days ago, and has been laid up since. He is out now, however, and able to walk with the assistance of a cane.

The Kenwood Manufacturing Company has sold a large number of Credenda Victors at thirty-nine cents a day, \$12 down, \$10 a month. This is a part of the sale now being carried on by A. G. Spalding & Brothers.

After a year's use of a stolen wheel the thief was arrested last week at the instigation of Radell, from whom he rented a Salvator last year, on August 16. The wheel had been pawned. The lad's name is Charles Carroll and his folks are well-to-do.

The Humber-Rover Cycle Company received this week several frames containing fac similes of medals won by Humber wheels in the N. C. U. championship. That the Humber is popular and fast is proven by this excellent record: In 1886 Humber won three out of seven championships; 1887, five out of

seven; 1888, six out of seven; 1889, eight out of ten; 1890 it won all, and in 1891, nine out of eleven. This is a great record for a great wheel.

Warman & Hazlewood are agents for a new saddle, manufactured by Foley & Webb. It is very comfortable and perfectly adjustable. They have a Coventry Cross racer which has been in eleven races and won ten, and won second in the other; quite a creditable record.

A. H. Radell, the cycle dealer at 494 East North avenue, has been very successful as a detector of cycle thieves. Six wheels have been recovered and the thieves, in most instances, successfully prosecuted. He is still on the track and promises sensational arrests in the near future.

The Halladay-Temple Scorchers are making a name, and a good name at that. It is an actual fact that the Marion Cycle Company has never had a frame break down. Temple recently secured an order from a prominent eastern house. The Marion Cycle Company promises something very fine in the safety line for

We produce above the well known outlines of the Scorchers safety, manufactured by the Quinton Cycle Company, and imported solely by the Bretz & Curtis Manufacturing Company, of Philadelphia. This is the 1892 model, which has met with such an immense trade this season. The machine is fitted with the Thomas pneumatic or Macintosh cushion tire, and is guaranteed to be strictly high grade throughout. The lines are graceful and the finish excellent. The rims are Warwick's best hollow, made especially for the tire used. All machines are fitted with the Solid Comfort saddle. The price is, \$150 for pneumatics, and \$135 for cushions. The Scorchers will be entirely remodelled for 1893, and a machine much on the Humber lines will be produced.

next season. Temple and Lew Halladay are designing the lines and construction.

Peoria Trade.

PEORIA, Ill., Aug. 16.—Samuel Snell, representing Samuel Snell & Company, of Birmingham, Eng., was in Peoria last week. It is probable Kingman & Company of this city will take hold of this firm's goods and go into the sundry business on a large scale. It is reported that they placed a large order with Mr. Snell for lamps for next season's trade. Mr. Snell went to St. Louis, from which point he goes east via Cleveland and Buffalo. He expects to wind up his business in the east and sail for home on the 25th of this month.

A representative of H. A. Lozier & Company, of Cleveland, Ohio, was in Peoria a couple of days last week. He had a sample of the Cleveland, which is indeed a very nice, easy-riding bicycle. This wheel has never been handled very extensively in Peoria, but one of Peoria's most reliable houses in the bicycle business intends to take hold of them and push them.

The effect of cutting prices on bicycles is now being keenly felt in Peoria. Of

course it is a hard matter to say who has been doing the cutting, but it is certainly a fact that some one has been selling below list. There will only be so many bicycles sold in this city, and it will be as easy to sell them at list price as at a cut price. There is no doubt that some kind of an agreement will be arrived at before next season's trade opens whereby all wheels will have to be sold at list price.

LAUREL.

Correcting an Evil.

One of the railroads running out of Peoria has notified its patrons that it will not receive any goods that are to be shipped to a factory or wholesale house without a written order from the parties to whom the goods are consigned that they will be received. This is a sensible move on the part of the railway company. Should all the railroads adopt this plan it would break up the practice of a large number of bicycle houses shipping back wheels without first notifying or getting permission from the parties they purchased them from to return them. A movement is now on foot among the bicycle jobbers and manufacturers to form some kind of an arrangement whereby no bicycles returned will be accepted unless the parties have been authorized to ship them back. Some of the largest jobbers and manufacturers

this petition are James A. Miller & Brother, Rouse, Hazard & Company, Gormully & Jeffery Manufacturing Company, *Wheelman's Gazette*, J. B. Stennett, Henry Corstens and Samuel and Charles Harris.

Imlah's Unicycle.

James Imlah, of Barre, Vt., has just been granted a patent on his unicycle, which, the inventor would naturally claim, will revolutionize cycle construction and riding. Figure 1 is a side elevation of the scheme, while figure 5 is a modified form of the wheel.

The unicycle is provided with an inner wheel (A) formed with a suitable framework (B) and a double rim (C C') connected with the forked ends (B 1) of the framework (B). The two rim parts (C and C') engage ball bearings (D and D') respectively, formed in an inner annular flange (E) connected by spokes (F) with the tire (G) of

the exterior wheel (H). By this arrangement the outer wheel (H) can travel with its tire (G) on the ground, while the inner wheel (A) rolls off on the annular flange (E) so that the rider seated on the seat (B 2) in the framework B holds the latter in a normal position, so that the inner wheel does not rotate.

In order to impart motion to the exterior wheel by the exertions of the rider seated on the seat (B 2) the following device is provided: Between the two annular ball bearings (D and D') is arranged in the rim (E) an internal gear (I) in mesh with a gear wheel (J), secured on a shaft (J 1), extending transversely and mounted to turn in suitable bearings in the framework (B). On this shaft (J 1) is secured a sprocket wheel (K) over which passes a sprocket chain (L) also passing over a sprocket wheel (N), secured on a shaft (O) extending transversely and mounted to turn in suitable bearings directly below the seat (B 2) of the rider. On the ends of the shaft (O) are secured the usual treadles (P), extending in opposite directions and engaged by the feet of the rider, s

that by the exertion of the latter a rotary motion is imparted to the shaft (O). The movement of the latter is transmitted by the sprocket wheel N, chain L and sprocket wheel K to the shaft (J 1) carrying the large gear wheel (J), and as the latter is rotated and meshes in the gear (I) a rotary motion is given to the exterior wheel (H).

Again Doing Business.

The Phoenix Cycle Company arises from the wreck of the Sweeting Cycle Company, and will continue business at the stand of the latter, 815 Arch street. R. H. Smith of the Indiana Bicycle Company is chairman of the new company, and W. T. Willcox of the Stover Company is secretary. T. Henry Sweeting will act as manager. The store is open and business being transacted as usual this week.

The Coventry Machinists' Company.

It was just a year and a half ago that the Coventry Machinists' Company, of Coventry, Eng., opened a branch in Chicago, yet in that time the genial

The Moffat Affair.

On Tuesday an intervening petition

was filed with Judge Hutchinson in the suit of Howard A. Smith against the Moffat Cycle Company, in which charges are made against Mark W. Hill, late treasurer of the concern. It is claimed that Hill, as one of the directors of the company, confessed judgment in favor of his wife, Caroline D. Hill, for \$8,992, and upon a scale of the assets under the execution Hill purchased the property. Claim is made that the judgment is without consideration and that the sale is void as against the creditors. If the petition is correct the company has accounts and bills receivable worth some \$19,000. The judgment creditors filing

A Few Good Agents Wanted.

manager, A. J. Marrett, and the Swift cycles, than which no better wheel is made to day, both became well known and immensely popular. The first store was at Nos. 11 and 13 Madison street, but seeing that trade was drifting south-

A. J. MARRETT.

ward, and the fact that rent was less on Wabash avenue, Mr. Marrett decided to move, which he did last spring. He now has a large store well fitted up for show room, office, storage and repair shop, and here hundreds of Swifts are crated and shipped away. The Swift is

ROBT. W. SLUSSER.

a popular wheel, and many have been sold in Chicago this season, the Holbein being the leader. Mr. Marrett is ably assisted by L. W. Conkling, until recently president of the Washington Cycling Club and one of Chicago's oldest wheelmen, and R. W. Slusser, formerly of

L. W. CONKLING.

New Orleans. Mr. Marrett is a member of the Lincoln C. C., Century Road Club and Lincoln Cycling Camera Club, and is great on photography. No man in the trade is better liked than Mr. Marrett.

Mr. Conkling is next to Mr. Marrett in

the affairs of the house. "Conk," as he is generally known, is old in the service, having been with Spalding and Sweeting. He is unfortunate enough to know how to compile road books, and is generally sought for such work, while as starter of the great Pullman road race—well, he is the only man who has ever had the honor.

Slusser manages the books and cash of the concern. He hails from New Orleans, where he was prominent in the Louisiana C. C.'s affairs.

A New Driving Gear.

The inventor of this, John Magennis of Liverpool, claims that a wheel can be driven at greater speed without increase of power over an ordinary safety; or,

that it can be driven at the same speed with much less power. The inventor says, in his specifications:

According to my invention I make the wheel to

I do away with such cranks altogether, and I attach the pedals approximately close to the rim of the wheel, which is to be revolved by the rider's feet. By this means a more steady and direct force is attained and a correspondingly greater amount of pressure can be exerted on the wheel in question. Where the wheel is of large size, the pedals may be inserted directly on the face of the wheel close to the rim; but to do this in the case of

FIG. 2.

such a sized wheel as A would tire out the rider, owing to the small amount of throw. I therefore in those cases where the wheel is not of specially large size, attach the pedals (C C) to the rim of the wheel by means of the arms (D D), and so still preserve the steady and direct force while providing a convenient throw for the rider's feet. As by my invention the cranks on the axle are done away, the pedals being applied approximately close to the rim of the wheel to be revolved, it becomes necessary to so arrange the driving-gear in its bearings or support that clearance will be left so that the pedals and the rider's feet can travel freely through the circular path without encountering any obstacle. It will be seen that I provide for this by arranging so that the bearing or support comes in between the two pedals. By providing two wheels (A and E), of which one (A) is the sprocket-wheel fixed on a common axle (F), this axle can be journaled into the bearing or support (G) in the framework (H) of the velocipede. Of course, if desired, both the wheels (A E) may be sprocket-wheels, so that one may be used

which the power of the rider is directly transmitted—that is, the forward sprocket-wheel (A)—of much larger diameter than is usually the case. For instance, I make it from one and a half times its ordinary size to three times its ordinary size as large again, these sizes being regulated by the speed it is desired the velocipede shall attain, as by this construction the multiply-

when the sprockets of the other become worn out, or instead of having, as shown on the drawings, only one link chain (I), causing the small sprocket-wheel (B) to revolve, two small sprocket-wheels might, if desired, be made use of, so that when both wheels (A and E) are sprocket-wheels, two link chains could be used for driving the two small sprocket-wheels

New English Inventions.

These abstracts are prepared immediately after the patents are applied for, by G. Douglas Leechman, consulting engineer, Coventry, England:

[All persons interested in opposing the grant of a patent of any one of the undermentioned applications may at any time within two months from July 6 give notice in the prescribed form of such opposition.]

ing power of the gearing is greatly increased. In the example shown on the drawings the forward sprocket-wheel (A) is two and a half times as large as the small sprocket-wheel (B) which is a considerable increase in the proportions when compared with the present gears; but the wheel (A) could be of considerably larger size where higher rates of speed are wanted.

Instead of keying or mounting in a fixed manner upon the axle the pedal-cranks, as heretofore,

same." Date claimed under international convention, Sept. 11, 1891.—This invention is an application of the principle which consists in forming the tube which resists the pressure, of an open circular band fastened to the two sides of the rim. In the tube thus formed an air chamber provided with a valve is placed. The two sides of the rim are of a gutter-like section. The outer tire is made with an enlargement at each side. These enlargements are of the same width as the gutter. The tire is put on the rim, placing the enlargements at the bottom of the gutters, and above these enlargements a circular metal band is put. This band fits exactly between the outer side of the gutter and the rubber tire; the two ends of the band just meet each other and are fastened by screws or by other means. When the air chamber which has naturally been placed inside the tube thus formed is blown out, the enlargements of the tire abut or press against the metal bands, and the tire is maintained perfectly in position. This first claim is for "the combination of a rim having a trough or gutter round it at each side, an inner tube containing air or gas under pressure, an outer tire consisting of a strip having enlargements at each side fitting into the troughs or gutters, and bands, each fitting into one of the troughs or gutters, with one side against the outer side of the trough, the opposite side against the other tire and the bottom against the enlargement, substantially as described."

No. 15,859. R. Illingworth and J. Bush's "improvements in variable speed mechanism for driving cycles." Sept. 18, 1891.—In carrying this invention into effect, the chain wheel (D) is so mounted as to revolve on the loose sleeve (E) on the crank spindle (B) and upon this crank spindle (B) side by side with the chain wheel the bevel wheel (A) is fixed, having the teeth (a) around the circumference of that face of it next

to the chain wheel; within the chain wheel one, two or more spindles are fixed, and upon each of these spindles the two bevel pinions (f 1 and f 2) are mounted to revolve together the one (f 1) engaging with the teeth on the face of the tooth wheel (A) the other (f 2) engaging with the teeth on the inner face of the tooth wheel (E) which is of smaller diameter and which is mounted on the opposite side of the chain wheel and so as to allow the shaft to revolve independently of it when it may be locked stationary. The speed reducing action of the arrangement is then as follows: The large bevel wheel (A) receives its movement from the crank spindle (B) to which it is fixed, and communicates the movement to the pinions, which are mounted to revolve within the chain driving wheel (D). The pinions are thus revolved, and engaging as they do with the smaller and stationary tooth wheel (E) are caused to rotate, thus carrying the chain wheel on which they are mounted with a speed which is reduced from that of the large tooth wheel in proportion to the difference in the size of the two outer bevel or toothed wheels (A and E), and as the relative proportion of the two outer wheels is varied, so is the proportion of the reduction or increase of speed effected.

No. 10,764. J. F. Palmer's "Improvements in or relating to pneumatic wheel tires." June 7, 1892.—The rubber is first moulded over a suitable mandrel wrapped (entirely or partially) with canvas or some analogous material suitable for a "back," and which is preferably inelastic and unyielding, like canvas. Thus a rubber hose is produced, which is, subsequently, properly vulcanized, thereby fastening the canvas, or the like, as an internal lining, which may extend entirely or only part way round the bore, depending on desire. The hose is then turned inside out by drawing it lengthwise through itself, as it were, whereby the

An Honest Wheel, the Best that Brains Can Devise or Money Can Buy.

THE "BUFFALO"

Light Weight - - - Full Roadster.

THE PROOF OF THE PUDDING IS THE DIGESTING THEREOF.

BUFFALO CYCLE WORKS,
Buffalo, N. Y.

Jamestown, N. Y., April 20, 1892.

GENTLEMEN!—It affords me great pleasure at all times to speak of the Buffalo Light Roadster, that you built for me last year. I have been riding ten years now and have owned and ridden a number of different kinds and styles of bicycles. I have tried about all the different wheels on the market, and ought to know what the best wheel should be like. I know which wheel suits me best. I can conscientiously say that your wheel, or rather my wheel, is the strongest for the weight (37 lbs) of any wheel I have known. It is finely built on the most practical lines, and aside from being a specially handsome bicycle it is complete, durable, and simplicity itself. I want no better safety. I used to think in common with hundreds of others that the "grand old ordinary" was about as near the ideal as we could ever get, but the times demanded a low-down wheel that was safer than the "sky-sweeper" and yet as durable. Of all the hundreds of "rovers," whether chain or gear, ratchet or crank, long or short centres, long or short wheel base, two sizes of wheels and the hundred and one little details that make up the individualities of modern bicycles, I think you have embodied the essentials in the *Buffalo Light Roadster* in such a manner that it cannot be beaten. To me it is the sine quo non.

(Well known to readers of the cycling press by his non de plume, "SETAGEC.")

Fraternally yours, CHAS. E. GATES.

DUST PROOF.

Ask your dealer for them.

REED & CURTIS MACHINE SCREW CO., Worcester, Mass.

We wish to call the attention of bicycle riders and dealers to the fact that we can furnish them with a rat trap plate that can be put into the same pedals as the rubbers are used in. eow

lining is transposed to the exterior of the rubber. The rubber portion of the hose is thus obviously compressed to a degree of density which enhances its imperviousness, and also causes any puncture or break in the hose to be immediately closed.

No. 19,600. R. Illingworth and J. Bush's "improvements in speed-reducing mechanism for driving cycles." Nov. 12, 1891.—In carrying this invention into effect the plate wheel (A) is secured to the crank driving spindle (B) at one side of the chain wheel (D) and around the circumference of the plate wheel (A) the internal teeth (a 1) are provided. Upon the other side of the chain wheel the side plate (E) is mounted upon and independently of the crank spindle in such a manner as to allow of being locked or fixed to any convenient part of the crank spindle support and provided with the projecting journal (e 1) and upon this journal the chain wheel is mounted so as to revolve independently of it. Upon the chain wheel the studs (d 1 and d 2) are fixed, and upon these studs the cog wheels (F and F 1) are

mounted so as to gear both with the internal teeth (a 1) of the plate wheel (A) and with the toothed wheel (e 2) which is fixed to the bush (e 1) so as to form a part of the side plate (E). It will thus be seen that as the crank spindle revolves it carries around with it the toothed wheel (a 1), which in turn revolves the toothed wheels (F and F 1), which, engaging as they do with the fixed toothed wheel (e 2) are caused to rotate as they revolve carrying with them the chain wheel at a speed reduced in proportion to the difference in the sizes and number of teeth in the relative toothed wheels (a 1 and e 2). In the normal condition when the highest speed is required, the side plate (E) is unlocked from the fixed part of the cycle and is locked to the chain wheel (D) so that the whole of the mechanism revolves together, this being effected by reason of the inability of the pinions (F and F 1) to revolve when the side plate (E) is locked to the chain wheel (D) and thus the toothed plate wheel (A) carries with it the pinions, and with them the whole of the mechanism. The amount of the reduction of the speed is determined by the relative number of teeth in the two wheels (a 1 and e 2), and any alteration of the amount of speed reduced is effected by a variation in their relative sizes.

No. 10,766. J. F. Palmer's "Improvements in or relating to pneumatic tire tires." June 7, 1892.—This invention consists in forming a pneumatic tire of flexible material with a radial inner portion thickened and given throughout a concavo-convex, or wholly or partially collapsed form, applying to the thickened concave inner surface a strip or ring of substantially non-extensible fabric, such as canvas, said canvas ring having the diameter of the intended outside diameter of the tire, thereupon by a twisting operation turning the ring throughout its circumference to an inverted position, whereby the canvas strip is put outside and the soft rubber or other tube within the canvas, that is to say, between it and the center of the wheel. In this manner the canvas not being materially extended, it presents on reversal the same diameter as before, while the thickened rubber portion being held thereto and prevented from expanding, is compressed by reason of being changed from a concave to a convex curvature.

Recent Patents Granted.

The following is a list of recent bicycle patents reported especially for the REFEREE by W. E. Auginbaugh, patent attorney, Washington, D. C.:

480,349, pneumatic tire; Finlay Sinclair, Coventry, England, assignor to the Pneumatic Tire and Booth's Cycle Agency, Limited, Dublin, Ireland; filed Feb. 15, 1892; serial No. 421,491.

480,400, valve for pneumatic tires; Edward R. De Wolfe, New York, N. Y.; filed April 18, 1892; serial No. 429,523.

480,441, bicycle support; William Sier and Charles H. Dunn, Seneca, Pa.; filed March 17, 1892; serial No. 425,246.

480,585, unicycle; James Imhah, Barre, Vt.; filed Feb. 26, 1892; serial No. 422,907.

480,595, pneumatic wheel tire; Karl Lehmann, Berlin, Germany; filed Jan. 8, 1892; serial No. 417,518.

480,599, motor spring fork for bicycles; William Lynch and Eugene Tremper, Wallkill, New York; filed Nov. 20, 1891; serial No. 412,546.

480,600, velocipede driving-gear; John Magennis, Liverpool, England; filed March 21, 1892; serial No. 425,778.

480,661, supplementary lens for bicycle and carriage lamps; Albert L. France, Milldale, assignor to the Kenton Can Company, Covington, Ky.; filed May 26, 1891; serial No. 394,187.

Two Wheels Stolen.

G. W. Willebrands, 28 South Canal street, Chicago, reports the theft of his Warwick combination wheel on the night of Aug. 16, and from the pavilion at Garfield Park. It was an 1890 pattern, made over and fitted with Morgan & Wright tires; No. 1674.

E. J. Priestly of Le Mars, Ia., offers \$50 reward for the detection of the thief and the recovery of his Coventry Columbia, No. 8,067, stolen Aug. 10, between 1 and 4 o'clock.

Trade Jottings.

J. J. Prial, of the Wheel, sails for England next Monday. The REFEREE representative, R. M. Jaffray, sailed from Liverpool for home last Wednesday.

G. Minturn Worden advertises an almost new racer for sale in this issue. It is the well-known Lion, and the advent of a new Remington of his own make is Worden's cause for selling.

Allen's Digest of Cycles with Attachments, 1789 to 1892, two vols., seventy-two sub-divisions. 1,500 pages, is nearing completion and will be ready for delivery about Sept. 15, despite the heated term.

Van Vrevart has won the championship of the Antwerp B. C., distance 100 kilometres, on the road; time, 3 hrs. 40 min., beating the Belgran record by thirty-two minutes. His mount was a James track racer.

Guy P. Wilson, of the Baltimore News, is spending a two weeks' vacation in New York. He deserved a rest, as his hard work for the recent Monumental City meet, and his duties of commercial and sporting editor of the News were hard on the hustling and clever Baltimore boy.

Mr. Dubois, of Rouxei & Dub is, at the Buffalo track, Paris, Tuesday, July 26, on a safety of his own make fitted with Michelin tires, beat the world's record from 100 to 500 kilometres, and the twelve-hour record as well, 371 kilometres (230 miles 936 yards) having been accomplished in that time. The distance of F. W. Shorland for twelve hours was 220 miles.

A. M. Scheffey, of Scheffey & Company, Rade street, New York, had a narrow escape from prostration during the late extreme hot weather, and for ten days had to keep shady, so to speak. This genial hustler, who for two years attracted attention to himself while in the employ of R. L. Coleman & Company, is building up a grand jobbing and wholesale trade for his own house, which carries a large stock at all times. A. M. is generally on the road.

Books and Pamphlets Received.

The REFEREE acknowledges the receipt of the following:

Washington Cycling Club, Chicago—Road Book for 1892, containing much valuable information for cyclists and many pages of advertisements.

W. A. Lloyd & Company, Birmingham, Eng.—Supplementary list for 1892 of frames, cranks,

rimms, chains, saddles, lamps, tools and all parts and sundries.

Overman Wheel Company, Boston—A very handsomely gotten up pamphlet on specimens of Victor advertisements, showing the neatest and most unique of those gotten up by Mr. Powell.

Springfield (Mass.) Bicycle Club—Programme of the "diamond tournament"; illustrated and handsomely printed.

"Spring Frame Logic"—Rouse-Duryea Cycle Company, Peoria. A neat pamphlet containing press opinions and testimonials on spring frame wheels and a few good words for the Sylph.

Kempton's Illustrated Vest-pocket Guide to Cincinnati and Vicinity—William D. Kempton, 63 West Ninth Street, Cincinnati, compiler and publisher. This little book contains nice engravings of Cincinnati's principal buildings and other interesting views, as well as routes, railroad information, public institutions, streets, etc.

Brown Brothers, 28 Great Eastern street, London—A massive catalogue for 1892-3 of every known accessory, tool, part, etc., of the cycle trade. Very complete and what every dealer or manufacturer should have.

Poor Boys!

They were going to Milwaukee, were Lumsden and "Fuzzy" Anderson. Fresh as daisies and happy as clams they went aboard the boat. Songs were sung, and

it was to be such an enjoyable trip, when lo! a rough sea, and the fishes were fed, not once, but many times. Deluded hope!

Sanger's Fast Mile.

The exceedingly fine weather of the past week was very propitious for racing, and as a result the lovers of track were treated to several events of more than usual enjoyment and importance. The largest number of admirers of the sport were attracted to National Park, Milwaukee, Thursday afternoon, it being the annual celebration of the games of the St. Andrew's Society. The yearly first day of this popular Scotch body is always largely attended; but at no time during the twenty-six years of its existence has the crowd been so large as on this occasion. The fact of the matter was, the crowd went to see the bicycle races, and manifested its impatience unmistakably at the rather lengthy programme of mediocre events gone through with by the "brawny Scotch" athletes. All the interest centered in the races, and the crowd of nearly 8,000 people was kept waiting un-

til nearly 5 o'clock before the track was cleared for the first race, a two-mile, handicap. The string of clever flyers started in this race were all good pedlars and furnished as exciting a race as the most ardent devotee of the sport could desire. W. C. Sanger, from scratch, rode in excellent form, gathering in the field without any apparent effort. He rode the first mile in 2:26, and in the second mile he loafed part of the way and finished in 5:02; W. Sanger, second and Mattie Marten, third.

In the five-mile, open, Sanger had for his opponent, beside seven of the best of Milwaukee's riders, Terry Andrae, "the flying badger." Andrae was in his old-time form and rode like a demon. Whenever he passed the grand stand he was cheered to the echo, which demonstrated that he had lost none of his popularity. It is thought Andrae would have won the race had he not, unfortunately, lost his pedal in the spurt. Sanger finished first; time, 14 m in.; Andrae, second; W. C. Wegner, third; C. E. Parks, fourth.

The newspaper men's race afforded quite a little excitement. Frank Putnam, who was afterward found to be a professional sprinter, finished first, with a 400 yards handicap. As the race was run under L. A. W. rules Putnam was barred. The result was: A. B. Lindsley, Saturday Star, first; Martin Rotier, Pneumatic, second, and Harry Seward, REFEREE, third.

Al Moyer, who was looked on as having a cinch on the race, did not ride, much to the regret of his many lady admirers present.

In the boys' race fifteen started. The first prize was won by John Murphy.

Columbus' Fine Prize List.

From all evidence now at hand the two days' meet of the Columbus Cycling Club, Sept. 5 and 6, will be a great affair, for there will be some \$3,000 worth of prizes, including a city lot, silverware, several gold and silver medals, an upright piano, buggy, six bicycles, clothing, sundries, etc. There will be eleven races each day, including a five-mile relay race (team) which will be run as follows:

The relay race is to be run by teams, each rider to ride one mile, under the following conditions: An exchange limit of 100 yards will be designated by white flags in front of the grand stand. Number one of all teams will start, riding the first mile, each carrying a courier packet, which is to be transferred to number two of the respective teams within the exchange limit; numbers two, three and four are to repeat the performance of number one, and the team represented by the first number five under the wire wins the race.

Besides the prizes named a \$100 diamond medal will be given to the one breaking the world's mile competition record (2:22) made by Munger at Springfield, Ill., July 4. The race meet is in the hands of several competent committees, and entries go to George W. Smith, 32 East Spring street, Columbus, O. The events will be as follows: One-mile, novice; half-mile, open; two-mile, handicap, local; one-mile, ordinary, open; one-mile, open; half-mile, 1:25 class; one-mile, handicap; half-mile, juvenile; three-mile, lap race; one-mile, 2:40 class; five-mile, handicap; two-mile, six minute class; half-mile, open; one-mile, Columbus Cycling Club; two-mile, handicap; two-mile, ordinary, handicap; one-mile, open; one-mile, 2:50 class; one-mile, handicap; one-mile, Columbus championship; five-mile, relay; one-mile, consolation.

Guinea's Assailant Fined \$10.

Joe Guinea's evidence was overwhelming, and Justice Whitney decided against Henry Schwaig, the Cicero policeman who so unwarrantably beat him July 31. Ten dollars and costs was assessed, and the case was appealed to the criminal court.

WHEN YOU FIRST SEE IT IT MAY LOOK LIKE THIS

SWIFT

*But after you become
familiar with it it looks
like this to you.*

SWIFT

Before purchasing our "Swift" safeties of you last May, we made a careful comparison between them and the other machines for sale here and found that the "Swift" was more nearly correct from a mechanical standpoint than any of the machines we examined. The simplicity of the machine, the accuracy with which all bolts and nuts were fitted, the design of the frame insuring great strength and the steel-tempered roller chain all combined to influence us in our selection. Since riding them we have no reason to change our opinion that they are the strongest, simplest and easiest running machines which we have seen.

Yours truly,

R. R. PIERSON, Engineer, { Omnibus Cable Co.
T. W. C. SPENCER, Engineer. }

NEW YORK.

Chief Consul Gerould has appointed the following Illinois local consuls: W. S. McClintock, Galva; R. C. Wayne, Edwardsville; J. E. Babcock, Geneseo; W. A. Shriner, Virden.

Some one in Utica, N. Y., who has taken offense at bicycle riders, is reported to have an arrangement constructed of a scythe for the purpose of so placing it on the walk as to cut pneumatic tires.

The following officers for the ensuing year were elected by the Iowa division: Chief consul, Fred Beach, Muscatine; vice-consul, John D. Forbes, Sioux City; secretary, F. A. Clifford, Muscatine; treasurer, G. W. Jones, Des Moines.

The Chattanooga (Tenn.) Cycle Club moved into its new quarters Tuesday night. The two-story, nine-room house at 54 East Terrace street, owned by H. Clar Evans, has been rented and is furnished from top to bottom in elegant style. Double parlors, Brussels carpets, brilliant chandeliers, a perfect toned piano, baths, fully equipped dining rooms and kitchen—these are some of the conveniences and luxuries at the cycle parlors.

A preliminary meeting will be held at the office of Charles Schwalbach & Company, on Flatbush avenue, New York, next Wednesday evening for the purpose of a free discussion on the improvement of the thoroughfare on the Ocean Parkway for the use of wheelmen. This will be a call to the wheelmen's organizations of Brooklyn. The call will be of vital importance to all wheelmen, as the best way of forming a league for improvement will be discussed and possibly a mass meeting of wheelmen, attached and otherwise, will be called later in the season. No financial appeal is contemplated at the preliminary meeting.

Charley Callahan, of the Press C. C., was the only Buffalo rider who competed against Zimmerman in Hamilton on Monday, and in speaking of the renowned flyer the speedy Pressite said: "Zimmerman is riding exceedingly fast. He says that the telegram sent by the Press C. C. infused new life in him while in Europe, and he feels grateful to his Buffalo friends for remembering him. He told me he will arrive in Buffalo the night previous to the exposition races, and in referring to Buffalo I was amused to hear Billy Campbell say to Jimmy, 'For goodness

sake don't let the Buffalo boys know when you are coming. They will lionize you and carry you and your wheel on their shoulders up Main street. They're hustlers, they are!' Zimmerman assures me that he would ride like a fiend in Buffalo."—Buffalo Courier.

The non-owners of wheels in the Lake View Cycling Club and those who have not contested in races this season ride a special mile race at Thorndale this afternoon. None have been allowed to train.

Governor Russell of Massachusetts appointed a highway commission in accordance with the act of the legislature to report on methods and means of road improvement, consisting of W. S. McClintock, of Chelsea, a civil engineer; Professor N. S. Shaker, of Hartford, the geologist, and George A. Perkins, of Cambridge, chief consul Massachusetts division.

According to a Michigan paper, a Manistee wheelman, going at a racing clip, struck the Salvation Army corps during an outdoor service and wrecked the big drum, the French horn, the captain and the sister who was shaking the tambourine. The city marshal, who was trying to induce the Salvationists to get off the sidewalk, also went down in the general wreck.

The bicyclists who ride "scorchers" in the streets look like monkeys on the Shetland ponies of the circus. It would be just as absurd if a man should come down to business and drive around the streets dressed in jockey clothes on a sulky, behind a fast nag, as it is for these so-called wheelmen to mount a racer, get a green apple pose, and go about the city in the ridiculous way they do. Everybody laughs at them for their pretensions, and they bring bicyclists into contempt among the sensible people.—Detroit Journal.

According to the Fort Wayne (Ind.) Gazette, one of the delightful occasions of the season was the out-door lunch given by the Ladies' Cycling Circle to members of the Triangle Club, Saturday evening. At 6 o'clock a committee met the Triangle Club at the Y. M. C. A. hall and escorted the members to a beautiful grove four miles out of the city, on the Leo gravel road, where a magnificent supper was served in several courses. The evening was a pleasant one, and never did a merrier party gather at an out-door dinner than that which partook of the hospitality of the young ladies. After supper Captain Evans made a brief address in which he highly complimented the young lady cyclists, the Triangle Club passed a vote of thanks to its fair entertainers, and the party then enjoyed a delightful moonlight ride back to the city.

To Care For Visiting Wheelmen.

Captain Van Sicklen of the Chicago Cycling Club has thought out and presented to the club a scheme for utilizing the old club house after the new home has been occupied, or during the World's fair. The club cannot sub-lease without permission from the owner, and it is not likely he would consent to any such arrangement, so the plan is to take in some 500 non-resident members of the visiting wheelmen and furnish them, or all that can be comfortably accommodated, with cots at \$1 per day. The 500 non resident members would give the club \$2,500; 60 cots at \$1 per day for 150 days, \$9,000; profits on cigar sales, \$500; total, \$12,000. The expense is reckoned at \$4,100, leaving a profit of \$7,900, which will go toward paying for the new home. Wheelmen would gladly join the club to have the benefit of its home and protecting wing, and then only club members would be housed at the old home. The rate of \$1 per day would be very cheap in those times, and the new club members would be saving considerable.

Some of the daily papers are considerably stirred up over the matter. They fear that—"does it tally with the general idea of what is due from hosts to find that they are nothing more than landlords?" The fact is that if the scheme goes through the club will merely be taking care of its own members from out of town, and will be saving them considerable money and will, at the same time, be utilizing the old house and making a profit to go into the new house. The plan seems feasible and is a good idea.

An Original Prize Contest.

MY NAME IS ... **DERBY**

Morgan & Wright Pneumatic, 37 lbs., \$140.00
 Strauss Pneumatic, 35 lbs., 140.00
 Dunlop Pneumatic, 38 lbs., 150.00

DETAIL.—Frame, Derby pattern, double throughout, from continuous seamless steel tubing; 9-inch head; Wheel Base, 44 inches; Wheels, 30 inches; Warwick Hollow Rims; Gearing, 57 and 68 inches; Round Cranks, 6 1-2 and 7 inch throw; Humber Chain; Garford Saddle; Drop Forgings throughout. We have the best and most simple Spokes made; they can be replaced by the rider without removing the tire, and are fully explained and illustrated in our catalogue. For beauty and simplicity there is no equal. For service none can be made better.

THE MAKERS' AMATEUR.

One of the great questions of the day is whether or not makers' amateurism shall be tolerated, and whether men known to be in the employ of manufacturers—receiving salaries, in short, for riding certain wheels—shall be permitted to compete in the same races and on even terms with riders who pay their own expenses and are amateurs in fact—though not from choice, possibly—as well as in name.

A rumor has been placed in circulation to the effect that the racing board had decided that hereafter a man may, if he feels disposed, accept payment from a manufacturer without jeopardizing his amateur status. Where this rumor originated no one seems to know, and where the daily papers obtained authority for making it public, is equally hard to tell. We learn on very good authority that no such decision has been reached by the board.

It seems to be generally conceded, however, that the league has been unable to cope successfully with the makers' amateur, and that the racing board is casting about for a means of permitting him to continue to race without tolerating any such flagrant breaches of the rules as are at present so common.

It is high time some such step was taken. The REFEREE has always been an advocate of a change in the system which permits a paid man, whose training is done at the expense of a maker or wealthy club, to compete with men self-trained and whose racing and training are done in spare moments and at their own expense. Nevertheless, we consider the paid man, if not actually a necessity at least of benefit to the sport. Without him our racing would be of far less interest than it is at present, and the gradual lowering of records to their present place would have been almost out of the question. Such records as we have today could only have been made by men whose time was devoted to the game, and who were therefore able to take advantage of every favorable opportunity. The rules as they now stand are grossly unjust. They permit one man to induce another to commit an illegal act for which he may be punished, while the man who hires him may go free. It would probably worry some of the manufacturers very little should they receive notice that, for such and such an offense they had been suspended for so many days; but that does not alter the fact that to suspend the rider while the employer goes free is a rank injustice.

What the racing board will do in the matter is difficult to estimate. It seems, at first glance, that it has no power to do

anything without the consent of a constitutional convention. The amateur rule has been made part of the league's constitution—a foolish step as we have always believed—and under that rule no man who receives payment from a maker can become or remain a member. The executive committees and racing boards of the past have been able to make out some extraordinary cases, and prove them, too, to the satisfaction of those people who chose to swallow them whole-sale, and possibly a way may be found to so distort the amateur rule as to reverse the conclusion mentioned above. The fact will remain, however, that a paid rider cannot, under the rule, remain an amateur.

It has been suggested that class racing will remedy the evil. How? Placing fast men in a fast class will make them no better specimens of amateurs than they are now.

There are two courses open: the one to enforce the rule as it stands, the other to call a convention to have it changed. In all probability the latter course will eventually be adopted. It should be. Like all great reforms, however, it will take time and patience. When the time comes it will give the cash prize advocates a chance to air their hobby, with no insignificant opportunity of seeing it adopted. Let no man fall into the mistaken idea, however, that he can at this moment receive payment and not get caught at it! The report that "everything goes" is quite erroneous, as a few men who, like Graves, become too reckless, may rue their carelessness.

Gradually, we believe, people are awakening to two facts—facts which the much-abused Ducker and other promoters of big race meets discovered long ago, viz: firstly, that makers' amateurs cannot be suppressed, and that it is therefore better to have them ride in their true colors; and, secondly, that makers' amateurism is beneficial to racing interests.

The point now to be decided is, whether these men, as in the days gone by, shall compete in a class by themselves—promoters they were once called—or whether they shall continue to be turned loose among the lambs to gather in all the choice pickings of the pasture.

CLASSIFYING RACING MEN.

We have previously called attention to the fact that there is on the books of the racing board a ridiculous rule which provides that every official handicapper shall keep a record of racing men, so that he may be able to tell what class each man is entitled to compete in. Of course no one pays any attention to it. We doubt whether one man could, by devoting his entire time to the work, keep such a record.

How, then, are these records to be kept? We respectfully suggest that, following the example of the executive committee, the racing board should have a secretary, paid if necessary, and that the promoter of every race meeting should be required to furnish the secretary, within a few days after the races, a complete record of all the events. The official handicappers could obtain the information by circular from the secretary. Thus one man might perform the work which is at present left to a dozen—and neglected.

ARRANGING A CIRCUIT.

From time to time the REFEREE has pointed out to race promoters the desirability of a meeting, early in the year, to which all clubs within a certain range should be invited, for the purpose of so arranging a circuit as to entail the least possible expense on the racing man. Such a meeting was held in Chicago

Saturday night, but it was the result of a tangle in which various cities found themselves, and which difficulty could have been avoided had these same gentlemen come together earlier in the season. Slowly but surely the trotting circuit idea is forcing itself upon us, and sooner or later circuits will be arranged in the same manner.

It is quite within the range of possibility, too, that the trotting associations' example will be followed in other ways in due course of time. Years ago the veteran Eck made many suggestions as to the future of racing which were deemed fanciful at the time but which have gone into effect since. In the last issue of the REFEREE he made other suggestions, which, while they may not be put into practice, deserve consideration. His plan for the formation of an association of race-promoters or clubs, with a paid secretary to transact its business, keep the records of the men for class-racing purposes, etc., might lead up to some improvement in the present classifying and handicapping methods at least. They need it badly.

THE grounds of the Chicago Cricket and Athletic Club, whereon stands the Parkside track, were advertised for sale in Sunday's Tribune. How some of the members stormed and called us nasty names when we stated, eighteen months ago, that there was a prospect of such action. "The chickens will come home," etc.

WE venture to suggest to a couple of our contemporaries the advisability of discontinuing the self aggrandisement so conspicuous in their columns. Results tell the tale. We do not find it necessary to tell the reader what the REFEREE is doing. He is able to judge for himself.

Last Sunday's Tours.

Sunday last was a great day for tourists, century riders and club men. The clay and dirt roads were superb, the gravel roads a little dusty. The Elgin-Aurora century course was not as crowded as the excellent roads might have indicated it would be. Two ladies, the Misses Lizzie and Charlotte Stahl, accompanied by Frank Daly, S. T. White, R. M. Barwise and Will Stokes; Will Herrick, Moxam, Powell, John E. Parker, W. A. Kinkead, Frank Chase, Dr. Baker, C. H. Baker, and many others were seen on the Elgin-Aurora course, and Herrick, Moxam and Powell finished in 8:45. The condition of the course argues well for Ulbricht's chances next Sunday to break the record of seven hours which Cutting claims. Two of the Washington club rode to Long Lake, and Joe Gunther, of the Lincoln club, rode a century to Evanston and return and to McHenry Saturday. On Sunday morning O. F. Merpall and F. T. Werner rode to Milwaukee in 9:30. Spooner started at 5:35 Saturday and finished 120 miles to Evanston and return and Brown's Lake near Burlington, in twelve hours. Sunday he rode the century home in eight hours: actual riding time, 6:15.

Ten of the Æolus club rode to Palatine, forty-eight of the Æolus club to Schutze's park, where three of the men captured the three prizes in the Turner's race; Jersa first, Skykora second, and Holub third. Twenty-eight of the Columbia wheelmen rode to Lemont, and forty of the Illinois Cycling Club went by boat Saturday evening to St. Joe, where they spent a most pleasant day. The Garden City Wheelmen had a score of men at Pullman, and the Columbian Bicycling Club, Miss Alice Poole, captain, rode from Milwaukee to Waukesha, over a dozen ladies being in the party.

MAKING LOCAL RECORDS.

Some Very Remarkable Riding Recently Reported.

Local records are being claimed daily now. So-called records are being daily broken. Men and youths are riding themselves to death to break and to establish records. There is no system in this branch of the sport, and why? A man wants a record and starts for it from no objective point, has no reputable timers, no judges, and no checkers. He claims to have ridden to Milwaukee, Aurora, Elgin or some neighboring city in 6:55, 8:00, 2:15 or some such figures, and possibly did.

Some of his fellow wheelmen, having implicit confidence in his honesty, believe him, others say it is impossible, and he never did it. They indirectly place him among the fakirs, and yet he was honest about it. There are really no local records. They are so called but who can prove them? In the spring of 1891 the Associated Cycling Clubs met and appointed a committee of three, R. G. Betts, L. C. C.; George Barrett, C. C. C.; and E. J. Roberts, I. C. C., to lay out a number of courses for speed trials. If the writer remembers rightly these were, Chicago to Pullman, Chicago to the Indiana state line and return, Chicago to Aurora, Chicago to Elgin, Chicago to Elgin-Aurora and return, Chicago to Wheeling, Chicago to Waukegan, Chicago to Kenosha, and several other objective points.

THE STANDING PLACES.

To southern points the Leland Hotel was the starting point, to northern and northwestern points, Dearborn avenue and Chicago avenue, west side points, Halstead street and Washington boulevard. The committee was delegated to have courses, measured presumably by cyclometers, and to name points which all record-breakers must finish or begin their rides. This was never done. Had it been done much local interest among wheelmen would have occurred. The committee was also to appoint official timers, who could be called on when such attempts were to be made, the record breaker to pay their expenses. The plan was an excellent one but never carried through. Were it to be taken up now, much interest would be aroused ere the season's close. No official record slate is kept now and all the rider has to go by is a say-so. The Century Road Club, at its annual meeting, prescribed rules for the guidance of local record-breakers and laid down rules very similar to the above. These have never been published.

WILL START SUNDAY.

Sunday Ulbricht starts to establish a record over the Elgin-Aurora century course. He will have the proper officials and will be paced by twenty men. Now that rules are more generally known, other records will be established, and by the season's close we will no doubt have a complete set of local records. These records claimed, as they stand to-day, are about as follows, with Chicago as the starting point or objective point: Milwaukee, 100 miles, via Wheeling, 6:55, Fred Nessel; Elgin-Aurora and return, 102 miles, 7:00; to Lake Geneva and return, 173 miles, 18:45, G. Paulsen and L. Tagholm; Milwaukee and return, 200 miles, 20:05, G. Paulsen; Elgin, 37 miles, 2:15, C. D. Cutting; Aurora, 44 miles, 3:00; Wheeling, 25 miles, 1:54; Pullman, 16 1-4 miles, N. H. Van Sicklen, 52:29; Long Lake, 50 miles, 3:00, Harry Rose.

Hibbard, Spencer, Bartlett & Company have found a very satisfactory demand for New Mails in the \$100 grade. They do not handle the higher grade.

A Pneumatic Tired Sulky Craze.

NEW YORK, Aug. 22.—There has been more talk over pneumatic tired sulkies and horse tracks in New York, the past few days, than there has been about Zimmerman and the cycle tracks and coming meets. Nancy Hanks and Hal Pointer and the pneumatic-wheeled sulkies have been the cause of much type used, editorially, and from an illustration standpoint. The *Evening World* on Thursday ridiculed the idea that Nancy Hanks' new figures for the mile were born through the agency of air-shod wheels, and stated emphatically that it was blood and breed that did the business.

WHAT BONNER THINKS.

The next day the *World* came out with a cut of Sterling Elliott's new thing in

sulky wheels, and a two-column interview with the astute millionaire, Robert Bonner, who ascribed the increased speed to the pneumatic wheel, and gave a practical illustration of the whys and wherefores of the new developer of trotting speed. Bonner thinks Sunol can beat Nancy Hanks' time, and Marvin, his trainer, has ordered two new sulkies for the speedy California trotter, whom Bonner thinks will come close to 2:05 before the snow flies. Four telegrams on Friday to the Pope Manufacturing Company's New York house frantically urged Elliott Mason to ship pneumatic wheels of Sterling Elliott make to various points.

ELLIOTT STRIKES OIL.

The "Hickory Hose-pipe" man has struck oil beyond a doubt, and is working night and day, yet his factory force fails to keep pace with the numerous orders wired in from all over. To lessen the pressure Elliott has licensed two carriage firms to make the wheels, one of them being the largest builders of sulkies in America, and as Elliott has covered his wheels with patents pretty thoroughly, it will make a millionaire of him in short order, and no man deserves success more than the man who stuck manfully to hickory wheels for many years. Nancy Hanks was the mother of President Lincoln, and the bicycle pneumatic wheel is the father of trotting and pacing records up to date, so the horse-men will think that there is some good in "them bicycle fellers" after all.

They Want to Know, You Know.

There are many inquiries in this section as to what has become of the Century Road Club of Chi—I beg pardon—

America. The easterners who eagerly subscribed \$5 for membership are asking what benefits are they going to derive from the western idea in clubs? The fact that the organization was supposed to be national in scope and of some direct benefit to its subscribers, causes many from the east to ask questions as to why its officers for the greater part are from Chicago, and the present listless attitude of the scheme. The eastern members say that if the club is to be national in scope the east should rightfully be recognized in the election of officers, and they would like to know what position the Century Road Club is going to take in cycling, as there seems to be a lack of knowledge in the premises, not only here, but in Chicago as well, judging from comments heard and seen in the papers.

THE CLUB'S MISSION.

It was thought the mission of the club was to encourage and control road racing, and possibly the adverse comments on road racing might have persuaded the club that it was not a field for usefulness; but the eastern members wear their badges and want particulars as to who is going to run the club and what is going to be its field as an endeavor in the field of cycling usefulness. A good many thousands of dollars have been in-

vested in the Century Road Club plant. When will the factory start manufacturing? There might be a good field for the club on the lines of the old B. T. C. of Great Britain, whose membership numbered about 20,000 some years ago.

WHAT IT SHOULD DO.

There would certainly be a better chance to make a success in encouraging touring than in defying the laws with encouraging road racing or running up century runs for a piece of metal, which encourages successes in cycling more harmful than anything else, and many a delicate constitution has been shattered completely in the mad desire to ride a hundred miles when ten would have been more appropriate. Touring is the most delightful and beautiful thing in cycling, and a quiet tour and a knowledge of the "lay of the land" beats hundred-mile scorchers worse than Zimmerman would a racing novice. The L. A. W. seems to have its hands full with track racing and cycling politics, and the field of touring is practically unoccupied. Will the Century Road Club take advantage of the situation?

Too Popular; Alas, Poor Zimmy!

There's music in the air—in the M. A. C. air. The promoters of the "gigantic," "mammoth" (and other circus names) cycle meeting which is to be given under the auspices of "Director of Cycling Moneypenny, M. A. C."—so reads the

bill—have heard that A. A. Z. will not compete at the "gigantic" next Saturday, Aug. 27, and the committee, of which "Pap" De Graff and Mr. Betting are members, is saying some harsh things about the "Jersey Skeeter," who entered for the building lots (they say the real estate was offered in order that "the skeeter" might build his nest in New York), but who has evidently been seduced by the winning smiles of George Collister, Josephi and the rest of the Clevelanders, whose pianos, bicycles, watches and good track captured the British conqueror.

USE HIM FOR AN ADV., THOUGH.

But the M. A. C. keeps on advertising "Zim," and Tyler when they know there is not one chance in a thousand of "the skeeter" being within a thousand miles of the "mammoth carnival" on the day advertised; and they feel very sore, for I believe the cute "Zim" did tell De Graff he would be on hand; in fact, I believe that your correspondent was present on the steamer Crystal Spring when the talk occurred. But the question remains, are the M. A. C. young men doing the right thing in drawing a big crowd, a majority of which will want to see Zimmy, and won't somebody be accused, later on, of playing "bunco" with the dear public?

KNOWS HE WON'T COME.

The committee knows that Zimmerman won't be there, and possibly knows that Tyler won't, also; then why make cards of them? True the race meet is an invitation affair, but many will pay for seats when they get there, like they did at the Riverside meet, and therefore it doesn't seem exactly in keeping with amateur meets to advertise a "woolly horse" and a "white elephant" when neither will be on view. It smacks too much of go-as-you-please professional showman's tactics with the showman an amateur. With the full knowledge that

Zimmerman will not be there, and the fact known ten days ahead, it will be curious to note what excuses the public will be asked to receive. Indulging in a little prophecy, I predict that Zimmerman will get a gentle roast all 'round, and be accused of meeting Windle and breaking faith with the M. A. C. See if this is not about right.

WHY HE WON'T APPEAR.

But the true cause of his non-appearance was given me by Manager Frank Bowden, of the Raleigh company, last Wednesday at 2:15 p. m., in the Raleigh cycle depot, as follows: "I have just received a letter from Joe McDermott, who says that he doesn't intend to allow Zimmerman to compete at the M. A. C. on the 27th for these reasons alone: 'In the first place, the track has a reputation of being decidedly unsafe, and he would not like to see Zimmerman take a fall just now, much as some probably would like it; then there would be an excellent chance for pocketing a man, I'm told, on this track; then another and a powerful reason is that Zimmerman is to compete

at Cleveland on the 26th, which would compel him to take a night train and he would only arrive in New York just in time to race, and we think it would be unwise to allow him to start, so he will race in Cleveland the second day instead of taking any chances here.'

GOOD REASONS, THESE.

"These reasons are ample and quite logical, and when Taylor has refused to race on the M. A. C. track, and Windle has fallen on the same, no doubt Zimmerman thought he would be better off in the west, although it must be said to the credit of the M. A. C. men they have for the past month promised a safe and fast track. The banking of the same is to be of some patent order. But, after all, is not Zimmerman his own master, and has he no rights or privileges, or the right to change his mind if facts brought to his notice (since verbally entering) induced him to change his mind? I should think so; and you can depend on one thing, that the first time Zimmerman, Windle and Tyler come together it will be at historic Springfield, where a mammoth, gigantic, stupendous meet is always assured, with no absentees."

Those Unsigned Racing Board Queries.

First be it known by all men that H. Crowther is cycling editor of *Sporting Life* (and a member of the L. A. W. racing board), so when you read his criticisms on penny-a-liners, you must allow some lateral motion, as it were, for it is not customary for a member of any firm to speak harshly or allow anybody else to criticize his brother members; but it is only fair to credit the brother of his son with more liberality than a member of the governing body of the L. A. W. generally possesses. I'm hit because the REFEREE, through a letter from the east by me, first called attention in its news columns, and editorially, to the lack of signature to a "pumping" circular sent out by the racing board chairman.

WHAT CROWTHER SAID.

Owing to a fact that through a clerk's omission Chairman Raymond's signature to the circular letter recently sent out by the racing board relative to the payment of expenses to the racing men was omitted in a few instances, a howl has gone up from the penny-a-liners who "know it all," the

burden of which has been, with a remarkable unanimity, what they have been pleased to term "the cowardice of the racing board," the iteration and reiteration—on which the changes have been rung in major and minor keys without cessation—while not causing the members of the board to lie awake nights, yet grew rather monotonous, and as a great many friends of the L. A. W. began to make inquiry concerning the true inwardness of the affair, the cycling editor of the *Sporting Life* addressed a personal letter to Mr. Raymond with the intention of bringing out an explanation of the matter that would satisfy all interested inquirers. Mr. Raymond's answer, herewith subjoined, is a full and sufficient reply to the criticisms which have been circulated:

BROOKLYN, N. Y., Aug. 16.—My dear Crowther:—Your letter asking if it is a fact that the letters recently sent out to manufacturers were unsigned, while perfectly natural, in view of the take-it-for-granted style of the criticism which has appeared, does me an injustice. I am not afraid to sign any letter that leaves my office, no matter on what

subject. Anyone that knows me at all would not give credence to such an insinuation.

The fact of the matter is simply that, through the carelessness of a clerk in my office, I suppose, a few of them went out unsigned. They were dictated to my stenographer and handed to my clerk for him to sign with my signature stamp.

I did not see them at all, as I left my office immediately after dictating the subject matter, and thus you see I am accused of fear. It need not trouble you, however, as it is absolutely of no account and affects me not at all.

YOURS FRATELERNALLY, H. E. RAYMOND.

LOST SLEEP OVER IT, HOWEVER.

In the first place we are told the document was unsigned "in a few instances," and that the racing board members have not lost sleep over the attention these "know-it-all, penny-a-liners" drew to the matter; still one, though, the above shows, if he did not lose sleep kept up a devil of a thinking over it, until the other member soothed his mind and soul with the statement that the criticism "does not mean injustice," even if it did not cause sleepless nights. But it does seem strange that "some of those" documents went out without signatures and some didn't, don't it now? And no others, I presume, have been sent out in place of the unsigned ones. We can not expect a very healthy crop from this endeavor to get light in the "ways that are dark and tricks that are vain," and the penny-a-liners like light sometimes on these subjects. And it would seem that the chairman was more interested in the life-and-death question to amateurism than to go home and hand the precious document to the clerk to sign with a piece of pure Para rubber.

A BOMB, BUT NO FUSE.

It looks as if he simply made a bomb without a fuse, and threw same over his shoulder into the amateurs' and manufacturers' back yards, then skipped, expecting to hear of an explosion but not caring for the results. Such documents will do as much good as if I were to write Benjamin Harrison asking him to change the constitution. Stop tinkering with the amateur definition; rip it up, bury it, sing a soft requiem over it, and out of its burial let a new one arise, for the old has served its purpose of showing the glaring weakness of the "ancient and honorable" definition of an amateur, which, like a worn pair of stockings, won't stand any more darning, for the A. D. has been darned and d-d enough. Stop the farce, as Frank Prial now says; give us something new.

THE OTHER SIDE.

But Mr. Crowther can blow hot and cold with the same breath, and he proves himself a good newspaper man by giving the other side of the story on another page, as follows:

"Why not come out like men and widen the scope of our organization on liberal and broad-gauge lines? Let the League of American Wheelmen place itself on record as opposed to humbug, hypocrisy, veneer and sham, once and for all time."

Aye, why not, indeed? But inquiring from manufacturers if they paid Johnny Jones' board bill or gave him \$10 for "attending" a meet or breaking a record will not secure them broad-gauge lines. No one has accused H. E. Raymond of cowardice. The unsigned document looked—well, it looked mighty queer, even if it was a mishap; but does any one believe that the astute H. E. Raymond thought that any good result would come of such a document as he issued? Has not the past been lesson enough? It looks as if those in authority are playing pretty much the same game as regular political candidates do before a general election. Don't inquire, don't suspend a poor nobody, Mr. Racing Board—give us something new, a new definition, new rules, anything new, in fact; but please do ring off the played out changes of the past, be they in minor,

major, or any other keys—please stop the present farce.

* * *

Racing Talent and Paid Officials Needed.

What a hustle the tournament managers are making for crack talent for this Saturday, Aug. 27, and more than one piano, corner lot and diamond will go to the winner without the semblance of a contest. This is another argument for rules that will enable men to receive something substantial for their work and at the same time not place tournament managers at the mercy of less than a half-dozen first-raters. With a liberal rule we would have more than one Zimmerman and Windle, Tyler and Taylor, and the sport would be benefitted thereby. As it is, Windle will attend New York, and scoop a lot or anything else he wishes; Tyler will go and do likewise at Philadelphia, and Jimmy will play "Ta ra ra boom de-ay" on the Cleveland piano and give orders to the Grand Trunk to ship the pianos and bicycles to his music and cycle store at —, and Montreal and Chicago will content with their home talent.

GIVE US MORE RACERS.

The racing board must give us more racers, curtail the piano output and real estate industry, or go out of business, for we shall never see good racing at this rate of tournament speed. This also calls to mind the urgent need of a paid referee and official timers for big meets and time trials. The time is ripe for both these officials, and the sooner they are appointed and paid to do the work the better. I have more than once praised the work of the Springfield timers at trials against time, but the man who holds a watch on time trials and records should be a paid man of the L. A. W. and not anybody whom a manufacturer or club delegated the task to time a best on record.

EASY TO MAKE RECORDS NOW.

At the present time almost anybody could get up and ask some prominent club man or citizen to time, and knock out a world's record, and the saying, to keep from sin is to keep away from temptation, holds good, and the L. A. W. should take away any temptation to place fake records on the record book by appointing a paid official of its own and hold him responsible for all trials against a reliable watch. Really, you can't wonder if people in England have in the past, or should in the future, doubt the genuineness of our no-doubt-best-in-the-world. The referee also should be a paid official, and the chairman of the racing board should be that man, and should have any help necessary to run his office work. The present rule of appointing anybody who happens to be somebody is wrong; and for the sake of manufacturers, racers and the sport generally should be stopped.

TWO IMPORTANT POSITIONS.

The positions of referee and timer are the two principal and most vital of all; in fact, the others are only for the sake of giving people an opportunity of either being a conspicuous somebody; but the other two should not be filled by rattle-brained youths or nobody in particular; they should be of the finest calibre and paid for their work.

These, and a few minor considerations, including the "amateur definition," are respectfully referred to those members of the racing board who do lose sleep over their positions. The others will wake up before the next general L. A. W. meeting, and this penny-a-liner gives the advice at so much a line, for he believes in cash prizes for all who labor. Do you, reader? W. J. MORGAN.

WITH ENGLISH CYCLISTS

SOME VERY REMARKABLE ROAD PERFORMANCES RECENTLY.

Osmond Wins a Mile Handicap in 2:22-1-5—Holbein's Big Road Record—Another Twenty-Four Hour Race—Dunlop's Tire.

LONDON, Aug. 13.—For the past fortnight racing has been confined for the most part to the provinces, where a succession of meetings have provided plenty of attractions for the pot-hunter as well as for the men who are accustomed to devote their holidays to brief racing tours. Judging by his performance at Aston ten days ago, Osmond is at last getting into form; he won the mile handicap from scratch in 2:22 1-5. Since then both he and J. H. Adams, who have been living for some months past at Small Heath, a suburb of Birmingham, have gone into summer quarters at Water Orton, a delightful little place in the country a few miles further away. Both are taking plenty of fresh air and exercise, and it would not be surprising if under these favorable conditions both or either of them accomplished some really good performances.

GOOD ROAD PERFORMANCE.

While the path has produced no very remarkable results, there has been plenty of note doing on the road. On August bank holiday J. P. K. Clark and H. Arnold of the North Road club set out on a Rudge tandem safety in search for the twelve hour record for that class of machine. The old record stood at 165 miles, accomplished in 1890 by M. A. Holbein and P. Carlisle Wilson, and to these figures Clark and Arnold added eighteen miles, making a total of 181 miles in the twelve hours. Two years ago Arnold made a record with Rowley on a tandem tricycle, but Clark has hitherto been known only as a plucky rider and as a most generous and obliging pace maker. On the very next day—Tuesday, Aug. 2—M. A. Holbein started out with Arthur Brown, another North Road man, on his Marlboro Club tandem tricycle, and secured a twelve hours record for that class of machine, with a total of 184 miles, three miles more than had been done on the safety on the previous day, and this in spite of the fact that for the first 134 miles the record breakers were quite unassisted by pace makers.

HOLBEIN'S BIG RIDE.

But the big event of all was accomplished on Tuesday, the 9th inst., when Holbein left Biggleswade at midnight with designs on the twenty-four hour safety record, which stood in his own name at 336 1-2 miles. Until two hours before the start rain had fallen steadily, and therefore for the first half of the journey the roads were very wet. On the other hand, Holbein got plenty of shelter from his pace makers, who in couples mounted his tandem tricycle and led him for five and twenty miles or so at a time. By midday he had accomplished 189 miles, and although this was five and a half miles less than the twelve hour record, it left only 147 1-2 miles to be done in the next twelve hours to equal the full days' record. This was done by 10:35 at midnight, and in the remaining hour and twenty-five minutes Holbein rode twenty-two and a half miles (the last eight and three-quarters being done in half an hour against the wind), and so raised the record to 359 miles. Of course he rode a Swift safety and it was fitted with Clincher tires and the Carter gear case, the latter appli-

ance proving very useful on the wet roads during the early part of the ride.

ANOTHER FULL DAY RACE.

At the present time quite a number of men are spending their days on the road. The North Road Club's country quarters at Eaton Socon are full, and if only the weather be fine the club's twenty-four hour race, which takes place on the 27th inst., a fortnight hence, will be a bigger success than ever. With both Shorland and Holbein among the competitors, it should be a great race. The former since his performance in the twenty-four hours' competition at Herne Hill has returned to the road and has been spending a good deal of his time at Peterboro, a city which seems to have great attractions for some members of the North Road crowd.

DUNLOP'S NEW TIRE.

The trade just now is very, very slack and most of the makers are announcing clearance sales of machines at low prices, some of them not even taking the trouble to state, as they usually do, that the said machines are "shop-soiled" or "slightly damaged." In Coventry several factories have been practically closed until November, when they will begin again with the Stanley Show. This is forced to open at the Crystal Palace on November 18, and as usual it will occupy eight days. The busiest people just now are the tire makers and inventors. The Dunlop people having given their new unpuncturable tire a thorough trial during the summer, are preparing to place it on the market with a big splash at a very early date. Judging by the sample pair which I have seen and tried, I fancy that by its aid the firm will still maintain its supremacy. Macintosh & Company, I hear, are going to do big things next season, and it would not be surprising to find them following the lead of the other tire makers and opening a depot in Coventry. The Silvertown Closure tire, I am told, has been recently much improved. But it is not only the rubber people who are busy with tires. Several of the cycle makers are having tires specially made for themselves. Among them are Guest & Barrow of Birmingham, and the Rudge Cycle Company, whose manager, Walter Phillips, is having a tire made by Messrs. Warne & Company, of which I hear very good accounts.

The very latest news is that T. Warwick and W. G. Turner have returned from Australia and have entered libel actions against several cycling papers, among them being *Bicycling News* and *Wheeling*, who in their zeal for the cause of amateurism, said things about the actions of the men in question which the latter deem to be damaging to their reputations. It is the first time that I have heard it suggested that it is possible to damage what does not exist.

Cyclers Under Arms.

The strike at Buffalo among railroad men has turned our gay amateur New York and Brooklyn cyclists into stern warriors, who are now "under arms" at Dai Lewis's village. When the telegraph orders from the general in command came, the cyclist soldier did great work in riding swiftly to and fro summoning their brother officers and men of the rank to the armories. Wives, sisters and sweethearts wept over and kissed the boys good-bye, with fearful forebodings, and the street gamins climbed the elevated railroad supporting pillars and encouraged the amateur soldiers with the assurance that "you are going to be killed, sure."

Cyclists to the nation's defense! Cyclists showing horsemen how to beat world's records with their nags! These dog days of cycling seem charged with good things for cyclists and the sport.

ENGLISH TRADE DULL.

GREAT PREPARATIONS BEING MADE
FOR THE STANLEY SHOW.

A Law Suit Over Last Year's Show Settled—The Wenham Company Making Fine Wheels—New Wheels Coming Out.

LONDON, Aug. 13.—The London cycling trade is in the doldrums. A stagnation more complete than any other in recent years has laid its grip upon the large depots, the smaller firms and agents. It has been coming on gradually, and although I have hesitated to advance a rash generalization while any doubt remained, I have noticed for some time past that several firms had little home business to report, but dwelt upon vague orders executed for the continent. Mr. Sturmev, in his leading article in this week's *Cyclist* advances a number of theories in explanation of the present unfortunate situation, which prevails as generally in Coventry as in London. It would be tedious to indulge in speculations as to causes, and I will confine myself to saying that the present dullness has already stimulated great interest in the forthcoming Stanley show, to be held next November. The sudden cessation in the demand for rear drivers has come as a shock to firms holding large stocks, which will have to be sacrificed at no small loss, but the warning has arrived in good time for them to prepare for the revolution, which is inevitable.

A STANLEY SHOW CASE.

Apropos of the Stanley show, which is fixed to open on November 18, an interesting case has just been decided at the Birmingham assizes. It will be remembered that an important section of the English cycle trade, belonging to the Manufacturers' Association, came to an agreement in 1890 not to exhibit at any show of cycles held during 1891. The firms in question signed a bond agreeing to forfeit the sum of £250 damages in the event of the agreement being violated by any of them. At the last show, held at the Crystal Palace in November, Mr. Wooster, one of the signatories to the bond, exhibited some of his machines, and last week Mr. Singer, of Singer & Company, brought an action against him to recover the agreed damages.

WHAT THE DEFENDANT CLAIMED.

The defense advanced by Wooster's counsel was that the bond was signed under a misapprehension; that it was in restraint of trade; and that the show in November, 1891, was in reality the 1892 exhibition held earlier than usual. The case proceeded for three-quarters of an hour when the parties came to an agreement by which Mr. Wooster will pay the sum of ten dollars instead of the damages claimed. So that, virtually, the defendant won the case. At the forthcoming show (the venue of which I am not at liberty to disclose) it is anticipated the entire trade will be represented, and that the number of machines shown will beat record.

THE BIG WENHAM WINS.

The other day I visited the works of the Wenham Company, Ltd., situated in Upper Ogle street, Fitzroy Square, W. The Wenham Company, which is famous for the gas lamps bearing its name, commenced to manufacture cycles rather more than a year ago. The gas lamp branch of their trade is a winter business, whilst, of course, the cycle making keeps them busy in summer. I spent over an hour tramping about the exten-

sive works, which cover two and a half acres of ground. The company's splendid machinery, driven by a 40-horsepower steam engine, its elaborate plating and enamelling plant, and the perfect system of factory organization, enables it to produce machines equal in both quality and appearance—especially the latter—to any which issue from the big Coventry factories. They employ 200 hands, and the cycle making is conducted quite separately from the lamp business.

MAKE FINE WHEELS.

Mannesmann tube is what they use for building their light roadster safeties, identical in outline and detail to the Humber pattern, and they speak in high praise of this material. Of course they make several patterns, including the original Wenham with its patent duplex curved frame, made in two sections of single tubes without brazing, and presenting a pear-shaped outline. This makes a good, comfortable, strong road-

ster for rough work, but is not equal for lightness and speed to the Humber type already mentioned, which scales thirty-four pounds, whilst the other weighs about forty pounds. I examined a lot of frames polished bright prior to being enameled, and was favorably struck with the work displayed. At the next show the Wenham people will exhibit twenty-four machines, including several geared ordinaries, or, rather, front-driver safeties, fitted with the Crypto company's hubs. The company is wise in this decision, I venture to think. They are very proud of their facilities for fitting Carter gear cases with absolute perfection.

NEW PSYCHOS TO BE BUILT.

Starley Brothers are showing in the window of their viaduct depot the thirty-two-pound Psycho safety, geared to sixty-six inches, upon which Sames, a 47-year-old rider, won the recent 100-mile veter-

SHOWING HOLBEIN'S WHEEL.

The Coventry Machinists' has on view Holbein's Swift racer, upon which he rode 359 miles in twenty-four hours upon the road early this week. It is

WALTER SANGER.

ans' race in 6 hr. 21 min. 29 sec. The machine was taken from stock, and smothered in dirt as it is, looks a credit to its builders. It is a diamond with double diagonal tubes, the type 15 Psycho. These machines have enjoyed great success this year, together with the type 16 racer. Mr. Morecraft, the firm's London manager, told me they intend building for next year a light road-racing tricycle, and a very light ladies' safety. As it is, their type 5 ladies' safety has gone well, especially in America, where a number are in use by members of a large Washington club. Mr. Morecraft faces the future without misgiving. If the public want additional lightness combined with lower prices, Starley Brothers are determined to cater for them.

THE M. & C. GEARED ORDINARY.

Marriott & Cooper are prospering this season. They are to be congratulated on the success of their geared ordinary, which has many original points. I have not tried one yet, and therefore cannot speak from experience, as I can about the Crypto pattern, but the glowing praise in which several personal friends of mine speak of the mount, after long trial, is quite good enough for me. Well-known men, like J. S. Amore and F. M. Fletcher, own M. & C. geared ordinaries. They are both ordinary

riders of many years' standing, and stoutly maintain the superiority of their mounts to either a Crypto or a safety front driver. Their opinions have been formed after trials of all the geared types. The M. & C. is now made with a thirty-seven-inch driving-wheel, geared to sixty-three inches for the path and sixty inches for the road. The weight of a specimen I inspected, upon which 161 miles had been covered on southern roads in twelve hours, was thirty-one pounds and the gear sixty-eight inches. Of course, full roadsters are slightly heavier. There is a lot of originality displayed all over the machine—the curve of the back-bone, the special back forks and their crown, the saddle pillar fixed to a socket on the back-bone, and the strongly curved handles. All these modifications are the outcome of severe and repeated tests in the hands of first-class riders, and add enormously to the utility of the machine. Foster Williams' pneumatic tires (not very unlike Boothroyd's) are found to answer well on this machine. Several well-known actors ride M. & C. safeties, and the late Lord Sherbrook, even after his sight failed, constantly took exercise on one of the famed Olympia tandems.

A CHANCE FOR ALL.

J. K. Sharley & Company appear anxious to dispose of some of their sterling Rovers. I observed when on the viaduct that they are clearing out some elegant looking safeties, by no means obsolete in pattern or shabby in appearance, with Dunlop tires, at £13 18s, while a first quality mount with red solid rubber can be picked up for £9 9s—that is to say, roughly, \$68 and \$47 respectively. Truly buyers have never had such opportunities as abound this fall.

A NEW LUBRICATING OIL.

"Graphite" is the name of a new lubricating oil for cycles which has been invented by James Walker & Company, Iron Works, Love Lane, Shadwell, E. Shadwell is one of the dreariest quarters in the unhappy far east of the metropolis, but nevertheless I called on the firm early this week and found their work very large. They do an extensive trade in lubricants for marine engines and other machinery. "Graphite" is a good oil containing finely powdered plumbago. It is said to surpass all existing cycle lubricants, not only for easy running but on account of its lasting qualities. I came away converted, and am going to try the oil on my C. G. O. gearing, for which it is specially suitable. The firm makes also the Sunshine lamp oil, which lights at once, does not smoke or smell, gives a bright light and lasts longer than other lamp oils for cyclists. STANLEY.

Sanger Showing Great Speed.

Milwaukee wheelmen are all in a flutter of excitement over the achievements of their club mate, Walter Sanger, during the past week, at Sarnia, Ont. Everybody who knows anything about his riding abilities expected he would make a creditable showing, but his great success in defeating the world's champion in several events has made the boys supremely happy, and they congratulate themselves for having as an associate a wheelman who is destined to be one of, if not the greatest rider in the country. Sanger, fully realizing that he will be called upon to overcome good men during the next few weeks at the different meets he will attend, is training diligently. A few days ago, at the National Park track, with pacemakers, he rode a mile in 2:19 1-2, the first half in 1:10 and the second in 1:09 1-2. The track is a slow one, and as his pacemakers did not pick him up quickly enough to be of much assistance, it is safe to assert he could have knocked off several seconds of that time.

TELEPHONE MODEL "D."

WEIGHT, 36 LBS.

MORGAN & WRIGHT PNEUMATIC TIRES, \$150.

KIRKWOOD, MILLER & COMPANY,

PEORIA, ILLINOIS.

All Orders Filled Promptly.

This coming Sunday the Æolus Cycling Club gives its annual stag party at Turner Park, on the Des Plaines river.

There is talk of a consolidation of the Lake View Cycling Club with the newly organized North Chicago Wheelmen.

J. R. Pollock, C. E. Salter and Mrs. Salter, of the Ravenswood club, are at Beulah Lake, near Mukwauago, Wis.

A broken leg above the knee was the result of a side fall taken by Mr. Williams, of Morgan & Wright, while riding.

The Washington Heights Wheelmen have taken out incorporation papers and have enrolled over thirty members. Next Sunday a run has been called to New Lenox and the camp-meeting grounds.

Misses Lucy Haggerty and Lucy Porter, of Chicago, surprised the Boston people by riding a century Aug. 16 from Boston to Newburyport, unaccompanied and with a road book as their only guide, in and a half fifteen hours.

The league's prosecution of George Colbeck, the driver who ran down Sam T. White July 16, at Oakley and Chicago avenues, was carried to the bitter end. Colbeck forfeited his bonds twice and skipped the city. Alderman Underhill has the \$600 bonds to pay.

F. Ed. Spooner was unavoidably called out of town and could not be at the full-dress reception tendered in his honor by the Ravenswood Cycling Club, which presented him a large easy chair as a prize for his twenty-four-hour ride. This is all he got for his hard work,

wearing Lincoln colors and none of the Ravenswood's. The latter's colors will be carried in all future contests.

The North Chicago Cycling Club has joined the L. A. W. ranks with over sixty members.

Add another to Chicago's great list of clubs, the Grand Crossing Cycling Club, with a dozen members. President and captain, I. J. Wightman; vice-president and secretary, Frank Jones, treasurer, W. H. Phillips. Two white bars crossed on a white cap is the emblem.

It will be a merry party that leaves Chicago this Saturday evening for Milwaukee on the Goodrich boat. The Lincolns are going to Milwaukee and Waukesha for their Sunday outing, and some are going to Watertown for a century run. The larger body of the wheelmen will spend the day at Waukesha. The Vocophone Band accompanies the party.

They Never Have a Fuss.

George S. Atwater, of the Stover Company's New York house, and Manager Duryea, of the Keating Wheel Company, are very warm friends, and although their stores adjoin not the slightest jealousy exists. Atwater on Friday was showing Duryea a beautiful all-bright polished Phoenix light diamond he had just received and was pointing out its many excellences. The inspection over an alligator hunting trip to Florida was talked of, and the Keating man's poor marksmanship, for Atwater is a good shot.

A Cycling Blind Man.

Two brothers, A. C. and J. B. Robertson, of the Emerald Athletic Club, are enjoying themselves on a tandem through New York state. The interesting point of this item is that J. B. is totally blind, but he revels in the outing and receives devoted attention from his brother.

CHICAGO IN A QUANDARY.

The Chatham Fields Scheme Goes Up—Will We Have a Track?

After all the puff and bluster about World's Fair races and the greatest track and other accommodations on earth, we do not seem to be very near the consummation of our desires; indeed, we are, if anything, a little further off than we were three months ago. At that time the Chatham Field project was sailing along smoothly, and all was well, when suddenly there arose an obstacle in the shape of a rival association. This latter decided its intention to build a track which should outdo that at Chatham Fields, and promised other advantages calculated to win the wheelmen away from their first love.

This didn't suit the Chatham Fields people at all, and rumors commenced to circulate to the effect that they would not build a track.

On top of this came a report that the new association was making promises which it could not fulfill, and it was even hinted that no lease of the ground at Windsor Park, where the track was to be built, has been obtained.

On Monday came definite information concerning the Chatham Fields company. On that day each cycle manufacturer who had guaranteed a subscription to the capital stock received a letter stating that the company found itself obliged to withdraw all offers, and releasing the recipients from all obligations.

On inquiry it developed that the opposition had nothing to do with this action. The facts seem to be that an anticipated extension of the elevated road, by means of which people were expected to be conveyed to the grounds, will not be made, thus leaving the place practically without transportation facilities. The letters, therefore, mean that the entire

Chatham Fields project has been abandoned finally.

Now the question arises, What are we going to do about it? It is not so much a question of what is to be done about a track as where the visitors to the league meet are to be quartered. Some sensible plan must be devised, or Chicago must back down and withdraw its offer to entertain the league. The latter undignified proceeding would never do, and we doubt not will be scouted by every one. The Associated Cycling Clubs of Chicago has formed a committee to look into the stability of the Windsor Park concern, and, as we understand, is not yet ready to report. Here we find ourselves with a committee in communication with foreigners concerning international championships, with no track to run them on, and even when we get one, with the brilliant prospect of scattering our visitors all over the city at the mercy of hotels and mercenary boarding house keepers.

One of the principal men connected with the Windsor Park affair assured us on Tuesday morning that the project was going along as originally outlined despite all reports to the contrary. He admitted that the lease was not yet actually in the hands of the company, but said that five men who own the lease are the principal stockholders. On Monday or Tuesday of next week, this gentleman said, the transfer will have been made, all other details completed, and the management will be in a position to state positively what hotel accommodations it will be able to offer. Until next week, therefore, nothing definite will be known.

Gotham's Cycling Reporters.

The eastern daily papers seem determined to secure cycling news, and what stuff some of it is! Walter Masterson of

RAGLAN CYCLES

.....ARE REPRESENTED BY.....

HARBER BROS. COMPANY,

IN CANADA.

And Manufactured of the Best of Everything by

TAYLOR, COOPER & BEDNELL, LTD.

Raglan Works, - - - COVENTRY, ENGLAND.
LONDON, 33 HOLBORN VIADUCT, E. C.

the *Sun* was an exception, but poor pay or more inducement from that baron of sporting journalists, "Jim" Sullivan of the *Sporting Times*, made Masterson throw up the *Sun* job and devote his entire time to a good boss, who is making a good paper of the *Times*. In Masterson's stead the *Sun* has placed a man of Hebraic cast of features, who, if he don't know anything about cycling, will soon learn (?) if he falls into the hands of such joshers as Frank Egan and Joe Goodman, who loaded the poor devil with tales of Ducker days, making Dana's latest acquisition believe that they were the events of this season. If the *Sun* printed the stuff those two men gave the green reporter, the assertion on the first page of the *Sun*, that "if the *Sun* says so it is so," would be sadly out of place. After a long stuffing the successor of Masterson arose to go (the place was Elliott Mason's office), and he confidentially informed his well wishers that, although he did not know much about cycling, he knew that the Columbia-Victor was the best wheel made—with a patronizing look at Mason, who fell into the waste-paper basket.

Here is another sample of it in the *Press*, but the writer or paster of the *Press* uses more judgment and is evidently a wheelman:

The Wilnots, a team of English trick riders, are on their way to this country in search of American dollars.

The good old smooth-pate, W. D. Wilnot of Boston, one of the earliest trick riders, would smile at being termed an "English trick rider." Although W. D. has been away over six years he must not be accused of coming to America as an Englishman in search of those well-known-to-him American dollars, many of which have passed to him from the Pope Manufacturing Company of Boston.

Here's another example of the daily accuracy in cycling. The *Herald* gravely

announces by cable that "Oxborrow, the English cyclist, on the Coventry, London" (?) "track lowered the mile record 7 2-5 sec., making 2:21 3-5." Is it any wonder the west desires to enlighten Gothamites by sending its special reporters and artists there?

Worse Than the Badge Fiend.

While striving to suppress the badge and ribbon fiend and the sloppily-dressed "what is it?" we are threatened with an infinitely worse thing. Just listen, from a Sunday paper:

A new feature promised for this year's campaign is a political parade of wheelmen arrayed in the colors of their respective parties, carrying the banner of their candidate.

Fancy a parade of cyclists with the banners of Belva Lockwood, General Weaver, Grover Cleveland, etc. This would give the paradiat a chance to get brickbats heaved at him, and a few ancient eggs, by the opposition party. Still, there are plenty of "jays" who will embrace the opportunity for the display of their fool powers.

An Electric Bicycle Carriage.

A trip to the Chicago Bicycle Company's plant on Jackson boulevard, reveals the fact that it is not far behind the times, for it has in process of construction a vehicle, or road carriage, propelled by electricity, and a very beautiful carriage it will be. The rear wheels are thirty-six inches in diameter; front twenty-eight, and are simply a mass of spokes. Morgan & Wright extra heavy tires are fitted. The power is a primary cell electric current, applied through a motor by friction to all the wheels, and capable of running twelve miles an hour for ten hours. It can then be replenished without stopping, as the case with storage batteries has caused great delay. Mr. Atwater, of the company states that a trip to New York could be made with-

out delay on account of the power. The carriage is to be finished in the most approved manner in white enamel, latest model of carriage canopy top, white plush cushions, silk trimmings and electric lights. Its estimated cost is \$5,000.

The company manufacturing this carriage is not the Chicago Bicycle Company, although under the same management, with Mr. Saulsbury as electrician. It has a phaeton in operation at present (much lighter than the one described above), and built only for two persons. It is convertible to a quadricycle by means of detaching the motor, substituting pedals and taking off the seat and canopy. Mr. Atwater has secured space in the World's Fair, where he will give exhibits of the advantages of this conveyance as compared with others of the same nature.

Besieged by Commission Sharks.

Commission sharks infest the New York houses in an unpleasant manner. Some of these gentlemen learn of a friend or acquaintance purchasing a wheel, and forthwith repair to the agent and demand a commission, saying that he had sent So-and-So to buy, telling him that it was the best wheel on the market, etc. Some of the agents give up, but "Pap" Worden came near throwing one down the elevator shaft, the other day, after he had claimed commission on a Remington. The majority of the commission fiends are impecunious amateurs out of a job. Then, again, the hardware or any other merchant expects to be favored with agents' terms if he wants a personal wheel or one for a friend. It is a treat to hear Elliott Mason or Day talk to this class of fiends. One of them had just been refused by Day, recently, when he wandered outside and by some means made a mistake by entering the place again through the warehouse from

the back street, but his confusion was great when he observed that he was in same place, and he skipped immediately.

To Care for Fair Visitors.

W. A. Leonard, Jr., and L. D. Taylor, the incorporators and moving spirits in the National Columbian United Wheelmen's Association, are working earnestly to bring their scheme before the eyes of every cyclist who intends visiting the World's Fair next year. They propose to erect a suitable building within a block or two of the grounds, and this will be fitted up handsomely with parlors, reading-room, sleeping apartments, dining hall, storage room and lockers, baths, and in fact every convenience that a hotel or club house would give. The projectors will issue tickets for storage and a reasonable charge will be made for lodgings and meals, while there will be a full line of attendants to care for things, as well as people to show parties around. Many wheelmen would gladly avail themselves of an opportunity to ride from the city and store their wheels somewhere while visiting the fair, and this association proposes to accommodate such cyclists. Already Messrs. Leonard and Taylor have received the unofficial assurance of many chief consuls that members of their divisions will be only too glad to have such a place to go during a time when the city will be so overrun with people.

The Wheeling (W. Va.) Cyclers are making arrangements for the celebration of their first anniversary, which is on the 5th of next month. The event will be celebrated at night by a ball in Cyclers' Hall, and from all indications the affair will be a success. It will be attended by a goodly number of wheelmen from neighboring towns.

nouncer, W. A. Shockley; mar-hal, Wil-
liam Herrick.

Saturday evening at the C. C. C. house
a special smoker and lunch will be served
to visiting wheelmen and competitors,
when the prizes will be given out.

* * *

Chicago Men Win at South Bend.

The first annual tournament of the
South Bend (Ind.) Cycling Club was held
Saturday, and notwithstanding the track
was three miles from town 1,800 people
attended. A west wind was against the
men on the stretch, but this did not
bother them as did the sandy and dusty
track, which was unridable two feet
from the pole. The morning was de-
voted to sight-seeing, and at 2:15 the
races began. Ballard was overcome by
heat, but was all right by evening.
Rhodes made a splendid showing, win-
ning three open events; Githens did not

Columbia Wheelmen, Chicago. Chicago Cycling
Club, thirty points; Columbia, fourteen points;

ens, J. P. Bliss; Columbia, E. Ulbricht, Fred Nes-
sel, M. Nessel.

Five-mile, handicap—J. P. Bliss, Chicago (100
yards), 1; F. F. Rough, South Bend (400), 2; H. A.
Githens, Chicago (scratch), 3; time, 14:27; Gith-
ens, 14:59 1-4.

Club race, for South Bend Cycling Club men
only—Samuel Rantz (240 yards), 1; J. M. Sing-
erly, Jr. (140), 2; Walter Deffenbaugh (230), 3;
time, 2:48 1-2.

One-mile, consolation race—E. Ulbricht, Chi-
cago, 1; C. W. House, Buchanan, Mich., 2; Paul
Beyer, South Bend, 3; time, 2:50.

* * *

The Lake View "Dub" Race.

The Lake View Cycling Club's non-
riders and "dub" riders, men who never
raced, run quite a pretty mile scratch
contest at Thorndale on a smooth
stretch of macadam. Misch shot across
the tape a second ahead of Troop in 3:44,
Ford third, Wagner fourth, and Gardi-
ner fifth. The latter was favorite, and
is the young man who says he will ride
twenty-four hours.

* * *

Lincoln C. C. Road Race.

The fourth annual ten-mile road race
of the Lincoln C. C. was held Saturday,

Southern won in 32.47. Bray secured
the time prize in 21:35.

* * *

Englewood's Annual Road Race.

The Englewood C. C. road race Satur-
day, from Morgan Park to the club
house, Seventieth street, was won by C.
H. Peck from the one-minute mark.
Peck also won the time prize in 23:33,
but Winship's tire punctured half way
out and he was forced to take a buggy
home. The finish was in the following
order:

Name.	H'd'c'p.	Time
C. H. Peck.....	1 min.	23:33
H. T. Pyle.....	1 1-2 min.	23:23
George Emerson.....	1 1-4 "	23:17

The Hartford Tournament.

The arrangements for the big meet at
Hartford Sept. 5 and 6 are completed,
and it is claimed that it will be one of
the most attractive tournaments of the

At Parkside Next Friday and Saturday.

Indications point to a most successful
race meeting at Parkside Friday and
Saturday, and although Zimmerman,
Windle, Tyler, Taylor and Berlo will not
be there, the Chicago Cycling Club's
races will be contested by such men as
Munger, Sanger, Andrae, Price, Lums-
den, Githens, Bliss, Van Sicklen, Rhodes,
Johnson, Davis, Ballard, Winship, Bode,
Thorne and lesser lights in the racing
world. The racing will be better than
if the eastern cracks were here, for the
finishes will be close and exciting, many
of the men being almost evenly matched.
It will not be a surprise if the mile rec-
ord in competition goes, either, for only
this week Sanger has made a mile in
2:19; Githens, 2:22 4-5; Bliss, 2:24, while
others have done some remarkably fast
work. There will be some frightfully
hot finishes, indeed.

THE TRACK IN GOOD SHAPE.

The track is evidently in good shape
and fast, for such times could not be
made under any other circumstances.
The turns have been torn up somewhat
and almost entirely rebuilt, having now
a thick coating of cement, hard and
smooth. The stretches were always
good and there is every reason to believe
fast time will be made.

RACES BEGIN AT 2 P. M.

Owing to the large entry list there
will be several heats in some events, five
in the half-mile handicap, and as a con-
sequence the races will begin at 2
o'clock sharp. No one is to be permitted
in the enclosure except the race officials
and the C. C. C. band of sixteen pieces,
the members of which will be in their
new cyclists' uniforms.

PROGRAMME AND PRIZES.

The programme for the two days and
the prize list is as follows:

- One-mile, novice—Gold medal, valued at \$25; silver medal, \$15.
- Half-mile, handicap—Humber cup, \$50; \$25 worth of merchandise.
- Two-mile, team—Tilting silver water set, \$50; large pneumatic pump.
- One-mile, scratch—Diamond pin, \$75; silver stop watch.
- Three-mile, handicap—Victor pneumatic; Morgan & Wright prize; cyclists' suit, \$15.
- Half-mile, scratch—Roll top office desk, \$75; piano lamp.
- Five-mile, handicap—Relay Columbia; cyclists' complete outfit, \$30; Knox hat.
- Quarter-mile, scratch—Pairpoint cup, \$50; silver chronograph.
- One-mile, three-minute class—Gold medal, \$25; silver medal, \$15.
- Two-mile, scratch—The Chicago Mail's trip to Springfield, Mass., and \$25 medal; silver desert set, \$25.
- One-mile, handicap—Imperial pneumatic; silver punch bowl, tray, ladel and cup.
- Three-mile, ordinary—Medal, \$50 silver desert set, \$25.
- One-mile, boys—Medal, \$15; medal, \$10.
- Five-mile, invitation, handicap—Walker cup (now held by C. T. Knisely, to be won three times to be property of winner) valued at \$500; carving set, \$25; silver soup ladel, \$15; billiard cue, \$10; silver cigar case \$5.

THE OFFICIALS.

The following officials have been se-
lected: Referee, T. F. Sheridan; judges,
R. D. Garden, W. F. Tuttle, W. A. White-
lie; timers, M. A. Hosford, S. A. Miles,
W. C. Thorne; clerk, W. C. Anderson;
starter, L. W. Conkling; scorers, R. O.
Forrest, John Gano, F. H. Turtle; an-

SPRINGFIELD, MASS., RACING TEAM.

do as well as he might have, but Bliss
proved a dangerous man, winning the
five-mile handicap from 100 yards. Van
Sicklen broke his wheel and "that C.C.C.
team" was there to gobble the team race.
The races were well contested, resulting
as follows:

One-mile, novice—Martin Nessel, Chicago, 1; H.
Rough, South Bend, 2; Samuel Kantz, South Bend,
3; time, 3:10 1-4.

Quarter-mile, open—W. A. Rhodes, Chicago, 1;
F. F. Rough, South Bend, 2; E. W. Ballard, Chi-
cago, 3; time, :38 3-4.

Half-mile, handicap—F. F. Rough, South Bend
(ninety-five yards), 1; J. E. Lonn, Laporte (100
yards), 2; W. B. Inks, Ligonier, Ind. (80 yards), 3;
time, 1:11 1-4.

One-mile, open—W. A. Rhodes, Chicago, 1; F.
F. Rough, South Bend, 2; J. P. Bliss, Chicago, 3;
time, 2:54 3-4.

Two-mile, handicap—H. L. Hull, South Bend
(350 yards), 1; F. F. Rough (180), 2; J. E. Lonn,
Laporte (400), 3; time, 5:29 1-2.

Boys' race, fifteen years and under—L. G. Platt,
Niles, 1; A. C. Colburn, South Bend, 2; Roy Urqu-
hart, South Bend, 3; time, 1:31.

One-mile, handicap—J. M. Singler, Jr., South
Bend (300 yards), 1; F. F. Rough, South Bend
(100), 2; J. E. Lonn, Laporte (180) 3; H. A. Gith-
ens, 4; time, 2:33 1-2.

Half-mile, open—W. A. Rhodes, Chicago, 1; H.
A. Githens, Chicago, 2; Fred Nessel, Chicago, 3;
time, 1:15 1-4. Won by twenty yards.

Team race, one-mile, open—Three entries: South
Bend Cycling Club, Chicago Cycling Club and

Tom Haywood winning first place and
Joe Stillwell the time. The start was
made at North Halsted street and Bel-
mont avenue, through Edgewater and
back, finishing at Grant's monument in
Lincoln Park, where a large crowd had
gathered to see the race. Morrison broke
his wheel by a fall, else he might have
made up the eighteen seconds on Still-
man and won the time prize. The men
finished in the following order.

Name.	H'd'c'p.	Time.
A. T. Heywood.....	2 30	31 10
J. W. Adams.....	3	21 31
J. Ollier.....	3 30	33 34
V. Ollier.....	2 30	32 56
J. S. Stillwell.....	scratch.	30 52
T. V. S. Morrison.....	scratch.	31 10
C. O. Jones.....	3 30	34 49
D. B. Southern.....	scratch	31 22
M. E. Loescher.....	1	24 08
R. W. Slusser.....	2	36 09
J. H. Thiele.....	5	39 33
A. H. Radell.....	2 30	37 08 1-2

The first race of the Lincoln club was
in 1886. McVoy, with a five minute
handicap won in 36:15, while Spooner
won the time in 32:32. The 1890 race
was won by McMahon, Spooner again
making the best time. Aug. 15, 1891
was the date of the third race, which

year. It is worthy of remark that this
will be the ninth consecutive annual fall
tournament at Hartford, a record which
we doubt if any other city in the country
can boast of. It will be remembered
that tournament cycling got a "black
eye" in the year of "proamateurism"
(1886), and nearly all the clubs which had
been holding tournaments dropped them
the following year. One exception was
the Hartford Wheel Club, which "stood
in the breach" and held the only big
tournament in 1887, and by its action
assisted a great deal to restore confidence
and put the sport once more on its feet,
so to speak. This fact has perhaps been
overlooked by many in the flight of time,
but it will not be forgotten by those who
were then and are now actively interest-
ed in making the sport of cycling the
leading and the cleanest of all out-door
amusements.

The officials at the tournaments have
always been men of experience and rep-
utation, and this year is no exception, as
will be seen by the list we give below:
Referee, Colonel Charles L. Burdett,
president L. A. W.; judges, Abbott Bas-
sett, secretary-treasurer L. A. W.; H. E.
Raymond, chairman racing board L. A.

THE TOURIST.

The Highest Grade Bicycle in the World. Perfect in Material, Construction and Finish.

Made at Colt's West Armory, Hartford, Conn., under the same system and with the same attention to detail followed in the manufacture of Colt's fine fire arms. Gun steel forgings; all cones and bearing cups cut from the bar, not stamped.

WEIGHT: { Road Racer, 34 lbs., } PRICE, \$150
 { Roadster, 42 lbs., }

Fitted with BIDWELL (THOMAS) PNEUMATIC TIRES, guaranteed against puncture, bursting and leakage.

A GENUINE NOVELTY.

THE TOURIST BALL-BEARING LAMP WITH EQUIPOISE BRACKET.

THE MOST PERFECT LAMP MADE

WILLIAM BOWN, BIRMINGHAM, ENGLAND, Manufacturer.

A Few of its Strong Points

- Ball-Bearing Bracket.
- Ball-Bearing Equipoise Attachment, preventing the spilling of oil.
- Double Convex Lens.
- Salsbury Non-Breakable Side Lights.
- Detachable Top, Bottom and Reflector.

BIDWELL-THOMAS

★ RACING TIRES ★

We Have Said

In some of our past advertisements that if racing men who are constantly being beaten by a few yards, feet or inches, would ride Bidwell Racing Tires they would be Winners. A great many have accepted our advice and now there are more Bidwell Tires in use on the path than all others put together.

A FEW CHOICE EVENTS. _____

May 30,	Worcester, Mass.,	1st 4 times.
" 30,	Manhattan Field,	1st 2 "
June 6,	New Haven,	1 Mile Safety.
" 6,	" "	1/2 Mile H'dcap.
" 4,	Cambridge,	1 Mile Scratch.
" 4,	Philadelphia, 1/2 and 1	" "
" 13,	Cortland, N. Y.,	1 " "
		2 " Lap.
		1/2 " Scratch.
		1 " H'dcap.
" 17,	Buffalo,	1st 3 times.
" 21-22,	Scranton,	1st 4 "

Three out of four New Jersey State Championships. At Washington, 4 firsts, 2 seconds, on the first day.

Also at Orange, June 25th; Cleveland, June 22nd; Vineland, June 28th; Asbury Park, June 30th; Patterson, July 2nd; Hartford, July 4th. They were first in each place several times.

Finally, Frank Waller at Oakland, Cal., rode 363 miles in 24 hours on a Bidwell-Thomas Pneumatic.

GEO. R. BIDWELL CYCLE CO.,

*306, 308 and 310 West 59th Street,
NEW YORK.*

Tire Factory, 49-51 West 66th Street, New York.

W.; F. P. Prial, editor of *Wheel*; timers, General Alexander Harrison, J. P. Allen, president Gentlemen's Driving Club; Leander Hall, treasurer Charter Oak Park; starter, T. W. Fahy, H. W. C.; announcer, W. C. Marion, H. W. C.; grand marshal, William Herrick, Chicago. Entries are coming in fast, which is not surprising, as the prize list is an exceptionally good one.

All the fast men are expected to ride in the "invitation mile," and the prizes for this race warrant it, the first prize being a Hallet & Davis cabinet grand piano, listed at \$900. The second prize is a tourist pneumatic safety, \$150, and the

The Baltimore Track.

third prize a silver split second watch, at \$50. Entry blanks and the souvenir programme may be had on application to L. P. Broadhurst, secretary, P. O. box 255, Hartford, Conn.

Good Racing at Philadelphia.

On Saturday afternoon last the Pennsylvania Bicycle Club ran off the club races which were postponed from the big meet of July 23, and a few open events were added to make up an afternoon's programme. Following are the results:

One-mile, Pennsylvania club championship—Frank Nelms, 1; B. P. McDaniel, 2; G. F. Wiese, 3; time, 2:59.

One-mile, open—H. L. Reeles, Park Avenue Wheelmen, 1; F. Nelms, Pennsylvania, 2; H. C. Beebe, Westchester Wheelmen, 3; time, 3:36 1-5.

One-mile, open, handicap—Mercury Wheelmen—M. Meredith, scratch, 1; F. Pace, 20 yds., 2; C. Bryant, 19 yds., 3; time, 3:02 3-5.

Mile, open, handicap—prize, silver cup—H. T. Wunder, 40 yds., 1; G. M. Coates, U. of Pa., 90 yds., 2; A. A. Gracio, Columbia Cyclers, 45 yds., 3; time, 2:30.

Mile, championship of Mercury Wheelmen—M. Meredith, 1; G. M. Pace, 2; M. Kridham, 3; time, 3:02.

Special match race, handicap—Henry Mayer, Pennsylvania B. C., 200 yds., 1; G. S. Bell, Jr., Pennsylvania B. C., scratch, 2; time, 2:52 3-5.

Mile, open, scratch, 2:50 class—F. Nelms, 1; V. J. Kelly, A. C. S. N., 2; J. F. Cope, Norristown B. C., 3; time, 2:50 1-5.

Mile, handicap—F. Nelms, P. B. C., scratch, 1; B. F. McDaniel, P. B. C., scratch, 2; G. F. Wiese, P. B. C., 50 yds., 3; H. Mayer, P. B. C., 10 yds., 4; time, 2:54 4-5.

Five-mile, handicap—B. F. McDaniel, 1; T. J. S. Byrne (2 min. 30 sec.), 2; G. Mershon (2 min.), 3; time, 19:04 4-5.

More Victims for Thorne.

The Englewood Y. M. C. A. held its annual field day Saturday at Parkside, and though no sanction had been granted several bicycle races were held, resulting as follows:

Half-mile scratch—Charles Hunt, 1; Harry Hodden, 2; time, 1:27.

One-mile, safety—Harry Hodden, 1; Ralph Sutherland, 2; time, 3:05.

Five-mile, scratch—Harry Hodden, 1; Ralph Sutherland, 3; time, 17:15.

Races at Batavia.

At Batavia N. Y., Thursday was held the first annual tournament given by the wheelmen of that place. The weather was just glorious and the attendance good. Of course there were many mistakes, but every one enjoyed himself and the events were run off in good shape. The plow boys' race was one of the features of the occasion, and the winner, who rode a Star ordinary, came down the quarter stretch on a regular

Zimmerman spurt. The summaries:

Half-mile, handicap, open—J. W. Linneman, P. C. C., 100 yds., 1; W. Le Messurier, G. B. C., 50 yds., 2; A. T. Crooks, A. B. C., 30 yds., 3; time, 1:06.

One-mile, safety, Batavia riders—W. F. Woodruff, Z. C., 1; G. H. Terry, 2; E. H. Gamble, 3; time, 2:50 3-4.

Half-mile, boys', open—Al Heghes, Rochester, 1; Joseph Dorntge, Buffalo, 2; Willie Fewman, Akron, 3; time, 1:22 1-4.

One-mile, novice—J. W. Linneman, 1; A. Schmidt, B. A. C., 2; B. C. Betner, G. C., 3; time, 2:43 3-5.

Half-mile, ordinary, open—C. J. Conolly, R. A. C., 1; C. E. Husted, L. C., 2; time, 1:35. Only two started.

Two-mile, championship, open to Genesee County—F. P. McGrady, L. C., 1; George H. Terry, B. W., 2; E. F. Ackus, Z. C., 3; time, 6:22 3-4.

Three-mile lap race, open—G. A. Banker, Pittsburgh, 31 points; C. H. Callahan, P. C. C., 31 points; W. Le Messurier, G. B. C.; time, 8:44 1-2. Banker won the toss and secured first prize.

Half-mile, sa'ety, championship Rochester vs. Buffalo—C. H. Callahan, P. C. C., 1; W. Le Messurier, G. B. C., 2; W. D. Banker, B. A. C., 3; time, 1:17 1-2.

Half-mile, plow boys' race, open to rural cyclists—Ernst Bratt, 1; Frank Bratt, 2; Ed Ahl, 3.

The Park Avenue's Road Race.

The annual five-mile handicap road race of the Park Avenue Wheelmen was

The Baltimore Track.

contested Saturday over the Montgomery avenue course, twenty men taking part. Much disappointment was caused by the non-appearance of S. Herbert Bilyeu, the only scratch man, owing to sickness. Bilyeu made a world's record in the same event last year, and as all conditions were favorable it was believed that he could put it a notch lower. The men crossed the tape in the following order:

Name	H'd'c'p.	Time
Schissa	3 15	15 36
Wilbour	2 15	15 06
W. Bilyeu	1 15	14 07
Schwank	1 45	14 40
Thomas	1 45	14 40
Freeman	2	15 07
Gill	1 15	14 38
Emery, Jr.	3	16 27
W. J. Devlin	3	16 28
Oakford	2 03	15 49
Bair	1 45	15 28
Hatcher	2 15	16 03
Douglas	2 15	16 11
Kendrick	2 45	16 45
Bunnell	3	17 24
L. W. Thompson	3 15	17 44
Bishop	2	16 38
Pierson	2	19 19
Wright	2 15	18 29
Nwack	3 15	19 33

Walter Bilyeu was awarded prize for fastest time. Draper and Donnelly attempted to break the tandem road record, but starting a minute behind scratch failed to catch the field in time for proper pacing, and made the distance in 13:20.

A Road Race at DeKalb, Ill.

The first handicap road race of the DeKalb (Ill.) Cycling Club was held last Saturday over a four-mile course, part of which was very rough. There were seven starters out of sixteen entries. George Halloran won, making the course in 17 min. George A. Leonard, Kenwood Road Club, Chicago, made the best

time, 16 min. The club is making arrangements for a tournament in the near future, when valuable prizes will be offered. Although having been in existence only two months, it has already a membership of thirty-six and is still growing. Its captain is Charles W. Garner, who has done much to increase the popularity of the club by his able management of runs and tours.

Woolas Won the Time.

The Oak Park course from Fortieth street west, was the scene of the Minnette club's second ten-mile handicap race this season, held Saturday. J. B. Woolas, winner of this year's Pullman, went from scratch to seventh place, capturing the time medal in 30:50. A good-sized crowd witnessed the contest. The summary is as follows:

Name	H'd'c'p.	Time
Geo. Edmunds	7:00	35:00
H. S. Smith	7:00	35:30
Soderstrom	7:00	35:50
J. J. Mundy	6:00	35:25
J. E. Hudson	3:00	33:10
J. R. Reed	8:00	38:24
J. B. Woolas	Scratch	30:50
F. B. Whitlock	2:00	33:40
Geo. W. Cutter	4:30	36:45
F. S. Crocker	3:00	35:30
A. Atchison	6:00	38:33

The Western Circuit.

The tournament managers, H. G. Rouse, Peoria; W. C. Paine, Evansville, Ind.; H. B. Tileston, Louisville, Ky.; Arthur D. Black, Jacksonville, Ill.; Miles and Young, Chicago, met at the Palmer House to discuss the feasibility of including Chicago in the western circuit this year. The circuit as arranged at present will take in Peoria Sept. 27; Louisville, Sept. 29 and 30; Jacksonville, Oct. 3 and 4; Evansville, Oct. 6 and 7. These dates must be rearranged if Chicago gives another tournament, but following so closely upon the Chicago Cycling Club's meet of this week, it is probable that

The Baltimore Track.

Chicago will be left out. The above cities offer prizes the value of which is as follows: Peoria, \$2,500; Jacksonville, \$3,500; Louisville, \$2,500; Evansville, \$2,500, making a grand total of \$11,000 worth of prizes, such as will attract the best racing men in the country. Arrangements have been made with the railroads for trains along the circuit, and special inducements are offered for the eastern cracks. Zimmerman has declared to appear at Peoria, and will most likely stay for some of the other valuable "pots."

The Ashland Club's Races.

The Ashland Cycling Club had four handicaps scheduled for last Saturday over the Washington boulevard course. Owing to the Minnette Club wishing to use the road the four-mile race was postponed until Sept. 3, when F. T. Fowler and G. L. Walker are matched for a mile race, and A. C. Fordham will concede F. W. Hall eight yards for a quarter-mile race. F. W. Hall, 22 yards, won the half-mile, handicap; G. L. Walker, 22 yards, second; A. L. Hurdle, 28 yards, third; A. C. Fordham, scratch, fourth. This was against the wind and slow in

time. The one mile, handicap, was won by F. T. Fowler, by an inch, from G. L. Walker, with F. W. Hall an inch behind all fifty-five yard men. C. A. Patterson, scratch, was fourth.

Von Gould captured the quarter-mile, handicap, from the two yard mark; F. W. Hall, eight yards, second; A. C. Fordham, scratch, third, and G. L. Walker, eight yards, fourth.

Louisville Getting Ready.

H. B. Tileston, representing the Louisville Cycle Club, was in Chicago in the interest of its big tournament, to be held Thursday and Friday nights, Sept. 29 and 30. Some one has raised the question as to their track being unsafe, but Mr. Tileston declares that it is positively safe, being scientifically banked and built exclusively for bicycle riding. The value of the prizes, \$2,500, is actual, including a piano, seven high grade bicycles, etc. A feature will be the perfect way in which the track is lighted by electricity. Entries made to W. W. Watts, Louisville, Ky.

Milwaukee Race Chat.

Terry Andrae is looming up again in racing circles, and his latest achievement is a mile in 2:34. Charlie Price recently encircled the National Park track in 2:31.

The Mercury Cycling Club seemingly labors under the delusion that it is greater than the powers that be. It has a duly elected handicapper in the person of a club member, William Giller, who officiates on all occasions.

The much talked of race between Don A. Dodge and Gus Simmerling, for a prize of the value of \$25, to be paid for by the loser, has been decided off.

A Road Race at Milwaukee.

The principal event during the past week in Milwaukee was the road race of the North Side Cycling Club, which has been the talk of that section of the city for months past. The racing board distinguished itself with honor in providing some twenty-seven prizes of real merit. As there were only twenty-five entries everybody felt repaid for his long, dusty ride. The course was from Thiensville to Williamsburg, a suburb of Milwaukee, and covered a distance of eleven and three-fourths miles. About 1,000 people witnessed the finish. The race was won by R. Koros, with a four-minute handicap; time, 45:08. Hugo Miswinkle captured the time medal with two minutes

The Baltimore Track.

handicap; time, 42:45. A. C. Billenbeck, the only scratch man in the race, finished in fourteenth place, riding the course with a deflated tire in 44:48. If he had not had the accident he would no doubt have won the race and the time prize. The race created no end of excitement in that section of the city, and will add many to the ranks of the North Side Cycling Club. It will be hereafter a yearly event.

Leonhardt Won From Scratch.

On the Lake View course the Calumet Cycling Club's five-mile handicap road race was held Sunday morning. A. Leon-

hardt captured first place and time medal, from scratch, in a field of a dozen starters. The lad made good time—14:58. He expects to go for the five-mile American road record Saturday, Sept. 3. The summary follows:

Name.	H'd'e'p.	Time.
A. L. Leonhardt.....	Scratch	14:58
H. C. Jacob.....	0:45	15:41
W. C. Jacob.....	1:15	16:15
W. Lünehall.....	1:15	18:10
G. L. Hermann.....	0:45	16:49
H. Ambros.....	1:15	17:19
W. Witt.....	2:15	18:38
R. A. Hahn.....	2:30	18:47
C. F. Alsop.....	2:30	19:03
C. Curtis.....	2:45	19:18
E. Bonn.....	3:00	20:04

* * *

Zimmerman at Buffalo.

BUFFALO, Aug. 22.—Although both were competitors in the exposition races Saturday, Zimmerman and Taylor did not meet; but the latter made a new record for the mile in competition, doing 2:21 2-5, being three-fifths of a second better than Munger's record. Zimmerman also rode a mile inside Munger's record, doing 2:21 3-5. There were other good men here—Munger, Banker, Hess, Campbell, Hyslop, Dornitge and Wheeler.

People to the number of 15,000 went out to the fair on purpose to see these fast men, but when they got to the track there were no accommodations for them; no seats or grand stand, so they were obliged to scatter all along both sides of the track and make the best of the circumstances. There they stood, four, five and six deep in some places; but what could they see? After a while a large mass of these people, to the number of 5,000, quitted the track in disgust and swarmed across the mile track, where the horse races were being run, preventing all racing at that point for the time being. It was intended that the bicycle races should be a special feature of the day, and that seats of the Zeigler pattern should be erected, and enough of them, to accommodate all, but owing to some mistaken idea there was nothing of the kind done and the races were nothing, in fact, than a side show. Nor were the officials and press in any way better cared for, as both were accommodated on the track, and for this reason also it was impossible to time any of the fast quarters.

All the arrangements for this event, up to the time of going to the track, were perfect, and if the suggestions of the cycling association had been carried out there would have been any amount of enthusiasm and no disappointment. As it was, there was an entire lack of all that fire and electric touch so characteristic of all race meets. How was it possible to become excited when they had been standing for three or four hours? Yes, and longer, for it was 1:30 p. m. when the racing began and 5:45 p. m. when the last race was finished, and then there were two on the programme which were not called. The summaries follow:

One-mile, safety, novice—First heat—G. W. Sugnel, Ramblers B. C., 1; G. F. Englehart, Comrades C. C., 2; W. Naab, Wanderers B. C., 3; time, 2:48 1-2.

Second heat—F. A. Foell, Comrades C. C., 1; C. Hitchcock, Iriquois A. C., 2; F. P. Fetes, Buffalo A. C., 3; time, 2:48 1-5.

Final—Frank P. Fetes, Buffalo A. C., 1; William Naab, Wanderers B. C., 2; C. Hitchcock, Iriquois A. C., 3; time, 2:21 2-5.

One-mile, safety, handicap—First heat—G. F. Taylor, M. A. C., scratch, 1; E. F. Weining, Ramblers C. C., 150 yards, 2; G. A. Banker, E. A. C., 30 yards, 3; time, 2:21 2-5.

Second heat—A. T. Crooks, Buffalo A. C., 70 yards, 1; W. H. Mulliken, Baltimore C. C., 100 yards, 2; T. G. Servis, Rochester A. C., 3; time, 2:23.

Final—E. F. Weining, Ramblers B. C., 1; A. T. Crooks, Buffalo A. C., 2; J. W. Linnerman, P. C. C., 3; time, 2:37 1-5.

Two-mile, tandem—W. F. Buse and mate, Rambler B. C., 1; C. W. Dornitge and W. Penseysers, 2;

Zimmerman and Brinker started but broke down near the quarter pole; time, 4:59.

One-mile, 3:10 class—First heat—H. P. Werner, P. C. C., 1; J. W. Linnerman, P. C. C., 2; N. Mader, Comrades C. C., 3; time, 2:40 1-5.

Second heat—L. A. Callahan, P. C. C., 1; Phil Bernhardt, Iriquois A. C., 2; L. Noeller, A. P. C. W., 3; time, 2:41 2-5.

Third heat—W. G. Schack, Ramblers B. C., 1; F. W. Julier, B. A. C., 2; H. J. Wittle, B. A. C., 3; time, 2:50.

Final—L. Noeller, A. P. C. W., 1; Phil Bernhardt, Iriquois A. C., 2; W. G. Schack, Ramblers B. C., 3; time, 2:37 1-5.

Half-mile, closed—C. H. Callahan, P. C. C., 1; W. B. Banker, B. A. C., 2; A. T. Brooks, Buffalo A. C., 3; time, 1:11 1-5.

One-mile, flying start—First heat—A. A. Zimmerman, N. Y. A. C., 1; L. D. Munger, Chicago C. C., 2; H. C. Wheeler, M. A. C., 3; time, 2:53 2-5.

Second heat—G. M. Wells, Toronto B. C., 1; W. Hyslop, Toronto B. C., 2; C. W. Dornitge, B. A. C., 3; time, 2:47 3-5.

Final—A. A. Zimmerman, N. Y. A. C., 1; L. D. Munger, Chicago C. C., 2; H. C. Wheeler, M. A. C., 3; time, 2:21 3-5.

One-mile, handicap—A. T. Crooks, B. A. C., 1; W. F. Buse, Ramblers C. C., 2; J. W. Zimmerman, P. C. C., 3; time, 2:24.

Half-mile—G. F. Taylor, M. A. C., 1; G. A. Banker, M. A. C., 2; H. C. Wheeler, M. A. C., 3; time, 1:11 4-5.

Three-mile, lap, race—A. A. Zimmerman, N. Y. A. C., 1; L. D. Munger, Chicago C. C., 2; C. W. Dornitge, B. A. C., 3; time, 8:45.

der the head of the present exposition management.

Several Rochester, N. Y., Races.

Charles Grashof last Thursday evening won the fifth of a series of Ramblers' road races to Charlotte and return, distance thirteen miles. The limit man started at 6:35 o'clock, and Grashof eight minutes and five seconds later. The time at the finish follows: Grashof, scratch, 7:23:45; Zimmerman, allowed five minutes, 7:23:50; Kelly, allowed two minutes and thirty-two seconds, 7:23:32; Dukelow, allowed one minute and forty seconds, 7:23:54; Van Houten, allowed six minutes and twenty-five seconds, 7:24:20; Hewett, allowed eight minutes and five seconds, 7:31:50. The times of the riders were: Grashof, 40 min. 40 sec.; Zimmerman, 45 min. 43 sec.; Kelly, 43 min. 19 sec.; Hewett, 56 min. 50 sec.

The first of a series of six road races for a high grade wheel took place last Friday evening among the members of the Genesee club. The course was out the Buffalo road six miles and return. Going out a strong wind was in the face

time, 32 3-5 sec. Zimmerman protested the race on the ground of Johnson's starting before the word had been given and the protest was allowed. John-on refused to ride the race over.

The two-mile handicap was won by Sanger from scratch in 5:10 3-5, Hyslop, 160 yards, second, and Herrick, 125 yards, third.

* * *

Berlo Breaks the Two-Mile Record.

SPRINGFIELD, Mass., Aug. 24.—(Special)—This afternoon at Hampden Park, P. J. Berlo broke Taylor's two-mile record of 4:48 4-5, made here last year, doing 4:48 2-5. He was paced by McDuffee, Tyler, Nelson, Connolly and Roberts, and timed by Bryan, McGarrett and Whipple. The half was made in 1:11; mile, 2:21 3-5; mile and a half, 3:36 1-5; two miles, 4:48 2-5. There was a slight breeze but the sky was clear. The pacing was exceedingly bad, else better time might have been made.

A. O. MCGARRETT.

* * *

The Kings County Road Race.

The Kings County Wheelmen held their annual fifteen-mile handicap road race over the Elizabeth-Crawford course, N. J., last Saturday. A mere handful of spectators testified that road racing is in the wane, notwithstanding the popularity of the club that gave the event. The first three men finished as follows: C. M. Murphy (scratch), first, time 44 min. 20 sec.; U. S. Page (2 1-2 min.), second, time 44 min. 29 sec.; F. Hawley (scratch) third, time 46 min. 59 sec. C. M. Murphy rode a good race and rather surprised the rest, who looked upon Hawley as the possible winner.

* * *

Another Baltimore Meet—The Track.

Baltimore intends, on the 21st of September, to outdo in all respects the tournament held on the new track directly after the league meet. Every one who was fortunate enough to be present on that occasion went home with the greatest respect for the Baltimore men both as race promoters and entertainers. In the latter capacity they were previously famous, but the city had lacked racing facilities. The result of their meeting proved, however, that they had used every effort to provide a track fit for record-breaking performances, for on it four tandem records were broken, a fact impossible of accomplishment except on a well-banked and scientifically-constructed track.

Attracted by the success of the last meet, nearly all of the best eastern men, at least, will be in attendance. The prize list is not yet complete, but the management assures us it will be a fine one and worthy the efforts of the best men.

The Baltimore track is a quarter-mile in circumference, admirably drained and banked and as well kept. No fault whatever could be found with its condition in July. We present a number of views, which will give a fair idea of its appearance.

* * *

The Columbus Tournament.

The Columbus Cycling Club tournament to be held on Labor day will undoubtedly be the largest and most interesting meeting ever held in this part of the country. The efforts of those who have worked so hard to make it so have been crowned with success, and everything is smooth sailing now. The track is in excellent condition and there is no reason why the one-mile record in competition should not be broken. It is banked seven feet at the ends, and the home stretch is wide enough for twenty-five starters. The large number and valuable prizes will unquestionably at-

In scoring, Zimmerman was first every lap, Munger second and Dornitge third.

Two-mile, team, race—Buffalo A. C., Dornitge, 22, Crooks 19, Banker 19. Ramblers—Buse 12, Weining 8, Fuhrman 4.

One-mile, ordinary—W. S. Campbell, M. A. C., 1; F. E. Page, M. C. C., Medina, N. Y., 2; G. Holloway, unattached, 3; time, 2:45 3-5.

Several men were injured in the half-mile race by falling. Just at the quarter pole Munger tried to cut in between a competitor and the fence. He collided with one of the riders and several of them fell. Carl Hess sustained a broken wrist and was otherwise injured. Wells of Toronto was badly bruised. Insley of the Oneida B. C. was cut about the legs. Palmer and Munger were also hurt.

There was a banquet at the Tift in the evening, but for some reason it was not a success, the attendance of representative men from the different wheel clubs being poor, there being about fifty all told. Stories were told by S. G. Whitaker and Dan Canary, and remarks were made by D. H. Lewis, Jack Wesley and some others. To-night, at the B. A. C., the prizes will be distributed, and that ends the work of the Buffalo Cycling Exposition Association, and if they ever attempt any more work under similar circumstances it will not be un-

der the riders; still, the time of the scratch man, William Le Messurier, was very fast, he covering the distance in less than thirty-eight minutes. George McTaggart, with five minutes, was first, C. J. Owen second, M. Smith third, Le Messurier fourth, L. Davis, fifth, Charles Penny sixth, G. S. Montgomery seventh and George Montgomery eighth.

Tuesday, Aug. 30, the annual field day of the Crescent Cycle Club will be held on Colonel E. B. Parson's half-mile track in Brighton. The racing events include a half mile, handicap; club championship, luck race; one-mile, handicap; slow race; three-mile, lap race; one-mile, consolation.

* * *

Rain Interfered At Detroit.

DETROIT, Mich., Aug. 24.—(Special).—The rain, which fell heavily, spoiled today's racing, though some events were held; the remainder will be run to-morrow. Reaume won the novice race in 2:48 3-5, and Peterson the Detroit Wheelmen's handicap in 2:37 3-5, from 125 yards. Zimmerman, Munger, Sanger and Johnson, of Cleveland, started in the quarter-mile, and Johnson finished first, Zimmerman second and Sanger third;

SOME of our friends have suggested that our Pneumatic Tires ought to have a brand to distinguish them from others. We have long desired a coat of arms, or something which would prove to the world that we were bigger than most anybody else. After some considerable night thought we have evolved the accompanying design and offer it for approval.

We also add to list of work and records made on Morgan & Wright Pneumatic Tires.

A Fair Field, No Favor,

And May the Best Man Win !

The work performed on the MORGAN & WRIGHT Pneumatic Tire proves that it has adequate durability and speed. We add this week the record made in Milwaukee-Waukesha race, and others, and shall be glad to add to the list when our friends see fit to favor us.

We beg leave to offer the following records. The list is incomplete and may contain some errors. We shall be happy to correct and add to the list, if our friends will kindly send us the proper data:

MORGAN & WRIGHT,

MANUFACTURERS OF RUBBER GOODS,

331-339 West Lake Street,

CHICAGO.

tract the fastest men in the country. Already we have entries from some of the fastest—Berlo and Carl Hess, of the Manhattan Athletic Club; Arthur Lumsden and Ballard, of Chicago; Sanger and Wegner of Milwaukee; Christ of Tonawanda, N. Y., and several race teams, besides individuals from many of the minor cities. There will be excursion rates on all roads, and the Columbus boys assure a royal welcome to all the visitors, and wheelmen especially.

ARION.

The Penn Wheelmen's Programme.

The third annual tournament of the Penn Wheelmen, Reading, Pa., will be given Thursday, Sept. 27, with the following list of events: Ten-mile road race, handicap; one-mile, novice; half-mile, open; One-mile, 3:10 class; one-mile, championship of Reading; one-mile, handicap; one-mile, 2:40 class; quarter-mile, open; one-mile, ordinary, handicap; one-mile, open; one-mile tandem, handicap; one-mile, championship Penn Wheelmen. Handsome prizes are promised and abundant entertainment for racing men and other visiting wheelmen.

Some Future Race Meets.

The Bethlehem (Pa.) Y. M. C. A. holds a ten-mile road race to-morrow.

The Fort Smith (Ark.) Wheelmen intend giving a tournament this fall.

The Columbia Athletic Club of Fargo, N. D., gives a mile cycle race in connection with its Labor day programme.

The Buckeye Cyclers of Springfield, O., will hold a race meet at the fair Sept. 16. About one dozen prizes will be offered, one for the championship of Clark County.

Owing to the lateness of the season the road race which was to have been given by Studley & Barclay Sept. 5 has been postponed. It will probably be given in the spring.

The Mobile Athletic Association has decided to hold another series of bicycle races on Sept. 9. There will be three championships, half, one and two miles, and several open and handicap events.

Three bicycle races, one a half-mile, another a quarter-mile and the third a mile, will be an interesting feature of the Labor day picnic at Baldwin Park, Quincy, Ill., Sept. 5. Three gold medals will be given as first prizes.

The Rockville (Conn.) Wheel Club will give a meet at Hyde Park, Mass., Sept. 30. A guarantee fund has been raised of a size sufficient to secure prizes of value and well worth competing for. Various committees have been appointed and are hard at work.

The St. Johns (Mich.) Wheelmen will have a race meet Sept. 8. The prizes offered are very fine, and they have assurances that some of the fastest men in the state will be present. The wheelmen at St. Johns have a quarter-mile track, and it is in excellent condition.

The Keystone Cycle Club of Pittsburg has decided to hold its open road race on Sept. 24, leaving the arrangements in the hands of the same committee that managed the fifteen-mile race. It was also decided to hold a hill-climbing contest after the road race, and special prizes will be provided for the winners.

The fifth annual race meet of the Manhattan Bicycle Club will be held Sept. 5, at which the following races will be contested: One-mile, handicap; two-mile, handicap; five-mile, handicap, and a one-mile, handicap, for novices. Entry fee, fifty cents for each event. Prizes will consist of gold and silver medals, lamps, cyclometers, etc. Due notice will be

given of the time and place of holding the races. Entries close Aug. 29.

Race Chat.

George K. Barrett is at home sick abed.

Fred Nessel races at Cleveland Aug. 26 and 27, and Columbus Sept. 5.

Jay L. Price, of Springfield, Ill., has announced his intention of giving up racing entirely.

The Kewanee (Ill.) Fair Association has made arrangements for several bicycle races, to be run on Sept. 16 and 17. These will be open to wheelmen of that district only.

The Cumberland Fair and Racing Association, of Nashville, Tenn., has combined with the Capital City club to hold a fall tournament at Cumberland Park Oct. 26 and 27.

Local wheelmen want a century race over the Elgin-Aurora course, and this may be made the annual race of the Century Road Club, in place of the fifty-mile, as last year.

The tie between Johnson and Ulbricht for the second time medal in the Waukesha road race has been decided, the former winning the choice when a coin was tossed at Parkside Sunday.

Peoria offers a \$900 upright piano in the mile open. Zimmerman has carried three pianos away from Peoria and is coming west for this one. The prize list for the one day at Peoria amounts to \$2,494.

The first annual cycle tournament, under the auspices of the Louisville League Wheelmen, will be given at the Auditorium bicycle track Sept. 5. A fine programme of ten events has been arranged.

Next week Saturday both A. Leonhardt, captain of the Calumet Club, and T. S. Morrison of the Lincoln Club, will go for the five-mile road record. A race, both men to be allowed pace makers, would be interesting.

Woolas seems to be in hot water. Stillwell beat him in the McConnell race of the Lake View club, and Woolas says he let him do it. To back up this assertion he offers to ride him a race for any distance, at any time, for any amount.

The Columbia Wheelmen will make the five fastest riders in their road race, Sept. 11, the '93 racing team, giving them a trainer and expenses. The race has an extraordinary entry list of 125 members, second only to the Pullman in the west.

The Crescent Cycle Club, of Birmingham, Conn., holds its first annual tournament at the Derby Driving Park, Sept. 2. Entries close Aug. 26, with A. S. Daggett. A programme of eight events is announced, with \$1,084 in prizes.

W. W. Taxis was in New York Friday last visiting A. B. Rich. To a REFEREE man Taxis said that he would attend to his home meet on Aug. 27. If Zimmerman had not decided to go to Cleveland it is quite probable that Rich, and possibly Taxis, would have gone there.

Rochester, Minn., is to have bicycle races in connection with the county fair. The business men of the city have contributed the prizes. The programme is: Mile, novice; two-mile, handicap; mile, championship of Minnesota; mile, scratch. A. J. Coon has charge of the affair.

The following letter was received from Madison, Wis.: "We would like to correct the report of the twelve-mile Sun Prairie-Madison road race in your last issue. The race was won in 40:20 by George Oakey, one minute handicap. Harry Hall won the time prize, from

THE WORTH

CONVERTIBLE TO A PERFECT LIGHT SINGLE BICYCLE IN 30 SECONDS.

From C. A. Coleman, Kearney, Neb.

July 19, 1892.

GENTLEMEN:—I have just received a Worth, and have tried it, and I find it one of the easiest riding and finest wheels that I have ever seen. You have the right thing in the right place.

From F. Huffman, President Winona Bicycle Company.

July 25, 1892.

GENTLEMEN:—Although I have other wheels in stock, I will say that I would far rather walk than to ride any other wheel but my Worth, which is certainly the most perfect wheel made. I do not say this with the experience of only a few wheels, as I have ridden almost every wheel made, and I am in a position to judge. I would not part with my Worth for its weight in gold if I could not get another.

“LADY WORTH.”

THE ONLY PERFECT WHEEL FOR LADIES' USE.

CHICAGO BICYCLE COMPANY,

Office and Factory, 250-260 Jackson Boulevard, S. E. Cor. Sangamon Street, CHICAGO.

scratch, in 40:11. The race last year was won by H. Bodensline, and the time prize by Harry Hall in 44:08. Twelve men beat the last year's time. The road was very dusty and fully three minutes slow.
D. D. WARNER & CO.

Anent the Solid City wheelmen's tournament at Fort Scott, Kas., Oct. 6, Henry E. Harris, secretary, says that if he gets enough entries from Chicago and elsewhere to guarantee an invitation race he will have a five-mile handicap added to the programme, and put up valuable prizes

The Waverly (Ill.) Wheelmen held a race meet Aug. 31, the programme of which follows, Mile, novice; half-mile, open; half-mile, club; mile, handicap, open; boys' race; two-mile, handicap, open; mile, club, handicap; three-mile, handicap, open; half-mile, ordinary; five-mile, handicap, open.

The final heat of the exposition tournament will be run off at the race meet of the Milwaukee Wheelmen at National Park, Saturday, Sept. 10. The following events will also take place: Mile,

was reached on the return trip at 10:30 p. m. The actual riding time was 10 hrs. and 17 min., while the total time out of eighteen hours was largely caused by a series of accidents to the pneumatics. The road was only fair. This breaks the old record of 20 hrs. total time and 16 hrs. riding time, made in '85 by Hildebrande and Klipstefn on solid tired ordinaries.

There is a scarcity of news here in the racing line, though all the boys are starting in for hard work to get ready for the western circuit. St. Louis will be well represented at Peoria, Jacksonville and Chicago.

The South Side Bicycle Club is now in its new quarters and is ready to receive visitors. The club is having a very decided boom at present, and it certainly deserves it.

The Wayne Counties' Century Run.

RICHMOND, Ind., Aug. 20.—The century run of the Wayne County Wheelmen on Thursday had fifteen starters: O. E. McMeans, F. J. Parish, F. M. Whitesell, B. A. Dickinson, A. E. Morel, E. A.

A NEW BROOKLYN TRACK.

The Grounds and Surroundings to Cost Over \$100,000.

Since the days of the Revolution, when the British officers raced their imported thoroughbreds over the level plains of Hempstead. Long Island has been famous as a producer and a developer of speed, not only in horses, but in men also. The very air seems to be full of speed. Who has not heard of the trotting tracks of ante-bellum days, called the Union course and the Fashion course, and the trotters who reigned supreme there; and its running tracks of to day at Sheepshead Bay, Coney Island and Gravesend? Long Island's boxers, walkers and sprinters are famous the world over. Those famous road scorchers, the King's County Wheelmen, the *bon ton* Brooklyns, the sedate Long Islands, the Bedfords, the Ramblers, the Montauks, the Amity, and full thirty more well-known cycle clubs hail from Long Island. Brooklyn, the fourth city in the Union, has nearly ten thousand wheelmen and about five thousand road horse drivers who daily

lore, besides the usual rooms for social and recreative purposes. It is aimed to make the track second to no half-mile track in the country. The board of directors will aim to admit no one to membership in this club who would not be eligible to membership in any social organization in the city. The officers are: Henry T. Booddy, president; Edward O'Flynn, vice-president; Benjamin Shreve, treasurer; Van Mater Stillwell, secretary.

TO BE OPENED NEXT MONTH.

The tracks and grounds are almost finished, and the formal opening will be held in September. The point of interest that the REFEREE and all wheelmen have in this matter is that the King's County Wheelmen will not have to go to New York city to find suitable grounds on which to hold their meets, and that it is possible that the King's County Wheelmen will hold a fall meet there. It also places Brooklyn in line for one of the league meets. Nearly three million people live within a radius of ten miles of this track, and as it is so easy of access by foot, wagon, rail or wheel, a cycle

Parkway Driving Club of Brooklyn, here used by Cyclists

for Milwaukee wheelmen only; two-mile, handicap; half-mile, scratch; boys' race; mile, three-minute class; five-mile, handicap; mile, 2:40 class; ten-mile, handicap.

The committee having in charge the bicycle races at the Minnesota state fair announce that a large number of entries will be made in the several events on the card, and that the races will no doubt be hotly contested. The programme contains five races, and will be preceded by a parade of all the wheels gaily decorated, the association having offered prizes for the most artistically decked wheels. Collie Bell, of the St. Paul club, has been chosen master of ceremonies, and all entries should be sent to him.

From St. Louis.

St. LOUIS, Aug. 22.—Carl Ellers and Ed Grath, of the Pastime Athletic Club, succeeded in making the round trip yesterday between St. Louis and Washington, a total distance of 118 miles. The start was made at 4:30 a. m. St. Louis

Jones, W. S. Foster, Howard Powell and John Waldron, of New Castle; Will Scherman, E. K. McCoy, Bob Conley, John Wilson, J. L. Townsend, C. F. Wright. All came through but Wilson, who punctured his tire beyond repair. Jones is only thirteen years old and came through as well as some of the older riders. Kodak pictures were taken of all things of any interest and of each rider, of which souvenirs will be made.

Buffalo Riders Make Centuries.

BUFFALO, Aug. 22.—Yesterday was an ideal day for wheeling and the chief centurions took advantage of it, there being five centuries made yesterday. Frank Klipfel completed his fourteenth 100-mile run in 10 hrs. 5 min. total time. He was accompanied by his brother, F. A. Force, of the Press C. C., made his tenth century, and F. F. Rich, with Harry Timming, also made one over the same course as all the others, the Buffalo-Dunkirk route. Rich and Timmins made their run in 11 hrs. 45 min. total time.
WILLIE DUNN.

used Bedford avenue, the Eastern boulevard, Prospect Park and the famous five and a half-mile Coney Island boulevard, or, more properly speaking, Ocean parkway, as their outing ground.

THE NEW HOUSE AND GROUNDS.

Midway between Brooklyn and Coney Island, on Ocean parkway, about three miles from gate four of Prospect Park, lies the subject of our illustration, the half-mile track and grounds of the Parkway Driving Club of Brooklyn. The sum of \$100,000 was expended to pay for the land, construct the buildings, lay out the track and generally fit up the premises ready for use and occupation. The membership is limited to 300, initiation fee \$150 and annual dues \$30. The constitution, by-laws and rules of management of the property are similar to the laws adopted and in use by the Driving Club of New York. The club house is designed to provide accommodation for members on race days, and contain club parlors, separate and exclusive accommodation for ladies, a library on horse

meet, with racing cracks as an attraction, would be sure to draw a big crowd, boom cycling in the metropolitan district, prove a blessing financially to the local clubs, and go a long way toward building the new cycle club houses projected. The track has been built under the direction of an engineer who will shortly turn it over to the club complete. Ten inches of coarse sand laid on rocks and broken bricks set, is the foundation; then two feet of loam and sand mixed with a little lime for cementing purposes. The corners are raised six feet on the turns, which are of regulation trotting-track width. It is quite possible that cycle race meets will be given there every Saturday afternoon when not in use by the horsemen, and W. F. Murphy will, it is said, handle the principal part of the management.

The Cazenovia members of the Century Cycling Club, of Syracuse, gave a clam bake to the other members of the club at Listman's Grove on Cazenovia Lake last Thursday.

The James' Safety.

The "JAMES" are Scoring Everywhere.

E. E. Mocket, of Lincoln, Nebraska, won the mile and two-mile State Championship, on July 3, covering the last quarter of mile (in the two-mile race) in 34 seconds. Mocket rode a "James" Road Racer.

FIRST AND SECOND FROM SCRATCH.

At the Parkside races June 18, H. A. Githens on a 24 lb. James and George A. Thorne on a 27 lb. James won first and second places, respectively (from scratch and 60 yards), in the 10 Mile Handicap event. Githens finished a lap ahead of everybody.

Amateur Champion of the World.

Chullington Villa, Peuge Road,

S. Norwood.

MESSRS. BUCKINGHAM & ADAMS, LTD.

Gentlemen :

Having tried your new safety fitted with cushion tyres, I have much pleasure in saying that I consider it to be faster than any cushion tyred safety I have ridden, and, in fact, perfect in every detail.

Yours faithfully,

F. J. OSMOND.

The James Cycle Importing Company

CHICAGO, ILL.

A Few Good Agents Wanted.

The Gendron Quartette—New York.

The Gendron Iron Wheel Company has been fortunate in the selection of employees; and this rule holds good with its New York house, the interests of which are safe in the hands of the three energetic young men, Getz, Quinlan and Schwalbach. Mr. Getz, the cashier, went to New York about three years ago to take charge of the house there. Mr. Quinlan, who is well known on the road, track, and in New York in particular, is a five-year old employee of the Toledo firm, and is a young man pretty well acquainted with men and things, and don't go far wrong in deals with his employers' goods. Alex. Schwalbach is a well-known cycling figure in New York and Brooklyn, and is an old-timer with nothing of the Dutchman in his make up, although the name smacks of the fatherland. Schwalbach was with McKee & Harrington years ago, and urged that firm not to sell the Callemert patents to the Pope Manufacturing Company, which it did for \$300, and lost a fortune. All three of the Gendron hustlers pull together and are doing great work east for the Gendron people. The pictures are faithful ones.

The Dunlop Pneumatic Patents.

From an English paper we learn that: "Sir Edward Clarke, the solicitor-general, sat for the last time yesterday under the present government to hear an appeal against an amendment of this patent, which had been granted by the comptroller. The appeal was made by a combination of no less than eight makers of other pneumatic tires, who were represented by perhaps the strongest array of counsel ever brought together in a case of this nature, and the arguments of the opposing counsel occupied considerable time in hearing. At the conclusion of the arguments the solicitor-general said he would not trouble counsel for the Pneumatic Tire Company to reply, and proceeded to deliver his decision, upholding entirely the amendment granted by the comptroller, adding that if the comptroller had not allowed the amendment he (the solicitor-general) would have been obliged to do so upon an appeal. Costs were awarded to the Pneumatic Tire Company."

Leather Pneumatics.

George Latulip of Syracuse has invented a leather pneumatic bicycle tire. He has for a number of years been employed in the raw hide business, and conceived the idea of making a bicycle tire of this article. The invention consists of the use of raw hides between the inner and outer tubes. The tire will be seamless and be 1-16 of an inch in thickness. A machine equipped with these tires will weigh less than a pound more than if the original tire was used. It is claimed that it cannot be punctured.

A Cycle Dealers' Board of Trade.

A New York law firm, at the head of which is Isaac B. Potter, has sent out the prospectus of a cycle dealers' board of trade, and since that time the proposed by-laws have been printed. It is proposed to issue 250 shares at \$10 each, charge \$50 for initiation fee and \$75 for

annual dues, while a competent manager will have charge of the affair. Trustees will be selected from all sections, but the main office will be in New York. Manufacturers and dealers generally, it is said, are heartily in accord with the proposed board.

Auctioning off Wheels.

At Pomeroy & Son's, 82 Randolph street, a sale of bicycles took place on Wednesday of this week. Rover special '92 pattern, cushion-tired machines sold for from \$42 to \$58; ladies' pneumatic Rovers, '92 pattern, for \$65 to \$85. About a hundred machines were sold at these prices. The Humber-Rover company's agent was there and bid in any machine that he thought was going too cheap. The sale will be continued Saturday of this week.

Peoria Trade.

Fred Patee, who has been on the sick list for some time, is now on duty again. He left Saturday on a trip through the northwest. This will be his last trip this season, and on his return he will spend the remainder of the summer at home with his family.

Kirkwood, Miller & Company have just received word that Basil Riley, the

managing director of Bonnick & Company, Coventry, Eng., will sail for America September 1 with a full line of sample Telephone cycles for 1893. The Telephone has given very good satisfaction, and Kirkwood, Miller & Company will place a large order with Mr. Riley.

H. G. Rouse was in Chicago last week on business. As the season draws to a close before many months, Mr. Rouse is looking around for a line of wheels for 1893. Of course R. H. & Company will handle about the same line of wheels next year as they did this, but their trade is increasing so fast that they can take up another line and handle it very nicely.

Kingman & Company have had a good season on Centaurs and Clippers. The K. O. S. has also been giving good satisfaction. Mr. Simmons, who has been with this house for some time, looks after the bicycle department. A representative of this company is now in England buying wheels for next season's trade.

Luthy & Company are now retailing bicycles. When they first opened their bicycling department they only did a jobbing business, but the large demand for bicycles in Peoria prompted the house to retail them. They have had a very good season and expect to be strictly "in it" next year. LAUREL.

Recent Patents Granted.

The following is a list of recent bicycle

patents, reported especially for the REFEREE by W. E. Aughinbaugh, patent attorney, Washington, D. C.:

180,760, seat attachment for bicycles; Maurice E. Blood, Kalawazoo, Mich., assignor to the Kalawazoo Cycle Company, same place; filed Nov. 2, 1891; serial No. 410,568.

180,838, spring for bicycle saddles; Henry Bergfels, Newark, N. J.; filed April 28, 1892; serial No. 431,075.

480,844, bicycle; George F. Hall, Newark, N. J., assignor to the Schrade & Hall Novelty Manufacturing Company, of West Virginia; filed Dec. 4, 1891; serial No. 413,978.

481,083, bicycle tire; Arthur E. Kupfer and Herman C. Kupfer, Providence, R. I.; filed March 8, 1892; serial No. 420,198.

481,053, velocipede; Robert S. Owens, Washington, D. C.; filed Feb. 3, 1892; serial No. 420,105.

481,070, velocipede; Martha E. Slocum, Meadville, Pa.; filed Feb. 27, 1892; serial No. 423,068.

481,118, velocipede; Michael J. O'Donnell, Chicago, Ill.; assignor of three-fourths to George G. Brandenburg and George R. Walker, same place; filed Dec. 1, 1891; serial No. 413,693.

Foreign Trade Notes.

This year's Stanley show will be held from Nov. 18 to 28.

Manager R. L. Philpot, of the New Howe Company, has been advised by his physicians to take a much needed rest, and has gone to Switzerland.

The Centaur Cycle Company of Coventry is now a limited company with a \$350,000 capital stock. The management remains the same as heretofore.

In May, June and July, the *Cyclist* says, exports to the United States from the Birmingham district (which includes Coventry) amounted in value to \$890,772. Of this no less than \$333,741 (or

considerably over one-third) represented cycles and cycle materials. No other single industry reached \$100,000, the nearest approach being "fancy goods and jewelry" with \$72,382. Regarded comparatively, the figures are truly astounding.

It is rather early at present to talk of next season's patterns, but a word or two may be permitted. We don't expect any radical alteration of fashion in the rear driver from the present long-based open diamond. Back bottom stays will be strengthened, and the Humber pattern bottom bracket will come into more general use, as will Carter's gear case or similar chain protector. Ball socket steering will in many instances be slightly reduced in length, as it causes a too high built frame for many riders at present. We don't look for any great alteration in weight, save in racers, which next season will probably be cut a pound or so on standard patterns, principally by cutting down lugs and other solid parts; and in specially built machines the possibilities of aluminum open up a very speculative field. The only point which will puzzle makers between now and the Stanley show is the very vital one of tires. This question, in makers' opinion, is very far from being settled, and consequently frames only will be built during the dead season in anticipation of next season's trade. The front driver will probably take another twelve months to materialize into a popular

fancy, so that in the interim we may expect a spatter of gears applicable to this type, out of which some further good may be expected.—*Scottish Cyclist*.

Chicago Trade Jottings

The Spooner-Peterson Company has received a hundred Bell Rock Scorchers lamps, weighing fifteen ounces each.

The Quadrant Cycle Company has another shipment of Scorchers on the way. There is a demand for this popular wheel.

Bliss and Ballard now ride Columbia Relays. Bode rides the new Swift racer, and Merrill is mounted on an *Æolus* racing wheels.

The Stokes company sold last week a bill of a thousand medium grade wheels to a Chicago firm about to embark in the cycle business.

A. J. Street, while on a business trip for the Taylor Cycle Company, was taken sick with the fever down in Texas, where he now lies.

Herrick of the Stokes Company is doing a rushing business in pneumatic wheels for sulkies. He took one order for twenty pairs of wheels this week.

Morgan & Wright have been able to successfully place their tires on a forty-nine inch Eagle and also on a Star ordinary by splicing the ordinary tires together.

The Coventry Machinists' Company's agents at Amsterdam, Holland, report that the jury at the Scheveningen exhibition have awarded the diploma of honor, the highest award, to the Swift cycles.

The James Cycle Company, 118 Adams street, has received a consignment of South Road racers. They will weigh twenty-two pounds with Morgan & Wright tires. This, we believe, is the lightest regular stock racer for sale.

The C. F. Stokes Manufacturing Company received on Tuesday orders for English suits, two in the same mail, one from Portland, Ore., and one from Portland, Me. The Stokes company is selling more of these suits now than early in the season.

The Elliott Manufacturing Company, 207 South Canal street, manufacturer of the Elliott roller ball bearing safety, turned out its first wheels, after three years of successful trials, last week. These were five in number, weighing thirty-two pounds. The company will enlarge the plant next year and be an active factor in the market.

A New Pneumatic Pump.

E. D. Loane, Jr., one of the staff of A. G. Spalding & Brother, better known as "Pete" among the old-timers, began riding in '81, since which time he has held sundry positions in the trade with satisfaction to his employers. He was with the old firm of Ersenbrandt & Stoffer, of Baltimore, who were subsequently succeeded by the Ersenbrandt Cycle Company; accepted position with the Clark Cycle Company, also of Baltimore, and later with the Maryland Sportsmen's Supply Company, as manager of the cycle department. It was with this concern that he made an intimate acquaintance with the Victor, believing it to have many merits distinctively its own. When the Overman Wheel Company opened its Baltimore branch with C. C. Candy as general manager "Pete" applied for and secured the position of business manager, establishing under many difficulties, the victor in Baltimore. About this time the Overman Wheel Company decided to establish a branch in Washington. Turning the Baltimore business over to Cline Brothers, he then started

Manufacturers. Importers. Jobbers. Retailers.

up and hustled to the front in not much over a year the Washington business, and it has developed to-day to its present proportions under the able fostering of C. R. Overman. He resigned from the Overman company and has been for the past two years with Messrs. A. G. Spalding & Brothers, and is well known to the trade throughout the states of New York, New Jersey, Delaware and Pennsylvania, where his efforts have been of a most satisfactory character. Mr. Loane is a man quick to see and embrace an opportunity. His work is done

cleverly, and he holds to an idea until its success or failure is established. He is the inventor of several devices in connection with carriages and cycles, among the latest of which is a pump for pneumatics, for which patent application has been filed both in the United States and Canada and several foreign countries. The writer has seen this device, and Mr. Loane has already received communication from two of the leading manufacturers regarding his invention, but has as yet made no definite disposition of the pump, pending future developments. It weighs but three ounces, is not in the way, is simple, strong and durable, readily susceptible of repair, and always with you. It is illustrated exclusively in this issue of the REFEREE.

New English Inventions.

These abstracts are prepared immediately after the patents are applied for, by G. Douglas Leechman, consulting engineer, Coventry, England:

[All persons interested in opposing the grant of a patent of any one of the undermentioned applications may at any time within two months from July 20 give notice in the prescribed form of such opposition.]

No. 13,539. G. Hughes' "improved epicyclic speed mechanism for velocipedes." August 11, 1892. (Communicated by A. J. P. S. Vader, Paris.)—This invention consists of an epicyclic speed mechanism to be applied to the connecting of the pedal shaft to the driving wheel or rotary axle thereof and by means of which the former may be adjusted to operate the latter with one of three different ratios of speed. The construction employed is as follows: The shaft of the driving wheel is composed of two distinct parts, that is to say, the shaft L, which may be termed the motive shaft, and of the hollow axle (O, P, O 1) made up of separate parts but so fastened and secured together as in effect to form one solid whole. The parts (O and O 1) are each constructed of separate parts in order to form an adjustable ball bearing so that the axle (O, P, O 1) may revolve without friction on the shaft (L) and the latter within the axle (O, P, O 1). Around the bearing just described is a second ball bearing which serves to connect the axle to the frame of the velocipede. The axle (O, P, O 1) carries the driving wheel hubs made as one part with it. The pinions (B, B 1) are fixed on the prolongations of the axle (O, P, O 1) and are therefore at one with the axle. The crank arms (E, E 1) are keyed on the ends of the shaft (L) and have in their ends ball bearings (D, D 1) respectively to receive the shafts (C, C 1) of the pinions (A, A 1) which always are in gear with pinions (B, B 1). The cranks (E, E 1) are preferably fixed on the shaft (L) so that one is at right angles to the other. On the pedal shaft (II, I) are the usual pedal cranks (III, III. 1) and also two excentrics (R, R 1) the straps of which are carried on ball bearings and are connected by rods (F, F 1) to the shafts (C, C 1). Set screws (G, G 1) are arranged to connect the rods (F, F 1) with the shafts (C, C 1) respectively. The two sets of pinions can not both act at the same time. The screws (G, G 1) can not therefore both be fixed at the same time. When either of these screws is left loose the respective rod (F, F 1) simply causes the pinion A

or A 1 to revolve idly on the pinion B or B 1 and consequently remain without any action on the latter. The shaft (II, I) is revolved by the pedals,

and consequently turns the excentrics (R, R 1) and gives a back and forth movement to the rods (F, F 1) which through the cranks (E, E 1) trans-

fer the rotary movement of the shaft II, to the shaft L in equal measure. The pinions (A, A 1) follow the circular movement of the cranks (E, E 1) but if either of these pinions is fixed with regard to its rod (F or F 1) as is done by screwing up the coupling screw (G, or G 1) so that the pinion no longer turns idly, its circular displacement while maintained rigid with the top (F or F 1) will cause a rotary movement of the corresponding pinion (B or B 1) on the axle (O, P, O 1) which causes the driving of the wheel. Therefore, by choosing two different ratios for the pinions A and B and for A 1 and B 1, a choice of two speeds is obtained in the relative velocity of transmission between pedal shaft (II) and driving wheel. A third proportion of speed in transmission is obtained by unscrewing both screws (G, G 1) fastening the shaft (L) with the axle (O, P, O 1), for instance, by a set screw (G 2).

No. 15,554. L. Holt's "Improvement in and relating to pneumatic or inflated tires. September 14, 1891.—This invention relates to tires adapted to be inflated with air or gas under pressure, and it consists in placing in any convenient position in the tire a film or pad of any suitable composition which will liquify under excessive heat, the object being to facilitate the repair of the tire after it is punctured. In applying the film or pad to tires of the solid wall tire, such as the Boothroyd, it is preferred to place the said film or pad in the interior of the tire against the exterior part thereof, but it may be placed between the layers of the tire if desired. In tires consisting of a separate jacket and an air tube, either with or without a

separate canvas tube or jacket, the film or pad may be placed either within the air tube, between the air tube and the outer jacket, between the air tube and the canvas tube or jacket, or between the canvas tube or jacket and the outer jacket, the latter being the preferable position. When a tire is punctured and the hole will not automatically close, heat is applied by a hot plate or other device to the part punctured, to liquify the substance forming the film or pad, the pressure within the tire being relieved if the tire has not already become deflated. Immediately the substance forming the film or pad is liquified at the point of the puncture, the heat is removed and the tire at once cooled to solidify the substance, which thus repairs the puncture between the part of the tire containing the air and the outer sheath or tread thereof. When the elastic film or pad is placed between the chamber or tube containing the air and the outer cover or jacket, it may be left loose and not attached to either part and in such cases it is sometimes so placed that it can be moved circumferentially round with respect to either or both the air tube or chamber or the outer jacket, or either the air tube or chamber or the outer jacket or both may be moved with respect to the said film or pad, so that the place of puncture in the various parts may not coincide.

No. 5,605. N. Davis' "Improved driving gear for cycles. March 22, 1892.—The manner in which this invention is carried into effect is as follows:

Instead of the two toothed wheels over which the ordinary chain wheel gears, two wheels are mounted like flanged pulleys, which have rims or flanges (D D) projecting above their edges for the purpose of receiving an India rubber band (A), which fits tightly to the surface of the wheel. One

sail for England for a month's business trip.

The Common Sense people contemplate putting out a Humber pattern safety next season.

H. P. Walden, of the Chicago club, mourns the loss of his Humber road racer, No. 14,746, which he left in front of the Pullman building Aug. 20.

W. J. Persh, formerly traveling salesman for the Bretz & Curtis Manufacturing Company, has joined the forces of the Raleigh company and is now in the south in its interests.

George R. Bidwell, of New York, is a busy man these days, and his trips between his cyclometer factory in Newark, his works in Hartford, and his tire factory, keep the genial Bidwell on the move.

Reed & Curtis, Worcester, Mass., will be heard from next season, as with the completion of their new factory their pedals, screws and other specialties now under way will be pushed with the usual Curtis vigor.

Among the trade people who were elected to membership of the Manhattan Bicycle Club at its last meeting were Paul Angues, Arthur A. Atty and George S. Atwater. The Manhattan is scooping in trade people and all others at a lively rate.

At the South Bend, Ind., races last Saturday the riders of the James captured five first prizes, Rhodes winning three. At Englewood the same day, C. H. Peck won the seven mile road race, also time, 22 min. Peck's mount was a twenty-

NEW SWIFT RACER.

three pound James track racer. Two miles of the road was covered with slag.

McKee & Harrington intend pushing the Lyndhurst next season. Mr. McKee says next year's wheel will weigh a little over thirty pounds and will have several new features. The tubing used in the construction of the Lyndhurst is the Credenda.

Manager Day, of R. L. Coleman & Company, received a letter the other day asking if the Western Wheel Works made a tricycle with an air circulating, refrigerating receptacle, that could be used in delivering butchers' goods to customers.

J. S. Ray, manager of G. & J.'s Broadway store, in his spare moments has constructed a true diamond, thirty-two pound safety, sans springs and other little G. & J. devices, and it looks a very promising mount. Plenty of wheel base and extreme rigidity are two of its features. The Rambler does not seem to take very well to New York or Brooklyn, although Charles Schwalbach &

The Coventry Machinists' Company has received one of the new swift racers, a machine admired by all. It is built on the lines of the Holbein, but with a wheel base a trifle shorter. It is fitted with Dunlop racing tires and weighs twenty-six pounds. If a lighter roller chain were used the weight would be lessened somewhat. The cranks are seven inches, quite too long for track work. But notwithstanding this objection it is a trim-looking and finely-built wheel, and will be in great demand.

Trade Notes.

George E. Curtis, of the Bretz & Curtis Manufacturing Company, will shortly

An Honest Wheel, the Best that Brains Can Devise or Money Can Buy.

THE "BUFFALO"

Light Weight

Full Roadster.

THE PROOF OF THE PUDDING IS THE DIGESTING THEREOF.

BUFFALO CYCLE WORKS,
Buffalo, N. Y.

Jamestown, N. Y., April 20, 1892.

GENTLEMEN:—It affords me great pleasure at all times to speak of the Buffalo Light Roadster, that you built for me last year. I have been riding ten years now and have owned and ridden a number of different kinds and styles of bicycles. I have tried about all the different wheels on the market, and ought to know what the best wheel should be like. I know which wheel suits me best. I can conscientiously say that your wheel, or rather my wheel, is the strongest for the weight (37 lbs) of any wheel I have known. It is finely built on the most practical lines, and aside from being a specially handsome bicycle it is complete, durable, and simplicity itself. I want no better safety. I used to think in common with hundreds of others that the "grand old ordinary" was about as near the ideal as we could ever get, but the times demanded a low-down wheel that was safer than the "sky-sweeper" and yet as durable. Of all the hundreds of "rovers," whether chain or gear, ratchet or crank, long or short centres, long or short wheel base, two sizes of wheels and the hundred and one little details that make up the individualities of modern bicycles, I think you have embodied the essentials in the *Buffalo Light Roadster* in such a manner that it cannot be beaten. To me it is the sine quo non.

(Well known to readers of the cycling press by his non de plume, "SETAGEC.")
Fraternally yours, CHAS. E. GATES.

Company are capable agents in the latter city.

Manager H. S. Graham of the Royal Cycle Works, of Marshall, Mich., is expected in New York shortly to make arrangements for the building of Royals in that section. The Royals this season have been well spoken of, and next year's wheels will, it is said, be hummers in every respect.

There will be a change in the American Ormonde Cycle Company shortly. George S. McDonald, the secretary, is to leave and accept a position with the Raleigh Cycle Company. This is from an inside source, and the relations of the trio are as friendly as ever.

The Pope Manufacturing Company, Spalding, and the Western Wheel Works people have had several telegraph orders for pneumatic sulky wheels the past week, which orders were turned over to Sterling Elliott and the Caffay Carriage Company, of Camden, N. J., which has been made a licensed maker by "Pickory" Elliott.

From various sources we learn that the English trade is in a very bad shape, that factories are carrying over large stocks and that serious trouble will occur in the ranks of some of the smaller makers this fall. As a rule the English makers are satisfied with their American trade, the few exceptions being traceable to poor management or bad wheels.

L. H. Johnson, of the Premier Cycle Company, is spending a well-earned vacation in the Adirondack Mountains, and will return Sept. 5. Treasurer H. C. Douglas, who is in charge, reports orders as good and trade much better than expected for this time of the year. By the looks of the goods being boxed and crated, the treasurer's statement could not be doubted.

Paul Angois did not sail home with Manager Bowden of the Raleigh company, although his health has suffered since coming to New York. His intention was to go home, but he will now try and become agreeably acquainted with the American climatic changes, and will spend some of his time at "Founder" Bradley's blue law colony, known now to cycling fame as Asbury Park.

The eastern friends of Joseph L. Yost, of Toledo, are glad to know that he did not succumb to the flattering inducements held out to him by the beautiful and bountiful Pacific Coast, and that he will again give to the cycling world examples of his thorough knowledge of the mechanical side of cycling. It is said that Yost's new Toledo firm will soon have its next year's wheel on view.

Joseph Cushman, of Cushman & Dennison, of "Pocket Oiler" fame, reports the sale of his oilers and pneumatic pump holders as being large; in fact, the latter article cannot be got out fast enough. Mr. Cushman is a very bright, gentlemanly young man of unlimited means, and agent for a very large estate of his uncle, and rated in the millions, so that cycle oilers and pump holders must be a hobby with him.

George S. McDonald, of the American Ormonde Company, will shortly leave that concern and take a position in the Raleigh Cycle Company's New York store. Among the agents who have already stocked and will handle Raleighs are the George R. Bidwell Cycle Company, up-town, New York city; Peck & Snyder, down-town; Bensinger, McDonald & Bowditch, Brooklyn; George C. Sweet, Buffalo; R. Thomson, Rochester and Benjamin & Andrews, Syracuse. The Raleigh company does not think that its present path and road racers, which are

fitted with the changeable sprocket wheel, semi-tangent drivers, etc., can be improved upon for 1893.

A well-known eastern tradesman, whose wife and daughters ride, sends the REFEREE the following specifications for a woman's wheel: Wheels, 28 inches; gear, 50 inch; wheel base, 44 inches; cranks, 5 1-2 inches; pedals, 3 1-4 inches; crank shaft, from ground, ten inches; handle-bar, 26 inches, slightly dropped, drawn back 1 1-2 inches; high handle-bar post; 20 inches between handle-bar post and saddle post; 29 to 35 inch leg measure; a laced dress and chain guard; free from hooks, bolts and screws around the crank hanger so as not to catch the dress; double loop frame; 1 3-4 inch pneumatic tires or 1 1-2 cushion; weight 40 pounds. Possibly others may have other suggestions to offer, but there is one point, and a good one, that the eastern man makes, and that is the distance between the handle-bar and the saddle-post. Too little space has been the rule there, especially for a short woman.

Boston's Easy Club.

They have got an "Easy Club" of cyclists in Boston. The Easy Club is composed of some of Bunker Hill's most famous cycling citizens, and was sired by that governor of North Carolina of cycling, Major Billy Atwell, D. G. F. The beauty of this club is (and here a grave suspicion that they are all Irish creeps in) that every member holds an official position. The "grand easy" office is followed by Billy Warren, who makes a lonely run to Salem three times a week, for what purpose deponent sayeth not. Major Billy Atwell is representative to the board (side-load, no doubt), Harry D. Hodges is "official tire blower," Henry G. Trickey, Boston Globe, is "supreme easy," Keith, of Keith & Butchello museum fame, is bottle carrier, and Sillman G. Whittaker, Easy Club historian. The club is not a member of the league, but indulges in frequent runs to the board and bar, and the club badge is a wheel with a small "extra dry" bottle for centre piece. The runs frequently take the form of chases, and belie the name of the club, but the police are to blame for any undue speed.

meeting at the club house of the Atlanta Wheelmen Friday last. Reports were read from the different committees and much business of importance was transacted. The recent two-day race meet held at Rahway, netted each club that is a member of the association a handsome dividend. Twenty-five per cent. of the net profits was also added to the treasury.

The election of officers for the ensuing year resulted as follows: President, J. A. Holmes, Jr., Business Men's Cycle League, of Newark; vice-president, Charles E. 'ge, of Atlanta Wheelmen, of Newark; treasurer, Dr. Lyman Clark, Union County Roadsters, Rahway, N. J.; secretary, Fred Keer, Hudson County Wheelmen, of Jersey City; board of trustees, Messrs. Swain, Atlanta Wheelmen; Kirkpatrick, Business Men's Cycle League; Day, Hud-

*The apparel oft proclaims the man. The bicycle always proclaims its rider. Are you willing to appear in public mounted on a wheel which is a give-away? Do you want to herald the fact that you patronize the auction shop, the pawnbroker, the seventeen-cents-per-month installment racket, etc., etc.? Or do you prefer to have a wheel that shows you to belong to the best class of cyclists? Take your choice, but you had best ride a **SWIFT** and be respected.*

COVENTRY MACHINISTS' COMPANY, LIMITED.

CHICAGO, BOSTON, SAN FRANCISCO.

MEN WE ALL KNOW.

No. 3.—Col. A. A. Pope.

The man who doesn't know who "the colonel" is, knows little about cycling.

I believe I remember once reading—it may have, even, been on the authority of the colonel himself—that the ambition of every American boy was to, some day, ride a Columbia. The colonel is the man who fired the American youth with that very laudable ambition. I can't very well go into details as to his connection with cycling, because I am not drawing salary for producing a history of American cycling, which is about the same thing. So be content and happy with what I am able to offer.

The colonel has been the most liberal patron cycling has ever known in this or any other country. He makes good bicycles, and, people say, big profits, and is as willing to part with a goodly share of them for the good of the cause as any man I ever met. They do say that the colonel owns all the racing men, league officers and cycle journals, and runs the league to suit his own ends. Once upon a time I tried to interview him on the subject and he said: "Well, what if I do run the league? I run it well, don't I?"

I was bound to admit that he did.

The colonel's connection with cycling dated from the inception of the business in this country. He thought, in those days, that he made bicycles as perfect as the selection of good material and the employment of good mechanics could make them. But he didn't. A blacksmith would do as well now, and yet how proud the colonel was as he rode into Hartford on a machine weighing one hundred and fifty pounds or thereabout, and told the Weed company that he wanted more made like it. The company undertook the job, and as a result

the man who gave the order now owns the factory, ground and everything that thereon and therein is.

The colonel has had his finger in a good many pies and has pulled out many profitable plums. Rumor credits him with the ownership, or, at least, the possession of a large portion of the stock, of a number of concerns.

As an entertainer the colonel is one of the huge successes of the season. He has a country place on the shores of Massachusetts, where the doors are never closed, and not a night passes but the hospitable rook covers some visitor.

Col. Pope is "quite some" as a speech-maker, and to the artist, I understand, we are to be indebted for a number of sketches, suggested by extracts from his speeches.

Let all the world say all it can against Colonel Pope, but when the day comes that he relinquishes his interest in cycling, the business will have lost one of the best friends and brainiest men it has ever known.

"Cupid's Chariot" a Success.

"Cupid's Chariot," a new three-act farce comedy, by Henry J. Sayers, was presented at the Grand Opera House, Kansas City, Aug. 16 and 17, to a full house, notwithstanding ninety degrees weather. The performance is an undoubted success, being above the average farce comedies, replete with good songs, dances and funny situations. The bicycle race, on which hinges the plot, if it may be called such, can not fail to excite an audience. Miss Alice Evans, a pretty little soubrette, who dances gracefully and sings perfectly, is leading lady and the heroine of the race. Her "whirlwind dance," a la Louise Fuller, brings down the house. Barber, the well-known trick rider, who undoubt-

edly gives the best stage performance of any of the "champions," was a prime favorite. Powers brothers are old-timers and are a whole show in themselves. Their one wheel act brought several recalls. Charles J. Stine, as Major Domino, is funny, very funny, in his songs and dances. Miss Ada Jewell, the soprano, who was last year with Evans & Hoey, shows a decided improvement over her really excellent work of last season, both in singing and dancing. She fascinates the bicycle boys with those "Madona glances."

The "Ta ra ra boom de-ay" song and dance by Misses Jewell, Evans, Greely and Broughton, "is great, distinctly great." The bicycle race creates much enthusiasm, was run amid great applause, and earned a "curtain call". Stein wears the Lincoln club cross-bars on the front of his duster.

Taken all in all, the play can be considered a "go," and should fill the houses wherever it appears. Properties, dress and company are A 1, and far above the average.

The company works east from here, playing at Detroit Aug. 25, 26 and 27; Hartford, Sept. 5 and 6; Springfield, Sept. 14-15. It will not play in Chicago before February, 1892. ROVER.

Could't Fool the Fair Nellie.

Ike Johnson, who has charge of the riding school of G. G. J., New York, was with Bidwell for several years and says he taught the first two women to ride a safety—Pauline Hall and Nellie Bly, the smart newspaper women reporters of the *World*. Johnson says that while giving Nellie a lesson a male reporter for another paper dropped in and asked him for some pointers for a story on woman cyclers and cycling generally. On returning to his fair pupil, he said:

"A reporter wants some cycle news." "Don't you give a line. I want a story myself for to-morrow's *World*," was the around-the-world-trotter's response. Johnson told the reporter that he was too busy. "Then I will see Mr. Bidwell," said the reporter, in Miss Bly's hearing. "No you won't, young man," softly murmured Nellie, and to the astonished Johnson she quickly said: "Take me to Mr. Bidwell the shortest cut;" and two minutes later she was seated in Mr. Bidwell's private office rattling off notes for a complete story for the next day's *World*, the male reporter being told that Mr. Bidwell was out. Johnson is colored, and like his race loves music, and between lessons has become a proficient trick rider, and rode on one-wheel playing a banjo for five minutes for the edification of a REFEREE man last week.

Heavy-Weight Riders.

Erie, Pa., has some pretty good-sized riders, several ranging in weight from 185 to 265 pounds. D. A. Coughlin leads, with 265 at the start, but a few months' riding has reduced his weight thirty-five pounds; Andrew McClintock, 270 pounds; Major Charles M. Cunningham, 225; A gentleman seventy-four years of age, named Slitaisky, purchased a wheel in May and now can be seen almost any fair morning at 4 or 5 o'clock exercising his 180 pounds avoirdupois. Mr. Jonson's assistant taught the latter gentleman, and reports remarkable agility in his pupil for a man of that age.

The Bergen Lady Cyclers are drawing plans for an all-day run of large proportions. Gentlemen are to be invited, and dinner served when the cyclers reach their destination. The society is in a flourishing condition and has a surplus in the treasury.

"LOOKING BACKWARD."

Has the referee, or have the referee and judges of the race meeting the right to create special rules to cover any point not provided for in the regular racing rules? This point was raised at Parkside on Saturday last, when a number of men were disqualified and one ruled off the track for the day for looking around! The Parkside track is a quarter-mile circuit, and, possibly, looking backward may have been the cause of some accidents. The men were warned that such action would result in disqualification, and the rule was enforced to the letter. Of course the right of the officers was questioned, and, as we believe, with good reason. Should this matter be brought to the attention of the racing board, we believe its decision will be adverse to the passage of rules to suit special occasions. Racing men are to be governed, we believe, by the rules laid down by the board, and by these alone. In this particular instance the officers ruled that looking around came under the head of foul riding. If they had been able to show that any man, by looking around, has interfered with another, or had in any way changed the result, this ruling might hold good, but in many cases no harm whatever resulted. It might be well for the board to decide this question.

FAVORING SCRATCH MEN.

The action of the racing board in condemning the action of a referee of a race meet who allowed the scratch men to compete in the final without riding the heats, is to be commended. This course was unwisely suggested by the fast men at Washington and Baltimore, and ridiculed as it should be. There is no valid reason why such a proposition should be considered for a moment. The scratch man has no more right to win the race than the man on the limit mark. The object of a handicap is to give all men an equal chance. By making one set of men ride twice while others ride but once defeats this object. The men who, as a rule are placed at scratch, have abundant chances in scratch events to win their full share of prizes, without placing the handicaps practically at their mercy into the bargain. The poor scratch man has a pretty easy time of it generally, and we need offer him no further advantages.

ONCE more will the rules relating to championships be amended. The racing board recommends that these events be thrown open to all league members, whether winners of division championships or not. Better throw them open

to all residents of the United States while they are about it. Of one thing we may rest assured—that the championships will never be a success so long as they are to be made part and parcel of the annual meet and awarded to the highest bidder, regardless of whether the dates and track be suitable. No greater farce than the championships of 1892 ever occurred in the league's history.

It remains for the Englishmen, after all, to take the first steps toward the formation of an association for the promotion of international championships. Henry Sturmer is engaged on the task. Whether the American committee appointed some time ago, and consisting of Messrs. Burdette, Geruld and Raymond, has taken any steps nobody seems to know.

MANY a time and oft, of late, have we been questioned as to the truth or falsity of the rumor that Mr. Spalding had decided to "give cycling a lift." Such a report appeared recently in one or more of the daily papers. We are assured that the scheme outlined is quite imaginary, and that the gentleman named had given no thought to the matter.

R. D. Garden has gone east and will be away a month.

The Chicago Team To Be There.

The Columbia cycling tournament at Columbus, O., Monday and Tuesday promises to be a big affair. Detroit and Chicago will be well represented, as well as Ohio, with racing talent. The Chicago C. C. sends Munger, Lumsden Van Sicklen, Githens, Bliss and Ballard, and some good racing must result. There are twenty-two events on the programme and \$3,000 worth of prizes have been put up. The relay race will be a novelty. This will be run by teams of five, each rider to ride one mile, under the following conditions: An exchange limit of 100 yards will be designated by white flags in front of the grand stand. Number one of all teams will start, riding the first mile, each carrying a courier packet, which is to be transferred to number two of the respective teams within the exchange limit; numbers two, three and four are to repeat the performance of number one, and the team represented by the first number five under the wire, wins the race. The track, a picture of which was shown in the REFEREE recently, is one of the fastest in the country, and with good weather Taylor's mile competition record is apt to go, and the one breaking it will receive a diamond pin worth \$100.

Louisville Getting Ready.

The Louisville people are making a great effort to have as big and successful a meet Sept. 29 and 30 as any on the western circuit. The merchants of the place have donated a handsome lot of prizes, and among the lot is a piano, besides several high grade bicycles. Dr. Tileston is an energetic worker and has done much to make the meet a worthy one. The illustrations shown elsewhere are the result of a few shots on the occasion of the last meeting at Louisville. The track is a sixth-of-a-mile circuit, the greater part of the center being occupied by an artificial lake. In all parts of the ground are cages of animals and birds. That the "direct representation," so often claimed by some of our contemporaries, is not always a sham, is proven by our photograph of "the Bearings staff."

Mr. Quilp, the manager of the place, conducts it more as a hobby than as a speculation, and the wheelmen are indebted to him for much kind attention.

A SUCCESSFUL CLUB.

The Columbia Wheelmen About to Occupy Their New Home.

The Columbia Wheelmen of Chicago are rapidly coming to the front, their members rather excelling as long distance road riders. This club was the outcome of too much politics in the Aeolus Cycling Club, and about twenty-five men withdrew and formed the Columbia Wheelmen some two years ago. From the start the club had a healthy growth. In the old Aeolus club house they grew and thrived until last spring, when the club's great success drew general attention, with the result that offers to build a club house were quickly accepted. They are now on the verge of entering their new home at 311 West Division street, which has cost \$15,000. The club's membership is nearly 200, and, still better, all are hardy riders. At a recent monthly meeting no less than eighty were in attendance, over sixty of whom rode to the meeting.

WILL JOIN THE A. C. C.

The club is about to make application for membership in the Associated Cycling Clubs, and is desirous of taking a more prominent position locally. On their Sunday runs the Columbia Wheelmen turn out more men than any other club. The members travel well together, and theirs is a strong bond of fellowship which augurs well for the club's future prosperity. It was principally through the splendid performances of the club's racing men that it has sprung into prominence. The racing talent has been developed in the club ranks entirely, and presents many coming champions. The interest taken in racing is in no better way exemplified than by the entry list of 125 for the annual road race, which occurs Sept. 11.

SOME OF THE FAST MEN.

Emil Ulbricht of this club has become probably the best known through his performances on the road early in the spring, and the great number of century runs which he has made. Ulbricht was tied for the second time medal in the Waukesha race, and starts for the Elgin-Aurora century course record next Sunday. Fred Nessel is the club's leading rider. His performance in the Pullman race was a notable one, and his great ride in the Waukesha race is well known, when he cut the record to 48:11, a cut of over five minutes, lowering the colors of most of the western fast men. Nessel rode to Milwaukee, lowering Munger's time ten seconds, doing the ninety-six miles in 6:55. He goes for the 100-mile track record in September.

GOOD ON TRACK, TOO.

Nessel rode fourth in many races at Springfield to Lumsden, Barrett and Munger, and showed he was equally good at short distances. L. Tagholm was one of the seven Chicago men who rode inside record time. He lately rode to Lake Geneva and return, 173 miles, in 18:45, accompanied by Paulsen of the same club, who two weeks later rode to Milwaukee and return, the first double century over country roads in Chicago, in 20:05, unaccompanied. President Erickson and Captain Greenburg themselves set the examples and ride many centuries. The club has a hundred strong riders on the road, and next season will be ably represented on the path by a team of five, under charge of a competent trainer.

Another Good Trick Rider.

Sunday morning at 5 a. m. Thomas S. V. Morrison and a party of his north side friends started from Lake View for a century run over the Elgin Aurora circuit, about 129 miles the round trip

from the starting point. On a wager Morrison was to ride the entire distance without handle bars on his machine. That he performed this feat is the testimony of Tom Heywood, W. S. Kaehler, A. G. Seeger, Loyd Chick, James B. Dyer, E. P. Seeger, J. N. Starrer, H. A. Stacey, W. G. O'Donnell and W. W.

Rattray. The entire distance was covered in twelve hours, his actual riding time being ten hours. His mount was an Ariel safety, loaned by D. T. Ganse. The roads were terrible. From Chicago to Elgin they were deep and rutty and it was all the men with handle bars could do to keep on their wheels, yet Morrison hammered out twelve miles an hour. From Elgin to Aurora, against a strong head wind, he covered eight miles of the distance in twenty-eight minutes. From Aurora in the wind was stronger, yet he came home, fresh and ready to ride farther. Up and down hills he even dis-

tanced his pace makers, and where the roads were worst he apparently rode easiest. The rider met with no accidents and simply astounded his friends and riders he met on the road by the apparent ease with which he rode. Morrison rides a wheel like a centaur. He rides an Aeolus racer handle bars off and on the rear wheel only, and mounts into the saddle, standing up with arms folded. He also rides the wheel forward while in reverse position on the pedals, guiding by the seat only.

Nancy Hanks, 2:05 1-4.

Again the trotting record went on Wednesday, when on the kite track at Independence, Ia., Hanks was driven a mile by Budd Doble in 2:05 1-4, two seconds faster than her record made at Washington Park. The quarter was reached in 30 sec., half in 1:01, and three-quarters in 1:34. The running horse, Abe Lincoln was her pace maker. Another good bit of work was done by Flying Jib in the 2:20 pace, three successive heats being won in 2:10, 2:10 and 2:07, respectively. Bicycles will have a hard time to reach these figures.

L. Fewsmith Fails.

The failure of L. Fewsmith of Cleveland is reported, and it is said he will not be able to pay over twenty cents on the dollar. He handled the Warwick, the Eclipse and a line of cheap wheels.

Editors Frank Egan and C. A. Dimon.

NEW YORK, Aug. 29.—This is a world of changes, and if the Rev. John Jasper's declaration that the "sun do move" isn't true, things and events on the earth's surface move for a surety. Only this past week the air was charged with a well defined rumor that a new, well-backed cycling journal was to take the field, and inquiries as to a plant and

Louisville.

staff to conduct the new venture was being made, and is, for aught I know, being made still. But, like a flash of lightning, came the following telegram from Philadelphia: "Frank Egan takes editorial charge of *Sporting Life's* cycling department, and severs his connection with all other papers. Crowther takes business department of *Life*." This came of a visit by Egan to Philadelphia, having been called there by wire, and the surprise hit Egan as much as it did others, I'm told.

PACKED UP HIS GOODS.

Egan confirms the news, and a visit to his cosy flat on Twenty-second street and Eighth avenue last night, found Frank packing all his belongings into barrels and crates preparatory to leaving his dearly beloved Gotham, possibly forever. New York without Frank Egan seemed an impossibility, but much as he will be missed he will enthuse life into the Quakers, and as Frank said in parting, "I'll either make a big success or a horrible failure of my new position; there won't be anything half-way about it. I have severed my connection with all other papers and will not write a line outside of the *Life*." In packing up Egan carefully wrapped up a disfigured looking thing called the amateur rule, which he will hang over the editorial desk in Philadelphia, and expects only one or two more squeaks out of it. In wishing Frank Egan god-speed in his new field, I am sure it echoes the sentiment of those who know the incisive, fearless writer, who, with one or two others, have brought the rest of the cycling papers in line with opposition to the amateur rules as they now exist. Frank Egan may not believe in a deity, or that women are angels, but he does believe that the amateur rules want changing. *Au revoir*, Frank Egan.

DIMON'S NEW JOB.

This reminds me to say that C. A. Dimon, who has labored so faithfully for the REFEREE in Philadelphia, has taken editorial charge of *Cycling* in that city, and proposes to make it a live local

paper. Dimon is well known as the hustling captain of the South End Wheelmen, and the last issue of the paper bears evidence of a new editor of ability at the helm.

They Wanted Zimmy.

As expected, A. A. Zimmerman comes in for a general roasting at the hands of the M. A. C. cycling carnival committee. Zimmerman entered, verbally, but, finding his western engagements and possibly his tired condition would prevent him doing justice to himself, he asked the M. A. C. people, through a letter to Chairman Moneypenny, to let him off, and took it that they would do so, as he gave valid reasons for wishing to remain west. The M. A. C., although not in possession of his entry in due form, and in face of Mr. McDermott's letter asking to be excused, kept advertising Zimmerman as a starter and even placed his name on the programme, which was injudicious, for there is no doubt the lack of enthusiasm was caused by the crowd coming to see the great rider, and after seeing his name on the programme looked in vain for the famous Jersey "skeeter."

HE KNEW HE WOULD DRAW.

The M. A. C. knew that Zimmerman

Louisville.

was the magnet, and let the club say what it likes, it wilfully misled the public by advertising an impossibility. This might be excused with professional showmen, but not in a club of the M. A. C. standing. If the dailies which printed the explanation of the M. A. C. tournament directors and blasted Zimmerman, knew the facts, they would feel that they were entitled to an explanation from the Zimmerman side. The M. A. C. seems to be going into the show business, and an article denouncing such methods of a supposed amateur club, in the *Evening World* last Friday, hits the case. Backing professional pugilists is not in keeping with the idea of what constitutes an amateur club, and this is what the *World* called attention to. The M. A. C. has done much to demoralize amateurism, and while the club has also done much to promote athletic sports, it is fast tending towards professionalism of the worst kind, and the directors should call a halt.

A FEW OPINIONS ABOUT IT.

These are a few remarks of the dailies on Zimmerman's non-appearance, which show the famous rider has been placed before the public in an unjust and unfavorable light:

Zimmerman, the champion, was entered in all the principal events, but failed to put in an appearance, he having gone to Cleveland, where larger prizes were offered. His absence caused considerable disappointment, and the M. A. C.

officials were very sore over it, claiming that Zimmerman had given positive promises to be on hand.—Press.

There was much expressed disappointment at the absence of Arthur Zimmerman, who had given the club's officials his promise to compete, but broke it without apparent compunction. Director Moneypenny has papers in his possession absolving the M. A. C. from any charges of hippodroming or desire to parade Zimmerman without authority. There was a plenty of cycling stars present to make Zimmerman's flunk a matter of small moment.—World.

The Cherry Diamond officials were very indignant at the failure of Zimmerman to appear, and asserted that in view of his definite promises to do so his action was very shabby.—Sun.

The Boy Girl in Cycling.

A writer some time ago alluded to the prevalence of the effeminate side of a good many cyclists in *Cycling*, who are never happy unless they are covered with love tokens and their wheels present a ribbon-bargain-counter appearance. The "sissy" in cycling is not altogether a pleasing object, and not flattering to either sex, and there is nothing more calculated to give one a dose of dyspepsia than to see a "sissy" rider careering along with ribbons a yard long flying from his handle bar. If the admittance of women to clubs causes this there is more need of drawing a line so as to not admit them than to keep "cul-lud" folks out of the league. What woman feels dignified in riding with a simpering youth who vies with her in what is pardonable in woman, or seeing the many soft-brained dudes usurping her privileges of extraordinary personal adornment. Such cattle should be ducked, like an old hen who persists in setting on china eggs. This sounds like one of the ribbon brigade, taken from to-day's personal column of the *Herald*:

"A young man, stranger and bicyclist, on vacation, would like to meet some lady riders living in New Jersey and Philadelphia. Address Y. Y. Z., *Herald*."

Potter the Orator.

I am in receipt of the *Boston Journal*, sent me by somebody interested in good roads, in which there appears an account of the annual meet of the Massachusetts Boot and Shoe Club. The *Journal* devotes nearly a page to the speeches, and

Louisville.

the promoters of the meeting recognized cyclists by inviting two such distinguished men and orators as Colonel Pope and Isaac B. Potter, editor of *Good Roads*. The colonel was away from home in Alaska, looking, possibly, for a summer residence for the riders of "blue rims," but Potter was on hand.

A COMPLIMENT TO COLONEL POPE.

In alluding to the distinguished son of Massachusetts, Albert A. Pope, the chairman said he "hoped to have with us to-day a man who measures time not by days, weeks or years, but by cycles. I refer to Colonel Albert Pope, whom we all love for his fresh enthusiasm and generous help to all that is good. But we have with us a man who knows all about roads, from Alpha to Omega, and

whom I met for the first time to-day, and find to be a right good fellow. I take pleasure in introducing Isaac B. Potter, of New York, editor of *Good Roads*." In an eloquent talk which occupied a column of nonpareil, Potter told those influential men the tale of roads in this country, from when the Mayflower landed off the coast of Massachusetts to this progressive age of the League of American Wheelmen. The Boot and Shoe Club is to be commended for its generous recognition of good roads and cyclists, for it seems entirely unselfish, for the reason that bad roads are hard on shoes, and the use of the cycle certainly saves shoes. Thus Potter scores one for good roads, and at the same time aims a blow at the shoe industry.

A New Jersey Boulevard.

The great drawback to cyclists who wished to ride into the heart and best points of Jersey in the past has been the wretched bed of sand extending from Jersey City to Newark, fourteen miles distant. From Newark the rider can wend his way over good roads into any part of the state. Now hope reigns, and the cyclists will be glad to learn that after more than twenty years of complications arising from tedious legal proceedings and political jobbery over the project, ground was formally broken yesterday afternoon at Bayonne for the Hudson County boulevard. The work of beginning the road was conducted under the auspices of the Hudson County Board of Chosen Freeholders.

WILL BE A BIG JOB.

The new boulevard is to extend from the Bergen Point shore of the Kill von Kill to the Bergen County line, a distance of fourteen miles. Its width is to be one hundred feet. The legislature passed an act permitting an appropriation of \$1,000,000 by Hudson County for constructing the road, but the cost of the boulevard will far exceed that sum. There are two hundred houses to move in the upper section. Chief Engineer Harrison expects to have the work advanced as far as the Hudson County court house, on Jersey City Heights, by the spring of 1893. Several large bridges are to be built, and in addition to awards for damages to adjoining realty the county authorities expect to be permitted to set off benefits to be derived by contiguous property.

With the boulevard completed the run from Jersey City to Normal and beyond will be a favorite one, and thousands will use it, as many live in New Jersey and are employed in New York, and now they have to patronize the railroads.

FRANK HALL'S PARISIAN SCHEME.

Frank Hall is not altogether unknown in America; in fact, he is well known as a man with large brains and little honesty

Louisville.

in the conduct of tournament schemes, and New York and San Francisco know Frank Hall very well. He gave very successful six-day pedestrian races in

P. J. BERLO:

New York and San Francisco, and report said Frank Hall benefitted most by them and would not care to give others in these places. This may be wrong and "Hall may be all right," and the further fact that he has been conducting great skating rink enterprises in the Olympia, London, Paris and other places with other people's money and has been successful, may go for a good deal.

EVERYBODY TO BE IN IT.

Frank Hall's latest scheme, I learn by a letter, is to give a seven-day night-and-day race in Paris, and all the long distance riders of America, England and France are to compete. It will be a success, no doubt, as the French will surely flock to see the horrible in cycling, and night and day work is horrible, to my personal knowledge. There is something soothing in the information that it is to be given in Frenchland, and which won't injure cycling much, because the French won't understand. Lamb, Wood and Howell curse and swear in English, thus we will be spared the information that Lamb called the referee and spectators naughty names.

Is Burdette a Candidate?

Said a member of the racing board to me Friday: "I have it on the best of authority that Colonel Burdette will not be a candidate for re-election to the L. A. W. presidency, and my authority is—," mentioning a cycling editor who affects to train a little with the Hartford wire-pullers. Calling on a still greater gun in the cycling political world I mentioned the news, and as he winked his other eye he replied: "Won't he, though? You wait and see. When the time comes he will be found like Barkis, but may not seek the office in the acceptance of the term."

MORGAN.

Palmer's Talk on Trade.

Harry Palmer prints a very useful and instructive article on "The Cycle Trade" in this month's *Sporting Goods Dealer*, and reads the English and American trade a valuable lesson. He tells of an English firm which sent to this country a traveler who knew nothing of the country's trade, and who closed a deal with the first attractive talker he met, and his firm is now out \$20,000. Palmer speaks of the glamor of the cycle trade, and altogether the three-column article is worthy of the *Tribune's* ex-sporting editor and also worthy of reproduction by any paper.

Berlo's New Racer.

P. J. Berlo showed the REFEREE his latest creation in racers Friday, and this one proves P. J. is a clever mechanic. The new "Berlo Racer" weighs nineteen and a quarter pounds. It has wooden rims, six-inch cranks, saddle fastened on a three-inch post, which is in turn solid on the frame. The wheel is geared to sixty-eight inches, has three and a quarter Bidwell-Thomas tires, and is painted gold, or rather pure gold leaf is used, while the words "Berlo Racer" are in bold black letters across the frame.

Brer Wilcox in Gotham.

Secretary E. C. Wilcox of the Stover company was a welcome visitor to Gotham last week, and the "old uns" and the "young uns" in the trade were glad to see the Phoenix hustler. [In order that the Freeport man went home in good time, Mrs. Wilcox and Wilcox, Jr., accompanied the Freeport youth, and notwithstanding an exciting time in Philadelphia, E. C. looked happy and reported that the family had enjoyed a delightful trip east, Ocean Grove, N. J., having claimed their attention for a few days.

THEY LIKE THE SCHEME.

GOTHAM DEALERS IN FAVOR OF A CYCLE BOARD OF TRADE.

A Majority Believe It Will Solve Many Problems—Some Do Not Think Well Of It, However—Some Of The Opinions.

The proposed "Cycle Dealers' Board of Trade," finds hearty endorsement, judging from the following opinions gathered by the REFEREE the past week. There seems to be a general opinion that the scheme should embrace and control prices, deal with price-cutting and regulate the installment and renting business, if the retailer be allowed to become a member of the board. The originators of the scheme, the law firm of Potter, Baldwin & Miner, in their prospectus and proposed by-laws, are seemingly contradictory on this point, and it seems to be an open question if the proposed scheme refers only to the manufacturer, wholesaler (pure and simple) and the jobber of cycles and sundries, for section or article five in the prospectus says: "Any person in good standing engaged in the manufacture of bicycles or cycling sundries, or dealing in the same, can become a member of this board of trade by purchasing one share of stock," etc. Then article one in the proposed by-laws says: "Any firm or person in the United States, of good standing, doing business as manufacturers of, or wholesale dealers in cycles and cycling goods, shall be eligible to membership." So the by-laws and prospectus do not agree as to the qualifications of a member. One wholesaler in New York thinks that the retailer should not be admitted to membership, and gave his reasons as follows: "The retailer is much more numerous than the wholesaler and could at any time combine and dictate the terms and policy of the proposed board." In answer a retailer said: "That's all nonsense; we could not do anything of the kind, for the manufacturers and wholesalers are so much better off financially and we are dependant to a great extent on them. The retailer wants protection from price-cutting and those who rent and steal wheels. Several abuses could be straightened out."

WHERE THE HEADQUARTERS WILL BE.

A question will arise as to where the headquarters of the board shall be, and it is learned Boston would like to get it, but a wholesaler of Gotham said that New York would earnestly protest against Boston being the place. A circular sent out by Rouse, Hazard & Company to the jobber and wholesaler is causing favorable comment, and its purpose is solely to combine the jobber and wholesaler against the man who orders a lot of wheels early in the season, and when pay-day comes ship them back to the seller. This would not interfere with the board of trade scheme, but the latter could no doubt regulate that matter also. Attached to Rouse, Hazard & Company's circular are the names of a majority of American wholesalers who are in sympathy with the move, for as George R. Bidwell remarked: "We have all suffered more or less by the return of wheels through people over-estimating their capacity of sales, or lack of pushing them." Mr. Bidwell said in response to a query: "Sit down and I'll tell you what I think of the matter. Yes, the dealers' board of trade is a good thing. It is something that has been wanted, and should receive the support of all who wish to see certain abuses corrected, and the trade controlled in a conserva-

tive and wholesome way. I cannot for the life of me understand why jealousy and ill-feeling should exist in the cycle trade. There is room for us all, and by working in a measure together we assist each other, and thereby strengthen, instead of weakening each other. I have signified our firm's willingness to join the proposed board of trade, and if wise counsel prevails in its deliberations and bickering and personal feeling are thrown aside, it will be a royal help to the cycle industry."

THE SCHEME TAKES WELL.

Secretary M. L. Bridgeman of the American Ormonde Company—"Mr. Willis and myself are in hearty sympathy with the movement, and our company did not hesitate to declare itself in line at the start. We believe in it and should like to see the headquarters in New York if possible."

Treasurer Douglass of the Premier Cycle Company—"While President Johnson is not here, I can voice what I know will be his opinion, and that is favorable to the scheme, for our trade has grown to such an extent that the board of trade would be of great assistance to us. Personally, I am in favor of anything that will assist the trade, and the proposed Cycle Dealers' Board of Trade will no doubt do so."

Messrs. P. Angoris and A. A. Atty of the Raleigh Company—"Why, certainly, count us in on the proposed scheme; the Raleigh Company will always favor anything that will keep sharks out of the trade and correct the many abuses which crop out. In England we have what is called the Wholesalers' Board of Trade, which issues monthly a black-list of people who are shaky and have not kept faith with any of the wholesalers, and the scheme is doing much good in weeding objectionable people out of the trade and protecting the members against many possible losses."

George S. Atwater, of the Stover Bicycle Manufacturing Company's Broadway wholesale and retail store—"It is full time something was done. I tried to organize a Washington dealers' association to do away with certain abuses there, but the principal objectors to the scheme kicked because they were afraid those who entered into the agreement would break it to satisfy their own greed. Now this proposed cycle dealers' board of trade is all right, providing stiff penalties (cash-in-advance penalties) are enforced when the board's rules are violated. That is the only basis on which I would, or would advise anybody, to join the association."

THEY ALL WANT IT.

Secretary Vogel of the Gendron Wheel Company, who was in New York on business, was run to earth, and this is what the genial Toledo man said—"There seems to be no valid reason why such an institution should not be a general thing for the cycle business. The furniture trade, the hardware trade, the stationers and the jewelers have their boards of trade, which seem to be working well, and therefore I see no reason why such an important and growing trade as the cycle business should not have its board. I am sure our company will favor it if it is organized on a basis of equity and reliability."

Messrs. Getz, Quinlan and Schwalbach of the Gendron New York force, all echoed their chief's opinion.

T. S. Ray, the quiet, sedate manager of the G. & J. Broadway store, thought the scheme would be acceptable—yea, a blessing to local dealers, in order that the installment and renting business and price-cutting could be regulated. He also thinks stiff penalties for wilfulness or forgetfulness in carrying out the rules should be enforced.

That gay, handsome vegetarian, Sidney Bowman, Zimmerman's friend, who presides at Bowman, Collins & Mult-hall's, Eighth avenue, believes that the retailer is in more need of protection than the wholesalers, and thinks the proposed board of trade "an all-firing good thing," and believes the retail trade should have every thought when the scheme is brought to a head. Price-cutters and those who resort to "ways that are dark and tricks that are vain," in the cycle trade, should be dealt with heavily, and with a stuffed club if need be.

ONE IS AGAINST IT.

L. B. ("Barney") Whymper of Schoveling, Daly & Gales' cycle department, is a young man of decided opinions and expresses them so forcibly that it bodes ill success for an argument—"No, we don't want anything to do with a board of trade; we belong to one now, and get reports from Dunn and Bradstreet, and can get one in quick order when we require it, so you can say, Mr. REFEREE, 'we pass'."

The elegant, impressive and altogether popular "Pap" Worden was seen in all his oriental splendor at the M. A. C. races, and although busy receiving congratulations on his splendid appearance, said: "Why, yes, the Remington people will undoubtedly favor any move that will control and benefit the cycle trade, and although, as you know, the Remington is too good a wheel to need protection [this with a truthful look toward seventeen reporters], we will willingly enter into an agreement or join a cycle dealers' board of trade in order to assist our less fortunate brothers. Yes, you can count us as one of the allies to the scheme."

Elliott Mason, manager of the Pope Manufacturing Company's New York house, remembers a previous attempt at forming a cycle dealers' association, and sighed when he thought of the end of some. "Do you think that the members will take enough interest in it? And do you think they will agree and stick to the rules and regulations?" These are some of the queries Mason, with half-closed eyes and a far-away look, shot at the interviewer. Elliott Mason is one of the "old uns" of the trade, and has sold Columbias so long, and has seen so many changes, that he has become very conservative; and when Mason talks he generally talks to the point. "Yes, in a way I favor the scheme, providing it is organized properly, and will properly fill the field it is intended for. The trade is powerful enough to support a first-class institution of the kind."

W. L. Duryea, Keating Wheel Company—"Yes, we should have a board of trade to control the cycle business, especially the wholesale, which means the jobber and manufacturer."

A FEW MORE OPINIONS.

Col. Scheffey, of A. M. Scheffey & Company, wholesalers: "I have not looked into the matter much, but if the board of trade is useful in another line it ought to be in the cycle trade. We are doing an extensive wholesale business, and of course consult Dunn or Bradstreet very often in regard to credits."

J. Freidenstein, of the Anglo-American Iron and Metal Company: "We place reliance on inquiries and Dunn and Bradstreet reports to protect us against possible losses, but our dealings are with manufacturers principally. I look upon such schemes as boards of trade as hand-les to some scheme or other, and to provide salaries for people and others uninterested. I don't think the plan will work; and if it does it won't be for long."

J. S. Bretz, of Rockaway Manufacturing Company, Liberty cycles: "We

sent our firm's name as a member the moment it was started. We not only believe in a cycle dealers' board of trade, but we think it a necessity and will work for it."

W. B. Stilwell, of Peck & Snyder's cycle department: "A good thing; can't be organized too soon."

Manager Day, of R. L. Coleman & Company, Barclay street, who is a smart and energetic wholesaler, said: "While our firm has not sent in its name as a proposed member, we think well of it and will undoubtedly join a dealers' board of trade if started properly."

McKee & Harrington could not be seen, but it was learned that McKee is in favor of some such organization to regulate the trade and has so expressed himself.

This, therefore, can be taken as a fair census of New York opinion on the proposed cycle dealers' board of trade, and the result was surprising, as it is overwhelming in favor of such an organization. A member of the law firm which started the scheme, said the replies to inquiries are almost unanimous in favor of an organization.

MEN WE ALL KNOW.

No. 4.—W. M. Brewster.

Chance, and the fact that St. Louis possessed the biggest brewery and a good name for hospitality, took the league meet of 1887 to the city by the "Big Muddy," and then the league became acquainted with a man who has been its treasurer ever since, and has become one of the most famous persons in the cycling world.

"Pop" Brewster first saw the light in Cincinnati, though how long ago is a secret locked firmly in the bosom of the family. No one seems to know except Pop himself, and he won't tell. At a guess we should place him at—well, say thirty-eight. He may be more—he certainly is not less. He has dabbled in railroad matters nearly all his life, and at the time of his introduction to the league and for a long time thereafter, was located at St. Louis. Two years ago he moved to Quincy, Ill., but now he has returned to Missouri, and will make his headquarters in the classic city of St. Joseph. He travels extensively, and knows the country from one end to the other.

"Pop" Brewster is a character rarely met with. I remember, once, writing something about him—the editor would not publish it then so I'll try to ring it in on him now—on this order: "He is a thoroughly well-informed, practical man. Everyone who is favored with his acquaintance is fond of him, and all that his enemies can find against him is that he lives in St. Louis. His stock of stories and fund of honor are inexhaustible."

He is well informed. Ask him who is the author of the latest dime novel; he knows. Ask him at what time of day his ancestors among the Mayflower deckhands first saw America; he knows. Ask him who'll be the next pres—well, he don't know; says he's out of league politics, and I really begin to believe it. For—pardon the digression—he doesn't seem to take the same interest as of old in league matters. A laxity of action seems to have come over him, and the strings which he once held so firmly and pulled with such excellent effect have been dropped, one by one, probably because other and more important interests have demanded his attention. It is to be hoped that the league is not to lose this excellent officer, but appearances favor the opinion that his interest is waning.

(One of the most hospitable natures in

the world is Brewster's. Nothing is too good for his friend. As an entertainer I have never seen his superior. "The Bill Nye of cycling," some have called him, and not inaptly, for a quaint style of delivery, ready wit, and superb cheek serve to keep any assembly in which he may be in a constant roar.

Not altogether unmixed with sarcasm, however, are remarks occasionally dropped by the treasurer, and cutting, indeed, have been some few of these let fall, quietly but effectively on the heads of friend and foe alike, for W. M. B. is no particular respecter of persons.

As a writer Brewster is great. With Garden at one end and Brewster at the other a pen and ink war was once waged

which would have driven many men into a lunatic asylum. That was before they met personally. Now, they hug each other and drink out of the same cup—figuratively. Many attempts have been made to induce him to write for the cycling press, and once he did so for awhile, but soon withdrew.

Thus we find the opinion of the world to be that Brewster, as an entertainer, is great, as a politician, a huge success and as a friend, most sincere. May the cycling fraternity be blessed by the addition of many men like him.

The Lincoln's Sunday Run.

The Lincoln Club run Sunday was to Milwaukee by boat Saturday evening. Frank Chase had full charge of the trip in the absence of Captain Newman. Owing to the races only a part of the crowd were a wheel. The riders went to Waukesha, those who were not on wheel's going by train and returning over the twenty-mile course in a bus. Peck, Jones and Spooner made a century over Milwaukee's regulation course. Eleven hours were consumed in the trip; eight hours riding time. The Waukesha country roads and hills, taken as a whole, are no better than the Elgin-Aurora century course. The party returned Sunday evening.

The C. R. C. Annual Century.

The annual century run of the Century Road Club occurs this Sunday over the Elgin-Aurora course. The start will be from the corner of Halsted street and Washington boulevard at 4 o'clock, sharp. Registry books will be opened in Hunt's place, where name, club, wheel ridden and time of starting will be taken. Captains will marshal their club men at some given point to avoid confusion and may register the party. All the arrangements en route will be very complete. This promises to be the greatest affair of the kind ever held, and to be so must have the hearty co-operation of every local centurion. Out-of-town riders will congregate at the Gault House on West Madison street Saturday night, that all may be called at the same time.

NEW ENGLISH RECORDS

TWO GREAT PERFORMANCES DURING THE PAST MONTH.

The Hundred-Mile Path and the Land's End to John O'Groat's Records Lowered—Tire Makers Busy—International Races.

LONDON, Aug. 20.—This has been another week of big performances. On Saturday, at Herne Hill, the Surrey B. C. tried the experiment of running a 100-mile path race with pacemakers. Owing, however, to the fact that these aids were only allowed to the leader, and men who were left had to struggle on unaided and as best they could, the event, so far as actual racing was concerned, proved a failure. Man after man, unable to go the pace in the first hour, cracked and then retired, the result being that before half the distance was covered only J. E. L. Bates and J. H. Adams were left on the path. Both were on rear-driving safeties, the former, who has fallen out with his old club-fellow and companion, S. F. Edge, having deserted the M. & C. geared ordinary for a New Howe safety, and Adams, of course, riding a Whitworth. In my last letter I believe I told you to look out for some records for Adams. In this very race he put up a new set of figures; from sixty-four miles to the finish, his 160 miles time being 5 hrs. 4 min. 18 3-5 sec. This, although less than a minute faster than Shorland's F. D. record, made in the first hundred miles of the Cuca cup race, is undoubtedly a very fine performance when the conditions under which Adams rode are taken into consideration. Throughout the whole of the race the wind was very strong, and during a great part of it rain fell quite heavily. Bates, although much fatigued by fast work in the first hour, when he was trying to break up S. F. Edge, finished the distance in 5 hrs. 8 min. 55 3-5 sec. Adams last mile was covered in 3 min. 16 2-5 sec. and the last quarter-mile in 47 4-5 sec.

FLETCHER'S BIG RIDE.

On Tuesday the veteran T. R. Marriott of the firm of Marriott & Cooper put in a good performance on the road with F. W. Briggs of the North Road C. C. Mounted on an Olympia tandem tricycle the pair established a record for that class of machine from London to York, doing the distance in 15 hrs. 20 min. On Wednesday R. H. Carlisle reduced the Edinburgh to London record by some hours. The big performance of the week, however, has been that of Lawrence Fletcher, the famous secretary of the equally famous Anfield B. C. Starting on Monday, he succeeded in beating the record between Land's End and John O'Groat's, which T. A. Edge established this summer, by forty-five minutes. His time was five minutes under four days. Fletcher is a man of many parts. For years he has been one of our best road riders. He is a most capable secretary and organizer; he is a forcible orator and also an author of promise. The great house of Cassell & Company has lately published a romance of the Rider Haggard type from his pen. The title is "Into the Unknown," and the first edition—a large one—is already exhausted, and a second is being prepared.

BUSINESS MATTERS.

Last week I told you that the tire makers were more busy than the cycle makers, and this continues to be the case.

Messrs. Gormelly & Jeffrey have every reason to be satisfied with their experi-

ment of opening offices in Coventry. Already the business promises well.

Messrs. Wittens & Bradbury of the Preston Davies Tire Company have been making a business tour through the country, and they also are contemplating opening a depot in Coventry. To my mind the Preston Davies tire is one of the very best and one of the very few of those which will be largely used in the future.

Mr. A. H. Overman is still here and leaves for home about the middle of next month. This week Mr. Jaffray of the REFEREE left us, and the advent of Mr. J. J. Prial is announced. Next week Mr. Oscar A. Pappe of Pittsburg, Pa., departs for Liverpool, after making a long tour on a Reform safety through parts of Europe, Asia and Africa. He intends to visit the World's fair at Chicago and then to start on another long trip, this time visiting the southern hemisphere.

FOR THREE WORLD'S CHAMPIONSHIPS.

There is a prospect of the institution of world's championships at an early date. At the last meeting of the N. C. U. general committee Mr. Henry Sturmer mooted a scheme, and it was left to him to form a sub-committee to consult with the governing associations in other countries. His idea is that there should be three races—one mile, ten miles and fifty miles—each year, and that the first meeting should take place in Chicago in 1893.

Just as I close this letter I learn that at Coventry, this afternoon, E. Oxborrow lowered the professional mile, safety, record to 2 min. 21 3-5 sec. The correctness of the time is vouched for by a number of watch-holders, including E. H. Godbold of *Bicycling News*.

The West Side Track Scheme.

The west side will have a track. Charles H. Stephens has secured an option for a five-year lease of ground at Forest Home station of the Wisconsin Central, and Chicago, St. Paul & Kansas City Railroads. The tract is ten acres in extent and can be leased for five years with an option for another five years.

It is easily accessible by electric road and may be reached over boulevard roads. It is proposed to build a three-lap track of boards, thirty feet wide on the back stretch and forty feet on the home stretch, which is to be 490 feet long. Mr. Stephens is an enthusiastic and level-headed worker in the Illinois club, which organization has subscribed \$1,500 of the necessary \$4,000. All the west side clubs are at work with subscription papers. The west side men have had offers to consider, have entreated, only to have their ardor dampened by failure. Their fast men have grumbled about it and have been unable to spare the time and expense for training at Parkside. That many are speedy has been proved by showings made, on the road mainly, but often on the path. The Illinois club, once a prominent factor in local racing, has now come toward the front again with a number of good men. Had they the chance more could be developed.

Hendee Was Worried.

George M. Hendee (who, according to our solid but slow-going friend, *Bicycling World*, would soon sail for England, accompanied by his bicycle) arrived home from a month's trip abroad last week, and brought back some experience, a few lamps, foot balls and other knick-knacks. Hendee was afraid of the customs people but escaped unharmed. Mrs. Hendee, who is visiting in Paris, will remain in the gay French capital some time. J. C. Spears of Worcester, who makes the Majestic for Hurlbert & Company, accompanied Hendee on the trip.

TELEPHONE MODEL "D."

WEIGHT, 36 LBS.

MORGAN & WRIGHT PNEUMATIC TIRES, \$150.

KIRKWOOD, MILLER & COMPANY,

PEORIA, ILLINOIS.

All Orders Filled Promptly.

But Sanger Didn't Show Up.

MILWAUKEE, Aug. 29.—A great crowd of wheelmen assembled at the Union depot Saturday evening to welcome home from the Chicago Cycling Club's meet their club mate, Walter Sanger. The large throng was not composed entirely of wheelmen, but was augmented by all kinds of people anxious to do honor to the Milwaukee flyer. As the train rolled into the depot the building fairly echoed with the club's familiar cry. It was the intention to give Sanger a demonstration such as he would not soon forget, as a testimonial of their kind feeling toward him as a brother wheelman and their appreciation of his desire to carry to the front the colors of the Milwaukee Wheelmen. An extensive programme had been prepared and all arrangements made, but the boys were doomed to disappointment. Sanger failed to show up. Wallie, like Zimmerman, is of a modest, retiring disposition, and on hearing that a demonstration was on foot stayed over in Chicago until Sunday.

MILWAUKEE MEN DID WELL.

Sanger's work at Chicago was very satisfactory to his many admirers and friends in Milwaukee. His riding the first day of the meet called forth unbounded praise from the large crowd

present, and special recognition and generous treatment from the great Chicago dailies. All the Milwaukee men did well and are worthy of hearty praise. Price made a good showing, also Andrae, Parks and Schimmel.

TRACK SCHEMES ON FOOT.

The various Milwaukee dailies give a great deal of space to the writing up of what they term bicycle news. The dearth of sporting news in general for some time past has led the different sporting editors to vie with each other in the sensational way. Everything appertaining to the sport is dished up. It would seem that their only object is to write against space and swell every little item of interest up to such an extent that it loses all resemblance of the truth. The latest scheme promulgated in the columns of one daily journal is the building in Athletic Park of a bicycle track by the proprietor, H. P. Quinn. It gives the information that the Milwaukee Wheelmen have agreed to have him build a four-lap track, which is guaranteed to be the fastest in the country, at an expenditure of \$3,000 or \$4,000. The truth of the matter is the wheelmen, while fully appreciating the need of a track, are alive to the fact that in order for them to reap the harvest their efforts in the past year deserve, they must build a track themselves and exercise as far as possible absolute control over all racing events. The Milwaukee Wheelmen have quite a little nest-egg laid by for the purpose of building a track, and the money made at their field day sports and the minstrel

show to be given this fall will be devoted to the project.

ON A TRIP ABROAD.

Julius Andrae, the veteran bicycle dealer, departed for Germany last week, leaving New York Tuesday on the steamer Havel. This is Mr. Andrae's first vacation in many years, and the unexpected announcement of his proposed trip caused no little commotion in the establishment. It is just thirty-seven years since he landed in this country, and thirty years ago he laid the foundation of his present large business. He first began the repairing of bicycles in 1879, and commenced selling them in 1885. Mr. Andrae deserves the much needed rest, and will visit the home of his boyhood and spend several months with relatives and friends.

SMALL PARAGRAPHS.

H. A. Coleman, chairman of the entertainment committee of the Milwaukee Wheelmen, accompanied Sanger in his swing around the circle, taking in Sarnia, Detroit and Chicago.

Fred Schroeder and John Jay Baumgartner, of the Milwaukee Wheelmen's racing board, attended the three C.'s meet at Chicago last week for the purpose of securing additions to the entries for the field day races Sept. 10.

Fred Schmitz, ex-state champion, has resigned his position with the Sercombe-Bolte Manufacturing Company, and has engaged in the photograph business.

JACK ROYAL.

Two New Denver Cycle Clubs.

DENVER, Aug. 27:—The Colorado Wheelmen and the Overman Wheel Company Club are the latest additions to Denver's cycling organizations. Both are quite original; and one of them, at least, deserves more than passing mention. The Colorado Wheelmen mem-

bership is at present limited to twenty-five, which limit is now filled. The members are mostly racing men, and have organized with the idea of benefiting one another by working together. Instead of attempting to procure and fit up a white elephant in the guise of a club house, they expect to equip some suitable quarters as a first-class gymnasium, where men that are training or that want to keep in condition can have the same and even more privileges at much less expense than through the agency of an athletic club. The officers are: President, W. W. Hoag; captain, E. R. Pynchon; first lieutenant, W. Goyett; treasurer, R. H. Biegel; secretary, J. S. Van Buskirk; manager, Louis Block. Among the members of the club are, last year's road race time medal winner, this year's time medal winner, the crack century rider and the state champion, as well as several lesser lights in the local racing world. All around it is an organization that will be heard from sooner or later.

THE OTHER CLUB.

The Overman Wheel Company's Club is composed of the thirteen employes of the Denver branch. The uniform of the male members consists of black pants and stockings, white cap and sweater. The company's monogram, when worked in on the white sweater with black material, is very striking.

The Stokes Manufacturing Company is now quartered in its new location at Eighteenth and Stout, next door to the Overman Wheel Company. With these houses here Denver can boast of as handsome cycle stores as one could find.

With the Stokes people, the Overman, and the Kenwood and Rambler agencies all within a block of Eighteenth and Stout streets, this part of town can easily be called a second cycle row. Higgins.

Hannan and Whitney will have to move to be in fashion.

Labor day, Sept. 5, the Denver Athletic Club gives its fall field sports. Among the events are a half and one-mile, open, and two and five-mile, handicap bicycle races. Most of the local cracks will appear, although few have had time to train, on account of the club delaying the advertising of the event.

SPECTRE.

Dakota's L. A. W. Membership.

MITCHELL, S. D., Aug. 27.—South Dakota in the last few months, from a list which placed her at the foot of the ladder as regards league members, has been jumping upwards at quite a rapid rate. At the beginning of the year her membership list contained but four names; at this writing it includes sixty-four names—quite an increase. This rapid increase has in part been due to the work of W. J. Healey, secretary of the Mitchell Wheelmen, who has spent considerable time and money in an effort to secure a membership sufficient to entitle the state to representation in the national body. The city of Aberdeen sent in eighteen applications, Watertown six or seven, and Mitchell twenty-three. It is the intention of the cyclers in the state to hold quite a meet next year so far as prize list is concerned.

Fred Pattee, the genial representative of Rouse, Hazard & Company, of Peoria, was in town transacting business the past week. He also made a flying visit to the Svendsgaard Company, Fergus Falls, Minn., and Hutchinson & Phillips, of Sioux City, Iowa, as well as a visit to the Nebraska Cycle Company, of Lincoln, in which concern Pattee is interested. While here he took in a sample of the immense roads of this section.

The abundant crops produced in this state this year will be the means of caus-

ing a good demand for wheels this fall and the coming year.

To Try Military Cycling.

ST. LOUIS, Aug. 29.—George M. Wilder and O. L. Rule rode to Jefferson Barracks yesterday and completed all arrangements for the Cycling Club's first attempt at military service. Fifteen members of the club will ride to the barracks early Sunday morning, Sept. 18, and after strapping on their carbines, etc., will be given orders by Colonel Young to proceed at once to some designated point and to send two men back from there at all possible speed, to make a full report to him regarding condition of route, together with sketch of country gone through. After sending their two men back to headquarters to report, the main body will start back to the barracks at a moderate pace.

The distance to be traveled will not be over sixty miles and it will not be a race, as the men must keep together. The two men sent to report on the roads are not likely to have any trouble sketching the roads, as there are very few roads in the St. Louis riding district that the Cycling Club boys do not know like a book.

Character on the Wheel.

When it was said of a successful wheelman that his prestige was won by his legs and not by his brains, or words to that effect, a grave error was made. If the originator of the thought had witnessed the struggle for supremacy between the contesting wheelmen on the road between Waukesha and Milwaukee; and if he was possessed of intelligent observation and discrimination, he would not have spoken so carelessly.

That contest (and as well others of like character) was one of brains as well as of brawn.

There was driving power behind the eyes that gleamed over the forewheel as determined and strong as the power that moved the pedals.

Indeed, is it not true that the muscle is brought into activity only through the will power—the brain?

When the contestants who left Waukesha reached the foot of Undertaker's hill the real struggle began. The trained muscle was but the servant of the thinking force.

Look at the principal contestants. Observe, as they begin the ascent, the courage, the cunning, the diplomacy. Strength is to measure strength; endurance to measure endurance; strategy to outwit strategy. Speed will be determined later.

There goes an ambitious rider who thinks only of his present strength; but he is trailing his vitality on the rough road while a more thoughtful competitor drives, carefully, avoiding the dangerous places and marking out a straighter line. Still another racer, more mindful of his vitality than the one now far in advance on the hill, lags further in the rear than other speedy men. And so, throughout the struggling mass, the thinking force will be found with the speedy, successful force.

But finally the last rough place and the last hill are passed, and, like a sunburst after a storm, the rainbow vision of success rises over the level path beyond for those who thought as they rode.

Now catch a gleam of sparkling eyes! See the tensify of muscle, urged into activity by the intensity of purpose!

From hip-joint upward, all emotion. From hip-joint downward, all motion. Mind, heart, soul, muscle—all in harmonious combination—fierce, determined, fearless, even reckless now! The glory of victory is already burning in their hearts. It is a grand race, and one of

brain more than of brawn. The prestige of success cannot lie in the winner's limbs alone. The guiding power is in his head.

D.

Ulbricht Makes a Record.

Emil Ulbricht established a record for the Elgin-Aurora course, Sunday, riding the 104 miles in 7:13:00 2-5. He was timed by J. M. Erwin and George G. Greenburg, and paced as follows: To Melrose by W. J. McMahon and L. Tagholm; to Addison by John Erickson and L. Tagholm; to Ontarioville by G. Paulsen, and into Elgin by J. Hoeck. He reached Elgin in 2:25, ten minutes behind Cutting's claimed time. The roads were rough and rutty. Wilkinson, of Elgin, took him into Aurora in 1:20, placing him five minutes ahead of Cutting's time. Here he was rubbed down and had his tire fixed. To Naperville, Bartholdi and George Webb took him, and G. Olsen and "Bob" Fisher paced him to Downer's Grove. From here to Riverside he rode on a flat tire with Erickson and W. Christiansen pacing. Erickson and Woolas took him to Oak Park, and M. Nessel and J. Clark to the finish. He looked badly used up. Over 500 people saw the finish of the ride. His time from Aurora was 3:45, against a head wind. About a half-hour in all was lost. This is not better than Cutting's time, but is record, as it was properly checked and timed.

On Sunday the Peoria Bicycle Club will run to Lacon and take dinner at the hotel in that place, and it is safe to say the boys will do ample justice to the viands set before them. Lacon is situated on the east bank of the Illinois river, thirty miles north of Peoria. The road from Peoria to the little city follows the Illinois river, making the same graceful curves and stretches as does that noted stream.

Two Big Days at Parkside.

The two days' meet of the Chicago Cycling Club at Parkside last Friday and Saturday was unquestionably the most successful affair of the kind ever held in the Garden City in point of attendance, good racing and finances. The event was gotten up hurriedly, but carefully, and as a result the Chicago club is in the neighborhood of a thousand dollars the richer, while the people of the city have had a taste of good racing, notwithstanding Zimmerman and other cranks were not present. It is doubtful if more people could have been accommodated on the grounds, for there is a very limited seating capacity in the grand stand and club house. Friday several hundred ladies were admitted free, and it is safe to say every one saw the races Saturday. It was a crowd of high-class people each day, and intense interest was manifested in the races, particularly by the fair sex.

POOR TRANSPORTATION FACILITIES.

Notwithstanding the fact that the Illinois Central people had been requested to put on extra cars each day to carry the estimated large crowds, only the regular trains were run, and as a result the people were compelled to ride on top of cars and on the engine's tender. The trains were behind time, and Saturday the races began an hour late. Many people at Van Buren street were unable to board the train at all, and some returned home in disgust. It seems that when a big cycle event is on, and the Illinois Central is depended upon to carry the crowds, there is always a mishap and the people do not reach their destination at the time figured on. Good railroad facilities would have increased the gate receipts materially. Fortunately for the ticket sellers at the gate, many had purchased their tickets before hand and on the train, and as a result there was little delay at the gate, but it took six and eight to take the tickets at times.

THE CROWD WAS GREAT.

So eager were the people that they went over the fences, and club members collected tickets along the line. A rush was made for the grand stand, particularly on Saturday, and in a few moments every seat was filled, while the verandahs and club house roof, and every available spot around the track were occupied, packed in some places. On Friday at least 2,000 attended, and Saturday there were between 3,500 and 4,000 people on the grounds. Englishmen would laugh at such a "gate," but it beats anything Chicago ever saw—her people are just now becoming interested in cycle races, and another year very successful tournaments may be run. The Parkside grounds will not accommodate more than 4,500 at the most, and a large proportion of that number is compelled to stand. It was an orderly crowd and easily managed. A police sergeant said: "That's the best behaved crowd for its size I ever saw; our services were useless here."

GROUNDS AND TRACK IN GOOD ORDER.

The grounds of the cricket club were in apple-pie order, also the club house, but it was due to the race committee that such was the state of affairs, for the

members of the club and the committee cleaned the grounds and swept the house themselves, notwithstanding the fact that the grounds were paid for. The track, too, was put in good shape at the instance of the C. C. C., and half the expense was borne by the club leasing the grounds. It is a queer way to run things, but the only thing that could be done with the grounds management. It might here be stated that if the cricket club would be liberal to some extent the Parkside grounds would prove a profitable investment, but as things are now run it will be a long time before they will pay expenses.

KEPT THE TRACK CLEARED.

Considering the size of the crowd the track and enclosure were kept well cleared, so that the officials had some chance to work. There was a large delegation of daily newspaper men, and some of those who found flaws in the management were the ones who were most in the way. The regular cycling newsgatherers knew their places and helped to keep order. The Lincoln C. C. band occupied a prominent position in a tent on Friday, but as the members missed the train Saturday the musicians did not put in an appearance on that day, much to the disappointment of the crowd. Starter Conkling and Clerk Anderson kept the riders busy, and every race was started with great promptness.

* * *

Friday's Races.

A very few moments after 3 o'clock the novice race was started with an even baker's dozen of men, seven having been barred because of having won prizes on the road. Allen set the pace to the half, when Dale took it up and opened a wide gap, winning by fifty yards in 3:00 2-5. The first start was marred by a fall, and in the second Clark fell at the first turn.

HALF-MILE, HANDICAP.

Lumsden was on scratch and Davis at thirty-five yards, and the latter had it all his own way in the first heat, winning by twenty-five yards, with Leonhardt a few feet ahead of Lumsden, who did not gain on Davis at all. There was more interest in the second heat, Van Sicken winning from twenty yards, and Helmich, sixty yards, and Rhodes, scratch, being close up. In the third heat Slusser took things easy and won from the eighty-yard mark in 1:05 4-5, while Thorne beat out Johnson for second place with an advantage of twenty yards in handicap. Sanger, in the fourth heat, caught the field from scratch on the last eighth, and had no trouble in getting in first, with Nelson second from eighty yards. Sanger mowed down his men beautifully, and the crowd gave him a hearty cheer as he crossed the tape. Smith won the last heat by twenty-five yards, though Bliss made a hard fight to make up sixty-five yards. Githens did not make up the ten yards on Bliss, and was, in fact, unplaced.

TWO-MILE, TEAM.

It seems to be good luck or good riding on the part of the Chicago C. C. team, for the club has not lost a team race this season. Lumsden, Bode and Winship battled for the big club, while Steele, Stilwell and Helmich attended to the Lake View's interests. Points were counted at the end of each mile, the first being finished first by Lumsden, then by Bode, Steele, Helmich, Winship and Stilwell—13 to 8 points for the Chicago

gos. The last mile Lumsden also came in first, with Bode, Stilwell, Steele, Helmich and Winship close up—12 to 9; total, 25 to 17 points.

ONE-MILE, OPEN.

The mile, open, brought out fourteen of the best in the two heats, each of which made a fine race. Referee Sheridan placed a 2:40 time limit on the heats, and both were well inside. Munger, Van Sicken and Bliss kept up a hot pace in the first heat, and Andrae quit after the first lap, Callan on the second and Ballard, thinking the third to be the last lap, spurted, only to be compelled to quit. Munger won well ahead of Van Sicken and Bliss, who nearly made a dead heat, the former winning by an inch; Price fourth.

In the second heat George Thorne fell at about fifty yards, while Johnson and Sanger kept up a merry gait, with Githens close up. On the spurt Sanger went to the front and won from Githens, Johnson and Davis close up and Hunter some yards behind.

THREE-MILE HANDICAP.

This event brought out just thirty starters, all the scratch men starting but Lumsden. It was a big field for a quarter-mile track and the scorers were kept busy, the riders being stretched out away around the track. The scratch men, Rhodes, Munger, Sanger and Githens, soon caught the seventy-five-yard men, Johnson, Van Sicken and Bliss, and a moment later George Thorne was picked up. This bunch kept well together and cut down the field with apparent ease. The spurt was commenced by Munger on the last quarter, Sanger and Githens keeping close up. At the last turn Sanger went up and passed Munger, while Githens closed up the gap, went past Sanger, and won by an open length, George Thorne and Leonhardt being but a few yards back.

HALF-MILE SCRATCH.

Rhodes, Munger, Sanger, Ballard, Helmich, Davis, Dever, Hunter and Price started in this event, Helmich making pace for the first quarter. On the turn Hunter ran wild, forcing Davis to the edge and nearly over the bank. Ballard was also forced up and went over, receiving several bad cuts. Sanger and Price improved their opportunity when the others left the pole, and got a good lead, finishing first and second, respectively, with ease, while Munger got third and Rhodes quit altogether.

FIVE-MILE, HANDICAP.

The last event on the card was the five mile handicap, and so large was the field that it was almost impossible to tell how the race stood, except that Tagholm was in the lead, for with five hundred yards the scratch men only made pace for him and he hung on to the last, being still a lap ahead of them at the finish. It was a grand race and all the good men were in it. Repeatedly the back mark men tried to shake off Tagholm, but he held on. There was an immense field and but one accident, Price falling at about three and a half miles. Steele from 400 yards worked like a beaver and caught everybody ahead of him but Tagholm, while Leonhardt lost second place only by a scratch.

THE SUMMARIES.

One-mile, novice—Russell Dale, I. C. C., 1; Leroy Rogers, G. C. W., 2; J. S. Allen, 3; time, 3:00 2-5. Also started, E. Berger, John Schneider, J. Clark, who fell, and C. J. Gilmore.

Half-mile, handicap—First heat—C. W. Davis, C. C. C., 35 yds., 1; A. Leonhardt, Cal. W., 75 yds., 2; time, 1:13 2-5. Also started, A. E. Lumsden, scratch; R. M. Tidd, St. Louis, 50 yds.; H. A. Dever, Rockford, 60 yds.; C. J. Gilmore, 75 yds.; A. W. Swigert, 75 yds.

Second heat—N. H. Van Sicken, C. C. C., 20 yds., 1; A. Helmich, Jr., L. V. C. C., 60 yds., 2; W. A. Rhodes, I. C. C., scratch, 3; time, 1:11 1-5. Also started, E. C. Bode, C. C. C., 35 yds.; F. E.

Hunter, Indianapolis, 50 yds.; M. Nessel, Col. W., 60 yds.; D. Dreier, C. C. C., 70 yds.; J. C. Clark, Col. W., 75 yds.; J. L. Allen, 80 yds.

Third heat—R. W. Slusser, L. C. C., 80 yds., 1; George A. Thorne, C. C. C., 45 yds., 2; J. S. Johnson, Minneapolis, 20 yds., 3; time, 1:05 4-5. Also started, L. D. Munger, C. C. C., scratch; C. W. Price, Milwaukee, 40 yds.; J. F. Stillwell, L. C. C., 55 yds.; C. A. Fox, L. V. C. C., 60 yds.; G. W. Mitchell, 70 yds.

Fourth heat—W. C. Sanger, scratch, 1; M. Nelson, Cal. W., 80 yds., 2; C. E. Parkes, Milwaukee, 60 yds., 3; time, 1:11 1-5. Also started, H. R. Winship, E. C. C., 30 yds.; E. W. Ballard, C. C. C., 40 yds.; J. Schneider, Cal. W., 65 yds.; O. C. Green, C. C. C., 70 yds.; J. E. Lonn, La Porte, Ind., 100 yds.; O. R. Barnett, C. C. W., 90 yds.

Fifth heat—C. P. Smith, I. C. C., 75 yds., 1; J. P. Bliss, C. C. C., 10 yds., 2; F. T. Andrae, Milwaukee, 40 yds., 3; time, 1:13 2-5. Also started, H. A. Githens, C. C. C., scratch; Roy Keator, L. C. C., 55 yds.; F. W. Newland, I. C. C., 60 yds.; E. Berger, 75 yds.

Two-mile team race (points scored at end of each mile)—Chicago Cycling Club, Lumsden, Bode, Winship, 25 points; Lake View Cycling Club, Steele, Stilwell, Helmich, 17 points. Lumsden and Bode finished first and second, respectively, in each mile.

One-mile, open—First heat—L. D. Munger, C. C. C., 1; N. H. Van Sicken, C. C. C., 2; J. P. Bliss, C. C. C., 3; C. W. Price, Milwaukee, 4. Also started, E. W. Ballard, C. C. C.; W. Callan, L. V. C. C.; F. T. Andrae, Milwaukee.

Second heat—W. C. Sanger, Milwaukee, 1; H. A. Githens, C. C. C., 2; J. S. Johnson, Minneapolis, 3; C. W. Davis, C. C. C., 4. Also started, G. A. Thorne, C. C. C.; F. E. Hunter, Indianapolis; W. A. Rhodes, I. C. C.

Three-mile, handicap—H. A. Githens, C. C. C., scratch, 1; W. C. Sanger, Milwaukee, scratch, 2; L. D. Munger, scratch, 3; G. A. Thorne, C. C. C., 175 yds., 4; A. Leonhardt, Cal. W., 350 yds., 5; time, 8:33 3-5. Also started, Johnson, Van Sicken, Bliss (fell), Winship, Nessel, Tidd (fell), Ulbricht, Keator, Stillwell, Peck, Fox, Helmich, Parkes, Newland, Dreier, Callan, Smith, Mitchell, Swigert, Barnett.

Half-mile, open—W. C. Sanger, Milwaukee, 1; C. W. Price, Milwaukee, 2; L. D. Munger, C. C. C., 3; time, 1:18 2-5. Time limit, 1:18, but race allowed. Also started, Ballard, Helmich, Davis, Dever, Hunter.

Two-mile, handicap—L. Tagholm, Col. W., 500 yds., 1; Gus Steele, L. V. C. C., 400 yds., 2; A. Leonhardt, Cal. W., 500 yds., 3; J. Schneider, Cal. W., 475 yds., 4; O. C. Green, C. C. C., 340 yds., 5; time, 14:56. Also started, Munger, Rhodes, Sanger, Githens, Bliss, Johnson, Van Sicken, Andrae, Winship, Thorne, Ballard, Price, Keator, Ulbricht, Stillwell, Nessel, Peck, Smith, Callan, Barnett.

* * *

Saturday's Events.

There was more interest taken in the races on Saturday than on the previous day, and the racing was better, too. Van Sicken fell on the west turn, and Bliss received another tumble, but neither was hurt. Ballard did not ride, owing to the cuts received Friday.

HALF-MILE, HANDICAP, FINAL.

The first event on the programme was the final of the half-mile handicap, and all who qualified started. Davis, from fifteen yards, finished first easily, six yards in front of Van Sicken (20 yards), who was two lengths ahead of Sanger (scratch). Sanger nearly caught Davis at one time, but the speedy Chicago man opened up a gap and won in 1:09 2-5 from his mark.

MILE, THREE-MINUTE CLASS.

This event had thirty-three entries, and was run in two heats. Steele had little trouble in getting first place in the first heat, with Parkes, Green and Oakley close up, the time being 2:47 2-5. In the second heat Dale spurted the last eighth and won easily in 2:53 1-5, with Leonhardt, Barnett and Hrach in the order named. Parkes, Dale and Barnett fell in the final, and Steele crossed the tape first and Leonhardt second. Both men were disqualified, however, the first for looking around and Leonhardt because he cut across the field. Green, who finished third, was given the race, and Oakley was awarded second.

MILE HANDICAP.

There were four heats in the mile handicap, Parks being first in the first heat, with Lumsden second and Andrae third. Van Sicken fell on the west turn. In the second heat Sanger won

THE TOURIST.

The Highest Grade Bicycle in the World. Perfect in Material, Construction and Finish.

Made at Colt's West Armory, Hartford, Conn., under the same system and with the same attention to detail followed in the manufacture of Colt's fine fire arms. Gun steel forgings; all cones and bearing cups cut from the bar, not stamped.

WEIGHT: { Road Racer, 34 lbs., } PRICE, \$150
 { Roadster, 42 lbs., }

Fitted with BIDWELL (THOMAS) PNEUMATIC TIRES, guaranteed against puncture, bursting and leakage.

Tire Factory, 49-51 West 66th Street, New York.

from scratch amid great cheering, while Leonhardt, from 145 yards, was second, and Rhodes third from forty-five yards. The two following heats were merged into one, three men to ride in the final. Johnson had forty-five yards and won by a half length, George Thorne being second and Githens third from twenty-five yards. The final fell to Leonhardt with Parkes second and Johnson third.

THE BOYS' RACE.

This was probably the most interesting event of the day, and little twelve-year-old Paul Schimmel and Fred Kurtz went over the tape almost neck and neck, the former an inch or two in the lead. Callan, who never should have been in the race, was beaten out by two much smaller lads, and finished an extremely poor third. Schimmel's time was 2:52. He was advised not to go into the race because the others were so much older and larger, on he replied: "What the—do I care," as big as life. He'll make a good one some day.

QUARTER-MILE, SCRATCH.

On the result of this race Milwaukeeans

fidet, but they took the defeat gracefully and were among the first to congratulate the victor.

TWO-MILE SCRATCH.

Munger will travel to Springfield at the expense of the *Mail*, having captured the trip-to-Springfield prize in the two-mile scratch race. A time limit of 5:45 was placed on the race by Referee Sheridan, and the winner's time was 5:30 2-5. The men changed pace and Rhodes attempted a run-away game, but soon dropped out altogether. George Thorne got in next to Munger, Bliss third, Davis fourth and Githens fifth—five C. C. C. men in a string.

ONE-MILE ORDINARY.

The three-mile ordinary event was changed to a one-mile to save time. Wing, of Ottawa, was on a pneumatic pony Star, Young on a pneumatic ordinary, and Bamberger on a solid ordinary. Wing romped away on the start and won in 2:56 3-5, while Bamberger beat out Young. All looked around and only this saved the first man from being disqualified.

I. C. C., 2; time, 2:44 1-5. Steele finished with ease, but was disqualified for looking around.

One-mile, handicap—First heat—C. E. Parkes, Milwaukee, 125 yds., 1; A. E. Lumsden, C. C. C., 23 yds., 2; F. T. Andrae, 95 yds., 3; time, 2:33 4-5. Also started Van Sicklen (fell), Tidd, Mitchell, Barnett.

Second heat—W. C. Sanger, Milwaukee, scratch, 1; A. Leonhardt, Cal. W., 145 yds., 2; W. A. Rhodes, I. C. C., 45 yds., 3; time, 2:33 1-5. Also started Dever.

Third heat—J. S. Johnson, Minneapolis, 45 yds., 1; G. A. Thorne, C. C. C., 75 yds., 2; H. A. Githens, C. C. C., 25 yds., 3; time, 2:30 2-5. This was third and fourth combined. Also started Hunter, Nesel, Newland, Munger, Helmich, Gilmore.

Fourth heat—O. C. Green, C. C. C., 150 yds., 1; C. W. Davis, C. C. C., 40 yds., 2; time, 2:31 2-5. Also started Bl's, Price, Steele, Keator, Swigert.

Final heat—A. Leonhardt, 1; C. E. Parkes, 2; J. S. Johnson, 3; time, 2:28 3-5.

One-mile, boys—Paul Schimmel, Milwaukee, 1; Fred Kurtz, 2; W. Callan, 3; time, 2:52.

One-mile, open, final—W. C. Sanger, Milwaukee, 1; J. S. Johnson, Minneapolis, 2; H. A. Githens, C. C. C., 3; time, 2:47. Also started L. D. Munger, Bliss (fell), Price, Davis.

Quarter-mile, scratch—First heat—A. E. Lumsden and W. C. Sanger (tie), 1; R. M. Tidd, St. Louis, 2; time, :36. Also rode Rhodes, Van Sicklen, Price, Dever.

Second heat—L. D. Munger, 1; G. W. Mitchell, 2; time, :37. Also rode Thorne, Helmich, Hunter.

The Philadelphia Races.

Rain for several days previous and threatening weather all day Saturday, had a disastrous effect on the Quakers' meet, but under the circumstances it was a most successful affair, although disappointing to the club, which had expected an attendance of several thousand people. There were some 1,500 present, notwithstanding the gloomy outlook, and shortly after the races were commenced the sun came out bright and warm. The track was wet and soggy and unridable at the pole in some places. Tyler, Relph, Riverside Smith and Hazleton were the principal men from out of town, although there was an abundance of local talent, which showed up in great form.

Tyler won the quarter-mile open in good shape, but met defeat in both the half and mile open events, the only two in which Taxis rode. In the mile, Smith went for and captured the lap prizes, but on the finish Tyler set pace for nearly the whole lap. Taxis took advantage of this, and challenged on the stretch, win-

left quite a little money in Chicago. They thought Sanger would beat Lumsden. In the first heat Lumsden and Sanger ran a dead heat for first place, according to the judges, but spectators say Lumsden won by six or eight inches. There was no cheering on either side then; all waited for the final. Price and Tidd also qualified in this heat, and in the second it was Munger, Andrae, Bliss and Bode in the order named. Andrae was disqualified for looking around, and the rule was made to apply to the remainder of the races. In the final Lumsden, Sanger, Price, Munger and Bliss started. Lumsden took the lead immediately and got well ahead. On the east turn Sanger ran a little wild, while Lumsden took the turn perfectly. The latter kept his lead and Sanger never gained an inch; in fact, he seemed to lose a trifle, and amid the wildest cheers the Chicago man shot over the tape three lengths ahead, while Munger and Bliss brought up the rear. The time, 3:5 2-5 sec., is record for the track for a starting quarter. The loss of this race by Sanger made the Milwaukeeans quite disconsolate. They had expected to see him beat the Chicago man and were con-

FIVE-MILE, INVITATION, HANDICAP.

Great interest was centered in this race, the Walker cup, held by C. T. Kinsley, being the first prize. Sanger, Munger, Lumsden, Andrae and Ballad did not ride, and Githens quit early in the race. Rhodes soon fell back and was pacing Kinsley, for which he was ordered off the track. Van Sicklen's sprocket wheel became loose and he was out, while Johnson and Bliss at 170 yards caught Thorne (300 yards) in two miles. This bunch then kept overhauling the field, and at four miles had all passed. The spurt of the last quarter was a grand one, and Thorne showed his ability by getting in first by two or three lengths, Johnson second, Bliss third, Keator fourth and Steele fifth.

THE SUMMARIES.

Half-mile, handicap, final—C. W. Davis, C. C. C., 15 yds., 1; N. H. Van Sicklen, C. C. C., 30 yds., 2; W. C. Sanger, scratch, 3; time, 1:09 1-2. Also started Bliss, Johnson, Thorne, Tidd, Leonhardt, Helmich, Slusser, Nelson and Smith.

One-mile, three minute class—First heat—Gus Steele, L. V. C. C., 1; C. E. Parkes, Milwaukee, 2; O. C. Green, C. C. C., 3; time, 2:47 2-5.

Second heat—Russell Dale, I. C. C., 1; A. Leonhardt, Cal. W., 2; J. I. Oakley, I. C. C., 3; time, 2:53 2-5.

Final heat—O. C. Green, C. C. C., 1; J. I. Oakley,

Final heat—A. E. Lumsden, C. C. C., 1; W. C. Sanger, Milwaukee, 2; L. D. Munger, C. C. C., 3; time, :35 4-5.

Two-mile, scratch—L. D. Munger, C. C. C., 1; George A. Thorne, C. C. C., 2; J. P. Bliss, C. C. C., 3; time, 5:30 2-5. Also started Githens, Rhodes, Davis, Price.

One-mile, ordinary—Frank Wing, Ottawa, 1; E. D. Bamberger, I. C. C., 2; W. B. Young, C. C. C., 3; time, 2:56.

Five-mile, invitation, handicap—George A. Thorne, C. C. C., 300 yds., 1; J. S. Johnson, Minneapolis, 170 yds., 2; J. P. Bliss, C. C. C., 170 yds., 3; Roy Keator, L. V. C. C., 400 yds., 4; Gus Steele, L. V. C. C., 400 yds., 5; time, 14:42 2-5. Also started Githens, Rhodes, Kinsley, Leonhardt, Green, Peck.

PRIZES AWARDED SATURDAY.

When the races were over Saturday night the winners and their friends gathered at the C. C. C.'s house, where the prizes were given out. There was a good delegation of Milwaukeeans, who had yelled themselves hoarse when Sanger, Price, Parkes and Schimmel made their excellent showing; also the Illinois and Chicago "push." The club house was decorated with Chinese lanterns. Refreshments were served during the evening, and the visitors departed, while the club's officials stayed, counted cash and congratulated themselves on the success of the meet.

ning handsomely. In the half, Smith crowded both Tyler and Taxis closely on the stretch in the final, and a bad accident was narrowly prevented. Taxis had a slight lead at the time, and Tyler was compelled to slow up or go into the fence. He chose the former, finishing a good second.

One feature of the meet was the speed shown by Howard Wunder, a local man who has been doing good work in practice, and who showed that he was capable of the same speed in a race. First and second prizes were given in each trial heat run, with the exception of the novice. Following is the summary:

One-mile, safety, novice—First heat—John Fretz, Pottstown Wheelmen, 1; George Rocket, Tioga A. A., 2; David Bechtel, Pottstown Wheelmen, 3; time, 3:00 4-5.

Second heat—John B. Kendrick, Jr., Park Avenue Wheelmen, 1; S. Rich, Jr., 2; Charles Miller, Eclipse Wheelmen, 3; time, 3:03 3-5.

Final heat—S. Rich, Jr., 1; John Fretz, 2; Geo. Rocket, 3; time, 3:07 2-5.

Quarter-mile, open—First heat—H. B. Martin, Asbury Park Wheelmen, 1; J. R. Hazleton, Rockaway A. C., 2; H. Gill, Jr., F. A. W., 3; time, :36 2-5.

Second heat—H. C. Tyler, Springfield Bicycle Club, 1; H. T. Wunder, T. A. A., 2; George C. Smith, Riverside Wheelmen, 3; time, :35 1-5.

Final heat—H. C. Tyler, 1; H. T. Wunder, 2; J. R. Hazleton, 3; time, :35.

One-mile, championship of Quaker City Wheelmen—John A. Meade, 1; C. Z. Bahl, 2; W. E. Edge, 3; time, 2:54 2-5.

One-mile, 2:45 class—First heat—H. T. Wunder, T. A. A., 1; A. A. Gracey, P. A. S. C., 2; F. B. Marriott, South End Wheelmen, 3; time, 3:00 4-5.

Second heat—George B. Waters, Centaur Cycling Club, 1; L. Geyler, Century Wheelmen, 2; H. N. Swank, Park Avenue Wheelmen, 3; time, 3:04 2-5.

Final heat—H. T. Wunder, 1; L. Geyler, 2; George B. Waters, 3; F. B. Marriott, 4; time, 3:13 2-5.

One-mile, record—W. W. Taxis, Park Avenue Wheelmen, 1; H. C. Tyler, Springfield Bicycle Club, 2; T. R. R. Springfield Bicycle Club, 3; J. R. Hazleton, R. A. C., 4; time, 2:40.

One-mile, ordinary, handicap—C. Z. Bahl, Q. C. W., 150 yds., 1; John H. Draper, A. C. S. N., scratch, 2; C. L. Lagan, unattached, 40 yds., 3; time, 2:53.

Third-mile, handicap—First heat—B. F. McDaniels, W. A. C., 70 yds., 1; C. M. Bailey, Time Wheelmen, 65 yds., 2; H. H. Reeves, P. A. W., 50 yds., 3; H. B. Martin, Asbury Park Wheelmen, 35 yds., 4; time, :45 4-5.

Second heat—Bert Beggs, W. A. C., 60 yds., 1; John A. Meade, Q. C. W., 25 yds., 2; W. N. Price, W. W., 25 yds., 3; George B. Waters, C. C. C., 40 yds., 4; time, :40 3-5.

Final heat—Bert Beggs, W. A. C., 60 yds., 1; C. M. Bailey, T. W., 65 yds., 2; A. B. Martin, A. P. W., 30 yds., 3; H. L. Reeves, P. A. W., 50 yds., 4; time, :45 2-5.

One-mile, 3:10 class—First heat—John Fretz, Pottstown Wheelmen, 1; Raymond Pawley, Asbury Park Wheelmen, 2; E. E. Heiser, Lewisburg, 3; time, 3:11.

Second heat—S. Rich, Jr., 1; H. L. Reeves, P. A. W., 2; W. D. Venn, W. W. C., 3; time, 3:08 2-5.

Final heat—S. Rich, Jr., 1; H. Fretz, 2; W. D. Venn, 3; time, 3:16 4-5.

Half-mile, open—W. W. Taxis, 1; H. C. Tyler, S. B. C., 2; George C. Smith, Riverside Wheelmen, 3; time, 1:25 1-5.

One-mile, tandem, handicap—Ely and Artman, Q. C. W., 200 yds., 1; Donnelly and Bilyeu, scratch, 2; time, 2:38 2-5.

One-mile, safety, handicap—S. H. Bilyeu, Park Avenue Wheelmen, 70 yds., 1; J. R. Hazleton, Rockaway Athletic Club, 55 yds., 2; L. Geyler, C. W., 115 yds., 3; C. Z. Bahl, Q. C. W., 175 yds., 4; time, 2:33 3-5.

One-mile, championship of Frankford Bicycle Club—H. Crankshaw, 1; R. S. Arrison, 2; time, 3:31 1-5.

One-mile, Quaker City Wheelmen, handicap—John A. Meade, scratch, 1; James Artman, 50 yds., 2; C. Z. Bahl, 30 yds., 3; C. R. Ely, 130 yds., 4; George T. Hellig, 150 yds., 5; W. E. Edge, 40 yds., 6; time, 2:50 1-5.

Zimmerman at Cleveland.

Friday and Saturday at Cleveland Zimmerman had everything his own way in each race he started, and rode rings around A. C. Banker, Dorntge, E. C. Johnson and others. Good weather and good crowds prevailed, and if Zimmerman hadn't distanced everybody the racing would have been interesting; but there were some good finishes among those who finished second and worse. A temporary open grand stand fell Saturday and several ladies were badly frightened but not hurt. Zimmerman must have had fun with the Buckeyes. In the three-mile lap race he scored every lap, thirty-seven points, and made ten laps while Banker was covering nine laps. The summaries follow:

FIRST DAY.

One-mile, novice—A. T. Brown, Cleveland, 1; C. C. Van Tine, Findlay, O., 2; time, 3:00.

Quarter-mile, open—E. C. Johnson, C. A. C., Cleveland, 1; W. S. Campbell, M. A. C., New York, 2; time, 3:35 4-5.

Half-mile, 1:20 class—R. O. Baumann, Dayton, O., 1; Fred Nessel, Chicago, 2; time, 1:16.

One-mile, handicap—F. C. Chandler, Cleveland, 1; Joseph Graves, Cleveland, 2; time, 2:27 3-4.

Half-mile, open—A. A. Zimmerman, N. Y. A. C., Freehold, N. J., 1; E. C. Johnson, C. A. C., Cleveland, 2; time, 1:16 4-5.

Two-mile, lap—A. A. Zimmerman, N. Y. A. C., Freehold, N. J., 1; C. W. Dorntge, B. A. C. Buffalo, N. Y., 2; time, 5:26 4-5.

Two-mile, 5:30 class—W. Le Messure, G. B. C., Rochester, N. Y., 1; Robert O. Baumann, Dayton, O., 2; time, 5:36 3-5.

One-mile, open—A. A. Zimmerman, N. Y. A. C., Freehold, N. J., 1; August F. Crooks, B. A. C., Buffalo, N. Y., 2; time, 2:52 2-5.

SECOND DAY.

Half-mile, handicap—Arthur J. Brown, Cleveland, 1; T. B. Rigby, Toledo, 2; B. O. Gamble, Catawba Island, 3; time, 1:08 1-5.

One-mile, handicap, Cuyahoga County championship—Joseph Graves, Cleveland, 1; Robert F.

Goetz, Cleveland, 2; F. B. Bauman, Cleveland, 3; time, 2:35.

One-mile, three-minute class—L. C. Johnson, Cleveland, 1; Harry P. Smith, Cleveland, 2; Mattie Martin, Milwaukee, 3; time, 2:48.

Quarter-mile, open—A. A. Zimmerman, Freehold, N. J., 1; E. C. Johnson, Cleveland, 2; C. W. Dorntge, Buffalo, 3; time, :34 2-5.

Two-mile, handicap—W. D. Banker, Buffalo, 1; F. H. Brown, Cleveland, 2; W. Le Messure, Rochester, 3; time, 1:58.

One-mile, 2:30 class—C. W. Dorntge, Buffalo, 1; A. N. French, Columbus, 2; A. T. Crooks, Buffalo, 3; time, 2:42.

Half-mile, open—A. A. Zimmerman, Freehold, N. J., 1; E. C. Johnson, Cleveland, 2; W. D. Banker, Buffalo, 3; time, 1:18 5-8.

One-mile, handicap—L. C. Johnson, Cleveland, 1; A. J. Brown, Cleveland, 2; R. F. Ooets, Cleveland, 3; time, 2:23 2-5.

One-mile, open—A. A. Zimmerman, Freehold, N. J., 1; F. H. Brown, Cleveland, 2; A. C. Banker, New York, 3; time, 2:48 4-5.

Half-mile, handicap—H. P. Smith, Cleveland, 1; Arthur J. Brown, Cleveland, 2; D. P. Jones, Cleveland, 3; time, 1:07 2-5.

Three-mile, lap—A. A. Zimmerman, Freehold, N. J., 1; C. W. Dorntge, Buffalo, 2; W. Le Messure, Rochester, N. Y., 3; time, 8:05 1-5. In this race Zimmerman distanced the entire field, but by previous agreement the prizes were distributed as the men finished.

One-mile, tandem—Joseph Graves and H. A. Lindsey, Cleveland, 1; C. W. Dorntge and A. T. Crooks, Buffalo, 2; H. P. Smith and T. C. Collings, Cleveland, 3; time, 2:31.

Buffalo Racing News.

BUFFALO, Aug. 29.—Much interest centers about the coming fifty-mile handicap road race, to be held by the Press Cycle Club for its members on labor day. It will be run over the Brocton-Blasdel course, and as it will be a straight-away race, some fast time will likely be made, and some new fast men may be developed.

The Wanderers B. C. will hold its fifteen-mile handicap road race the same day, but in the morning.

Many of our wheelmen will visit Rochester Monday and take in the sports and games to be held there. The boys generally are much interested in the success of our men at Cleveland, and it is hoped they will go on to Columbus and return with the bulk of the prizes.

DEFINITION OF "NOVICE."

Much doubt exists in the minds of many racing men as to the true meaning of the word novice, also as to the proper construction to be placed upon class entries. Many argue that a novice is one who has never won a prize up to the date of the event in any competition, open or closed; others that it means they may win the prizes in simple club races, i. e., their own clubs, and still be eligible for a novice race at an open meet. This latter construction is a fair view of the question. [The decision of the racing board and the executive committee, when appealed to by the management of the Parkside meet, was that any person having won a prize, on road or path, was no longer a novice, and as a result several were not permitted to ride in the novice race.—Ed.]

WANT A NEW TRACK.

There is a great demand for a half-mile track here, to be the exclusive property of the wheelmen. It will never be among the athletic attractions of Buffalo so long as there is the entire want of the right kind of interest and enthusiasm. Twice this summer has a call been extended to all the clubs to meet and complete the organization so well begun for the association of all the wheelmen in Buffalo, and not one man responded, not even the secretary. To form this protective league or association would be one of the first steps towards getting what every interested wheelman wants, a bicycle track; but with the usual fear and narrow-mindedness, all remain at home or somewhere else, thinking "the other fellows will look after it all right enough."

The cycling section of the Eagle pleas-

ure club held its twenty-mile handicap road race Saturday afternoon. The Martin course was used and the event proved interesting to the many spectators. There were five starters, four of whom finished, in the following order: Fred Miller, time, 1:20; J. Madler, 1:21; Martin Miller, 1:18; Louis Waller, 1:10.

WILLIE DUNN.

* * *

The Manhattan Races.

Ten thousand people, a cloudy day, track rather damp, and enthusiasm the same over the Jersey "skeeter's" non-appearance, were the features of Saturday's meet. The crowd was a royal one, and there is no doubt that two-thirds went to see Zimmerman, but saw him not. The racing was positively tame. Windle did not seem to be the Windle of old. He looked half-fit and did not take kindly to the track or his work. His one win aroused a little flurry; but Taylor, modest, gentlemanly George Taylor, was the star, and shone as he never did before; he positively sparkled. Banker rode well and looked happy, and Pete Berlo looked bluer than the rim of the wheel he used at one time; in fact, Berlo's work in the shop on his new racer seemed to have made him slow. The notables were out in force. Referee Raymond looked as if he had personally signed everything before leaving his office; a broad smile illumined "Pop" DeGraff's face; R. B. Money Penny, "director of cycling" for the M. A. C., looked the astute young man he is. President Miller, of Springfield, with Andy McGarrett, was on hand, and all sighed and longed to see Springfield and a real live race meet with everybody up. Jim Sullivan, editor of the *Sporting Times*, is becoming a cycling crank, and took more interest in the proceedings than some of the old hands. Kerrison, of the Boston *Herald*, was there; so was Egan and Crowther of *Sporting Life*, and Frank Prial of the *Wheel*, and there were more newspaper men than seats to go around.

The one-mile open was ridden twice before it was declared a race. The time limit was 2:35, and Wheeler was first in 2:40 1-5, and the event was ordered ridden over. Then Berlo won in 2:37 2-5, which, though not up to the limit, was accepted by the officials, and Berlo was awarded the lot. Special prizes for the quarters were won by Mulliken, Judge and Stedman.

In the two-mile open Taylor won the race and made the last quarter in 33 4-5 seconds, which is the track record. Windle captured the half-mile open by a fine spurt.

The race of the day was the five-mile eastern championship, for which five handsome prizes were given. There were ten starters, and Taylor won, taking the lead on the last lap. Berlo caught him on the beginning of the stretch, but Taylor pulled away and won by two lengths. The summaries follow:

Quarter-mile, open—George F. Taylor, M. A. C., 1; W. W. Windle, M. A. C., 2; P. J. Berlo, M. A. C., 3; time, :35 3-5.

Two-mile, open—George F. Taylor, 1; George A. Banker, 2; P. J. Berlo, 3; time, 5:44 1-5.

One-mile, handicap—first heat—C. S. Thompson, Mercury W. C., 170 yds., 1; H. B. Arnold, M. A. C., 60 yds., 2; O. S. Brandt, M. A. C., 180 yds., 3; time, 2:23 2-5.

Second heat—H. C. Wheeler, M. A. C., 30 yds., 1; W. S. Campbell, M. A. C., 50 yds., 2; E. A. McDuffee, M. A. C., 40 yds., 3; time, 2:27 1-5.

Third heat—P. Grosch, Orange Wheelmen, 115 yds., 1; Durant McClean, K. C. W., 160 yds., 2; H. C. Skinner, K. C. W., 160 yds., 3; time, 2:27 4-5.

Final heat—C. S. Thompson, 1; Durant McClean, 2; H. C. Skinner, 3; time, 2:35 1-5.

Half-mile, handicap—first heat—N. K. Townsend, M. A. C., 100 yds., 1; Harry Hawthorne, Orange A. C., 90 yds., 2; A. C. Watson, Union County Roadsters, 110 yds., 3; time, 1:08 4-5.

Second heat—George W. Hannon, Prospect Wheelmen, 100 yds., 1; Warren A. Clapp, 160 yds., 2; C. M. Murphy, K. C. W., 40 yds., 3; time, 1:09 1-5.

Third heat—C. S. Thompson, 100 yds., 1; O. S. Brandt, 100 yds., 2; George F. Royce, P. A. C., 100 yds., 3; time, 1:09.

Final heat—C. S. Thompson, 1; A. C. Watson, 2; N. K. Townsend, 3; time, 1:08.

Half-mile, open—W. W. Windle, 1; George A. Banker, 2; A. B. Rich, Staten Island A. C., 3; time, 1:18 4-5.

Five-mile, eastern championships—George F. Taylor, 1; P. J. Berlo, 2; A. B. Rich, 3; time, 14:12 3-5.

One mile, 2:25 class—George A. Banker, 1; E. A. McDuffee, 2; Carl Hess, 3; time, 2:45.

One mile, open—P. J. Berlo, 1; H. C. Wheeler, 2; C. E. Steadman, Hartford Wheel Club, 3; time, 2:37 2-5.

* * *

Maywood's Field Day.

The fourth annual field day of the Maywood Athletic and Cycling Club was held at its grounds, First avenue and South Sixth street, Saturday, a large attendance being present to witness the events. The club has recently built a quarter-mile track, upon which the bicycle and running events took place. Briefly summarized the cycling events resulted as follows:

One-mile, boys'—W. Hatch, 1; R. Brewer, 2; time, 3:25.

Quarter-mile, scratch—A. A. Coupland, 1; A. C. Vaillancourt, 2; time, :46.

One-mile, handicap—A. A. Coupland, 1; C. J. Schoening, 2; time, 3:08 3-4.

Half-mile, scratch—A. C. Vaillancourt, 1; time, 1:36 1-4.

Two-mile, handicap—C. J. Schoening, scratch, 1; A. P. Parish, 150 yds., 2; time, 5:45.

The ten-mile, handicap, was the crowning event of the day, and the assemblage could hardly wait until this number was called. A year ago Norton Brothers offered a silver cup valued at \$125 to the one who should succeed in winning the time prize two out of three times. William J. Maas carried off the time in 33:18, Parrish winning first prize with a ten-minute handicap in 39:41. This year Maas could not ride, and Aleck Vaillancourt was picked as a sure winner, but he failed to train, and after riding two miles dropped out with a severe side-ache. Then young Corysland showed his heels and came romping in as he pleased in 31:58, with Schoening a close second in 32:27. Hart, with a six minute handicap, managed to cross the line first in 37:58, closely followed by Parrish. The track was in prime condition and the day an ideal one for the sport. There is now a movement on foot to hold a union field day, Oak Park, River Forest and Maywood clubs participating, about October 1.

Century Makers at Buffalo.

BUFFALO, Aug. 29.—Last week the Buffalo Exposition Cycling Association held what was to have been its final meeting, but owing to the unsettled state of its business it is still in existence. A large number of the delegates were present, representing nearly all the clubs. The secretary-treasurer reported that the entry fees of sixty per cent. of the contestants had not been paid, which money should go to Manager Robinson. He was directed to take steps necessary for its collection. This being about the only business of any importance the meeting adjourned subject to the call of the chair.

In reference to the lack of accommodation at the cycle races on the 25th, we have since learned that the temporary seats had been engaged subject to order; but the order was delayed until the morning of the 20th, and it was then too late, as it was proposed to accommodate 15,000 people, and the seats were not put up simply for the want of time.

Large parties of wheelmen took advantage of the ideal weather to make country trips, and the favored runs were well patronized yesterday. Charles Haigh, Boston P. C. C.; A. H. Davis and W. J. Helfer, Utica C. C.; T. E. Youngs, Pittsburgh Wheelmen; M. Hardenburg, Hornellsville; William Nolan, Lockport, and

ARTHUR D. BLACK, Loekwood Cycling Club.

E. C. Stanfro, Springville, were some of the visiting wheelmen who were shown the city by many of the local cyclists.

F. A. Foel and Duke Smith, of the Press C. C., attempted a double century yesterday, and if the tire on Smith's wheel had not burst at Harbor creek both would have come through all right; but as it was Foel, alone, finished the 200 miles in 23 hrs. 15 min., making his twelfth century for the season. Klipfel, the "undaunted" of the Ramblers, finished his fifteenth century at 3:15 p. m. It was made over the Buffalo-Dunkirk course, and took him 8 hrs. 45 min. This makes a new record for this course and beats his own time by ten minutes.

Messrs. Reister and Wagoner, also of the Ramblers, made a hundred-mile run over the same course in eleven hours.

WILLIE DUNN.

Races at Norristown, Pa.

Norristown, Pa., wheelmen held their second annual tournament Saturday last, a good crowd attending. There was no fast time made, owing to the track being in a poor condition because of heavy rain falls. The summaries follow:

One-mile, novice—John Haas, Eclipse Club, 1; George Keim, West Chester, 2; time, 3:28.

One-mile, 3:20 class—I. C. Shalkop, Pottstown, 1; H. W. Olf, Wellington, 2; time, 3:09 3-4.

Half-mile—R. Parker Rich, Northwest Wheelmen, 1; F. A. Demorest, Reading, 2; time, 1:25.

One-mile, handicap—R. P. Rich, scratch, 1; J. Cope, Norristown Wheelmen, eighty yards, 2; time, 2:49.

One-mile, championship of Montgomery and Chester Counties—C. J. Craft, Norristown Wheelmen, 1; J. F. Cope, Northwestern Wheelmen, 2; time, 3:07.

Quarter-mile, open—R. P. Rich, Northwestern Wheelmen, 1; F. Demorest, Reading, 2; time, 1:40 1-2.

One-mile, 2:40 class—C. J. Craft, Northwestern Wheelmen, 1; J. F. Cope, Northwestern Wheelmen, 2; time, 3:07.

Half-mile, boys—H. F. Coates, 1; William Thomas, 2; time, 2:35 1-2.

One-mile, open—R. P. Rich, 1; F. A. Demorest, 2; time, 3:06 3-4.

One-mile, club—C. J. Craft, 1; J. F. Cope, 2; time, 3:25.

Waller Will Try Again.

The Oak Leaf Wheelmen, of Stockton, Cal., will give a "record" tournament on Sept. 16. At the close of the races Frank Waller will start for the twenty-four-hour record. A large corps of good pacemakers will be furnished. Waller has kept in good shape ever since his first long ride, and will get in fine condition by the 16th. He feels as confident of making a new record as he did in his previous attempt, and expects to place the figures at about 420 miles. The track on which he will ride is the new half-mile built for the Oak Leaf Wheelmen.

Good Programme at Winona.

The race meet of the Minnesota Division L. A. W. occurs at Winona, Sept. 6, 7 and 8. The following programme of events has been prepared for afternoon

and evening races: Half-mile, novice; mile, handicap; quarter-mile, boys; mile, state championship; mile, three-minute class; quarter-mile, state championship; mile, open; five-mile, open; twenty-five-mile, championship of the northwest; mile, handicap; two-mile, open; five-mile, state championship; mile, open; two-mile, three-minute class; mile, championship of Winona; quarter-mile, flying start, in heats, open; mile, state championship; mile, championship of northwest; two-mile, boys; five-mile, handicap; five-mile, boys; five-mile, open; two-mile, handicap.

Hyslop and Smith Win All at Montreal.

Not over 2,500 people attended the race meet of the Montreal B. C. Saturday, though the weather was all that could be desired. Smith and Hyslop had things their own way, winning five out of the six events between them. There is now great rivalry between the two men, though they are members of the same club, the Toronto B. C. Joseph Yerberry, an Englishman, fell in the mile ordinary event, and was badly but not seriously cut. The events and results were as follows:

Half-mile, open—Hyslop, Toronto B. C., 1; E. J. P. Smith, 2; time, 1:16 4-5.

One-mile, open—William Hyslop, 1; E. J. P. Smith, 2; time, 2:53.

Third-mile dash, in heats—William Hyslop, won two heats; time, 49:50 1-5; Smith, 3.

Three-mile, lap race—E. J. P. Smith, 1; Hyslop, 2; time, 8:44 1-5.

Two-mile, open—G. W. Wells, Wanderers B. C., 1; Smith 2; time, 5:40.

Two-mile, handicap, open—C. J. P. Smith, 1; F. Louran, Montreal, 250 yds., 2; time, 5:24 4-5.

Labor Day at Rochester.

ROCHESTER, Aug. 28.—Hartford and Syracuse, it is conceded, will get the galaxy of racing men for their meetings Labor Day, September 5, still Rochester has a right to expect a few of the cracks to come here and compete in the annual tournament under the auspices of the Ramblers' Bicycle Club. Considerable interest, more especially in this city, is manifested in the approaching races, which promise to out class the international rowing regatta off Ontario beach between Hanlan, O'Connor, Hosmer and Gaudaur, the various ball games, etc. Prizes of tempting value are at stake in the various events, and it is anticipated that they will not be fairly won without a lively struggle between the large fields of participants which are expected.

General Race Notes.

The St. Johns (Mich.) Wheelmen have arranged a neat programme for next Thursday, when eight races, a sixteen-mile road event, and some neat prizes will be given. The races will be as follows: One mile, novice; one mile, open; Two mile handicap, open; one mile, club championship; five mile handicap, open;

—THE GREAT—

Hartford Wheel Club Tournament

SEPT. 5 (Labor Day) and 6

FAST TRACK. Charter Oak Park SHORT RACES.

†Best time by 5 min. 9 sec. ever made over this course.

†It is a hard test to drive Racing Tires over such a course. Spooner says, road worst he ever saw it.

*First fifty-two miles has elevation of 2,000 feet. Rained for two days previous to trip. Twenty miles through cold rain and hail storm.

MORGAN & WRIGHT,

MANUFACTURERS OF RUBBER GOODS,

331-339 West Lake Street,

CHICAGO.

quarter-mile dash, open; special race, one mile; half mile dash, open.

Bloomington, Ill., holds a meet Thursday next.

The annual fall meeting of the Maine division will take place at Biddford Monday, Sept. 5.

W. F. Murphy, who has been ill, is out again, and expects to be in shape to do some racing by November.

The Cook County Wheelmen give another ten-mile handicap road race over the Oak Park course the latter part of September.

W. A. Rhodes, who intended making a trial for the hundred-mile record the 20th, has indefinitely postponed his attempt. Lack of condition in the cause.

The Metropolitan Association of Cycling Clubs of New York, will hold a monster race meet in October. It is expected that all of the cracks will be present.

All the eastern and western cracks, including Zimmerman and Windle, will compete in the race meet of the Associated Cycling Clubs of Philadelphia, to be held on the Tioga track at Westmoreland, Sept. 17.

The following is the programme of the race meet to be held at Alameda Cal., on Sept. 5: Half-mile, safety, novice; quarter-mile, safety, scratch; half-mile, safety, handicap; one-mile, safety, handicap, and two-mile, safety, handicap.

The Alabama L. A. W. championships are to be given under the auspices of the Mobile Athletic Association at Mobile, Sept. 9. The prize list is the most important feature and contains the most handsome lot ever offered in the south.

There is \$250 at the Cook County Wheelmen's pretty home with which to cover a like amount from the Minnette Cycling Corps. The latter has made a challenge and it has been accepted. Cutting is ready to ride at any time.

The date of the Oak Leaf Wheelmen race meet to be held at Stockton has been set for Sept. 16, and entry blanks will be out in a few days. The blanks for the meet of the Alameda club on Sept. 5, and of the Garden City for Sept. 9, are already out.

The Toulon Bicycle Club, of Toulon, Ill., will hold its second annual tournament on Friday, Sept. 9. This club held a very successful tournament last season, and is figuring on holding a much more successful one this year. The prize list amounts to \$300.

William S. Campbell, of geared ordinary fame, is confident that the improved high wheel is much faster than the safety, and thinks that it will figure prominently in next year's races.—*Bi. World*. And yet W. S. C. lowered his colors to a solid-tired ordinary at Washington!

The Indianapolis tournament occurs Sept. 5 and 6. The prizes comprise ten wheels, a Caligraph, gold watch, diamond rings, etc., over \$2,000 in value. There are five open and five handicap events. The track is a mile in circumference and eighty feet wide with very fine surface. Several Chicago riders have entered, among them Bliss, Keator, Ballard, Root, Young and others.

The racing board has sanctioned the following race meets: Ariel Cycling Club, Glens Falls, N. Y., Sept. 6, 7, 8 and 9; St. John's Court of Forresters, Hyde Park, Mass., Sept. 5; Chenango County Agricultural Association, Norwich, N. Y., Sept. 20, 21, 22 and 23; Danbury Agricultural Society, Danbury, Conn., Oct. 4; Riverside Wheelmen, Riverside, Cal., Sept. 9; Baltimore Clubs, Baltimore, Md., Sept. 12; Louisville Cy-

cling Club, Louisville, Ky., Sept. 29 and 30; Athletic Club of the Schuylkill Navy, Philadelphia, Penn., Sept. 17.

The Yost Bicycle Company has originated and will execute a novel idea in the way of a track. It will be constructed near the works and will be a quarter of a mile in length, thirty feet wide and built of asphalt. It will be constructed this season and the opening will be accompanied by a tournament.

The Milwaukee Wheelmen's field day, Sept. 10, promises to be one of many surprises. The racing board has on its hustling toga and is leaving no stone unturned to make the event one to be long remembered. First class prizes will be offered, and the track on which Sanger rode a mile in 2:19 1-2 can not be said to be slow. For entry blanks address F. J. Schroeder, chairman, foot of Walnut street.

"Birdie" Munger has gone to the country to recuperate. He complained of feeling tired Saturday at Parkside, yet rode in all contests. Birdie has had nine bad falls on the track this season, none of them his own making. He can show the outlines of scores of cuts and bruises on his body, a fair map of his season's career on the path. He goes to Springfield, and will be on the western circuit.

Great interest is being taken in the coming bicycle meet to be given under the auspices of the Toledo Cycling Club, at the exposition grounds. Many from out of town have already entered, and a successful meet is looked for. The events are as follows: One-mile, novice; quarter-mile, open; five-mile, handicap; half-mile, boys; one-mile, T. C. C. championship; one-mile, open; three-mile, lap; half-mile, open; one-mile, Toledo wheelmen only.

The Iroquois Cycle Club of East Baltimore held very interesting races at Bay Ridge last Thursday. Leo Rosenfeld won the one-mile novice in 2:56 1-2. Eli G. Hecht won the one-mile safety in 2:56. Baumgarten walked away with the quarter open, 43 1-2 sec. Ferdinand Frankel proved the victor in the half-mile handicap, 1:15. Hecht had an easy thing in the half-mile open, 1:23 1-2. The one-mile handicap went to Rosenfeld in 2:56.

The first annual race meet of the Harrisburg (Pa.) Wheel Club will be held at Island Park Monday. The half-mile track is excellent and has a home stretch eighty feet wide. The programme is as follows: One-mile, novice; half-mile, tandem; half-mile, ordinary; quarter-mile; two-mile, handicap; one-mile, H. W. C. championship; one-mile, team; half-mile, open; half-mile, boys; one-mile, handicap; one-mile, three minute class; fifteen-mile road race.

The outlook for the bicycle races in Peoria on Tuesday, September 27 is certainly very encouraging. The actual value in prizes is \$2,490. This is a large list for one day. It will be the fourth annual race meet given by the Peoria boys. In the one-mile safety open the first prize is a Kroeger upright grand piano, rosewood finish, full size, and valued at \$900. Zimmerman is the owner of all the pianos the Peoria bicycle club has offered in prizes, and the probabilities are he will make a strong bid for this one should he come. Five high grade pneumatic tired safeties, three elegant gold medals, two type writers (one Caligraph and one People's), two gold stop watches, together with many other valuable and useful articles, help make up the prize list. The track will be put in record-breaking condition.

Subscribe for the REFEREE.

Peoria Trade.

Kingman & Company expect next season to have one of the largest sundry departments in the west and job sundries on a large scale. They have had a very successful season and will go in on a more extensive scale.

Peoria is well supplied with first-class repair shops, the largest of which is Rouse, Hazard & Company's, which employs nine mechanics. Next on the list is Kirkwood, Miller & Company, with six, Kingman & Company and Luthy & Company employ men enough to do all the repair work necessary. Any repair work on a bicycle is performed here in Peoria, be it ever so difficult a job. R., H. & Co. have an enameling oven, and a first-class nickel plant is located in the central part of the city. Repair jobs from all over the United States find their way to Peoria.

Trade is slowly dropping off. It will pick up again, no doubt, during September, but the backbone of it is broken and the rush part of the season is over. Of course a great many wheels will yet be sold, as the fall is the best season of the year to ride. The Peoria houses have all done a good year's business and are now beginning to cast their eyes about for '98 wheels.

LAUREL.

The Swift Holds Many Records.

Probably no machine on the market to-day has a better record, for all around work and record breaking, than the Swift. Pretty nearly all the long distance records have fallen to riders of the wheel made by the Coventry Machinists' Company. Only recently Holbein, on a thirty-five pound Swift, covered 359 miles on the road in twenty-four hours, a remarkable performance when compared with the 361 miles made on the track, and which stood as record for a year. This record was also made on a Swift, and only one machine was used in the entire ride. The Club tricycle, also made by this company, holds all the three-wheeler records up to twenty-four hours. The Swift holds to its credit the championships of Missouri and Tennessee, and in many road races it has had no trouble in carrying its rider through in the fastest time. Beside this good record, the Scheveningen exposition, the annual national fair of Holland, has just awarded the Swift the first prize and diploma. Surely this is a good record for a popular wheel.

Changes in the Ormonde Company.

The exclusive announcement in last week's REFEREE that Secretary George S. McDonald was to resign his position with the American-Ormonde Company and join the Raleigh company caused some surprise in trade circles. President Willis, in conversation with the REFEREE man, said that the old secretary leaves the firm with best of feeling all around, and M. L. Bridgeman, who has somewhat tired of the road, will be the new secretary, and everything will run as smoothly in the future as in the past. Mr. McDonald will retain his stock in the Ormonde company and also act as a director. Mr. McDonald takes the managerial reigns of the Raleigh company, and Mr. Atty will attend to the secretary's labors. The report that the Ra-

leigh company is to build Raleighs in this country is again revived, but, as manager Bowden said to the REFEREE some weeks ago, they are in no hurry; just looking around, having no definite plan in view.

Rich's Sixteen-Pound Racer.

John D. Gluck of R. Downing & Company, and president of the Union League Wheelmen of Westfield, N. J., is building a sixteen-pound racer for A. B. Rich. Aluminum six-ounce rims are to be part of the light-weight racer, and several new features of Gluck's own idea. Mr. Gluck, before becoming chief secretary for the well-known Downing founding firm, was for seventeen years superintendent of the Ward line of steamers, and to see him handle about thirty clerks in the New York house would give anybody an idea of his executive ability. A regular enthusiast in racing and road riding, he sometimes gets up a sprint that astonishes the boys, and is loud in his praises over the roads around Westfield, and credits Charles R. Peckham with being the principal author of same, \$50,000 of the latter's cash going as an earnest of his practical opinion of good roads. A thirteen-year old boy of Mr. Gluck's rode a mile in 3:17 1-4 last 4th of July.

Featherstone's New Building.

A. Featherstone, corner Sixteenth and Clark streets, has started the foundation for an addition to his already large plant. The additional real estate, buildings and machinery to equip it, will cost about \$100,000, and when finished will make one of the most complete bicycle plants in the world. It is expected to be finished by Nov. 15, when Mr. Featherstone will employ some 1,400 men, 400 on old trade and 1,000 on bicycles and tires. He expects to turn out about 30,000 wheels of the different grades, and already sample wheels are on the fire. Light ladies' machines, light roadsters and a few racers will be made. Mr. Featherstone stated that business has been excellent during this season and the outlook for 1898 is very brilliant.

Away in the Mountains.

Tom Crondal, the advertising man of Howard A. Smith, of Newark, is away in the Catskills, spending his vacation. Crondal is well known through his correspondence with houses all over the country, for he acts in the dual capacity of secretary and advertising man for his firm. W. H. Kirkpatrick, the firm's traveler, will skip to the mountains on Crondal's return—or, rather, to Whitford, R. I. where his relatives are. The latter gentleman astonished his club, the Atlanta Wheelmen, recently, by appearing on a run with a white enameled wheel, and dressed in white sweater, tights, cap and shoes, and was immediately dubbed "the ghost."

Will Build Wheels this Winter

There are some prospects that the H. B. Smith Machine Company, of Smithville, N. J., will get up steam next year and once more turn out wheels as successfully as in the past. What seems to be lacking with the firm is a good, live superintendent who would enthuse the company, which has plenty of capital, machinery and facilities equal to the best. From a talk with Manager Hall, of the New York branch of the company, these facts were gathered, and also that

3-BEAUTIES-3

The James Safety.

"JAMES" SPECIFICATIONS.

DIAMOND Frame, Warwick Hollow Rim, our unequalled Semi-Tangent Direct Spokes, Southard Cranks, Adjustable Handle Bar and Seat Pillar, Perfect Chain Adjustment, Ball Bearings throughout (including head), Lamp Bracket, geared to 64 or to suit purchaser, quality ABSOLUTELY PERFECT, FULL GUARANTEE.

ROAD RACER, Weight 28 Pounds,	- - - - -	\$150 00
FULL ROADSTER, Weight 35 Pounds,	- - - - -	\$150 00
TRACK RACER, Weight 25 Pounds,	- - - - -	\$155 00
TRACK RACER, Weight 23 Pounds,	- - - - -	\$160 00

We Guarantee These Weights.

"B. & A." SPECIFICATIONS.

WHEELS—29 in. front, 28 in. back, with Warwick hollow rims, with tangent or direct spokes, gun metal hubs. Geared to 65 in. or to order. Finest Weldless steel tube and steel forgings, adjustable seat pillar and handle bar, 6 1-2 in. adjustable cranks. Adjustable balls to both wheels, crank axle, ball head and pedals.

Same Model and Specifications:

TRACK RACER, Weight 26 Pounds,	- - - - -	\$150 00
ROAD RACER, Weight 30 Pounds,	- - - - -	\$140 00
FULL ROADSTER, Weight 34 Pounds,	- - - - -	\$140 00

These prices are with Pneumatic Tires.

These celebrated machines are made by THE NEW BUCKINGHAM & ADAMS CYCLE COMPANY, Coventry Works, Birmingham, Eng. H. P. Cook, Managing Director, having had great practical experience, is turning out the B. & A. in great shape.

During Easter week (in England) the B. & A. captured the most prizes.

Beat the 100 Miles Record.

Mr. Peter Holliday, of the Ramblers' Club, Blackburn, Eng., beat the 100 miles record from Blackburn to Kendal, by the extraordinary time of 48 minutes, on the B. & A. Road Racer, weighing 30 lbs. This is another convincing proof of the superiority of the B. & A. machine.

B. & A. Champion Racer.

South Road Safety.

FRENCH & SONS, Balham, England.

"SOUTH ROAD" SPECIFICATIONS.

THIS MACHINE is the grandest ever offered. We guarantee that there is not a single casting throughout. 28 inch wheels, tangent spokes, Warwick hollow rim, round cranks, adjustable handle bar and seat pillar, ball bearing throughout, lamp bracket, geared to 64 or to suit purchaser.

Any kind of Pneumatic Tires. We Guarantee Weights.

AGENTS WANTED.

The Agency for the above has been secured by the

JAMES CYCLE CO.,

113 Adams Street,
CHICAGO, ILL.

the firm is still turning out a few wheels of the well-known lever pattern, for both sexes.

The Toledo Trade.

We have reproduced from the mid-summer number of the Toledo *Sunday Journal*—a very excellent publication, by the way—a number of photographs of Toledo trade men and her well-known establishments.

The Toledo Bicycle Company is the successor to the proprietors and plant of The Page Steel Wheel Company, and organized in October, 1891, with N. C. Stevens as business manager. It has been the good fortune of the Toledo Bicycle Company, under Mr. Stevens' management, to, within the short time

odd men employed at the work, and next season this number will be enlarged.

The Gendron Iron Wheel Company has become one of the most widely-known cycle manufacturing concerns in America. It has offices in Chicago, Toledo, New York and St. Louis. The company is at present cutting quite a figure in military cycling. A week or two ago the REFEREE contained a photograph of the Toledo Cadets, O. N. G., with Gendron cycles. The company's principal officers are represented in the sketches herewith.

The Chapman Hardware Company carries on an extensive business. It is managed by Frank H. Chapman.

Members of the Gendron Staff.

of its organization, develop into one of the most prosperous industries in the city of Toledo. Only wheels of high grade are manufactured.

The company's present capacity is 3,500 to 4,000 wheels per annum. For next year the Toledo Bicycle Company promises the world great revelations in the speed, strength and lightness of the wheels they will put upon the market.

Mr. Stevens came to Toledo something like four years ago and took charge of the electric lighting business in this

N. C. STEVENS.

city, then in its infancy. This plant he has managed with most signal success, and besides possessing a world of executive ability, is full of mechanics, which will make him a valuable acquisition to the bicycle manufacturing industry of this country. There are at present sixty-

Will Build Common Safeties Now.

The old Broncho and White Flyer works, of Westboro, (over which the spirit of dear old "Jack"—Purvis Bruce—possibly hovers) have emerged from the maze of law suits, injunctions, etc., and Westboro is once more talking about "our bicycle works." There will be some alterations and possible additions to the pretty little works, and any man who gets within gunshot and offers anything cranky in construction will be killed on the spot. The present proprietors and managers believe a good, plain, every-day safety is what the people want, and they will make it.

New Ideas in Pneumatics.

George R. Bidwell states that he will have three ideas in pneumatics next year, and a tire that will be cemented to the rim will be one of them. Bidwell thinks seven months a fair time to experiment with tires, and at the end of that time will let the product of his and his employees' brains loose for trial and discussion. Mr. Bidwell thinks that in cycle making a consultation between the various manufacturers to adopt a certain pattern for the ensuing year would save much time, possible loss, and assist the manufacturers generally. But there can be little hope for the wish at present.

To Increase the Store Space.

Secretary Vogel, of the Gendron Wheel Company, spent just three days in New York last week, with his active managerial New York trio, and made arrangements for a large increase of room for the New York house, although the present capacity is large. The Gendron company is doing a heavy eastern business in other lines as well as cycles, and intends to push the latter next year. Secretary Vogel is one of the prominent

Elks of Toledo, and is allowed away from the herd only a few days at a time.

Selling Many Wheels.

A. M. Scheffey, the swift traveler of the wholesale jobbing house of A. M. Scheffey, returned Wednesday from a trip in Pennsylvania, and took to the road again Thursday. Mr. Scheffey is an educated cycle salesman, and can see about as far in cycle construction and what the market will buy as anybody. This young and sturdy wholesale house is doing a rattling business with its popular Wynnewood and a full line of other western wheels.

Can Braze Aluminum.

The Anglo-American Company says that it has invented a process for brazing aluminum rims without injuring the service in the least. It thinks this is very important, as that was the great drawback with the rims before, as they had to be riveted. J. F. Ives of the New York Belting and Packing Company showed the REFEREE man a complete wheel with aluminum rims, spoked and tired, which only weighed three pounds.

The New Raleigh Factory.

NEW YORK, Sept. 1.—[Special]—The Raleigh company's American factory will be located at Greenwich and Bank streets. The concern will import its machines in rough and finish and assemble them here. George S. McDonald is to be in charge of the new factory.

General Trade Notes.

Mr. Foss of Chicago will soon receive a shipment of Lion cycles, a large order being now on the way to this country.

Mr. Chapman, of the Leicester Cycle Company, is expected in America early

lamps had not been taken out of the custom house, and Snell secured them without trouble, as he got wind of the approaching failure in New York.

The Tower Cycle Company is sending a large shipment of wheels to Canada,

F. H. CHAPMAN.

and compliment the REFEREE on securing it the order through the advertisement in this paper.

J. W. Schoefer, the well-known Brooklyn rider and old dealer, tells the REFEREE that he is well satisfied with his job at Bidwell's, and will continue to travel south for the firm.

The Monarch Cycle Company is at present making designs for a light ladies' safety for 1893. This company also intends building all its Monarchs to weigh under thirty-five pounds.

The ever popular Stephen Golder, journalist and cycle agent, will arrive on the City of New York from Liverpool Thursday, accompanied by Mrs. Golder and baby. Mr. Golder brings a large

in September in the interests of his company.

Goodby & Son, Wolverhampton, are in correspondence with Boston people to take their agency for the United States.

Saturday A. Featherstone took out a permit to erect an addition to his present factory. The proposed building was fully described in the REFEREE some months ago.

The Pyle Cycle Company of Wilmington, Del., gives notice that it has lost a cushion-tired Phoenix, No. 3,111. It was stripped, and the front rim was indented in several places.

Samuel Snell, the well-known Birmingham lamp man, sailed for home in the Majestic last Wednesday. To a REFEREE representative he stated he was more than pleased with the business done on this trip, having sold thousands of lamps. Mr. Snell was fortunate in saving a thousand dollars' worth of lamps from the Sweeting failure. The

shipment of New Howes with him and will at once open agencies.

Mr. Mushing, of the Centaur Company of Coventry, accompanied by Mr. Lucas, of lamp and sundry fame, who visits America for the first time, leaves Liverpool for New York Aug. 31.

By a blunder a picture of E. D. Loane, Jr., of Spalding's New York establishment, and inventor of the pneumatic pump described in our last issue, was included in "the Gendron Quartette."

A cycle house desiring a competent eastern or traveling representative can be placed in communication with a gentleman of wide experience and excellent character by addressing a line to this office.

Samples of the Brooks safety are now in the hands of the New York agents, and the firm name will shortly be announced. A representative of the famous saddle and cycle works will soon be in America.

ROUSE-DUYEA CYCLE CO., 89 G. Street, PEORIA, ILL.

Howard A. Smith & Company.

We present herewith a sketch of Howard A. Smith, one of the founders of, possibly, the oldest concern of its kind in Amerira, and of the several leading employes of his establishment. Mr. Smith's career was fully chronicled in our league meet issue. The firm was originally Zacharius & Smith, but for nearly ten years Howard A. Smith & Company has been the title. They have handled sundries in immense quantities, but also do a large business in wheels of all grades.

E. J. Decker has had considerable experience in repairing and building bicycles and is superintendent of the mechanical department. He is also the holder of numerous records on the road and path, a prominent member of the First Regiment, N. J. N. G., the crack regiment of New Jersey, having held the office of lieutenant for some time, and where he aspires to be as successful as he has already been in his chosen vocation.

Wilson K. Kirkpatrick, familiarly known as "Kirk," represents the firm on the road and has always been successful. Mr. Kirkpatrick was born in Newark in 1866. Attending the public schools, he graduated at the age of sixteen, and commenced business in the employ of his father in the capacity of salesman, and subsequently was admitted to the firm. His father retiring, the firm was dissolved, and Mr. Kirkpatrick connected

himself with Smith & Company. He is well known throughout the trade, and is local L. A. W. consul for Newark. He was also charter member and first captain of the Business Men's Cycle League of Newark, N. J., and a member of other cycling clubs of similar reputation.

Miss S. E. Kandle, the secretary and treasurer, is a cousin of Howard A. Smith, and comes from the same sturdy Jersey stock. She was thoroughly drilled for the art of book-keeping, and is well fitted for the position she occupies. She is a graceful rider and a worthy addition to the company.

L. C. Crondal was born in the metropolis in the year 1867, and graduated from the public schools at the age of sixteen. This graduation entitled him to a four-years' free scholarship at Stevens Institute, but he preferred to enter business life. He learned the printer's trade, but several years later, owing to its confinement, left the business to go with a large wholesale toy and sporting goods house in New York, where in a short time he became manager, acting in this capacity until the spring of 1891, when he identified himself with Howard A. Smith & Company, in the same capacity.

Miss L. C. Stilger, who acts in the capacity of stenographer and type-writer, was born in Newark, in which city she has spent the greatest part of her life. She attended the public schools and graduated at the age of fifteen. She entered Coleman Business College, March, '91,

and graduated in the short period of six months, during which time she acquired a thorough business education, including stenography and type-writing.

Trade Notes.

Thos. Saunders, representing William Bown, the Credenda Seawless Tube Company, Lamplugh & Company, the new B. & A., Birmingham, and the Crypto Cycle Company, London, will sail for America this month.

President Stover of the Stover Bicycle Manufacturing Company, Freeport, Ill., accompanied by wife and son, arrived in New York from a pleasant trip abroad last Wednesday and journeyed toward the setting sun the following day.

With the rumored several tube making plants being built in this country, it would be well to remind the builders that Samuel Fisher & Sons, Birmingham, Eng., have splendid tube drawing machinery of latest pattern and build.

Collins & Company, of Fort Worth, Texas, have placed an order with Ames & Frost for 500 Imperials for next season's delivery, taking the agency for the entire state. Ames & Frost say that the outlook for next year is particularly bright with them. During the week Secretary Walpole, who was on a century run, took an order from Frazier, of Aurora, for 1,000 pairs of Imperial sulky wheels. The new factory will soon be finished, the first story being now com-

pleted. Samples of their new light wheels will be shown this week.

French & Sons, Balham, Eng., are shipping a good many South Roads to America and are arranging for regular agencies in America next year. French & Sons are in correspondence with an American firm and figuring on a ten thousand wheel contest.

Thomas Saunders cables that he will leave Liverpool on the Umbria Aug. 27 and will reach New York, "wind, weather and tide permitting," Sept. 3. Mr. Saunders will represent Bown and other interests, and is so well known this side that his stay and travels are always pleasant.

Mr. Kirby, managing director of the Roulette Cycle Company, is to shortly leave for America, to look after the company's interests here. It is quite possible that a store or headquarters will be opened in New York. Durant, McLean & Company are the Roulette agents here now.

The McCune Cycle Company, of Everett, Mass., writes the REFEREE that the new factory is getting into shape for the manufacture of wheels, and next year it proposes to be "in it." It seems that the old firm of Jost & McCune has a knack of keeping well up in the procession.

McKee & Harrington say they will use hickory rims on their Lindhurst to a great extent. This will lighten the

machine, and other parts will be lightened so that the Lindhurst will scale thirty pounds. The wheel is a good looker and riders around New York like it.

Rouse, Hazard & Company, Peoria, report a number of sales in Mexico, the last order coming from San Luis Potosi last week. The fame of this firm is becoming known all over the world, as it has also sold some of its machines in South America, England and other countries outside of the United States.

Mr. Truman of Binghampton was in New York Friday showing a wheel and incidentally talking to a large western manufacturer who wants a capable superintendent. Mr. Truman says it is quite possible that he will be in Chicago ere long, as he is expected there by several people.

R. M. Jaffray, business manager of the REFEREE, arrived in New York Wednesday from Liverpool on the racer City of Paris, accompanied by George M. Hendee of Hurlburt & Company and J. C. Spears of the Spears Manufacturing Company, Worcester. The steamer had a rough trip.

L. B. Whympier takes a two weeks' vacation, commencing Monday, and will put in the time touring leisurely over Long Island, riding when and where his fancy dictates. This the Schoverling, Daly & Gales manager thinks is about the right idea, and he may be joined by Sidney Bowman later on.

Pohn P. Gill of Augusta, Ga., who sells Columbias in that pretty southern city, called on the REFEREE's New York office the past week and reported that Augusta is laying Asphalt streets, and a boom for cycling is therefor at hand. The REFEREE man introduced the Georgian to Editor Potter of *Good Roads*, who talked vitrified brick, asphalt and other roads in plenty.

Starley Brothers, J. K. Starley, Humbar & Company, have sent an expert accountant to Toronto, Can., to go over the books of the Stark Cycle Company, which failed some time ago. The Stark company has asked the English firms for a two year's extension of time to pull through, and if the expert finds things as represented by the firm which has faith in its ability to right itself in time, the extension will be granted.

A Relationship Problem.

Two ladies out walking met a gentleman; he raised his hat to one, and the other said: "Do you know that gentleman?" The other lady replied, his mother was my mother's only child. The publishers of the LADIES' PICTORIAL WEEKLY will give an elegant safety bicycle (valued at \$125, or its equivalent in cash) to the first person telling the relationship existing between the gentleman and the lady speaking last. An elegant ladies'

gold watch (valued at \$75, or its equivalent in cash) will be given for the second correct answer, and fifty other prizes, ranging in value from twenty-five dollars to five dollars each will be given for correct answers in order as received. Everyone answering must enclose U. S. postal note for thirty cents (or fifteen two-cent U. S. stamps) for one month's trial subscription to the handsomest and most popular ladies' weekly publication on this continent, which is published by a reliable firm, who are offering this prize contest simply to introduce their publication into new homes. Contestants should answer promptly, as date of postmark gives precedence. Prizes for the United States will be sent duty free. Address, LADIES' PICTORIAL WEEKLY, "C." TORONTO, CANADA.—18-2

Concession to Naval and Grand Army Veterans.

The Baltimore & Ohio Railroad will grant most liberal concessions in the way of stop-over privileges on the tickets sold for the Reunion of the Naval Veterans at Baltimore, September 15 to 19, and for the Grand Army Encampment at Washington, commencing Sept. 20. Tickets will be sold at the offices of the company and at offices of the principal railroad companies of the west, from September 13 to 20 inclusive, at very low rates, and will be valid for return journey until October 10. Both going and returning tickets will be good to stop off at all stations between Cumberland and Baltimore, a region rendered familiar to all veterans by the constant warfare along the Potomac. The signature of purchaser to tickets will not be required, nor will it be necessary to have them stamped to make them valid for return journey.

For more detailed information as to time of trains, rates and sleeping car accommodations apply to L. F. Asst. Gen. Passenger Agent, The Rookery, Chicago, or O. P. McCarty, Asst. Gen. Passenger Agent, Cincinnati, O.—18-2.

A neat little five-pointed solid silver star, with the club's colors in the centre, has been presented each of the thirty-six Cook County men who completed the club's recent century.

"Wheels and Wheeling"

AN INDISPENSABLE HANDBOOK FOR CYCLISTS,

By LUTHER H. POTTER, author of "Cycling for Health and Pleasure."

400 Pages. 216 Illustrations.

This book is a companion volume to "Cycling for Health and Pleasure," which met with great success, but contains nearly twice as much matter. It is crowded with interesting and curious information. Beside treating of "Cycling in the United States, the L. A. W., Macadam Roads, and many other topics, it deals exhaustively with Pneumatic and Cushion Tires, giving illustrations of over sixty varieties, and describing in detail their construction and care.

This Information is Collected Nowhere Else.

THE COVENTRY MACHINISTS CO.
GENTLEMEN:—

Your Swift cycles of last year (of which we sold over one hundred) gave such excellent satisfaction that we have decided to make an extra push on them the ensuing season, making them our leading wheel. We find that your machines are much lighter and stronger than most of the high-grade wheels now on the market. We have no fault to find with the Swift, and cannot see chance for improvement.

Yours very truly, RANKIN & BRUCE,
Providence, R. I.

THE WORTH—★

CONVERTIBLE TO A PERFECT LIGHT SINGLE BICYCLE IN 30 SECONDS.

From C. A. Coleman, Kearney, Neb.

July 19, 1892.

GENTLEMEN:—I have just received a Worth, and have tried it, and I find it one of the easiest riding and finest wheels that I have ever seen. You have the right thing in the right place.

From F. Huffman, President Winona Bicycle Company.

July 25, 1892.

GENTLEMEN:—Although I have other wheels in stock, I will say that I would far rather walk than to ride any other wheel but my Worth, which is certainly the most perfect wheel made. I do not say this with the experience of only a few wheels, as I have ridden almost every wheel made, and I am in a position to judge. I would not part with my Worth for its weight in gold if I could not get another.

“LADY WORTH.”

INSTANCES OF ROAD-HOGISM.

How can road-hogism be checked most effectually? This question has been frequently asked of late, the touring season being now open. Some farmers seem to take delight in bulldozing the wheelmen into giving them a clear road, and often use forcible means.

Shall the wheelmen use forcible means, throw dirt and rocks, thrash the driver, or what?

Shall he carry in his inside pocket tracts, showing cyclists' rights on the road, to distribute among the offenders?

Are there such tracts printed?

These and a thousand other questions may well be asked.

A farmer's daughter, fresh from a central Illinois district, when told of several cases of road-hogism couldn't see it that way. She liked the cyclists and always turned out when passing them, but was certain "she needn't if she didn't want to."

Further conversation revealed an alarming state of ignorance. She informed the writer that the farmers were taught to believe that the cyclists had no right on the road; that they were required to get off and walk around every approaching team, not doing which they were liable for damages.

This, perhaps is explanatory of the recent outrages heaped upon wheelmen in certain parts of Illinois and other states. A few circulars vigorously worded might do these people a world of good—and they might not.

As matters stand, however, the cyclist must enforce his rights by fist, stone or clods of dirt, scaring the horses or holding his own in the rut until Mr. Road Hog changes his mind. There is little doubt that a great deal of road-hogism originates in this way, for drivers are often poorly informed, and not knowing the laws, yield to the "cussedness" too often a portion of their natures. Much road-hogism is pure cussedness, and in such cases a good thrashing administered by the injured party would result beneficially. Once let these fellows know that all wheelmen are not duds, give them an idea that they are able to take care of themselves and good will result. Here are a few instances of ill-treatment of Chicago cyclists upon the public highway:

C. H. Larsen met with so many cases on his trip to Niagara Falls that he purchased a revolver, carrying it openly, and not hesitating to point it at the driver. He cleared his way nicely, only once firing and then over the man's head, afterwards shooting the dog the fellow set upon him. This same gentleman, while out with a party of South

Chicago riders, met an excellent subject who refused to yield half of a poor road. Larsen held the horse while the others thrashed the road hog until he cried enough. They then invited him to call the police.

A. P. Park and F. E. Spooner met many of the class up in Wisconsin, while on a recent century from Milwaukee to Watertown and return. After yielding to several they were thrashed vigorously with a horse-whip by the last one for scaring his horses. He then whipped up and drove off at full speed. The next man met tried to hold the road. The wheelmen stayed him out and held the rut, threatening meanwhile to fight if he didn't yield. He did.

Miss Lucy Porter was with Ed. Porter on a century run to Kenosha. A road hog attempted to run over the lady and her wheel. Mr. Porter thrashed him.

The recent case of Mr. Platt is another instance, the "hog" trying to run over man and wheel, which he was trying to fix.

The clubbing so brutally given Guinea is a matter of history, a policeman being fined \$10 and costs for his brutality.

The case of Sam J. White is also fresh in the public mind, for it is still on, the L. A. W. attorney having recently sworn out the third warrant for George Colbeck's arrest, he having jumped two bonds. The league is prosecuting this case vigorously. Colbeck ran White down at Oakley and Chicago avenues July 16 last, injuring the man and smashing the machine.

A hundred cases of similar import could be recited. These men would look well in a chain gang under soldier guards, breaking stone for the improvement of our public highways.

INVITATION RACES.

Invitation races do not seem to prove very successful either in this country or in England, for those run this year have been nothing better than farces. It is customary for the tournament managers to offer exceptionally good prizes for these events, such as would seem to attract any rider, but even this does not bring out the men whose names are on the programme. In England, were some three dozen of the best men were entered—and they had promised to ride—only a third of the number faced the starter. At Parkside many of the best men did not show themselves in the mile invitation handicap, so it was not surprising that a 300-yard man got across the tape first. It is not because of a lack of interest on the part of the men that they do not compete, at least in this country, but solely because the event is placed as the last on the programme, when the men are tired out and do not feel justified in competing with great odds against them. A five-mile invitation handicap, with good prizes up, would make a grand race if put on the middle of the programme, when the cracks are in condition to do themselves justice. Tournament managers do not, apparently, arrange their programmes as best they might, for frequently several scratch events are brought together, whereas if more time for rest were given better racing would result.

CEMENT vs. BOARD TRACKS.

It is pretty generally believed nowadays that cement tracks are capable of greater speed-producing qualities than those made of clay, dirt, macadam or boards, and there is talk of building some of the proposed American tracks of that material. The Buffalo track in Paris is evidently fast, for nearly twenty-five miles have been made in an hour on it, and Shorland describes it as being "fearfully fast," even if it is five laps to the

mile. This track is well banked, but is so slippery that resin had to be used on the turns, and, as the *Scottish Cyclist* says, while it may be a good record-breaking track it is hardly safe enough for racing with a big field of starters. But if it were a three-lap track it would not only be safe but faster. There is difficulty in getting cement laid properly, and unless so put down it is worse than nothing. Thin-surfaced cement tracks invariably chip up and require too much repair work. The Buffalo track cost some \$15,000. At that rate a three-lap cement track would entail an expense of \$25,000, while a board track could be built for one-fifth that amount, and it would be much safer at all times. But of course speed is the cry of the day, and cement is, apparently, faster. Not necessarily so, however, for a properly-laid and well-banked three-lap board track has not been given a trial. It is quite sure that a board track, built after the plan of skating rink floors, would prove much more safe if not as fast as cement. Weather would have a more disastrous effect on the wooden track than on the cemented surface, however, and thus both have their advantages and disadvantages. A board track being one-fifth as expensive, would be likely to find favor with those contemplating the building of tracks.

By what right do the Manhattan Athletic Club men raise all this fuss about the non-appearance of Zimmerman at their meeting? Is the man, because he happens to be a champion, to become a slave and subject to the orders of a committee of race-promoters? We opine not. Even though he had entered in due form—which he did not—the Manhattan Athletic Club takes upon itself entirely too much when it presumes to dictate to the rider what he shall or shall not do. Its action seems to us to be a piece of extraordinary impertinence. Riders have been too much "under orders," and Zimmerman's assertion of his right to do as he pleases might be followed to advantage by others.

L. D. MUNGER states that last Saturday, at Buffalo, the heat in which Taylor's competitive mile record of 2:21 2-5 was announced, was so timed by one watch, while the other two made it 2:22. The rules were violated and the single time announced "so that Buffalo might have a record." Entertaining, to be sure.—Exchange.

A case of sour grapes. "Birdie" was heart-broken because his 2:22 was snowed under.—Buffalo Courier.

Munger had a perfect right to complain if the facts were as given above. It is customary to give the slowest, not the fastest, time. If the two watches made the time 2:22 that should have been the time announced, and Munger's record would only have been equaled.

ZIMMERMAN AGAINST TIME.

The Two-mile Record Beaten at Springfield—May Take the Trotting Record.

SPRINGFIELD, Mass., Sept. 7.—(Special telegram).—This morning Zimmerman made a successful attempt to lower the two-mile record held by Berlo. The timers were E. C. Robinson, C. F. Shean and A. O. McGarrett. The weather was clear and the track like glass, but there was a very slight wind. Times, quarters:

Quarter mile . . .	1:34 2-5	1 1-4 miles	2:53 2-5
Half mile	1:08 1-5	1 1-2 miles	3:34 1-5
Three-quarters . . .	1:42	1 3-4 miles	
One mile	2:18	2 miles	4:37 2-5

Zimmerman will probably make an attempt this evening to lower the trotting record, of course with a flying start. MCGARRETT.

The Tiffin, O., police are to be mounted on wheels, the council's committee having reported favorably on the matter.

LIVELY JACKSONVILLE.

Preparations for the Races Next Month—The Track and Grounds.

Jacksonville has always been regarded by men in the trade and other visiting cyclists as one of the liveliest cycling centers in Illinois, and yet, until this season, no attempt has been made to promote a tournament on a big scale. Early this year, however, a few of the ruling spirits in cyclo-dom concluded not to be forever outdone by Peoria, Springfield and other towns in the state, and commenced preparations for a meeting, which, at this writing, seems to need only fine weather to be one of the great western successes of the season.

The dates chosen are October 3 and 4, very nearly the closing event of the season, at which time the weather in that neighborhood is, as a rule, at its best. The committee has been at work for months, the one of most interest to competitors—that on entries—being composed of Arthur D. Black, chairman, Irving Woods and D. C. Catlin. The chairman has been the most active worker. He has attended all the leading meets, and will be found at nearly all between now and the time of the meet.

THE TRACK AND GROUNDS.

The Jacksonville track, which is shown in our illustrations, is a half-mile circuit, seventy feet wide on the finishing stretch. It is well lanked. Inside is a quarter-mile track, of cinders, which is used for training purposes when the large track is in use. The grand stand seats 3,000 people and the "bleachers" another thousand. The grounds are one mile and a quarter from the center of the city, over beautifully shaded, paved streets. They are reached by means of electric cars.

JACKSONVILLE'S INSTITUTIONS.

The city has a population of 15,000, and good hotel accommodations, at rates from \$1.50 per day upwards. The Dunlap is the league hotel. The city has a number of famous institutions. The Illinois College, with 200 students, is the oldest in the state, having been founded in 1829 by Rev. Edward Beecher, a brother of Rev. Henry Ward Beecher.

The Jacksonville Female Academy, a Presbyterian school, was founded in 1833, and has about 150 students. The Illinois Female College, Methodist, has 150 pupils.

The Jacksonville Deaf and Dumb Institute is the largest in the world, while the insane asylum shelters 1,800 patients, and the blind asylum 600. These are state institutions. Besides all these, there are business colleges, financial and art institutes almost without number.

The colleges, of course, supply many wheelmen, and the rivalry between "town and gown" has always been great.

Around the city are numerous runs of from eight to ten miles.

Jacksonville is 215 miles from Chicago, 90 from St. Louis, 80 from Peoria, 35 from Springfield, and 80 from Quincy. Cheap rates from all points will probably be granted, and Chicago people are likely to be favored with a special over the Santa Fe and Jacksonville South-eastern.

SOONER or later, no doubt, the racing board will see the advisability of adopting an entry blank and making it compulsory on race promoters to use it. Some of the specimens we have seen this season—in fact a majority of them—have been absolutely useless, no particulars of performances or other information being asked for. It is a matter worthy of consideration.

Rough on the Britishers.

Between the efforts of the McKinley bill and President Harrison's twenty days quarantine proclamation the English manufacturer will in very surety be between the devil and the deep blue sea, and some half score of Johnny Bull's cycle trade representatives will spend a good many days gazing at the seemingly mocking girl "Libbie," known as Bartholdi's present to America—Liberty Enlightening the World. The belated Britisher will think all this talk about Yankee fair play and freedom is bosh. We have good cycles and little cholera in America, and the less of the latter the better; but we like to see English cycles here. We can compare them with the American production, which a Coventry manufacturer once told me originated, as a rule, in Coventry, and on that score refused me admission to the factory, being afraid I was after something new in patterns. Still, we love the Humber pattern; so do nearly all the manufacturers, and that is the reason we like to see England send us cycles, so that we can compare them with the American Humber patterns and all other kinds of patterns.

SEVERAL OF THEM WAITING.

There are several of England's representatives down the bay, and some of them may have to run the gauntlet of Dr. Jenkins' fumigating method to stamp out cholera germs, which means a sulphur and steam bath for man and his clothes. Fancy Golder (now over-due three days) being scrubbed at quarantine by the doctor's assistants, while his cargo of New Howes undergoes the same treatment!

Thomas Sanders and many others are said to be on various boats, and they will be liable to look at Liberty island, Coney island, and all the other islands, and wish the Asiatic scourge had confined its efforts to Russia.

The Zimmerman Non-Appearance.

The letters and the special wire to the REFEREE stating positively that Zimmerman would ride at Cleveland instead of at the M. A. C. meet in New York were accepted by all cyclists outside of the M. A. C. committee, it would seem, but there seems to be little doubt that the M. A. C., from their letter published herewith with that of Zimmerman's brother-in-law, Joseph McDermott, had no right to expect the New Jersey rider to be present. They did not comply with the provisions of rule G, clause 4; neither did Zimmerman. Unless a rider's entry is in writing and his entrance money is in hand, no race-promoter has any right to expect and insist on a man's being present, and has no right to advertise him—that is, if any deference is to be paid to the L. A. W. rules, and there is little in racing matters these days.

Zimmerman seems to have done the right thing when he sent his representative to ask the M. A. C. people to let him off, as he could not be pre-ent. But as if the rider was a hireling and not a gentleman amateur, they refuse to let him off and go right on advertising him as a starter. As regards the roasting Mr. McDermott speaks of, I did not see any "roasting" before the meet, but heard

that expressions far from complimentary to the plucky rider were floating about.

Director Moneypenny hopes that the matter will be given fair consideration by the REFEREE, which certainly, as far as I am concerned, it shall have. The title of this paper means fairness, and the most obscure are treated with as much fairness as Zimmerman or the powerful athletic organization Mr. Moneypenny represents. The letters from Director Moneypenny and Mr. McDermott are as follows:

FROM THE MANHATTAN'S DIRECTOR.

NEW YORK, Aug. 29 Mr. W. J. MORGAN—MY DEAR SIR—In reply to your favor of the 26th inst., asking me about the entry of Mr. A. Zimmerman at our meet, I gladly furnish the following: Upon Mr. Zimmerman's return from Europe a committee representing this club took part in his reception at that time.

Mr. De Graaf, who was one of this race committee, and also one of the movers of a reception to Mr. Zimmerman, was present.

He asked Mr. Zimmerman to compete at our meet, and Mr. Zimmerman promised faithfully to

Your favor of 26th inst. received. I thank you very much for your interest in Arthur.

There is no question that Arthur was invited by Mr. DeGraaf on the day he arrived from England to take part in the M. A. C. races and that he accepted the invitation. Later he found that he would not be able to keep the engagement without a wholesale change of arrangements, and wrote me to call on Mr. DeGraaf and tell him that he (Arthur) would not be able to compete.

On August 15 I called on Mr. DeGraaf and told him the shape that the matter was in and asked him to release Arthur from any obligation to appear. I told Mr. DeGraaf that if it would make any difference to the club financially that I would have Arthur give up all his arrangements rather than that the club should suffer in that way.

Mr. DeGraaf said that so far as he was personally concerned he was agreeable to my wishes, but he preferred to consult with the race committee. On the 16th of August I received a letter from Mr. Moneypenny saying that the committee would not release him. Some other correspondence followed.

On the 17th or 18th articles appeared in the New York papers insinuating that Zimmerman was afraid to meet Windle and had been afraid to meet Osmond, etc., and that was his reason for not appearing. That settled the matter. Our friends (?) do not say things like that. No entry was sent in and no entrance fees paid.

To sum it all up it is just like this:

They invited him. He accepted. He found he couldn't attend and asked to be released. They refused and he insisted, as he had a right to do. They then began to "roast" him in the papers.

If my wishes could be carried out I would have nothing said about it. I do not wish to enter into

The Goodwater Grove Track, Stockton, Cal.

be there. This was all that was considered necessary by the committee, they believing that, as he had given his promise, he could be counted on to be present. He did not make out any entry blank, but his promise was considered sufficient to enter him. Shortly after this Mr. McDermott, who represented Mr. Zimmerman, waited on Mr. DeGraaf and asked him to release Mr. Zimmerman from his promise, offering as an excuse that he had promised the Cleveland people to compete at their meet. Mr. DeGraaf informed him that he would have to refer the matter to the committee, which he did, and after due consideration the committee decided that they could not release Mr. Zimmerman, as they had announced to the public that Mr. Zimmerman would be there. They had also used his name in all the printed matter advertising the meet. In the interview between Mr. McDermott and Mr. DeGraaf Mr. McDermott said that if we insisted on Mr. Zimmerman's appearance at our meet he had no doubt but he would be present. These are the facts in full, and I can show you Mr. McDermott's letter if you desire to see it. As you will note by the foregoing, the committee were justified in every particular in advertising Mr. Zimmerman, and his non-appearance was no fault of the committee's but simply Mr. Zimmerman's failure to keep his promise. Trusting you will give this matter fair consideration I remain

Yours very truly,

R. B. MONEYPENNY,
Director of Cycling.

M'DERMOTT'S LETTER.

FREEMOLD, N. J., Aug. 31—MY DEAR SENATOR—

a controversy with Mr. DeGraaf or any one else. Arthur has been "roasted" so much that it don't interfere with him any more. He keeps on winning races.

I don't think the riders will be a party to any arrangement to do anything unfair.

The only difficulty we had in England was when race meet managers used his name as a card when they knew he would not appear.

Yours truly, JOSEPH M'DERMOTT.

The summing up by Mr. McDermott hits the nail on the head, and the pity of it all was the disappointment of over ten thousand people who wanted to see Zimmerman, and his absence seemingly caused the meeting to fall flat, as it was entirely devoid of that snapseen at other meets. To do justice it must be said Mr. Moneypenny got out considerable advertising before he knew Zimmerman's wishes.

International World's Championship.

The above sounds like Ducker days, doesn't it? Well, the proposer of the above is no other than the mild, conservative, well-posted, practical Henry Sturme, editor of England's greatest cycling journal, *The Cyclist*. Mr. Sturme writes me from Coventry, Aug. 19, and says the N. C. U. is in favor of such

a struggle as the above comprehensive title calls for. The N. C. U. has well placed the matter for England in Mr. Sturme's hands, and he evidently wished to give me some light on the subject by saying "enclosed find slip on same." But no slip was enclosed. From an editorial in *The Cyclist* I gather the following: The scheme is to enter into correspondence (the N. C. U.) with the governing bodies of national associations the coming winter, and arrange an annual world's championship meet, to be run in different countries each year, America being suggested for next year, owing to the World's fair.

TEAMS OF THE BEST MEN

of each country are to be selected to represent their respective countries, and here Sturme pays America a compliment by stating that at the present time we have a better collective team of riders than any other country. In this as in other things Henry Sturme shows good judgment, for there is not a shadow of doubt that America could send the winning four to any race in the world at the present time—Zimmerman, Tyler, Taylor, Windle—the greatest quartette the amateur world has ever seen up to the present time. Mr. Sturme mentions France, Germany, Holland, Belgium, Australia and America as nations, but says "France and Australia are out of the running owing to their adherence to universal professionalism." What of that, Mr. Sturme? Sanction the appearance of the cash men against the creak men.

The distances suggested for competition are anything from a quarter to fifty miles, for speed up to ten miles, and then a pace-making, gruelling fifty for those who like such sport. Profits and losses, Mr. Sturme suggests, should be equally divided by the respective contesting countries, and two official representatives be allowed to travel with each team. By this plan we might possibly welcome Hillier to America, as it seems impossible that he will come unless on racing bent.

Sturme proposed this scheme years ago, when English riders were unconquerable; and it lacked "go" for that reason, probably.

BUT WHAT A CHANGE, MY MASTERS!

Now this is all very fine and large, Mr. Sturme, but in the meantime what, Oh, what shall we do with the amateur definition? I see you are wrestling with the question in England mightily, and our racing board lozes sleep and sits up nights in the repair shop tinkering with it, and the repair, like a pneumatic puncture repair, is not lasting. Therefore it would seem that the veteran cyclist editor must first wrestle a bit more with the makers, amateur question and the amateur definition, and I fancy the proposed international world's championship will easily be arranged. The question is, will the race be for amateurs, makers' amateurs or professionals? Mr. Sturme has labored well and hard for the cause of racing, both amateur and professional, and the professionals never had a better friend. I would like to see his latest, most feasible and altogether important scheme a huge success; but that ghost—the amateur definition—rises before me yet.

The Ride Around the Hub.

The junior editor of *Bicycling World*, James Cartwright, Jr., sends me a circular and letter of invitation to attend "A Wheel Around the Hub," which is a repetition of the historical Sept., 1879, ride around the Hub. That grand pioneer cyclist, Frank W. Weston—"Papa" Weston to old timers—is in charge of the ride, and it is safe to say that, with

the assistance of Fourdrinier, Cartwright, Hodges and others the two days' ride will be an enjoyable time.

Among other things my defeated racing protege says that "the new plant for his paper is now (like Mars was recently) very near to us, and only one more issue will be presented under the old form, which will be a blessing all around.

Mr. Cartwright also informs me that Arthur Zimmerman has been in Boston and secured the services of his old trainer, W. Corcoran, and the pair have gone to Springfield. If ever there was a faithful trainer Corcoran is the man, and Zimmerman will need him from this time forward.

Cartwright draws attention to the fact of "machine cleaners and ambulances" for the two days' ride around the Hub. The latter seem scarcely necessary these days.

Graves a Professional.

So the racing board has suspended and also now declares Graves of Springfield a professional! Here is a case of suffering for other people's sins as well as your own; but what glory or credit will the racing board reap from this one offender's suspension while the ninety-and-nine go scott free? This is a sop to stop the clamor for a rigid enforcement of the amateur definition, and Graves can consider himself a victim of misplaced confidence and a sacrifice to expediency. Being without backing of any kind, he was led as a lamb to the slaughter. The

manufacturer, aye, and the club which plucked the forbidden fruit and asked him to eat, will not be blamed and will continue to enjoy the freedom of the eden of amateurism; but the one led into sin will be kept out of the garden by the L. A. W. racing board's flaming sword, never again to enter its sacred precincts. Do you call this right or wrong, or is it a farce? Rip up the amateur definition; treat all men alike under the law; but the law has been proved to be inoperative, to those who will and can see.

Some Irish Bulls.

That remarkable laster in racing and *Irish Cyclist's* editor, Richard J. Meccredy of Dublin, gets off the following in a recent issue:

The "Irish Athlete" makes a particularly Irish remark in its last issue when it suggests that boys' races should be encouraged, and that "any entry should be refused in which the birth certificate shows that the lad is under, say, eleven, and over sixteen!" Quite right, I. A.; any boy who is so lost to all sense of what is proper as to be under eleven and over sixteen at the same time should certainly not be allowed to compete as a gentleman amateur.

The above reminds me of the Dublin doctor who was severe on the ice supplied to the residents of Meccredy's city, and who gravely declared that the only safe way to use ice was to boil it first.

The Irish Sportsman, L't'd.

Some five years ago when in Dublin I had the pleasure of meeting a splendid

sportsman in the person of the late lamented John L. Dunbar, editor of the above paper. Dunbar was an encyclopedia of Irish sports and was official handicapper to the Irish Athletic Association. Dunbar was then running the *Sportsman* and also the *Irish Athletic and Cycling News*, which was edited by the "Scorchers" (E. J. O'Reilly), now one of *Wheeling's* editors. The two papers were fairly prosperous, judging from what could be seen in the advertising departments, but Dunbar was too much a sportsman and race meet attendant to make a very successful editor, and there were few meetings at which Dunbar and O'Reilly were not present. Dunbar was very popular in Dublin and with the Irishman's privilege he did not agree with his neighbor, R. J. Meccredy, who was then struggling along with his *Irish Cyclist*, and many were the arguments they had over athletics and cycling, and Dunbar's feelings were shared by O'Reilly in many instances. How things change. Now, in the last *Irish Cyclist* there appears as a supplement a prospectus of "the *Irish Sportsman*, L't'd." which offers stock at one pound per share. R. J. Meccredy

FIGURES AS ONE OF THE DIRECTORS;

so does the owner, F. Percy Low, manager of *Wheeling*, who no doubt got hold of the property through the medium of E. J. O'Reilly and Dunbar's widow. The relations between *Wheeling* and the *Irish Cyclist* in the past have been somewhat strained, no doubt through O'Reilly

joining the former staff, but even with Du Cros, Sr., Meccredy and Low as directors on the *Sportsman*, everything should be lovely for a while. In the meanwhile that excellent Dublin paper, *Sport*, will be a thorn in the side of the limited company, but with such sporting people as the Irish two weeklies should pay in Ireland, and it is pleasing to see John L. Dunbar's old paper still in the ring.

More Cycling Paper Changes.

H. Crowther, late cycling editor of *Sporting Life*, dropped into the REFEREE office this morning from Boston, and joyfully announced that he will in future work for the Wheelman Company, publishers of the *Bicycling World*—a paper which though a trifle ancient recently, promises to shortly bloom like a rose in the desert, and oblige its advisers, who of late have been offering much advice as to how the paper should be conducted. Crowther will take Frank Egan's place in the editorial columns and will be a most valuable addition to the staff, as of late Mr. Fourdrinier has had his hands full arranging the new plant and attending to the paper's business details. Mr. Crowther will also attend to the advertising department of the revived and altogether new Boston paper, and will be a useful addition politically in helping to secure the *Bulletin*.

ANOTHER FIVE YEARS CONTRACT

when the present contract expires three years hence. The old brigade feels a

certain amount of respect and veneration for the old paper, and its well-wishers are many—a hundred times more than its defamers. Long may the “ancient and honorable” flourish.

Ah, yes; and report says that the “editor and proprietor” is casting longing glances toward Lake Michigan, and feeling the utter neglect the Windy City has experienced as a cycling newspaper centre, he proposes, so tis said, to send one “Betsy B.” to educate Chicago up to high class solid cycling journalism, devoid of personalities. If rumor is correct and the effort is made, there will be a time of repentance, sure as you are born.

* * *

Coffins as Prizes.

Those jokers the Park Avenue Wheelmen, of Philadelphia, evidently wanted to out-do Springfield's carriage and pair as an advertising medium for a race meet, so they “gravely” announce a coffin as a prize for one of the races at their meet. Possibly they anticipate the burial of the “amateur definition,” and by placing a two-minute time limit on the race the coffin will revert to the club, which in turn will tender it to the racing board for funeral services at the next meeting of the L. A. W. convention. Now that cholera is with us a coffin and graveyard lot might prove of more use than a piano, carriage and team, or a city lot; and the beauty of it is a coffin will keep, and the patterns don't change as often as bicycles. Altogether a coffin makes a nice L. A. W. prize, and don't in any way reflect on the organization, and it cannot, if buried deep enough.

W. J. MORGAN.

The Law of the Road.

EDITOR REFEREE:—What show has a common bicycle rider with a road hog, as you call them? I was run down by a teamster two weeks ago and narrowly escaped with my life. Is there no redress for a woman? MARION.

Courts have decided this question hundreds of times, but the decision of the New York supreme court, made recently, probably defines the law more clearly than any yet rendered. The case was where a wheelman was run into and injured, both himself and his machine, by a carriage. Suit was brought against the owner and driver of the carriage for damages. On the trial it appeared that the wheelman was going slowly and was on the right hand side of the road. The carriage was being driven rapidly in the opposite direction and did not turn to the right to avoid the wheelman. The court held that the latter was where he had a right to be, that by turning to the right he had taken reasonable precaution to avoid collision with other vehicles and that he was not required by law to turn to the left, even though by so doing he might have avoided a collision. The rule was laid down that bicycles have the same road rights as other vehicles, and that carriages must turn out for them where it is possible or take the consequences.

A Medical Authority on Long Rides.

Regarding long-distance riding, the London *Lancet*, probably the highest medical authority in the world, says: “In some instances such is the tension that the man literally propels himself in what may be called blindness. His legs work automatically, and his course is directed in a manner very little different. A man is not an engine of iron and steel, and that if he treats himself as one he will soon become an engine so disabled that his better self will fall into death before he has reached what in others better trained would be the prime period of vital strength and activity.”

FRONT DRIVEN SAFETY.

BECOMING MORE POPULAR AMONG ENGLISH TRADE MEN.

Something New in Rovers—Patterns for Next Season Already Appearing—A Thirty-Pound Crypto—Sundry Trade Items.

LONDON, Aug. 27.—Several of the leading firms are apparently determined to compete with the makers of durable pneumatic tired safeties at popular prices. Until the demand of the elite of the purchasing public had been satisfied, there was no difficulty in maintaining a brisk trade in Dunlop tired safeties listed at £26. Now, however, this demand has waned, and firms desirous of obtaining the patronage of the large class with limited purses are placing on the market sound, handsome and well-finished mounts, tired with Dunlops or other pneumatics, at a medium price of about £15. These machines are identical with those sold at the higher price early this season, except as regards weight.

NEW POPULAR ROVER.

J. K. Starley & Company have just launched the New Popular Rover, a high-class full roadster, Dunlop tired, fitted with ball bearings throughout, and bearing a close resemblance to the Light Rover, which I very fully described some weeks ago. The new mount is listed at £15 net cash. Although not remarkably light, this pattern is very superior in all its details, and is a mount which any one might feel proud to possess. It is an 1893 pattern but can be supplied to order at the present time.

The Rover people will not touch the front driver for next season. Naturally they are very confident in the type which they have been successful in making fashionable “o'er the whole world's face,” to quote from some clever verses they publish, and, notwithstanding my belief in the magnitude of the impending revolution in type before us, I have little doubt their persistent enterprise will be rewarded.

THE QUADRANT CYCLE COMPANY, LTD.,

have also brought out a novelty within the last week or two. It takes the form of a strong, well finished rear driver, on the familiar lines of the season—long base, diamond frame, long ball socket steering—and is called the Jennet. Fitted with Bates' excellent cushion tires, its price is £13. For rough work and big strong rides, this is a mount to be recommended.

The company are sceptical regarding the front driver, and feel quite satisfied with the steady demand which continues for their various safeties, and their No. 8 Quadrant tricycle, with small wheels, and a neat thumb screw and flynut attachment for removing the off-side wheel in a moment, causing a 30 inch doorway to present no difficulties.

This firm also make a very light racing safety which has met with recent success on the road, and their well known tandem is by no means a thing of the past.

ON FRONT-DRIVEN SAFETIES.

Having referred to the rear driver and some of its makers with becoming respect—for I feel it my duty to so treat the dominant type of yesterday—I may be allowed to pass on to the new pattern safety, in which I take an absorbing interest. Once you have convinced yourself a thing is right nothing is more congenial than to watch the disappearance of the mists of prejudice which al-

ways gather thickly round a striking departure.

At the last Stanley show, the Crypto F. D. safety was in its embryonic stage, and like most embryos its form was not remarkable for beauty. Having determined the final design of the full roadster, the introducers of the new type have devoted endless pains to perfecting a light roadster, which may now be obtained in the ordinary course by anyone. A week ago I met a fellow clubman, until recently a religious believer in the chain-driven safety. I found him

IN ECSTASIES OF DELIGHT

over a little 30 inch Crypto front driver, geared to 60 inches, and weighing with saddle and pedals just 30 pounds. I tried it, of course, and so did half a dozen others. My own impression was so favorable that I lost no time in securing the loan of a similar machine for the purpose of an extended trial. My experiences of the mount, which reached me late yesterday evening, I hope to give you in my next letter.

In the meantime let me describe the ‘little ‘un’ to you. It costs no effort to pick up the machine, tuck it under your arm, and run with it. The tires are light roadster Boothroyds, fitted in Surrey Machinists' hollow rims. The hubs are of phosphor bronze, with direct spokes in the machine I have, but my friend's mount had tangent spokes and steel hubs, slightly lighter. The back wheel is 26 inches with a step fitted conveniently low down on the back fork, whilst the saddle and handles are arranged to secure a most comfortable attitude to the rider.

EVEN ON THIS SMALL SIZE

there is no sense of being cramped, whilst the weight falling between the two wheels, much less vibration is experienced over a bumpy road than with an air-tired rear-driver. This advantage obtains in a still greater degree with the geared ordinary, although some lightness has to be sacrificed in the case of the higher mount. About the actual sensations experienced on the road I will speak after a prolonged trial.

Knowing Mr. J. Rickard's special skill in constructing very light cycles, I called this week at his works in Doris street, Kennington, in the hope of seeing something wonderful in the shape of a light F. D. safety which I had heard he was busy upon. I was not disappointed. The builder of the 26-pound

WESTMINSTER LIGHT ROADSTERS

is nothing if not original and up to date. His success has been due not so much to the high quality of his work, his wide knowledge as an engineer and the first-rate machinery he possesses, as to his intimate acquaintance with the leading road riders of the day, and his determination to supply just what is needed at the time the need is felt, instead of eighteen months after.

Beginning with the reliable geared hub and cranks of the Crypto pattern, scaling eight pounds, Mr. Rickard has designed a frame and wheels of his own brand. The rims are hollow, the spokes tangent, the tires Preston Davies', and the complete machine, with its 36-inch front and 22-inch rear wheels, only weighs twenty-seven pounds. Mr. Rickard puts the final weight as possible of reduction to twenty-five pounds.

Both the back and front forks have double hollow crowns. The oval backbone curves elegantly downwards to the back forks, and these latter are also curved. Little rake is allowed, although the saddle is well back. I have been promised a trial of one of these machines, which are sure to prove very fast, and readers of the REFEREE will hear more about it. The workmen at the West-

minster factory are at the present time engaged on overtime in the execution of foreign orders.

ANOTHER GEARED ORDINARY

of which I have been promised an early trial is that of Macbeth, Phillips & Taverner, of Clapham Road. The gear used is simpler than the Crypto pattern and I hope to describe it clearly in my next letter. I have seen the machine, which has a 46-inch front and 21-inch rear wheel, with a very moderate amount of rake.

The Macbeth safeties go in large quantities to Belgium—a country in which cyclists have been increasing in numbers by rapid bounds. For example, in Brussels there were only twenty-eight riders in 1878, thirty in 1885, whilst in 1890 there existed about 358. At the present time Brussels possesses about 7,700 wheelmen.

The Granville cycles have made a big name at home and abroad this year. Many Granville safeties have found their way out to India, and recently Mr. M. Doughty, whilst continuing his extensive premises at Station Road, Camberwell, has opened a spacious storeroom, with a factory and riding school for ladies in the rear, at 132 Clapham Road. Mr. Doughty will include a front driver among his 1893 patterns but the details are at present *in nubibus*.

I hear from a private source that Humber & Company, Ltd., have purchased a very simple, ingenious and effective gear for front driving safeties, enabling the cost of production to be greatly reduced as compared with that of the rear drivers, and that the firm will shortly place the novelty on the market. I will endeavor to procure further details respecting this novelty by the great firm for inclusion in my next letter. STANLEY.

Whittaker, Oxborrow and Lee.

In overhauling our photographic reminders of by-gone days, it happened that we unearthed a picture of the original Rudge triplet and its crew, which, as being of some little interest, is here presented. The riders are Whittaker, Oxborrow and Lee, three professionals who were famous five years ago, but all of whom have lain on the shelf for some time, until a couple of weeks ago Oxborrow beat some kind of a record in England.

And, by the way, it was very amusing how some of the “cycling authorities” blundered. “Who is this Oxborrow? We never heard of him!” And so on. Oxborrow, nevertheless, was at one time a famous rider. He was formerly an amateur, but became a “pro,” if we recollect rightly, in the early days of the safety.

Whittaker is a character known throughout the cycling world as a record-breaker in olden days. Lately he has devoted his spare time to talking reinstatement, but without effect.

Lee was for three years a really grand rider, and frequently won English professional “championship” events. This trio once startled the cycling world by claiming a mile on the road in 2:13. Some said it was made downhill and some that the course was short. Anyhow the record was never substantiated, and therefore faded from the memories of many. There is no doubt, however, that they accomplished some great performances on this machine.

Another New Club.

The Carondelet (Mo.) Bicycle Club has been organized with the following officers: President, W. F. Street; vice-president, Gus Zeiss; secretary and treasurer, E. Harris. About twenty members signed the roll.

NEW WORLD'S RECORD

EXTRAORDINARY PERFORMANCES OF
A WEEK.*A Quarter at a 1:48 Pace—Zimmerman
Is Unquestionably the Champion—
Some Speedy Western Men
at Columbus.*

At Hartford, Sept. 6th:

Quarter-mile, flying start, competition, Zimmerman, 27 seconds.

Quarter-mile, standing start, competition, G. C. Smith, 31 1-5 seconds.

Half-mile, competition, Zimmerman, 1 min. 1 4-5 sec.

The Hartford track is one mile in circumference. The last quarter is nearly straight and has been, before, the scene of some of the most extraordinary last quarters on record. The times given above, of course, will be submitted to the racing board, the chairman of which was present.

* * *
The Mile In Competition.

At Clifton, N. J., Sept. 3.—Zimmerman, 2 min. 19 sec.

* * *
Other Remarkable Performances.

At Hartford, Sept. 6.—Half-mile, competition, Windle and Tyler, 1 min. 22 5 sec.

At Birmingham, Conn., Sept. 2.—One mile, competition, Zimmerman, 2 min. 19 3-5 sec.*

At Columbus, O., Sept. 4.—One mile, without pacemakers, Berlo, 2 min. 17 1-5 sec.

At Columbus, O., Sept. 3.—One mile, with pacemakers, flying start, J. P. Bliss, 2 min. 13 2-5 sec.

At Indianapolis, Sept. 4.—Quarter-mile, flying start (twice), J. S. Johnson, 28 1-5 sec.

At Indianapolis, Sept. 5.—Quarter-mile, competition, C. W. Davis, 32 1-2 sec.*

At Clifton, N. J., Sept. 4.—Quarter-mile, flying, competition, Zimmerman, 28 3-4 sec.*

At Springfield, Mass., Sept. 7.—Two miles, against time, Zimmerman, 4 min. 37 2-5 sec.

*Records at time accomplished, but since beaten.

* * *
Hartford's Annual Meet.

The Hartford Wheel Club has nearly always been favored with fine weather for its meets, and this year was no exception to the rule. Saturday evening saw several hundred cyclists gathered at Hartford, and the hotels assumed a decidedly cycling appearance. The Hartford clubs paraded, headed by the Pope band, Saturday evening, the streets being lined with people, and the parade proved a good "advance notice" of the meet to follow. Some two hundred were in line and a band concert was afterward given at the club room, a great crowd thronging the street.

Cyclists came into Hartford with every train Sunday, and the local cyclists entertained out-of-town visitors in the morning with a run to Charter Oak Park, where refreshments had been provided, and with a run in the afternoon to Grant's Grove on Vine street, some four hundred wheels being in line. Refreshments were served at the grove also.

The club kept open house all Sunday evening, and a thousand riders from all over wandered in and out the rooms, attended church, and strolled around the hotel.

George Collister, of Cleveland, and Joseph Bressler, of Detroit, found their way into town late in the evening without an escort. Abbot Bassett, "the young secretary" of the L. A. W., accompanied by the racing board executioner, H. E. Raymond, followed suit. Zimmerman, Taylor, Windle, Banker, Campbell, accompanied by backers, trainers, managers and tire men, trooped into the Nutmeg State capitol during the evening.

THE DAY OF THE RACES.

Monday morning opened beautifully fine. During the morning the usual parade took place with about four hundred in line and the usual tinsel of parades. Pope's band headed the procession which was, of course, photographed, and the fall meet of the Connecticut Division was over as far as parades were concerned. At 1:30 a crowd of five thousand, and possibly six, gathered at Charter Oak Park. The early hour of starting was made necessary by the large entry, several trial heats being run before the advertised time, 2:30.

The track was in fair condition, rather dusty, and a stiff wind blew in the riders' faces on the back stretch but favored them coming home. The usual good Hartford management prevailed, and the usual crowd of "prominents" were on hand, some of them being as follows: Colonel Albert A. Pope, fresh from his trip to the north, accompanied by R. D.

Maltby gave exhibitions between the races.

The shrewd Springfield tournament managers held their man, Tyler, aloof from Zimmerman in order to have them meet at Springfield for the first time, but Windle defeating him has rather taken the edge off the uncertainty of that meeting. Zimmerman's three-quarters in the mile handicap, 1:46 1-5, is world's record in competition, but he could only get fifth at the finish. Harding's one hundred yards proved too much, and, in truth, a hundred seems more than plenty for the Hartford Wheel Club.

WILLIAM WAS NOT THERE.

W. Herrick, of Chicago, was down on the programme as grand marshal, but no pink-haired man put in an appearance, so it was supposed he was in quarantine somewhere. The other officials were: Referee, Col. Chas. L. Burdette; judges, Abbot Bassett, H. E. Raymond and F. P. Priol; timers, General Alexander Harbinson, Leander Hall, and J. P. Allen, all horsemen; starter, T. W. Foley (the popular "Tim" of that ilk), while "the best," W. C. Marion, Jr., announced the events and winners, and W. H. Telcott clerked the course, and did it well.

ENTHUSIASM WAS LACKING.

There was a well defined absence of something about the first day, and it was the lack of that old-time burst of applause and excitement over the finishes

A time limit of 5:50 had been put on this race, so the referee ordered it run over, which was done, resulting in the men maintaining their positions, and making the time of 5:31 3-5, which was allowed and declared a race.

Mile, 2:40 class—First heat—J. W. Robertson, 1; N. Harding, 2; J. M. Grant, 3; time, 2:40 1-5.

Second heat—A. W. Porter, Newton, 1; F. R. Fuller, Hartford, 2; A. W. Warren, Hartford, 3; time, 2:31 2-5.

Final—Harding, 1; Stanton, 2; Warren, 3; time, 2:43 2-5.

Mile, handicap—First heat—H. C. Tyler, scratch, 1; A. W. Stacey, 125 yards, 2; C. W. Worcester, 3; time, 2:22 2-5.

Second heat—A. A. Zimmerman, scratch, 1; G. A. Nelson, 75 yards, 2; F. B. Stow, 140 yards, 3; time, 2:21 1-5.

Third heat—W. Harding, 100 yards, 1; C. S. Thompson, 110 yards, 2; W. C. Middlebrook, 140 yards, 3; time, 2:32 2-5.

Final—Harding, 1; C. S. Thompson, 2; W. B. Middlebrook, 3; time, 2:10.

Zimmerman from scratch made a magnificent effort, and paced his own way all through, but could not get nearer than fifth, his time being 2:20 1-5, the fastest of the day, his three-quarter mile being 1:46 1-5, which is competition record.

Half-mile, open—W. W. Windle, 1; H. C. Tyler, 2; George Taylor, 3; time, 1:17 1-5.

A splendid race from the quarter pole home, Windle proving himself almost if not quite the Windle of old. He clearly out-paced Tyler and Taylor, although it was said Tyler was not feeling well, the result of water drinking.

Mile, Hartford Wheel Club, handicap—B. Zalamer, 150 yards, 1; C. Fred Seely, scratch, 2; W. Harding, 25 yards, 3; time, 2:30 1-5.

The scratch man's race, 2:31 3-5. Goodman framed a nice handicap here, and the finish was close. In fact all the handicaps were cleverly done.

Mile, 2:25 class—George Banker, 1; H. C. Wheeler, 2; A. W. Warren, 3; time, 2:45 2-5.

A very pretty race, Banker winning with his well-known pretty spurt, with a bit to spare. Banker was fairly in it and rode well all day.

Mile, Connecticut riders, handicap—W. Harding, 35 yards, 1; H. B. Arnold, scratch, 2; B. Zalamer, 150 yards, 3; time, 2:27 3-5.

Second heat—C. Ford Seely, 25 yards, 1; F. R. Fuller, 25 yards, 2; W. Barker, 70 yards, 3; time, 2:26 4-5.

Final—Seely, 1; Zalamer, 2; Middlebrook, 3; time, 2:25 4-5.

A very pretty race, and the Hartford riders scored heavily in this as in most of the events during the day.

NOTES OF THE FIRST DAY.

A. A. Pope, Jr., was busy around the track looking after the interests of the Columbia, a proceeding which did not escape the notice of his sire who sat in the grand stand.

For the first time in many moons Major Atwell and Whittaker, of Boston, were absent from an important meet, but G. Minturn Warden made up for their naughtiness.

Special prizes for the first three-quarters were given in the mile open, which had the effect of making ten at least of the competitors hustle; Banker got a special prize also offered if the mile was done better than 2:20.

The Pope band rendered a choice selection during the afternoon, and loud calls from a Boston crowd who wanted "May Green" played were not heeded.

The energetic Springfield Bicycle Club had their thousand-dollar team in the parade and out of the track, and simply deluged people with announcements "of the great and only."

* * *
Racing on Tuesday.

The second day's racing at Charter Oak Park was very much more interesting than the first, particularly as records commenced to fall. The afternoon's sport resulted in some of the most extraordinary records ever heard of, as will be seen by the details which follow. The spectators were not quite as numerous as on Monday, but as they realized the grand performances of the men the people grew demonstrative and were liberal with applause.

The half-mile handicap, with Zimmerman, Windle, Tyler and Taylor at scratch, was the most sensational event on record. Starting in the first heat the champion rode the distance in 1 min. 1 4-5 sec., beating record time no less

Garden, of Chicago; Edwin Oliver, H. E. Raymond, Abbot Bassett, Colonel Burdette, George Pope, George H. Day, George Collister, Joseph Bressler, D. J. Post, T. A. Zimmerman, Joseph McDermott, George Warwick, Kirk Corey, A. A. Pope, Jr., D. E. Miller, A. C. D. Louks, D. J. Canary, A. C. McGarrett, George R. Bidwell and many others.

NEWSPAPER MEN IN FORCE.

The "press gang" were Andy McGarrett, Springfield Union; G. K. Turner, Springfield Republican; H. Crowther, Bicycling World; L. J. Berger, Bearings; F. P. Priol, Wheel; Joseph Goodman, Hartford Cyclist; E. C. Wilson, Hartford Post (who also looked after the wants of the Press), and the REFEREE representative.

HOW THE LEADING RIDERS RODE.

The meeting again demonstrated that Zimmerman's colors will not be lowered this year, for he defeated Windle rather easily, and the latter defeated Tyler and Taylor. Little Windle rode gamely and fought the Jersey man well down the straight, but Zimmerman held him easily. The sympathy seemed to be with Windle, as little applause greeted the great New Jersey rider for his effort. Hissing from the stands must have been a novelty to the latter. It was caused by his allowing Banker and Wheeler to get away through the non-pacing desire exhibited by both men. Taylor, in this race, the mile open, loosened a crank in the first quarter, and rode back to the starting point.

which characterized the racing of the past, and the finishes, in truth, did not call for it as there were not inches and feet between the leaders as a rule, but yards. Possibly people are becoming educated in the sport and act more coolly. Anyhow there was something surely missing, and those who remember the roaring applause of old feel the loss of the same.

THE SUMMARY.

Mile, novice—T. W. Broadhead, 1; C. F. Lane, 2; A. M. Sheppard, 3; time, 2:35 1-5.

The Holyoke man rode like an old-timer, and simply romped home, his riding being as much a surprise as was that other Holyoke novice at Worcester—Williamson.

Mile, open—Banker, 1; Wheeler, 2; Zimmerman, 3; Windle, 4.

George Taylor also started in this race, but retired with a loose crank. Zimmerman and Windle allowed the winners to get away, and the New Jersey man did not feel like trying the Springfield last year plan, so he simply paced easily with the Millbury lad trailing behind with teeth set and a "I'll bust my buttons or beat him" look in his face. Banker and Wheeler were a hundred yards away while each of the famous riders, with equal alertness, watched for a chance to surprise the other. Windle, 100 yards from home, jumped from Zimmerman's rear wheel, but the "hero of two continents" caught the water nearly as quickly, and a terrific battle for the coveted position of foremost rider of America ensued. Windle, with praiseworthy gameness, only got to Zimmerman's pedals, and after a hundred yards of magnificent effort he dropped astern, and the greatest rider of the age, with a face full of fight, and every muscle doing full duty, swept across the tape two lengths ahead of the Millbury boy, and demonstrated that he is not only a great sprinter but a general of a high order as well.

Two-mile, 5:00 class—George Banker, 1; H. C. Wheeler, 2; W. S. Campbell, 3; time, 5:49.

NEW YORK, Aug. 31, 1892.

MESSRS. KIRKWOOD, MILLER & CO., PEORIA, ILL.

GENTLEMEN:—What would be the cost of a full nickeled "Kite" machine, with 28 inch wheels, 1 3-4 inch cushion tires, geared to 56?

I have ridden a "Kite" wheel over two hundred miles during the last three days over some of our roughest roads, and I find it equal to, if not superior to any wheel I have ever ridden, not excepting the "Century Columbia" (which is very much thought of here as a road machine), and I think it is destined to have many admirers and riders in this vicinity.

The "Kite" I have been riding belongs to Mr. C. E. Taylor, of the Wagner Palace Car Company, and is an exact counterpart of the description given above, with the exception of the tires, which, on his wheel are 1 1-4 inch. For long distance fast road riding the "Kite" is undoubtedly in the front ranks. An early reply will greatly oblige.

Yours truly, E. A. BARKER.

than four seconds. This means that he rode sixty-five yards faster than has ever heretofore been possible, if we except the records said to have been made by Lumsden at Springfield, Ill. This performance seemed to exclude all possibility of a chance of success for the other scratch men, and yet in the third heat Windle won in 1 min. 02 3-5 sec., while Tyler duplicated this in the fourth. The final was a battle of the giants, but again the unconquerable Zim. scored—only one-fifth of a second behind his previous performance.

To again demonstrate his superiority, he came out for the mile invitation, and the question of Zim. vs. Tyler was decided. All four of the cracks were starters, and for a time the pace was easy, over two minutes being occupied in riding to the three-quarter pole. Then commenced such a last quarter as was never before seen. Zimmerman fairly flew, but Windle was not to be easily defeated, and hung out to the finish, easily defeating both Taylor and Tyler. The time of the last quarter was 27 seconds—faster than horse ever trotted—beyond the speed of many passenger trains—a pace of thirty-three and one-third miles an hour! Think of it, ye doubters, and tell us that this man was 'afraid' to meet Fred Osmond!

The standing quarter record also suffered when that event occurred. When Gen. Smith first made a record at this distance many people "pooh-poohed" the idea, and even when he repeated it they were not satisfied. The Riversides, however, swore by their little representative, and were duly rewarded by seeing him run off the distance in 31 1-5 seconds, one and four-fifths seconds inside the previous record—his own, by the way. Taken all round it was the most remarkable day's record-breaking ever known.

Joseph Goodman.

Among the men who are or have been identified with the Hartford tournaments, no other is as well known as

Joseph Goodman. He has been one of the club's most earnest workers from the day its tournaments commenced nearly a dozen years ago. Joe is the proprietor of the *American Cyclist*. He has been for years a familiar figure at the more important tournaments held throughout the country. His knowledge of everything pertaining to the subject of cycle racing is encyclopedic, and he has always been able to give points to any racing board set up by the L. A. W.

To Mr. Goodman belongs the honor of having promoted and managed the first relay race known to the history of cycling. He does not lay claim to the entire originality of the idea, and says he first conceived the notion which inaugurated the relay dispatching epoch from a chance remark made by a prominent Hartford clergyman, who is also an enthusiastic wheelman. In talking

with Mr. Goodman, the reverend gentleman happened to comment unfavorably on long distance road racing as subjecting riders to immense strains and liability to permanent injury, and suggested that if an event could be arranged so that as soon as a rider was well blown his place could be taken by a fresh man, there would be some sense in it, and possibly new and interesting results might be reached.

Mr. Goodwin thought nothing more of the matter for several weeks, when it suddenly struck him that it would be interesting to know how long it would take to send a message from Hartford to New York on the plan suggested by his clerical friend, and pretty soon the Connecticut cycling fraternity was excited over the announcement that on a certain day an attempt would be made to send a message by cycle from the office of the *American Cyclist* in Hartford to the office of the *Sun* in New York, a distance of 126 miles, in precisely eight hours and fourteen minutes. This was a big success. At the large towns along the way the arriving and departing riders were cheered by immense crowds, and the final result was telegraphed all over the country.

And so began the relay dispatching craze, which quickly spread through the cycling world on both sides of the Atlantic.

Mr. Goodman has held several L. A. W. official appointments, and is a member of a number of prominent clubs. He is an energetic, vigorous young man of thirty or thereabouts. His opinions are of the pronounced kind, and he is an untiring worker. He gets up a good clean paper and is making a success of it.

Oakdale, Neb., has a new club, the Stromsburg C. C., with Frank Halden as captain and V. E. Wilson secretary.

ZIMMERMAN IS THE KING.

His Superiority Over Other Riders Amply Demonstrated at Clifton, N. J.

The first annual race meet of the Pas-saic Athletic Club took place on the Clifton (N. J.) race track Saturday afternoon before 5,000 people. The simple announcement in the dailies two or three days before the meet that Zimmerman had telegraphed (or telephoned) in his entry was sufficient to set New York, New Jersey and other cycling states talking.

The special train which left foot of Chambers street on the Erie road at 1:20 carried a tremendous crowd of race cranks, among whom were Elliott Mason, Alex. Schwalbach, A. T. Merrick, Sydney Bowman, George Taylor, R. G. Betts, W. V. Belknap, Zimmerman, Senr., and Joseph McDermott. When the crowded train drew up at Clifton all scampered to the platform preparatory to a march through a beautiful lane of trees where foliage seemed alive with twittering songsters. And here let it be recorded that some other twitterers also occupied the lane with the new (to some yet) game of "thimble rig," or pea game, on which the wise and unwise are given a chance to back their opinions as to which shell covers "the dear little pea." Merrick, with all his Chicago innocence, and B. G. Betts also, some say, invested in a bet, and two tens collapsed; but this is doubtful and unworthy of credence.

FIVE THOUSAND SPECTATORS.

Once at the magnificent grounds, buildings and tracks—which are only a half-mile from the main line, a splendid sight revealed itself. Fully five thousand people were seated in the capacious stand and standing near the fence which guards the track thoroughly. The press stand was occupied by some hard-working and responsible reporters, but

some "would be's" got there too. Also five women and six children. The representatives of two leading wheel papers, east and west, however, were well cared for and treated with marked attention by the club.

THE KING OF RACERS.

The racing demonstrated that a carriage and pair will be seen in the neighborhood of Asbury Park at races given about the 17th of this month, and the driver up will be Zimmerman, whose father has kindly invited the REFEREE to take a week's driving amid the salt water breezes behind that same team. The fagged look noticeable after his finishes at Asbury was not there yesterday, but a powerful locomotive drive and finish was in its place. There is no doubt that Zimmerman is the king of racers for '92, and will finish his season as such. And what a tremendous strain he has been under from March last until now! There is no other man who would have stood such a season of terrific work.

George Taylor made a splendid effort to upset the Jersey man's endeavor in the two miles, and by doing so allowed the ever-need-be-watched P. J. Berlo to slip in second to Zimmerman. But you might as well try to dam Niagara or pump Lake Michigan dry as to stop that last mad rush of the wonder of this cycling year.

Banker did a clever thing in the mile and half handicap. He was on thirty yards, and waited for Zimmerman and hooked onto the latter's back wheel and pulled through for second place; Berlo, the other scratch man, stopped half-way.

COMBINATION WAS UNSUCCESSFUL.

If there was anything in the report that the M. A. C. had a combination to pocket Zimmerman, he showed them in the two miles that he had learned a few

tricks in England by making a sudden pump five hundred yards from home, never allowed himself to be headed and won in hollow fashion. The cart-load of money the gullible reporters of the dailies had been saying the M. A. C. would wager against Zimmerman when Windle and the rest of their team met him was not in evidence; if it had been that staunch old sportsman Zimmerman, Senr. and others had plenty of the "long green" on hand for investment. And it is dollars to doughnuts that there will be none in sight at Springfield. If there is there will be plenty of Zimmerman investors on hand who will give odds to a certainty. There is now only one hope to beat Zimmerman (barring a fluke) and Tyler is the man.

The races, especially the cycling events, were well conducted, and the only drawback was the extreme length of the programme, many athletic events being sandwiched in, so that it was 7 o'clock before the five-mile Passaic County championship was over.

G. Carleton Brown made an acceptable referee, while Director T. Mathews, of the P. A. C. looked after the comfort of visitors.

SUMMARY.

One-mile, novice, scratch—Final heat—A. T. Henrichs, 1; William Hardifer, 2; J. A. Woodward, 3; time, 2:41 3-5.

Three-quarter-mile, handicap—First heat—W. K. Townsend, M. A. C., 120 yds., 1; Henry J. Pote, L. R. B. C., 85 yds., 2; George B. Waters, Centaur C. C., 110 yds., 3; O. S. Brandt, M. A. C., 125 yds., 4; time, 1:47.

Second heat—George Taylor, M. A. C., scratch, 1; A. T. Henrichs, unattached 110 yds., 2; J. W. Judge, Riverside Wheelmen, 95 yds., 3; George W. Coffin, Orange A. C., 80 yds., 4; time, 1:46 2-5.

Final heat—A. T. Henrichs, 1; O. S. Brandt, 2; George W. Coffin, 3; time, 1:44 1-5.

Two-mile, scratch—A. A. Zimmerman, N. Y. A. C., 1; P. J. Berlo, M. A. C., 2; George Taylor, M. A. C., 3. Shrimmer, K. C. W., led at a slow pace for a mile, with Taylor and Zimmerman whipping in the bunch. A quarter on home Berlo and

Taylor cut loose, but Zimmerman was after them like a flash, and, outpacing them all the way home, won by ten clear yards. An equal distance separated the M. A. C. pair. Time, 5:51, the last quarter being made in 28 3-4 sec.

One-mile, handicap—Paul Grosch, Orange Wheelmen, 115 yds., 1; S. B. Bowman, Elizabeth A. Cyclers, 110 yds., 2; George A. Banker, M. A. C., 20 yds., 3; time, 2:17 2-5. A. A. Zimmerman started from scratch and finished in 2:19, a world's record for competition.

One-mile-and-a-half, handicap—A. A. Zimmerman, N. Y. A. C., scratch, 1; George A. Banker, M. A. C., 30 yds., 2; F. Hawley, Kings County Wheelmen, 200 yds., 3. Zimmerman soon overhauled Banker, who shadowed him to the turn for home. Here both caught the limit division. Up the straight Zimmerman had all the best of the pace and won by twenty yards. Banker finished a length in front of the K. C. W. man. Time, 3:36 3-5.

Five-mile, championship of Passaic county—H. M. Wells, unattached, 1; William Hardifer, Passaic A. C., 2; P. C. Hirdifer, 3; no time taken.

Englishmen Believe It.

Regarding Taylor's mile record of 2:11, *Wheeling* says: "Now that we have more than a mere cable message to go on we are perfectly satisfied that this is a genuine performance, holding, as we always did, that men are as honest, and watches as good, in America as they are in England."

Waverly, Ill., Meet.

The second annual tournament of the Waverly (Ill.) Wheelmen, held last week, was a huge success, the weather, racing and attendance being all that could be desired. As the following results show, outsiders captured the bulk of the prizes:

Mile, novice—Lon Wycoff, 1; Elliott McCalls, 2; E. E. Anderson, 3; time, 2:45.

Half-mile, open—Bert Myers, Peoria, 1; Bert Harding, St. Louis, 2; Roy Keator, Chicago, 3; time, 1:21.

Half-mile, club—George Moffett, 1; F. R. Smedley, 2; time, 1:20.

Mile, handicap—Bert Myers, 1; Roy Keator, 2; Beat Harding, St. Louis, 3; time, 3:37.

Two-mile, handicap—Roy Keator, Chicago, 1; J. A. Leland, Springfield, 2; E. E. Anderson, 3; time, 5:23.

Mile, club, handicap—George Moffett, 1; F. Smedley, 2; time, 2:56.

Three-mile, handicap—Bert Myers, Peoria, 1; Roy Keator, Chicago, 2; J. A. Leland, Springfield, 3; time, 8:31.

Half-mile, ordinary—Irving Woods, Jacksonville, 1; A. D. Black, Jacksonville, 2; J. H. Ritchie, 3; time, 1:35.

Five-mile, handicap—Bert Myers, Peoria, 1; Lon Wycoff, 2; Bert Harding, St. Louis, 3; time, 14:00.

More Foreign Records.

Ede, the "little wonder," or "pocket Hercules," rode 22 miles 732 yards in the hour, and made 25 miles in 1 hr., 7 min., 16 1-5 sec.

The Edinburg to London record now stands to the credit of R. H. Carlisle, doing the distance in 32 hrs. 55 min. The previous best was made by T. A. Edge in 38 hrs. 44 min.

Lewis Stroud now holds the hour tri-cycle record, doing 34 kilometres, 716 metres, 66 centimetres and beating Dr. Turner's record by nearly a half-mile.

Louis Masi, a former Chicagoan, again won the 110-mile race around Lake Geneva in Switzerland.

A Victory for the Cyclist.

The suit which was brought by the California division against the driver of the wagon who ran into cyclist John Zimmer recently has resulted in a victory for the division. The driver pleaded guilty to the charge of assault and battery, and was dismissed with a nominal fine, while the civil action brought against his employer has been compromised, he paying all damages. The officers of the division felt that in winning this case they have established their rights, and will in any future case push the matter to the end and try and mete out to those who would trample on the rights of the cyclists the full measure of the law.

BERLO VS. THE WEST.

THE BOSTON MAN IS DEFEATED AT COLUMBUS.

Lumsden Shows His Old Form—A Fast Mile by Bliss—Davis Makes a Record—Races at Various Other Points.

COLUMBUS, O., Sept. 5.—Six thousand five hundred people went out to see the first day's races of the Columbian cycling tournament. The steady down-pour of rain on Sunday and Monday morning did not prevent good races. The sun came out at noon and the track, though rather heavy, was in record-breaking condition. The Chicago boys say it is the finest track they have run across yet, and Berlo thinks it is all right.

TWO REMARKABLE RIDES.

Sunday afternoon Berlo rode a mile without pacemakers in 2:17 1-5, and Bliss, with a flying start and pacemakers, rode a mile in 2:13 2-5 Saturday evening.

In the half-mile, open, Sanger ran away from the crowd and won by twenty-five yards. Lumsden looked a sure second, but Berlo beat him to the tape by inches. A. L. Baker won the two-mile handicap for Columbus Wheelmen from scratch easily. Wm. Rhodes, Chicago, had a very easy time in the one-mile, ordinary, open, winning by twenty yards.

In the mile, open, all the fast men came out, and again Sanger showed his superiority, though Lumsden gave him a hard chase and was but a few inches behind when they crossed the tape. Berlo was several yards in the rear, followed by Dorntge and Cleveland Brown.

In the 1:25 class Bliss, the American Ede, from Chicago, took first with great ease from Wegner and W. F. Sanger, of Milwaukee. The one-mile handicap was quite lively and the men all came down the stretch in a bunch. The scratch men did not start, so it lay in the hands of some of the young bloods to win. Con. Baker, Columbus, won by an elegant spurt from Bliss, who was a little tire.

The juvenile half-mile race was run in remarkably good time, considering the age of the boys, who were all under fourteen. It was won by Joe Bauers, Cincinnati, in 1:22 2 5.

A TIE BETWEEN LUMSDEN AND BERLO.

In the three-mile lap race Lumsden out ran Berlo the first lap, Rhodes third and Van Sicklen fourth. In the next lap Lumsden slipped a pedal and Berlo took first with Rhodes second. Lumsden won the third lap by fully fifteen yards, Berlo leading Rhodes by a yard. This resulted in a tie between Lumsden and Berlo, and one lap will be run to-morrow to decide the race.

In the 2:40 class there was considerable kicking on Bliss on account of his (probably) having a record better than 2:40. Bliss won from A. S. Baker but the race is protested.

The scratch men staid out of the five-mile handicap in order to save themselves for to-morrow. The limit man, W. C. Dunn, of Finlay, was soon cut down, and the field for about four miles rode in a bunch. They began to pull away on the home stretch, and for the third time Bliss came under the wire first. A. S. Baker pulled out of the crowd and came in second.

It was announced later that Sanger, in the half-mile, open, was ruled out of that race on account of Wegner stepping over the line in pushing him off. This gives first to Berlo and Lumsden second.

Papa Sanger was decidedly angry, but Referee B. V. H. Schultz held to his decision. In this race six of the boys were spilled and Thomas D. Morrison, of the Lincoln Cycling Club, Chicago, received a very bad cut on the calf of his leg from the pedal of A. C. Banker, who also tumbled. Morrison had ten stitches put in his leg and was sent home at midnight.

SUMMARY:

One-mile, novice—thirteen starters—W. C. Dunn, Finlay, 1; William A. Fell, Columbus Cycling Club, 2; Fred Elliott, M. C. W., Zanesville, 3; time, 2:56 1-5.

Half-mile, open—fourteen starters—W. C. Sanger, M. W., Milwaukee, 1; P. J. Berlo, M. A. C., Boston, 2; A. E. Lumsden, C. C. C., Chicago, 3. Sanger disqualified. Time, 1:09 2-5.

Two-mile, handicap, Columbus Wheelmen—ten starters—A. L. Baker, scratch, 1; William A. Fell, 40 yds., 2; E. C. Smith, 70 yds., 3; Con Baker, 20 yds., 4; S. T. Wilson, 70 yds., 5; Charles Bell, 70 yds., 6; time, 5:37.

One-mile, ordinary, open—four starters—W. A. Rhodes, I. C. C., Chicago, 1; L. C. Johnson, Cleveland A. C., 2; Walter Keenan, Dayton B. C., 3; O. W. Nisewonger, Oran, O., 4; time, 2:38 3-5.

One-mile, open—five starters—W. C. Sanger, Milwaukee, 1; A. E. Lumsden, Chicago, 2; P. J. Berlo, Boston, 3; C. W. Dorntge, Buffalo, 4; F. H. Brown, Cleveland, 5; time, 2:33 2-5.

Half-mile, 1:15 class—fourteen starters—J. P. Bliss, Chicago C. C., 1; W. E. Wegner, Milwaukee, 2; A. L. Brown, L. C. C., Cleveland, 2; W. F. Sanger, Milwaukee, 4; C. W. Casper, Springfield, O., 5; A. Schmidt, Buffalo, 6; time, 1:13 4-5.

The half-mile open brought out six starters. Sanger cut the pace until he was run down by Lumsden on the home stretch. The latter finished first easily, while Berlo and Sanger had it out to the tape, the former taking second by six inches.

In the two-mile handicap the scratch men staid out. Van Sicklen who had 75 yards, led at the mile, and the field came around into the home stretch in a bunch. Bliss again showed the boys his heels and came in a winner by three yards, A. S. Baker, Columbus, second.

Following this Roy Keator rode a half-mile unicycle for record in 1:48, and then gave an exhibition in fancy riding.

O. W. Nisewonger, of "No. 46" fame, won the two-mile, ordinary, handicap. Rhodes, the scratch man, gave up the chase at the first mile.

The piano race, one-mile open, brought out Lumsden, Berlo, Sanger and Dorntge. Again Sanger made the pace, but was outridden on the stretch by Lumsden. Here Berlo, who had been riding third, with a terrible burst of speed passed both and won by three lengths.

Fred Nessel, with a splendid spurt, won the 2:50 class by several lengths.

One-mile, handicap—thirty-three starters—Con Baker, Columbus C. C., 150 yds., 1; J. P. Bliss, Chicago C. C., 75 yds., 2; E. C. Johnson, Cleveland A. C., 50 yds., 3; time, 2:35 3-5.

Half-mile, juvenile—seventeen starters—Joseph Bauers, Cincinnati, 1; F. J. Colgan, Columbus, 2; Earl S. Grant, 3; A. Grimm, 4.

Two-mile, lap race—five starters—Lumsden and Berlo tie for first; W. A. Rhodes, 3; N. H. Van Sicklen, 4; C. W. Dorntge, 5; no time.

One-mile, 2:40 class—fifteen starters—J. P. Bliss, Chicago C. C., 1; A. L. Baker, Columbus C. C., 2; Fred Nessel, Columbia Wheelmen, Chicago, 3; L. C. Johnson, Cleveland A. C., 4; F. H. Brown, L. C. C., Cleveland, 5; A. I. Brown, Cleveland, 6; time, 2:38 4-5. Bliss protested; result not yet known.

Five-mile, handicap—eighteen starters—J. P. Bliss, Chicago C. C., 300 yds., 1; A. L. Baker, Columbus C. C., 300 yds., 2; Fred Nessel, Columbia Wheelmen, Chicago, 200 yds., 3; Con Baker, Columbus C. C., 400 yds., 4; W. D. Banker, Buffalo A. C., 200 yds., 5; Austin T. Crooks, Buffalo A. C., 150 yds., 6; time 14:23 2-5.

BLISS DISQUALIFIED

COLUMBUS, Sept. 7.—(Special telegram)—Bliss has been ruled out of the 1:25 and 2:40 class races, which occurred Monday.

* * *

Lumsden Scores Well.

The weather was all that could be expected Tuesday. The day was perfect and scarcely any wind. The attendance was almost equal to that of the first day, probably 6,000 people.

In the six minute class race Roy Keator, who had just arrived, took first.

time, 5:31 2 5.

Half-mile, open six starters—A. E. Lumsden, 1; P. J. Berlo, 2; W. C. Sanger, 3; Arthur N. French, 4; W. A. Rhodes, 5; C. W. Dorntge, 6; time, 1:06 1-4.

One-mile, championship, Columbus Century Club—Charles Bell, 1; Ed. C. Smith, 2; Ed. T. Arras, 3; time, 2:42 4-5.

Two-mile, handicap—eighteen starters—J. P. Bliss, 150 yards, 1; A. L. Baker, 150 yards, 2; W. D. Banker, 90 yards, 3; W. E. Wegner, 125 yards, 4; E. C. Johnson, 100 yards, 5; Fred Nessel, 150 yards, 6; time, 5:35 3-5.

Two-mile, ordinary, handicap—O. W. Nisewonger, 200 yards, 1; Walter Keenan, 175 yards, 2; L. C. Johnson, 150 yards, 3; time, 5:32.

One-mile, open, piano race—four starters—P. J. Berlo, 1; A. E. Lumsden, 2; C. Dorntge, 3; W. C. Sanger, 4; time, 2:32 3-5.

One-mile, 2:50 class—ten starters—Fred Nessel, 1; C. W. Casper, 2; W. C. Wegner, 3; Bert Bridgen, 4; T. E. Collings, 5; W. M. Gayol, 6; time, 2:36 2-5.

One-mile, handicap—thirty starters—P. J. Berlo, scratch, 1; W. A. Rhodes, 50 yards, 2; A. T. Crooks, 60 yards, 3; Con Baker, 150 yards, 4; W. C. Sanger, scratch, 5; time, 2:19 2-5.

One-mile, championship of Columbus—A. L. Baker, 1; Con Baker, 2; E. H. Swerley, 3; James Judd, 4; Charles Bell, 5; time, 3:44.

Five-mile, relay race—Chicago Cycling Club, 1; Columbus Cycling Club, 2. No time.

One-mile, consolation—Harry P. Smith, 1; F. H. Brown, 2; Bert Bridgen, 3; A. Schmidt, 4; W. M. Guyol, 5; time, 2:32 3-5.

Referee, B. V. H. Schultz, Zanesville, Ohio; starter, George W. Smith, Columbus; Judges, F. B. Everett, Columbus; Carl Bauman, Dayton; Parker Reed, Chillicothe, Ohio; K. D. Wood, Columbus; H. A. Nunemacher, Columbus; Joseph Josephi, Cleveland; Harry Irwin, Columbus; scorers, Core T. Erb, Frant S. Fisher and Ben Talbot; announcer, John R. Plotson, Dayton, O.

* * *

Good Racing at Indianapolis.

The Chicago Cycling Club and the Zigzag Cycling Club of Indianapolis have good reason to feel elated, the former because one of its members, C. W. Davis, broke the quarter-mile competition record, and the Hoosier club because the performance was done on its new track, or, rather on the track of the state board of agriculture. July 4 last year W. C. Thorne rode a standing quarter at Rockford in 33 sec., flat, and twice this has been tied.

Davis did not get a good start, yet covered the distance in 32 1-2 sec., and five watches verified the time, four being exactly the same. There is no doubt about the distance, either, for the quarter was carefully measured, and Davis, being on the outside, really rode considerably over the distance.

Johnson, also of the Chicago club, is entitled to the half-mile competition record, providing that of Lumsden—1:03 3-5—does not stand. From scratch in the half-mile handicap he rode in 1:05 1-2, the best previous record being 1:05 4-5.

It is a fact that Johnson did not win the race, but he was not three inches behind Roll, and rode from scratch.

GOOD ATTENDANCE.

The massive grand stand at Indianapolis driving park was fully half filled, while its capacity is 10,000 people. There were hundreds of people in carriages along the track and on the exhibition halls and barns many found good places to see the races. The Monon route carried out four or five train loads, and every one was packed.

Those who owned wheels rode out, and some went by the electric road and walked the mile or more where there was no track.

It must be said the layout of the park is excellent, and when finished there will be nothing nicer in the country. The track, a mile oval, was in good shape, though a little water would have kept down the dust, which was plentiful.

The races were run without a hitch, there were no false starts and no occasion for protests.

THE NOVICE RACE.

This event went to a dark horse,

SUMMARY.

Two-mile, 6:00 class—12 starters—Roy Keator, 1; Con Baker, 2; A. L. Brown, 3; Fred Nessel, 4;

THE TOURIST.

The Highest Grade Bicycle in the World. Perfect in Material, Construction and Finish.

Made at Colt's West Armory, Hartford, Conn., under the same system and with the same attention to detail followed in the manufacture of Colt's fine fire arms. Gun steel forgings; all cones and bearing cups cut from the bar, not stamped.

WEIGHT: { Road Racer, 34 lbs., } PRICE, \$150
 { Roadster, 42 lbs., }

Fitted with BIDWELL (THOMAS) PNEUMATIC TIRES, guaranteed against puncture, bursting and leakage.

A GENUINE NOVELTY.

THE TOURIST BALL-BEARING LAMP WITH EQUIPOISE BRACKET.

THE MOST PERFECT LAMP MADE

WILLIAM BOWN, BIRMINGHAM, ENGLAND, Manufacturer.

A Few of its Strong Points

- Ball-Bearing Bracket.
- Ball-Bearing Equipoise Attachment, preventing the spilling of oil.
- Double Convex Lens.
- Salsbury Non-Breakable Side Lights.
- Detachable Top, Bottom and Reflector.

NEW YORK.

Tire Factory, 47-49 West 66th Street, New York.

though No. 46 was named as the winner before the race started. M. C. Cain was the last away, but managed to cross the tape a length ahead of Dynes, while McNeeley was a wheel length to the bad.

HALF-MILE, HANDICAP.

This was anybody's race at the start, but Roll, at thirty-five yards, kept up a hot pace and won, while Johnson, from scratch, got in a close second, and Mattie Martin, with eighty yards, was third. Davis was fourth, and might have won, but for the fact that he got in a bad position and could not get out in time. Root, at fifty yards, should have won the race, but did not make any showing whatever, and others who had good chances were hopelessly left. The time was 1:05 1-2, and as Johnson was but six inches back of the winner he has inside the world's competition record.

MILE, 2:40 CLASS.

This was an awful loaf to the three-quarter pole, when Young let out, closely followed by Minor, Root and Myers, the latter two being the last at this point. Myers crept up and got in first, while Root and Minor fought it out for second, the latter winning by three inches, Young fourth.

QUARTER-MILE, OPEN.

Davis distinguished himself in this event, not only by winning from the poorest position, but by making a mark

of 32 1-2 sec. for the competition record. Johnson and Davis were on the outside, in line with the quarter pole and the judges' stand, and consequently rode several yards over the quarter. The former had a bad start and Johnson got a lead of ten yards on the jump. Davis, however, soon crawled up, and hung on to Johnson until within a hundred yards of the tape, when he went up and won, but only by inches, while Marmon was a very close third. When the announcer gave the time as 32 1-2 sec., and stated that it was a world's record, the crowd went wild, while Davis, unassuming as he is, took things as cool as if it were an everyday occurrence.

TWO-MILE ORDINARY, HANDICAP.

Will Lon of La Porte was on scratch, while Curtiss and Herman had 400 yards, La Rue, with 200 yards, caught his men at a mile and a half and romped away from them, winning easily, while Stout, 300 yards, was second, twenty-five yards back, and Fisher had trouble in getting third.

MILE, INDIANA RECORD.

This race, containing as it did all the Indiana talent, was the most interesting start to the spectators, for each man had his friends, and lots of them, too. Referee Patee placed a time limit of 2:40 on the race, and as there were special prizes for the quarters it was made interesting throughout and was three and a third seconds inside the limit. Roll got the

first quarter in 37 1-2 sec., while Rough took the half in 1:18 and the three-quarters in 2:01 e-4. It was anybody's race down the stretch, but near the tape Marmon let out, passed Minor and won by six seconds, while Hunter was third.

OLD MEN'S RACE.

This was a novelty and interesting, and what was the best of all the oldest of the three starters won, fifty yards separating the first and second men and 100 yards second and third. The winner, J. C. Patterson of Greenfield, is fifty years old, very gray and bald, but he got around in 3:37 and never turned a hair. He is the marshal of Greenfield and the wheelmen's friend. Sole, who was second, is forty years old, and Money also forty.

ONE-MILE, OPEN.

A time limit of 2:35 was set for this event, and to help things out Young agreed to take the men to the quarter. This he did in 35 sec., and then quit, as he said he should do. Nickel took the pace to the three-quarter pole, and from there it was everybody alone. Myers and Johnson led down the stretch, but Davis went up when fifty yards from the tape, and won by a foot, while Johnson was a wheel's length ahead of Myers: Marmon, fourth. The time was 2:33 1-2.

HALE-MILE, 1:10 CLASS.

Davis, Johnson, Myers, Young, Cameron and Hunter started in this race, and the finish was Davis, Johnson, Myers,

Hunter, Young and Cameron. The time was 1:18, and the referee said "no race," because it was not within the time limit, but when it was found that Starter Keck had forgotten to announce to the competitors that there was a time limit, the race had to be allowed.

FIVE-MILE, HANDICAP.

Johnson was alone on scratch, because others at this mark did not come out. Hunter and Myers had 200 yards; Rough and Zirkle, 300; Root, 550; Dynes and Hynes, 600; Miller, 750; Martin, 700; Carl, 750; Stout and McCain, 800. At two and a half miles Root had the lead, but the back mark men, having the benefit of pacing turn about, overtook him in the beginning of the last mile, Johnson having quit when it was seen he had no show. At the finish Rough got the lead, with Minor second, Myers third and Root fourth, and a good sized blanket would have covered the four as they crossed the tape in that order. The time was 13:34 1-4 from the 300-yard mark.

THE SUMMARIES.

One-mile, novice—W. W. McCain, 1; E. L. Dynes, 2; H. S. McNeeley, 3; time, 2:52.

Half-mile, handicap—E. P. Roll, Indianapolis, 35 yds., 1; J. S. Johnson, Chicago C. C., scratch, 2; M. Martin, Milwaukee, 3; time, 1:05 2-5.

One-mile, 2:40 class—Bert Myers, Peoria B. C., 1; E. Minor, Zigzag C. C., 2; C. P. Root, Chicago C. C., 3; time, 3:01 2-5.

Quarter mile, open—C. W. Davis, Chicago C. C., 1; J. S. Johnson, Chicago C. C., 2; W. C. Marmon, Zigzag C. C., 3; time, 3:21 1-2.

Two-mile ordinary, handicap—Charles La Rue,

400 yards, 1; H. M. Stout, 300 yards, 2; Carl Fisher, 150 yards, 3; time, 5:59 1-4.

One-mile, Indiana record—W. C. Marmon, Zigzag C. C., 1; E. C. Minor, Zigzag C. C., 2; E. Hunter, Zigzag C. C., 3; time, 2:26 1-2. First quarter, Hynes :37 1-2; half, Roll, 1:18; three-quarters, Rough, 2:01 1-4.

Old men's race, one-mile—J. C. Patterson, 50 years, 1; J. W. Manly, 40 years, 2; W. G. Sale, 40 years, 3; time, 3:27.

One-mile, open—C. W. Davis, Chicago C. C., 1; J. S. Johnson, Chicago C. C., 2; Bert Myers, Peoria B. C., 3; time, 2:33 3-5.

Half-mile, 1:10 class—C. W. Davis, Chicago C. C., 1; J. S. Johnson, Chicago C. C., 2; Bert Myers, Peoria B. C., 3; time, 1:18.

Five-mile, handicap—F. F. Rough, South Bend, 300 yards, 1; E. V. Minor, Zigzag C. C., 300 yards, 2; Bert Myers, Peoria B. C., 3; C. P. Root, Chicago C. C., 4; time, 13:34 1-2.

* * *

The Second Day.

The crowd was not so large as on the preceding day, but the weather was all that could be expected.

In the half-mile open eight started. They all got off well, but coming into the straight first, C. P. Root kicked off a pedal and fell heavily, cutting and bruising his legs. W. C. Marmon won, Bert Myers second. In the 2:25 class seven men faced the starter. With a time limit of 2:35 set on the race, nobody would make pace, and the time was 2:59 1-2, so it was declared no race.

In the second trial, made immediately after the two-mile handicap, the referee raised the limit to 2:40. The winner turned up in Marmon, 2:49 1-2, but this was allowed to stand.

The handicap was the prettiest race of the day. About twenty started. The race ended in another victory for Lowe, who had the limit, 250 yards. The back mark men rode grandly and passed man after man, although unable to catch the winner. Lonn, of La Porte, was a good second, and F. F. Rough, of South Bend, third, from the 75-yard mark. Rough's time for the full mile would be equal to 2:28.

The three-mile lap race brought out Minor, Marmon and Myers, and as there were three prizes they were all assured of a prize. The race resulted in a tie between Myers and Minor. In the run off Myers won.

SUMMARY.

One mile, handicap, Zig-Zag club—Otis R. Lowe, 250 yds., 1; Carl Cameron, 125 yds., 2; W. W. McCain, 250 yds., 3; time, 2:21 1-2.

One mile, ordinary—W. Lonn, La Porte, 1; O. R. Lowe, 2; Carl Fisher, 3; time, 2:58 1-2.

Half-mile, open—W. C. Marmon, 1; Bert Myers, Peoria, 2; F. E. Hunter, 3; time, 1:10 1-2.

One mile, 3:00 class—Carl Cameron, 1; Frank Miller, 2; W. Lonn, 3; time, 2:41 3-4.

One mile, 2:25 class—W. C. Marmon, 1; Bert Myers, 2; Phil Nickle, 3; time, 2:49 1-2.

Two-mile, handicap—Frank Miller, 400 yds., 1; Mattie Martin, 350 yds., 2; H. M. Stone, 450 yds., 3; time, 5:07.

Half-mile, boys—W. E. Atherson, 1; Rockford Shaw, 2; Fred Linn, 3; time, 1:38 1-4.

Mile, open, handicap—O. R. Lowe, 250 yds., 1; W. Lonn, 125 yds., 2; F. F. Rough, 75 yds., 3; time, 2:30 1-2.

Three-mile, lap—Bert Myers, 1; E. V. Minor, 2; W. C. Marmon, 3; time, 9:28.

* * *

Philadelphia's Attractions.

Following the big Springfield tournament, Philadelphia will lay claim to the whole of the talent for her two meets on Sept. 17 and 24, and has every prospect of seeing on those two dates the biggest aggregation of racing men that has yet visited this city. For the meet of the Associated Cycling Clubs on the 17th entries have been promised from almost every one, from Windle, who has never yet ridden in the Quaker City and will therefore be the star attraction right straight down the line. A large number of entries have already been received, including the whole Chicago team and others are coming in daily.

The meet is being thoroughly—in fact, extravagantly—advertised, both locally and generally; the prize list is a hand-

some one, and everything points to a successful affair in point of attendance and good racing. Special railroad accommodations will be furnished to bring the entire party through from Springfield without change of cars.

THE PARK AVENUE TOURNAMENT.

On the following Saturday the Park Avenue Wheelmen hold forth, and to those who recall this club's brilliant success of last season which was really the first occasion that any number of the real cracks had appeared here together it is unnecessary to make any lengthy announcement. For this year's meet a prize list valued at \$4,500 is offered, including nearly everything from a horse and carriage to a coffin, with any number of bicycles, diamonds and other articles of value. The Park Avenue Wheelmen have built up a big reputation as hustlers and have been working enthusiastically for months on the meet which they promise shall be the event of the season.

Racing men who want to fill in the time between these two star affairs will have plenty of chance to do so. The York Cycle Club holds a meet on Tuesday, Sept. 20, and a trip can be readily made to that place, thence direct to the Baltimore on Wednesday, the 21st, and then up to Reading, Pa., on Thursday and back to Philadelphia on the 24th. Good prizes will be the rule at each place.

PAUL BERWYN

A Lake View C. C. Race.

Last Saturday the Lake View Cycling Club held the third and last of a series of five-mile handicap road races, resulting as follows: John Ames, 2:00; F. Holland, 1:00; N. L. Spiesberger, 1:30.

* * *

Windle Twice Defeated.

The Crescent Cycle Club, of Birmingham, Conn., gave its first annual meet last Friday, and was fortunate in having beautiful weather and the attendance of the three great cracks, Zimmerman, Tyler and Windle. The attendance was good. The meeting demonstrated one important fact, and that was that the New Jersey man, A. A. Z., will not be troubled much in the race for first place. Although Tyler was wisely held in reserve by the Springfield club for their meeting, Windle went boldly to the slaughter, and no doubt was satisfied with the result. Zimmerman, in the mile, made a competition record of 2:19 2-5, but whether the track was of correct measurement is not known.

Tyler also bowled Windle over, which demonstrates one of two things, that either the men are going much faster this season or that something has interfered with Windle's training. The truth is that Windle is not riding like he did last year, and also that Zimmerman, Tyler and Taylor are yards faster than they were in '91. Summary:

Mile, handicap, local Seymour, 75 yards, 1; Shelton, 1; time, 2:39.

Half-mile, open—George Smith, 40 yards, 1; Tyler, 2; time, 1:05 2-5.

One-mile, 2:35 class—C. M. Murphy, 1; H. C. Wheeler, 2; time, 2:34.

One-mile, open, Zimmerman, 1; W. W. Windle, 2; W. S. Campbell, 3; time, 2:54.

One mile, three-minute class—C. Middlebrook, 1; Barker, 2; time, 2:43.

One-mile, handicap, open—Warren, 140 yards, 1; A. A. Zimmerman, scratch, 2; Zimmerman's time, 2:19 3-5.

Quarter-mile, open—Tyler, 1; Windle, 2; time, 34 4-5.

* * *

Peoria and the Western Circuit.

Nearly all the fast men have either entered or expressed a determination of being present at the Peoria races on the 27th, and as the prize list has never been excelled either by any single day's meet given in this country or by any one day's prizes ever offered at Peoria, the entire success of the affair is now assured beyond all question. Ten races will be run for prizes aggregating \$2,494 actual value, besides the usual special prizes. The prize list consists of Rudge and King of Scorchers racers, weighing twenty-one pounds or less, a Century Columbia, a \$125 split second gold stop watch, a Caligraph, a Sylph pneumatic safety, and a long list of elegant articles of utility and ornament, such as bronze statuary, a \$120 music box, a magnificent silver bronze lamp supported by a statue of Cupid forty-two inches high, opera glasses, banjos, another typewriter, another gold stop watch, etc., from three to five prizes being offered for each race. The principal event, and one in which great interest is being taken, is the one-mile

All the points comprising the circuit are reached by the Mackay system, which has agreed to give half rates not only to those attending the respective tournaments, but also to racing men and their trainers, and those who care to make all or any part of the circuit.

Edinburgh-to-London Record Beaten.

On Tuesday, Aug. 16, R. H. Carlisle, of the Anfield B. C., Liverpool, started from the postoffice, Edinboro, at 2:05 p. m., with the object of beating T. A. Edge's record of 33 hrs. 44 min.

Mr. McCormack started the record-breaker before a large concourse of people. He was paced to Dunbar by Mr. Younge, of the Waverly Roads Club, at which place rain commenced to fall. He was then taken in hand by W. Duncan as far as Berwick, which he reached at 5:40. Rain still continued and the roads by this time were saturated as also was the rider. At Alnwick A. N. Deacon was in waiting with food. Time of arrival, 7:45. Newcastle was reached at 10:55. Between Newcastle and Darlington the riders lost their way. Darlington was reached at 4 a. m. on Wednesday, the rain coming down in torrents. Mr. Carlisle was again wet through and in spite of repeated protests from those assembled would persist in going forward, his remark being: "I am inside the time and the weather will eventually clear." A difficulty was here found. No clothes being obtainable, as a last resource Mr. Harrison, of Stockton, who was here to pace him, took off his trousers, same were cut short at the knee and Mr. Carlisle again manfully went forth on his weary grind to beat the record. Bow Bridge was reached at 7:15. Here the roads were much better, rain ceased and the wind became favorable which made matters more agreeable. Carlisle from this point rapidly made up lost time, reaching Doncaster at 10:30 a. m. Grantham, a distance of fifty-two miles, was reached at 2:35 p. m. The time from Eaton Soton to Hitchin was 1 hr. 5 min., distance twenty miles. H. D. Wall, P. Nix, P. C. Wilson and many other cyclists of renown were waiting for him. The postoffice, London was reached exactly as the clock struck eleven, the journey occupying 33 hrs. 55 min. H. T. Arnott, of the Roads' Record Association, took the time, and Mr. Carlisle left for his hotel after many congratulations from all present.

The machine used was a Peregrine, made by the Leicester Cycle Company, fitted with Boothroyd tires. It weighed complete, with heavy saddle and gear case, thirty-four and a half pounds. The machine and tires never once needed attention.

* * *

Excellent, if True.

The Lexington Wheel Club is justly indignant over the shabby treatment it received at the hands of the executive committee of the fair association. The club was practically invited to get up a parade to help boom the fair. After its members had gone to considerable expense and trouble to arrange an interesting procession, the executive committee issued an order that no wheels should be allowed on the grounds. There are still some people who refuse to recognize that the bicycle is a practical vehicle and has come to stay. The Lexington wheelmen might quote with good effect a little conversation that occurred on the Carthage fair grounds. In 1890 Mr. Mogul, the manager of that fair, as a special favor permitted nags before empty benches. On bicycle day ten thousand people thronged the grand stands, and the enthusiasm was unprecedented. When the races were over Mr. Mogul, with hat in hand and humility in

THE RUDGE.

{ Highest Grade English make, stands up well, wears well, and gives satisfaction to both riders and dealers this season, as they have always done in the past.

THE SYLPH. . .

{ Spring Frame Safeties (highest grade) still lead for ease and comfort on the road—especially the rough ones—on the hills, both up and down, everywhere.

THE OVERLAND.

{ As a medium-priced, high-grade Safety, selling at \$100 for 14-inch Cushion Tires, \$105 for 14-inch Cushion Tires, \$120 for 14-inch Morgan & Wright or Protection Strip Pneumatic Tires; and \$135 for Bidwell Pneumatic, grows more and more popular every day.

OUR JOB LOTS. .

{ Of new cycles in thirty or more styles, which we have relisted at prices way below manufacturer's list, and from which we allow liberal discounts, are valuable to any dealer's line and bargains that cannot be duplicated.

ROUSE, HAZARD & CO., - 89 G STREET, - PEORIA, ILL.

voice, requested an audience with Mr. Hanauer, the bicycle race promoter. "My dear Mr. Hanauer," he said, "your races are wonderful. I am authorized to offer \$500 for prizes if you will get up another bicycle day this week." The point is clear enough for the most biased fair manager to see.—*Louisville Times*.

Milwaukee Race News.

Charlie Price is still confined to his house from the injuries received at Parkside when Githens rode over here. Charlie has not made any roar over his misfortune, but he is sore to think his accident policy expired a few days before the race!

Henry P. Andrae has sent his resignation as official handicapper Wisconsin division L. A. W. to Mr. Thorne, of the racing board. Henry says he fully appreciates the truth of the saying, "uneasy rests the head that wears a crown." He wants to be with the boys.

The charms of matrimony are playing sad havoc in the ranks of our racing men. Rumor has it that one of our local luminaries, F. C. Prachthauser, will shortly bid adieu to the path and ride a tandem.

Harry Crocker is supposed to be another victim. This accounts for his discarding the wheel and his activity in real estate.

In justice to the Milwaukee racing men who are members of the L. A. W., Mr. Thorne, of the racing board should suspend Messrs. Shimmel, Wedzinski, Jansen, Zander, Bowen, Tyler and Parks, all of whom participated in the bicycle races of the Electrical Works at National Park last Sunday. The races were not sanctioned and the wheelmen were warned not to compete.

Sanger expects to start for Springfield, Mass., about the 10th. The great diamond meet will prove a big attraction, and he will be accompanied by several friends. From there he will continue his journey to Philadelphia and Baltimore. It has been suggested that Sanger and Zimmerman double up and have a go at the tandem record at Springfield.

JACK ROYAL.

The Harrisburg Meet.

HARRISBURG, Sept. 5.—The first annual meet was held this afternoon. Inexperience was, of course, excusable, but the committee refused to listen to suggestions offered by Referee Bunnell and the few others present. Fully 3,500 people were in attendance. Following is the summary:

One-mile, novice—E. Youse, 1; W. Walsh, 2; time, 2:52.
Half-mile, tandem, handicap—Donnelly and Draper, scratch, 1; E. L. and M. D. Fry, 30 yards, 2; time, 1:36.
Quarter-mile, safety, open—J. H. Draper, 1; S. H. Bilyeu, 2; J. C. Donnelly, 3; time, 1:14.
Two-mile, safety, handicap—Draper, scratch, 1; Bilyeu, scratch, 2; Donnelly, 60 yards, 3; time, 5:43 1-5.
One-mile, club championship—Frank Lienbach, 1; time, 2:51.
One mile, team—Park Avenue Wheelmen, 1; Reading B. C., 2; York C. C., 3; time, 2:49.
Half-mile, open—Bilyeu, 1; E. M. Newell, 2; time, 1:17.
One mile, handicap—Donnelly, 35 yds., 1; W. T. Bilyeu, 70 yds., 2; W. B. Riegle, 75 yds., 3; time, 2:30.
One mile, 3:00 class—E. Youse, 1; D. Fornwaldt, 2; time, 2:49.
One mile, Harrisburg riders—D. Fornwaldt, 1; time, 2:55.
Fifteen-mile road race—C. Huck, 2 min., 1; time, 51 minutes. Fornwaldt, Harrisburg, scratch, made the best time.

PAUL BERWYN.

Windle Defeats Tyler.

The first tournament of the Rockville (Conn.) Wheel Club was held Saturday and was patronized by over a thousand people. Rockville is a town of 4,000, fourteen miles from Hartford, and the local club was fortunate in securing the

attendance of such cracks as Windle and Tyler. The former proved too much for Tyler in the half-mile, which evened things up, Tyler having defeated Windle at Birmingham the day previous.

SUMMARY.

One-mile, novice, F. G. Whitmore, Jr., 1; H. R. Sedgwick, 2; John Andrews, 3; time, 2:50.
Half-mile, open, scratch—W. W. Windle, 1; H. C. Tyler, 2; Thomas Relph, 3; time, 1:12 3-4.
One-mile, handicap, Hartford and Tolland counties—F. N. Herman, 20 yards, 1; H. B. Arnold, scratch, 2; F. R. Fuller, 3; time, 2:26 3-4.
Two-mile, open, scratch—W. W. Windle, 1; Thomas Relph, 2; E. A. McDuffee, 3; time, 5:39.
One-mile, club championship—Fred J. Snow 1; H. C. Kite, 2; William Buchanan, 3; time, 2:24 1-2.
One-mile, open, handicap—James Wilson, Jr., B. S. B. C., 160 yards, 1; H. C. Tyler, S. B. C. scratch, 2; H. B. Arnold, M. A. C., 50 yards, 3; time, 2:21.
One-mile, tandem—Herman Fuller, C. C. C., 1; Harding and Seeley, 2; time, 2:41 1-4.
Two-mile, local, handicap—Fred J. Snow, scratch, 1; H. C. Kite, R. W. C., 2; C. A. Loomis, 30 yards, 3; time, 5:50.
One-mile, open—H. C. Tyler, S. B. C., 1; F. N. Herman, M. A. C., 2; F. R. Fuller, 3; time, 2:34.

* * *

Waller's Second Attempt.

Waller, the California rider, will start Sept. 16 in an attempt to again raise the 24-hour record, on the Goodwater Grove half-mile track, at Stockton, Cal. A picture of the track is shown in this issue.

* * *

Poor Sport at Louisville.

The racing at Louisville Monday was poor and attendance small. Jefferies was far too fast for the other riders. Results of open events:

Ten-mile road race—W. V. Hobson, 1; Wilson, 2; Anderson, 3; time, 33:10 1-5.
Two-mile, handicap—J. E. Robinson, 190 yards, 1; Thomas Anderson, 100 yards, 2; C. Mann, 190 yards, 3; time, 6:13 1-5.
Half-mile, open—Jefferies, 1; Rubey, 2; Robinson, 3; time, 1:27 4-5.
One-mile, open—Jefferies, 1; Wilson, 2; Rubey, 3; time, 3:07 1-5.

* * *

Postponement at Buffalo.

The road races which were to have been run at Buffalo on Monday were postponed on account of rain.

* * *

Sport at Syracuse.

W. W. Taxis of Philadelphia ran up to Syracuse Monday and there won the mile ordinary, handicap, and the half-mile safety, besides a couple of seconds. The events were of no particular interest.

* * *

Hillier's Racing Budget.

HERNE HILL, LONDON, Aug. 27.—I will join issue at once with friend Morgan. Since 1887 many changes have been made and steady efforts have been kept up by N. C. U. and A. A. A. against the "bookies," and I repeat that at no recent cycle race meeting which I have attended this year has the "loud shouting bookie" been audible, nor do our amateurs find it necessary to "have a bit on" to give them an interest in the race. Mr. Morgan is very unfortunate in his example. The failure of the A. P. to maintain its position was due mainly to the unwelcome presence of the bookie, who, accustomed to attend the horse races at that place, turned his attention occasionally to the cycling track. Twice this year at meetings promoted by athletic (not cycling) bodies, the bookie has been apparent at Herne Hill, and in each instance information was laid before the union and the A. A. A., and the determination of those bodies to stop betting will, in the end, prove successful.

DEFENDS ENGLISH AMATEURS.

I notice that an English cycling paper, tired of fouling its own nest, once again amplifies its text. "The True Amateur Does Not Exist." The editor of "The Hoodlum's Gazette" is, of course, very badly placed for knowing anything

A GRAND PRIZE

BIBLE COMPETITION.

Two Thousand Dollars in Prizes Will be Equitably Distributed.

READ OUR PLAN.

For several years past competitions of an instructive order have been offered by reputable business houses and manufacturers in England with the object of increasing their sales and interesting their customers in their respective goods. These contests, on account of the unquestioned fairness displayed in conducting them, have interested the best people of Great Britain. Believing that competitions offered by a manufacturing concern such as ours, and conducted in the same honorable manner, would excite universal interest among the intelligent people of the United States and Canada, our Company has decided to offer a Prize Competition in which our first effort will be to make it strictly fair and impartial. The intention is to satisfy every one entering this competition that they have been duly credited with the position which their efforts have earned for them. We are sure that this class of a prize contest will receive the approval of parents and all those having the instruction of the young at heart. The prizes to be awarded in this competition will consist entirely of articles of sufficient value to be appreciated by every person receiving one as a fair reward for the efforts put forth by them. Our intention is to divide the amount to be given away in prizes, varying in value from eight dollars to one hundred dollars each, and we enter into an honorable agreement with those entering this competition to distribute fairly Two THOUSAND DOLLARS in prizes.

AWARD OF PRIZES.—Ten of the leading ministers of our city will be invited to attend and assist in the award of prizes.

PRIZE BIBLE COMPETITION.

We will pay ONE HUNDRED DOLLARS in cash to the first person who correctly answers the following questions: Where in the Bible do the following three words first appear: 1, RAIN; 2, BREAD; 3, MILK. The second person answering correctly will receive SEVENTY-FIVE DOLLARS in cash. The third person sending correct answer will receive FIFTY DOLLARS in cash. The next ten will each receive an elegant COIN SILVER (hunting-case) WATCH. The next ten will each receive an elegant SILK DRESS pattern (sixteen yards in any color). The next ten will each receive a first-class pair of OPERA GLASSES.

MIDDLE PRIZES.—Every answer when received will be numbered and entered on a special book, with the name and address of the competitor. The thirty-three persons sending the thirty-three correct answers which are the MIDDLE ONES received will receive duplicates of prizes awarded for the first thirty-three correct answers.

LAST PRIZES.—The thirty-three persons sending the thirty-three correct answers which are received last will receive duplicates of the prizes that are awarded for the first and middle thirty-three correct answers, the last correct answer receiving the One Hundred Dollars, the next to the last the Seventy-five Dollars, and so on until the thirty-three prizes for the last thirty-three correct answers have been awarded.

SPECIAL PRIZES.—A prize consisting of an elegant Lady's or Gentleman's Watch will be given to the person sending the first correct answer which is the first received from their State or Province.

CONDITIONS.

Answers must be accompanied with fifteen United States two-cent postage stamps for one package of PEARLFOAM, which is the latest scientific discovery for cleaning and preserving the teeth. Our object is to introduce and attract attention to PEARLFOAM, which is the only preparation whose manufacturers are willing to offer a reward of Five Hundred Dollars to any dentist who can show that it contains anything injurious to the teeth. A mouthful of pearly white teeth is the sure result of its constant use. It is recommended by the leaders of the dental profession everywhere; ask your dentist what he thinks of it. PEARLFOAM is sent by mail, post paid, and free of customs duty. Be sure and send your answers to-day. You may receive a valuable prize for your trouble. Address—

MORGAN & WRIGHT,
MANUFACTURERS OF RUBBER GOODS,
331-339 West Lake Street,
CHICAGO.

about "the true amateur," and his opinion on the subject is worth absolutely nil. There are at the present moment more *bona fide* amateurs on the path in cycling than there has been any time this last ten years, and the class is slowly and surely extending. Some of our best men have never been in any way identified with the trade, whilst others so situated could show a clean claim as amateurs if called upon to do so. These are, of course, men who are utterly crooked and men who have gradually drifted into a false position; there are such men in every sport and in every class of society, but your readers may rest assured that here in England amateurism is as strong as ever it was despite the "big gooseberry" tirades of an outside journalist gravelled for lack of matter. He may be excused for his errors for he does not move in a circle likely to improve his opinion of the amateurs.

Things are quieting down here with the approach of the autumn. Men are getting tired and going out of training, and the tracks are becoming deserted. The Paris track has been visited by some of our men, one of whom, Leitch, had an awful cropper on a hard cement surface.

CONGRATULATIONS TO ZIM.

We were all glad to see how well Zimmerman rode on his return, and we hope that when he has done sufficient he will retire for the season before he runs himself stale. It is also satisfactory to us to note how far he was in front of Taylor in the scratch mile, and we think that unless he goes stale he will do 2:08 or thereabouts before he gives up.

The proposition which has been mooted to bar from amateur races all persons connected with the trade has been followed by a proposal to return to the original gentleman amateur definition, with an addition, barring all persons employed in and about cycle businesses. The matter bids fair to be the burning question of the coming winter, and there are not wanting those who hope for such a radical reform. If it came about there is even a possibility that the advocates of cash prizes might pluck up sufficient courage to practice what they preach and thus convey over the border all the wrong 'uns with whom they at least pretend to be acquainted, and amateur sport would be all the better for the purging.

C. Koppelow and H. Schulte, on a tandem safety, made a flying quarter record of :31 3-5 on Thursday, August 25, at Herne Hill, and Arthur Withers, the Karl von P—h of the Berlin party, rode a grand race from sixty yards in a novice half-mile, and finished third, two feet off the actual winner, in 1:12 3-5. The performance created not a little enthusiasm.

OSMOND WILL TRY TO DO 2:10.

Osmond is said to be training hard and going for 2:10. He and Adams are staying at a quiet village near Birmingham, under the charge of Choppy Warburton, an old runner, but what the result will be time alone can tell.

The old Surrey B. C. ran an invitation 100-miles race at Herne Hill, but for some mysterious reason altered the system of pacing adopted in the Cuca Cocoa race and practically spoilt the contest as a race. Adams got home well inside the safety record, J. F. Walsh's 5:19:37 3-5, and also beat F. W. Shorland's geared ordinary record of 5:05:03 2-5, the performance being all the more meritorious by reason of the wind and rain. The pacing system required three pacers to ride, with the leader, but when a man was left he was not allowed a pacer. The

result was that at fifty miles but two men were left on the track.

The twenty-four hours race for the Cuca Cocoa cup in 1893 is fixed for July 21 and 22. Cannot America send us a distance man to tackle Shorland? Either Waller or Spooner would have a look in, and we will promise them every attention and the best of pacing.

I note from time to time that American cycling is urged to throw over amateurism, and that a number of good men object. I venture to think that they are wrong to do so. Let amateurism be thrown over—which means let all the people who are not amateurs professionalize themselves. Encourage and aid them to do so, give them dollars and the day after they have competed for them form an amateur association and start amateurism afresh. The winnowing process will be complete. I have been offering for years to give \$50 to a cash prize, provided only the anti-amateur amateurs will ride for it—but they won't. G. LACY HILLIER.

Some Future Race Meets.

A meet will be given to-day at Ishpeming, Mich.

Toulon, Ill., holds its second annual tournament to-day at 2 o'clock

It is expected that Windle, Taylor, Berlo, McDuffee and other cracks will compete in the Boston tournament to-morrow.

At Somerville, N. J., Next Wednesday, the Somerset County Agricultural Society gives a number of races, for which a fine lot of prizes will be offered.

The Crescent Wheelmen, of Cincinnati, will hold a meet Oct. 1 at Chester Park and entries may be made to W. W. Schueler, 17 West Pearl street, Cincinnati.

The management of the Toledo Cycling Club's tournament, to be held to-morrow, offers some very nice prizes, including five wheels, medals, watches and sundries. The programme is as follows: One-mile, novice; quarter-mile, open; five-mile, handicap; half-mile, for boys, one-mile, T. C. C. championship; one-mile, open; three-mile, lap; half-mile, open; one-mile, Toledo wheelmen only.

The Maryland B. C.'s tournament, Sept. 21, at Baltimore, will catch all the eastern and western men on their way back to the western circuit races. A good programme has been arranged as follows: One-mile, novice; quarter-mile, :34 class; quarter-mile, open; half-mile, open; one mile, 2:25 class; quarter-mile, handicap; half-mile, handicap; one-mile, handicap; one-mile, lap race, open; one-mile tandem, open.

Arrangements for the tournament of the Poughkeepsie (N. Y.) Bicycle Club next week Saturday are about completed. There will be ten events as follows: One-mile, novice; one-mile, handicap, open; quarter-mile dash, open; two-mile, team, open to clubs in Dutchess and adjoining counties; one-mile, three-minute class; one-mile, championship Dutchess county; one-mile, open; half-mile race for boys under sixteen; two-mile, handicap, open; one-mile, handicap for members of the Poughkeepsie Bicycle Club.

The York (Pa.) C. C. promises a good tournament Sept. 20, as a fine prize list has been made up and a good programme laid out. All the cracks will be there. A. S. Bunnell will be the referee and Dimon and Crowther, of Philadelphia, and Mitchell, of Baltimore, will be the judges. A fifteen-mile road race will be run upon the Gettysburg pike, the first and last mile being made on the track. This race will be for the championship of York, Lancaster, Dauphin and Berks counties.

Race Notes.

Races occurred at Manchester, Conn., Thursday.

Races at the fair, Rochester, Minn., 14th and 15th.

Taxis covets a mile ordinary record, and will try to secure it at Springfield.

Munger spent the past week at Mount Clemens. He left there Thursday much refreshed.

At New London, Conn., fair, Sept. 1; W. A. Holt, Jr., beat J. E. Piper in a mile race in 3:25.

The races of the Ashland Cycling Club which were to be run Saturday afternoon were postponed until next Saturday.

On the 1st H. R. Coffin, 75 yards, won a mile handicap at Windsor Locks, Conn., E. Sumner, 225 yards, second; time, 3:03.

J. P. Bliss rode a relay Columbia for his fast mile in 2:13 2-5, C. W. Davis riding a Humber in his world's record, standing start.

Johnsoe, of Minneapolis, rode two trial quarter-miles at Indianapolis, Eck and C. W. Davis holding the watches, in 28 1-5 seconds each.

Johnson, of Minneapolis, passed through Chicago Tuesday en route from Indianapolis to Winona, Minn. After competing there he goes to Springfield.

A race from La Fayette, Ind., to Crawfordsville and back, 64 miles, on the 1st was won by Frank Gangwer, J. W. Scott second, an hour behind. Time of winner, 4 hrs. 1 min. 30 sec.

At Utica, N. Y., Aug. 30: One-mile, 3:30 class—Thorn 1, Rose 2, Wheelhouse, 3; time, 3:18. Half-mile, handicap—Wildhack, 125 yards, 1; Wells, 2; Fox, 3; time, 1:10 2-5. Mile, handicap—Wildhack, 1; Crosby, 2; Divine, 3; time, 2:47.

At the Champaign (Ill.) fair Wednesday a one-mile open race was won by Parker. Nicolet second and Riley third; time, 3:06 1-4. The two-mile county championship was captured by Booker, McLean second and Nicolet third; time, 6:26. Bert Myers won a mile race and Keator made a half-mile on a unicycle in 1:57 1-2.

The road race to be given under the auspices of the Rover's Wheel Club, of New Haven, Conn., on Tuesday, Sept. 27, promises to prove very interesting. The race is to be over the East Haven course. The start will be from the watering-trough at Four Corners and the contestants will run to East Haven centre and return, five miles.

At Parkside, 17th, Arthur Stackpole will take a benefit. Races—Quarter, half and mile, scratch, one and two-mile, handicaps, one-mile, lap. Fee, twenty-five cents per event. Entries close Sept. 10. The races have been duly sanctioned and we hope to see them well supported. In the absence of some of the flying brigade, entries from the less speedy should be numerous.

A. J. Storey, of the California division racing board has compiled a schedule of California track records as follows: Safety—Quarter-mile, 38 2-5, half-mile, 1:15, three-quarters, 1:55 2-5, mile, 2:36 2-5, W. F. Foster, A. B. and A. C., July 4, 1892; two miles, 5:45 2-5, George Osen, G. C. W., July 4, 1891; five miles, 14:18 4-5, Grant Bell, A. A. C., May 30, 1892.

Ordinary—Quarter-mile, 37 3-5, F. R. Crook, B. C. W., May 16, 1885; half-mile, 1:18 1-5, L. S. Upson, C. C. W., July 4, 1892; mile, 2:48 1-2, F. D. Ellwell, B. C. W., July 4, 1888; two miles, 6:00, A. T. Ireland, A. S., July 4, 1888; three miles, 9:05 1-4, B. C. Lund, A. A. C., May 30, 1892; five miles, 15:49, W. G. Davis, S. F. B. C., July 4, 1887; ten miles, 32:00 2-5, C. E. Adcock, B. C. W., July 4, 1887.

The Lansing (Mich.) Bicycle Club will give its second annual race meet Sept. 16, in connection with the state fair. The programme consists of ten events,

as follows: One-mile, novice; two-mile, handicap; one-mile, L. B. championship; half-mile, open; two-mile, state fair championship; quarter-mile, open; five-mile, handicap; one-mile, 2:40 class; one-mile, handicap; one-mile, 3:00 class. A special medal will be given to the rider making the best time during the meet.

The Annual Century.

Miss Hattie Bickers, of 4710 State street, Chicago, carried away the honors the annual run of the Century Road

Club held Sunday over the Elgin-Aurora course. Miss Bickers started on the long ride at 4:15 and finished at 3:45, taking but eleven hours and a half for the trip. At Ontarioville she stopped fifteen minutes, did not stop at Elgin, stopped twenty minutes at St. Charles, and fifteen at a watering trough. At Aurora the lady spent fifty minutes, including time for a light lunch. Eleven miles farther on, at Naperville, she made her last stop, this time of twenty minutes, and then started for home at a gait that rapidly left behind many of the gentlemen riders. Miss Bickers is but nineteen years old. She rides a Worth safety less the rear springs, using a 58-inch gear. She surmounted every hill and even rode down the terrible S hill near Downer's Grove.

The Cook County Wheelmen, under whose colors she rode, will present her with a handsome trophy.

Four other ladies finished a century, the Misses Haggerty and Porter riding over the course, though caught in the rain at the finish. Misses McConnell and Peterson took the train and finished on the city boulevards.

At the corner of Halsted street and Washington boulevard in the early morning hours a busy scene was witnessed. Hundreds of wheelmen came tearing up in the darkness, registered and were away on the wings of the wind. The roads were dusty, but good traveling, nevertheless.

Breakfast was taken at Elgin and dinner at Aurora. At 1:27 o'clock Edward Furner, of the Cook County Wheelmen, Arnold Wescott, and F. Ed. Spooner crossed the line neck and neck. Spooner had made the trip in 8:29, Furner in 8:57, and Wescott in 9:22. C. R. Dealey, of the Lake View club was fourth.

Just 166 men were registered, although many more finished. Among the late ones was Chief Centurion Herrick, covered with mud.

The C. B. & Q. trains brought in a hundred of the riders, who could not ride the sticky roads.

Taken all together, the second annual century run was a rousing success.

A new athletic club has been organized at Cincinnati.

3-BEAUTIES-3

The James Safety.

"JAMES" SPECIFICATIONS.

DIAMOND Frame, Warwick Hollow Rim, our unequalled Semi-Tangent Direct Spokes, Southard Cranks, Adjustable Handle-Bar and Seat Pillar, Perfect Chain Adjustment, Ball Bearings throughout (including head), Lamp Bracket, geared to 64 or to suit purchaser, quality ABSOLUTELY PERFECT, FULL GUARANTEE.

ROAD RACER, Weight 28 Pounds,	- - - - -	\$150 00
FULL ROADSTER, Weight 35 Pounds,	- - - - -	\$150 00
TRACK RACER, Weight 25 Pounds,	- - - - -	\$155 00
TRACK RACER, Weight 23 Pounds,	- - - - -	\$160 00

We Guarantee These Weights.

"B. & A." SPECIFICATIONS.

WHEELS—29 in. front, 28 in. back, with Warwick hollow rims, with tangent or direct spokes, gun metal hubs. Geared to 65 in. or to order. Finest Weldless steel tube and steel forgings, adjustable seat pillar and handle bar, 6 1-2 in. adjustable cranks. Adjustable balls to both wheels, crank axle, ball head and pedals.

Same Model and Specifications:

TRACK RACER, Weight 26 Pounds,	- - - - -	\$150 00
ROAD RACER, Weight 30 Pounds,	- - - - -	\$140 00
FULL ROADSTER, Weight 34 Pounds,	- - - - -	\$140 00

These prices are with Pneumatic Tires.

These celebrated machines are made by THE NEW BUCKINGHAM & ADAMS CYCLE COMPANY, Coventry Works, Birmingham, Eng. H. P. Cook, Managing Director, having had great practical experience, is turning out the B. & A. in great shape.

During Easter week (in England) the B. & A. captured the most prizes.

Beat the 100 Miles Record.

Mr. Peter Holliday, of the Ramblers' Club, Blackburn, Eng., beat the 100 miles record from Blackburn to Kendal, by the extraordinary time of 48 minutes, on the B. & A. Road Racer, weighing 30 lbs. This is another convincing proof of the superiority of the B. & A. machine.

B. & A. Champion Racer.

South Road Safety.

FRENCH & SONS, Balham, England.

"SOUTH ROAD" SPECIFICATIONS.

THIS MACHINE is the grandest ever offered. We guarantee that there is not a single casting throughout. 28 inch wheels, tangent spokes, Warwick hollow rim, round cranks, adjustable handle bar and seat pillar, ball bearing throughout, lamp bracket, geared to 64 or to suit purchaser.

TRACK RACER, Weight 23 Pounds,	- - - - -	\$155 00
ROAD RACER, Weight 29 Pounds,	- - - - -	\$140 00
ROADSTER, Weight 33 Pounds,	- - - - -	\$140 00

Any kind of Pneumatic Tires. We Guarantee Weights.

AGENTS WANTED.

The Agency for the above has been secured by the

JAMES CYCLE CO.,

113 Adams Street,
CHICAGO, ILL.

NEWS FROM ENGLAND.

THE PRESENT RACING SEASON IS ABOUT PLAYED OUT.

Trade Men Coming to America—The Grand Old Man of Cycling—Liverpool to London Record—Notes of All Sorts.

LONDON, Aug. 27.—We have had on the whole a rather quiet week. There have been one or two records made but otherwise things have been very slack. On Thursday, at the Herne Hill track, J. Waso and Charlie Newland set out, as they had done once before this season, to make an attempt on the 100-mile tandem safety record; but, as on the previous occasion, they were unable to complete their task, owing to the fact that the track was required for the evening handicaps of the London County Club. Last time they tried they were able to go only forty-one miles until they were compelled to desist, but this time they reached fifty miles before stopping. From forty-two miles to fifty they made new records, the half hundred being accomplished in 2 hrs. 28 min. 33 sec. Later in the evening Von Koppelow and Schulte, of the Bath Road Club, knocked out the tandem starting quarter record of 32 3-5 sec. made by Bradbury and Zimmerman the day before the latter sailed for home. They reduced the figures to 31 3-5 sec.

LIVERPOOL-TO-LONDON RECORD.

On the same day C. Lucas, of Liverpool, beat the record between that city and London, which was made by T. A. Edge early this season, by just an hour and a half. With a fine northwesterly wind behind him he rode the 197 miles in 12 hrs. 4 min. The first part of the journey he rode very strongly indeed, and between Litchfield and Coventry, where he was paced by E. Caborrow, he did twenty-one miles in the hour, and this over by no means the most level of roads. Hitherto Lucas's rides have always been regarded with some amount of doubt, owing partly to the fact that he has ridden without pacemakers. This time he was paced all the way and several of the men who aided him are of the opinion that he is a really good man and can do an even better performance. Lucas rode a model D Rudge racer, weighing twenty-one pounds, which stood the journey wonderfully well. This reminds me that in mentioning Lawrence Fletcher's great ride from Land's End to John O'Groats last week I omitted to say that he rode a New Howe safety fitted with Dunlop tires.

GOLDER ON THE WAY.

This in turn reminds me that the boat that brings this dispatch also carries S. Golder with samples of New Howe machines with which I expect he will do big business in the States. The New Howe is a rare boom here just now, and late as it is in the season Manager Philpot has as many orders as he wants. In this he is singular. Quite a number of factories are only working thirty hours a week, and on all sides I hear of men who have occupied what have been considered good, safe positions wanting new situations. Some of them are really first-class men whose houses have done big business but are now trying to cut down expenses by reducing the salary list. Others are agents who have been unable to stand the cutting which has gone on this season, and would prefer to take a situation with a sure salary to remaining another year in business for themselves.

THE G. O. M. OF CYCLING.

Last week, having a few days to spare,

I went for a short tour, and part of my route lay along the Great North Road. At Hitchin, the starting place of many famous races and record rides, I met Major Knox Holmes—the famous octogenarian,—who for the second year is spending his summer holidays in the midst of the road-racing men, in all of whose doings he takes a lively interest. Considering that he is eighty-five years of age he is a really wonderful old man and can compare favorably with many men twenty years his junior. The day before I met him "the major," as he is called by young and old alike, had attempted to ride 100 miles on his tricycle. He had arranged a time-table and a number of pacemakers just as if he had been going for a record. The pacemakers also acted as tugs and with a tow rope fixed to his machine aided him a good deal. Still the gallant old gentleman pedalled every bit of his first fifty miles, which occupied only three and three-quarters hours.

After turning the wind was adverse and the tow rope broke, the result being that he dropped away to something like four miles an hour, and after some seventy or more miles decided to give up the task. Spite of his exertions "the major" was next day as jolly as ever, and when I left him he was walking off quite gaily to spend an afternoon in watching a cricket match. He is a great believer in all sorts of sports, and he is just as keen a business man as he is a sportsman—a fact of which his fellow directors of Humber & Company, Ltd. and other concerns in which he is interested are often made fully aware.

Mr. Percy Stevens, of the Coventry Cycle Manufacturing Company, will probably arrive in the States in the middle of next month. According to present arrangements he leaves England on a business trip by the Bothnia on Sept. 6.

Served Them Right.

The police arrested several young men and two women in Brooklyn last week for violating Section 7, Article 3, of the city of Brooklyn's ordinance, which makes it a misdemeanor to ride a bicycle between sunset and sunrise without illuminating power, which should light up a portion of the world before him or her. Riding on the sidewalk also comes under the ban. The "legitimate" cyclists of Brooklyn say, "serves 'em right," and uphold the officials. No commotion except righteous indignation is expressed by the clubs, which will assist the law in this direction. A big run on lamps is expected.

What Was the Trick?

Sanger, the expert bicyclist, carried Milwaukee's name to the front yesterday in Chicago, where he lost only one of the races in which he entered, and that by a slight lapse on his part, and an admissible trick on the part of his opponent.—Milwaukee Wisconsin.

We haven't heard of any trick played on Sanger. Lumsden, aided by the inside position, beat him fairly and squarely, and Mr. Sanger, Sr., said so.

Will Build a Track.

The managers of the Hamilton (Ohio) Fair are so well pleased with bicycle races as a drawing card that they are talking of building a quarter-mile bicycle track inside of the horse track. Horse and bicycle races could be run alternately without injuring the bicycle track.

Lenz Snow-Bound.

Frank G. Lenz, *Outing's* around-the-world cycling scribe, was last heard from Aug. 29 at Yellowstone Park, where he was tied up on account of snow. He has been over poor roads, for the most part very sandy and hilly.

Perry Richards.

The Empire Cycle Works, of Wolverhampton, are owned by Perry Richards & Company. There are few firms in the cycle trade who devote more care and attention to the construction of cycles than they. Mr. Richards is one of the best mechanics and has had much practical experience in the trade and as a

rider. Last year business out-grew the old quarters and it was necessary to remove to premises which would allow more scope. They are now located in a spacious and neat factory in Cleveland street, Wolverhampton. Mr. Richards is a popular man in the trade, and through him the Empire has found a ready sale on the continent as well as at home.

Peoria Trade Items.

Mr. Kirkwood, senior member of Kirkwood, Miller & Company, is in Peoria on a brief visit. Mr. Kirkwood spends most of his time at Cedar Rapids, looking after the firm's branch house at that place. Although being well up in years, he is an expert rider, and about the first thing he does when he arrives in Peoria is to mount his wheel and take in the sights. He will return to Cedar Rapids in a few days.

Kingman & Company are the only firm in the city who have a geared ordinary in stock. They have very kindly allowed a large number of wheelmen to try the machine. It is a nice, easy-riding wheel, but we hardly think it will entirely take the place of the rear-driving safety.

H. R. Steensen of Minneapolis has entered the employ of Kirkwood, Miller & Company. Mr. Steensen has been a wheelman for a number of years. He will be in the repair shop for a couple of months and then go west with a sample line of Telephone wheels.

AN 1893 PATTERN.

The Rouse-Duryea Cycle Company are experimenting with a new diamond frame wheel for 1893. Through the kindness of Mr. Rouse your correspondent was permitted to try the new model, and we are pleased to say it is one of the easiest-riding wheels we ever mounted. The frame is made entirely of steel tubing with lap brazed joints. It has twenty-eight inch wheels, tangent spokes and is fitted with Morgan & Wright's semi-racing tires. From the appearance of the model of the Sylph it will be one

of the easiest-riding and best-selling machines on the market next year.

S. P. Hazard, of Rouse, Hazard & Company, is now the happy owner of a pneumatic sulky. Mr. Hazard is an enthusiastic horseman and has been around this country long enough to know a good thing when he sees it. He was the first man in central Illinois to build a sulky of this style. He took the wheels out of a pneumatic-tired bicycle, and in this manner had his pneumatic-tired sulky built in a few days. Peoria is the foremost city in America in bicycles or anything that looks like one, and Mr. Hazard is one of our citizens.

F. H. Henning, of Kirkwood, Miller & Company's bicycle department, leaves for New York on the 14th to meet Mr. Basil Riley, who is coming over with a sample line of Telephone wheels for 1893. The Telephone has given satisfaction this year, and K., M. & Co. will handle them on a much larger scale next year. Mr. Riley will only remain in this country a short time, as Messrs. Bonnick & Company, who manufacture the Telephones, will make a large display of their wheels at the Stanley show, and, of course, like any good Englishman, Mr. Riley will want to be on hand.

Fred Pate's last trip to the northwest finished his traveling for this season. He will not go out again until the latter part of October, when he will go on the road with sample machines for 1893.

A Question for Historians.

A REFEREE reader at Hillabara, O., takes the managers of the Raleigh Cycle Company to task over their "historical" advertisement in this journal as follows:

DEAR SIR.—I notice your advertisement in the REFEREE, in which you state that Sir Walter Raleigh came to America over three hundred years ago. Now Sir Walter Raleigh never put his foot on American soil; he never "came" to America and consequently did not discover it or a part of it. He sent several fleets but did not come himself. The writer believes your wheels to be good, but your historical assertions are bad. However, the writer will be greatly mortified if the above are not facts.

Since seeing the above Paul Angeois, who wrote the advertisement, has drawn heavily on the libraries of New York for encyclopedias and histories of our country, and said that if he is mistaken then English teaching is at fault, for English teachers swear that Raleigh it was who discovered America, and also tobacco and potatoes at the same time.

The Raleigh's New York Factory.

The new Raleigh factory on Greenwich and Bank streets, New York, will occupy the entire loft of a large building covering nearly half a block of ground. The machines will be imported in the rough and finished here. George S. McDonald will have Harry Hall and A. A. Atty as assistants, and the wholesale office will be there, while the Broadway store will retail exclusively. The Zucker & Leavitt Chemical Company, whose advertisement is seen in the REFEREE, took a contract to have the plating and polishing plant in the Raleigh factory in running order in ten days.

Changes in the Sercombe-Bolte Company.

Through the negotiations of P. H. Sercombe during the past week, \$50,000 worth of the Sercombe-Bolte Manufacturing Company's stock was transferred from eastern holders to Milwaukee capitalists. The newly elected president of the company is Casper M. Sanger, who, besides being one of Milwaukee's most

We Don't—

Claim to have the very best wheel on earth—
that's a chestnut. We aim to be original; but
we do say, that, if you will ride a **Cleveland**
No. 4, geared to 63 inches, you will smile.
Rides like 53.

The Thread Tire is like the girl you love—
different from others. No others on our
wheels.

wealthy and enterprising citizens, is the father of one of the greatest riders of the day. Mr. Sanger has taken to everything connected with the bicycle in a very kindly manner, and already his pleasant, genial manners and cordiality are known to many prominent wheelmen.

F. H. Bolte was re-elected vice-president and superintendent. P. H. Sercombe, as heretofore, will be the secretary and manager.

The entire negotiations for the placing of the \$50,000 worth of stock were carried on and consummated by Mr. Sercombe, who is also the originator of the company.

Walter Sanger will represent the company on the road, covering the entire territory between New York and San Francisco, and if riding fast will secure orders for bicycles, he will unquestionably outstrip all other salesmen in this line.

The bicycle establishment of P. H. Sercombe is the loser of a Telegram safety, No. 418. A person representing himself to be Andrew Brown, 444 Park street, asked to try one of their machines for a few minutes on the street. He was allowed to take the wheel and has not been heard of since. The original Mr. Brown disclaims all knowledge of the affair.

The Roth-Kasten Cycle Company is also mourning the loss of a bicycle which was lost in much the same way.

The New Victor Racer.

If appearance goes for anything the new Victor racer, which was received by A. G. Spalding & Bros. last week, ought to bear out its name on the path as well as in point of sales. It is certainly a handsome wheel and weighs but twenty-four pounds, all on. It is a diamond pattern, similar in shape to the Humber, but smaller all around. The wheels are twenty-eight inches, front and rear, and have tangent spokes, while light Victor pneumatics are the tires, apparently very resistant. It is geared to sixty-six and a half inches, and a peculiar feature is that one crank and the crank axle are of one piece of metal. There should be a demand for this wheel, for it is certainly right up to date.

The Tower, No. 5 Diamond.

As neat a wheel as has been shown this season is the Tower, No. 5 diamond, which is made in three styles and weights—full roadster, forty-two pounds; semi-racer, thirty-six pounds, and racer, thirty pounds. It has a dust-proof ball head, thirty and twenty-eight inch wheels and direct spokes. The Carter gear case is fitted to these wheels.

The Marriott Racer.

We show this week a cut of the Marriott path racer, No. 15, and, as will be seen, it is a very handsome machine, being specially designed for the track and having all the essential points—rigidity, strength and lightness. One feature is that the crank bracket is somewhat higher than on most machines. It has twenty-eight inch wheels, laced spokes, ball head and Marriott's patent chain adjustment. All in all it is a most desirable machine and is receiving much favor abroad.

New Bicycle Factories in the South.

Houston, Tex., and Birmingham, Ala., are to have bicycle factories, the first in the south. At the former place H. D. Spore & Company have recently turned out their first wheel, known as "Texas No. 1," a diamond frame pattern machine weighing thirty-three pounds. This wheel was built in their shop, and

with the limited facilities at hand they succeeded in making a wheel which, in its first race, the Houston Bicycle Club championship, one mile, took first place, being ridden by George W. Sims. Arrangements are being made by this firm to manufacture a line of high grade wheels for the season of 1893, and a stock company will be organized, ma-

made the ungainly thing fly over the road. It is clumsy and top-heavy, and for this reason does not turn corners readily, but on the straight road it seems to steer quite as well as a safety. M. Belanger has a great deal of confidence in the speed of his contrivance, and will shift the gearing up a notch or two and soon try for a mile. The machine he is

even enamel and line with the club colors when wanted. President Willis showed us some splendid samples of the firm's work last week.

Zimmerman, Berlo, Banker and many other eastern cracks are now using Bidwell pneumatics exclusively. Willis B. Troy, the race representative of the Bidwell Company, attends all the meets and is

THE MARRIOTT RACER.

chinery purchased, and all necessary details attended to, and when another racing season rolls around the fast men of Texas will have an opportunity to race on wheels built in Houston.

The Arrow is a new wheel being turned out at Birmingham, Ala. It is a neat machine, and already the maker has all the orders he can conveniently handle.

Recent Patents Granted.

The following is a list of recent bicycle patents, reported especially for the REFEREE by W. E. Aughinbaugh, patent attorney, Washington, D. C.:

- 481,599, bicycle; Frank Jewett, New Haven, Conn.; filed Nov. 2, 1891; serial No. 410,608.
- 431,608, cyclometer; Frank C. Weston, Bangor, Me.; filed April 15, 1891; serial No. 388,903.
- 481,681, pneumatic tire; Joseph Wellstein and Morgan E. Maxfield, Milwaukee, Wis.; filed April 11, 1892; serial No. 423,574.
- 481,744, bicycle; Lucas J. Phelps, Passaic, N. J.; filed Oct. 3, 1891; serial No. 407,645.
- 481,751, bicycle-supporting frame; Richard A. Engler, Columbus, O.; filed April 2, 1892.
- 481,762, valve for pneumatic tires; John F. Ives and Frank B. Colman, New York City; filed May 4, 1892; serial No. 431,842.
- 481,883, unicycle; Abraham Yost and Fernando Yost, New York city; filed Sept. 4, 1891; serial No. 404,709.
- 481,890, carrier attachment for bicycles; Maurice E. Blood, Kalamazoo, Mich.; assignor to the Kalamazoo Cycle Company, same place; filed Oct. 26 1891; serial No. 409,889.

Did It on a New Howe.

The most remarkable safety record ride of the season is that of Lawrence Fletcher, of the Anfield B. C., Liverpool, who, on a New Howe safety, fitted with Dunlop pneumatic tires, succeeded in beating the Land's End to John O'Groat's record. He left Land's End on Sunday at midnight, and finished at John O'Groat's house on Thursday night at 11 p. m. He therefore rode the distance of 851 miles in three days, twenty-three hours. This performance eclipses the splendid ride of T. A. Edge over the same ground last June. On Wednesday and Thursday exceedingly rough weather and head winds were experienced, but notwithstanding these disadvantages Mr. Fletcher has reduced all previous records in grand fashion.

Belanger's Unicycle.

M. Belanger's unicycle was given a trial on the road at West Springfield, Mass., recently. The trial was very successfully made by M. D. Stebbins, who

now using was put together by a carpenter, and with the racing machine the Ames company is building, to weigh forty pounds, he expects to beat 1:45 for the mile!

Hired and Not Returned.

On August 24 a Wynnewood N. Y. B. & P. Co's. pneumatic tires; frame diamond pattern, double frame at bottom and single at top; thirty-inch wheels; stripped, with exception of brake on front wheel; No. 38015. Man was about 5 ft. 11 in., medium build, dark complexion, mustache, dark coat and vest, blue-gray pants, light straw hat, familiar manner.

Something New.

The Chicago Flusher Company, 16 North Canal street, is turning out a

quite a success in converting men to the idea that the Bidwell-Thomas is the tire.

All the leading Chicago cycle stores closed a half holiday Monday, Labor's holiday.

Harry Leeming disagreed with his partner Stokes, and last Monday the partnership dissolved.

F. N. White of the George R. Bidwell Cycle Company, New York, was in Chicago during the week.

The western championship of the Amateur Athletic Union, run at Detroit Aug. 29, was won by W. C. Rand, on a Monarch Copperplate.

The treasury department has informed a correspondent that under recent decisions of the board of general appraisers bicycles are not considered to be entitled

THE TOWER, NO. 5.

bicycle cleaner the utility of which is evident at a glance. The inventor claims to be able to clean the dirtiest machine in a very few minutes. We have tried one and can say it works very satisfactorily. No device like it has ever been on the market before. It is certainly invaluable to every cycle store and repair shop, as well as individuals who wish to keep their machines neat and clean. We refer our readers to the illustration showing same in operation, used in their advertisement in this issue.

Trade Jottings.

The American-Ormonde Company has commenced enameling wheels in all colors for the trade and clubs, and will

to free entry as personal or household effects, but are held to be properly dutiable when imported.

The fifty miles road championship of Scotland, decided on Saturday, August 20, was won by Mr. W. Duncan of Edinburgh, riding a New Howe.

The New York Belting and Packing Company has assumed control of two other rubber companies. The combination will have a capital of \$5,000,000.

Mrs. Elliott, mother of the popular family of trick riders, called on Hoyle last week and left an order for a wheel for the youngest girl. Mr. Hoyle reports the repairing trade as first class. He has lately been buying quantities of

drop forgings and parts, and is now in a position to supply repair shops with these articles.

New English Inventions.

These abstracts are prepared immediately after the patents are applied for, by G. Douglas Leechman, consulting engineer, Coventry, England:

All persons interested in opposing the grant of a patent on any one of the undermentioned applications, may at any time within two months from July 27, 1891, give notice in the prescribed form of such opposition.

No. 10,819. E. Edward's "Improvement in velocipedes." Oct. 17, 1891. (Communicated by O. Dalisch, Germany.)—This invention has for its objects to remove the difficulties experienced by velocipedists in riding up hill, or on bad roads, or against the wind, etc., by assisting the muscular power by substituting when required a mechanical power such as compressed air, liquid car-

bonic acid, etc. On a suitable part of the velocipede is arranged a reservoir containing compressed air, liquid carbonic acid, and connected by a pipe (L) with a cylinder (B) provided with a piston and rod, in such manner that (as in a steam engine) the compressed air is admitted alternately in front and behind the piston, and by means of the piston rod, connecting rod and crank, the crank shaft (C) and chain wheels of the machine are turned, the forward movement of the latter being thus assisted or effected. Between the reservoir and the cylinder (B) in the supply pipe is arranged a valve which can be opened by the velocipedist at will to admit the compressed air to the cylinder. Between the reservoir and the cylinder (B) may also be arranged a pressure-reducing valve of the ordinary kind, to reduce the pressure of the driving fluid, and a heating chamber may also be arranged to expand the air or gas, and thus obtain as much power as possible. The opened supply pipe (L) admits the compressed air or other driving fluid into two valve boxes (M and M') which are arranged at each end of the cylinder (B) and contain valves (N and N') which are closed against the outer ends of the cylinder (B) by spiral springs. The piston and piston rod are made hollow, and in them is placed a rod (O) which is pivoted at its front end to a cross piece (P) sliding in a slot in the outer end of the piston rod and having its projecting ends fixed to a sleeve (Q) to which is pivoted a lever (S), the outer end of which is pivoted to the outer end of a lever (T) fitting upon a suitable part of the connecting rod (T) and projecting from the latter at about right angles, and capable of turning upon it so that it can be turned either up or down. In an opening through the piston is fitted a double valve (V) which is alternately moved in one or the other direction and allows the air in front of each side of the piston to pass alternately through the hollow piston and piston rod and escape. In the piston shown in the figure the pin (O) of the rod (O) opens the valve (N) through which the compressed air enters behind the piston. A moment before the valve (V) on this side is closed by striking against the cover of the cylinder, and the air in front of the piston can escape through the bore (V) and the hollow and slotted piston rod. The compressed air moves the piston forward and the pin (O) of the rod (O) will keep over the valve (N) for a short time by a differential movement of the rod (O) in the piston rod, so that a sufficient quantity of compressed air can enter to drive the piston. When the piston reaches the front cover of the cylinder, the valve (V) will be closed on this side and the valve (N) opened by the rod (O), and the compressed air enters in front of the piston and the air behind the piston exhausts. This operation is repeated as long as the valve in the supply pipe (L) is open. By turning the projecting levers (R and S) upon the connecting rod round through 180 deg, it is possible to give the machine a reverse action. If this is done while the velocipede is being driven, the admission valves (N or N') are successively opened prematurely and a back pressure is caused in front of the piston before the crank comes to its dead point, tending to stop the piston.

No. 8,988. McDougall & Carroll's "Improvement in pneumatic tires for bicycles, tricycles and road carriages." May 12, 1892.—The object of this invention is to protect the air tube, which in ordinary forms of pneumatic tires is formed separately from the outer covering, from injury or destruction caused by friction on the edges of the rim of the wheel, or from the ends of the spoke projecting more or less beyond the surface of said rim. In this invention a piece of canvas or other suitable material is folded so as to form a cover (V) as represented in section in the figure. The invention may be readily understood by ref-

erence to the figure if commencing at the edge of the fabric at the point X, the line is followed in the direction of the arrows to the point X 1, when the material is doubled back and passes round to the point X 2, where it is again doubled back and carried forward to the end X 3. At this point the fabric may either be doubled back round the outside and terminate at X 4, or a separate piece of suitable material may commence, so as to terminate at that point (X). The two pieces of canvas aforesaid are coated with rubber and vulcanized or solutioned together, and if preferred the folds of the inner canvas may be stitched at H and H 1. The cover which is thus formed is attached to the rim (A) of the wheel by means of flaps (J J 1) which are either cemented to said rim or to one another, or to rim and one another, or secured by hooks, buttons or the like, or by clinching one surface of one of said flaps against the other, when the air tube may be inflated in the ordinary manner. By these means the flaps (K and K 1) will not be detached and separated at H and H 1 by the action of the edges of the rim (A), and if

from any cause it is required to obtain access to the air tube (B) the cover (V) may be readily opened at any part or entirely detached without mechanical appliances being required, and may be as readily replaced. As an additional means of protection from injury caused by friction or the protruding ends of the spokes, there may be inserted between the flaps (K and K 1) and the rim (A) of the wheel either cork, leather, India rubber or other suitable substances. The inventors disclaim the use of flaps that may be attached to the inside of the cover (V) for lining

the rim of a tire either internally or externally, or the use of additional material placed between said flaps and the rim, or the means whereby the cover (V) may be attached to the rim of a wheel, but what they do claim is: "In a covering that is employed for placing on or over an air tube so as to form a pneumatic tire for the wheels of bicycles, tricycles and road carriages, the manner of forming flaps such as K and K 1 by folding or doubling the fabric so that said flaps and the inner of the two layers of fabrics forming the covering (V) may be made from one piece of material in the manner and for the purpose substantially as herein before described."

No. 14,688. S. B. Robertson's "Improvement in wheels for velocipedes and other vehicles." Aug. 31, 1891.—This invention relates to the means of securing on the rim of a wheel for a velocipede or other vehicle a cover for the air tube employed in pneumatic tires. The rim (R) is rolled of sheet steel or other suitable metal, having its sides turned inward so as to form tubes (T) with a

comparatively narrow opening or slit (S) extending the whole length of the rim. The cover (V) is made with a narrow air channel (A) near each edge, extending its whole length. In putting on the cover C over the air tube B, before inflating B, the edges of the cover are squeezed through the slits in the tube (T) and the channels (A) inflated; this swells them out as shown. After this the air tube B is inflated. The swelling out of the tubular parts (A) of the cover by making these parts wider than the slits prevents them from being drawn out of the tubes, but they can be withdrawn if necessary by deflating the tubular

parts (A). A solid tire might be fixed in the same way, and the rim might be built up instead of being made from one piece.

No. 16,208. W. Brooks' "Improvement in cycle brakes." Sept. 24, 1891. The object of this invention is to provide a brake having what may be termed an eccentric action, and so arranged that upon a slight application of the brake by the rider it will have a tendency to act automatically and thus reduce the amount of manipulative force usually applied by the rider. The hand lever and plunger are similar to those at present in use. The eccentric brake shoe (D) is situated at the lower end of the plunger (B). Just above the wheel and extending forward from the steering post (A) is carried an arm (C) formed at its front end into a jaw, having a joint upon which is carried the shoe, the upper part of the shoe lying in the jaw and extending rearwards. Between

the joint and the steering post the plunger is connected to the upper side of the shoe by a suitable joint. The centre about which the eccentric moves and the point of connection thereto of the plunger are so arranged in relation to the point of contact of the shoe with the wheel that immediately the shoe touches the tire (E) the forward motion of the wheel has the tendency to pull the shoe forward and downward, thereby automatically applying a portion of, if not all, the brake power necessary. The more nearly vertical is the point of brake contact with the wheel to that of the brake centre of motion, so is the automatic tendency increased. A spring is employed to draw off the brake when not required. By the use of another spring the brake power may be prevented from exceeding a certain maximum. The brake may be applied to the rear wheel or wheels by means of suitable connections being made therefrom to the manipulating lever, or it may be applied to both front and rear wheels.

No. 11,252. J. Dame's "Improvements in wheels suitable for velocipedes, perambulators, and the like." June 15, 1892. This invention relates to wheels suitable for velocipedes, perambulators and the like. According thereto the outer rim, which is provided with an elastic tire, is not rigidly connected with the spokes, but through the medium of springs arranged between the said outer rim and an inner rim, with which the spokes are connected in any well known manner. Wheels, according to this invention, are designed to supercede wheels with pneumatic and other elastic tires as heretofore constructed. The inner rim (A) is connected by spokes (B) with the nave (C) in any suitable way. The outer rim (D) is provided on each side with a flange (E) between which is arranged a rubber tire (F) which is cemented in the groove formed by the said flanges on the rim (D). The connection of the inner rim (A) with the outer rim (D) is effected by means of compression springs (G), which are fixed to the rims by means of screw bolts (H) and nuts (I), the said springs being sufficiently strong to transmit the rotary motion of the inner rim to the outer rim (D), and sufficiently elastic to completely take up the jolts caused whilst riding over uneven roads, without transmitting such shocks to the spokes and nave. The two claims are for: 1. The herein above described improvements in wheels for velocipedes, perambulators and the like, in which an inner rim (A) is elastically connected with an outer rim (D) by means of compression springs (G). 2. In wheels of the kind referred to in claim 1, the arrangement of said flanges (E) on the outer rim (D) for holding the rubber tire (F), which is cemented in the groove formed thereby substantially as described.

Notes.

J. J. Ross returned last week from an extensive trip through Michigan in the interest of the Ames & Frost Company. He leaves this week for a trip to the south.

The Pope Manufacturing Company is experimenting with two geared ordinaries at Hartford, and one has already been tested, to the liking, it is said, of Superintendent Day.

The Standard Bicycle Manufacturing Company of Indianapolis, which has been shut down for a month putting in new machinery and improving the plant, resumed operations this week.

The Western Spring Bicycle and Lock Company, with headquarters at Osawatimie and Kansas City, Mo., filed its charter last week in the office of the secretary of state. The capital stock is \$100,000, and the directors G. D. Weston, Aylmar Weston, H. H. Coombs, Alice J. Weston and T. F. Dunaway, all of Osawatimie, Kas.

McKee & Harrington scored at the big meeting at Clifton last Saturday. Paul Grosch, on a thirty-pound Lyndhurst, won the mile handicap easily, and another rider secured a place with the Lyndhurst. In honor of the event the manager for M. & H. opened several bottles, and asked all to look out for the Lyndhurst in the future.

Cycle dealers pay \$2.50 freight on every wheel to the Pacific coast, and \$12 to \$15 when expressed. By the latter way they wait a month or more for their goods. Traveling men cannot sell goods under sixty days' time. It costs the same to Salt Lake City as to the coast. The dealers on the coast add \$5 to the cost of the wheel.

Albert Williamson, of Quincy, Ill., recently won three straight races on a Haliday-Temple scorcher. The scorcher also took second in each event.

The Halladay Temple Scorcher cycles, manufactured by the Manon Cycle Company, are noted for beautiful finish. These wheels are thoroughly represented in all parts of the country.

H. J. Winn, formerly president of the Speedy Bicycle Manufacturing Company, has again entered the bicycle-making business. He has organized the Illinois Bicycle Company and will make the Flyer, a thirty-two pound roadster, to sell at \$150. The new factory will be at 655-659 Carroll avenue, and will be in full operation in a few days.

The Fulton Machine Works have built a racing wheel which weighs just one ounce under nineteen pounds, with three and one-quarter pound tires. With two and a half pound racing tires now being fitted, the wheel will weigh under eighteen pounds. The spokes are twenty gauge piano wire, cranks hollow, and twenty gauge tubing is used.

Ames & Frost offer \$50 reward for information leading to the conviction of the thief who appropriated, on Aug. 23, an Imperial Scorcher, No. 4083, fitted with a Garford saddle and cork handles. The same firm offer, for the owner, \$25 reward for the return of Imperial model A, No. 4915, or No. 4937, stolen from Bay City, Mich. A like sum is offered for the conviction of the thief.

The Ariel Cycle Manufacturing Company, which has been experimenting with geared ordinaries, has finished a sample machine, which has been tried by several old riders and pronounced the best they have tried. This company has not placed any upon the market as yet, but will have them ready for next season's trade. They will be made with 40, 42 or 44-inch front wheel and 20 and 22-inch rear, geared as the rider requests.

We Don't—

Claim to have the very best wheel on earth—
that's a chestnut. We aim to be original; but
we do say, that, if you will ride a **Cleveland**
No. 4, geared to 63 inches, you will smile.
Rides like 53.

The Thread Tire is like the girl you love—
different from others. No others on our
wheels.

GOOD OLD SPRINGFIELD.

Always the greatest race promoter.
Always the scene of the best records.
Always the donor of best prizes.
Always the scene of the largest crowds.

Always the possessor of the finest track.

Always the scene of the most profuse hospitality.

All of these things, and many more, is good old Springfield.

A model town, made up of kindly people with an immensely developed bump of local pride. Possessing many enterprising papers which enter into the spirit of every local event and make it a success. Possessing also scores of tradesmen ready and willing to contribute liberally to the success of any enterprise. Such, when we first visited it in 1882, was Springfield, and when, in 1891, after the people had been given a long rest from cycle racing, and when the club men were even fearful that the old love had dwindled away, we found it the same enthusiastic, sport-loving town as when the British rulers first visited us to do battle with our few American riders at historic Hampden Park.

One can never realize the whole-hearted manner in which the Springfielders enter into their annual tournament until he has been there and seen it for himself. Where on earth are all those people going at 11 o'clock in the morning? Why, to the races. Sure enough. Take a walk to Hampden Park races on either day of the tournament, and three hours before the advertised time, hundreds are struggling for admission. And from that time until late in the afternoon a steady crowd strings across the field and into the capacious grand stand.

How many will that tremendous double-decked stand hold? We have no idea, but so many that any three race meetings might be proud to fill it between them. But it isn't nearly sufficient. A supplementary stand holding half as many more, goes up beside it, and both present a complete sea of faces. Then there are hundreds, thousands perhaps, around the fences—a sight to warm the heart of the coldest and to make the racing man fly as he never dreamed of flying before.

Then as the band plays some inspiring air and some favorite comes flying down the home stretch, a winner, that crowd of from eighteen to twenty-five thousand people rises *en masse* and gives forth such a thunder of applause as might be heard in Boston.

No man who ever saw Hendee, in his prime, race against and defeat the English cracks, will ever forget the scene.

Hendee was Springfield's idol; he was largely instrumental in making the meetings of old the successes they were, for the local pride of the people, thousands of whom would never have gone for any other reason, drew them to the races, and once there they were pleased and went again.

Every one talked of Hendee. Corbett in New Orleans wasn't half the hero Hendee was in Springfield. The boys wore Hendee hats and ties, the girls wore Hendee gloves, shoes and other things, and the old ladies and old gentlemen talked excitedly of what a fine boy Hendee was and what a great city Springfield had become. Why, Springfield's bicycle races have done more to make a name for the city than anything else that ever occurred there.

Let it be by no means supposed, however, that the citizens are thus proud without just cause, or that Springfield bicycle races became so popular without effort. To be sure, the city has the advantage of the most centrally located track of which we have knowledge, but it was by persistent and expensive advertising that success was achieved. Springfield has always aimed to do something which no one ever did before. Springfield originated international racing between amateurs; the piano idea originated there, as did the carriage and pair—and, by the way, we have noticed no followers of the latter! Come, gentlemen; pianos are played out. Give us horses and carriages and diamonds. Ducker, the greatest boomer cycling ever knew, was the first manager of these famous meets, and his advertising matter flooded the country.

The most sensational events known to cycling have occurred at Springfield.

Or finally a mile track was used, but later a half-mile was constructed and has been used ever since.

The first lowering of records was done by Frank Moore, a Birmingham man, an ex-champion of England, who in '82, proved too much for our amateurs. Then came Prince, Keen, Howell and James, all professionals, and Vesey, Robinson, Hendee, Weber, Frazier, Harry Corey, Rowe, Sellers and Furnival. Possibly some others, whom we do not at the moment recall. The feats of the later record-makers, Taylor, Hendee, Zimmerman, Smith, Tyler—all are still fresh in our memories.

Riders from all parts of the world have been attracted to Springfield. England has sent us a dozen at least. Australia sent Langdown, San Francisco sent Fred Russ Cook; Oregon sent Merrill; Kentucky sent Jenkins; France sent Terront and Dubois. All these and many others have competed at historic Springfield. It is for these reasons that all wheelmen, on the eve of the greatest meet of the year, look forward with absorbing interest to this great event and anticipate such racing as is never seen elsewhere. On Wednesday and Thursday of this week all the best men of America met for the first and only time this year. How they fared will be recorded on another page.

At this writing there seems good reason for believing that the Springfield meet of '92 will be the greatest in history.

IMPROVEMENTS IN WHEELS.

As is the case with many improvements, the American manufacturers will be a year behind those of England in the manufacture, on a large scale, of the geared ordinary. Many makers are not even thoroughly posted yet as to the new comer, but evidence has been forthcoming to show that in 1893 many of these wheels will be made in America. The makers of this country can hardly

be blamed, perhaps, for not taking up in a hurry every new idea from the other side. In the first place, they benefit by waiting, in that they determine definitely, by means of John Bull's experiments, whether or not the invention possesses merit. In the second place, they have nearly always on hand large quantities of material suited only to the machine at present in course of construction, much of which would become useless, or at least be greatly reduced in value by a change in patterns. To prepare for such changes, too, requires a large outlay for new machinery, while much of that in use may become almost idle. In a word, a change of pattern means far more to the maker than the average rider thinks possible.

It is nevertheless a fact that every important change made has, in the long run, been immensely beneficial to the maker. No sane man can doubt for a moment that the introduction of the safety is primarily responsible for the unprecedented popularity of the sport to-day, or that the makers have benefitted thereby. Thus it is sometimes, but not always, folly to attempt to hold in check those improvements which are bound, on their merits, sooner or later, to force themselves into prominence. The wide-awake maker loses no time in adopting everything which he can satisfy himself is an improvement on old methods.

It would make interesting reading if some one could and would explain to us why all the great improvements, the introduction of ball bearings, the safety type of wheel, the pneumatic tire, and, finally, the geared ordinary, have come from across the water. It can not be—or at least Americans will never so admit—that British mechanics are superior in skill and brain power to those of this country. The patent office is crowded with inventions of one kind and another, some of them the most nonsensical on which a man could spend his time and money, and some possessing great merit, but none such as have caused the great revolutions of the past five years in wheel building. Who can explain?

THE TROTTER STILL LEADS.

Some riders are under the false impression that when Zimmerman made a mile in 2m. 64-5s. he eclipsed the best trotting record. He beat Nancy Hanks' time on an oval track. On a kite-shaped track, which should possess as great advantages to a bicycle rider as to a trotting horse, Nancy has done 2:05 1-4. Still, there is no reason whatever to fear that any trotter on the face of the earth can defeat Zimmerman, Windle, Tyler or Taylor—possibly others might be added—at any distance, however great or small. No horse has ever shown a quarter in twenty-seven seconds or within twenty yards of it. There can be no doubt of the ability of any of the men named to "hang on" to Nancy for three-quarters, or of their ability to out-do the four-footed female in the final spurt. We can hardly picture a better drawing event than a race between Zimmerman and the trotter. A rumor was afloat recently that Chicago would guarantee \$20,000 to the owner of the horse for such a race. Of course that was nonsense. Chicago hasn't raised enough pluck to procure a track yet! But if such an event were among the possibilities, surely all the trotting and cycling world would want to be there to see.

BIG WORDS THESE, MY MASTERS.

"I do want and will see the championships of the League of American Wheelmen thrown open to the world." Thus, if there be any reluctance whatever to be placed on the utterances of the press,

saith Colorel Burdette. Indeed, colonel! These, some people may imagine, are somewhat lofty words. It may be true, as rumor has it, that the racing board moves in whatever way the strings are pulled by the president, and that on that fact the colonel relies when he tells us that he "will see" the championships thrown open; but that gives him no right in the matter.

But regardless of all that, we opine that such an action would be injurious to the sport and possibly even ruinous to the international association which it is now proposed to form. We wrote at length on this subject some time since, and should be sorry to see so important a step taken before it has had very careful consideration. Let the American championships be for Americans—all Americans, not league members only—and let us have an annual international meeting for the decision of world's championships.

EXTRAORDINARY, IF TRUE.

If our Milwaukee correspondent has been correctly informed, the Columbus Wheelmen are displeased over the action of the referee of their late race meet, who disqualified Sanger in one race, because, contrary to rule, his starter stepped over the line in pushing him off. More than this, they have advised Sanger to serve an injunction on them to prevent the award of the prizes to the second man.

If the Columbus Wheelmen have been guilty of such action, they have committed a grave offense. It is to be presumed that in selecting a referee they were careful to take one familiar with the rules and on whose integrity they could rely. If Sanger's starter touched the ground in front of the tape—and we have not seen this denied—the referee had no alternative. The rules provide for such cases, and he had nothing to do but enforce them. His decision in the matter is final. If matters stand as they appear to, Sanger will do well to ignore the advice tendered and the Columbus Wheelmen to at once forward an apology to the insulted referee.

NEEDS A TRAINING SCHOOL.

"The races at the Auditorium were hardly up to the mark. The management, what little there was, was poor." So says a Louisville paper. Poor management seems to be the rule at Louisville, primarily because the promoters don't select reliable men for officials. We have known a man to be appointed starter who imagined that all that was necessary in a time handicap was to drop a handkerchief for the first man. We have seen a judge who thought it just as easy to judge six feet away from the tape as directly on it. The beautiful southern city is not overladen with experienced men, but all it has should be pressed into service at the coming "electric" tournament.

It may be well to advise that young man who threatens to disregard the racing board's suspension and race wherever he can creep in, that such action on his part renders him liable to prosecution for having obtained or attempted to obtain a valuable article under false pretenses. Go slow, young man.

How is this, Mr. Rouse? We have been informed that in building the additional rail to make up the shortage between the three feet and eighteen-inch measurements, the entire distance added to the first half? If this be case, the last half must have been and some Peoria records may be touching.

Cycling vs. Pugilism.

Thanks to Zimmerman and Windle, the people have been given something to talk about beside the late prize fight which had such a firm hold on a portion of America the greater part of the week. The query every other man fired at you last Wednesday, was: "Who will win, Sully or Corbett?" Thursday it was torture, and indeed, Friday. Talk about cholera being infectious! The germs of fighting take hold a hundred per cent quicker, and last longer.

On my arrival in a little town called Middlesex, Conn., Thursday night, I found that the only thing the town was interested in was a twenty-four foot ring in New Orleans, and the chances of two men who had contracted to disable each other. I sought the solitude of a quiet little hotel whose sign bore, under the proprietor's (George Schoffee) name those famous words, "As we journey through life let us live," etc., and for a truth, contrary to most New England country town hotels, life was worth living at Schoffee's.

But the admirer of prize fighting was there too, offering all kinds of extravagant odds on the slugger from Beantown, and a three to one shot was tempting enough to make two people invest a little—just a little—but enough to pay their hotel bill, and to accommodate the offerer.

Next morning the first greeting was: "Well, Corbett won." On arrival at the depot the station agent was ready with, "A great fight; Corbett won." The conductor of the train, and all the passengers seemed infected with pugilism, for a fat and jolly Catholic priest turned to me and remarked: "That man Corbett is a grand athlete and boxer," and possibly remembering his college days, the good man felt of his biceps.

On arriving at my first stopping place, East Hampton, the baggagemen tried to outbid each other for a copy of the New York Herald I was carrying. I left it to them and it was a sight to see the pair sit on a bundle of sacks and greedily devour the details of the match. Trains could run into each other for all they cared; they were more interested in an account of a fight.

But the same day, in Birmingham, Conn., I was basely swindled by an eight-year old American youth who was selling a "patent inside" paper, and yelling "All about Sullivan's suicide!" I bit, and soon discovered that the enterprising infected one had magnified a rumor into reality and was doing a land office business. On calling the lad to account later, he said:

"I didn't say he was killed; I said 'All about Sullivan's suicide.' And it's here, too," proudly announced his kidship. "Corbett is a giant," went on the youngster.

"Why, Sullivan was the heaviest man was he not?" I asked.

"Oh, yes; John L. weighed two hundred and twelve, Corbett one hundred and eighty-seven, but you bet Corbett is a giant or he could not have licked John L.," said the follower of Queensbury, and he talked as knowingly of the men's abilities as the renowned "Parson" Davies would.

Business men would sooner talk over the details of that fight than they would about business, and many a man was seen pouring over the rounds in detail. Therefore it is well that the country has turned its face from the twenty-four foot ring to cycling, and Zimmerman and Windle are to be thanked, for the subject is a heathen one, much as we admire a man who can whip a brute, made thus by success, and who supposed himself proof against man and rum. The daily papers have therefore nearly dropped wondering whether John L. will be a common bum in six months and Corbett a histrionic star and millionaire at the end of a year.

* * *

How Zim's Records Were Made.

Now the papers condole with Nancy Hanks and glorify Zimmerman and his pace, and with the usual license and facility of the daily, a new title of "Jersey Lightning" has been given Zim, and his middle name, Augustus, has been altered to Alexander. It will be noted that

The Sercombe & Bolte Pneumatic Sulkey.

Windle is not feeling very badly over being beaten by "Alexander," and his half mile proves that the fair haired Millbury lad is still in the hunt, and must be watched to a certainty by his competitor, although it is not likely that Zimmerman will be beaten this year from scratch in competition. That last hundred-yard drive of his is too strong for the best, and his strength is immense to a certainty. The Boston Herald, speaking of the record breaking, said:

Nancy Hanks shed tears as she crunched her oats this noon. A special despatch from Hampden Park told her that Arthur Alexander—otherwise known as Jersey Lightning—Zimmerman had ridden a mile on a bicycle at a faster clip than she drew Budd Doble around the regulation track at Hamline, Minn., on Wednesday last.

This was an ideal day for records. The sun shone clear and warm upon the track, and hardly a breath of wind was stirring. At 11:40 Zimmerman mounted his wheel and rode around the track. He stopped about 300 yards back of the tape and waited until W. W. Taxis had mounted his safety and George A. Banker and Carl Hess their tandem.

All being ready, the four flyers started toward the tape at a moderate speed, which increased rapidly as they advanced. They crossed the tape like a whirlwind, and were off after Nancy's record.

Zim kept to the rear of the tandem for the first half, but after Taxis had dropped out and G. M. Wells had taken his place the champion began to hurry things. At the three-quarter post he

pulled away from his pacemakers and finished alone Time—2m. 8 4-5s.

He thus established a one-mile flying start record.

Willie Windle, the plucky little Millbury rider, then came on the track. He announced that he would attempt to break Zimmerman's half-mile record of 1m. 1 4-5s., made at Hartford Tuesday. With H. B. Arnold as pacemaker for the first quarter and H. C. Tyler for the second, the little rider started.

The spectators and judges realized as Windle passed the quarter post in 30 2-5s. that something was going to be accomplished. When the ex-holder of the world's record crossed the tape in the time of 1m. 1-5s. the crowd fairly went wild.

This places the half-mile record where it will stay for a while.

George F. Taylor, who holds the world's standing start mile record, next tackled Zim's record of a few moments before. With A. E. Lumsden, of Chicago; J. P. Bliss, of Chicago; W. S. Campbell, M. A. C., and N. H. Van Sicklen as pacemakers, he went away. After a pretty mile ride he crossed the tape in 2m. 8 1-5s., three-fifths of a second better than Zimmerman's record.

The New Jersey rider did not allow it to stand long, however.

Zimmerman appeared on the track fresh and smiling, after a good rub down at the hands of his trainer. Banker and Hess carried him a half mile in 1m. 3 1-5s., and Nelson and Taxis paced him the second half, each making a quarter.

The timers hardly believed their watches as they figured the time at 2m. 6 4-5s.—one-fifth of a second lower than Nancy Hanks' regulation track record. The crowd present went wild as the result was announced, and had not the champion ridden directly to the dressing rooms, he would have been carried around the park on the shoul-

will acknowledge that fact. As a toastmaster he is said to be equal to Kennedy Child, and from personal observation the writer can vouch for him as a stage manager and p. r. referee.

His stage managerial ability was demonstrated at Hartford when "Cupid's Chariot" came to fill its car with tournament dollars, but Cupid was not very successful. Everybody seemed afraid of both Cupid and the chariot, for the crowd of supes Marion addressed in the county fair scene on the stage numbered nearly as many as the people in the house. Marion was telling the natives (while standing on a stool in front of the tent which concealed the bearded woman and snake charmer) that after all the outside fakes were exhausted a bicycle race would take place back in the woods somewhere, and Dan Canary and Asa Windle were among the stage natives. The race took place in the presence of the president, secretary and chairman of the racing board of the L. A. W., and Arthur A. Zimmerman, George A. Taylor and George Banker competed against trick-rider Barber's wife, who won and who is a professional! Now as gate money was charged, and of course the winner (a professional) participated in same, how is the "amachoor" standing of the above gentlemen affected? Both Raymond and Bassett informed your correspondent that sanction had been obtained and the race run under L. A. W. rules. Of course the men who competed against the woman pro are pros themselves, but as the house was small the purses must have been smaller.

But joking aside, does anybody think that "Cupid's Chariot" is going to popularize or elevate cycling in the minds of the ignorant or the masses? The race follows an exhibition of fraud at a county fair, or picnic of some sort, and savors of the worst type of circus swindle. No wonder the Hartford cyclists fought shy of such a show. It will end like all such schemes to work a few dollars out of cyclists' pockets. There is much to commend in the show outside the race scene, and the trick riding of Barber and the Power Brothers would and should attract alone.

* * *

A Successful Woman Agent.

"Who runs this place?" was my inquiry to a good-looking, smiling fat boy in Middletown the other night, on entering a Columbia agency.

"Miss Minnie Brockway," he replied. "What, a girl run a cycle agency?" I queried.

"Yes, and she runs it well, too," he answered.

Miss Brockway had gone out driving with friends and was expected back soon, so after taking note of the goodly stock I sat down and wondered how a woman came to get an agency, whether she was beautiful, etc. After examining several pictures, among them the REFEREE's Christmas sketches of Osmond and Windle, and later ones of Zimmerman and Taylor, I had formed an opinion that Miss Brockway was an admirer of racing and altogether a progressive, live young woman. Nor was I disappointed. She soon came in, and hastily removing her bonnet asked several questions rapidly, attended to her customers, rented a wheel to a woman for a week and sold a timid-looking young man a Western Wheel Works machine. Then she spied yours truly.

After complimenting the young woman on her good selection of cycling literature (she reads the REFEREE religiously) I timidly enquired into her history in a cycling way. Taking a seat, Miss Brockway said:

"It was not from choice I became an

ders of his admirers.

The time made at the several quarters was as follows:

Zimmerman's first mile—First quarter, 32s.; half-mile, 1m. 4 4-5s.; three-quarters, 1m. 57s.; one mile, 2m. 8 4-5s.

Windle's half-mile—First quarter, 30 2-5s.; second quarter, 1m. 1-5s.

Taylor's mile—First quarter, 29 4-5s.; second quarter, 1m. 2 3-5s.; three-quarters, 1m. 34 3-5s.; one mile, 2m. 8 1-5s.

Zimmerman's second mile—First quarter, 31s.; second quarter, 1m. 3 1-5s.; third quarter, 1m. 34s.; one mile, 2m. 6 4-5s.

The officials of the trials were:

Zimmerman's first mile—A. E. Lumsden referee; F. C. Graves, F. J. Whatmough, A. K. Miller, judges; A. O. McGarrett, C. E. Whipple, N. H. Van Sicklen, timers; D. J. Canary, starter.

Windle's half mile—N. H. Van Sicklen, referee; W. J. McGarrett, F. J. Whatmough, A. K. Miller, judges; J. A. Bryan, A. O. McGarrett, C. H. Tobey, timers; D. J. Canary, starter.

Taylor's mile and Zimmerman's second mile—H. R. Winslip, referee; W. J. McGarrett, F. J. Whatmough, A. K. Miller, judges; A. O. McGarrett, J. A. Bryan, C. H. Toney, timers; D. J. Canary, starter.

* * *

The Versatile Announcer.

W. C. Marion, Jr., of Hartford is a versatile young man, as good a toastmaster, it is said, as he is an announcer, as expert in refereeing a fight as Professor Duffy or Parson Davies, and as a stage manager simply spotless. In these several positions Marion was seen to advantage recently at Hartford, and in all of them he was accorded the distinguished patronage of league royalty. Of course as an announcer Marion is unapproachable. Everybody who has heard 'em all

agent. A year ago my brother, who had been agent here for many years, died, and as the business was prospering and my family depended on it somewhat, I took hold of it. The other tradespeople wondered if I would succeed. Well, I found it extremely hard at first, and it worried me, but soon things seemed to grow brighter. I became much interested, and this season has been the largest of any we have ever had. I have sold over a hundred wheels—Columbias, New Mails and Western Wheel Works. I have been so busy that I have had no time to learn to ride, but intend doing so this winter. Next spring I intend to open a riding school and repair shop. One is much needed here."

Miss Brockway is a decided brunette of anywhere between twenty and twenty-eight years, and seemingly of a sunny disposition.

From other sources I learned that she is a writer of ability and a regular correspondent of the *New York World*, and furnishes a special article for the woman's page of that paper every Sunday. Only recently she proposed to the local club that they get up a road race. The club did not enthrall. Miss Brockway did. She solicited the prizes and managed alone the most successful race given locally, which drew as big a crowd as the circus generally draws. Miss Brockway attended to all the details of the race, even giving the word "go," and then presented the prizes. She had been to Hartford and had taken a leaf out of Joe Goodman's management book, and now she proposes to give a day's track races, "just like Hartford," and there is no doubt it will be a record for the locality.

Pneumatic Sulkies all the Rage.

The old style sulkies must go, and they are going fast, too, judging from the number of "new-fangled things" seen around the trotting tracks these days. Even the repairers are busy in some places converting sulky wheels, and there is great bustle all around among the horsemen to get them. And no wonder, when that noted authority, Mr. Robert Bonner, owner of Sunol and Maud S., says that they are five seconds faster than the old sulky.

A reporter visited Bonner and told him of Arthur A. Zimmerman's wonderful feat. After reading the dispatch Mr. Bonner said: "Well, it is simply wonderful. There is no telling where it will end, either with horses or men. Since July 20, this year, when the first pneumatic sulky was used in a race, there has simply been a revolution in trotting records. One strange thing about the new wheels with these ball bearings is that the horses are not tired a bit after a fast heat, and can repeat again and again. They seem to push the horse along; there is no vibration, and they are from three to five seconds faster, at least, than the old wheel.

"When Maud S. made her mile at Cleveland, in 1885, in 2:08 3-4, she used a sulky with a fifty-six inch wheel. This is still considered the fastest mile made by a trotter, as it was made on a regulation track with an old fashioned sulky."

There seems to be little doubt in the minds of many horsemen and carriage makers I have talked with recently that the pneumatic tire will be brought into general use on light vehicles.

The Editor of "Bicycling News."

The cares of the editorial chair sit very lightly indeed upon the brow of that fine enthusiast—E. H. Godbold—the editor of *Bicycling News*. What with the *Midland Daily Telegraph*, *The Cyclist* and the *B. N.*, to say nothing of the various other journals at home and abroad to

which he contributes, it will be easily understood that he has very little time indeed to idle away, and yet he finds opportunities occasionally to put in some real good work on the road (for he is an ardent cyclist); has a turn at pacing if anything of the kind comes his way; does a bit of sketching at odd times, and talks delightfully of the pictures of the year and the big guns in the world of art. In the winter he has been known to dig his head down in the "scrum" for the Coventry team, and still does his gymnasium practice with all the ardor of a new beginner. One day finds him in London, the next in a quiet spot on the south coast; and later still at a quiet spot near the Fens, where rumor says he is often inclined to linger. He is well known to all the leading lights of the cycling world, and can take one back to famous events farther than some would care to go. Not a thing of importance goes on in the sporting world without his knowledge, and he can recall any of the famous athletes or cricketers of the immediate past just as easily as he can quote from the work of the latest fashionable author. His admiration for the paintings of E. Blair Leighton amounts almost to a passion, as an exquisitely choice engraving of one of this artist's best pictures which occupies pride of place in his cosy room amply testifies. "Lay thy sweet hand in mine and trust in me" is the subject of this gem, and it did one good to hear this busy young editor speak of the delicious green of the moss, the sweetest of pinks and the softest of grays. He has had some experience of "running a rag," and knows a good deal of the career of the defunct *Magazine of Sport*, a bright, well-written journal, which stopped all too soon, and undoubtedly deserved a better fate. As a handicapper he has achieved considerable distinction, and knows form as well as most people. What he has done for the *B. N.* must be known to every one, and that he is destined to make a yet bigger mark in the journalistic world the present writer thoroughly believes. Photography he would dearly love to go in for; but time does not at present permit. By some means or other he contrives to keep in touch with most of the leading cycling and athletic clubs in London and the Midlands, and his sturdy outspokenness at meetings of the *N. C. U.* is well known. Possessed of a sly humor, he can yet hit hard in debate, and he has been known to say some of the best things in the way of repartee one can imagine. As controller of the destinies (to a large extent) of the *Bicycling News*, he is evidently the right man in the right place.—*Sport and Play.*

What Wheelmen May Do.

England's medical authority, the *Lancet*, was astonished when Shorland made his 413 miles in twenty-four hours, and, continuing, said: "The writer knows a cyclist, a member of the medical profession, who declares that if he could be protected from the impeding influence of the wind, and could be put on a line of railway properly laid for the purpose, he could, if placed behind an engine tearing away at the rate of 25 miles an hour keep up with the engine for one hour at least. At one of the meetings of the Society of Cyclists, Dr. B. W. Richardson, who presided, declares that he saw in them the first true efforts leading to the practical accomplishment of aerial flight."

Secured New Quarters.

The Wolverine Bicycle Club of Grand Rapids, Mich., has secured rooms at No. 76 South Ionia street, and is fitting and furnishing them in fine style.

MILWAUKEE RACING ITEMS.

Peculiar Action by Columbus Wheelmen—Sanger Doesn't Go to Springfield.

MILWAUKEE, Sept. 13.—Sanger has been notified by the chairman of the prize committee to serve an injunction on the Columbus Wheelmen to prevent them from giving the prize to Berlo, who was awarded the first place in the one-mile open race by the referee, on account of the person who pushed Sanger off stepping over the tape. The Columbus Wheelmen say Sanger won the race fairly, and they want to see him receive the prize—which is an elegant eight-piece silver dinner set, valued at \$100.

Wegner, who captured a bicycle and a dinner set, has been notified of their shipment.

Now that it has come to be regarded on all sides that cycling is the coming sport, the League of American Wheelmen should be more liberal in their rulings regarding racing than heretofore. It has been the rule of the league, and for that matter is at the present time, to allow only amateur American riders to compete in championship races, but it is understood that next year a new plan will be adopted, and that it will throw open to the world the league championships. This will be in line with a liberal and progressive policy, which will not only receive the hearty endorsement of wheelmen all over the world, but will add strength, numbers and additional luster to the already great fame of this princely American institution. [We can not endorse our correspondent's views, but are glad to give both sides of every story.—Ed.]

Sanger, who intended to attend the great diamond meet at Springfield, has concluded to remain at home, as it would be impossible for him to return in time for the Milwaukee Wheelmen's races Sept. 17.

The racing board of the Milwaukee Wheelmen, in selecting Sept. 10 as the date for their first day's sports, failed to consult the weather prophet, and in consequence of rain were compelled to postpone the event until Sept. 17. The board has decided to re-open the entry list, which at the present time numbers in the sixties. The prize list will also be added to and made as attractive as possible. Many of Chicago's fast riders have entered and others will no doubt avail themselves of this opportunity. There will be eight events and a one-mile invitation race. The Milwaukee Wheelmen will make an extraordinary effort to give visiting racing men a good time.

The State Fair Association has just completed at its new grounds one of the finest regulation mile tracks in the country. As it will be used more or less by the Milwaukee Wheelmen until such time as they can possess a track of their own, a brief description of it will give racing men an idea of what they can expect when attending a race meet in the Cream City. It is constructed on a new principle, the originator of which is J. J. Boyd, of Milwaukee, who has given the race track problem years of study. The track is constructed on what is termed a gradual curve, which it is believed will make it one of the fastest. It approaches the elliptical or regulation pattern in the general plan, but is built on such lines as to entirely avoid the abrupt transitions from straight stretch to circular turns, and from turn to stretch again, which has proven so annoying in the old style of track. The stretches pass smoothly into turns, in which the curvature is at first barely perceptible, but gradually increases in sharpness for 400 feet, then follows a true circular

course of similar length to the middle of the turn and vanishes into the stretches. The pole line is very nearly a perfect level, and the turns at their sharpest parts are much easier than those of the regulation track, and are thrown up for high speed. The track, it is claimed, is the finest ever built, and is expected to be very fast. Who knows but at some future time some of the world's records may be smashed on this track in the bicycle line, and new names made famous?

The resignation of H. P. Andrae, L. A. W. official handicapper, recently made, has not yet been accepted by the racing board. He will handicap the Milwaukee Wheelmen's race meet September 17.

Asbury Park Wheelmen.

The Asbury Park Wheelmen is one of the most flourishing organizations in New Jersey. At the regular monthly meeting last week two of the town's representative business men were elected to membership, and ten applications were received. The club now numbers eighty members, including Arthur A. Zimmerman, the modest Manasquan boy, who has electrified the bicycling world by his marvelous work on the wheel. To say that the club is proud of "Zimmie" is expressing it too mildly; they worship him, and when he finishes his racing season and returns home he will be given a reception that would shake down the walls of Jericho.

Papa Zimmerman is proud of his boy. When the latter returned from Europe, after he had met and conquered the Britishers, his fellow natives at Manasquan accorded him a grand reception. A brass band was engaged, and with a big transparency in the front ranks a parade made up of the best people of the place, marched through the streets of the historic town.

The A. P. W. sent two of its fastest riders to Springfield this week—Harry B. Martin and Ray Pauley. The club was also represented by thirty of its members, who went there in a private car. The trip cost each member fifteen dollars.

Fred C. Atkins is an enthusiastic cyclist, and to him is due much of the credit of engineering so successfully the A. P. W. meet on August 5 and 6. At the last meeting of the club a committee was appointed to select for him some suitable souvenir.

"Could Asbury Park take care of the national meet of the L. A. W. in 1894?" This was a communication addressed to the Asbury Park Wheelmen this week by G. Carleton Brown, vice-president of the league. Bicyclists in this section are enthusiastic on the subject, and steps have been taken toward the consummation of the proposition. Asbury Park is one of the leading summer resorts in America. Beside its natural advantages, it has one of the best athletic grounds in the east, with a third-mile track and a grand stand that will accommodate 4,000 persons; and speaking of the track reminds the writer that it is to be improved this fall by raising the bankings on the turns eighteen inches. It was the general opinion of the fast men who competed in the August races that such a course would improve the track wonderfully.

The A. P. W. will celebrate its second anniversary on Sept. 24 by giving a supper.

The necessity of educating the farmers on the subject of good roads has met with the endorsement of the A. P. W. At its recent meeting it was resolved to provide 100 farmers in Monmouth County with a year's subscription to *Good Roads*, the monthly magazine published by the L. A. W. Captain Zacharias was authorized to draw on the club's treasury for \$100 to defray the expenses.

W. E. BEDELL.

SPRINGFIELD'S TOURNEY.

Again the Scene of Grand Racing and the Reduction of Many Records.

Zimmerman Twice Beaten, But Still the King.—Wins the Mile Record Race Easily.—Tyler Rides a Mile in 2m. 08 4-5s.—Windle Performs Well.—Thousands of Spectators.

SPRINGFIELD, Mass., Sept. 13.—Springfield! You have all heard of it. Thousands crowd the hotels and streets here to-night.

Where did the crowd come from? They came from every state in the union. California, Florida, Michigan, Illinois, Colorado, Texas and many other far-off points sent their cycling enthusiasts to swell the throng, and they came to see the great tournament of the year, founded by Ducker & Company and now carried on so ably by President Miller and his band of hard workers, who are fully as enterprising as the club was years ago.

The train from Boston, which carried one of the REFEREE specials, carried many men and their wheels, and the dark clouds which hovered over Springfield on our arrival filled some with forebodings of a rainy tournament, but President Miller, ever hopeful, stated that he had made special arrangements with Uncle Jerry Rusk for a two days' supply of real Indian summer weather, and he was cheerful on that account.

After vainly trying to engage the front parlor at the Cooley for some friends, a visit was paid to the track. Here everything was bustle, and more racing men hovered and moved around the track than have ever trod the old Hampden Park before. Fancy 750 entries! Yes, that was the number; and the host of trainers, backers and managers were alert, and used liniment on the limbs of their charges regardless of expense. The writer was greeted by racing men of high and low degree. The "champion of champions," Zimmerman, and George Taylor, looked fit and ready to do battle for Raleigh and blue rims. Windle was off color. So was Tyler; but the hero of two continents was fairly among the records, scoring his mile in competition in 2:16 2-5, another world's record. It would be a dull day if Zimmerman did not get among the records. Taylor did 2:17 a few minutes later from scratch, which shows that he is moving to some tune also. Berlo was all broken up and could not do anything, and the Chicago men were not much better. Van Sicklen stated that he was not feeling well, but he felt well enough to ride a remarkable race in the two-mile handicap which he won in good style.

Lumsden rode poorly and Munger worse, so there cannot be much expected from the "great and glorious" on this trip.

Munger forgot himself after his heat and struck the inoffensive Carl Hess a hard blow in the face while the latter was on his wheel, "for getting in his way or crowding him," as he expressed it. A magistrate who was on the ground wanted Hess to swear out a warrant for Munger's arrest, but the latter immediately apologized and peace reigned. Munger caused many comments not complimentary to himself. He is not a very careful rider as his falls testify, and everybody knows Hess to be a well-be-

haved young man. "Birdie" should have a guardian when away from home.

The crowd at the park numbered about 2,000, and the trial heats, as announced, took from 1:30 to nearly 7 o'clock to get through, being finished in semi-darkness. All the old-timers seemed to be on hand, and the old track was never in better condition for fast time, although the atmosphere was damp and chilly. The hotels are crowded to the doors to-night. What will they be to-morrow when the mob arrives? Some of them will have to camp out to a certainty, and the grand stand is likely to furnish accommodations for some sleepers before the races are over.

Overman's band is playing in front of the Springfield Bicycle Club house to-night, and ten thousand people are present on the circus ground opposite. All is bustle in the club house, and the various officials are doing heavy work.

One of the mile heats in a handicap was won in 2:13, which speaks volumes for what can be expected before the tournament is over.

It is estimated that ten thousand strangers will be here by 10 o'clock to-morrow, and the first day's attendance bids to be a record one. Among the visitors is noticed A. G. and John Spalding, the Overmans of Boston and Washington, J. B. McCune, Colonel Pope, Albert Pope, Jr., George Hendee, Fred Patee, Harry Rouse, George Collister, C. A. Dimon and other big guns too numerous to mention.

From the look of the trials to-day the scratch men will have little luck in the handicaps, and it looks as if Zimmerman and Taylor will finish in that order in the great race for the gee-gees.

Five men went down in the second heat of the novice race, C. E. A. Kelley breaking his collar bone and Porter, of New York, getting cut up badly.

RESULTS OF THE DAY'S RACING.

One mile novice—First heat—E'well, 1; Hartford, 2; Bagg, 3; time, 2:58 1-5.

Second heat—Dyer, 1; Willis, 2; Staunton, 3; time, 2:41 4-5.

One mile, 2:30 class—First heat—E. A. Nelson, 1; Campbell, 2; Inslee, 3; time, 2:47 1-5.

Second heat—Williamson, 1; Relph, 2; Murphy, 3; time, 2:33 2-5.

One mile, 2:50 class—First heat—Olmstead, 1; Hartford, 2; Moore, 3; time, 3:03 1-5.

Second heat—Bagg, 1; Thompson, 2; Stacy, 3; time, 2:48 4-5.

Third heat—Nelson, 1; Andrews, 2; Wettergreen, 3; time, 2:46.

Two miles, 5:40 class—First heat—Wunder, 1; Robertson, 2; Brandt, 3; time, 5:30 2-5.

Second heat—Stacy, 1; Robson, 2; Mordt, 3; time, 6:05 2-5.

Half mile, open—First heat—Zimmerman, 1; Taylor, 2; Wheeler, 3; Lumsden, 4; Hess, 5; time, 1:10.

Second heat—Tyler, 1; Taxis, 2; Rhodes, 3; Banker, 4; Windle, 5; time, 1:11 4-5.

Half mile, 1:25 class—First heat—Thompson, 1; Elwell, 2; Olmstead, 3; time, 1:11 4-5.

Second heat—Wunder, 1; H. B. Martin, 2; C. F. Martin, 3; time, 1:10 2-5.

Third heat—Sydney, 1; Whitten, 2; Stacy, 3; time, 1:11 1-5.

One mile, 2:40 class—First heat—Nelson, 1; Murphy, 2; Andrews, 3; time, 2:17 2-5.

Second heat—Wunder, 1; Warren, 2; Robson, 3; time, 2:56 1-5.

Half mile, open—First heat—Tyler, 1; Taylor, 2; Banker, 3; time, 1:14 3-5.

Second heat—Zimmerman, 1; Taxis, 2; Lumsden, 3; time, 1:11 3-5.

Third heat—Windle, 1; Rhodes, 2; Campbell, 3; time, 1:10 4-5.

One mile, 2:25 class—First heat—Wheeler, 1; Taxis, 2; Arnold, 3; time, 3:05 3-5.

Second heat—Rhodes, 1; Murphy, 2; Banker, 3; time, 3:01 3-5.

One mile, world's record—First heat—Tyler, 1; Windle, 2; Bliss, 3; Lumsden, 4; time, 2:54.

Second heat—Smith, 1; Rhodes, 2; Taylor, 3; Dornitge, 4; time, 3:15 1-5.

Third heat—Zimmerman, 1; Taxis, 2; Wheeler, 3; Hess, 4; time, 2:55 2-5.

Half mile, 1:15 class—First heat—Williamson, 1; Dornitge, 2; Warren, 3; time, 1:10 3-5.

Second heat—Broadhead, 1; Inslee, 2; Murphy, 3; time, 1:10 2-5.

Half mile, 1:20 class—First heat—Wunder, 1; Robertson, 2; Robson, 3.

Second heat—Cronin, 1; Clapp, 2; Bahl, 3.

Third heat—Murphy, 1; Keltie, 2; Warren, 3.

Half-mile, handicap—First heat—Pole, 65 yds., 1; Dyer, 75 yds., 2; Draper, 45 yds., 3; Zimmerman, scratch, 4; time, 1:04 3-5.

Second heat—Tyler, scratch, 1; Staunton, 75 yds., 2; Sims, 65 yds., 3; Bliss, 20 yds., 4; time, 1:03.

Third heat—C. F. Martin, 65 yds., 1; Taylor, scratch, 2; Warren, 50 yds., 3; time, 1:06 2-5.

Fourth heat—Campbell, 30 yds., 1; Williamson, 35 yds., 2; Murphy, 30 yards, 3; time, 1:05 1-5.

Fifth heat—Wells, 35 yds., 1; Arnold, 30 yds., 2; Nelson, 40 yds., 3; Van Sicklen, 35 yds., 4; time, 1:03 1-5.

Two-mile, handicap—First heat—Zimmerman, scratch, 1; Munger, 50 yds., 2; McDuffee, 75 yds., 3; time, 4:51.

Second heat—Nelson, 150 yds., 1; Relph, 185 yds., 2; Hartford, 300 yds., 3; time, 4:44.

Third heat—Van Sicklen, 35 yds., 1; Williamson, 110 yds., 2; Porter, 100 yds., 3; time, 4:39.

One-mile, handicap—First heat—Herman, 80 yds., 1; Robertson, 110 yds., 2; Thompson, 85 yds., 3; Zimmerman, scratch, 4; time, 2:16 2-5.

Second heat—Grant, 110 yds., 1; Bliss, 40 yds., 2; Taylor, scratch, 3; Lumsden, scratch, 4; time, 2:16 2-5.

Third heat—Bernhard, 115 yards, 1; Fuller, 90 yds., 2; Williamson, 65 yds., 3; Arnold, 65 yds., 4; time, 2:15 1-5.

Fourth heat—Nelson, 85 yds., 1; Robinson, 120 yds., 2; Merrill, 140 yds., 3; Whitney, 100 yds., 4; time, 2:16.

Rain Causes a Postponement.

SPRINGFIELD, Mass., Sept. 14.—(Special telegram)—Despite President Miller's arrangement with the weather bureau, rain fell very heavily last night and most of to-day. Racing was therefore out of the question, and the club was reluctantly compelled to announce a postponement until to-morrow.

My prediction of yesterday has been amply fulfilled. Every train brings a heavy load, and to-day there are probably more riders here than ever before.

A telegram was received here to-day stating that Washington Park, Chicago, had been secured for races in October. On the strength of this, I understand Zimmerman has promised to go west.

Chicago men are well pleased with their work yesterday, and expect to win several prizes.

Zimmerman at Last Defeated.

SPRINGFIELD, Mass., Sept. 15.—(Special telegram)—The weather to-day fully makes amends for yesterday's disappointment. It is glorious. The track is in grand condition, and there are nearly ten thousand people on the grounds. An even larger crowd is expected to-morrow, when the world's record race will be run.

A parade occurred this morning, headed by the Overman band and the Springfield B. C. Then followed Geo. A. Perkins of Boston and D. E. Miller, president of the Springfield club, and after them Colonel Burdette and many representatives of "royalty."

Racing commenced at 2:30 under the following officials: H. E. Raymond, referee; Dr. G. Carleton Brown, Fred Patee, Alonzo D. Peck and Springfield's old favorite, George Hendee, judges; the Whipple brothers, O. N. and C. E., both

old and faithful officers, W. H. Jordan and W. C. Marsh, timers.

ZIMMERMAN BEATEN BY TWO MEN.

The novice race created but little excitement, but in the next event, the mile invitation, Zimmerman was defeated by both Tyler and Windle. Tyler is a member of the club here, and it had been announced that at this meet he would make the effort of his life to defeat all comers. In this event he was successful, but the greatest dissatisfaction prevailed.

Many believed that Zimmerman had been prevailed upon to allow the local man to win, a suspicion not deserving the least credence.

Zimmerman needs rest. He has done enough work for a horse, and the effects were visible to-day when he was twice defeated. To people who have watched him before it was easily seen. Heretofore his last rushes, often on the outside of the track and on the rough portions, have been unparalleled. To-day they were lacking. Taylor beat him in the mile handicap, and Lumsden ran within a yard of him in the half.

WINDLE TO THE FRONT.

Windle rode well in the half-mile handicap, winning the final in 1 min. 52 2-5 sec. In this event Lumsden, 10 yards, and Munger, 20 yards, were passed, apparently with ease. The former rode well in the half-mile open, however, for although unable to beat Zimmerman, he finished ahead of Tyler.

In the mile handicap Taylor, from scratch, beat Zimmerman and the competition record at the same time. Although he did 2 min. 15 2-5 sec., however, he could get no better than fourth. Zimmerman attributed his defeat to the fact that he was unable to get through, while Taylor was more fortunate.

SUMMARY:

One-mile, novice—T. A. Dyer, 1; F. Hubbard, 2; W. O. Staunton, 3. A procession to the last quarter, when Dyer spurred suddenly and won by ten yards, five between second and third men. Time, 2:38 1-5.

One-mile, invitation—Tyler, 1; Windle, 2; Zimmerman, 3. Great interest was taken in this event. G. W. Wells, of Toronto, made pace to the quarter, and then Munger took a turn, leading until the three-quarter pole was reached. At this point Tyler was alongside him, followed closely by Zimmerman and Windle. By this time the remainder of the field, consisting of Wells, Berlo, Taylor and Taxis, were out of it. At the last quarter Tyler made his effort and secured a lead which the others could not overcome. Windle also left Zimmerman a yard or two and their positions were not changed to the finish. Tyler won by a yard amid the utmost enthusiasm. Windle the same distance ahead of the champion. Time, 2:31 4-5.

One-mile, 2:30 class—W. S. Campbell, 1; C. W. Dornitge, 2; F. N. Herman, 3. Ten started. Williamson made pace for the first lap. Campbell came to the front at the last quarter and won by two feet. Time, 2:30 1-5.

One-mile, 2:50 class—C. S. Thompson, 1; A. W. Olmstead, 2; C. T. Nelson, 3. There were nine starters at the outset. Blakey went to the front and stayed there until after passing the quarter. Olmstead took the lead at the three-quarter pole, but was easily passed by Thompson in the stretch. The latter won easily. Time, 2:31 3-5.

Half-mile, handicap—First heat—A. R. S. Williamson, 35 yds., 1; C. W. Dornitge, 30 yds., 2; P. J. McDuffee, 70 yds., 3; W. S. Campbell, 30 yds., 4; time, 1:06 4-5.

Second heat—A. E. Lumsden, 10 yds., 1; L. D. Munger, 20 yds., 2; A. W. Warren, 50 yds., 3; C. T. Nelson, 75 yds., 4; time, 1:09.

Third heat—A. H. Davis, 70 yds., 1; W. O. Staunton, 70 yds., 2; G. M. Wells, 20 yds., 3; C. F. Seeley, 55 yds., 4; time, 1:10.

Fourth heat—E. A. Nelson, 25 yds., 1; J. D. Crolin, 75 yds., 2; H. B. Martin, 75 yds., 3; W. W. Windle, scratch, 4; time, 1:06 3-5; Windle's time, 1:06 4-5.

Final heat—W. W. Windle, scratch, 1; E. A. Nelson, 25 yds., 2; R. S. Williamson, 35 yds., 3.

Windle worked his way through his field magnificently, caught and passed the men up to twenty-five yards in the first 200 yards and defied all their efforts to hang on. Fifty yards from the finish he was in front and of course won easily, Nelson beating Williamson by a foot. Time, 1:05 2-5.

Two miles, 5:45 class—Hugh Robson, 1; J. A. Merdt, 2; A. W. Stacy, 3. A procession until the

last quarter, when Robson let out and won easily. Time, 5:31 2-5.

Half-mile, open—Zimmerman, 1; Lumsden, 2; Tyler, 3. Chicago rejoiced over this event, for Lumsden beat everyone but Zimmerman. George Banker cut out the work for half the distance, and then Zimmerman rushed by, winning by a yard. Time, 1:09.

Half-mile, 1:25 class—A. H. Davie, 1; H. T. Wunder, 2; H. B. Martin, 3. This at first seemed a good race, but eventually Davie won by ten yards. Time, 1:12 3-5.

One-mile, handicap—H. B. Arnold, 85 yds., 1; E. A. Nelson, 85 yds., 2; J. P. Bliss, 40 yds., 3; George A. Taylor, scratch, 4. Taylor, Zimmerman and Lumsden started from scratch. It was a magnificent race all the way. The eastern pair paced alternately, Zimmerman to the quarter, Taylor to the half. Then the latter remained in front, reaching the three-quarters in 1:41 1-5. He could not catch the leaders, however. Arnold won handsily by a yard, less than five yards covering five men. Zimmerman finished sixth. Taylor's mile, which, with the three-quarters, is competition record, was 2:15 2-5.

**

Will Race at Chicago.

SPRINGFIELD, Mass., Sept. 15.—(Special telegram.)—The Chicago delegation has secured promises from a number of eastern racing men to attend the Chicago races in October. Among those who have promised are Zimmerman, Tyler and Taxis. Zimmerman is much perturbed over the supposition that he allowed the other fast men to beat him. He will rest awhile after this week.

**

Zimmerman Regains His Laurels.

SPRINGFIELD, Mass., Sept. 16.—(Special telegram.)—On this, the closing day of the diamond tournament, the weather is simply magnificent for the spectators. Your correspondent has never seen an attendance to compare with that at this moment gathered at Hampden Park. A club official, who has seen nearly all the big crowds here, estimates the attendance at fifteen thousand.

The track is simply superb.

Zimmerman certainly looks off-color, and his friends cannot disguise their disappointment. The champion stated to a REFEREE representative, however, that he is by no means dispondent, and will make every effort possible to uphold his position this afternoon.

A photograph exhibited in the press stand shows clearly that Bliss was second in yesterday's one mile handicap.

Governor Russell and staff, accompanied by President Miller, have just entered the judges' stand, and met with an enthusiastic reception.

A rather strong wind is blowing and will interfere with the riders, somewhat, on the finish.

Full details of the racing will be found in the following

SUMMARY.

One mile, 2:40 class—E. A. Nelson, 1; C. M. Murphy, 2; Wunder, 3. This was a grand race all through. At the outset Murphy made the pace, and for the first half was not headed. At three-quarters Nelson took up the running and won by a length. Time, 2:34 3-5.

Half mile, open—Zimmerman, 1; Taylor, 2; Lumsden, 3. The starters were Windle, Zimmerman, Taylor, Taxis, Lumsden, Rhodes and Campbell. At the outset Taxis took the lead, but was only permitted to retain it for a hundred yards. Then Zimmerman rushed to the front, and was never headed. The champion won by five yards, proving, or at least seeming so to do, that the reports so industriously circulated as to his condition were untrue. Lumsden was a good third. Windle finished in fifth place, a dozen yards behind the winner. Time, 1:12 1-5. Last quarter, 29 4-5.

One mile, 2:35 class—C. W. Dornage, 1; H. C. Wheeler, 2; G. W. Wells, 3. Banker went away in front at a fair pace, closely followed by Bliss. At the half Hess took a turn at pacing. Nearing the last quarter Banker, Bliss and Rhodes went down in a heap. Two hundred yards from home Milliken, the Baltimore man, was leading, but a splendid effort by the Buffalo man landed him a winner. The Toronto man, Wells, was a good third. Time, 2:38 4-5. The race was declared off.

Half mile, handicap—E. A. Nelson, 40 yds., 1; A. W. Warner, 50 yds., 2; W. C. Stanton, 75 yds., 3. The plucky little Chicago rider, Bliss, came out for this event. There was an immense field

of starters. Bliss started from scratch, and caught the big bunch ahead of him at the quarter, but to get through was impossible. Nelson made a splendid effort in the straight and won a good race by two yards. Time, 1:07 3-5.

Two miles, 5:30 class—McDuffee, 1; W. S. Campbell, 2. A field of moderate performers appeared, and J. C. Wettergreen led them at an easy pace to the quarter. Then the Boston boy, McDuffee, and Campbell rode side by side in the lead to the half. Morfit then took up the pacing, followed, at the end of a mile, by Broadhead. At three-quarters of the journey Wettergreen spurred furiously, passing both McDuffee and Campbell. They collared him again one hundred yards from the finish. The finish between Wunder, McDuffee and Campbell was a corker, the Boston man winning by a foot, and Campbell less than a yard behind second man. Time, 5m. 53 1-5s.

THE WORLD'S RECORD RACE.

One mile, world's record race—Zimmerman, 1; Windle, 2; Taxis, 3; Taylor, 4; Tyler, 5. Naturally enough, the greatest excitement prevailed when the men walked to the mark for what was expected to be the most memorable event of the season. And it was a field calculated to create excitement in the least excitable of men. All those who possessed the slightest chance of success turned out, and the field was probably the most representative of America's riders that could possibly have been gathered. Windle and Tyler, the Massachusetts representatives, were called to the judges' stand and extended the best wishes of Governor Russell, while the New Jersey man's adherents made Rome—or rather Springfield—howl with an enthusiastic demonstration in behalf of their favorite. And richly they all deserved it. The people are now thoroughly satisfied that the racing is absolutely fair and square and that every man engaged in this event was there to win, if all the energy he could put into use could accomplish that object. As the men stood at the mark, the magnificent prize for the event, a carriage and pair of horses, valued at \$1,000, was driven on to the track. The noisy crowd did not stop cheering and calling the names of favorites even when the men were all ready.

At the pistol-shot, George Smith, the Riverside champion, jumped away with the lead, and, with his lightning spurt, which carried him so well through in his recent quarter-mile record race, opened up a gap of twenty-five yards in the first quarter. Keeping up his pace, he passed the half-mile post fifteen yards in the lead, by this performance securing two diamonds offered to the leader at each quarter. Then Hess took up the game, and, leaving the field, passed Smith, who was fast tiring, soon after the half. Zimmerman and Windle were close behind him, however, each intent on the final result, and paying no heed whatever to the gew-gaws offered for intermediate distances. The Millbury man went up to Hess, but dropped back again. Hess and Dornage were the leaders at the quarter pole, and here, of course, the great struggle began. Tyler, who had been riding quietly, and preserving all his strength, went to the front, followed closely by Taylor. At this time Windle and Zimmerman were on the pole and remained there until fairly in the straight. Then the great Jersey rider went through the gap ahead of him into the lead. Windle, right after him, challenged resolutely for the premier position, and gained slightly, reaching his rivals pedals. But he was unequal to the task, for Zimmerman, with that marvelous spurt which has made him the greatest rider of the world, soon placed the result beyond doubt. Fifty yards from home it was all over, and Zimmerman won by five yards, Windle second, Taxis third, Taylor fourth and Tyler fifth. A strong breeze was blowing down the straight as the men finished. Time, 2:31 3-5.

It is useless to attempt to describe the scene of excitement which followed the race. The winner was enthusiastically, wildly cheered, and was congratulated by the governor and by every one who could get near him. Through it all he maintained the same modest exterior which has made him famous.

Half mile, 1:15 class—R. S. Williamson, 1; A. W. Warner, 2; C. M. Murphy, 3. Eight men turned out. There was a fight for position all through. Williamson assumed command three hundred yards from the finish, and after a rattling race beat Warner by a yard. Time, 1:13 2-5.

Two miles, handicap—J. P. Bliss, 70 yds., 1; McDuffee, 70 yds., 2; R. S. Williamson, 110 yds., 3. Bliss soon caught the limit men, and, riding with excellent judgment, came away a furlong from home and beat McDuffee about two yards. Time, 4:54 1-5.

Half mile, 1:50 class—C. M. Murphy, 1; A. W. Warren, 2; Wunder, 3. The riders were bunched from the start until well into the stretch. Here Murphy's experience told and enabled him to beat Warner by a yard. Wunder was ten yards away. Time, 1:09 1-5.

One mile, 2:35 class—This, the second attempt, ended in another fizzle. A time limit of 2:35 was imposed, and this time was not approached. The riders loafed in in 2:57 2-5. Race declared off finally.

This closed the regular programme, but the men were not yet satisfied, and

made a number of successful onslaughts on the records.

THE MILE RECORD BEATEN.

Tyler tried the mile, standing start. He was poorly paced, the Murphy brothers and Banker going the first half on a triplet, Taxis the third quarter, and Nelson the last. There was a tremendous shout when the announcer stated that the Springfield lad had covered the distance in 2m. 8 4-5s. His quarters were: First, 35s.; second, 1m. 5s.; third, 1m. 35 4-5. Of course, all Springfield is jubilant over the performance.

The Murphy brothers and A. C. Banker rode the triplet a half-mile in 1m. 1s., and Herman and Fuller covered a mile on a tandem in the record time of 2m. 17 4-5s.

**

Races at Washington Park.

The prospects of a couple of days' sport at Washington Park are excellent. The Chicago C. C. has about completed arrangements for the track, and Zimmerman, Taxis, Tyler and others have promised to attend. The list of events will be completed and sent to Philadelphia, where they will be announced Monday.

The Washington Park people have undertaken to put the track in the best possible condition.

October 21 and 22 are the dates.

Since writing, the following programme has been arranged:

First day—One mile, novice; one-mile, 2:25 class; half-mile, handicap; three-mile, invitation, handicap; quarter-mile, open; two-mile, open.

Second day—One-mile, 2:40 class; two-mile, 5:00 class; one-mile, handicap; two-mile, handicap; half-mile, open; one-mile, dedication; half-mile, handicap, final. Entries close a week ahead, with C. P. Root, this office.

Thinks the League Can't Stop Him!

Ludwell Cox of Abingdon, Ill., has been declared a professional by the racing board. This fact was published in the *Bulletin* some time since, but the racing board is anxious to circulate the affair very thoroughly in this section, so that the party may be prevented from competing in amateur races, and that he may be taught a lesson which he will not soon forget. The board is particularly anxious in this particular case, as Mr Cox has taken the pains to write a letter to the board "cussing" it up hill and down. He also takes particular pains to knife the league, and claims that it cannot stop his racing; that he does not belong to the league, never has and don't want to, and will do all he can to harm it. This being the case, it is thought best for the good of the cause of organized sport to make his suppression as severe as possible. Race meet promoters will please take notice.

* * *

Coming Events in Ohio.

The Springfield, Ohio, wheelmen will hold a race meet at the Clark County fair grounds Sept. 20. The track is a half mile and fast. The Cadet band has been engaged for the event. Below are given a few of the best prizes offered: Model B Victor pneumatic, silver cup, gold medal, \$50; gold medal, \$30; bronze figure, bicycle suit, opera glasses, gold headed cane, gold watch. Besides these there will be many more valuable prizes to be used for seconds, thirds and fourths. Programmes and entry blanks are ready for distribution to any one desiring them.

* * *

The Record Raised Again.

Stephane, the French rider, has again beaten the twenty-four hour record. At

Paris, on Tuesday and Wednesday, he covered the wonderful distance of 421 miles, 437 yards. This is the second time Stephane has accomplished this feat. In July he rode 392 miles, 892 yards on the same track—the famous Buffalo. Then Shorland, in a race at Herne Hill, did 413 miles, 1,615 yards, which stood until Wednesday.

* * *

Columbians on the Road.

To the Columbia Wheelmen, Chicago, belongs the honor of holding the greatest club road race on record. The club's membership is 153, all but twenty of whom are riders. There were 113 entries. Owing to the fact that a change of arrangements was necessary, but

H. L. NELSON.

sixty men started. It had originally been intended to hold the race on Sunday morning, but the park authorities refused a permit. Sixty-three prizes valued at \$1000 were offered.

At the starting point a huge tent provided shelter for the contestants, while rope for over a block held the crowd back.

The start was at 4:16, a slight rain falling throughout the race, making the newly laid boulevard very heavy traveling. Yet Fred Nessel, of Waukesha fame, and Emil Ulbrecht rode the ten miles in 30:21, finishing six inches ahead of Ulbrecht. L. Tagholm, the other scratch man, made 30:30; J. A. Erickson, 30:50; J. S. Olsen, 31:10, and W. J. McMahon, 31:45. The latter rode nine miles on a broken saddle, and will be allowed to ride the first five in another contest, for a place on the team of 1893. H. L. Nelson, the winner of Saturday's contest, is but eighteen years of age, has ridden but a year, and works for A. C. McClurg & Company.

SUMMARY.

Plc.	Name.	Handcp.	Time.
1	H. L. Nelson	3:30	3:00
2	W. Bainbridge	1:30	31:02
3	S. C. Clark	2:30	32:30
4	O. Smith	3:00	33:02
5	A. Price	2:45	32:49
6	Alf Norman	3:45	33:51
7	H. MacLagan	1:00	31:20
8	O. E. Olsen	1:00	31:22
9	G. S. Olsen	1:45	31:10
10	F. Erickson	4:15	34:32
11	W. J. Doyle	1:30	31:50
12	Fred Nessel	scratch	30:21
13	Emil Ulbrecht	scratch	30:21
14	H. March	1:00	31:25
15	E. J. Conser	3:00	33:29
16	L. Tagholm	scratch	30:30
17	J. A. Erickson	3:45	30:55

Zimmerman in New York.

Arthur Zimmerman had a "soft snap" in the two-mile championship, given with other athletic events last Saturday at Manhattan Field, New York, before about 2,000 people. Only Banker, of the fast division, opposed him, and Zimmerman was as pleased in 5:28 1-5, Carl Hess, the ever green German, taking third.

TELEPHONE CYCLES

WIN RACES!

They are FAST, STRONG and DURABLE. No better wheels built. Our QUEEN and RACERS weigh, all on, 36 pounds. The lightest Ladies' Wheel on the market. The MODEL D. weighs 36 pounds, and is "a bird."

Kirkwood, Miller & Company,

Send for Catalogue.

PEORIA, ILL.

The New York A. C. scored fifty-eight points in the meeting to the Manhattan Athletic Club's fifty-one; the worst blow to the latter being the defeat of their mile champion, Conneff, and the walk-over for Zimmerman against their cyclists.

Races at St Johns, Mich.

ST. JOHNS, Mich., Sept. 12.—The third biennial race meet of the St. Johns (Mich.) Wheelmen was favored with the usual fine weather and was a success in every particular. Below is a summary of the day's racing:

Sixteen-mile road race—twenty starters—First prize was won by Charles Parker, Goshen, Ind.; time prize by R. Loomis, Lansing, scratch, in 51:30.

One-mile, novice—six starters—R. Loomis, Lansing, 1; H. E. Beecher, Detroit, 2; time, 2:45.

One-mile, open—First heat—W. B. Hurlburt, Detroit, 1; F. F. Rough, South Bend, 2; time, 2:46 3-5.

Second heat—E. L. Reichle, Saginaw, 1; M. W. Thompson, Jackson, 2; time, 2:58.

Final heat—F. F. Rough, 1; E. L. Reichle, 2; time, 2:52 1-5.

Two-mile, handicap—eleven starters—C. H. Weld, Marshall, 175 yds., 1; Charles Parker, 220 yds., 2; time, 5:25.

One-mile, club championship—four starters—A. Smith, 1; J. Davies, 2; time, 3:07 1-2.

Five-mile, handicap—twelve starters—F. F. Rough, 2:40 yds., 1; C. H. Weld, 450 yds., 2; time, 14:05 2-5.

Quarter-mile dash—seven starters—E. L. Reichle, 1; M. W. Thompson, 2; time, 38 1-5.

Special race for farmers only, one mile—five starters—E. H. Westbrook, Marine City, 1; S. D. Trove, Penamo, 2; time, 3:02.

Half-mile dash—seven starters—F. F. Rough, 1; M. W. Thompson, 2; time, 1:18 2-5.

ROBERT G. STEEL.

Good Sport at Kalamazoo.

Kalamazoo's tournament last Saturday was a well attended and successful affair and some good sport was seen, though no remarkable times were made. The results were as follows:

Mile, handicap—Caselton, Battle Creek, 1; Haigh, 2; Jones, Battle Creek, 3; time, 3:00.

Half-mile, scratch—Bradford, 1; Hawcroft, 2; Vyne, 3.

Mile, handicap, boys—Stimpson, 1; Murphy, 2; Baretts, 3.

Mile, handicap, Kalamazoo championship—Flansburg, 1; Haigh, 2; Campbell, 3; time, 2:55.

Three-mile, handicap—Casterlin, 1; Bradford, 2; Jones, Battle Creek, 3; time, 10:50.

Half-mile, scratch—Casterlin, 1; Flansburg, 2; Jones, Battle Creek, 3; time, 1:22 3-4.

Quarter-mile—Casterlin, 1; Flansburg, 2; Jones, Battle Creek, 3; time, 41 1-4.

Five mile, handicap—Jones, Battle Creek, 1; Henshaw, 2; Bradford, 3; time, 17:25.

* * *

Open Events at Elgin, Ill.

These events, open to all amateurs, occur at Elgin, Ill., Oct. 1: Half, one-mile and two-mile scratch, half, one-mile, two and five-mile handicaps. There are also two events for Elgin riders. Entries close Sept. 22 with H. H. Everett, Elgin, or at Spalding's.

* * *

What They think of Us.

This is from a Springfield paper: "The Chicago delegation come ramping from the making of mythical records on the kite shaped tracks of the western wilds."

* * *

Another West Side Failure.

The west side track scheme has gone up. The committee to whom the matter was referred reports that their offers to the people who own the ground selected were absolutely refused.

* * *

A Canadian Programme.

At the Wanderers' Bicycle Club meet, to be held on Sept. 24, at Rosedale track, Toronto, the following events occur: One-mile safety, handicap; quarter-mile, open, flying start; two-miles, 2:50 class; half-mile, open; one-mile, 2:40 class; one-mile, open; three-mile, handicap, club only; half-mile, handicap; two-mile team race, open to Canadian clubs only; three men to a side—Wells,

Nash, Hyslop, Smith, Carman and Palmer barred; five-mile, handicap. For further information apply to the secretary, 136 King street East, Toronto, Ont.

* * *

Race Notes.

There will be races at Freeport, Ill., on Friday of this week.

At Island Park, Fairfield, Me., a new quarter-mile track is being built.

The Illinois club has about seventy entries for its ten-mile handicap road race Saturday.

A survey of the ten-mile course from Humboldt to Douglas Park, Chicago, and return, shows it to be one-sixteenth of a mile too long. Ulbrecht's record of 28:42 1-5 over this course, was American record until Harry Hall lowered it one-fifth of a second.

Morrison, of the Lincoln club, is still in a hospital at Columbus, O., owing to his fall in the races, when ten or more stitches were taken in his leg.

It is reported that W. C. Jones (2:20 1-5) once record holder, is coming to the front again. He has got to go fourteen seconds faster than he ever did to be in it.

The Milwaukee Wheelmen's races at National Park, which were to have occurred Saturday last, were postponed until to-morrow because of rain. A number of Chicago men have entered.

To-day the wheelmen of Grand Rapids, Mich., will give a club race on the North Park track, if it can be secured, otherwise on the highway. The race will be open to all Grand Rapids wheelmen.

Several interesting events took place last Friday at Davenport, Ia., the occasion being the third annual tournament of the Davenport Fair and Exposition. William Schmidt captured the mile county championship medal in 2:55.

Oscar Kobs won the novice race in 2:50 1-2; also the 3:30 class in 3:02. The half-mile, open, fell to F. H. Clifford of Muscatine in 1:24; also the quarter in 38 sec. C. C. Schmidt, 110 yards, was first in the three-mile handicap, and C. T. Roychaus won the boys' race.

There will be plenty of sport for Chicagoans Saturday. The Illinois and Lake View Cycling Clubs hold ten-mile handicaps; the Minnette Cycling Corps, Ravenswood Cycling Club and Madison Road Club five-mile handicaps, and Stackpole's tournament occurs at Park-side.

At the Trenton (N. J.) Driving Park, Sept. 5, three bicycle races were run in connection with the horse races. The results follow:

One-mile, handicap—H. I. Wunder, 15 yards, 1; J. A. Mead, 15 yards, 2; time, 2:31 1-2.

Half-mile, handicap—F. Danielberger, 60 yards, 1; W. S. Rich, Jr., 50 yards, 2; time, 1:00 1-2.

Two-mile, handicap—H. I. Wunder, 50 yards, 1; A. H. Rogers, scratch, 2; time, 5:20 1-2.

The programme for the Racine Wheelmen's races, to take place at the exposition grounds on Sept. 24, are being issued. There are seventy-two entries and the affair promises to be a success. There will be a one-mile novice for members of the Racine Wheelmen; one-mile, handicap; half-mile, handicap; quarter-mile, handicap; the fourteen-mile road race and a one-mile race for boys under sixteen years.

At a meeting of the Grand Rapids (Mich.) Bicycle Club it was decided not to hold a race meeting this year, but a committee consisting of Richmond, F. H. Escott and P. S. Hunt was appointed to arrange for a grand meeting next summer. F. M. Lee, P. S. Hunt and W. B. Folger were appointed a committee to arrange for a few races for local riders, and H. W. Stebbins, F. N. Hyman and P. S. Hunt were appointed a committee to arrange for the bicycle races at the West Michigan fair.

LONDON, 33 HOLBORN VIADUCT, E. C.

CHARLES P. SISLEY.

The genial-looking face of Mr. Sisley, of *Cycling*, is presented. Mr. Sisley is the editor of England's youngest cycling journal, but, despite its age, the paper has, by energetic management, attained

probably the largest circulation of any of the English cycling papers. A writer of considerable merit is Mr. Sisley, somewhat given to a practice we cannot commend—that of tooting his own horn—but the maker, nevertheless, of an interesting journal.

The News from Milwaukee.

MILWAUKEE, Sept. 14.—It is not an unusual sight in Milwaukee to see wheelmen riding through our principal thoroughfares at a rate of speed that would seem to rival an express train, much to the discomfit of pedestrians and the inconvenience of all those using the streets. Milwaukee has been remarkably free from oppressive legislation as regards the privileges of wheelmen, and

the rattle-headed scorchers should be made to understand that they must stop their pernicious habit. It would be well when a wheelman sees one of these eyesores on the street to call him down, or the whole fraternity may have to pay tribute to his foolish ways.

A. Cressy Morrison, ex-president of the Milwaukee Wheelmen, is making a tour of the large eastern cities, and will be in Springfield, Mass., during the great diamond meet.

F. S. Hart, who is also doing the east, has this famous racing mecca on the list, and will show up in time for the sport.

Cyrus Williams and Elmer Gray of the Milwaukee Wheelmen, who are at present engaged in touring through France on their wheels, are more than delighted with their trip. The boys will be abroad for about two months, the entire trip covering four months.

P. H. Sercombe, accompanied by his wife, leaves to-day for a short vacation. They will visit Indianapolis, Dayton and other eastern cities, and endeavor to have a general good time. Few men in the bicycle business have worked harder or accomplished more during the present season than Mr. Sercombe.

The Sercombe-Bottle Manufacturing Company will make a special racing wheel for 1893, to weigh from twenty-four to twenty-six pounds. This machine is intended to be great in every particular and a world's record smasher. It will be made to order only.

JACK ROYAL.

"Laurel's" Peoria Chat.

PEORIA, Sept. 12.—The Peoria Bicycle Club has had some very successful runs this summer. Capt. O. C. Mandeville has always a nice run planned for Sunday. On September 18 the boys will leave the club house at 8 o'clock and ride

to Wyoming. After refreshing the inner man they will wend their way back to the club house, the total distance being thirty-five miles.

The second annual century of the Peoria Bicycle Club will be held October 9, leaving the club house at 4 a. m. The exact route has not yet been decided on, but it is safe to say that a good one will be selected. The first century run of the P. B. C. was on Oct. 11, 1891. There were thirty-one started, and twenty of them finished. Each club member who made this century was presented with a fine pen knife as a souvenir.

The Toulon Bicycle Club held a very successful tournament on the 9th. In the five-mile lap race Bert Myers was defeated by H. R. Steensen, of this city. This is the first time that Myers was ever beaten by a wheelman of Peoria. Bert won the quarter-mile and the mile open. The boys all got back Saturday morning, and speak very highly of the Toulon Bicycle Club.

H. G. Rouse had his arrangements about completed for an extended trip to England, but is holding off on account of the cholera scare. The going over part, Harry says, is all right, but when you start back and have to spend twenty days in quarantine it is not so nice.

LAUREL.

The La Crosse (Wis.) Bicycle Club has just been organized with officers as follows: President, Dr. D. S. McArthur; vice-president, E. D. Loomis; secretary and treasurer, F. D. Hopkins; captain, Allan McCord; first lieutenant, Bert Burroughs; second lieutenant, John Hoban.

At Greenville, Mich., Sept. 7, the one-mile heat race was won by A. E. Lovejoy, of Big Rapids, H. A. Cossitt second, C. Johnson third. The prizes were \$100 bicycle, \$75 gold watch, and \$50 ladies' gold watch.

General Notes.

Two Cleveland clergymen are doing the mountains on wheels.

The "banquet" table at Siegel, Cooper & Co.'s looks rather deserted at noon time just at present, and all on account of most of the racing men being out of town, while the few "stayers" who gather around its festive board chew (?) things over among themselves.

A great book is the new road book of the Illinois division, and a great demand for it has already been created. The touring season is at its height. An arrangement for joining the league: A member pays \$1, a non member \$2. Buy one and study the roads of the state.

The Easthampton Cycle Club elected these officers at its annual meeting last week: President, Charles J. Keene; vice-president, Philip Mayher; secretary, H. W. Rust; treasurer, A. A. Goodenough; trustees, C. J. Keene, H. L. Dibble, Charles Keutcher; captain, W. H. Ferry.

Now that the racing men have left town to take in the eastern and western circuits, all will anxiously await the first results, and their trip throughout will be watched by Chicago people with a great deal of interest. The REFEREE will be represented at all meets where they compete, and through its columns its readers will be furnished correct and detailed accounts.

Articles of incorporation have been filed in the office of the secretary of state of Iowa of the Des Moines Cycling Club, the incorporators being Alvah Green, John A. Garver, Fred C. Haywood, Fred M. Stapp, Fred C. McCartney, Jr., George R. Harbach, Charles Reinig, J. Crawford, Clinton Clark and W. C. Harbach. The club is organized as a social affair. The capital stock is \$1,500, divided into 150 shares of \$10 each.

TO HOLD TWO SHOWS.

ENGLISH MAKERS DECIDE TO HOLD
AN EXHIBITION OF THEIR OWN.

The Stanley Show to Be Held at the Agricultural Hall, While the Makers Are Trying to Secure Crystal Palace for February.

[From our own correspondent.]

COVENTRY, Eng., Sept. 3.—Just after closing my last week's letter I learned that at a meeting held on the previous day in Coventry the members of the Cycle Manufacturers' Protective Association had decided to hold a cycle trade's exhibition in London at the end of January on early in February, 1893. The place was not definitely decided upon, but I have it on the best authority that negotiations are in progress with the managers of several buildings, one of which is the Crystal Palace.

At the same meeting a resolution was carried confirming the resolution arrived at a few months ago not to exhibit at any show held during 1892. As may be imagined, the meeting was not altogether a unanimous one. Some of the makers are still as much opposed as ever to shows of any kind, but others, although anxious to adhere to their bond and not exhibit during 1892, are undoubtedly anxious to obtain some means of bringing their goods before the public, and regard a show early in 1893 as the best method of doing so. In the end the men of this way of thinking were found to be in a majority and it is now anticipated that the others will throw in their lot with them.

There is little doubt that many of the firms who have held aloof from shows during the two past seasons have had reason to regret it. Their business may not have decreased, but they have allowed younger and smaller firms to profit by their absence and obtain a footing among the public.

TO-DAY THE ANNOUNCEMENTS ARE OUT

Concerning the Stanley Show which, as I have already told you, is to be held in November. The Agricultural Hall at Islington, a fine, convenient building less than a couple of miles from the very heart of London, is the chosen place, and the show is to open on November 18 and close on the 26th.

Space for exhibits must be applied for before the end of September. The Stanley people are quite confident that the public will look upon their exhibition and regard it as the cycling show. The manufacturers on the other hand are confident that the agents will only visit their exhibition. I fancy that a good many people in the trade and out of it will go to both, and the maker or dealer who desires to catch the favoring gale will do the same. Last year it was urged that by holding the show in November time was allowed for makers to book their orders and work away quietly at completing them before the season opened, instead of having to rush them as they used to do when it was held in January or February. As a matter of fact, now that there are so many more makers,

THERE IS VERY LITTLE RUSH

At any time, and when the show takes place in November it allows time for a complete change of patterns before the riding season really opens. This is what happened this year, and many large stocks suffered greatly in value.

Last Saturday rain quite spoilt all racing and there was a very paltry attendance of the public at Paddington to view

the races held by the Catford C. C., who were running a so-called "international" match against a team from Holland. Owing to various causes the Catfords were only able to put a very indifferent team into the field, and the result was that the Hollanders won easily. Of course, the ordinary newspaper reporter accepted the event at the valuation which the Catford put on it, and people who know nothing of these things have since been waiting over the defeat of "England" by the Dutch.

On Monday was accomplished one of the finest performances done on the road this season. On that day H. Arnold and S. D. Biggie mounted a newly made Hadley tandem tricycle fitted with Michelin tires, and starting with a good breeze behind them, did fifty miles on the road in the marvellous time of 3 hrs. 19 min. F. T. Bidlake was timekeeper and the usual North Road course was followed, so there can be no doubt about the correctness of the performance.

On Wednesday Mr. E. Mushing, of the Centaur Cycle Company, Coventry, left

NOTES AND COMMENTS.

While talking to a horse driver the other day, the conversation drifted into cycling channels. Said he, "You wheelmen are getting to be a dreadful nuisance on the road; I must have met three or four hundred cyclists last Sunday." We said yes, we were out and in a whole day's riding we only met about a hundred carriages. Now, if there are more cycles than carriages, which has the best claim to the road? Who will in time be the nuisance, by taking up room enough for half a dozen cyclists? Echo answers, who?—Bicycling World.

Not a bad bit of reasoning for the superannuated organ, is it? I was out with a party in the country the other day and we met a man driving a very nice team. He had several ladies in his carry-all and seemed to be putting on considerable style. When we came in sight he motioned wildly for us to get out of the world, but beyond giving him his half of the road no attention was paid to him, as the pace had developed into considerable of a scorch and everybody was in a hurry. The gentleman in the wagon saved on his horses (which, by the way, were not nearly so scared as

that they are not tolerated by law-abiding people, or is it perhaps because they are just now going through the unpopular stage of cycling, where prejudice has got its foul grip upon them—that grip that even eastern riders have not entirely shaken off. From personal acquaintance with a large number of coast riders I should think that the latter was the case, for a more whole souled and gentlemanly set of men than San Francisco and Oakland riders (not to mention the splendid fellows in Sacramento and San Jose) I have never met, and I cannot believe that they have been so very, very rude as to ring a noisy bell or to scare the raw-boned nags of any of the editors above mentioned. I think I see traces in the clippings of a very, very small human emotion, one that ought always to be sat upon, merely *spite*.

It is noticed that the man who howls the loudest about bicycles on the sidewalks is the one who keeps the street in front of his premises in a muddy condition with his lawn hose. He is one of a large class of people who ignorantly believe that wheelmen have no rights which anybody is bound to respect. The sidewalk cyclist and the man with the hose are both nuisances which ought to be suppressed.—Findlay (O.) Republican.

Behold, a philosopher, an analyst, a man of brain. And on the daily press, too. The reporter who wrote the above squib ought to have a bigger salary than he is getting, because he is a student, an observer of human nature. I have often noticed that the boor who finds occasion to complain of service, cockery, napkins or drinkables at the public hotel table, is ninety-nine times out of the hundred the man who had poor service, poor grub and mighty little of them at home; likewise the man who is always in trouble with his neighbors is the man with whom no neighbor could possibly get along. The road hog who complains of bicyclists is the man who, if he were driving a dray, would run every other vehicle into the ditch. There seems to be an inherent hogishness in the human family, which combined with prejudice makes what is known as the "conservative man" a heap more unpleasant than the out and out crank. To be sure the crank sometimes goes too far and is nearly always a bore, but the other is always a bore and does not go far enough.

For ten long years I rode an ordinary bicycle, and for six years of that time I was on the machine almost constantly. I owe to it my health and what little worldly wealth I have, and when the safety came in I fought it tooth and nail; and now I fear that, like Samson, it was the jaw-bone of an ass that I used as a weapon, for without doubt the safety is the king of road vehicles. Nevertheless, although I was a good ordinary rider and had the reputation of being one of the road riders and hill climbers of my time, I have never been able to master the safety. That is to say I cannot handle it with any comfort to myself or companion riders. But I have imported a geared ordinary. It is a Crypto, geared to sixty inches, and once more I am in it. To say that the machine is satisfactory is not half expressing it. It is the G. O. O. improved. All the steadiness and comfort are there. It runs easy and is light and noiseless, and I for one feel as though I had met an old friend.

LA COTE MAL TAILE.

The Galveston, Tex., wheelmen have organized a club with the following officers: President, Dr. A. A. Dyer; vice-president, E. Dultz; secretary and treasurer, W. C. Skinner; captain, Morris Noble; executive committee, F. S. Thompson, A. Templeton and George H. Walker.

Liverpool for the States. He takes with him something very special in the form of a racing King of Scorchers safety. He intends to combine pleasure with business, and to be present at some of the fall races.

The Bloomfield (N. J.) cyclers have re-organized with the following officers: President, Howard B. Davis; vice-president, W. S. Phraner; treasurer, William B. Dodd; recording secretary, E. Walter Morris; corresponding secretary, Harry Lake; trustees, F. J. Hall, J. H. Tryon, Harry Thomas; road committee, C. T. Coggeshall, F. M. Cossitt, J. M. Unangst. The club has hired Spragg's Pavilion, on Greenwood avenue, as headquarters.

Here's a good one from the *Guardian*, of Patterson, N. J.: "A young man on a bicycle, coasting down Bogota hill toward the West Shore railroad, ran into the locomotive of an express train. The pneumatic tire caused his wheel to bound back, and the only damage was to the machine, which had one wheel shattered."

the driver) and between "Whoas" antiathematezed bicycles in general and ours in particular, and threatened dire vengeance by "having the law on us." We were out several hours and met possibly ten teams. There were twenty in our party and we met at least twenty other cyclists. Like the *Bicycling World*, I would ask who has the better right to the road?

THE BICYCLIST ON THE COAST.

From the Sacramento Bee.

The Chicago News Record is denouncing a policeman because he clubbed a bicyclist. In Sacramento the citizens would garland the officer with roses.

From the Oakland Times.

And in Oakland they would nominate him for sheriff.

From the Los Angeles Times.

And in Los Angeles they would not only nominate the cuss, but would get right in and elect him by a unanimous vote.

What is the matter with the Pacific coast bicycle riders? Can it be possible that California cyclists are so depraved

THE TOURIST.

The Highest Grade Bicycle in the World. Perfect in Material, Construction and Finish.

Made at Colt's West Armory, Hartford, Conn., under the same system and with the same attention to detail followed in the manufacture of Colt's fine fire arms. Gun steel forgings; all cones and bearing cups cut from the bar, not stamped.

WEIGHT: { Road Racer, 34 lbs., } PRICE, \$150
 { Roadster, 42 lbs., }

Fitted with BIDWELL (THOMAS) PNEUMATIC TIRES, guaranteed against puncture, bursting and leakage.

A GENUINE NOVELTY.

NEW ENGLAND TRADE.

PREPARATIONS GOING ON FOR THE
WORLD'S FAIR YEAR.

Hartford Cycle Company's New Building—Pope's Rubber and Tube Factory Eagle Works Cleaning Up—Sundry Men Busy.

The Hartford Cycle Company's new building is a "hummer," four stories high and 360x45 feet. The building is of brick and was called the Board of Trade building before the Hartford Cycle Company occupied it. At present they use the basement and second floor only. A large clearance already graded alongside, it is said, is to be used for the construction of a factory for Sterling Elliott's Hickory bicycles.

May Have An Athletic Ground.

The new rubber factory and tube works of the Pope Manufacturing Company are nearing completion. The tube works and cottages now being built are in a beautiful location, surrounded by trees and near the railroad. It is rumored that Colonel Pope thinks of building a first class athletic ground with a record-breaking track at the same place, having plenty of ground for the purpose.

The Eagle Flying High.

The Eagle Bicycle Company, of Torrington, shut down last week in order to overhaul boilers and machinery, and will be in running order this week again. Business has been very satisfactory and the Eagle safety stood the work well. Walsh, treasurer, and L. B. Gaylor, superintendent, state that next season's Eagle will weigh about thirty pounds, and they have already a model of same on exhibition, which has been thoroughly tested over all kinds of roads. This company shipped all they could turn out the past season. Among a lot at present at the railroad depot is a fifty-inch ordinary Eagle with pneumatic tires.

To Make the Windle Cycle.

H. B. Arnold, the well-known racing man made a few wheels in New Britain the past summer, and will possibly increase his output next season. Arnold is pretty well off financially, and owns the building he is in and the property adjoining. His grandfather may also put money into the cycle trade with him, and the wheel will be called the Windle, in honor of the famous rider of that name, who is a bosom companion of Arnold's.

Big Firms Making Tools and Parts.

The Hartford Screw Works people state that they supply more parts and screws to manufacturers than any similar concern in America.

Pratt & Whitney, the Hartford tool makers, are making a specialty of tools for cycle manufacturers.

Billings & Spencer, Hartford, of wrench fame, are dipping heavily into the drop forgings and parts trade.

Will Not Make Bicycles.

The New Britain (Conn.) Hardware Company state that the report that they are going to manufacture bicycles is unfounded. They will continue to make parts for the present.

Offers Facilities to Makers.

Wilcox & Howe, of Birmingham, Conn., are engaged in the manufacture of steel forgings for bicycles, and also do a general steel business. Mr. Howe can

offer a manufacturer good inducements to occupy a part of his large works. Plenty of power and room can be had, and also parts for cycle making. R. L. Flynn, a member of the Crescent Cycle Club, of Birmingham, is one of the Wilcox & Howe office force, and is a crack amateur photographer, who with C. E. Horner, of the same club, took some good pictures of the recent meet there.

Sundry Articles and Items.

Pomeroy Brothers, of New Haven, who have advertised so long in the REFEREE, think their oiler can not be beaten, and extensive orders have kept them very busy since last March. They are now coming in for next year. Pomeroy Brothers are also making a number of bicycle parts, such as brass nipples, nuts, washers, screws, etc.

The New Haven Metal Turning Company, who recently placed an oiler on the market, has made a deal with Whittier & Godding of Providence, whereby that lusty young firm became the owners. Frank E. Morgan, secretary of the Metal Turning Company, is interested in other patents appertaining to bicycles.

Reichert, the metal and club pin manufacturer, of 16 Crown street, New Haven, is doing a nice business with his

The Providence Trade.

Belcher & Loomis, hardware dealers, who carry a large line of cycles and sundries, have had a most successful season and are still selling wheels, having disposed of ten last week. They have made a good deal with the New York Belting & Packing Company for tires, and are wholesaling them. They also carry a large line of saddles, bells, etc. Manager of Cycling Department C. E. Monroe stated that several good orders came from the west, which he traced to the REFEREE advertisement. Mr. Monroe takes the road January 1, and will visit all the important New England cities.

RANKIN & BRUCE

are fairly busy and have now one of the most complete repair shops in the country, power being supplied by an electric motor. Some six men are at work converting wheels and repairing, and have several sulkies on hand which they are converting for the horsemen. Mr. Rankin said that the past season has not been a flattering one, and he was not afraid to mention it, but believes another year will make up for the depression. Mr. Monroe (a brother of C. E.) travels for Rankin & Bruce, and is the inventor of the lubricant "anti-squeak."

The Quinton Company's New Roadster.

specialties, and is supplying some wholesalers with badges, pins, etc.

A. M. Stillman, of Hartford, is having a great run on his upright oil can holder, which can be fastened to any part of the frame of a wheel, and the little article is quite ornamental and very useful. A Cushman & Dennison oiler goes with the holder, which is opened by a spring which pushes out the oiler when released.

The Torrington Swedging Company is making a large proportion of the spokes used in this country.

The Barnes Tool Company, New Haven, is turning out a neat and strong bicycle wrench, vest pocket size. The wrench is of the best steel, extremely tough, and warranted free from weakness and imperfections.

The Corbin Cabinet Lock Company, of New Britain, will place an aluminium lock on the market, of neat design and extreme lightness. The firm is one of the largest lock makers in America, and occupies two large buildings.

East Hampton, Conn., is the center and headquarters of bell making in America, no less than five manufacturers being in the little town of 2,000 people. Four out of the five make bicycle bells, but have not pushed them very much as yet.

H. J. Curtis, the Hartford dealer, will improve his home trainer somewhat for next winter's trade, and expects a good sale of the winter conditioner.

WHITTEN & GODDING

are both "at home," and it is pleasing to note that this firm can show on its books the heaviest business of any season it has ever had, being phenomenal. The sale of parts, sundries and the general line of wheels has been "record." The firm has secured the sole agency of the Saladee saddle. Mr. Godding fitted one to a wheel for the writer to try, and it is simply all they claim for it. A neater and simpler saddle is seldom seen. It will soon be illustrated and described in the REFEREE. The oiler referred to in New Haven notes is also a recent acquisition of this firm. Mr. Godding started on a western trip Saturday.

CAMPBELL & COMPANY

are a pretty well known and enterprising firm. Seeing a large crowd looking at their window, the writer expected to find a man explaining the workings of a machine that had a hundred multiplying gears, and which would go a mile in a minute—providing it was on an express train. The cause of the crowd, however, was a couple of bulletins announcing that Zimmerman and Windle had broken records, and a pneumatic sulky in the window, which seemed to fascinate the crowd. Campbell & Company are building the Phantom to order—a strong, extremely light wheel. Their repair shop is a splendid one. Thomas Lahey, the superintendent of same, increases in popularity rapidly, and is the designer of

the Phantom, which does him credit.

TILLINGHAST TIRE COMPANY.

George C. Vose (Councilman George C. Vose) of Tillinghast tire fame, invited your correspondent into his office and talked tire from Alpha to Omega, and talked it well, for the councilman knows his business—both how to award the city contracts, drive his pneumatic sulky behind his 3:40 roadster, and dealing in jewelry. The local paper printed pictures of the councilman, his horse and pneumatic sulky recently. The city father was photographed in City Hall Square in full view of his constituents. I won't attempt to tell all he told me or I might be suspected of owning some stock in the Tillinghast Company, and of inflating the stock a little. Boiled down, the tire talk was this: The Tillinghast will be greater than ever next year. Samples of two or three distinct tires will be ready next week. The new works of the company are up and nearly all the machinery placed in position. In the center of the tread the company will not use the same sort of material as last year, but eight thicknesses of muslin, rubber coated all through. Tests have satisfied them that it is knife and nail proof. The Tillinghast people say that they have not had a bursted tire since last April, and don't expect to have one in the future. A new valve will be one of the features of the next season's tire. Two Boston riders recently rode to Chicago and return on Lovell Diamond wheels and Tillinghast pneumatics without a mishap.

Safety Stolen.

Stolen on Aug. 26, from Van Buren street and Western avenue, Chicago, a combination Clipper, No. 2,114, Morgan & Wright pneumatic tires. Return to Ganse Cycle Company and receive a reward.

THE BOY-CYCLE.

(F. T. Merrill in Portland, Ore., Review.)

An' for 'ave yer bin to? An' phat is it, Terrence? A boy-cycle is it! An' phat is it for? To roide on ashtraddle! Go lang wid yer Terrence, Yer'd break ivery bone in yer back on thar floor.

Now don't ye be thryin' yer thricks wid yer mother;

An' phy wan't ye home to yer supper before?

An' me wid thar baby, an' only yer brother

To draw 'all thur wather an' wait on thur shote.

An' fare did yer buy it? Be truthful now, Terrence.

Phat! from thar Merrill in thar Boy-Cycle Hall?

An' only twenty dollars yer paid 'em, Terrence?

Sure it's chapar he's selling thin things in thur fa!

An' phat is that thing hanging there in thur middle?

A lantern! faix, hang it up over thur door!

'Twill loight up thur notice as foine as a fiddle;

'Here's Mrs. O'Flaherty's Grocery Shote.

Yer han's are that filthy, an' black beyont men-shun;

An' how did it come as your breeches waz tore?

The boy-cycle did it, thur devil's invention;

I'll not have yer roidin' thur thing any more.

Get down from thur, Terrence! Come back you young villin!

Och, mother av Moses! An' ain't there no law,

To punish a poor widdy's son, as ain't willin'

To shopt wid thur mother, an' wait on thur shote?

ON TO WASHINGTON.

LOW RATES VIA THE VETERANS' ROUTE.

Round trip tickets to Washington, via the Baltimore & Ohio Railroad, the "Veterans' Route" to the G. A. R. Encampment, will be on sale at all principal ticket offices in America from September 13th to 30th inclusive, at extremely low rates. The signature of the purchaser of tickets will not be required, nor will they have to be stamped at Washington. They will be good for return journey until October 10th, and will be good to stop off at all stations between Cumberland and Washington—a region familiar to every veteran, because of the warfare along the Potomac. They will also be valid to Baltimore, where the meeting of the Naval Veterans' Association will be held from September 15th to 19th.

THE GREAT NORTH ROAD.

It is the Chief Racing Ground of All England.

LONDON, Sept. 3.—American cyclists who continually read that such and such a race has been run or this or that record has been broken on the Great North Road, will have little idea of what is meant by the phrase. Strictly speaking, the road runs from London to York, but the part of it which is generally used for races and record-breaking is only a small portion, some fifty miles long, and a considerable piece of the course frequently adopted lies in a great measure on branches of the road as well as on the road itself.

The starting place for most of the big events is just outside Hitchin, a picturesque market town in Hertfordshire, with wide, well-paved streets, a venerable old church and a large, open market-place which on Saturdays assumes an air of great stir and bustle. Hitchin, situated thirty-four miles from London,

length the market-town of Biggleswade is reached. The chief industry of the place is carriage building, but to cyclists it is known as

THE HEADQUARTERS OF DAN ALBONE, the proprietor of the Ivel Hotel and founder of the Ivel Cycle Company, L^{td}. The hotel occupies a convenient position at the far end of the town, and is close to the little river from which it takes its name. Originally it was a small inn, but a few years ago, when the cycling fever broke out, its convenient situation in the midst of good roads, and the personal popularity of Albone, its host, who was then a frequent competitor at race meetings and a great favorite wherever he went, caused it to be so well patronized that the accommodation it provided was not nearly sufficient, so the old place was pulled down and the present edifice built on its site.

Since then it has been the temporary stopping place of many. After every long distance race it is simply crowded,

Monday during the summer or at the time of any big road race cyclists may be seen continually passing in or out. At the rear is a large shed where machines are stored, and a few men regularly keep machines there and come down from London each week end to make that their starting place for their journeys a-wheel. It is not everybody who is allowed the privilege of the club, for a club it is although

THE SUBSCRIPTION IS NOT LONG.

To be a member one must also be a shareholder, and in the allotment of shares members of the North Road C. C. have preference. In addition to these are a few of the best riders of the quieter sort, and the remaining members consist of men who take an interest in the sport and whose company is desired.

A few hundred yards away runs the river Ouse, where boating and bathing are freely indulged in. The morning swim is quite one of the events of the day, and some of the men, S. F. Edge,

an-hour gait in a most unconcerned way. The surface of the road, which has up to here been of crushed flint, now becomes mixed with gravel.

A few miles on Cambridgeshire is entered. Sawtry is passed, and then, after negotiating a series of well-wooded and easy slopes, the rider comes to Stilton, famous for its cheeses and as a stopping-place in the old coaching days. The large, rambling old inns with wide spaces in front of them and immense stables at their sides, still remain as relics of past glories.

Scarcely is the town left behind than a stiff rise is encountered. At the top stands

THE NORMAN CROSS INN,

In front of which a road forks off to the right towards Peterboro. The record-breaker as a rule keeps on along the Great North Road for another five miles until he reaches a cross road, where for many years stood a hut locally known as Kate's Cabin—a name of which the ori-

is not on the North Road, but on a loop which leaves the main artery at Welwyn, nine miles south, and rejoins it about the same distance north. The first few miles out of Hitchin consists of a series of easy gradients up and down, and it is not until Henlow Crossing is reached that the famous flats begin which

GIVE THE ROAD ITS NAME

for speed. At Henlow is a railway station, and close beside it the road and the rails cross one another at right angles, and it is just at this point, which lies in Bedfordshire, that the start for the big twenty-four hours' race held by the North Road Club takes place.

For a few miles the scenery is not very interesting. Huge market gardens, whose product consists of vegetables wherewith to supply the great city of London, stretch away on either side, and it is a positive relief to the eye when the little rise to a bridge which here spans a small stream is at last sighted. Then the road, still level, leads through a succession of small villages or hamlets, until at

and during the past few seasons M. A. Holbein, H. H. Spencer, T. A. Edge and others have made it their training quarters and stayed there for weeks at a time preparing

FOR THEIR ONSLAUGHTS ON RECORDS.

At the side of the hotel is the entrance to the Ivel works, which continue yearly to increase and take up more space. Leaving these hospitable quarters, the rider has another series of flats to cross. A slight variation comes when Girtford Bridge is reached and the river Ouse is crossed on its way to Bedford, which is some fifteen miles away on the left. Then over more flats the road, now the Great North Road proper, leads to Eaton Socon.

Here, opposite to the White House Inn, is situated the Cyclists' Country Club. It is a neat little cottage containing some half-dozen or more quietly furnished rooms, and on ordinary days there is nothing to denote that it differs from any other of the many buildings of the same size. But from Saturday to

for instance, are as good in the water as out of it.

A little further down the river is St. Neots, a most delightful little town, to which the men frequently go for fruit, tobacco and other necessities, and still further on is the county town of Huntingdon, where the river is both broader and deeper.

The road from Eaton Socon leads, after a series of slight slopes, along through Buckden, where stands the George and Dragon Inn, until this year the headquarters of the road racing men. Almost opposite to it is a delightful old palace, once the property of the bishops of Lincoln. Past this the road goes along a series of short flats to Alconbury Hill—one of the few hills of any importance on the whole route. A rather short, sharp rise is followed by a few hundred yards of level, and then comes

A LONG, GRADUAL DESCENT,

nearly a mile in length, down which fast times are always made, and men bang along at a more than twenty-miles-

per hour is indistinct. Here, unless he is going on to York, or for a straight-away run before the wind, he leaves the main road and makes over a lumpy but fairly level road for Peterboro, whose cathedral spire stands in bold relief against the sky. If he be going for the fifty-mile record he finds his finishing point just under a railroad bridge before entering the town; if he be going for the hundred-mile he goes a little further to a lamp-post and makes that his turning point. Or, if the wind be behind him, or if he be going on a twelve or twenty-four hours' grind he makes his way through Peterboro, and after perhaps a short stay for food and a change of pacemakers the Saracen's Head, where Mine Host Dell is ever ready to give him a welcome and a word of encouragement, he speeds on across the fen country through Lincolnshire to Bourne, or through Cambridgeshire to Wisbeach. But these are miles away from the Great North Road and must be written of on another occasion.

SYLPH CYCLES
RUN EASY....

MA answer for springs when riding a rigid frame safety, but don't it make them *awful tired* and lame after a long ride on the road, specially if it be a rough road?

NOTICED how wheelmen straighten their legs out and raise themselves in their saddle when riding curbs and other rough places. They do this to avoid the shock, caused by the obstruction.

SO their riders say—and wheelmen don't have to use their knees and legs for springs, either, to save themselves from the bumps and jolts, for the frame of the SYLPH is provided with springs in the right place, which relieves the rider of all the shocks and makes cycling more of a pleasure and comfort than ever before anticipated.

POSITIVELY NO LOSS OF POWER, AND RIGID IN EVERY DIRECTION EXCEPT UP AND DOWN.

WARWICK CYCLE COMPANY CHANGES

Mr. Chamberlain Gives Way to a New President—Capital Stock Increased.

Another large transaction that means much for Springfield's future was consummated yesterday, when Charles D. Rood assumed the management of the enlarged Warwick Manufacturing Company. At the same time the capital

In 1877 Mr. Rood became one of the organizers of the Hampden Watch Company, of which he became director, treasurer and general manager. In 1884 Mr. Rood became president of the concern, without relinquishing his other offices. When the concern was transferred to Canton, O., Mr. Rood severed his connection with the company.—*Springfield Union.*

Recollections of Hartford.

Rain fell after the first day's racing and improved the track.

It was in splendid condition for fast work, and a strong wind favored the riders down the finishing straight. The wind retarded the riders at the half, and on the top corner a little, but its benefit was very observable coming home, so Zimmerman informed the REFEREE representative, who wished him to try the half with paces, believing that there is little doubt he could have come pretty close to the even minute if paced properly. Zimmerman expressed the opinion that he could have done it, but he was evidently satisfied with 1:01 4-5 for the half, which many think will stand for a time as world's record. His quarter in twenty seconds was done in his preliminary heat, being, of course, the last and a flying one.

George C. Smith, the little New Yorker, upset the quarter figures of thirty-three seconds by Arnold on the same track, and his beating Tyler was a surprise. He rode a game race, and thirty-one and a half seconds from standing start was a surprise to all.

There was a snap about the second day's sport which was lacking the first day, and barring a lot of people standing on the track at the finish the management was capital.

Zimmerman sends another piano and bicycle to his warehouse, and will place a few more diamonds in the treasure box. A feature of the afternoon was the waltzing of Abbot, Bassett and the chairman of the racing board, who cavorted in the middle of the track to the band's strains of "Ta-ra-ra-da-boom-da-aye."

MEN WE ALL KNOW.

THE MOST NEWSY CYCLING JOURNAL IN EUROPE.

For really pleasing cycle reading, bright, chatty and light, commend me to the *Irish Cyclist*. Although it necessarily devotes much of its space to Hibernian affairs, it always contains matter of general interest, while its little stories and anecdotes are well seasoned with Attic salt. Mr. McCreedy would certainly satisfy Carlyle's requirement in "able editing," the whole paper is stamped with his pleasant imprint.—*The People, London.*

The ablest edited and most newsy cycle journal in Europe.—*Sporting Times, New York.*

One of the smartest and liveliest of cycling papers.—*National Press.*

Mr. McCreedy's admirable cycling journal has pushed its way by sheer merit and enterprise into the very front rank of sporting papers.—*Freeman's Journal.*

The best paper in its peculiar line published.—*Irish Society.*

Its literary fare is still as bright and interesting as ever.—*Cycling.*

Although some of our English cycle journals are reckoned pretty smart, they cannot beat it.—*Hull Daily News.*

Matter which from beginning to end is thoroughly interesting, not only to Irish riders but also to English wheelmen.—*Liverpool Athletic and Dramatic News.*

The most interesting of wheel papers.—*Cricket and Football Field.*

A credit to the country.—*Belfast Morning News.* An admirable miscellany of everything interesting to cyclists.—*Weekly Irish Times.*

Specimen Copy, post free, from MCCRÉDY & KYLE, 49 Middle Abbey St., Dublin.
SUBSCRIPTIONS, POST FREE, SIX MONTHS, 5s 6d; ONE YEAR, 10s.

stock of the company was increased from \$150,000 to \$200,000, the new issue being all taken at once. Mr. Rood was elected a director of the company, also its president and treasurer, and entered upon his duties immediately. No other changes were made, Joel H. Hendrick continuing as vice-president and general superintendent. The directors stand as heretofore—Edward S. Brewer, George A. Russel, Nathan D. Hill, A. B. Wallace, Joel H. Hendrick and Herbert Myrick, with Mr. Rood in place of Mr. Chamberlain.

The change will be a surprise to the public, but was not unexpected by either the old or the new management. George D. Chamberlain, the retiring president and secretary, has for some time felt the need of relief from the engrossing cares and responsibilities of the Warwick company's rapidly growing business.

Much credit is due Mr. Chamberlain for his work in bringing the company to its present prosperous condition. He has labored early and late for the success of the concern, and has fully earned the rest which he will soon enjoy. Mr. Chamberlain will remain with the company for several weeks and perhaps for several months, as his knowledge of the business will be of great value to the new management.

Mr. Rood, who assumes the management of the company, is one of the best known business men in the city. As president and treasurer for many years of the Hampden Watch Company he made a wide reputation as a skillful manager, and he is generally recognized as a man of exceptional business ability.

With increased capital and under the new management the business of the Warwick company will be largely increased. The company's new plant is equipped for the employment of 1,000 men and an annual production of 10,000 wheels, and it will soon be run to its full capacity.

Mr. Rood, who was born in Ludlow, has had a long and successful career. He was for a time assistant paymaster and clerk at the Indian Orchard Mills, after which he went into the employment of Warren & Spradone, New York jewelers. After a year's experience in their store he went on the road, and afterward became a partner in the firm, which did a business of about \$1,000,000 a year.

GEORGE D. CHAMBERLAIN.

3-BEAUTIES-3

The James Safety.

"JAMES" SPECIFICATIONS.

DIAMOND Frame, Warwick Hollow Rim, our unequalled Semi-Tangent Direct Spokes, Southard Cranks, Adjustable Handle-Bar and Seat Pillar, Perfect Chain Adjustment, Ball Bearings throughout (including head), Lamp Bracket, geared to 64 or to suit purchaser, quality ABSOLUTELY PERFECT, FULL GUARANTEE.

Eclipse Bicycle Company's Removal.

As has been briefly noted in these columns previously the Eclipse Bicycle Company has removed to Beaver Falls, Pa. For months a flattering offer has been before the managers, but until a short time since the offer was not accepted. The following details have been sent us:

"The work and progress of this concern in building bicycles has been almost phenomenal from the start. For years the managers had been engaged in the manufacture of various machines which required very close work and the best of skilled labor. When they concluded to give up their entire plant at Indianapolis to the making of bicycles, the experience of years in working of steel and building fine machinery was a great help in their new line. The first bicycle put on the market by the Eclipse people was made largely of steel rods, secured by aluminum bronze clamps and bolts, and was entirely different in construction from anything ever made. It was predicted by many that the cycle would be a failure and bring disaster to the makers. The contrary was the result. The 'old reliable Eclipse' was a seller almost from the start, and to this day these machines are in use in all parts of the country, and are doing good service.

"During the season just closing, the Eclipse people were compelled to work an all-night force in order to get out the large number of machines sold, and not only that, but were obliged to work a number of men in a building away from their factory, as they lacked room. They had about decided to put up a large factory in Indianapolis, but a number of prominent business men of Beaver Falls offered to the Eclipse managers large factory buildings in the latter city, which were formerly occupied by the Cutlery company of that place, and which are among the finest in the country, as can be seen by the cut published in this issue. This is said to be an exact picture of the plant, and is in no way exaggerated in size or style. In fact, a number of smaller buildings belonging to the plant, such as the blacksmith shop, stables, storage house, etc., are not shown.

"The buildings are fitted throughout with piping for steam heat, natural gas, artificial gas, and the Neracher sprinkler system. With the buildings are a number of steam and drop hammers, large and small power presses, shafting, lathes, drill presses, etc., and the machinery of the entire plant driven by water wheels. There are three of these wheels, the smallest having a capacity of 150 horse power. The size of the buildings is as follows: Front of main building 110 feet, length of wings 200 feet each, and all having a width of 43 feet. In addition to these main buildings are the two-story buildings, which have a depth of 310 feet, and width of 35 feet, giving in all a floor surface of nearly 100,000 feet, giving them the fifth largest bicycle plant in the United States. Already the machinery at Indianapolis is being moved to Beaver Falls, and by the middle of October the Eclipse people expect to be at work on their wheels for 1893, which are said by those who have seen

them, to be of a new design and as fine as can be made.

"The removal will make no change in the old management. Mr. Fulton will go to Beaver Falls to look after the manufacture of the wheels, and be on the road seeking trade as of yore, while Mr. Whittier will remain at Indianapolis, and have charge of the office work and finances of the company, as heretofore."

Buffalo Trade Notes.

L. C. Pixley, of R. L. Coleman & Company, was here one day last week.

The Vincent Wheel Company is working on a new saddle which will shortly be ready for sale.

Ned. Oliver, representing the Garford Company, of Elyria, O., has been with us for a few days.

The trade here feels that next year about ninety-five per cent of all the old riders will be mounted upon pneumatic tired wheels.

H. C. Martin & Company have had a fine trade right along and are, at present, satisfied to take it easy for a little

while. Their well-known salesman, Clark Radcliff, is fast becoming a devotee to the little black cap, which he wears continually, as he is afraid of showing his bald head.

Doesn't Stop at Tires.

Many carriage makers believe that the pneumatic tire is only one of the improvements, first applied to bicycles, which will eventually be used in the construction of carriages.

"I hardly think that we will ever arrive at the use of the pneumatic tire in carriage work," said one. "The best that has been arrived at so far in that line would hardly have the durability that would be desired to use on a buggy. You see the weight that would be carried would be so great, and the roads are so indifferent, that they would hardly last the day through, and they would be forever collapsing, so I think it is safe to predict that unless there are some radical changes, or some way of placing armor over the rubber, the pneumatic tire will never come into use in our line of business.

"In regard to the ball bearings, that is entirely another matter. A wheel could be made with them that would almost entirely do away with that unpleasant rattling, and, by placing a cushion of rubber beneath the steel tire, the vehicle could be made practically noiseless. It

is a wonder to me that no large factory has thought of making a ball bearing wheel for high class buggies. The principle has been in use for many years, notably on the roller skate, and there is no reason why they would not prove a success. A wheel of that kind would do away with the everlasting greasing, and hot boxes and heated axles would be a thing of the past.

"Of course, the new wheel would be very expensive, and could only be put upon the very high class makes; but I am of the opinion that there would be trade enough in them to make it pay. People who invariably purchase a cheap grade of vehicles would be tempted to put more money into them if they were obliged to do so to get such a great improvement. There is little doubt that some time in the future the present style of patent wheel will be relegated to the very cheapest class of buggies."

Tired of the Prize System.

BUFFALO, Sept. 11.—Many of the dealers are sending up a great prayer for deliverance from the begging fiend whose club is going to have a road, relay or track race, or who appears in the interest of some meet which will greatly benefit the dealer, etc., etc., and calls to ask the dealer what he is going to do for him, coolly remarking that he is willing to take anything from a cycle lock up to

4-2,090, fork for velocipedes; Cyrus Kehr, Lake side, Ill.; filed Jan. 11, 1892; serial No. 417,749.

482,100, unicycle; John Rawley, Chicago, Ill., filed Aug. 30, 1891; serial No. 404,333.

482,182, pneumatic tire; Charles M. Langren, Bayonne, N. J.; filed Sept. 16, 1891; serial No. 405,831.

482,271, attachment for velocipedes; George Openshaw and Charles A. Carr, Bury, England; filed Oct. 10, 1891; serial No. 408,398.

A Useless Patent.

Charles Openshaw and Charles A. Carr of Bury, Eng., have just been granted a patent for a queer but useless, we fear, device. It is a suspender-like affair, passing over a man's shoulders and attached to the frame of the wheel by a hook. According to the specifications "the object of the invention is to afford a means whereby the rider of a bicycle shall be able to exert a greater amount of power on the treadles of a machine than heretofore, and thereby obtain a considerable increase of speed." We pity the man who tries it. In the first place, the idea is not new. It was suggested several years ago.

Peoria Trade Affairs.

The retail trade in Peoria last week was what might be called good for this time of the year. A number of high grade machines were sold without any trouble, and there is quite a large run on second-hand wheels. A great many people can not afford to buy a new wheel, so they content themselves with a second-hand one. The retail cycle houses are making extensive preparations for a heavy sale during fair week, which begins on the 26th.

Mr. Eibach, representing the Rockford Tool and Sundry Manufacturing Company, of Rockford, Ill., was in Peoria last week on business. This concern manufactures the well-known Sylph pedals for the Rouse-Duryea Cycle Company. It will continue to manufacture the Sylph pedal, as the contract for them was made during Mr. Eibach's visit here.

Charles E. Duryea, of Sylph cycle fame, and vice-president of the Rouse-Duryea Cycle Company, is spending a short vacation in Peoria. Mr. Duryea will only be here until the latter part of this week, at which time he will take his departure for his home in the east.

Harry Houghton, a member of the Peoria Bicycle Club and for a number of years a resident of this city, has entered the employ of Kingman & Company's branch house at Des Moines, Iowa. Houghton was an active wheelman, and the fact of his taking up his residence in Des Moines will be regretted by the riders of this city.

Mr. Simons, who looks after Kingman & Company's bicycle department, is in the east in the interest of that concern. Kingman & Company will handle the Centaur cycles in the eastern states next season. They will also handle the Clipper, on which they have had a fair sale this year. With their branch houses at Kansas City, Omaha and Des Moines they will certainly put out a large number of bicycles.

LAUREL.

Leeming Seeks an Engagement.

Having sold my interest in the firm of Stokes & Leeming, I am at present open for an engagement. Have a thorough knowledge of taking charge of an assembly room, repair shop or branch depot. Was manager for D. Rudge & Company's largest depot in England for three years. The net receipts of my business amounted to one hundred and twelve thousand dollars for the year 1884, beside securing an order from Stoddard, Lovering & Company of Boston for one thousand machines, which kept the Rudge works running full time all winter, the only time this has been done

Recent Patents Granted.

The following is a list of recent bicycle patents, reported especially for the REFERENCE by W. E. Aughinbaugh, patent attorney, Washington, D. C.:

481,197, pneumatic tire; Charles H. Roth, Cincinnati, Ohio; filed Nov. 12, 1891; serial No. 411,869.

481,236, bicycle lock; Edwin W. Macauley, Rochester, N. Y.; filed Dec. 5, 1891.

481,323, pneumatic tire; Adolphus F. Wyman, New Bedford, Mass.; filed June 3, 1892; serial No. 435,578.

481,340, rim and tire for wheels; Charles E. W. Woodward, Chicopee, Mass., assignor to the Overman Wheel Company, same place; filed Feb. 16, 1891; serial No. 381,701.

481,390, bicycle lock; Frederick Egge, Bridgeport, Conn., assignor of two-thirds to Charles E. Smith and Oliver C. Smith, same place; filed June 18, 1892; serial No. 437,184.

481,435, tire for cycles; Thomas H. Stone and Harrington Corser, Birmingham, England; filed Feb. 2, 1892; serial No. 420,119. Patented in France Jan. 15, 1892; in Germany January 15, 1892, and in Belgium Jan. 18, 1892.

481,460, bicycle wheel; Frederick Ashley, Brooklyn, N. Y.; filed Oct. 38, 1891; serial No. 410,347.

481,476, bicycle; William S. Cranmer, Sonoma, Cal.; filed Feb. 12, 1892; serial No. 421,304.

481,530, bicycle; Alexander Winton, Cleveland, Ohio; filed Nov. 27, 1891; serial No. 413,215.

481,538, bicycle saddle; Arthur L. Garford, Elyria, Ohio; filed Jan. 2, 1891; serial No. 376,461.

482,967, bicycle, Frank Sweetland, Angola, N. Y.; filed Feb. 10, 1892; serial No. 420,994.

A Fair Field, No Favor,

And May the Best Man Win !

The work performed on the MORGAN & WRIGHT Pneumatic Tire proves that it has adequte durability and speed.

We beg leave to offer the following records. The list is incomplete and may contain some errors. We shall be happy to correct and add to the list, if our friends will kindly send us the proper data:

MORGAN & WRIGHT,
MANUFACTURERS OF RUBBER GOODS,
331-339 West Lake Street,
CHICAGO.

in the history of bicycle making in England. I have been in this country four years and am well acquainted with the trade from New York to San Francisco. I have been the most successful bicycle trainer in the world for the past ten years, although I have given very little time to training. Brought out such men as Sellers, Gatehouse, Furuival, Lee and Synner, and had W. C. Thorne, Bode, Van Sicklen and Tuttle in charge last year, when they did their best performances. Address H. Leeming, 506 Wabash avenue, Chicago, Ill. (adv)

The Worth Sociable.
The Chicago Bicycle Company will commence at once to make the Worth Sociable, shown in the accompanying

sketch. It is the invention of Mr. Worth, who expects to make a trial trip this week. It will be so arranged that electric power may be applied, and the cost will be about \$300.

The Silvertown Tire.
This tire is somewhat new in the United States, but in England it has become deservedly popular. A pair was shown a REFEREE representative recently, and a neater tire has never been seen. The rubber is white and extremely soft and fine, while the tire must have been made from a perfect mould, being absolutely round, and no signs of the seam or joint can be found. Where it is cemented to the rim a small strip of woollen is vulcanized to the tire, which aids in its gripping the cement and prevents creeping. Nails, pins, knives, etc. had been thrust into the tire numberless times, still no air was lost, as it is perfectly self-healing. One tire of this make has had 155 punctures, yet it is as capable of holding air as if new. The valve seems

to be a splendid one, too, and works easily. The tire has had some very thorough tests. Tacks were strewn on the ground and ridden over until eighty of the little pieces of metal were driven well into the rubber, but no air was lost. Then thirty-four more were put in, and again thirty, and after a country run the tires were as hard as ever. This is certainly a remarkable record and one apt

to have a good effect on the purchasing public. The tire is even lighter than many of the pneumatics now on the market. Besides the Closure, the makers, the India Rubber, Gutta Percha and Telegraph Works Company, England,

manufacture a single tube tire on the Boothroyd principle, which is very easy of repair, and a racing tire weighing but three and one-half pounds to the pair for 13-4x28 inches. As yet there is no exclusive agency in this country, but a number of tires have been used with great success.

A New Front Fork Scheme.
Cyrus Kehr, of Lakeside, Ill., has been granted a patent on what appears to be a good idea in forks and crowns, illustrations of the drawings of which are shown herewith. There can be no doubt that the fork crown would be much stronger than the ordinary one. A is the crown. This is shown detached in figure 2 and combined with the legs and reinforcements in figure 1. A 1 is the neck. The outer face of each of the shoulders, A 2, of the crown extends to the substantially vertical portion of the legs, at which point there is on said crown a substantially horizontal downward-directed face, A 3. The lower face of the crown is concave and terminates at each side in a downward-directed edge, A 4. The faces, A 3, and the edges, A 4,

are to meet, respectively, the faces, B 2, of the legs, B 1, and the upward-directed edges, B 5, of the reinforcing member, to be hereinafter described. B is an integral arch composed of the tubular legs, B 1, and the reinforcing member, B 3. This arch is formed by taking a piece of metal tube and cutting out the upper half thereof at B 4, through a linear distance equal to the length

of the edge, A 4, between points opposite the faces, A 3, of the crown A. (See Fig. 4.) Thus the tube will continue to be a tube, excepting along B 4, where it is a half tube, the concave or open portion being directed upward. At each end of the cutting, B 4, is a face, B 2, formed by the wall not cut away. The pipe is not bent downward at each side of the cutting, B 4, until the uncut portions of the pipe are nearly perpendicular and the arch is formed, as shown in figure 3, the bending being done on the half of the pipe next to the faces, B 2. The arch now consists of the legs, B 1 B 1, and a reinforcing member, B 3, integral with and connecting said legs, said reinforcing member being concave above and having the upward-directed edges, B 5, and the faces, B 2, of the legs, B 1, being now directed upward and extending from the exterior of each leg to the middle thereof. The specific dimensions and shape of the several parts of the arch are such as to cause the faces, B 2, to fit accurately upon the faces, A 3, while the edges, B 5, fit accurately upon the edges A 4, when the crown and said arches are brought together, as indicated in figure 1. After these edges are thus made to meet they are permanently brazed. The result is a light, graceful, and strong fork and one which is elastic at every point, so that strains resulting from jarring are not concentrated at particular point. A reinforced-tongue, C, may extend from each shoulder of the crown downward into and along the outer wall of the leg, B 1, and such tongue may be brazed to said wall.

The Scorcher Saddle For '93.
The above is shown in the cut herewith. It is the product of the Bretz & Curtis Manufacturing Company, of Philadelphia. The Scorcher pattern weighs just one pound seven ounces. The weight is reduced by cutting off the flat spring, giving it a slight upward bend, thus producing a neat, compact and except-

ionally strong saddle. The size of the seat is the same as the Regular pattern, but other parts are reduced in size and weight to give us the extra lightness. The leather is made of the same quality high grade stock as before. White oak finish. The only change noticeable is its shape, which has been formed to fit the rider most accurately. Attachments such as post clamps and bolts are designed somewhat differently than before, but of the same quality. Springs both coil and flat are made of the highest grade Bessemer steel and carefully tempered in oil. A drop steel forged improved pattern cantile is used, which adds much to the strength and decreases the weight considerably. Nickel-plating is done on copper and is strictly first-class.

Sercombe & Bolte's Sulkey.
The Sercombe & Bolte Manufacturing Company are making a push for the pneumatic sulky business, and from appearances are meeting with great success. P. H. Sercombe, with his usual foresight, anticipated what was coming, and was ready for the demand when it came. The cut on another page shows their sulky with the S. & B. pneumatic tired wheels, and a good picture of the celebrated jockey and sporting critic, James Garrison, and his famous trotter, Bell B. No less than a dozen of these speedy flyers will be used this week at the state fair. JACK ROYAL.

Trade Jottings.
R. D. Garden has returned from the east.
A. A. Taylor, of the Taylor Cycle Company, is in the east.
The Spooner-Peterson Company has moved from 335 Wabash avenue.
A. J. Marratt, manager Coventry Machinists' Company, visited Boston last week.
The T. D. Ganse Cycle Company will, in a few days, have samples of the '93 Reform.
The Coventry Machinists' Company has had to cable for another shipment of Holbeins.
The Quadrant Cycle Company, Chicago, will have greatly enlarged quarters next season.
Morgan & Wright's out-put of tires this season was close to 17,500 pairs, beside cushions.
In our English trade letter last week, the size of the Crypto's front wheel was given as thirty inches instead of thirty-six.
Prince Wells was in Chicago last week to hurry up shipments of safeties. Whitaker also called along cycle row on business.
The regular roadster Garford saddle, ('93 pattern) weighs but a pound and three-quarters, while their Scorcher is under a pound.
The firm of Stokes & Leeming, repairers, Dearborn street, has been dissolved.

Mr. Stokes will continue the business and assumes all obligations.
An addition is to be made to the Morgan & Wright pneumatic tire factory. The output next season will be much larger even than that of this year.
Mr. W. C. Brewer, recently of Chicago, has taken the managership of the Toledo Bicycle Company. The company is to be congratulated upon securing the services of a gentleman so full of energy and determination.
Thomas Sanders, of Birmingham, England, representing a half-dozen English firms, is at the Wellington Hotel, Chicago. This is his fourth trip over this season. He represents William Bown among the number.
A very handy bicycle lock now being introduced consists of two parts that clamp tightly one on each fork. A steel bar in one comes up through the wheel, and being pushed into the opposite fork fixture, locks with a spring.
The Heartley Machine Works, of Toledo, have moved to larger quarters, and their address will be 903 and 905 Water street. Mr. Heartley reports numerous orders from bicycle manufacturers, and expects to have a busy season.
The Raleigh is in a fair way to hold all the principal records before the year closes. Zimmerman has already placed the quarter, half, three-quarters and two miles to his credit. There will be a

SALADEE'S
Standard Road Saddle
For Ladies and Gents.
Weight, 2 lbs., 2 oz.

Saladee's Standard
FOR
SCORCHING SADDLES.
Weight, 1 lb., 14 oz.

The arrow points in FIG. 1 indicate the open spaces between the plates of the spring in front and rear of the clasp, and which are closed as the weight is applied to the seat, reinforcing the spring as it is depressed, and thereby affording an AUTOMATIC ADJUSTMENT, to a light or heavy rider. Never before attained in cycle saddlery.

Correspondence Solicited for
next season's trade.

The Whitten-Godding Cycle Co.
PROVIDENCE, R. I.

Sole Manufacturers for the U. S.

The simplicity, style, and comfort embodied in FIG. 2, as a "Scorching" Saddle, has never yet been equalled.

In this spring, the weight of the rider is so balanced, in relation to the L-Rod, that the absolute rigidity of the old "Hard Shell" is avoided, and hence a degree of comfort is retained that all expert cycle-riders riding a "Scorching" will duly appreciate.

Send for our Illustrated and Descriptive Circular, and PRICE LIST.

The trotting record of Nancy Hanks was made by the great mare when hitched to a bicycle sulky fitted with Elliott's hickory wheels and Columbia tires and ball bearings.

The new factory of the Garford Manufacturing company is rapidly assuming proportions. In dimensions it is 40 by 100 feet, four stories and basement, and will be the largest in the world devoted to saddles. The company will list about twenty distinct varieties of saddles in

1893. They intend, however, to do the business, and if a manufacturer has anything especial they will be most happy to figure on it.

The Aurora & Chicago Interurban Railway Company, composed of Chicago and Aurora capitalists, has been granted a right of way by the Aurora council. This company proposes to build an electric road of the Boynton bicycle pattern from Aurora to Riverside to connect with the elevated road now

under construction from Chicago to that point.

There is \$30,000,000 worth of bicycles in use in the United States.

The South Bend (Ind.) C. C. has leased a home in the Defrees block, and it will be furnished handsomely.

THE OWL(D) RELIABLE.

NEW LONDON, CONN., Aug. 26, 1892.

THE WARWICK CYCLE MFG. CO.,

Springfield, Mass.

GENTLEMEN:—This organization used nine of your Cushion Tired Bicycles at Camp White, State military rendezvous, Niantic, Conn., from Aug. 13 to Aug. 20, 1892, inclusive.

It was a question of much debate what machine should be used for the occasion, as the work required of mounted signal men and messengers in this service is such as to necessitate cycles of the most durable and tenacious qualities. The Warwick was finally decided upon and the result was most judicious.

The wheels were severely tested on the rough roads outlying Niantic and over the turfen and lumpy fields, and the result was perfect satisfaction to every member of the corps, some of the members of which are owners and riders of wheels of other makes. All are loud in their praise for the Warwick and prefer it either for work or pleasure.

Yours very respectfully, ALBERT A. BEACH, First Lieut. Com'd'g.

A FEW RECORDS AND VICTORIES

TO THE CREDIT OF THE "MICHELIN" PNEUMATIC:

The 50 Kilometres and the 100 Kilometres Records.

Paris-Brest and back, 750 miles, in 71 hr. 37 min; Charles Terront finishing 8 hours in front of the second man, Jiel Laval. Corre, on the "Michelin," rode from Basle to Strasburg and back, 300 kilometres, in 13 hr. 10 min. record, beating by 2 hours all the German competitors.

In the "LYON-REPUBLICAIN" race, 326 miles, the first, third, fourth, fifth and seventh men were on the "Michelin" Pneumatic.

In the great race from Paris to Clermont-Ferrand, 242 miles of mostly rough and hilly road, purposely strewn with nails in many places, 61 men finished out of the 75 starters; the largest percentage ever known in competition. All mounted the Michelin Pneumatic Tyre, and had to do their own repairs on the road.

In the Paris-Nantes race, 620 miles, the five first in were on the Michelin Tyre, and the best riders of the day, on other tyres, were hopelessly left.

Mr. Dubois, on the Buffalo track, Paris, on the Michelin Tyre, beat all World's Records, from 100 to 300 miles, and the 12 hours Record, accomplishing 230 miles 536 yards in that time.

Land's End to John O'Groate's, 874 miles, in 4 days, 40 minutes, beating Mr. G. F. Mills' record by 10 1-2 hours. 1,000 miles in 5 days, 11 hours, 38 minutes.

Edinburgh to Liverpool, 15 hours, 54 minutes, by Mr. B. H. Carlisle.

The above World's Records are the most recent successes this year obtained by riders of the "Peregrine," and are the most meritorious performances on any machine.

WHAT DOES A BICYCLE COST?

The following letter, written on a plain sheet of paper and enclosed in a plain yellow envelope bearing the Chicago postmark, reached us one day last week:

DEAR SIR:—An impression prevails that the manufacture of bicycles affords an unusual opportunity for profit. Articles in the daily press have expressed the opinion that wheels would be sold much cheaper in the near future, and riders and dealers generally have an idea that makers are on the high road to wealth. For the purpose of affording a better understanding of the actual situation of the matter, I submit the following actual results of our business for the fiscal year ending Sept. 1, 1892:

What it cost us to build a bicycle:
Labor, machine and blacksmith shop.....\$37.90
Nickel-plating, labor, materials, fuel, waste. 4.62
Enameling..... 3.65
Tools, machinery, estd. wear, tear and waste 1.77
Materials used and wasted..... 31.74
Expense, rent, power, supt., clerk hire, traveling, postage, stationery, advertising, freight, etc..... 9.38
Total..... 89.04
Number of full days of ten hours each shop was in operation, 238.
Number of men employed full days of ten hours each, 48.
Average earnings of each man, \$379.58.
Average earnings of each man per day, \$1 66 1-2.
Actual capital employed, \$32,700.
Actual loss sustained, \$2,869.44.

For obvious reasons I can not give you my name, but the figures I publish will prove interesting to makers, dealers and riders. The shop has been in operation about three years. A part of the goods were sold to jobbers, as it now turns out, for much less than actual cost. All materials have been bought for cash at the lowest market prices. Morgan & Wright and New York Belting & Packing Company's pneumatic and cushion tires were used, the larger part being cushion. It seems certain to us that higher instead of lower average prices must be realized to put the business on a paying basis.

These figures were submitted to a gentleman well known in the trade with a request for his opinion thereon. It will be found in the following:

"I have no doubt whatever that many small makers find, often at too late a day to render their experience valuable, that wheels cost more than they are sold for. In this particular case, however, mismanagement sticks out at almost every line.

"Let us first take the item for 'materials used and wasted.' In the average wheel of forty-five pounds weight there will be found about eighteen feet of tubing, which costs about \$3.50. Twenty-five to thirty pounds of steel, making up the remainder of the metal portion of the wheel, will cost somewhere in the neighborhood of \$12. Add to this the cost of tires (the remaining five pounds) and the material can not cost, at the outside, over \$25. According to the showing,

the maker quoted has wasted a full one-third of his material.

"Now, as to the cost of labor. It is, of course, true, that in a factory turning out hundreds of machines weekly, a wheel can be built cheaper than in a small shop. A shop employing forty-eight men should be able to turn out four complete machines daily. This maker, then, with his forty-eight men, each working 228 days, should have been able to make 912 machines, provided his shop was in good running order at the commencement of the season. At this rate each machine should cost, for labor, a fraction of a cent less than \$19.98, including the labor expended on nickeling and enameling. Yet, according to the statement, labor, exclusive of the nickeling and enameling shops, cost \$37.90, or nearly double the correct amount.

"There must be some good reason for this, and it will probably be found in the class of workmen employed. If this maker has been employing men at one dollar, sixty-six and a half cents a day and selling his wheels as high grade, he ought to be ashamed of himself. Even in the east, where machinists are far more numerous, the hands employed in the big factories earn \$2.50 a day, and some even as high as four dollars. And the cheaper the man the cheaper the work.

"Finally, as to the item 'Expense, rent,' etc. In comparison with other items, this is ridiculously low. Most factories include in this list such items, besides those named in the maker's list, as wear and tear of machinery, insurance, expense of experimental department, etc., and the cost of all these things runs up to one-third of the total cost of the machine. Figuring on this basis, this maker's machine would cost him over \$100! As a matter of fact this item—\$11.15, including wear and tear of machinery—is not very far from what it should be, but in comparison with the others it is preposterous.

"It would seem then that this maker—'Wastes over one-third his material, at a loss of over \$10 per wheel,

"Employs cheap labor to save money, but in the end finds that such men do half the proper amount of work, besides wasting, on an average, about \$2.50 worth of material per man daily,

"And gives too little time and attention to those methods which sell the wheel after it has been produced.

"To show that all small makers do not experience the same difficulty I may use the case of a gentleman who, not long ago, thought seriously of investing in an established business. He was assured by the head of the concern that the wheels actually cost less than fifty dollars. This, of course included only material and labor. The selling expenses, etc., must be added. I have since been assured by an expert that the wheel in question could be very easily made for the sum named, with the facilities possessed by the maker."

Despite all that can be said to the contrary the price of wheels will certainly come down. We have recently talked with a number of men who know whereof they speak, and in nearly every case they agree that World's Fair year will see a reduction of ten dollars. Some even predict that in 1894 there will be still another reduction, and that in 1895 the highest grade wheel will sell for \$125.

A BIT OF HISTORY.

In a pamphlet recently issued from this office, W. R. Pitman of New York was given credit for being the first holder of the professional one-mile record, 3 min. 47 sec., made at Brockton, Mass., on July 4, 1878. We now learn,

through the *Sporting Life*, that Pitman declines to accept the honor, claiming that he is, and always has been, an amateur. We are extremely sorry to have so injured the gentleman's sensitive feelings, but the information of which we are possessed seems to show that Pitman was not always one of the pure and unspotted.

Pitman declares that Louis Harrison was the first professional, and that he accepted five dollars to ride in the race above referred to. In this Pitman is certainly wrong. The first American professional was probably W. E. Harding, who, in March of 1877 was ingloriously defeated in a match race by David Stanton, then a very celebrated English rider. This was fourteen months before, as alleged by Pitman, Harrison became a professional.

The first American professional champion was W. M. Wright, who, under the name of D. Butler, defeated Stanton in a fifty-mile race.

In an article on cycling, written by the editor of this paper in 1884, in which the progress of racing was traced with as great accuracy as the documentary and other evidence at command afforded, we find the following:

It must be borne in mind that, there being no association of any kind governing bicycling at this time, there was little or no distinction between amateur and professional riders.

This year found the following noted riders: W. M. Wright, W. R. Pitman, C. A. Booth, A. DeWitt Lyon, Thomas Harrison, DeNiole, W. E. Harding and McClellan, and here let us remark that although the majority of these claimed to be amateurs, under the present ruling they have not the slightest claim to be so considered.

From this time forward Pitman competed against all classes, including Harrison, whom he admits was a professional. Early in 1879 Wright was disqualified in an amateur race at Madison Square Garden, but Pitman escaped. The only rule governing the case was that of the New York Athletic Club, the accepted authority, which barred any one who had ever "taught, pursued or assisted in the pursuit of athletic exercises as a means of livelihood." Pitman had, we believe, been guilty of all these things. If we recollect correctly, he had been employed by the Pope Company and others, it being part of his duties to perform such tricks as he was able, teach all comers, and race whenever he was told to. Whether he actually received a money prize we can not say.

On July 4, 1879, races were held on Boston Common. Two were for amateurs, and Pitman competed in both. He was protested, however, and adjudged a professional.

Later, still, when the National Association of Amateur Athletes of America had asserted its right to govern cycling, the writer remembers seeing Pitman ride in an amateur event at Williamsburg, N. Y., but whether the association was aware of it or not can not be told. The association allowed Wright to compete, although his previous performances were well known, for the chronicler of those days tells us that "he was a great public favorite, well known as a skillful rider three years ago."

We should be glad to learn of Mr. Pitman that he was an amateur at that time and to print his statement that he never transgressed the amateur law by receiving, directly or indirectly, money for services rendered in connection with cycling.

While on this subject it may be well to question "The Commentator's" claim that on July 4, 1878, in the first bicycle race ever held in America, Pitman won a mile at Lynn Common in two heats, the fastest of which was done in 3:11, thus making those figures record.

We find that Pitman on that day rode

in and won three one-mile heats at Brockton, and, says our authority, "on the same day he defeated C. C. Fletcher in a race around Boston Common. The location may be an error. The distance was 'about a mile,' and the winner's times were: First heat, 3:31; second heat, 3:11."

Neither of these events, however, was the first race in America, several men having become famous before that time.

A COMMON ERROR.

A certain young man of Waybackville, Ill., has asserted that because he is not a member of the league the racing board has no power to suspend him or prevent him racing. This, we find, is a common error. Even in so enlightened a center as Chicago we have known similar cases. Young men, be warned in time. The league does not pretend to govern you if you don't want to be governed. You are at liberty to ride for money if you please. But the league does say that all races must be run under its rules, and that you, if you disobey those rules, cannot compete. If you can find any meeting run under other than L. A. W. rules, that is the place for you to compete. But you can't do it. The league has the upper hand but is not a hard taskmaster. Pay the same attention to its rules as you would to those of any other organization and you can't go wrong. But don't foolishly imagine that you are boss.

Good handicaps, we admit, are the exception rather than the rule, but this is, first, because there are too few handicap events, and, secondly, because there are too few handicappers. A man in New York, for example, handicaps Buffalo, while a Chicagoan looks after territory from northern Michigan to southern Illinois and Indiana. Ridiculous, of course and good results impossible. A step which might be taken to secure better results is a regular league entry blank. In many cases, contrary to rule, no details are given or asked for. We maintain that when a secretary applies for permission to hold a meet he should be required to show that he is familiar with the rules and prepared to carry them out. They don't do it at present.

WHEELMEN are slowly awaking to the fact that most tournament promoters place too many events on their programmes. One of the most able writers advocates one scratch race and three handicaps to each day's sport, and the entire elimination of novice, lap and consolation races. In our humble opinion this is not far from the correct thing, though we might favor the introduction of one class event, fast enough to shut out the "tip-toppers" and give the second-raters a chance for a race among themselves. The advocates of all other classes of racing may argue as they please, but any well-arranged handicap will prove conclusively that no other race is as exciting to the public or as fair to the contestant.

SOME of the records made this season will have to be thoroughly overhauled before acceptance. We understand that Zimmerman's records at Birmingham and Clifton were made on tracks measured three feet from the pole? This shows carelessness on the part of the management.

ALTHOUGH this country is crowded with inventions from England, that is, inventions which originated there, few, indeed, are the American ideas in use in the old country. The Victor spring fork, the G. & J. tires and some of Overman's old-time tricycle ideas are still, we believe, in use, but little else.

Misleading the Public.

The people of the Hub are waking up, and John C. Kerrison of the *Herald* is responsible for it to some extent, although he said in his report of recent races that "Captain A. D. Peck's services were invaluable." Boston is not only the hub of cycling, but the fountain-head of the broad stream that has spread all over the United States. Boston was once the home of the fastest amateurs and professionals, but decay set in, and then her cracks as well as her great clubs dwindled into small potatoes. At No. 11 Water street the pioneer cycling journal of this country sprang into existence. The writer first saw a copy of it in 1879, and the march of cycling progress could not be better illustrated than by comparing an issue of the paper of that period with the *REFEREE* of today. Cyclists of America owe much to the sturdy Boston pioneers, who undertook to publish a paper which could not have been self-sustaining at that time, but which materially paved the way for the magnificent triumphs which followed. All honor to such men as Weston, Hodges, Chandler, Bassett, Cunningham, Kendall, Pitman and others who ran the gauntlet of criticism, opposition, and often abuse, when paving the way for the young men who now "take the town" at meets and never give a thought to the hard work of those who made all this possible. Therefore we must not be too flippant and wise, and should put on the brakes when alluding to this ancient burg, its "has been's," its "organ" and its fallen heroes. It was with a feeling of respect and reverence that I boarded a train at the Eastern depot and with a crowd of people, who went principally to see Zimmerman and Windle meet, got off at Saugus, near Lynn, where Franklin Park is situated. Zimmerman was not there, although the club men had pretty thoroughly advertised that he would be. Perhaps they knew he would not or could not come. Considering that he had been entered for the Athletic Union two-mile championship in New York some time, it looked as if Kerrison and committee were misleading the public a little. They knew the power of the "skeeter" as a gate drawer. The statement in the next day's *Herald* that Zimmerman had met with an accident looked as if the committee wanted to square themselves with a deluded public. How long will the L. A. W. allow clubs to bunco people in this fashion? That is what it is, pure and simple, and by amateurs at that. The people read in another portion of the *Herald* that Zimmerman rode in New York and won the ten-mile championship. There was loud complaint over his non-appearance, and this is how Kerrison explained it in his report:

All the cracks advertised to be present did not put in an appearance, yet many of the popular riders were on hand and gave an excellent exhibition of their marvelous powers.

The absence of Zimmerman was regretted by all, but not more so than by the members of the clubs under whose auspices the meeting was held.

This premier of the wheel telegraphed his entry Wednesday evening, and sent on the regular fee, but late yesterday afternoon it was learned that he had met with an accident which unfitted him to keep his promise.

You observe that it "was late yesterday

afternoon" when the club learned that "he had met with an accident." What a barefaced, unblushing falsehood to utter, when the same paper announces his winning in New York. Tyler was also entered—well advertised, at least. It looks as if Zimmerman wanted the piano for the mile, but either had too much pressure brought on him by the N. Y. A. C., which pays his expenses, or had pity on Taylor, who had not up to that time won a piano. So now all have pianos, Taylor being the last of the "big four" to get music.

The Springfield Meeting.

Springfield was a success, as everybody expected and knew it would be. There was no doubt in the minds of the throng that invaded the beautiful Massachusetts town that the diamond tournament could be anything but a record-breaker, either in point of attendance or fast times. The historic half mile in Hampden Park was never fitter for the smashing of records, and Sandy Sinclair and his band of workers placed a silk-

form the Springfield club, and several of those looked on at last week's success Ducker at the *REFEREE* representative's elbow talked a little club history and a little about the amateur definition and cash prizes. He is the same Ducker in spirit, a trifle better looking, perhaps, but the same Ducker whose audacious management and schemes commanded the attention of the entire cycling world. Say what we will, there has never been anything to equal the '85 and '86 tournaments. And what did it? Nothing but the genuine international character of the racing and the electric finishes between the riders of ordinaries of those days. Ducker says he is writing an article on what he knows about amateurism and what he would advise in regard to racing in the future, which will no doubt command wide attention. Ducker is a thorough

BELIEVER IN INTERNATIONAL RACING, and thinks the present style of pure amateurism one big round joke. So does Kennedy Childe, by the way, who is also "writing a letter for publication," so he tells me. But to return to Springfield and the tournament. Everything was first-class. If anybody left Springfield feeling slighted, the failure to enjoy themselves must be attributed to causes which the Springfield Bicycle Club could not reach. It was with heavy

FOURNIER, THE FRENCH RECORD BREAKER,
Who, on the Buffalo five-lap cement track, Paris, rode 25 miles in 1hr. 1m. 21s.

like touch on the surface over which cycling kings have battled for supremacy for many years past. There was one element lacking to put on a further and finishing touch to the great interest in the racing, and that was a team say of French, Scotch, English and Irish riders. If Osmond and Edwards, of England, Macredy, Du Cros, O'Callaghan, of Ireland, Stephane and Fournier, of France, Rademaker, of Holland, Lehr and another German representative had been there the string of international flags that waved over the track would have had a proper significance. Of course, the Springfield Bicycle Club was equal to the important duties of the occasion, and handled the managerial ribbons as only Springfield can. From President Miller down the boys worked as if a large cash prize depended on their efforts, but it is not known whether the Springfield committee got twenty per cent, like the Hartford committee. Perhaps they did; they certainly deserved to.

The Origin of the Meet.

It was twelve years ago that Messrs. Johnson, Morgan, Bradley, Terry, Billings, Ducker, Whipple, Dumbleton and Bloomer signed a call for a meeting to

form the Springfield club, and several of those looked on at last week's success Ducker at the *REFEREE* representative's elbow talked a little club history and a little about the amateur definition and cash prizes. He is the same Ducker in spirit, a trifle better looking, perhaps, but the same Ducker whose audacious management and schemes commanded the attention of the entire cycling world. Say what we will, there has never been anything to equal the '85 and '86 tournaments. And what did it? Nothing but the genuine international character of the racing and the electric finishes between the riders of ordinaries of those days. Ducker says he is writing an article on what he knows about amateurism and what he would advise in regard to racing in the future, which will no doubt command wide attention. Ducker is a thorough

THE SPRINGFIELD GIRLS

are very much in sight during tournament days, and from the havoc wrought by them among the boys, Springfield will be of much interest to them from now until the next great diamond and cash tournament on the banks of the beautiful Connecticut.

Minus Their Expenses.

It might be well to mention here that the league people got in their deadly work by recruiting for the L. A. W. both days, Bassett and Charlie Howard of the *Boston Globe* being fairly burdened with

cash, and the \$350 appropriated to help entertain the crowd by the Massachusetts division was well spent. Howard simply raked the stuff in with both hands, but would not accept Whittaker or "Andy" McGarrett as recruits.

The usual division meeting took place Wednesday night at the Haynes, and Treasurer Howard reported a full treasury and everybody happy. But those representatives who did not turn up at the meeting, and who had important engagements with "Major Billy" Atwell at Holyoke, felt sorry the next morning when they read that a motion was carried not to pay the expenses of any representative who found star-gazing. Holyoke and tripping the light fantastic more to their liking than attending the officers' meet, especially those who left their spare change on the piano, expecting the usual expense allowance. Report says several had to borrow to get out of town. Others won enough on Zimmerman the second day to pull through all right.

Trade Men Were There.

Among those present were Edward Mushing and Mr. Lucas of Coventry, who were taken in charge by Mr. Lozier of Cleveland, who was telling Mr. Lucas that he ought to settle in America and not live "on that little island, for," said Lozier, "some night you will get up in your sleep and walk off into the sea." Lucas and Mushing in their turn "went for" Lozier. It was suggested and claimed that Stokes got the name 2:10 for the Union wheel through McCune weighing those figures. Then Whittaker thought the Cleveland should be called 2-80, which the stout man objected to. Whittaker, who is fast establishing a claim to be considered the Bill Nye of cycling, scared the city by giving away *REFEREE* Pictorial Souvenirs with a blood-curdling shout, "all about the cholera," and many other startling claims. A young man named Schaff, from Maine, looks enough like Whittaker to deceive the majority who know "Whit," and several greeted the Maine rider, thinking he was "the only," which fact came to Whittaker's ear. He hunted up his double in the Cooley house, and after the greeting, "Who in the devil are you?" warned him to carry himself straight while in Springfield, "because I have a great reputation here," said Whit. The double was so pleased to be taken for the original Whittaker that he got terribly full and was carried to bed, and the news got around that Stillman G. was "unfit for publication," a rumor that worried him much.

One of the features of the tournament was the struggle for prominence between the employees of the two big firms, and it was about an even thing between them. Colonel Pope and Charles Overman sat in the colonel's private box and partook of bon-bons out of the same box. Here's scripture coming true, "the lion and the lamb, etc."

Zimmerman's Strange Tactics.

Manhattan Athletic Club officials were not numerous at the meet, neither was that cart-load of money, that the papers had been saying they would have on hand to bet on Windle, in sight. Possibly they took the advice I tendered Messrs. Moneypenny and Betting and left it at home in the club safe. Quite a few were looking for that cart. If it had appeared its fate would have been worse than Pharaoh's experience in the Red Sea. Zimmerman acted queerly the first day, and the people with one accord thought the "skeeter" was playing a deep game with the hope of seeing the Manhattan cart later, but after a careful

and thorough investigation I could find no evidence that Zimmerman had been up to the little game everybody avowed he was playing. "Papa" Zimmerman Joseph McDermott and Willis Troy assured me that the "skeeter" was suffering and was off that day, but, of course, they would not be likely to tell anything, if they knew, to a newspaper representative. Having watched Zimmerman closely in all his races his altered tactics aroused my suspicion. For instance, in the mile invitation he moved off slowly and took about last position, neither did he seem to try to improve that position until it was too late. Now, his plan (and everybody's who wants to try and win) should be and has always been to get second or third place and hold it, if possible. Then the last quarter, 32 1-5, was slow for Zimmerman, and that was Tyler's, Zimmerman finishing behind Windle. In the half-mile Zim. adopted different tactics. He got his position, his last quarter was 30 1-5, and he won. In the mile handicap he did what he never should have done with such a man as Taylor for company. He started the pacemaking at top speed and Taylor finished alone. The second day he adopted his old tactics and his last quarter in the half-mile, 29 4-5, and his finish in the world's record, 31 2-5, were more like his old form. These facts render my suspicion excusable. But there is now no doubt he did his best, and the fact that he was feeling very badly is sufficient excuse.

Nearly All Had Stage Fright.

That mile-record race proves one thing and that is that a big, important race gives men stage fright or heart vabbles. George Taylor and Harry Taylor had them for attendants last week in that mile. Windle and Zimmerman were the only two besides Taxis who hadn't. Willie Windle is game to a high degree, depend on that. So is Taxis; so may be Taylor and Tyler, but they get flurried some and their faces showed it at the start. Taylor's mile the previous day and Tyler's world's record showed that the pair did not do what they should have done on that last lap. It is pretty sure betting that in a race Zimmerman is the best man and Windle next.

Miscellaneous Mention.

The management of the races was, of course, good, and the club can afford to offer big cash prizes next year if the racing board says so. By the way, the Warwick company offered the club \$250 as a cash prize, an offer the club refused. The cycling press was represented by Egan, Crowther, Dimon, Root, Berger, Whittaker, Merrick and the REFEREE's eastern representative.

There is no doubt in my mind that racing is demoralizing to a young man, and George Taylor agrees with me that any young man who wants to make a success in life should leave racing severely alone. There is no doubt that many who lingered with "the flowing" at Springfield will bear out the statement that racing is tough on all people, including those who do not race. To show what a hold prizes of a convertible nature have on the racing men, and that leg power is valued by them more highly than brains, the race for the child's scholarship had only six entries, and two competitors, while the other races, for bicycles and diamonds, had scores. A sermon on "Brains vs. Legs" could be preached to advantage in Springfield.

The send-off Zimmerman got at Springfield was a rattler. Col's band and the Hartford and other clubs marched to the depot and serenaded the champion, who walked out of his car

accompanied by the REFEREE representative, who did all in his power to get that maiden speech. But Jimmy broke away saying: "Father, you tell them all about it," and with the words, "I can't be forced to make a speech, and I can't and won't," he flew into the car after a snile and a bow to the crowd.

A Doctor A-wheel.

"Never too old to ride a bicycle," is being exemplified daily by the sight of bicycles being ridden by men who have entered the shadowy and declining stages of manhood. Patriarchal gray beards, their owners astride the modern down-shod chariot, pedaling madly through the perspective of their venerable years, while the zephyrs toss their locks and send their coat-tails streaming, is one of the many visions of the day that have ceased to surprise the multitude.

The modern political phrase, "the doctors know a good thing when they see it," is about to be verified, for the doctors who ride wheels are now so numerous that they contemplate forming a club. A committee on name is at work at present and will probably report soon with a christening something like "The Sawyer Cycling Club," or "The Pathological Pedalers."

Dr. Wardner is another of the many recent candidates for rejuvenation and has become innoculated with the virus known as "currumus pedilus."

"I am sixty-three," says the doctor, "and a year ago I should have ridiculed any one telling me I should ever ride a bicycle, but I have given myself an allo-

pathic dose of the unexpected, for I have now been a wheelman of considerable weight for three months. I weighed at the start 213 pounds, and now I scarcely disturb the 200-pound weight. In June I wandered into a basement on Wabash avenue where an athletic young man was giving lessons in balancing and catching to a young lady on a safety, and asked whether it would be possible to teach a man of my age to ride.

COULD TEACH THE DOCTOR TO RIDE.

"No doubt of it," said the young pedagogue of the cycle shop, and he afterward verified his optimacy on my aptitude by teaching me to ride in four short lessons. I found that the balancing of the wheel, once fairly understood in theory, becomes very easy and intuitive in practice. Anybody but the person who is too corpulent to go between the saddle and handle-bars can learn to ride. The muscles get a new, post-graduate education, the lungs expand for more air to feed the new blood, and a man turns over his stock of tissue in less time than the proverbial seven years.

CALL HIM JOLLY NAMES.

"See that old codger on a wheel," "Looks as though he had some vim left," and "Hello, Santa Claus," are some of the many epithets that to me come greeting.

"The bicycle has come to stay, and I believe that we old fellows are entitled to some of the benefit and pleasure in its use."—Chicago News.

RECOLLECTIONS OF SPRINGFIELD.

Tyler received a perfect ovation after he had finished his ride of 2:08 4-5 for the mile, and hundreds of his friends, the officials and his racing opponents crowded about to extend hearty congratulations. He took the matter coolly, but was, nevertheless, greatly elated. His clubmates went wild, for they knew him capable of the performance, notwithstanding the fact that he was badly beaten in the race for the team of horses. A big sign, "2:08," was fastened to one member's wheel, and through the streets he rode with this.

Zimmerman's Dual Defeat.

Zimmerman's defeat on Thursday by both Tyler and Windle caused any number of rumors to float about. Considering his previous performances and even those of the same day and on Friday, it must be said the matter did look a little queer. There were a good many who thought Jimmy would be willing enough to give a race to Tyler, but they did not see how it was possible, above all things, he should let his old enemy of the path, Windle, beat him. But Jimmy says he could ride no faster, and as Tyler got the inside he had a little the advantage of him. But how the lanky gentleman did work down the homestretch! His head was turned to the left and his eyes were on Windle and Tyler, while he was pedaling mightily. A mighty cry went up at the finish.

"Zimmerman beaten!"

"Tyler wins!"

"Willie is still in it!"

"What'd I tell you?"

"Yes, but look out for Zimmerman tomorrow."

Then when Taylor lowered the world's competition record and beat Zimmerman while doing it, the people thought better of the cry of "fraud" and "fake" and really believed the man out of condition. Jimmy didn't make many excuses, but he did say he did not feel well and was suffering somewhat from a strain. In the mile handicap, the race in which Taylor beat him, he was unfortunate enough to have to go on the outside to get past the bunch, while Taylor got through at the pole. Lumsden said he thought his game was to follow Zimmerman, but made a mistake. He was right on Jimmy's wheel at the finish and rode the last quarter just as fast.

Lumsden Hopes to Beat Zim.

Lumsden's hope is to beat Zimmerman, and it is not stretching the truth to say he will do it at Chicago if he gets good training in the meantime. He has beaten everybody but Jimmy, and this includes those who have beaten the "Jersey skeeter." He came pretty close to beating him at Philadelphia Saturday, and with more work will improve. Every day he rides better, and with the work the western circuit will give him his chances of a victory are excellent.

A Couple of Chicagoans.

Bliss and Rhodes are also riding splendidly. So far the former, who is known as "Pie" among the members of the Chicago team, has won more firsts and more prizes on the eastern trip than any other member of the team. In the big race at Springfield he beat Dornitge, Hess and George C. Smith. Usually he is not at all excited and "rides with his head" to a great extent. But in that race—so he says himself—he didn't know whether he was first or last at any point of the game, and when a man went out for the quarter Bliss would follow. He lost his

head altogether, else he might have made a good showing. Rhodes pushed well to the front in several races, and a little more work will put him on a good level with the scratch men. At Philadelphia he showed his heels to a good lot in the heat in the half-mile handicap.

Cyclists as Thespians.

Thursday night the attraction at Springfield was "Cupid's Chariot," at the pretty Court Square Theater. Munger was there dressed as a dude—that is, he was on the stage in the fair scene—and his make-up, for which Van Sicklen was chiefly responsible, was something awful. Zimmy was on the stage, too, and received several rounds of cheers, but he paid no attention to them whatever. And how that pretty actress did hang on to his arm! Dan Canary, Billy Murphy, Asa Windle and several lesser lights in the cycling world were also there. A Boston crowd, during a solo, did not gain admiration from the fair singer nor from the audience, when they made a show of themselves by jeering and hooting at the lady. If they had been put out it would have served them right.

The Mile Record Race.

"Sire" Zimmerman got to be one of the boys at Springfield, and the father of "my boy," as he calls Arthur, was as proud as a peacock when the lad won the team of horses. He received the congratulations of the crowd while Zimmy sneaked to his dressing quarters. It was an exciting time at the finish of that race, and every one of the 15,000 people was on tip toes to see the desperate finish. Down the stretch came Zimmerman, Windle right on his wheel, while Taxis was nearer the pole, but within a foot of the line of the Milbury lad's rear tire. And Lumsden was lapping Taxis' wheel, while Tyler, Berlo, Munger, Smith, Wells, Dornitge and Bliss brought up the rear.

George Smith went out for the quarter and got it in 33 4-5 sec., being a full fifty yards ahead at that point. Then Munger hauled the crowd up and Smith dropped to the rear of the bunch, while Munger got the half in 1:12 1-5. Dornitge was well satisfied with being first at the three-quarter pole, and from that point the great struggle commenced. Zimmerman, Sr., drove the team to Hartford and there it was taken by boat to New York, from which point it was driven to Freehold, N. J.

The Management Perfection.

What a healthy, robust, man's size smile was spread on President Miller's face as he stood and saw the big grand stands filling up with humanity. He knew the meet was then bound to be the greatest on record, and he rejoiced—as did the club's treasurer. The Springfield boys are not old except in the matter of running successful tournaments, and in this they are grey. There wasn't a hitch about anything; everybody was well treated—particularly the press, for which thanks, gentlemen; and the events were run off with a promptness that was surprising. The bell tapped once, and the men marched up the track to the tape in good, quick step; once again it stroked and every man was on his wheel; then "Are the timers ready? Are the starters ready?" and bang, and the race was started. That's the way they run things at Springfield.

The Track To Be Widened.

There isn't another track in the world that has a surface like the one at Hampden Park—no, not one; not even a per-

Mrs. Joseph McDermott.

Joseph McDermott

THE ZIMMERMAN FAMILY.

fectly smooth cement track. This track is constructed of four layers and is as firm as stone, yet is just springy enough to be perfect. The first layer put down consisted of six inches of broken stone, then another half-foot of coarse red clay and small stone, then a layer of fine red and gray clay and a top dressing of the finest clay obtainable. It is most excellently cared for and there isn't a lump or roll in it—it is perfect so far as surface goes, but it is ten feet too narrow for use nowadays, when such big fields are started. The boys expect, later on this season, to widen it considerably, and then no track in the world will equal it. Those who have not seen the Springfield circuit have never seen a real bicycle track.

Whittaker's Temperance Lesson.

All the big trade people were there—the colonel, W. C. and Charlie Overman, Stokes, Lozier, McCune, Measure, Llewellyn Johnson, Lucas and a score of others. The big dailies were all represented and the cycling papers by Betts and Merrick, the *Wheel*; Crowther, *Bicycling World*; Kelcey, *American Wheelman*; Berger and Van Sicklen, *Bearings*; Dimon, *Cycling*, and Root and Morgan, *REFEREE*. Whittaker and Morgan put up a brace game on a party of trade people. They invited them into a room at Cooley's hotel to enjoy some champagne on the Revere Rubber Company, which was represented by Whittaker. Then Lozier seated himself in an easy chair, Stokes leaned against a table, Asa Windle (Asa Swindle, Whittaker calls him) smacked his lips, and even Willie's mouth watered. Stokes made a speech, so did others, and Whittaker was requested to crack a bottle. Well, he monkeyed about awhile, got out a corkscrew and talked. Then he took up one of the straw-covered bottles, a row of

dainty glasses having first been arranged about the table. But what was the surprise of Whit's guests when he brought forth a two-ounce bottle labeled "extra dry" instead of the regulation size! Those present simply wilted, but they couldn't get away; the door had been locked. Whit had two dozen of those small bottles of champagne and had them repacked in regular-sized straw covers and put into a regulation case. Then he tied one to the coat of each guest and bade them good-bye.

Joy On An Alleged Sleeper.

Nobody who went on the "special" train from Springfield to Philadelphia Friday night will ever believe that George M. Pullman was the originator of the sleeping car. If the two on the train don't ante-date those first made by Pullman, or even George M. himself, then queer things have happened since he first put a car out for the public's use. They belonged to the "M. P. Car Company," whatever that is, and were simply marvelous. They were not like an ordinary sleeper. The berths when not made up were against the sides of the car and entirely concealed, while the car presented the appearance of a chair car. To make up the berths the chairs were taken apart, the berths pulled down and arranged, and the pieces of chairs packed under the berths. It took three hours to make up the berths and then there was linen and blankets enough for one car only. As a result, there was a wild scramble for these articles. Crowther had charge of the train, and if he ever attempts such a job again we miss our guess. The cars were run over every "jay" road west of the Hudson, behind freight engines and freight trains, and pulled into Philadelphia two hours and fifty minutes late. Dr. and Mrs. G. Carleton Brown, Zimmerman, Lumsden,

Berlo, Wheeler, Bliss, Winship, Tobey, Crowther, Van Sicklen, Anderson, Kirk Brown, Wells, Dimon, Draper, Troy and many others were aboard. It was a wild night, akin to being aboard the Cephys off Fire Island.

NOTES AND COMMENTS.

It gives me considerable pleasure to see that there is a movement on foot to organize a veterans society, and I shall at once send in my name, for although I am the very least of the old-timers, still I have ridden a bicycle since the fall of 1878, have been a league member since 1880, and have preserved every card. I used to know everybody, but in these days I feel like a cat in a strange garret when I happen to attend a race meet or go into a club house. I was once a member of the Chicago club; also of the Lincolns; likewise of the Rockford Cycle Club; ditto of the Massachusetts, the most famous of old-time clubs, and at one time I really thought that I was in it; but now, alas, like the G. O. O. and a whole lot of my contemporaries, the back shelf is my somewhat uncomfortable resting place. Therefore it warms the cockles of my heart to think of a periodical reunion of old-timers who could, over pipe and mug, brag and bluster and generally enjoy themselves without being in anyway identified with the "push," who could take a bit of a run through the country at a pace which would allow of conversation and enjoyment with never a thought of a record or a scotch; who could sit in the front row of the grand stand with wives and children (most of us have both) and enjoy a race meet without a single idiotic club call, and who could originate and wisely discuss schemes and plans for the good of the sport. Old heads are good things to have in any business, and I

trust that the association will be a success.

"Oh, wonderful, wonderful, and still again, Oh wonderful!" Where is this record breaking going to stop? I mind me well the time when Sanders Sellers waxed "our George" in 2:35 1-4, and the round-eyed wonder with which the record was received. Further back I remember Asa Dolph's 2:41, which was considered phenomenal, and Rowe's wonderful 2:29 1-4. How we threw up our hats and bawled when we heard of it! And Windle's 2:25, and Osmond's 2:16. We thought that the line had been reached each time, and now comes the raw-boned, long-legged, kindly-faced lad from New Jersey, and puts it so close to 2:08 that it is not worth while to name the fraction. Bicycling has come to stay. Until this year it has been a struggle against popular prejudice and bullheadedness, but this year a change has come. The world has recognized cycling as the prince of sports and as a practical business. Horsemen have learned that cyclists are men of brains; manufacturers in all lines have learned that cycle builders were far in advance of their brethren in a mechanical sense, and the great public has learned that no other sport can give it the excitement that is afforded by cycle racing. Base ball, the popular fad, has died or is rapidly dying a deserved death. Horse racing was falling into "innocuous desuetude" until the cycle builder came to the rescue and contributed a mechanical device which enabled the horse to increase its speed; and this device, with the wonderful work performed by Zimmerman et al. has turned the attention of the world. From now on bicycling, bicyclists and the bicycle will take their places where they belong, in the foremost rank of pleasure and business. With the encouragement and increase in skill which come with time, what will our grandsons ride and how fast will they cover a mile? Pretty rapidly, I promise you.

NEWS FROM ENGLAND.

ENTRIES ARE ALREADY COMING IN
FOR THE BIG SHOWS.

*The Dunlop Tire For 1893—Conference
of National Cyclists' Union and
L. A. W. Men—Professionals
in Trouble—Records.*

LONDON, Sept. 10.—The week which is just past has been an eventful one, although in actual racing there has not been much done. The weather has been all against it. Osmond has been training at Herne Hill and waiting for a favorable opportunity to go for the fifty-mile safety record, but he has waited in vain. On Tuesday at this track A. F. Ilsley and J. Rowley, on their Raleigh safety tandem put in a new set of records for this type of machine for a number of miles, and on Thursday at Putney, where the track has been cemented, Lewis Stroud, the old Oxford University man, reduced the mile tricycle record by the merest fraction. On the road the London to Brighton record, which has stood for several months to the credit of S. F. Edge and the geared ordinary, has been beaten by E. Dance on a New Howe rear-driving safety. The fifty miles tandem safety record has also been beaten by Robertson and R. J. Ilsley, the latter being the younger but bigger brother of the Ilsley before mentioned.

Some of our professionals, too, have been distinguishing themselves, but in not quite so praiseworthy a manner. At the North Shields police court, on Saturday, Willie Wood was brought up in custody charged with stealing two half sovereigns, the property of George Stephenson. It appears that on the pre-

vious evening the two men met at the Criterion hotel, North Shields, and Wood claimed acquaintance with Stephenson's parents. Stephenson offered to bet him a sovereign that he did not know them, and in order to satisfy the bet placed two half sovereigns on the counter to be posted with a third party, and challenged Wood to do the same. Wood, instead of responding, picked up Stephenson's money and decamped. When before the magistrate, Wood stated that at the time of the occurrence he was the worse for liquor and now had no recollection of what took place. He was fined twenty shillings and costs. On Wednesday Richard Howell, A. H. Robb and A. A. Robb were brought up on a warrant at Wolverhampton charged with embezzlement and obtaining food and lodgings under false pretenses. It was stated that they had on the previous Monday promoted some professional bicycle races at Merthyr Tydvil, in Wales; that A. A. Robb, who had taken the entrance money, had decamped with the receipts without paying over the prizes, and that the other two had gone off from the hotel where they had been staying owing a bill amounting to £8 odd. The magistrate after hearing formal evidence ordered that they should be sent back in custody to Merthyr Tydvil for the case to be gone into there.

THE QUARRELSOME SHOWMAN.

The two shows are providing a good deal of food for discussion. The Manufacturers Protection Association held a meeting in Coventry last Monday, and the prospectus of their exhibition is now out. It is to be called the National Cycle Show, and is to be held at the Crystal Palace from January 20 to 28 next. The entries of manufacturers, factors or agents who show at any other exhibition previous to January 1 will be declined;

but in the case of makers of accessories, etc., no such rule will be made. In the meantime entries for the Stanley Show are coming in very fast. Although the lists do not open until Monday, a large number of applications for space have already been made.

There will soon be quite a number of representatives of English cycle firms in the States. S. Golder, of the New Howe Company, did not leave a fortnight since, as he had intended to do. His departure was delayed until Wednesday last. He is accompanied by his wife. C. V. Pugh, of the Whitworth Works Cycle Company, has either already left or is leaving immediately. Frank Bowden of Raleigh Company is back after two flying visits to America, and is extremely pleased with the location which Mr. Angois has chosen for the Raleigh factory which is to be started in New York.

DUNLOP TIRES FOR 1893.

The Pneumatic Tire Company, whose shares are now valued at just five times their original price, have just completed arrangements for supplying its new tires. I had the pleasure of inspecting a sample this week. It is simplicity itself. A specially shaped rim made either in hollow or solid form is used and in it are two ridges. The outer covering forms two-thirds of the circumference of the tire. It is of molded rubber, slightly thicker in the middle and with a canvas backing vulcanized on the inside. Round the edges are two endless wires, made of a special metal, including a large proportion of copper to prevent any likelihood of rust. The inner casing is a bladder of the same material as at present used in the Dunlop tire. When the tire is inflated the wires are blown into the ridges in the rim and kept in position by the expansion of the tire. I saw a pair of tires which had been ridden for many

miles by Lawrence Fletcher, and neither showed the slightest sign of wear or chafing either within or without. The Woods valves are now being made lighter and neater, and I think this new tire is altogether as near perfection as it is possible for a pneumatic tire to be.

I understand that the N. C. U. has received a favorable reply from the L. A. W. to its communication concerning the promotion of international championships and that a conference is to be held in London at the end of November—during the time of the Stanley show—to formulate and adopt a scheme.

Cyclists—Take the Great Rock Island to Peoria next Monday. One fare.

The Triumphs In America.

As will be noticed in our advertising columns, the Triumph Cycle Company, of Coventry, is about to establish agencies in this country, and one of the directors, Mr. Bettman, can be communicated with in care of the REFEREE. A great deal could be said in favor of the Triumph but the trade is thoroughly familiar with its best points. Throughout England and the continent these wheels have been very successful on the road and track.

The Rock Island is the route for cyclists to take to go to Peoria.

Springfield was well supplied with music by the Overman and Colt bands.

Peoria Tournament—The Rock Island offers special inducements to those attending this tournament next Tuesday. One fare.

The Illinois Cycling Club ran a sealed handicap, distance ten miles, last Saturday. Fred Nessel won from scratch, Emil Ulbricht second from the same mark.

JOHNSON'S MILE, 2:04 ³/₅

MARVELLOUS PERFORMANCES BY
THE MINNEAPOLIS RIDER.

*All the Records From a Quarter to One
Mile are Reported as Being Badly
Beaten—Defeating a Run-
ning Horse.*

(From Tuesday's Inter Ocean.)

INDEPENDENCE, Iowa, Sept. 20.—(Special Telegram.)—John S. Johnson, the phenomenal young Minneapolis bicyclist, whose remarkable time on the Independence kite track for a quarter and half-mile electrified the riding world last Saturday, made another record look pale to-day in the presence of a good crowd. It had been announced that he would attempt to beat the world's record for a mile from a standing start, and elaborate preparations were made to have the performance correctly timed and rendered eligible to record. The following were chosen as timers: Fred Seacord and Judd Seacord, leading breeders of trotters, of Galesburg, Ill.; F. D. Stout, owner of Nutwood and proprietor of the Highland Farm at Dubuque, Iowa; M. Ladque, Luverne, Minn.; Sam Caton, Dubuque, Iowa, and C. A. Thompson, of Independence. For judges the following well known local bicycle men were chosen: J. W. Evans, C. F. Tucker and W. S. Tidbal.

Johnson came out at 5 o'clock in charge of his trainer, T. W. Eck, and his well-knit, athletic figure evoked many expressions of admiration from the crowd. The track was freshly planed and C. W. Williams appeared behind his running horse, Ned Gordon, to make the clip.

The first performance was a start against the best record for a quarter-mile from a standing start, which was 31 1-5 seconds, and Johnson easily made it in 30 flat. Twenty minutes later Johnson came out again fresh as a rose, ready for the greater spin of a full mile. The regulation bicycle track is one mile eighteen inches from the pole. The kite track here measures a mile three feet from the pole, and in order to have the performance safe and legitimate, John-

son was started ten feet back of the wire.

Dr. A. E. Spalding was chosen as starter, and as he said go, the watches snapped and Johnson launched out on his journey. The runner swung in ahead and the bicyclist trailed along snugly behind. The first quarter was not timed, as Johnson had already beaten it. The half was reached in 1:03 1-5, which was behind the record for that distance from a standing start by

about a second. At the three-quarters the watches split at 1:34 1-5, beating the record for that distance, which was 1:35 3-5.

At this point Johnson shouted to Williams to urge the runner faster or get out of the way, and as Old Ned was already at the limit of his speed, Williams turned him out and Johnson passed him by a mighty spurt and came up the stretch alone, reaching the wire twenty lengths ahead of the horse in 2:04 3-5, beating the best previous record of Zimmerman, which was 2:08 4-5 from a standing start. The last quarter had been covered in 30 2-5 seconds. Johnson's next effort will be to beat the best record from a flying start, and no one doubts that he will accomplish it in two minutes or better. The attempt will be made some day this week.

(From Thursday's News Record.)

INDEPENDENCE, Iowa, Sept. 21.—The Minneapolis boy, Johnson, took another shy at the one half-mile bicycle record to-day and made the one-half in :58 3-5, standing start, breaking the world record. In this performance he also broke the flying-start quarter-mile record by going the last quarter in :26 1-5. This performance was accurately timed by official timers.

An Outrageous Proceeding.

Judge Thomson, of Louisville, has just given a most extraordinary decision. In substance, he decided that wheelmen are entitled to the usual rights of the road, and then discharged a defendant who admitted that he was driving on the wrong side, at an illegal rate of speed, and who ran into two riders, severely injuring one of them! Said the judge:

In this case the doctor was on the wrong side of the road, and admits that he was driving at the rate of nine or ten miles an hour, but it is con-

tended by him that he was on the boulevard beyond the end of Third, and that both the public and the city authorities have acted upon the idea that the ordinance did not apply to that part of the boulevard, and the doctor claims that his horse was frightened at the cars and he was obliged to pull to the left of the road to avoid other vehicles.

The remainder of the opinion was delivered orally. Judge Thompson said that while the laws referred to above apply to all thoroughfares within the city limits, it was generally believed by those not conversant with the provisions of the law, that they do not apply to the boulevard. Dr. Hendricks shared this belief with others, and did not wilfully violate the ordinance. Taking this view of the case, Judge Thompson dismissed the defendant.

We have always been given to understand that ignorance of the law could not be accepted as an excuse. Under the ruling of Judge Thompson, any man may escape punishment for an offense by setting up a "didn't know it was wrong" claim. The defendant was a Doctor Hendricks. It is ridiculous to state, as the judge does, virtually, that the doctor did not know it was wrong to run over the wheelmen, regardless of technical points involved. Had the offenders been the wheelmen and the prosecutor the horseman, how would the decision have been effected?

For some reason, if we are to judge by the Louisville papers, the wheelmen are satisfied with having obtained a decision that the wheelmen are entitled to the usual privileges of the road. If they allow the matter to stand as it is, there is no telling how soon some miscreant may repeat the doctor's performance.

At Owosso, Mich., 29th, the following events are open: Half-mile, \$25 suit; one-mile, \$25 watch; three-mile, lap, \$30 water pitcher; quarter-mile, \$15 guitar. L. A. BURHANS, Secretary.

The Cracks at Philadelphia.

The spacious grand stand, the bleachers and the grass plats about the track on the Tioga Athletic Club's grounds at Westmorland, Philadelphia, were simply jammed with people last Saturday. The 6,000 people went to see Zimmerman win his eighth piano and to see what the local idol, Taxis, and the Chicago men could do. They expected to get a glimpse of Tyler and Windle, but these flyers remained at Springfield. Berlo, Mulliken, Wells of Toronto, George Smith, Charles M. Murphy and Wheeler were there, so that the talent was well represented.

The track was in its best condition, and while by no means the equal of the one at Springfield, it is quite capable of record breaking for any distance over a half. A portion of the bleacher boards fell during the races, and several people were badly shaken up, while a young man named Cooper had his leg broken. There were officials enough for two meets, yet the races dragged and were not run off with that promptness characteristic, seemingly, only of Springfield.

The races were refereed by O. W. Bunnell, judged by Dr. G. Carleton Brown, C. H. Luscomb, S. A. Boyle and Albert Mott; timed by J. B. Fontaine, H. G. Fitler, F. H. Garriques and S. Wallace Merrihew. There were committees by the score, but Mr. Crowther seemed to have had the full management on his hands; at least he was a very busy individual.

In the first heat of the quarter-mile open Rhodes got a good start and beat out Berlo for first, and in the second heat Lumsden crossed the tape easily, two good lengths ahead of Bilyeu and three in front of George Smith. Wells, Mulliken and Munger did not qualify in this heat, nor did Wheeler in the first. In the final Smith went away at a fearful pace and won handsomely, while Rhodes and Lumsden fought it out for second, the former winning by a foot or more.

The 2:40 class had a limit of 2:50 placed on it, and such loafing was never seen. On the last lap Murphy went out and won by two lengths from Donnelly, but as the time was only 2:59 3-5 it was run over, the result being the same except as to time, that being 2:37 4-5.

Zimmerman from scratch, Wunder (35 yards) and Bahl (80 yards) qualified in the first heat of the half-mile handicap; Donnelly (60 yards), Mulliken (50 yards) and Keyser (85 yards) got in on the second heat, while Bilyeu (55 yards), Geyler (75 yards) and Pawley (95 yards) were the first three in the third heat. Munger, Murphy, Rhodes, Wells, Bliss and Wheeler did not get placed. Zimmerman could not get through the field and Pawley won, with Bilyeu a close second.

Special prizes were offered for the quarter and half in the "world's record" or piano race, and George Smith went out for the former and got it, Munger and Taxis being close up, while Munger took the half. Munger started the spurt on the backstretch, but Zimmerman and Lumsden caught him, the former beating the Chicagoan in for first, while Taxis was third, Rhodes fourth and Berlo fifth.

In the mile tandem Wheeler and Mulliken, from scratch, soon caught Donnelly and Bilyeu (55 yards), but the latter team won on the spurt.

In the mile handicap Bliss was at twenty yards, with no one back of him. Rhodes quit on the first lap and Munger went out at a good clip. Bliss overhauled the field at the last turn and would surely have won had he been able to get through; but this was impossible, for there were twenty or more inside a space of ten yards. As it was he was fifth or sixth, while Coates won, though there were three or four that might have been called first, so close was the finish.

In the lap race there were only three starters, Bliss, Murphy and Rich. The first lap it was Murphy, Bliss, Rich; second, Bliss, Rich, Murphy; third, Bliss, Murphy, Rich. Bliss had his own way all through.

The mile invitation race had a limit of 2:37 placed upon it, and as it was a glorious loaf all the way around it was not run inside the limit, the time being 2:48 1-5, Zimmy being first, Taxis second, Rhodes third, Munger fourth and Berlo fifth. In the run-over Munger set the pace for a quarter, when Zimmerman and Rhodes went up side by side. Zimmy took the pace on the second lap, then Munger and Rhodes went up, and at the bell lap Zimmy was leading, the others all being bunched. On the backstretch Lumsden started the spurt, but "Jersey lightning" was after him and passed him fifty yards from the tape. Lumsden, as soon as Zimmerman passed him, sat up, thinking Taxis a couple of yards back; but he wasn't, and Lumsden was beaten out for second by an inch or two.

The summaries are as follows:

One-mile, novice—E. Vassallo, Hartford, 1; George N. Rocket, 2; Howard C. Smith, 3; time, 2:43.

Quarter-mile, open—George C. Smith, U. C. R., 1; W. A. Rhodes, C. C. C., 2; A. E. Lumsden, C. C. C., 3; time, :33.

One-mile, 2:40 class—Charles Murphy, N. Y. A. C., 1; J. C. Donnelly, O. W., 2; Louis Geyler, C. W., 3; time, 2:37 4-5.

Half-mile, handicap—Raymond Pawley, A. P. W., 95 yds., 1; S. H. Bilyeu, P. A. W., 55 yds., 2; Charles Bahl, Q. C. W., 80 yds., 3; time, 1:07 1-5.

One-third mile, flying start—A. E. Lumsden, C. C. C., 1; P. J. Berlo, M. A. C., 2; G. C. Smith, U. C. R., 3; time, :48.

One-mile, world's record—A. A. Zimmerman, N. Y. A. C., 1; A. E. Lumsden, 2; W. W. Taxis, P. A. W., 3; time, 2:26 1-5.

One-mile, tandem, handicap—S. H. Bilyeu and J. C. Donnelly, 120 yds., 1; W. A. Mulliken and H. C. Wheeler, scratch, 2; time, 2:35 2-5.

One-mile, invitation race—A. A. Zimmerman, 1; W. W. Taxis, 2; A. E. Lumsden, 3; time, 2:35 1-5.

One-mile, handicap—G. M. Coates, 165 yds., 1; W. N. Price, 125 yds., 2; R. Pawley, 175 yds., 3; time, 2:20 2-5.

One-mile, lap race—J. P. Bliss, nine points, 1; C. M. Murphy, six points, 2; A. B. Rich, four points, 3.

* * *

Buffalo Racers' Expenses Stopped.

BUFFALO, Sept. 19.—Unless something unforeseen transpires cycling in this city is reduced again to the ranks of pure amateurism, for a while at least. The Buffalo Athletic Club has declared that it will not send any more cycling teams abroad for competition. So whatever racing is done must be paid for by the individual. When one reviews the most unhappy chain of circumstances connected with the members of the B. A. C. while abroad, the reason for this proclamation is apparent. In looking backward one is amazed at the unfortunate accidents happening to these plucky riders, and it is a marvel that in many cases they escaped so easily. The men

of the B. A. C. have shown that they are capable of great things and have done much for the interests of wheeling, and their work has been such as to give the B. A. C. a world-wide reputation; but ill luck has fallen upon them just when they were to do better work, and in spite of all precautions they seem to have been marked for all accidents.

These circumstances are very deplorable, as this club has always been distinguished for its broad and liberal policy, and has a like reputation abroad. The B. A. C. is about the only club in Buffalo which has adopted these lines, and for a time at least Buffalo's speedy ones will have to go deeply into their own pockets. I learn from reliable sources that many prominent clubs of other places have been compelled to adopt the same measure. A club must have a bank with unlimited capital to successfully carry out a scheme of this kind.

THE FIFTY-MILE ROAD RACE

of the Ramblers' B. C., which was to have taken place on Saturday, did not materialize from lack of interest, there being but few entries, and so it is postponed indefinitely. The Rose road race, to take place Oct. 1, is the all-absorbing topic. It will be a team race of fifty miles, and is expected to draw entries from every cycle club in Buffalo. The Rose Brothers have offered a magnificent trophy, and the winning team will be the giants for a time.

F. C. Furman of the Ramblers' B. C., not being satisfied with breaking the record over the Corfu course—fifty miles in 3h. 10m.—attempts to lower Van Wagoner's record over the Erie-Buffalo run—7h. 40m. for the 100 miles—and succeeds in bringing it down to 7h. 05m. This record was made yesterday, at which time Captain Klipfel of the Ramblers' B. C. also broke a record over the Buffalo-Dunkirk-and-return course (distance, 100 miles) making it in 8hs. 45ms. Among the centurians of yesterday may be mentioned F. A. Foell, who made his eighteenth century over the Le Roy course. George Klipfel and C. L. W. Reister also made centuries over the Dunkirk course. Nearly all the wheelmen who love road riding took a spin through the country yesterday.

* * *

Denver Will Have Races.

Denver is to have a cycle tournament this year after all. That infant organization, the Colorado Wheelmen, is the promotor, and it promises to be a beauty, too. Oct. 8 is the day set, and the open and handicap events are open to the world. The programme, as at present made up, is as follows:

One-mile, novice; half-mile, open; one-mile, three-minute class; two-mile, lap open; quarter-mile, open; one-mile, D. A. C. championship; one-mile, Ramblers' championship; one-mile, Capitol Cycle Club championship; one-mile, Denver Wheel Club championship; one-mile, Colorado Wheelmen championship; two-mile, handicap; half-mile, tandem, open; five-mile, handicap; one-mile, final heat, championship; one-mile, consolation.

The winners of the club championship races are to meet in the fourteenth event for the city championship.

Committees are out and working hard, the prize committee has met with excellent success in its field and all promises well for a most successful termination to the Colorado Wheelmen's enterprising endeavor. With the D. C. U. in a state of inactive hypnotism the efforts of this pushing young organization are now acceptable.

The races at the Denver Athletic Club's field sports resulted as follows:

Half mile, open—First heat—Block, 1; Taylor, 2; time, 1:17.

Second heat—Boles, 1; Banks, 2; time, 1:18.
Final heat—Boles, 1; Taylor, 2; time, 1:14.
Two-mile, handicap—A. Banks, 125 yds., 1; B. J. Sylvester, 75 yds., 2.
One-mile, open—O. E. Boles, 1; N. B. Taylor (Moline), 2; time, 2:37 3-5.
Five-mile, handicap—O. E. Boles, 1; J. A. McGuire, 2; E. R. Pynchon, 3; all scratch men, who staid together and overhauled the limit men (350 yds.), in the third mile. Time, 14:18 2-5.

Boles, who won all the races he started in, is on elegant rider and was in great condition, never seeming to be pushed. The time made by him is state record in all events. Block, holder of the state championship, did not come up to expectations; lack of condition was likely the cause.

The state record (amateur) is now 2:34, Louis Block setting it at that notch one day last week. He claims to be able to ride it under 2:30 on a quarter-mile track. SPHINX.

* * *

The Milwaukee Races.

With excitement running at the highest pitch, hats, parasols and handkerchiefs waving, bands playing and nearly twenty-five hundred people on their feet cheering like mad at the conclusion of the last race, the Milwaukee Wheelmen's race meet may rightly be called a tre-

F. J. SCHROEDER.
Chairman Racing Board Milwaukee Wheelmen.

mendous success. The wildest visionary of the club had not had the nerve to prophesy anything like it, and it was a surprise party all around. The weather was auspicious, cool and delightful. The track, while not in a record-breaking condition, was fair, and gave no cause for particular complaint. This was the first exclusive bicycle event ever given in the Cream City, and the great success, notwithstanding the postponement and various other attractions, including the state fair, makes it clearly evident that cycling is the premier of athletic sports.

Sprinkled around through the crowd was an occasional farmer from the interior, who took a day off from the fair to witness the races and size up the speedy machine that made it possible to lower the colors of Nancy Hanks.

No remarkably fast time stands to the credit of the meet, but each race was a splendid work of the handicapper's art, and as a result the finishes were so well bunched that a blanket would have covered them, while the excitement ran riot with the spectators.

The world's fair city was represented by a number of her most prominent riders, who gave a fine exhibition of the racing talent for which it is famous throughout the country. The coterie consisted of Cy Davis, W. F. Knott, Gus Steele, A. L. Leonhardt and E. W. Ballard. Among other outside riders were Louis Reed, of Ripon, who made the

THE TOURIST.

The Highest Grade Bicycle in the World. Perfect in Material, Construction and Finish.

Made at Colt's West Armory, Hartford, Conn., under the same system and with the same attention to detail followed in the manufacture of Colt's fine fire arms. Gun steel forgings; all cones and bearing cups cut from the bar, not stamped.

BIDWELL (THOMAS)

PNEUMATIC TIRES.

The races that have been won, the records that have been broken and made on our racing tires this season have been made a matter of comment by nearly every daily and every weekly paper in the country, in addition to the cycling press. Note

The Quarter-Mile in 27 Seconds.

Half-Mile in 1m. 01 4-5s.

One Mile Beating Nancy Hanks.

Two Miles in 4m. 37 2-5s.

And, in fact, all the World's Records up to five miles are on Bidwell [Thomas] Tires. They don't burst, they don't leak and they are very fast. We want you to NOTICE these statements for we shall refer to them in our adv. on 1893 tires which will shortly appear. We shall prove that the Bidwell (Thomas) Pneumatic is a long way ahead of all competitors.

GEO. R. BIDWELL CYCLE CO.,

306, 308 and 310 West 59th Street,

NEW YORK.

Tire Factory, 49-51 West 66th Street, New York.

fastest mile of the meet, 2:38 in the three minute class.

The idol of the crowd was Sanger, who was in excellent form and who proved the hero of the day. In every event he was heavily handicapped, and especially so in the five-mile race, where twenty-five starters qualified. This was the greatest event of the day's sport, and for genuine riding and unalloyed excitement at the finish was simply grand.

Sanger pushed his wheel over the tape with only a few inches to spare, amid the cheers of the crowd. Gus Steele of Chicago made a heroic effort to hold Sanger, but his spurt at the finish proved of no avail against the wild rush of the badger flyer. E. W. Ballard of Chicago finished third, Charles Price of Milwaukee fourth. The time was 13:11 2-5. Some wild enthusiast claimed that Sanger had broken the five-mile competition record, which, however proved incorrect.

At the request of the spectators Sanger consented to ride against the world's record, but had no expectation of doing anything to speak of, as the track was not in condition. He got away with rather a poor start, paced the first quarter by Louis Reed and the second quarter by Cy. Davis, who pulled him through in 1:08. Holmes paced him in the other quarter and Andrae brought him home; time, 2:20 1-5—not equal to his former trial on same track of 2:19 1-2.

Milwaukee may well feel proud of her racing talent, as the summing up of the several events will attest. With a racing track for cycling only, there is every reason to think that next year will develop flyers of the first water and equal if not superior to any in the country. The officers of the meet were Henry P. Andrae, handicapper; E. A. Savage, referee; N. E. Oliphant, R. S. Baird, G. Anssen and Peter Gillss, judges. E. J. Meisenheimer, H. Krockner, R. P. Wheeler and G. F. Berger, timers; Frank J. Morawitz, clerk of course; John J. Baumgartner, chief marshal. The racing board had the meet in charge, and labored diligently for its success.

SUMMARIES.

One-mile, Milwaukee Wheelmen—George F. Kneutzel, 1; Henry J. Schmitz, 2; Walter N. Durbin, 3; time, 2:40 2-5.

Two-mile, handicap—W. C. Sanger, scratch, 1; John C. Reitzner, Mercury Cycling Club, 150 yds., 2; A. L. Leonhardt, Chicago Cycling Club, 3; time, 4:53 3-5. Handicap limit, 500 yards.

Half-mile, scratch—W. C. Sanger, Milwaukee Wheelmen, 1; Cy. Davis, Chicago Cycling Club, 2; F. Terry Andrae, Milwaukee Wheelmen, 3; time, 1:15.

One-mile, three minute class—First heat—John C. Reitzner, Mercury C. C., 1; W. F. Knott, Oak Park, C. C., 2; Ed Roth, Milwaukee Wheelmen, 3; time, 2:44.

Second heat—Louis Reed, Ripon, Wis., 1; G. F. Kneutzel, Milwaukee Wheelmen, 2; W. W. Hughes, Oak Park C. C., 3; time, 2:34 1-5.

Final, first three out of each heat—J. F. Ritzner, 1; Louis Reed, 2; W. W. Hughes, 3; time, 2:45 1-5.

Five-mile, handicap, for Andrae trophy—W. C. Sanger, scratch, 1; Gus Steele, 450 yards, 2; John F. Ritzner, 300 yards, 3; time, 13:11 2-5.

One-mile, 3:40 class—W. C. Wegner, 1; Gus Steele, 2; Fred Holmes, 3; time, 3:47.

One-mile, invitation race—Cy. Davis, 1; W. C. Wegner, 2; Gus Steele, 3; time, 2:57 2-5.

* * *

Manhattan B. C. Races.

The annual races of the Manhattan Bicycle Club occurred Saturday at Englewood, N. J., in the presence of several hundred people. The events were run off on the road, which was not in the best shape. C. A. Sheehan acted as referee. The mile handicap was captured by R. Debes, with R. G. Betts second and John F. Ives third; time, 2:29 2-5. E. J. Stern, from 50 yards, won the mile novice, handicap in 2:35 2-5, J. Nonnenbecher and J. Thompson being second and third, respectively. R. H. Bartsch (140 yards) was first in the two-mile

handicap, and C. P. Stanbach and W. H. Pederson second and third respectively; time, 5:49.

The five-mile handicap, the last event on the programme, was the most interesting, and R. G. Betts, formerly of Chicago, was first across the tape, his time being 17:20. W. J. Monohan was second and W. H. Pederson third.

* * *

A Speedy Chicagoan.

The accompanying photograph is an excellent one of C. W. Davis, one of the Chicago Cycling Club's speediest riders. Davis is the man who recently rode a

quarter-mile in 32 1-2 seconds, a world's record at the time. He has won many races at Parkside and elsewhere, but, singularly, devotes very little time to training. He will be seen at the western circuit races.

* * *

At Woodbury, N. J.

The Reta Bicycle Club, of Woodbury, N. J. held its annual meet Saturday on the Greene track, 500 people being present. The track was in good shape and fair times were made. The summaries, which follow, tell the story.

One-mile, novice—C. A. Kean, 1; George Sweeten, 2; time, 2:57.

Half-mile, open—T. M. Jones, 1; C. L. Lodge, 2; F. G. Hooper, 3; time, 1:19 3-4.

One-mile, C. C. C. championship—C. A. Holdcraft, 1; A. H. Dilks, 2; time, 3:14.

One-mile, 3:10 class—H. Butcher, 1; Henry Wolfer, 2; time, 2:57.

Quarter-mile, open—H. C. Barnetta, 1; F. G. Hooper, 2; time, 3:04.

Two-mile, open—H. N. Swank, 1; C. W. Pierson, 2; time, 6:08 1-2.

One-mile, for R. C. and C. C. C. members—Geo. Sweeten, 1; W. R. Satch, 2; time, 2:55.

One-mile, Camden and Gloucester Counties championship—T. M. Jones, 1; C. W. Pierson, 2; time, 2:50.

One-mile, R. C. championship—George Sweeten, 1; J. H. Van Hest, 2; time, 2:53.

* * *

The Western Circuit.

It is now sure that a majority of the eastern fast men will be seen on the western circuit, some of them at all the meetings and some of them at part. Harry Rouse of Peoria turned up smiling in Chicago Monday, loaded with Springfield gossip. What pleased him most, however, was that he had secured promises from most of the men to ride at Peoria.

"Zimmerman will be there sure," he said. "He says he regards Peoria as next thing to home and can't miss it." It seems that some difficulties which stood in the way have been removed. Taylor will ride at Peoria only. He has to return to college (Harvard) Oct. 1.

Tyler comes west for all the events at the expense of the Springfield club.

The Manhattans will be well represented by Berio, Banker, Wheeler and Hess.

Arnold and Taxis are among the probabilities—not quite certain.

It goes without saying that the fast western men will all go the rounds. Sanger will meet the cracks for the first time.

Half rates are granted to Peoria from all points in the state. Illinois day, on which the races are to be run, usually draws from 50,000 to 60,000 people to the fair.

The Evansville programme consists of the following:

OCTOBER 6TH.

One-mile, novice; half-mile, handicap; one-mile, class 2:45; one-mile, open; one-mile, race for men forty years old and older; quarter-mile, flying start, open; half-mile, scratch, Evansville Cycle Club; five-mile, handicap.

OCTOBER 7TH.

One-mile, scratch, Indiana riders; two-mile lap race, half-mile, one-mile, one and one-half mile, two-mile; one-mile, handicap; half-mile, boys under eighteen; two-mile, handicap; half-mile, open; one-mile, handicap, Evansville Cycle Club.

* * *

A Coming Road Race.

The Mercury Cycling Club is making extensive preparations for holding their second annual road race Saturday afternoon, Oct. 1. The distance to be covered is twelve miles. The start will be from Oakwood Station on the Howell road, and the finish will be on Kinnickinnic avenue, which is very accessible from all parts of the city. It is expected that about fifty entries will be made. The prizes will be numerous. The club has selected Casper M. Sanger to officiate as referee. The judges will be the president of the local club, and Captain Neville of the Mercury will act as starter.

* * *

A Track at Erie, Pa.

At the last meeting of the Erie Wanderers Cycling Club, the following officers were elected: President, G. A. Walmsley; vice-president, W. J. Sands, Jr.; recording secretary, H. E. Tidman; financial secretary, Charles Mertens; treasurer, Wm. C. Brehm; captain, G. J. Kuder; lieutenant H. H. Stern.

The Erie Wanderers and the Liberty Cycling Clubs will jointly build a mile bicycle track on the grounds of the Erie Athletic Association.

* * *

Another Mistake at Louisville.

A complete list of officers for the tournament has not been made out, but Judge Sterling B. Toney, of the law and equity court; William L. Jackson, of the criminal court, and Reginald H. Thompson, of the city court, have accepted invitations to act as judges.—Louisville Times. Will the promoters never learn to select men of experience. These men may be excellent at their own specialties, but probably know little or nothing about judging a bicycle race.

* * *

Johnson's Wonderful Times.

If the reported performances of John S. Johnson prove to be correct, it would seem that the form shown by that rider at Chicago, Indianapolis and elsewhere was a long way below his true form. Johnson has, for a year or more, been a rapidly improving rider, and, without other assistance than the exercise of common sense in his training, has advanced from his novitiate to the front rank of flyers.

According to information received, Johnson commenced by riding a flying quarter in 27 2-5 sec. This was not record, as claimed, Zimmerman having done 27 sec., assisted, however, by a strong wind. This performance, how-

ever, was totally eclipsed two days later when Johnson, in the presence of 200 people, rode a half-mile in 55 1-2 sec., and later a quarter in 26 3-5 sec. In both he was paced by a running horse (a trotter was too slow, of course) driven by C. W. Williams, a horseman who has taken considerable interest in cycling lately. It is even said that he was slowed at the finish of the quarter, the horse being unable to keep away!

How are we to account for these phenomenal times? Johnson has never before shown anything like them. The track on which they were made is at Independence, Ia., and is kite shaped. It is owned by Mr. Williams. No information is given as to the timing, except that "all the officials were professional trainers of trotters and skilled in the use of the watch." Many details will have to be forthcoming before the records can be accepted. Tom Eck has been training Johnson since Parkside races. It is reported that a two-days meeting will be given at this track.

The report of Johnson's mile performance was received after the above was placed in type.

* * *

At Waterloo, Ia.

Race held on the 14th by the W. B. C. Result: Sixteen-mile road race—H. L. Helsing, 14m., 1s; J. R. Cheesbro, scratch. 2; time, 1h., 13m., 30s.

* * *

At Eau Claire, Wis.

Races at the fair 14th: One-mile, novice—O. Chappell, 1; F. Thompson, 2; A. Williams, 3; time, 3:07.

Two-mile, open—G. B. Thomas, 1; S. Twiner, 2; D. Connell, 3; time, 6:19.

* * *

Waller Meets With an Accident.

STOCKTON, Cal., Sept. 17.—[Special telegram]—George W. Waller started yesterday in an attempt to beat the twenty-four-hour record. While riding well, however, he touched the fence and, being thrown heavily, was knocked insensible. He covered seventy-one and a half miles in 3 hrs. 48 min.

* * *

At York, Pa.

One-mile, novice—W. H. Wilson, Pittsburg, 1; time, 2:45 3-4.

Half-mile, open—A. A. Zimmerman, N. Y. A. C., 1; time, 1:13 3-4.

One-mile, handicap—J. C. Donnelly, Philadelphia, 1; Raymond Pawley, Asbury Park, 2; time, 2:22. The last quarter was made at 20:45.

One-mile, open—George F. Taylor, New York, 1; A. E. Lumsden, Chicago, 2; time, 2:57.

One-mile, ordinary, open—W. W. Trxis, Philadelphia, 1; C. M. Murphy, 2; time, 3:15.

Two-mile, handicap—A. A. Zimmerman, 1; J. P. Bliss, Chicago, 2; A. E. Lumsden, Chicago, 3; time, 5:01.

Quarter-mile, open—A. A. Zimmerman, 1; A. Lumsden, 2; time, 38 1-4.

Two-mile, lap, open—A. A. Zimmerman, 1; W. W. Taxis, 2; time, 5:34 3-4.

One-mile, three-minute class, open—Charles P. Culver, Springfield, Mass., 1; time, 2:57 1-4.

One mile, 2:40 class, open—J. C. Donnelly, Philadelphia, 1; time, 2:57.

Half-mile, scratch, open—H. C. Tyler, Springfield, Mass., 1; time, 1:24 1-2.

One-mile, 2:35 class, open—J. P. Bliss, Chicago, 1; C. M. Murphy, New York, 2; time, 2:39 1-2.

One-mile, tandem—W. W. Taxis and George F. Taylor, 1; A. A. Zimmerman and Berio, New York, 2; time, 2:41 1-2.

* * *

Coming Events at Detroit.

The Business Men's Cycle Club will hold a club tournament on the Belle Isle track Saturday, Sept. 24. The events were advertised for last Tuesday, "rain or shine," but a forty-eight-hour rain reduced the ambition of the B. M. C. C. scorers, who prefer riding to swimming.

The new bicycle track of the Michigan Athletic Association will be opened next Saturday evening with four races—one-mile, open; two-mile, handicap; three-mile, handicap, and one-mile club.

AMES & FROST COMPANY,

Sieg & Clementi Company, Chicago, sell hundreds of them.

302 WABASH AVENUE, CHICAGO.

ARE YOU OR ARE YOU NOT AWARE

We are in the midst of the best part of the cycling season, and that now is as good a time as any to push the trade?

That we are offering bargains in new wheels that cannot possibly be duplicated in any market—bargains that will surely catch your trade?

That we are the oldest and largest jobbers of cycles and sundries in America, if not in the world, therefore buy in much larger quantities than the small concerns, and name bed-rock prices?

That we handle all the leading makes, and manufacture, import and job the most complete line of cycles extant, and that our inducements are such that we get orders from every state, territory and large city in the United States, Canada and Mexico, also sell in England and South America.

Get our Catalogue and Terms to dealers and agents and you will be more thoroughly convinced we can do you good.

ROUSE, HAZARD & CO., - 89 G STREET, - PEORIA, ILL.

Electric lights with strong reflectors will make the grounds as light as day. The association is also arranging a big meeting to be held Oct. 10 in order to catch the eastern flyers on their way through the west. A twenty-five-mile road race on Belle Isle is also being agitated in connection with the meet. MARS.

The Indiana Century Record.

Nine members of the Zigzag club started on the century for record Sunday, Sept. 18, and every man finished, five of them within record, which was 7:50. The course was the old Cambridge City run over the National road, and was in good condition though quite dusty. Minor and Hunter made the hundred in seven hours flat, riding the last six miles in 23 minutes. The following summary is for the whole distance, 106 miles: Minor, time 7:23; Hunter, 7:23; Crawford, 7:45; McCain, 7:41; Kurtz, 8:54; Ribble, 7:45; Fox, 8:58; Fisher, 9:00; Kipp, 9:00.

Peoria Entries.

Up to Tuesday night the following men had entered and entries were still coming in:

Lumsden, Bode, Van Sicklen, Young, Davis, Thorne, Bliss, Merrill, Githens, Munger, Ballard, of Chicago; Rich, Hess, Wheeler, Banker, of New York; Myers, Steenson, Wood, Shreffler, Conway, Bates, Haffner, Distler, Scofield, Kircher, Miller, Wills, Snyder and Bickmore, of Peoria; Minor, Indianapolis; Gates, Racine, Wis.; Sanger, Milwaukee; Anderson, Canton, Ill.; Boychon, Davenport, Ia.; Brindley, LeRoy, Ill.; Anderson, Roodhouse, Ill.; Johnson, Minneapolis; Dorntge, Buffalo; Berlo, Boston; Taxis, Philadelphia; Palmer and Brittingham, Danville; Tyler, Springfield; Arnold, New Britain, Conn.; Zimmerman, Freehold, N. J.; Matthiesen, La Salle, Ill.; Thompson, Jackson, Mich.; R. P. and J. N. Sholl, Baitonville, Ill.

At Butte City, Mont.

BUTTE, Mont., Sept. 18.—At the state bicycle tournament held here, Swender, of Helena, won the five-mile championship in 14:45. Swederman also won the mile, two-mile and half-mile championships, all safety, standing start.

At Freeport, Ill.

Races were held on the 16, the closing day of the Northern Illinois Agricultural Association's fair. Results:

One-mile, Stephenson County championship—William Miller, 1; Albert Green, 2; John Haller, 3; time, 2:52.

One-mile, open—E. W. Ballard, of Chicago, 1; Harry Dever, Rockford, 2; F. J. Rosbrook, Dixon, 3; time, 2:35 1-2.

Quarter-mile, boys' race—Claude Ernest, 1; Willie Smythe, 2; Albert Moogk, 3; time, 44 2-5.

Five-mile open—W. F. Reumon, Elgin, 1; E. W. Ballard, Chicago, 2; H. H. Scoville, Dixon, 3; time, 18:51.

One-mile, handicap—W. F. Henman, Elgin, 80 yds., 1; Harry Dever, Rockford, scratch, 2; H. H. Scoville, Dixon, 60 yds., 3; time, 2:35 1-5.

Half-mile, open—E. W. Ballard, Chicago, 1; Harry Dever, Rockford, 2; H. H. Scoville, Dixon, 3; time, 1:21.

At Iowa City, Ia.

Races at the fair, 14th, resulted thus:

Half-mile—J. G. Lindsay, 1; R. N. Carson, 2; Charles Cammack, 3; time, 1:30 1-2.

Quarter-mile—Ralph Himball, 1; Roy Close, 2; Homer Hughes, 3; time, 44.

Quarter-mile—Jack Lindsay, 1; Tom Kimball, 2; R. N. Carson, 3; time, 39 3-4.

The Greatest Novelty Yet.

It is true that the Pope Manufacturing Company will build a track. It will be near the factory and one-third of a mile in circumference. In connection with it there will be the greatest novelty yet produced—wit, an automatic pace-

maker! Close to the inside edge will be figure mounted on a wheel, operated by electricity, which can be made run at any pace desired. Now, ye two-minute men, there will be no more poor pace-making.

Trainer Stackpole's Benefit.

Unfortunately for Arthur Stackpole, nearly all Chicago's fast men were away last Saturday when his benefit occurred at Parkside. The attendance was slim. Tuttle made his reappearance and rode fairly. He is not in shape yet. O. C. Green of Blue Island won two firsts, two seconds and a third. He is an improving man and has been gobbled by the Chicagos. Results:

One-mile, handicap—O. C. Green, 110 yards, 1; F. H. Tuttle, 50, 2; time, 2:38 3-5.

Two-mile, handicap—O. C. Green, 225 yards, 1; E. W. Ballard, 60, 2; A. W. Sweigart, 300, 3; O. R. Barnett, 300, 4; time, 5:16 2-5.

One-mile, lap race—H. A. Githens, 1; E. W. Ballard, 2; time, 2:44 2-5.

Quarter-mile, scratch—E. W. Ballard, 1; O. C. Green, 2; A. Helmich, 3; F. H. Tuttle, 4; time, 37 3-5.

Half-mile, open—E. W. Ballard, 1; O. C. Green, 2; A. Helmich, 3; A. T. Heywood, 4; time, 1:15 4-5. One-mile, open—E. W. Ballard, 1; F. H. Tuttle, 2; O. C. Green, 3; time, 2:38.

At Baltimore, Md.

BALTIMORE, Sept. 21.—(Special telegram.)—The second race meeting on the Baltimore track occurred to-day. The attendance was marred somewhat by rain, which fell slightly, but about a thousand people attended. Another reason for the comparatively small attendance is the fact that the grounds are a long way out and not easy of access.

The success of the meeting might have been greater had the management been better. It was very far from good. The racing, however, was very fine. Results:

One-mile, novice—Magers, 1; Weber, 2; French, 3; time, 2:46.

Quarter-mile, open—Bliss, 1; Murphy, 2; Wheeler, 3; time, 38s.

Half-mile, open—Zimmerman, 1; Lumsden, 2; Berlo, 3; time, 1:17.

One-mile, 2:25 class—Banker, 1; Bliss, 2; Rhodes, 3; time, 2:41 2-5.

One-mile, handicap—Weber, 160 yards, 1; Hartford, 175 yards, 2; Pawley, 140 yards, 3; time, 2:27.

Quarter-mile, handicap—Hartford, 45 yards, 1; Holland, 30 yards, 2; Magers, 35 yards, 3; time, 34 1-5 sec.

Quarter-mile, open—Zimmerman, 1; Lumsden, 2; Rhodes, 3; time, 35 1-5 sec.

Half-mile, handicap—Murphy, 30 yards, 1; Taylor, scratch, 2; White, 55 yards, 3; time, 1:09 4-5.

One-mile, lap—Zimmerman, 13 points, 1; Lumsden, 7 points, 2; Banker, 5 points, 3; time, 2:45 4-5.

One-mile, invitation—Zimmerman, 1; Taylor, 2; Rhodes, 3. A time limit of 2:40 was placed on the this event. Zimmerman won by ten yards, but the time was 2:55 2-5. Declared no race. Result of second trial—Zimmerman, 1; Berlo, 2; Taylor, 3; time, 2:33 1-5.

At Springfield, Ohio.

The races of the Springfield Bicycle Club occurred Tuesday at the Clark County fair grounds in the presence of a somewhat slim attendance, probably eight hundred persons. The total value of the prizes was \$1,000. T. J. Kirkpatrick, ex-president of the league, officiated as referee, and E. A. De Blois, of Hartford, as one of the timers. Results:

Mile, novice—Harry Grant, Springfield, 1; W. L. Wood, Springfield, 2; S. F. Wilson, Columbus, 3; time, 2:47.

Half-mile, open—E. W. Ballard, Chicago, 1; A. L. Baker, Columbus, 2; Arthur French, Columbus, 3; time, 1:12 4-5.

Mile, handicap—Arthur French, Columbus, 1; A. L. Baker, Columbus, 2; Con Baker, Columbus, 3; time, 2:22 2-5.

Half-mile, county championship—Harry Grant, Springfield, 1; time, 1:18 2-5.

Quarter-mile, open—Arthur French, 1; C. C. Vantine, Finlay, 2; Con Baker, Columbus, 3; time, 35 2-5.

Two-mile, handicap—Arthur French, Columbus, 1; Con Baker, Columbus, 2; C. E. Tudor, Cincinnati, 3; time, 5:05.

Mile, county championship—Wayne Casper, Springfield, 1; L. C. Worthington, Springfield, 2; W. L. Wood, Springfield, 3; time, 2:53.

Mile, safety, open—Arthur French, Columbus, 1; E. W. Ballard, 2; A. L. Baker, Columbus, 3; time, 2:51 2-5.

Three-mile lap race, open—C. E. Tudor, Cincinnati, 1; Con Baker, Columbus, 2; A. L. Baker, Columbus, 3.

At Canton, Ill.

Races were held last week by the Canton Bicycle Club. Results:

Half-mile, novice—Bert Overman, 1; Ernest Dean, 2; George Baron, 3; time, 1:27.

Half-mile, three heats—Perry Anderson, 1; Sydney Stevens, 2; Howard Held, 3; time, 1:20.

Half-mile, boys' race—Frank Hayes, 1; Fred Thomson, 2; Harry DeWolf, 3; time, 1:50.

Quarter-mile—Sydney Stevens, 1; Perry Anderson, 3; E. Guilbault, 3; time, 39.

One-mile, handicap, for gold medal—Perry Anderson, scratch, 1; Howard Held, thirty yards, 2; Sydney Stevens, scratch, 3; Bert Overman, sixty yards, 4; time, 2:52.

Half-mile, flying start—Bert Overman, 1; Frank Wafer, 2; Morris Kirby, 3; time, 1:10.

Two-mile, handicap—Sydney Stevens, scratch, 1; H. B. Heald, scratch, 2; Perry Anderson, scratch, 3; E. Guilbault, 100 yards, 4; time, 6:44 3-5.

Half-mile, consolation—F. W. Plattenburg, 1; C. M. Bardwell, 3; R. A. Perkins, 3.

World's Tandem Safety Records.

On Sept. 6, at Herne Hill, Condon. A. F. Hsley and J. Rowley of the Stanley Club created on a Raleigh world's tandem safety records from four to twenty-three miles, inclusive. The following were the times, as taken and certified by Pembroke Coleman, the N. C. U. official time-keeper:

Miles.		Miles.		Miles.	
1	2:36 4-5	9	23:09 4-5	17	43:59 1-5
2	5:13 3-5	10	25:43 4-5	18	46:35 1-5
3	7:47 1-5	11	28:19 2-5	19	49:12 2-5
4	10:21 2-5	12	30:56 1-5	20	51:50 2-5
5	12:53 3-5	13	33:35 2-5	21	54:27 2-5
6	15:27 4-5	14	36:11 2-5	22	57:07 3-5
7	17:59 4-5	15	38:49 1-5	23	59:40
8	20:32 4-5	16	41:23 3-5		

Distance covered in the hour was 23 miles, 250 yards.

At Lansing, Mich.

The bicycle races at the Michigan state fair at Lansing were run Friday, under the auspices of the Lansing Bicycle Club, and were very successful. Results:

One-mile, novice—Henshaw, Detroit, 1; time, 3:55 3-5.

Two-mile, handicap—Keator, Chicago, 150 yds., 1; time, 2:37 3-5.

Lansing Bicycle Club, championship—Potter, 1. Half-mile, open—Lonn LaPorte, 1; time, 1:16 4-5.

Two-mile, state fair championship—Rands, Detroit, 1; time, 5:37 3-5.

Quarter-mile dash—Bode, Chicago, 1; time, 40 3-5.

Five-mile, handicap—Keator, Chicago, 275 yds., 1; Osborn, Detroit, 300, 2; Bradford, Detroit, 500, 3; Ward, Detroit, 440, 4; time, 14:48. Rands started from scratch in this race, but failed to get a place. Loomis of Lansing led at the end of the third mile but was crowded into the fence and disabled.

One-mile, 2:40 class—Rands, Detroit, 1; time, 2:45 4-5.

One-mile, handicap—Heazlit, Detroit, 125 yds., 1; time, 2:30.

One-mile, three-minute class—Potter, Lansing, 1.

Two Events At Manhattan Field.

The annual games of the Manhattan Athletic Club at Manhattan Field last Saturday contained two bicycle events, a mile club championship and a two-mile handicap. Great interest was taken in these races, though they were really tame affairs. George Banker won the championship, with Carl Hess second, in 2:41 4-5, and Hess captured the two mile, from 45 yards, in 5:23 1-5, Banker (scratch) being second and F. S. Elliott (155 yards) third.

Three Interesting Items.

Canary or Maltby will be engaged, if possible, by the Evansville management.

After the Philadelphia races the fast men spread in all directions, going to York, Baltimore, Toronto and other points, as fancy dictated.

The Warren Athletic Club and Wilmington (Del.) W. C., will hold joint meeting on Oct. 1st. A twenty-five mile road race will be made a feature.

THE JACKSONVILLE MEETING.

The Lockwood Cycling Club Has Arranged an Interesting Programme.

The following is the programme arranged by the Lockwood Cycling Club: MONDAY, OCT. 3.

Reception of guests.

9:30 a. m.—Run about the city visiting state institutions for blind, deaf and dumb and insane, and other places of interest.

1:00 p. m.—Short day parade to track and photograph. Special prize for the

A. D. BLACK.

club having the largest number in parade uniform and best appearing club.

2:00 p. m.—Races; \$1,571 in prizes.

7:00 p. m.—Lantern parade; special prize for best decorated wheel.

8:30 p. m.—Reception at Fifth Regiment Armory.

10:00 p. m.—Hop at Fifth Regiment Armory. Tickets \$2. L. A. W. members free.

TUESDAY, OCT. 3.

9:30 a. m.—Country run, 14 miles.

2:00 p. m.—Races; \$1,917 in prizes.

7:30 p. m.—Complimentary concert by the "Famous juvenile band," followed by a smoker and distribution of prizes.

Most of the prizes are now on exhibition, and it is expected that every prize except those which are necessarily made to order will be on hand before the races.

The Lockwood club will have fine dressing quarters for the racing men. They will be supplied with cots, wash-bowls, pitchers, looking-glasses and drinking water. The building will accommodate 150 persons without being crowded.

Entries close Monday, Sept. 26 for this tournament. Those who intend entering should do so at once. Address entries to Arthur D. Black, care of Lockwood Cycling Club.

Race Chat.

The value of Louisville's prizes runs up to \$2,877.

Walter Sanger will be in Peoria at the meet, which takes place Sept. 27.

A special car will be provided for riders going from Peoria to Louisville.

Thirteen events will be run at Cincinnati on Oct. 1. Elgin, Ill., also has races that day.

Tuesday of this week was the tenth anniversary of the first Springfield tournament.

The Canton (O.) races by electric light were so successful that the trotting men will give it a trial.

Pratt & Whitney's employees held an eight-mile road race. M. J. Cosgrove, scratch, won in 26m. 25s.

Columbus (Ga.) will hold races Oct. 28 and 29. J. H. Palhill can supply entry blanks and all details.

The Ravenswoods, Chicago, ran a five-mile race last Saturday with this result: N. R. Wood, 2m. 15s., 1; George Kennedy, 2; J. C. Howard, 3; time, 17m. 4s.

ARTHUR D. BLACK, Loekwood Cycling Club.

THE MOST NEWSY CYCLING JOURNAL IN EUROPE.

For really pleasing cycle reading, bright, chatty and light, commend me to the IRISH CYCLIST. Although it necessarily devotes much of its space to Hibernian affairs, it always contains matter of general interest, while its little stories and anecdotes are well seasoned with Attic salt. Mr. Meccredy would certainly satisfy Charlie's requirement in "able editing," the whole paper is stamped with his pleasant imprint.—The People, London.

The ablest edited and most newsy cycle journal in Europe.—Sporting Times, New York.

One of the smartest and liveliest of cycling papers.—National Press.

Mr. Meccredy's admirable cycling journal has pushed its way by sheer merit and enterprise into the very front rank of sporting papers.—Freeman's Journal.

Specimen Copy, post free, from MECCREDY & KYLE, 49 Middle Abbey St., Dublin.
SUBSCRIPTIONS, POST FREE, SIX MONTHS, 5s 6d; ONE YEAR, 10s.

The best paper in its peculiar line published.—Irish Society.

Its literary fare is still as bright and interesting as ever.—Cycling.

Although some of our English cycle journals are reckoned pretty smart, they cannot beat it.—Hull Daily News.

Matter which from beginning to end is thoroughly interesting, not only to Irish riders but also to English wheelmen.—Liverpool Athletic and Dramatic News.

The most interesting of wheel papers.—Cricket and Football Field.

A credit to the country.—Belfast Morning News.

An admirable miscellany of everything interesting to cyclists.—Weekly Irish Times.

"PERFECT" POCKET OILER.—1/2 Size.

Best and neatest oil can in the world. Throws only a small quantity of oil at a stroke; handsomely nickel-plated. For sale everywhere. Price, 50c. each.

"Perfect" Pocket Oiler Holder.

Best and most convenient device for carrying an oil can on a bicycle. Thoroughly adjustable and easily attached to any part of the machine; no rattling; handsomely nickel-plated. Price, 25c. each.

"Perfect" Pneumatic Pump Holder.—Similar to oiler holder, but slightly larger. Pump is always convenient; and vexatious delays avoided; handsomely nickel-plated. For sale everywhere. Price, 25c. each.

CUSHMAN & DENISON.

172 9th Ave., - New York.

THE NATIONAL L. A. W. SOUVENIR MEDAL made in bronze, gold finished, and the Cottage City medal finished in silver nickel. Both mailed together for 75c.; 50c. singly. A handsome one and one you should take advantage of. The J. E. POWER MEDAL Co., makers, 15 Cornhill, Boston.

KALAMAZOO CYCLE CO.

Kalamazoo, Mich.

THE METAL TURNING CO.'S
MAGIC BICYCLE OILER.

Patent applied for.

We are now ready to supply these goods to the general trade, and claim for them the following points of superiority over any others on the market.

First: They do not leak, and are as clean to carry in the pocket or tool bag as a knife or wrench.

Second: You can get as much or as little oil from them as you need. When a drop only is required, place the feed wire where the drop is needed and press down. If a larger quantity is required press the bottom of the oiler, and the oil will flow freely from the wire. You do not need to waste oil and daub your machine with this oiler. And you can oil your wheel quicker than with any other.

Full size cut.
Patent applied for.

Manufactured Exclusively for

The Whitten-Godding Cycle Co., - Providence, R. I.

To Athletes, Cyclists, Baseball and Footballists,
Horse-back Riders, Boxers and Oarsmen—
When you want to ride, run, walk, row, skate or swim a long distance, USE

ANTI-STIFF

TO STRENGTHEN THE MUSCLES

TO STRENGTHEN THE MUSCLES.

It is a marvelous preparation for Strengthening the Muscular System. With Anti-Stiff there is no faith required; it goes straight for the muscles, and you can feel it at work. It has a peculiarly warming, comforting and stimulating effect on all weak or stiff muscles or sinews. Quick in its action, cleanly and pleasant in use.

Rub it into the muscles every night for a fortnight and you will be pleased at its supporting and strengthening properties. There is not, nor has been, anything like it till now. It differs from all Oils, Embrocations and Liniments, both in substance and effect. Some Athletes are so fond of it that they rub it all over them.

Price, 20c. and 35c. per box.

Trainer's Size, \$1.00.

YOUNG BROS., Joliet, Ill.

Henry E. Ducker, founder of the Springfield meeting, was among the spectators at Hampden Park.

Henry Short, of Santa Barbara, Cal., is reported to have covered a quarter in 30 1-2 sec., no doubt with flying start.

The only prize Zimmerman really needs is a beautiful home with a girl in it. Rumor says he may win the latter at Peoria!

The Evansville men have received their diamond prizes from Gumberts Brothers. They range from \$75 to \$350 and a certificate of value goes with every one.

The employees of the Sercombe-Bolte Manufacturing Company, Milwaukee, will have a road race Saturday. The entries will number about thirty-five. The start will be from Prospect avenue to White Fish Bay and return, about ten miles. The company and other friends have contributed a number of valuable prizes.

3-BEAUTIES-3

The James Safety.

"JAMES" SPECIFICATIONS.

DIAMOND Frame, Warwick Hollow Rim, our unequalled Semi-Tangent Direct Spokes, Southard Cranks, Adjustable Handle-Bar and Seat Pillar, Perfect Chain Adjustment, Ball Bearings throughout (including head), Lamp Bracket, geared to 64 or to suit purchaser, quality ABSOLUTELY PERFECT, FULL GUARANTEE.

ROAD RACER, Weight 28 Pounds,	- - - - -	\$150 00
FULL ROADSTER, Weight 35 Pounds,	- - - - -	\$150 00
TRACK RACER, Weight 25 Pounds,	- - - - -	\$155 00
TRACK RACER, Weight 23 Pounds,	- - - - -	\$160 00

We Guarantee These Weights.

"B. & A." SPECIFICATIONS

WHEELS—29 in. front, 28 in. back, with Warwick hollow rims, with tangent or direct spokes, gun metal hubs. Geared to 65 in. or to order. Finest Weldless steel tube and steel forgings, adjustable seat pillar and handle bar, 6 1-2 in. adjustable cranks. Adjustable balls to both wheels, crank axle, ball head and pedals.

Same Model and Specifications:

TRACK RACER, Weight 26 Pounds,	- - - - -	\$150 00
ROAD RACER, Weight 30 Pounds,	- - - - -	\$140 00
FULL ROADSTER, Weight 34 Pounds,	- - - - -	\$140 00

These prices are with Pneumatic Tires.

These celebrated machines are made by THE NEW BUCKINGHAM & ADAMS CYCLE COMPANY, Coventry Works, Birmingham, Eng. H. P. Cook, Managing Director, having had great practical experience, is turning out the B. & A. in great shape.

During Easter week (in England) the B. & A. captured the most prizes.

Beat the 100 Miles Record.

Mr. Peter Holliday, of the Ramblers' Club, Blackburn, Eng., beat the 100 miles record from Blackburn to Kendal, by the extraordinary time of 48 minutes, on the B. & A. Road Racer, weighing 30 lbs. This is another convincing proof of the superiority of the B. & A. machine.

B. & A. Champion Racer.

South Road Safety.

FRENCH & SONS, Balham, England.

"SOUTH ROAD" SPECIFICATIONS.

THIS MACHINE is the grandest ever offered. We guarantee that there is not a single casting throughout. 28 inch wheels, tangent spokes, Warwick hollow rim, round cranks, adjustable handle bar and seat pillar, ball bearing throughout, lamp bracket, geared to 64 or to suit purchaser.

TRACK RACER, Weight 23 Pounds,	- - - - -	\$155 00

TYLER'S MILE AT SPRINGFIELD WAS MADE ON THE

AIRTITE TIRE

A WORLD'S RECORD FOR A STARTER.

The AIRTITE cannot be torn off the wheel when inflated, and you don't have to call in the police to remove it when it is deflated, nor commit a murderous assault on its vitals to repair it. It's a Jim dandy from Beantown. Write for particulars to

AIRTITE PNEUMATIC TIRE COMPANY,

172 Columbus Avenue, **BOSTON,** KIRK BROWN, Manager.

P. S.--DEAR MR. HICKORY ELLIOTT:---We respectfully submit the above in answer to your conundrum of last week. Give us something hard.

Breezy Bits From Beantown.

The American Arms Company, of East Boston, will start making the Benton spring frame safety fitted with the Preston-Davies pneumatics, this winter, and J. T. Cartwright, a very affable Englishman, will have charge of the construction of same. Mr. Cartwright is in correspondence with the great English road rider, Holbein, who is expected to arrive in this country next spring.

The Elastic Tip Company, of Boston, is now ready with two pneumatic tires, the Boston, a first grade, and the Cambridge, a cheaper tire, both of which the Elastic Tip people claim are the latest and most approved things. This company has a new pneumatic mending instrument for lightening repairs.

Kirk Brown, the well and favorably known hustler of Philadelphia, has settled down in Beantown for good, and occupies quarters at 172 Columbus avenue, where he shows samples of his really good Airtite tire, which is taking very well with the trade. This tire is entirely out of the usual order of pneumatics, and the manner of fastening to the rim immediately captures the rider, if he is practical. It looks as if Kirk Brown has struck "ile."

V. Dugmore & Company, 194 Columbus avenue, are making a specialty of building wheels to order, and are doing a large business in enameling for the trade. Ven Dugmore is pretty well known in Boston among the trade.

G. A. Drysdale, of 176-8 Portland street, is happy over the arrival of a shipment of Brookes cycles from the well-known Cape Works near Birmingham. The Brookes is one of the standard English makes, and is taking well in and around Boston. Mr. Drysdale has the exclusive United States and Canadian agency, and agents looking for a good wheel handled by a good house would do well to correspond with the Boston firm.

The ever genial Manager Harvey of John P. Lovell Arms Company found time to say that the season just over has been a banner one for Lovell Diamonds.

"Major Billy" Atwell, he of William Read & Sons and the Easy Club, looked happy and stated unblushingly that New Mails sold faster than any other wheel around Bunker Hill, and suggested that "you watch for next year's New Mail."

Dudley, the Columbus avenue dealer is doing a nice renting and repairing business, and personally related the fact that he sold three ordinaries last week, and thinks so well of the old "crocks" that he is always open for a trade or bargain in the high wheel.

Holmes & Company, cycle outfitters, are doing a large business in everything a cyclist wears, and cater to women cyclists. Mr. Holmes tells with glee about a lady who called him to account for the pictorial advertisement of a woman with Holmes's best on, in the *Herald* and Sunday. Mr. Holmes silenced her with, "any lady who reads the Sunday *Herald* should not object to seeing her sex illustrated there."

"Jim" Underwood and his pretty Quadrant depot look well, and it is possibly the prettiest store in cycle row. Underwood sells many wheels in this

handsome American home for the well known Birmingham product. "Considering that I started in late my business has been phenomenal," piped the old-time amateur racer.

Sidwell & Sabin are more than satisfied with their business with the Stover line, and the handsome Phoenix is taking kindly to New England. Mr. Sabin looks as well as he did in the old days when he sold Ridges.

Manager Hill, of the Coventry Machinist Company, had gone to Springfield, but the clerk in charge stated business had been fairly good, and there was no complaint to make.

W. C. Overman, whom it is always a pleasure to meet, had also gone to Springfield, so the pretty typewriter would not commit herself to any statement as to the trade.

Albert Pope, Jr., and Kirk Corey entertained me at the "White Front Mansion," and begged me to see that they did not get the freeze-out at the Cooley, Springfield, as they were interested in young men who would ride blue rims in that town. They got quarters all right. The Pope Manufacturing Company are selling all the Relay wheels they can turn out at present.

Singer and W. W. Stall are resting on their oars after a successful season at Odd Fellows' Hall, and Stall will possibly make a large number of wheels next year.

The Pneumatic Tire Mending Company, Boston, are preparing to push their specialty as seen in Washington.

The Beacon Cycle Company, Westboro, through their president and superintendent, J. F. Wood, and treasurer, A. L. Balbridge, Mason building, showed the result of the recent start of their works. The firm is making a diamond safety; and using some of the old Broncho parts, which makes a fairly good looking wheel. Next year the firm will make a good mount on Humber tires.

Josiah Quincy, that sterling young Democratic master politician, now in charge of the Democratic Press Bureau in New York, occupies offices at 13 School street, Boston, and is interested in Boulanger's unicycle, which the Ames Manufacturing Company, of Chicopee, are figuring on with a view to making. By all accounts the "new fangled thing" on wheels is going to be a hummer. The Ames Company will again make New Mail for Wm. Read & Sons.

The Keating, twenty-four-pound light roadster, is a handsome looking wheel, and is taking well. The wheels made a creditable show at Springfield, and the old and new riders seemed pleased with them. The Holyoke people expect a large trade next season.

Superintendent of Agencies Morgan, of the Overman Wheel Company, says things are moving along nicely at Chicopee Falls. "Of course we are not shipping so many wheels as we were a few months ago, but we are satisfied," said that astute young agency rustler.

New York Trade.

The Gendron Wheel Company seized eighteen consigned wheels at Fred Coningsby's cycle depot, in Brooklyn, Friday, and the Brooklyn dealer, being in debt to other firms, had to close his doors. Coningsby has always stood well in the estimation of the trade and cyclists, so there must be a screw loose somewhere. Bensinger, McDonald & Bow-

dish and the Anglo American Company are two of the creditors.

Stephen Golden of New Howe fame has arrived at last and is showing B. Riley of Bonnick & Company, Coventry, around. They with Arthur Brown, representing the Rudge Cycle Company of Coventry, make up a fine-looking trio. The travelers called at the REFEREE office and will proceed to Chicago in a few days.

For cool rascality commend me to that R. D. Emanuel, amateur cyclist and would-be agent. This young man looks twenty-one and acts fifty years old, and Bidwell and the Gendron people think he is a bit older than any of them. This young man started in business at 177th street and Third avenue—far enough away from creditors, it would seem, but he was not. His game was to order goods, then plead the minor act. His mother, when appealed to by Mike Quinlan of the Gendron company as to her precious, wandering boy's age, stated that he was not twenty-one until next gooseberry time. His plan was to order goods and then ask for credit, and, after giving some kind of reference, sell the goods, pocket the proceeds and then calmly ask his creditors "what are you going to do about it?" When he got into trouble he was accompanied by a shyster lawyer who possibly stood in with him, and when questioned about his methods introduced the "attorney," who talked law by the yard. Quinlan got an express wagon, and with an expenditure of \$25 got his goods back. Bidwell, it seems, did not fare so well. Here's a powerful argument for a cycle dealers' board of trade.

Thomas Saunders expects to sail for home on the Magestic Wednesday. He is in Boston to-day—Monday.

The Metropolitan Hardware Company is in trouble over the Ridges they sold Bensinger, McDonald & Braditch of Brooklyn, as well as some others. There was something lacking on the wheels when delivered (mud guards, I believe,) and there was something faulty in construction, so the Brooklyn firm refers the New York house to its attorney for settlement.

Notes from Buffalo.

There are rumors of all sorts and sizes regarding the standing of various cycle dealers, and the chances are that the snows of the coming winter will bury a few of them. There are other rumors afloat about new firms and companies starting up in the wheel business for the coming season. That there is lots of room for all, we must admit; but we are convinced that it takes quite a capital to establish a profitable cycle business, and care and watchfulness are very necessary for its successful continuance. When we think of the great number of \$6 per week clerks we saw during the summer sporting bran new pneumatics, we do not wonder that some wheel dealers will have to give up the ghost. It is beyond all reason for a young man getting but \$6 per week to pay his board, buy a high grade pneumatic, belong to the most fashionable wheel club and have the best wheel suit and come out square at the end of the season. We are afraid that it will be the dealer who gets left, and he can ill afford to stand many of these sales in order to show up well with a long order list.

WILLIE DUNN.

Like the Coventry Cross.

The Warman & Hazlewood Company is receiving numerous flattering letters from riders of the Coventry Cross. A few days ago the following was received from Private D. Luxton, of the L. N. G. corps. "I like the wheel purchased from you very much. It stands a great

amount of hard usage, and on a long ride last Tuesday I took a heavy tumble without injury to the wheel. The Coventry Cross does good work and pushes easily."

Mr. Tagholm also writes that the wheel has taken him through several century runs and has done lots of country riding. He is greatly pleased at the way the wheel has come out of the hardest kind of runs. He has come to the conclusion that the Coventry Cross is one of the easiest, smoothest and best made machines in the states. At Parkside, Aug. 26, he won first prize on it in the five-mile handicap.

Prices and Politics.

CHICAGO, Sept. 20.—Editor REFEREE:—A writer in the Chicago Evening Post recently made some startling discoveries. He assures us that English wheels sold in this country for \$165 can be bought by the consumer in England for \$85. No American wheel costs over \$70, but the American manufacturer dare not list his wheels lower than the foreigner, as such a step would be regarded as an admission of inferiority. All of which is submitted to wheelmen to prove the tariff iniquitous, and secure their aid to overthrow McKinleyism.

Of course this is bosh. The American maker may be relied upon to establish his own prices, regardless of the importer. The writer of the article thinks it costs \$70 to build a wheel, but he does not think that agents' discounts and the many expenses incurred by every business house have any right to consideration. No; importers don't rule the prices by any means. It would be well for tariff cranks to devote their time to things they understand. This one does not know that should the leading American makers cut their prices as low as he thinks they might, the importer would be driven out of business. This step was expected by English houses when the McKinley bill went into effect. But it didn't come. American makers built machines of recognized merit, whose sales can not be injured by lowering the price while importers keep theirs up.

P. JAY.

The Brookes in America.

Another English candidate for cycling favor is the Brookes, and its success in England should, and no doubt will, be duplicated in America. If a well constructed wheel goes for anything, the Brookes will be heard from in the near future in America, as it has been in other parts of the world. Messrs. J. and H. Brooks, of the Cape Cycle Works, Birmingham, are no novices in cycle building, and the success of their machines on the path in England, where for two years they held several records, was something remarkable.

Last winter G. A. Drysdale, of Yates Brothers, Shattuck & Company, of Boston, paid Messrs. Brooks a long visit and arranged for a supply of wheels for America; but unfortunately the demand at home and the continent was so large that very few were shipped to America. Now, however, the firm has made an effort for increased production, and will from now on supply America with a large number. Their energetic agent in Boston will place agencies all over America and Canada the coming winter. A large store at 176 and 178 Portland street, Boston, will be fitted up and a full line of parts will be kept on hand. The Brooks road racer, twenty-seven pounds, is a very magnificent wheel of strength and grace, and George F. Taylor spoke highly of one he won as a prize at the Saugus meet. Taylor will run it on the road for winter training. The path racer is also a fine wheel. The light

HO, FOR THE TOURNAMENT!

— A T —

PEORIA

SEPTEMBER 27, 1892.

THE GREAT ROCK ISLAND ROUTE THE BEST.

Quick Time----Leave Chicago 1:10 noon; arrive at Peoria at 7:00 P. M.

There is also a Night Train leaving at 11 o'clock, arrive Peoria at 5:40 A. M.

Remember, by this route you have no transfer, and a baggage car will be put on to carry wheels free for our patrons.

Single Fare for the Round Trip for All Points in Illinois.

This route has a train leaving Peoria at 11:10 o'clock, arriving at Chicago at 5:35, early enough for business hours, and you lose no time. To those who desire to make the return trip by daylight, a train leaves at 7:30 A. M., arriving at Chicago at 1:35 P. M.; also leaving Peoria at 1:10 P. M., arriving at Chicago at 7:00 P. M.

The Rock Island runs additional trains at other hours between these two cities.

Members of Cycling Clubs should call at 104 Clark street (corner of Washington) and get further particulars, and purchase tickets.

GEO. F. LEE, City Passenger Agent, 104 Clark Street.

E. ST. JOHN, General Manager.

S. F. BOYD, 1st A. G. T. & P. A.

W. I. ALLEN, Assistant General Mgr.

JOHN SEBASTIAN, G. T. & P. A.

roadster is a favorite English mount. Riders will have a choice of eight wheels, including the two racers, and it will be a hard man to please who will not fall in love with one of them. The Brookes saddles are known to all racing men and thousands are in use.

Mr. Drysdale is also making a specialty of fitting the non-puncturable Sifvertown pneumatic to sulky wheels, and is making deals daily with people to that end. Agents who are not crowded with other wheels will do well to communicate with Mr. Drysdale for territory. He prefers men who have not too many irons in the fire. The firm is one of the best, Yates Brothers, Shattuck & Company being East African exporters, well known and reliable.

New English Inventions.

These abstracts are prepared immediately after the patents are applied for, by G. Douglas Leechman, consulting engineer, Coventry, England:

[All persons interested in opposing the grant of a patent on any one of the undermentioned applications may, at any time within two months from August 10, give notice in the prescribed form of such opposition.]

No. 16,665. E. H. Seddon's "Improved means for fastening tires for velocipedes and other road carriages." Oct. 11, 1891. This invention relates to hollow tires fixed to the rim of the wheel by wire or bands surrounding parts of the tires and the rims, and held in hollows or grooves of said rims, and aims at preventing the loose part of the cover adjacent to the fastenings from bulging over the rim when the air-tube is inflated, preventing the couplings, when situated inside the cover, from bulging it out, or when outside the cover from collecting mud, and at the same time rendering the connection and disconnection of the wires expeditious, so that the envelope or one side thereof can be readily attached or detached from the rim for the purpose of inserting or withdrawing the air-tube. Plates or bars having lugs at the ends with bosses, turned up from the lugs or with swellings formed thereon, pierced for the extremities of the wire or band to pass through and cut out between the said lugs are attached to the envelope by cementing, or, preferably, as shown in the figures or some modification of that method. Referring to the figures it will be seen that the wire, G, is embedded in the edge of the envelope or in a loop formed by the canvas lining, A, thereof and turned over on the inside and cemented to the body of the lining. The bridge piece, H, is in

that case cemented to the inside of the canvas lining and the latter turned over the lugs at the ends and the middle bar towards the inside and cemented to the body of the lining. The plates may be formed without bosses, and instead of being cut out on the under side may be formed with longitudinal slots. The ends of the wires may be threaded and drawn together by a right and left hand nut, or the ends of the wire may be secured by nuts at both ends, or a head at one end and a nut at the other, screwed up against the bosses, H2, or H3. But it is preferred to use a coupling consisting of a hooked nipple, I, screwed on to one end of the wire, G, and another nipple having a shackle, K, screwed on to the other end. The ends of the wire are drawn together by means of a pair of pliers having slots in the jaws into which the wire can enter when the jaws are opened, and placed behind the nipples. When these are drawn together the shackle can be slipped over the hook and the coupling locked thereby. The nipples prevent the ends of the wire from being withdrawn into the loops when the envelope is distended for passing it over the edge of the rim, C. On the nipples may be formed with projections either inside the rim or extending through slots to the outside of the same, which when the nipples are drawn together can be secured by a clamp, or said projections may be made to overlap each other and be fastened by means of a cotter or bolt passed through both or by equivalent means. Both sides of the envelope may be fastened as above described, but it is preferred to divide the envelope or one side of its

circumference as shown, so that one edge, B, rests on the bottom of the rim and covers the spoke holes and protects the air-tube against abrasion by them, and binds this edge to the rim by means of a wire, D, passed round the same inside the envelope, the edge, B, being formed with a heading as shown, to prevent its being drawn outwards from under the wire by the inflation of the air-tube.

No. 12,430. J. S. Busby's "Improvements in wheels for bicycles and other vehicles." The object of this invention is to obviate the angular strain on the hub in wheels having metal spokes; also to enable the spokes to be secured to the hub without bending or twisting; and a further object is to provide a construction where in the parts may be readily assembled and the cost of manufacture reduced to a minimum, at the same time providing for strength and rigidity. Upon the circumference of the flanges are provided radiating spurs (A), drilled transversely for the reception of the spokes (D), the holes being preferably reamed on one side to receive the head of the spoke. The spurs may be provided with one or more holes for the reception of one or more spokes, but the construction preferred is that having two holes in each spur for securing but two spokes, having their heads on opposite sides of the spur and extending to the rim (R) of

the wheel in opposite directions. The spokes are secured to the rim at the other end by a nut and screw thread, or by any other suitable means. Each spoke is readily passed through the hole provided in the spurs, and is then in a position in the hub to be screwed or otherwise rigidly secured to the rim at its other end. The spokes are preferably tangentially disposed. Each spoke may be secured to an independent spur, in which case each proximate spur preferably secures spokes extending in substantially opposite directions. In this construction, in order to allow the spoke to remain at a right angle to the face of its spur, and to clear the spur next to that in which it is secured, each set of spurs are preferably arranged in two proximate series alternately disposed. But in the preferable construction the tentation of the two spokes operating in opposite directions readily secures the hub in its proper relative position to the rim. The holes in the spurs are drilled slightly larger than the size of the spokes. The spurs are arranged at such intervals apart as allows of the unobstructed insertion of the outer end of the spoke and the ready threading through of it up to the head. The spurs are preferably cast solid with the flange, but may be otherwise constructed and secured thereto.

No. 12,730. Michelin & Company's "improvements in pneumatic tires for wheels of velocipedes and other vehicles and in rims for the same." Date claimed under international convention, December 20, 1891. In an application made by this firm on September 11, 1891, No. 6,640, '92 (see the REFEREE, Aug. 19, 1892), there are described several forms of rims in which the two sides were of a gutter-like section and which received enlargements on each side of the outer tire. The present invention relates to another

form shown in the drawing which represents a section of the rim, A, the metal band, B, and part of the outer tire, C, with the enlargements, D, on it, the remainder of the outer tire and the air-tube being omitted. By giving to the rim the shape shown in the drawing it results that the tension produced by inflating the air-tube is divided between the outer tire and the rim.

No. 15,132. H. J. Swindley's "improvements in and relating to pneumatic tires." Sept. 7, 1891.—The objects of this invention are to facilitate the repair of the air tube, to fix the tire to the rim so that it may be readily detached, and generally to render the pneumatic tires more efficient. The hollow tire (A) which is adapted to receive an air tube (B) is constructed with a canvas lining (C) fixed to it or separate from it; in the latter case it

is preferably a tube in cross section. In the under side of the tire and in the canvas lining are cut or formed one or more holes, D and E, respectively, preferably of an elongated oval shape, for the purpose of introducing or withdrawing the air tube. To close these holes and to secure the hollow tire to the rim (X), a flexible band (F) of metal or other suitable material is placed in the hollow tire (A) or in a chamber or its equivalent formed in or on the under side thereof. If a separate canvas lining be used, the band (F) is preferably placed between the said lining and the hollow tire, or as a modification the said band may form part of or be attached to the said lining. The ends of the band (F) are adapted to be drawn together by any suitable device, by means of which the said band can be contracted, and so cause it to bind the hollow tire (A) on the rim (X) of the wheel, a suitable opening being made in the rim for the tightening device to pass through. The air tube (B) is made of rubber and preferably has its ends closed so that it forms a complete chamber, and when a separate canvas lining is used it is preferred to form it also with closed ends so as to entirely enclose the air tube. To remove the air tube from the hollow tire (A) after such tire is removed from the rim of the wheel, the fixing band (F) is either removed from the hollow tire through one of the holes (D) therein, or the band (F) may also be provided with one or more holes (G) to correspond with those in the tire, in which case the band is moved round in the tire until the holes therein coincide with the holes (G) in the band, when the air tube can be withdrawn through the said holes. After the air tube is replaced, the band is either re-inserted in the tire or it is moved round with respect thereto until all the holes therein are closed. As a modification, the band may be fixed in the hollow tire so that it can only be used for binding the tire to

the rim, in which case the holes (G) coincide with the holes (D) in the tire and (E) in the lining, and the said holes are closed by suitable flaps or strips made of any flexible or partially flexible material. These flaps may be made to completely encircle the air tube, provided the air tube is the full size required to fill the hollow tire before it is inflated. When so made these flaps need not of necessity be attached to the air tube, but may be placed loose therein so that they may be moved along the air tube to any part that happens to come opposite to the hole in the hollow tire and or in the canvas lining. As a modification when the flap is of the tubular type, it may be provided with a hole, in which case it is adapted to be moved radically, either to open the holes in the tire and lining or to close them. The object of these flaps is to prevent the air tube from protruding into or through the holes in the hollow tire when inflated, and from chafing on the edges of the said holes. To facilitate the withdrawal and insertion of the rubber air tube, a strip of unstretchable material

is fixed on to it through its entire length, so that although it is free to expand transversely, it is practically unstretchable lengthwise. The rim (X) may be made with either a shallow crescent or a flat face, the hollow tire and the fixing band being shaped accordingly. When the fixing band is not intended to be moved in the hollow tire for the purpose of opening the hole or holes therein, the said band is so fixed to the tire where the holes are cut or formed that the tire will not expand or bulge at those parts when it is inflated.

No. 16,735. R. Green's "improvements in pedal axle brackets of velocipedes and in connections of said brackets." October 2, 1891. The object of this invention is stated to be to impart increased rigidity to the general framing and to distribute more evenly the weight of the same. The body, A, of the bracket is made hollow, with the ends formed into recessed heads, B, wherein the balls

roll between the inside surfaces thereof and the cones on the axle. Branching upwardly from the middle of the waist of the front side of the bracket is a socket D, wherein the lower end of the bottom backbone, C, of a diamond frame is secured. Directed from the middle of the other side of the waist of the said bracket is "a bossed eye socket or ring snug," H, wherein the lower end of the diagonal tube, E, is brazed. Directed upon the two opposite sides of the bossed eye at the rear side of the waist of the bracket are nearly horizontal-directed rear-wheel fork lugs upon which the tubular ends of the fork branches, G, of the said wheel are secured.

No. 20,655. E. H. Seddon's "improvements in and connected with inflated tires for velocipedes and similar road carriages." November 27, 1891. This invention relates more particularly to such tires as are described and claimed by the applicant in his patent No. 6,107, in which the air chamber is described as being made in compartments. According to the present invention the improved tires are made by inserting into an outer air-tube a second internal air-tube each fitted with a separate nozzle and valve so arranged that each air-tube can be separately inflated independently of the other. It is preferred to make the outer air-tube from a knitted fabric produced on a warp knitting frame, coated on the inside or on both sides with India-rubber. This fabric is cut lengthwise into strips of such length that when the edges are cemented together and the tube formed it can be passed readily over the edges of the rim. When this tube is inflated the lateral expansion causes it to contract lengthwise, particularly on the inner side, and contribute to hold the outer cover to the rim, while the softness of this knitted material is stated to make it less liable to puncture than canvas or pure rubber. The inner tube is made first and placed in the outer before the edges or ends of the latter are cemented together. The outer tube would be inflated first and when that becomes punctured the inner tube could be inflated.

Recent Patents Granted.

The following is a list of recent bicycle patents, reported especially for the REFEREE by W. E. Aughinbaugh, patent attorney, Washington, D. C.:

482,392, cushion felly and tire; Charles Stein, Meadville, Pa.; filed Dec. 2, 1891; serial No. 413,785.

482,487, pneumatic tire; Lucius J. Phelps, Passaic, N. J.; filed Feb. 21, 1892; serial No. 422,976.

Trade Jottings.

A. A. Taylor returned from New York last Monday.

Mr. Burrows, representing Rudge & Company, arrived Saturday on the Etruria.

Thomas Sanders sailed for England Wednesday. He will return almost at once.

The Sanger Tricycle Company, capital stock \$15,000, has been incorporated at East St. Louis.

The Kenyon Bicycle Company, Des Moines, has gone into the pneumatic sulky business.

B. Riley, representing Bonnick & Company, manufacturers of the Telephone, Coventry, Eng., arrived Saturday. He was in Toronto Tuesday and Wednesday,

TRIUMPHS ARE COMING!

Never came a wheel more quickly to the front in Europe than the
TRIUMPHS.

Speed, Strength, Beauty, Durability, Lightness, are the leading points of
TRIUMPHS.

These Genuine High-Grade Wheels will shortly be introduced to American wheelmen,
 and no doubt will soon become favorites.

TRIUMPHS
 For Speed and Easy Running.

["Wheeling," 7th September, 1892.]

The second big Danish road race "round Seeland" was started on the 1st September from Copenhagen. The riders had to pass nearly all towns in Seeland, the whole distance being 66 Danish miles (310 miles). The weather was very unfavorable, a western gale blowing, and showers falling now and then. Twenty-four started, but most of them retired during the night owing to puncturing and the awful weather. The race was not finished when this was written, but Randrup, from Jutland, was leading, and likely to be the winner. The time is very bad, of course. [We have just learned that the race was won on a TRIUMPH, and that the second man arrived nearly three hours after the winner.—Eds. W.]

TRIUMPHS
 For Lightness and Strength.

There is no better judge of a good machine than Mr. R. J. Meccredy, Irish champion and editor of the "Irish Cyclist." Advising a correspondent he says: "The TRIUMPH is the best of those mentioned. We have had one in use for months, and it is a grand machine—light, strong and easy running.—Irish Cyclist, 31st August, 1892.

TRIUMPH CYCLE CO., L't'd, Coventry.

LONDON: 48 Holborn Viaduct † PARIS: Rue Truffant.

Our Leading Patterns for 1893 are: CHICAGO TRIUMPH, ROYAL TRIUMPH, LADY'S TRIUMPH, GEARED ORDINARY.

Dealers wishing to handle this High-Class Wheel should at once address Mr. L. BETTMAN, care REFEREE, Chicago.

THEY ARE GOING VERY FAST

 To Shine Upon Them.

These reliable WELDLESS and BRAZED STEEL FORKS are renowned throughout the trade. We also manufacture MUDGUARDS, STEEL CUPS, Footrests, SAFETY FRAMES and PARTS.

YOU USE THESE GOODS.

Send for our List at Once.

Butler's Cycle Fittings Company, Ltd., Birmingham, Eng.

and is expected in Chicago the latter part of this week.

J. M. Remington, of Remington Brothers & Company, importers of parts, will be in Chicago this week.

Mr. Hughes, of the Quadrant, is still in Philadelphia. When returning he will be accompanied by Harry priest.

H. G. Rouse was in Chicago Monday. He would talk of nothing else but the Peoria tournament which comes off Tuesday next.

Toledo will have another factory. L. S. Baumgartner and J. Burkhardt are the promoters, and their works will be at Aunburndale.

V. J. Kelley, well known among Philadelphia racing men, has been given charge of the Caffrey Company's pneumatic sulky department.

T. F. Rockwell who has had four years practical experience as a salesman, is now open for engagement with some first-class house. His address is this office.

Mr. Brown, of the Anglo-American Company, New York, has been in Chicago for about a week, pushing the goods of his company. He reports a splendid trade so far.

A. M. Scheffey & Company, 92 Reade street, New York, are doing a fine business with their popular Wynnewood. The machine is now being made in both twenty-eight and thirty inches.

W. H. Ratcliff, of the Orange Machine & Manufacturing Company, is said to have discovered a means of brazing aluminium, and to contemplate the manufacture of rims of that material.

Samuel Snell has sold out his interest in S. Snell & Company, and will make this country his home in the future. He writes us that he has had several first-class offers from parties in the United States.

The Columbia Bicycle Company has commenced operations in Portland, Or. The Columbia bicycle will be their leader. Fifty Century Columbias have arrived. Their store will be on the corner of Third and Taylor streets.

At Mobile, Ala., Sept. 9, the Holbein Swift won first in the mile novice, half-mile state championship, mile state championship, mile lap open, half-mile handicap, two-mile championship, and second in the half-mile open. Total, six firsts, one second, and three championships.

Through a contested claim the American Ormonde Company has been put to considerable trouble and worry, and rumors have been flying around calculated to injure the concern. We are assured, however, that the company is all right, and the trade has apparently every confidence in Messrs. Willis and Bridgeman.

Frank C. Weston, of Bangor, Me., of cyclometer fame, has invented and applied for a patent on what seems to be a very effectual device for a brake for pneumatics. It is simply a rubber covered removable shoe, which can be put on and taken off in one minute, is very simple and ridiculously low in price, and is said to effectually hold the wheel on the steepest grade. Note his advertisement in another column.

The much coveted Brighton record has been secured by E. Dance, Catford C. C., riding a New Howe. Leaving Purley at 5:20 a. m. Tuesday morning Dance rode towards London and reached Piccadilly soon after 6. Turning at the White House Cellars he went straight away to Brighton and finished in fine form at Purley in 6 hrs. 49 min. 1 sec., beating the record made a short time ago by S. F. Edge by 2 min. 6 sec.

THAT COLUMBUS DECISION.

The Referee Says Chicago Men Protested.—Forced to Decide Against Sanger.

B. V. A. Schultz, of Zanesville, Ohio, referred the Columbus races. He disqualified Sanger because he stepped over the mark, was abused in consequence, and the REFEREE thought fit to defend him in his position. The following letter was not written for publication, but we think it just that Mr. Schultz's side should be made public. We can not too strongly condemn the course of the Chicago men, however, provided everything was as it appears on the surface. Had Sanger won by reason of an advantage start, their action would have been warranted, but to protest a man for no better reason than that he rode the faster is by no means gentlemanly or the act of an amateur.

As to Mr. Sanger, Sr., he probably is not as familiar with the rules as he might be. The committee in charge of the meeting, and the referee as well, were to blame for allowing him, or any one else except the officials, to be where he could raise the rumpus complained of—inside the enclosure.

Mr. Schultz's letter is as follows:

ZANESVILLE, O., Sept. 19.—Editor REFEREE:—Your editorial comments on your Milwaukee correspondent's statements regarding the Sanger-Columbus matter is exactly to the point and covers the ground.

As I do not yearn for newspaper notoriety, I am not penning these lines for publication, but as one of the interested parties, I should like to define my position to you. The management of the Columbus tournament, held the 5th and 6th of this month, asked me to serve as referee, and I naturally fell into the error of accepting.

The first event was a mile novice, and one of the pushers-off—a Mr. Irish, with Lozier & Company of Cleveland—stepped way over the tape in starting his man.

I cautioned him and said that if his man was placed I should have to disqualify him. The umpires that were furnished me for the turns and for the half-mile starting tape were present when the novice race was started and heard my remarks to Irish. Event number two was a half-mile open, and Sanger ran in by a length, with Berlo second. Immediately afterwards I received a protest from two Chicago men, Anderson and Tobey, who claimed that Sanger's starter, Wegner, stepped over the line, and they insisted that accordingly Sanger should be disqualified. I answered that I should certainly find according to the rule provided in such cases, but not unless I received a report from the umpire that would tally with their statement, as Mr. Wegner denied that he had stepped over the tape. I told the several gentlemen that I should take the matter under advisement, and as soon as I could see the umpire (Wykliff of the Columbia C. C.) that I would decide.

At this moment Wykliff came forward and stated the fact to me that, while Sanger was not the first by several to get away at the pistol, his starter had stepped over the tape plainly and certainly.

The protestors, of course, insisted, and I had no choice than to rule as I did. It is an unpleasant duty to disqualify a man after a popular win, but it strikes me that rules would be of very little service if they were not enforced.

After Mr. Sanger Sr., had learned of the decision and I told him of it myself, he abused me and used a batch of profanity that ill-became one of his years.

I am not entirely fond of abuse, but I did not resent Mr. Sanger's remarks. I felt that I was right and that losing my temper would only aggravate the case.

The Columbus men seemed very deeply concerned when Mr. Sanger threatened to take his two boys and leave for Indianapolis. The chairman of the executive committee, Dr. Thoman, finally succeeded in persuading him to wait, and fixed up a slate for that evening, the 5th. A conference was booked at Dr. Thoman's office for the purpose of pacifying Mr. Sanger, Sr. I very naturally fell into the trap, which I soon found was a scheme to talk me into a reversal of my decision.

I expressed my regret at the occurrence, and still feel it, and told the gentlemen present that I should be glad could I have conscientiously ruled according to their desires. I was finally asked to consider the matter over night and if possible to reverse my decision the next day. The following morning, when I stated to the executive committee that I could not alter the ruling, I found that they treated me in a markedly cool manner and I was also treated to another lot of "plain" talk from Mr. Sanger, Sr.

So far it has been my good fortune to meet and

associate with gentlemen, and particularly so in the field of cycling, but I regret to say that my experience at Columbus very nearly shakes my belief in the universally beneficial and refining effect of the wheel on its users.

As I stated at the beginning of this somewhat lengthy and, I fear, uninteresting letter, I am not desirous of its publication either in part or in full, nor do I desire to work myself into a newspaper controversy, but your frank editorial on the bare knowledge of some of the facts in the case has prompted me to offer you my side of the story, which I can if necessary very easily substantiate.

Trusting that the foregoing may not be entirely lacking in interest, I am,

Very truly yours,

BERNARD V. H. SCHULTZ.

Our Milwaukee correspondent writes as follows:

I think the position you have taken in regard to the awarding of the Columbus one-mile open race to be correct. Sanger only did as requested by the chairman of the prize committee, and is in no way flaking a kick over the affair.

MEN WE ALL KNOW.

No. 6—Isaac B. Potter,

Chairman of the L. A. W. committee on improvement of highways, and editor of *Good Roads*.

Cyclist Lost in the Arctic Regions.

The loss of John Verhoeff in the Arctic regions is seriously regretted by the members of the Louisville Cycle Club, of which organization he was a member. For a month before starting to the frozen north he spent much time at the club, and went through a regular course of training in the gymnasium. He was a quiet boy, and never spoke unless addressed first. On the evening before his departure he announced that he was going away and might be gone a long time, but did not say where. He was a good wheelman and delighted in long tours by himself. He wheeled from this city to Niagara Falls when the L. A. W. meet was held there five or six years ago, covering the entire distance alone. He was one of the first cyclists to get the light wheel fever, and in order to get his machine (of course an ordinary) down to a weight he considered proper, he spent days in filing off the steel forgings and honeycombing nuts. Mr. Verhoeff was one of the fastest wheelmen in the Yale College team three years ago. Many stories of his eccentricities while at college are remembered by the club boys. On one occasion, on a wager of \$5, he jumped from the roof of a building into a snow drift twelve feet deep. He disappeared, and for ten minutes nothing was seen of him. His classmates became alarmed and began digging for him. He was found some distance from where he went in energetically digging a tunnel toward the end of the drift. When pulled out he was as mad as a hornet

and at once paid over his \$5, because he said the wager was that he should dig his way out; but his blame-fool companions spoiled his plan by helping him. With all his eccentricities he had many lovable qualities, and his club friends hope that he has not lost his life, but is now safe in some Esquimaux village. He was the only life member of the L. A. W. in Kentucky, his number being forty-two.—*Louisville Times*.

Iowa Miscellany.

DES MOINES, Ia., Sept. 20.—Dame rumor says we will have a bicycle meet th's fall.

The Kenyon Cycle Company are kept very busy fitting pneumatic bicycle wheels to sulkies for horsemen, and are having quite a run on them, in view of an October race meet to be held here.

The Des Moines Cycling Club has rented new quarters, more spacious than its present home, and filed articles of incorporation under name of Des Moines cycling club for social purposes. Many are surprised at their retaining this name when hardly a vestige of cycling apparently remains. The club is planning a fine opening in its new quarters in the near future.

The Yucca Cyclers, at their meeting Sept. 12th, inaugurated a new feature in cycling in this part of the country, by arranging for a day's outing to occur Sept. 12, starting early in the morning, riding about twenty miles, having a big dinner at a farm house, with attendant toasts, games, etc., and returning in the evening.

The L. A. W. still continues to near the 400 mark, which is very encouraging to those who are doing the work.

JUDD.

The Country is Safe.

Mr. Dana will be glad to learn that his crusade against the negro domination, now threatening our fair country, has been heard and heeded by an organization no less powerful and respectable than the Associated Cycling Clubs of Chicago.

If the associated cycling clubs have their way the wily African will not wheel himself into power on a pneumatic safety with ball bearings. He may make himself felt in ward primaries and even in national conventions, but when he tries to break into a meeting of the devotees of the manly art of operating a portable treadmill, the grand worthy custodian of the outer gate will fire him bodily.

If this country is to have good bikeable roads, the Caucasism is not so badly played out but that he proposes to do the work and have the credit. If laws are to be passed compelling horse-drawn vehicles to carry green and red lights and surrender right of way when two short, sharp whistles are sounded off their lee scuppers, the Caucasian proposes to secure the enactment of those laws without Abyssinian assistance. If ordinances are to be passed compelling the humble pedestrian to jump the fence and climb a tree when he sees a bicycle approaching on the sidewalk, let the Anglo-Saxon have the glory.

By a vote of eight to two the associated clubs have decided that the Chicago Colored Cycling Club shall not become a member of their association, and that settles it.

The country has been saved again.—*Minneapolis Tribune*.

An impression seems to prevail that Munger's attack on Hess was not altogether unjustified. It is said that Munger had been fouled by Hess on four occasions, in which event the victim might be excused for losing his temper.

A Fair Field, No Favor,

And May the Best Man Win!

The work performed on the MORGAN & WRIGHT Pneumatic Tire proves that it has adequate durability and speed.

We beg leave to offer the following records. The list is incomplete and may contain some errors. We shall be happy to correct and add to the list, if our friends will kindly send us the proper data:

THE PERFECT CRANK.

6 1/2" THROW

EVERY ONE GUARANTEED.

THE PERFECT CRANK.

W. A. LLOYD & CO. LOVELAGES' PATENT

WEIGHT 9oz. EACH

The usual method of fixing cranks with a "key" or "cotter" is far behind the times, as, whenever the necessity arises for their removal, it is always the cause of expense to the rider, time and temper to the repairer, and brings discredit upon the wheel maker. These **PERFECT** Cranks may be removed in a "jiffey" when required, and are being sold in thousands of pairs to English makers. Licenses granted to large wheel makers. Correspondence is invited from Jobbers.

W. A. LLOYD & CO., — (SOLE PROPRIETORS) — Clyde Works, BIRMINGHAM, ENGLAND.

THE AIRTITE TIRE

It has a wide ring inserted in each edge of the outer cover; cover can't slip off because the rings are smaller than the circumference of the rim. Can't creep because the wire rings haven't room to bend. Let the air out and it is ready to repair. More points of excellence than any other tire ever put on the market. Send for our circular.

THE AIRTITE PNEUMATIC TIRE COMPANY,

172 Columbus Ave., - Boston, Mass.

HE Missed his Opportunity! DON'T Miss Yours, Reader. The majority neglect their opportunities, and from that cause live in poverty and die in obscurity! Harrowing despair is the lot of many, as they look back on lost, forever lost, opportunity. **Life is passing!** Reach out. Be up and doing. Improve your opportunity, and secure prosperity, prominence, peace. It was said by a philosopher, that "the Goddess of Fortune offers a golden opportunity to each person at some period of life; embrace the chance, and she pours out her riches; fail to do so and she departs, never to return." How shall you find the golden opportunity? Investigate every chance that appears within the and of fair promise; that is what all successful men do. Here is an opportunity, such as is not often within the reach of laboring people. Improved, it will give, at least, a grand start in life. The golden opportunity for many is here. Money to be made rapidly and honorably by any industrious person of either sex. All ages. You can do the work and live at home, wherever you are. Even beginners are easily earning from \$5 to \$10 per day. You can do as well if you will work not too hard, but industriously; and you can increase your income as you go on. You can give spare time only, or all your time to the work. Easy to learn. Capital not required. We start you. All is comparatively new and really wonderful. We instruct and show you how, free. Failure unknown among our workers. No room to explain here. Write and learn all free, by return mail. Unwise to delay. Address at once, H. Hallett & Co., Box 880, Portland, Maine.

REAL BICYCLE UNIFORMS.

"Wheels and Wheeling"

AN INDISPENSABLE HANDBOOK FOR CYCLISTS,

By LUTHER H. POTTER, author of "Cycling for Health and Pleasure."

400 Pages. 276 Illustrations.

This book is a companion volume to "Cycling for Health and Pleasure," which met with great success, but contains nearly twice as much matter. It is crowded with interesting and curious information. Beside treating of Cycling in the United States, the L. A. W., Macadam Roads, and many other topics, it deals exhaustively with Pneumatic and Cushion Tires, giving illustrations of over sixty varieties, and describing in detail their construction and care.

This Information is Collected Nowhere Else.

Cycles with Attachments.

1789-1892.

THE material for a digest of all the U. S. Patents for Cycles with attachments from 1789-1892, in two vols., seventy-two sub-divisions of about 1,500 pages, is nearing completion, and will be ready for delivery not later than Sept. 15, 1892.

EACH and every sheet and figure of the drawings of the patents will be given together with the claims, all chronologically arranged, whereby an examination of the art can be made with ease and certainty. From what we know of the compiler and the digest issued by him, we feel confident he will sustain his good reputation, and produce a digest to be desired by all interested in the invention, manufacture and use of Cycles. Those desiring a Prospectus of the work, or wishing to subscribe, should address the compiler.

In order to perpetuate the above digest a Cycle Monthly or Abridgment is being published, beginning with January 1892. Subscription price for the Monthly, \$5.00 per annum; \$6.00 for the European edition, payable in advance.

GOOD WHEELS

WORTH GOOD MONEY.

Road King.

Road Kings and Road Queens
Are as "True as Steel and
Skill Can Make Them."

Many people have been waiting for years for the price of high-grade bicycles to go down. It doesn't go down, though. This is simply because **Good Wheels** cannot be sold for a small price; they are worth all that is asked for them, considering the time, labor, money and material that is put into them. It costs more to build a **good wheel** than the average mortal can conceive of, and, of course, the manufacturer wants to get some profit out of them.

But his profit is much smaller than one might imagine; the season is short, and the most of it must be made in a very short time. When one takes into consideration the many details and the great cost of construction of a bicycle, he will readily see that the maker is not getting so much out of the deal.

Don't wait for prices to drop; they won't. You had best **order now**, when the demand is not as great as it is in the spring, and when orders may be filled promptly.

You must remember what has been said of the **good qualities** of the **Road King** and the **Road Queen** when you order. You cannot afford to overlook them, whether you be an agent or a prospective rider. Whichever you are it will pay you to look into the **merits**—and there are many—of the **Road King** and **Road Queen**.

Road Queen.

THE FLYING START FALLACY.

Some people are never satisfied to let well enough alone; they are continually after a change. Just now the cash prize, makers' amateur and flying start questions seem to be causing a great deal of worrying on the part of these same people. There may be some valid reasons why we should entertain the first two questions, but we can see no grounds for taking up the last named one. Of what benefit is a flying start in competition? It is well enough for record trials, but not otherwise. Scratch races are seldom ridden in very fast time—nowhere near record time, surely—so that in this respect a flying start would be of no material benefit. In scratch races it is not how fast the men can get away, but how slow, for as everyone knows each competitor fights shy of pacemaking. If the competitors would go right out from the start as in horse racing, a flying start might be well enough, but when they all hang back and wait for the other fellow to make the pace there can be no use in the change. A slow start from a push-off answers just as well and gives a fairer start, doing away with any possibility of jockeying. The flying start in handicaps of course would be impossible, though it might be used to good advantage in quarter-mile races. But there is no use in mixing things up to such an extent. G. Minturn Worden says that the flying start "would eliminate the pusher-off, who, if he were Queckberner, the champion thrower, or John L. Sullivan, would give his man a big lead, and that it would prevent the unfair holding back by some starters, as now often practiced. All these advantages would be gained admittedly; still the race-meet managers stick to the old-time start."

Does Mr. Worden suppose for an instant that because the men crossed the tape at the same time they would be more likely to go right out and make pace? If he were in a scratch event, flying start, would he start out and go for all that was in him? Hardly; he would hang back and take the benefit of someone's else pace just as is done today, and the result would be that no better time would be made. Mr. Worden has been in too many races to talk in that manner. He says it would do away with the too numerous starters. Now, pray? Could the men who use cleats and toe-clips and rubber bands to keep their feet on the pedals arrange these necessities without someone to keep upright their machines? Someone must start them as long as these things are used and the start may just as well

be made from the tape as down the track a ways. There is really no good reason for making the change and having one kind of start in handicaps and another in scratch events. There are complications enough now—don't bring out any more; let well enough alone.

A TIME-LIMIT DISTURBANCE.

The cycling scribe of the *Baltimore American* has been greatly stirred up because Zimmerman, Lumsden, Bliss, Rhodes and others refused to ride when a time limit was put on a mile race, for he says:

With the exception of the western men, the racers of note all came from clubs in New York city. This clique had the Maryland club at their mercy. They were exceedingly pig-headed as to the time limits that were placed on the events. A little loitering around the tents of the racing men showed that the best men were very much in cahoots. Being so, they seemed determined not to over-exert themselves by trying to compass the fine track in time faster than 2:40. When the 1:10 limit was put on the half-mile event they showed their disposition and unanimity of action by all hands dismounting and starting for their tents. It was practically the same in the race for the piano, when all hands howled because a limit was put on the mile at 2:40. This was utterly ridiculous. It showed that the men wanted a full dress parade around the circle for their condescension in taking away the fine prizes. But the reign of these so-called amateurs is short, and they are doing their best to have everything their own way while it lasts.

In the first place, neither the day nor the track was fit for any remarkable time. It had sprinkled somewhat and an overcoat was quite comfortable. Records are not made under such unfavorable conditions, and the men were justified in refusing to ride. The Baltimore track is a very nice quarter-mile oval—probably as good as any in the country, size considered—but it is by no means a record breaker, though some seem to think so because the tandem record was broken on it. If the scribe had been the manager of the meet it would seem like a case of sour grapes when he says "the men wanted a full dress parade around the circle for their condescension in taking away the fine prizes." If this clique had not been there what would have been the gate receipts? The fact that Zimmerman, Taylor, Lumsden, et al., were sure to be there is the only thing that could have made the meet a success on the day it was held, when rain threatened to fall every moment.

WILL JOHNSON'S RECORD STAND?

The REFEREE is really astonished at W. C. Thorne's interpretation of the league's rules regarding records, more particularly those made by Johnson recently. According to Wednesday's *Tribune* Mr. Thorne said:

I only gave it as my personal opinion that the claims will not be allowed. The other six members of the racing board may disagree with me, but nevertheless I will contend that as we had in former years to make special provision for the acceptance of board track records, and until we did so they did not go upon the books, so we must decline to give Johnson's record honors until we provide that the horse may pace a man. Such provisions may be made, but in the meantime I, for my part, must confess that I do not see how it is possible to allow his records. There is no set of rules which absolutely governs the granting of records. Circumstances regulate the action of the board in such matters. And yet I apprehend that Johnson will not be much the gainer for his late trials. However, I may be wrong. My associates may think differently from me. A majority of the board will decide.

His associates may or may not entertain a different view of the matter; they may never allow the record to go on the books, but it will not change the fact that Johnson has ridden a mile on a bicycle in 1:56 3-5 and 2:04 3-5 for the flying and standing starts, respectively. There is no rule that says a man must ride for record on an oval track only, or that he must have a human being on a bicycle for pacemaker. There is no law against having a horse to make the

pace; the only question for the board to decide is whether Johnson covered the mile on a track in the time claimed. If the board is satisfied that he rode a mile in the time claimed, whether he had horses, men or anything else for pacers, it is bound to give the western boy due credit; it has no authority to make rules to fit one case and not another. Johnson unquestionably made the records, and the board must allow them.

"HUMBBUG—NO MORE!"

Under this caption *Cycling*, that clever and interesting English weekly, handles the amateur question in a most able manner. The editorial is printed in the current issue under the eastern department heading, and it is well worth one's time to read it carefully. While American races are not bothered by the "bookie," and seldom is a large bet made on a race in this country, it is a well-known fact that, like England, this country is afflicted with "pure amateurism" which for rottenness is by far greater than the professional class in its palmist days. It was well known that the "pros" were "out for the 'stuff'" and usually got it—they made no secret of it. It is different with the amateur. He is out for the stuff just as much as was the poor old "pro," and we venture to assert that in a goodly share of cases he gets that which he seeks. If he can't get it one way he does another—he gets it. It is time to call a halt; if we are to have amateurs let them be amateurs in every sense of the word. There was a time when a gold medal for first and silver for second prize would satisfy any pure amateur. Glory is all he was supposed to receive; but now those days are past. There is a great problem before the cycling statesmen; let us see how well they will solve it during the winter months.

NOTES AND COMMENTS.

Have you seen the wondrous (alleged) record made at Independence, Iowa? The effect on the average mind is simply paralyzing. A mile in 1:56 3-5—wow! Why not 1:30 and make even figures? It would save time. Those among us who happen to know the old-time method of T. W. Eck, et al., feel, to say the least, some uncertainty, and when the name of the noted horseman and his kite-shaped track, together with his published intention of running a race meet himself this fall, is remembered, we think we "smell a mice," so to speak. Mr. Johnson had much better win his laurels by leaving Zimmerman, Tyler, Taylor, Windle and Lumsden over a hundred yards on the home stretch; he would get a deal more favor and establish a stronger faith in his ability. [Our correspondent is evidently laboring under a delusion and is respectfully referred to the statement of how the records were made, furnished the REFEREE by John W. Evans of the *American Trotter*.—Ed.]

* * *

THE COST OF BICYCLES.

The editorial in last week's REFEREE in the cost of bicycles, is in direct line with the numerous paragraphs I have written on the subject, and I am glad that others are awaking to a realizing sense of the importance of warning the public. The prices given by the gentleman who wrote the letter may be wrong in some particulars—I think myself that they are—but where he has placed his waste and labor much too high he has placed his selling expenses much, very much, too low. I have been informed on excellent authority that the average cost of selling is very nearly equal to the average cost of

building; and if this is true, only those who build thousands of machines yearly have a show for profit. I believe that the anonymous writer has placed his cost at \$30 too high, but that he has placed his selling cost at least \$15 too low.

A CONDITION, NOT A THEORY.

However this may be, any one who is interested can assure himself that it is a "condition, not a theory, that confronts us." Let anyone point to a single instance where in the last four years a bicycle factory has started up and made even a decent manufacturers' profit, and I have no more to say, even though failures on every hand, changes of management on every side, and a failure to keep even all around are self-evident and undeniable facts. The truth is that the first cost of a bicycle factory, with equipment sufficient to enable it to make money, is enormous, and that the cost of running it is somewhat appalling. Adding these things to the other fact that the market is overcrowded and that the business as a business is not settled on a solid basis, it is clear to anyone who will investigate that he had better put his money into corner lots on the planet Mars than into a bicycle factory. The dealer is making much more money than the maker, and with little or no risk under the present state of things, for the simple reason that he can buy at his own price from a glutted market, and dictate his own terms.

IT IS WORSE IN ENGLAND.

In England the trade is in even worse condition than here, if reports can be relied on, and with the cholera scare and the World's Exposition staring us in the face I for one think the outlook for 1893 is very gloomy. As to the tumble in prices, with the decrease in the price of pneumatics it is likely to come, and will mean little to the maker one way or the other. He put up his price from \$135 to \$150 because he had to pay from \$25 to \$35 per pair for pneumatic tires, on which he made no profit, but on the contrary sustained an actual loss, viz., the expense and annoyance of repairs of tires which he did not make, but which customers persist in identifying with the machine. If he can buy his tires for less in 1893 the customers will be benefited and he will be in the same condition as before. In the meantime, no doubt, people will invest their money in the business, without investigation, because they think that "these things don't cost more than \$25. Huh!"

LA COTE MAL TAILE.

A Card to the Public.

It has been rumored on the street, and more especially along Cycle Row, that the Sieg & Clementi Company was in financial difficulties and had been closed up. Nothing, however, is further from the truth. We believe that the Sieg & Clementi Company has done a far more profitable business than the average retail cycle dealer, and its business has simply been put on a more sound basis, with increased capital, in order to be able to take care of the increased trade of 1893 to the best advantage. The firm will now be known as the Charles H. Sieg Manufacturing Company. We think this explanation is due Mr. Sieg, in whom we recognize one of the brightest young men in the trade. AMES & FROST COMPANY, by W. R. Walpole, secretary.

Windle's Factory Burned.

While training for records at Springfield, Willie Windle was summoned home by a telegram, his father's factory having burned to the ground. Willie made a record ride from Worcester to Millbury, but was too late.

ONE MILE IN 1:56 3-5.

JOHNSON MAKES ANOTHER REMARKABLE PERFORMANCE.

All Records Broken Up to and Including the Mile By the Minneapolis Boy—Some Theories on the Matter.

John S. Johnson, of Minneapolis, and a member of the Chicago Cycling Club, has again startled the lovers of sport by riding the mile in the phenomenal time of 1:56 3-5. It is difficult to believe, but there seems to be no doubt as to the genuineness of the performance when everything is taken into consideration. Johnson left his dressing room last week Wednesday a few moments before 6 o'clock, and with Tom Eck walked down the kite track at Independence, Ia., to the judges' stand. In the grand stand a large crowd had gathered to see Johnson make the attempt to slaughter the mile record from a flying start. It had been announced that he would make the attempt, and to make sure that everything would be all right, a full line of officials was on hand. W. C. Littlejohn, J. W. Evans and C. F. Tucker, all prominent Independence wheelmen, were the judges, while the timers were S. L. Caton, of Dubuque, Ia.; Judd Seacord, of Galesburg, Ill.; J. L. Doherty, of Clinton, Ont., and C. A. Thompson, J. F. Martindale and O. O. Tibbetts, of Independence, Ia.

The track was in perfect condition, having been carefully rolled during the morning, while the rain of the night before had settled the ground in good shape.

TWO HORSES FOR PACING.

When Johnson came out attired in a bath robe he was greeted with a hearty applause, and immediately mounted for a warming up. As the running horse, Uncle Henry, was driven down the track, Johnson was started several yards back of the tape, and immediately "tacked on" behind the sulky drawn by the runner. The quarter was reached in 29 1-2s., and when the Minneapolis boy passed the half-mile pole the watches registered 58 3-4s. At this point the horse Ned Gordon took up the pace and the three-quarters were covered in 1:28 1-2. Then down the stretch came the two horses and the wheelman, Uncle Henry having been kept right along so as not to break the pace. The drivers of both animals were urging them along to increase the speed, but Johnson was right there and at no time was he more than a yard or two behind. When he crossed the tape the watches were stopped at 1:56 3-5. There were only one or two watches that were over 1:57, while several were well under the 1:56 3-5. A wild hurrah went up when the time was announced, and Johnson was congratulated by all who could get to him.

HOW DID HE DO IT?

Any amount of reasons have been given for Johnson's wonderful ride—nearly everybody seems to have some theory, though the older ones say: "I don't know what to think of it." It has been argued that the track is down grade to the extent of three feet to the mile, while others say this could not be, because if it were down grade part of the way it would have to be up grade at the finish. But this is not so, for if the finishing point were back of the starting place the mile could be down grade and the up grade would be from the tape to the starting point. Then again it is thought that because a sulky was in

front of Johnson it created a vacuum, so that Johnson, instead of having to break the wind was dragged along just as a piece of paper would be carried along if thrown behind a rapidly moving train. Then the Elliptical gear is thought to have something to do with the performance.

IT IS A COMBINATION.

Figuring it all out there seems to have been a good combination—a fast rider, well trained; a good wheel, with an elliptical gear, that must have proven fast; a good track, steady and perfect pacing and the suction created by the rapidly moving sulky. Johnson is unquestionably a good rider, but whether he ranks with Zimmerman, Tyler, Lumsden, Taylor, et al., remains to be seen. He might ride splendidly against time and not be very successful in competition. He did not show up particularly well at Parkside or Indianapolis. But no matter how he made his mile in 1:56 3-5, nor how well he performed at previous race meets, his quarter in 26 3-5 shows how well he is riding. A quarter in such time can be made only by the man of first quality.

Johnson's Performances.

The REFEREE is indebted to John W. Evans, of the American Trotter, Independence, Ia., for a complete statement

SPRINGFIELD, MASS.

of Johnson's doings. All the timers were experienced men, having timed the fastest horses in the country, while the judges were well known local cyclists, he himself having recently lived in Birkenhead and Liverpool, Eng., where he was sub-captain and captain of the West Cheshire B. C., and a member of the Wirral B. C. of the former town. Now that Johnson has broken all the world's records up to the mile, for both flying and standing starts, Mr. Evans thinks cycling will boom in Independence. C. W. Williams, owner and driver of the great stallion Allerton, will offer \$2,500 in prizes for a two days' meet in October. The following shows Johnson's times, and the timers, judges, starters, etc.:

FLYING START—Quarter, 27 1-2 sec.; half, 55 1-2 sec.; quarter, 26 3-5 sec. Judges—J. R. Cheesbrow, Waterloo; C. A. Rosemond, Independence. Referee—F. S. Hillisier, Waterloo, Ia. Timers—O. O. Tibbetts, John Hussey, B. W. Tabor, Independence; C. M. La Due, Luverne, Minn.; J. L. Doherty, Clinton, Ont.

STANDING START—Quarter, 31 sec.; mile, 2:04 3-5. Judges—John W. Evans and W. S. Tidball, Independence, Ia. Starter for mile—Dr. E. E. Spalding; starter for quarter, W. C. Littlejohn, Independence. Columbia agent. Referee—C. F. Tucker, Independence, Warwick agent. Timers—Fred and Judd Seacord, Galesburg, Ill.; Sam Caton and F. D. Stout, Dubuque; C. M. La Due, Luverne, Minn.; J. F. Martindale and C. A. Thompson, Independence. Mr. Stout owns Nutwood, another great trotting stallion, and is also proprietor of the Highland stock farm.

STANDING START—Half, 58 3-5 sec.; flying quarter, 26 1-5 sec. Judges—Herman Frank, C. A. Rosemond, J. W. Evans, Independence. Referee—C. F. Tucker, Independence. Timers—Sam Caton, Dubuque; C. A. Thompson, Independence; J. L. Doherty, Clinton, Ont.; H. E. Ball, Aurora, Ill.; Charles Camp, Greeley, Colo.

FLYING START—Mile, 1:56 3-5; quarter, 29 1-4; half, 58 3-4; three-quarters, 1:38 1-2. Judges—W. C. Littlejohn, J. W. Evans, Independence. Referee—C. F. Tucker, Independence. Timers—Sam Caton, Dubuque; C. A. Thompson, O. O. Tibbetts, J. F. Martindale, Independence; Judd Seacord, Galesburg; J. L. Doherty, Clinton, Ont. Flagman for quarters—George T. Blamer, Independence.

Johnson's records were all made according to league rules, and he even started further back than required. To date they are as follows:

	Quarter.	Half	Three quarters.	Mile
Standing start.	31	58 3-5	1:34 1-5	2:04 3-5
Flying start....	26 1-5	55 1-2	1:28 1-2	1:56 3-5

What the New Yorkers Think.

New Yorkers are astounded at the performances of the western wonder, Johnson, at Independence, and while the daily papers have printed columns of matter regarding the Minneapolis boy, nine out of ten cyclists doubt the genuineness of the trials, question the timing and measurement of track. Others doubt it because T. W. Eck had Johnson in charge, a very reckless and unwarranted way of trying to prove that there was something wrong about the magnificent trials of the speedy west-

ances have been received east. There is no doubt in my mind they are genuine, and were done by a wonderful western rider. Why should not the west produce a world-beater? Want of good tracks, "expense money," and wealthy uncles to support western amateurs at racing has been the reason why Mr. Johnson has not come to the front before. Get good tracks and somebody who will put up "de stuff" and you will have a few Zimmermans, Taylors and Tylers out west before many moons. "It's money that makes the mare go."

MORGAN.

Gossip from Milwaukee.

MILWAUKEE, Sept. 26.—The racing board has suspended the following Milwaukee riders for sixty days from September 1 for violation of the racing rules: Gus Zimmerling, William Giles, Thad Wendzinski, H. Jansen, Frank Wilson, William Morris, Paul Schimmel and W. H. Taylor. All members are warned against competing with any of them under penalty of like suspension. It is matter for congratulation that although the board, like the mills of the gods, grind slowly, it gets there all the same. The one thing to regret is, that action was not taken earlier in the season. Many of the suspended riders violated the rules of the league in open defiance of its powers, no doubt under the impression that it could not reach them and that they could do as they pleased in the matter.

W. A. Lingham, of the firm of Lingham & Ashelman, bicycle dealers, West Superior, has spent the past week in Milwaukee, the guest of P. H. Sercombe, Mr. Lingham reports business in his section very good, and new riders in abundance.

Probably the most enjoyable run of the Milwaukee Wheelmen this season was taken last Sunday to the Coelnisher Kirmies, a point about seven miles distant from the city. The Kirmis is a pleasant recollection of similar events original with the fatherland, and was a picturesque picture, perhaps unknown to any other section of the United States.

PA SANGER ILL.

Casper M. Sanger, president of the Sercombe-Bolte Manufacturing Company, is suffering from a stroke of paralysis, and his condition is a matter of anxiety to his family and many friends throughout the city.

The Sercombe-Bolte Telegram Cycling Club, an organization composed of employees of the Sercombe Bolte company, held its first road race last Saturday afternoon on the White Fish Bay road. Seventeen riders, all mounted on Telegram racers, lined up for the start. Charles Mortimer was the first pushed off with four minutes' handicap, and he was never seen until he crossed the tape, the winner of a beautiful gold watch donated by P. H. Sercombe. Will Bremer, foreman of the construction department, won the time medal given by the company, in 19 min. 39 sec. The handicapping was very amateurish and the race was a gift to the winner. Walter Sanger officiated as referee. The judges were P. H. Sercombe, W. A. Lingham and Well Breckenridge. After the race a supper was served at Keesbier's cafe, provided by Henry Hellings, foreman of the enameling department. The race was a success, and the company is deserving of great praise for the liberal manner in which it responded with prizes.

JACK ROYAL.

Two of the directors of the Coventry Machinists' Company, Coventry, Eng., are in Chicago. Before they leave they will decide on the location of their factory in this country.

erner. The headlines in the dailies had such catch lines as these: "A Hurrying Hurricane," "A Cycling Nancy Hanks," "Zimmerman Snowed Under," etc., and there is no doubt that Johnson has taken a lot of the Zimmerman thunder from these parts. The names of the parties connected with timing the rides are well known to Editor Busby of the *Turf, Field and Farm*, and he believes the performances to be genuine, and rightly said "that horsemen were not giving cyclists such records unless they made them." A New York salesman in a cycle store is a fair example of the doubters of the Johnson performance, for when the REFEREE man asked him his opinion, he replied: "I don't believe it; no unknown can come out and do such a performance. I will bet on that." There is no sense in discrediting the performance because Johnson is not known east. This a big country and great men die in the east that have never been heard of west, and vice-versa. Another foolish objection to believing the time is because Tom Eck brought the man out and trained him for the performances. Eck is, in the writer's mind, the best trainer this side of the Atlantic to-day, and the champions he has brought out proves his training abilities. The articles in the *Sporting Life* and *American Wheelman* show how Johnson's perform-

SCENES AT

SPRINGFIELD

Here and There

His Explanation Was Good.

The Worcester Bicycle Club wants to know, you know, why the Massachusetts division granted Springfield \$350 for an entertainment fund for the fall meet, while the division officers refused to give Worcester a cent for its entertainment fund for the spring meet of the division. This question a dozen Worcester club men fired at a REFEREE representative at Springfield recently. Asking Charlie Howard, who, Judas-like, carries the "swag" for Massachusetts leaguers, the ever-smiling Charles said, "cause." Well, as supplementary information, he said: "Cause we get so many two dollars at Springfield, so it is simply 'casting bread,' etc., and the large roll Howard exhibited as a guarantee of good faith showed the diplomacy of the crowd that run things for the old Bay State leaguers is keen and thoughtful. It is a wonder they can trust a newspaper man with so much money. Howard now carries over \$3,000 for the division; but he earns enough from the Boston *Globe* to enable him to resist temptation. So with this explanation the men of Worcester must seemingly be satisfied; but they will call on Treasurer Howard again next spring.

Cyclists as Museum Freaks.

A new New York museum is about to erect in its wax work department a gallery of the famous cyclists of America, embracing the representative men of each state, both non-racing and racing,

and maintain a national gallery in the nation's metropolis. The leading racing men will be mounted on real wheels, the figures will be made up from photographs, and the racing colors of the rider will be brought out prominently in wax. It is expected that fully a hundred figures will be erected, with a view of attracting patronage from cyclists as well as to instruct the masses in cycling. A hand-book and a lecturer will tell the visitors who the figures represent and what the originals have done in a cycling way. A famous Parisian wax worker will have charge of the work. Although the name of the museum has not as yet been made public, it is understood that the well-known Eden Musee, situated on Twenty-third street, is the place. The gallery will be well advertised in the cycle and daily press, and the musee people expect the idea will be a taking one, not only with the cyclists but the general public as well.

Recent Patents Granted.

The following is a list of recent bicycle patents, reported especially for the REFEREE by W. E. Aughinbaugh, patent attorney, Washington, D. C.:

482,735, vehicle; Olaus Hanson, Toledo, Ohio, assignor of part to Joseph L. Yost, same place, and Harry A. Lozier, Cleveland, Ohio; filed Dec. 8, 1890; serial No. 378,936.

482,819, elastic tire; Curt Wagner, Oderan, Germany; filed Jan. 28, 1892; serial No. 419,543.

492,856, bicycles; Alfred Trenblay, Holyoke, Mass.; filed Feb. 10, 1892; serial No. 420,946.

482,938, child's seat or parcel carrier for bicycles; Maurice E. Blood, Kalamazoo, Mich., assignor to the Kalamazoo Cycle Company, same place; filed Oct. 24, 1891; serial No. 409,661.

483,084, bicycle bell; Edward D. Rockwell, Bristol, Conn., assignor to the New Departure Bell Company, same place; filed March 9, 1892; serial No. 424,320.

Some Do and Some Don't.

It is said that Frank Egan's salary, as cycling editor of the *Sporting Life*, is \$4,000 per year. The business department of that paper must have shown better results than some we know of to be able to stand such a sum. Perhaps some reader may have heard this moss-covered joke:

Says John, "What's your salary now, Harry?"

"Four thousand a year. What's yours?"

"Only a thousand."

"Rather small, isn't it?"

"Yes—but then I get mine!"

Not a Money-Making Affair.

"Cupid's Chariot" has gone the way of the other cycle plays. The company has practically disbanded and the members think cyclists are not very susceptible folk to cater to. Anyhow, the brief season was a financial failure, according to what Mr. Ward of the company told a REFEREE representative.

He's After Whittaker.

George S. McDonald of the Raleigh company, is looking for Stillman G. Whittaker with a section of pneumatic loaded with shot. It seems "Whit" got hold of a general admission press ticket at Springfield and gave the same to McDonald, assuring the latter that its magic influence would give him free entry into every nook and corner of Hampden Park, including the press stand, and also told him to hang onto the ticket at all points, and that by simply saying "press" and waving his

hand all officials would give way. He tried Whit's advice on the two big policemen at the park entrance, and they collared McDonald, who was lifted bodily through the gate minus his ticket. Now he thinks Whit put up a job on him.

WINDLE AGAIN A RECORD-BREAKER.

The "Little Wonder" At His Old Tricks—Three Records Go Down.

SPRINGFIELD, Mass., Sept. 29. (Special telegram.)—Willie Windle broke the records for three, four and five miles to-day. The times as taken by C. T. Shean, C. E. Whipple and James A. Bryan were as follows:

One mile	2:21 2-5
Two miles	4:40 2-5
Three "	7:04 3-5
Four "	9:26 3-5
Five "	11:41

Windle had for pacers Murphy, Campbell and Dorntge on a triplet, and Arnold, Nelson, Martin, George Smith and C. L. Nelson.
A. O. MCGARRETT.

How's This For Nerve?

Harry F. Blake, formerly of Peoria, and W. L. Sperry of this city, enjoyed the first tandem trip down Pike's Peak on Saturday, Sept. 17. To add to the novelty of the trip, Sperry's right hand, which has two bones broken in it, was carried in a sling during the entire ride!

Paced By a Professional!

The latest advices from New York show that the east has about decided 'to accept' Johnson's records as authentic, as far as the time and track go; but a man has asked Elliot Mason what the result will be since a "professional horse" made pace for Johnson, an amateur.

That Spalding League Scheme.

Some month ago I called attention to the report current in New York that A. G. Spalding was interested in a cash-prize, professional-class scheme, and would build tracks on the principal ball grounds now occupied by the national base ball league. After an interview with A. B. Barkman, who stated that he had not heard anything of such a scheme—and if anyone would Barkman, who has charge of the Spalding cycle department, would surely know—I came to the conclusion that rumor was wrong once more, so dropped the matter. But to-day rumor assumed shape in the form of a half-column "special" from Baltimore in the *Sun*, and as Spalding was once more made the figurehead of the scheme I was determined to "tackle," as in football, and bring my man down with something definite regarding the matter. This is what the *Sun* said, and Walter Masterson, who is still doing cycling news for the same old *Sun*, will have to look out or the maxim, "If you see it in the *Sun* it's so," will be turned to "If you see it in the *Sun*, don't believe it." The special, which looks like the work of Guy P. Wilson, of the *Baltimore News*, or Albert Mott, says:

TO MAKE THEM ALL PROFESSIONALS.

BALTIMORE, Md., Sept. 21.—The League of American Wheelmen must move quickly or suffer an irreparable loss. The question of cash prizes has been the subject of a long-continued war of words, and the great minds of the league seem utterly unable to agree upon a settlement. The evasions of the present amateur rule are generally acknowledged to be constant and flagrant, but except in very rare instances the only verdict that can be secured against a suspect is the Scotch one of "Not proven." No one possibly has ever doubted that the racing men would rather be honest in the matter and openly race for money, but as the rules now stand this is impossible. Next season, however, it will be different, and unless the league makes up its mind to change the rule radically and at once, it will find itself at the opening of the next racing season without enough fast men in the amateur ranks to give a meet.

A scheme is now being engineered looking to the formation of a professional league. It is being made chiefly by Spalding and other baseball magnates. As now outlined the plan is to build a first-class bicycle race track in every big baseball park in the country, and to hold three race meets a week on each one for cash prizes. The present baseball managers will have the first chance to build these tracks, but if any fail to avail themselves of the opportunity others who have already expressed a desire to do so will get the franchises.

For such case as may arise ample capital has already been pledged. The new league is to be governed by rigid rules and no jockeying is to be permitted. The men who race will be free to do so whenever and wherever they please, except that they will not be allowed to race for any organization other than the proposed league, which promises to give them plenty of opportunities to win good-sized money prizes.

In addition to the regular tri-weekly events it is proposed to institute national championships in which large special prizes will be offered. The racers will be their own masters, and may make as much out of the sport as they can.

ZIMMY TOLD ABOUT IT.

The first intimation of the scheme was given to your correspondent by no less a personage than Arthur A. Zimmerman, who acknowledged that he had been approached, and confessed that the temptation offered by the chance to make a good many thousand dollars in cold cash next season may be too strong for him to resist. He says that Troy, of the New York Athletic Club, is circulating an agreement embodying a guarantee of \$36,000 for the signatures of the present lights for the L. A. W. racing path, in which they pledge themselves to race for the new league next season, and that several have already put their names to it. Zimmerman says that he has not signed it yet,

but that if, as he expects, the other big men do so he will follow suit.

Troy, who is here to-day attending the meet of the Maryland club, acknowledges that the professional league is to be formed, and that it is being engineered and backed by the parties already named, but he says that none of the racing men have yet signed, and that none as yet had had presented to them any agreement for their signatures. He has charge of that part of the scheme, and says that as soon as the present racing season is over he will sign a contract for the purpose of pushing the scheme for all it is worth.

He acknowledges that he is even now at work in the matter, and says that he has received unqualified promises from Zimmerman, Tyler, Taylor, Berlo, Windle, Lumsden and, in fact, all the crack racing men east and west that when the racing season closes they will sign an agreement to race next season for and under the rules of the new cash prize professional league. Those of the men named who were seen here to-day do not deny it.

IT WAS TROY'S SCHEME.

The whole thing smacks of improbability, for A. G. Spalding does not as a rule give out his plans in advance, and the wording of the dispatch is in line with the talk used by me in my REFEREE article. Troy has been stuffing the man who sent the dispatch and inflated him, as he does the pneumatics, and is on a line with that mile-a-minute ride he was going to do on the slot of the Broadway cable road, or like that racing farm he was going to start in New Jersey. The use of Spalding's name was unauthorized, as the following will prove. Again paying Spalding's Broom street store a visit, I ran across Barkman, showed him the dispatch, and again again asked his opinion. Barkman smiled and said: "I think the whole thing is a fake; but see John W. Spalding, he will know something about it if there is anything in it." So, receiving a cordial invitation, I entered the office of the base ball millionaire and showed him the article.

J. W. DENIES IT.

Said John Spalding: "Morgan, there is not a word of truth in it, take my word for it, as far as A. G. or myself are concerned, and as for the other baseball magnates, I can say almost to a certainty that there is no truth in their connection. We are too busy with our business to enter such a scheme, and have no time to consider anything else, and no overtures have been made by anybody in regard to building tracks on the national league grounds. So, as far as we are concerned, you can say through the REFEREE that the whole story is without foundation. Mind you, I am not throwing cold water on such an enterprise, for I believe that, if conducted as professional baseball or the National Trotting Association are managed, a professional class would pay and do good; but it must be governed with a strong hand."

SOME OLD HISTORY.

Dropping into past history John W. Spalding said: "I never blamed the old professionals much for the scrapes they got into and the go-as-you-please style of their racing. I often wondered how they managed to live." And, turning in his chair, this successful business man continued: "I'll tell you what I think about amateur racing for pianos and teams. I think the organization that permits such things has a queer idea of what constitutes an amateur. I would rather that you would not quote me, but please yourself."

The opinion of a man like John W. Spalding is worth quoting, so Mr. Spalding must forgive me. The L. A. W., therefore, need not hurry. Spalding

will not now show them how to conduct cycle racing. That W. B. Troy is responsible for the talk is proved by the statements of A. C. Banker and George S. McDonald to me to-day, and what Willis B. is driving at is hard to see, unless it be that contract he says he is going to sign after the racing season is over.

THEY WANT THE CASH.

I like a good joke, and like to give newspaper men all the news, but upon my word I cannot for the life of me see how such misrepresentations can be considered smart, or news either. There is no doubt our "pure amateurs" would like to get the cash direct. It saves a lot of middle-man business, and the risk of detection must be wearing. I trust some Spalding will arise equal to the task, for there is profit in cash prizes for all concerned, but let us have no more of this rumor business, or going off half-cocked, Mr. Troy, if you please.

The Bookmakers Again.

Some few weeks ago I told in the REFEREE about the abuses prevalent on the English path, spoke of bookmakers doing a roaring business with "bag and book," and was hauled over the coals by G. L. Hillier, who denied my self-impeachment of his angelic host who rides for pots. I came back at Hillier with a few facts, and am pleased to see that Editor Charles P. Sisley of *Cycling* thought fit to read my article. At least he read Hillier's in reply to me, and as C. P. knows a little about cycling and the practices of the English path, I will quote his editorial of Sept. 27 in full, but cannot agree with him in regard to the ill-informed Englishman, George Lacy.

HILLIER DOESN'T SEE THEIR FAULTS.

Hillier is a well informed Englishman—I'll answer for that—but George Lacy is perhaps a lit le blind as to the faults of the gay "amateur," and for a truth G. L. H. ought to know a little about the "humbug" of the whole amateur business, as it is now conducted in both England and America, and I do not agree with Editor Sisley in allowing the professionals to return to the amateur class after once becoming "pros," and that should be their title if they rode for a salary or a maker. There seems to be a little humbug in that wish of Editor Sisley, "once a professional always a professional." What professional business man wants to become an amateur? You might as well ask Henry Irving or Wilson Barrett to become amateur actors again. "Trade class" of amateurs sounds funny. What would you have them race for, Editor Sisley, pots or pounds? They would be getting pounds for salary; at any rate, what's the difference? It seems to me two classes there must be, amateurs and professionals. The best people in America, including the president, go to see professional base ball, why not professional cycling.

PROS AND AMATEURS BOTH.

The two bodies, the N. C. U. and the L. A. W., should take hold of professional cycling and run it, and that seems to be the only logical way out of the business. No "trade class" on "maker's amateurs" will succeed; there's humbug in the suggestion and falsity in the foundation of such a proposal. Three classes as suggested in Henry Ducker's article in Philadelphia's *Cycling* is illogical and should never be encouraged. The first thing we know we shall have amateurs with wings, amateurs without wings, amateurs who will not ride unless the track is of solid gold, and the maker's amateurs and the promoters and the hard-shell professionals who can not be anything but bad, according to some peo-

ple. Class races for both amateurs and professionals. The prizes of amateurs should not exceed ten dollars, and wreaths and diplomas should be the best reward for their efforts, while the professionals should struggle for the cold coin of the realm. Mr. Spalding said one thing which I forgot to mention: "I can not see why a man should not be rewarded for his hard work and expensive training and traveling in the same coin that he uses to perfect his physical condition. If the man was an amateur and did not go in for racing regularly, a medal would do." Here is Sisley's editorial, and fancy "bookies" at Hillier's Herne Hill:

HUMBUG—NO MORE!

"None so blind as those who won't see" is one of the wisest of proverbial sayings. An ill-informed Englishman tells the American press that over here "pure amateurism is more to the front than ever," and is at a loss to know at what amateur meetings anyone can see the bookmaker "with bag and book doing a roaring business." How a man can thus display his consummate ignorance of the present state of the sport passes our understanding. If amateurism is in such a state of purity, how comes it that the legislators for the sport are growing every day more alive to the absurdly farcical state of our present amateur laws? How is it that rumors of some decided action against the makers' amateur class, and a speedy modification of the present definition, are on everyone's lips? Because amateurism—genuine honest amateurism—is so much to the front? No; simply because the state of the race path as rotten as it well can be. The class of racing men is not improving; each year we get a trifle lower in the social scale, and yet week in week out these men scour the country in quest of prizes which they are forbidden to realize upon. How do they do it? Who pays the piper? Ask those people who have the cool audacity to declare that amateurism is on the increase. Their answer will plainly prove that if they are not fools they are humbugs. Humbug is indeed the watchword of the school which is absolutely blind to the plainest facts—facts which even the greenest of green racing novices know only too well.

BETTING MEN ARE ABOUT.

If the American public accepts as facts such statements as have recently been made to them, they must indeed consider England a paradise of purity so far as racing is concerned. We are cosmopolitan; we have studied this question of amateurism in all parts of England and in one or two places abroad, and although we have ourselves never invested a farthing in a bet on a cycle race, we do not walk about with closed eyes or ears. We do not take one race-path and declare that the condition of affairs there represents the state of things all over England. We hope we know better than that. But for every one race-meet where the betting man is absent we will name ten where he is rampant; and even at Herne Hill, admittedly a model race-path in most respects, the bookie is occasionally more conspicuous than we would like to see him. In the North and the Midlands he is seldom absent—in fact, it would be a bitter pill for many of the racing division who travel the country if they could not invoke his aid. We regret the fact as much as anyone. We know it is killing the sport far more than the most glaring cases of makers' amateurism, and that is the reason why we refuse to close our eyes to the condition of affairs.

WANTS A TRADE CLASS.

That is why we clamor for action on the part of the N. C. U. Makers' amateurism, although a lesser curse to the sport, is still a serious evil, and as the Union is absolutely powerless to check it under its present amateur definition, we shall not cease to speak out until some modification of the present rule permits the majority of racing men to sign the declaration of their amateurism with some degree of honesty. At present we see no other remedy than the formation of a Trade class, not necessarily dubbed professionals, and yet not coming under the classification of an amateur. In this class, as we have before asserted, we would place all who are interested in the sale of cycles, and from this category we would not bar ourselves, members of the wheel press. When a man severed his connection with the Trade, he should be perfectly free to return to the amateur class, but that class would have to be ruled with an iron hand, or abuses would speedily creep in again. The question is a knotty one—it has engaged the attention of cycling legislators and cycling scribes for many years, but we feel confident that we are nearing some decided action. The situation of affairs is becoming nauseating to honest men, who are not to be put off with assertions to the effect that "amateurism is more to the front than ever." They demand to see the hall-mark of this so-called "amateurism," the shoddy article may be "to the front," but genuine, honest amateurism is hidden far from sight. We want to see it in the light of day, and we will

not rest till the mask is removed from the sham that now parades itself in the garb of purity.

**

Egan on Crowther.

It was with much surprise and not a little indignation that the New Yorkers read the front page scare head in *Sporting Life* last week by Frank A. Egan, on the retirement from that paper of Henry Crowther, now of the *Bicycling World*. The article was not worthy of Frank Egan, and decidedly ungrateful on the part of both himself and the *Sporting Life* people. It matters not to the public, as far as I can learn, what caused Crowther's retirement or what caused the appointment of Egan to the responsible position, but it is generally conceded that it was through Crowther's conservative course and wise administration that the *Sporting Life* attained the position it held when Egan took hold. True, Egan's letters were the features of the cycling department, but who was responsible for Egan's appointment on the paper? Why, Crowther. Therefore it seems bad taste and a poor beginning for the new editor to roast his old chief, which is calculated to injure him with his new employers, and might if the new employers did not know the man, inflict misery on the large family of little Crowthers, together with a charming wife. Many people in New York have called my attention to what certainly is an injustice and a most unwise course for the *Sporting Life* to pursue, especially in view of the fact that the paper wished to retain Crowther's services in the business department. This I have written evidence of, and therefore cannot understand why such a fair-minded man as Egan should permit himself to write such a damaging article to please the prying of a western gossip who seems to delight in minding everybody's business but his own. The article does Frank Egan an injustice and is unworthy of him; a poor commencement his most ardent friends in New York declare. Independence is one thing and abuse another. Besides, the article borders on untruthfulness. After calm consideration Egan will come to the conclusion that he has done one of the craft an injustice, and would be the first to go to the rescue of the man he assailed if in trouble.

A Cribbing Recorder.

The enthusiastic L. M. Boardman, of the New York *Recorder* cycling department, was bewailing the fact to the REFEREE men that this paper once in the long ago 'cribbed' an article from the *Recorder* and printed same without credit. I buy the *Recorder* nearly every day to see how the cholera reporter is doing his work, and was astonished Wednesday to see that Boardman had run the Asbury Park article of your local correspondent without the least sign of credit. But yesterday patience began to give way—when he ran my "Easy Club" Boston skit, printed in the REFEREE a month ago, as original and "fresh" news, and this is on instance where the dailies write their cycling news from the REFEREE pages. Meeting Boardman on Broadway I asked him about it, and his excuse was, "the REFEREE is the only paper worth stealing from, I own up." Boardman is a hustling sort of chap, for all that, and his "copy" fares badly as a rule with "P. Jay," who is no other than Peter J. Donahue, the old timer, who crowds Boardman's stuff out, giving fighting news preference. Boardman did not get to Springfield the second day, so wired the REFEREE to send a thousand-word special for his paper. Selecting the REFEREE out

of fifty press representatives was a decided compliment. Boardman was complimented by the editor for his graphic and accurate report, which he accepted without a blush, and sent the REFEREE man a little envelope from the cashier. Boardman is now with the co-operation of the REFEREE talking up a big cycle parade in conjunction with the Columbus statue dedication and celebration here Oct. 14, when the largest parade ever given in Gotham is to take place. Isaac B. Potter thinks the scheme a good one, as it will be a good time to preach a sermon on good roads. It is for that purpose the parade is to be given. The *Recorder* will furnish transportation, banners; etc., with its usual enterprise. It prints the following:

A meeting of club captains and others interested in wheeling will be held next Tuesday night at the Astor House. It is proposed by such prominent cyclists as I. B. Potter, Senator Morgan, R. B. Mcneypenny, Elliott Mason, T. F. Merseles, L. C. Boardman, G. Minturn Worden, George S. McDonald, Fred Becker, Alec Schwalbach and others, that a display be made by wheelmen in the coming Columbus celebration. A great opportunity will then be offered cyclists to show their strength. The details will be held on the meeting night.

**

Wanted, a Piano.

I was busy giving out copy the other day when two of those good women, "Little Sisters of the Poor," came to my desk with a card asking a donation for

the last fifteen years have become familiar with the presence of the London editor. Large of frame, with massive head, dark hair inclined to curl, spectacles and a kindly twinkle in those sharp eyes, Atkinson is a landmark in English racing. He has refereed and judged at the principal tournaments in England for many years with credit. When Editor Blake ("Angus") died some years ago, the editorial management of the old reliable sporting daily fell on Atkinson's shoulders, although he had directed the athletic department for years. With a quiet hom- in Kent, an hour's ride from the metropolis, he spent the little spare time looking after his splendid fruit trees, game fowl, strawberry beds, etc., and the writer well remembers a visit to the palatial country home of a busy and popular man.

Atkinson has been one of the best friends the English professionals ever had. He writes that professional racing is practically dead and amateur racing very slow just now in England. He thinks the professionals lacked guidance and the amateurs were too much governed. Editor Atkinson has been in the *Sporting Life's* employment nearly a quarter of a century, and will undoubtedly remain there as long as he cares to. As he is enjoying robust health he may be good for another quarter century.

MORGAN.

SPRINGFIELD, MASS.

their charities, and three cyclists who had called "chipped in" something. The sisters said they were giving the little ones an education, and among the things taught was music, and that my small donation would go towards buying a piano.

"Tell them about Jimmy," suggested one of the cyclists, a racing man, "he might give them one of his pianos."

"Who is that?" asked the sister, who caught the remark.

"Why, Zimmerman of New Jersey, the racing man. Zim has a whole barn full that he won at bicycle racing; he might give you one."

"He must be a clever young man," returned the sister, as she took Jimmy's address, Freehold, N. J.

Arthur Augustus may find an appeal for one of his upright grands when he gets home. Zimmerman the philanthropist, Zimmerman the champion!

George W. Atkinson.

I received a letter the other day from that popular sportsman and editor, George W. Atkinson, of the London *Sporting Life*, who winds up with "I hope you are well and happy and piling up the dollars." Those who have attended the cycle meets in England for

Riding Centuries in Buffalo.

BUFFALO, S-pt. 26. — Yesterday was the time scheduled for the annual century run of the Press Cycle Club, and it was one of the most successful runs of the season, out-doing all previous ones of the P. C. C. and eclipsing those of all other local clubs. Of course not all those who declared their intention of being in the race went up to Erie, but there was a grand turn out of Press men and fifty-seven started from Erie at 5:30 a. m. to make the run to Buffalo. They were accompanied by about a dozen outsiders, some of whom were members of other clubs and others belonged to the great unattached. That this large party should come through without accident would be something marvellous, and as marvels were not in the order of the day accidents usual to such occasions did happen, such as collisions, punctures, the loss and breaking of different parts of the machines, etc., so that of the fifty-seven Pressites six were lost by the way, making their way home by trains. The fast ones of this vast party arrived at the club house at 6:30 p. m., the others coming in at intervals after, some very long after, as those who were at all tardy were delayed by the thunderstorm which occurred at 6:45. The boys reported having had a good time generally, and felt well satisfied with the run. A group

picture was taken at Angola, at which place they stopped for dinner. Among those who made the run was D. H. Lewis, of the *American Wheelman*.

A RACE FOR CENTURY BARS.

F. A. Foell has beaten Captain Klipfel, of the Ramblers B. C., by making one more century up to date than Frank. Yesterday Foell completed his twenty-second and Klipfel his twenty-first, both men having made doubles. Klipfel made his by starting from Buffalo for Erie at 8 p. m. He arrived at Erie at 6:05 the following morning, and after resting till 7 a. m. started on the return. He overtook the Press men and arrived at the club rooms at 3:20 p. m., thereby breaking the record of 20 hrs. 20 min. by making the double over this course in 19 hr. and 20 min. This was his fourth double for the season. Foell was accompanied by Duke Smith and started from Buffalo at 12:10 in the morning arriving at Erie at 9:25 a. m. Here they remained till 10:05 when they began the return. They, also, caught up with the larger party and finished at the club house at 8:40 p. m. This contest between Klipfel and Foell, members of rival clubs, as to who shall make the greater number of centuries this season, is becoming very interesting, and it looks as if Foell would come out winner, from the fact that he has much more time, being in business for himself, and can very easily get away, while with Klipfel it is different, as he is not his own master and can only get away when business is over.

ROADS IN GOOD SHAPE.

Yesterday was not an ideal day for road riding unless the direction was to leeward, as there was a strong headwind from the southwest, but to those who were fortunate enough to have such destination, good roads were always with them. Never have the roads in this vicinity been in better shape than they are at present, and to the touring wheelmen offer every inducement.

The Comrade C. C. is fast coming to the front as an active, enterprising body, and already in the club's history have they been compelled to look for more spacious quarters. The members of this club are closely united to the interests of this club, and are not easily diverted therefrom. Each and every man is loyalty itself. At one time several clubs were bidding for Madder and very many allurements and all sorts of inducements were made to him to join some one of these clubs; but no, he manfully stuck to the colors which helped to develop and bring him out, and felt it his duty to do all that he could for his own club. This is a sample of the membership of the club, and when each one strives to do all he can for his club and feels his duty, it is no wonder that the club prospers.

WILLIE DUNN.

Tyler in Trouble.

A despatch from Baltimore to the *Chicago Herald* says that H. C. Tyler had sold a wheel that he had won and that as a result he would be suspended. The Baltimore agent for Gormully & Jeffery claims to have made the discovery and is to prefer charges against him. The agent is said to have given the wheel as a prize. No Rambler was on the programme as a prize for the Baltimore meet last week, nor was Tyler there. Tyler didn't win a race at Baltimore July 21, and that city has had no other races. As a Baltimore agent would be unlikely to give a wheel as a prize for any meet outside of his own city, and as Tyler has not won a prize there, the story sounds a trifle fishy.

Frank P. Prial, editor of the *Wheel*, was a visitor in Chicago Monday.

PEORIA, ILL.

THE COLUMBUS FRACAS.

TOURNAMENT MANAGERS GIVE THEIR SIDE OF THE STORY.

The Referee Seems to Come in for a Goodly Share of Blame for the Matter—Facts in Connection With the Case.

The REFEREE desires to be fair in the little trouble which has sprung up over the referee's decision in disqualifying Sanger at Columbus, Ohio, because his starter, Wegner, is said to have stepped over the tape, though the Milwaukee flyer won by some twenty yards. And because of this feeling two letters bearing on the case are printed herewith:

EDITOR REFEREE:—I notice in your issue of September 16 a caustic criticism of the alleged conduct of the management of the Columbus tournament and advising Mr. Sanger to contest the decision of the referee in the half-mile open race on Sept. 5. Also in the issue of Sept. 23 appears a letter from Mr. Schultz, the referee, in which he undertakes to explain his course. Under the circumstances I trust that you will give space to a few words in behalf of the much abused tournament officials. In the first place it goes without saying that the sole desire of the management was that all visitors and racing men be accorded uniform courteous and fair treatment. It is the opinion of a great many who were present at the races on Sept. 5 that Walter Sanger did not receive justice. Mr. Schultz's explanation of the circumstances connected with his decision is in the main correct. However, he does not say that Mr. Wegner, who pushed Sanger off, was willing to swear that he did not step over the tape. He says that Sanger won by a length, while in the opinion of the writer (a judge in the recent races) and many others his margin was at least twenty-five yards. Certainly it was ample. He admits that the testimony showed that Mr. Sanger got a bad start, in spite of the alleged fault of his starter.

DIDN'T READ THE RULE CORRECTLY.

The referee, however, labors under a misapprehension of track rule 16, which says, "Should any part of the attendant's body touch the track in

front of the mark, the competitor may be disqualified." Mr. Schultz understood that the rule was mandatory and that the referee was compelled to disqualify the rider, and knew no better until his attention was called to the rule by the writer. In the opinion of the writer and many others, the statement of facts shows a very flagrant abuse of the discretion vested in the referee, in that he inflicted a most severe punishment for a very trifling offense, when it was clearly shown that no advantage was gained, and in face of the fact that the starter was willing to take oath that he did not violate the rule. It would seem to the ordinary observer that this discretionary power was given to the referee to be used only in extreme cases, and then only after solemn warning. After the first days races an investigation of the facts was made, and Mr. Schultz was invited to be present. At this meeting Mr. Sanger, Sr., declared his intention of contesting the matter in the courts, and hinted that an injunction might be served. He was told that he might do so if he saw fit. So far as the writer knows he was not specifically advised to contest, but it must be admitted that it was the opinion of a great majority that he had been very badly treated and that they would be very willing to see him secure his rights in any proper manner.

WOULDN'T CHANGE THE DECISION.

Mr. Schultz flatters himself that the meeting in the evening was arranged entirely for his benefit. It was called together by the manager to quiet a disturbance which threatened to interfere very seriously with an otherwise harmonious meet. On having the racing rules read to him and explained, the referee gave the impression without expressly saying so that he would re-consider his decision. On the following day he said that he did not care to make a change. The decision was acquiesced in loyally, but we must admit not hilariously. Since the close of the tournament the prizes in the race have been held by the prize committee for a short time, as they have been notified by Mr. Sanger's attorney that legal steps will probably be taken to contest the referee's decision. While not desiring to take sides in any legal controversy, the prize committee, from motives of common prudence, proposes to withhold the distribution of the prizes in this race until all danger of legal complication is past. We think that this course will be approved by all fair-minded people. As to Mr. Schultz's insinuation that the wheelmen met by him in Columbus are not gentlemen, the writer will make no defense. Our position is assured at home, and as to our reputation abroad, we are willing to leave that to our visitors. For himself, the writer wishes to

say that, if it is necessary to a gentleman that he should stand by, without a feeling of disgust and see a man robbed, by an outrageous decision, of honors fairly won, he, the writer, must plead not guilty.

K. D. Wood.

STILL ANOTHER STORY.

EDITOR REFEREE.—Inasmuch as you have taken the liberty of critising the Columbus wheelmen in your columns of Sept. 16, you certainly will give the same place for their defense. Upon Mr. Sanger stating that he would contest the case and go into court and secure justice that the referee, ignorant of the rules, had taken from him, the writer, actuated by a feeling of regret that the Columbus wheelman would be the innocent sufferers, as they would be held responsible for the acts of the referee, and likewise believing firmly that Mr. Sanger's cause is just and will be sustained, did advise him to do so. As business man and not a racing man, we judge this matter by the broad and honest principles that govern legitimate trading, and stand by any proceeding that protects visitors and customers from robbery, whether on the streets, in the stores or on the race track. The facts are these, as will be sworn to by men who are residents of different cities, and whose honor and veracity cannot be questioned.

HOW IT OCCURRED.

W. C. Wegner was Sanger's starter. The tape was loose on the ground, as the chairman of the race committee and the umpires will testify. Sanger is a very heavy man, while Wenger is of very slight build. Mr. Wegner will swear that he did not step over the tape, but it may have blown on his foot. Every witness, and there are a score of them, will testify that Sanger was the last man started and the farthest from the pole. Yet he won the race by at least twenty yards. Now comes Mr. Anderson and makes a protest, which is disregarded by the referee, as he is not a track official, but making some disturbance. An umpire makes a formal protest and the referee disqualifies Sanger. Of course there is great indignation, and Mr. Sanger declares he will not ride another race. The tournament managers, very anxious to have everything pass off pleasantly, invite to a conference the referee, Messrs. Sanger, Wegner, Anderson, Van Sicklen, the umpire and a number of the tournament officials.

WHERE THE TROUBLE WAS.

Here for the first time the witnesses are formally examined, and a complete investigation is made; and right here is where the whole trouble lies. The referee contended, in the writer's presence, just as the writer of the article in the Ref-

eree of Sept. 16, that he had no choice and must disqualify. But when shown the rule that it read "may," he admitted that he thought it read "must," and we were lead to understand that in the light of the investigation and information furnished, coupled with the different reading of the rule, he would reverse his decision. But when approached the next day on the subject he declared he would not change it. Part of track rule sixteen says: "Attendants, when pushing off competitors, must have and keep both feet on the ground, behind the mark from which the competitors actually start." * "Should any part of the attendant's body touch the track in front of the mark, the competitor MAY BE DISQUALIFIED;" not "must," but "may." And now, why this rule? To any clear-headed man it is self evident. If a man attempts to take advantage of his competitors and have himself shoved to a lead and then win, he should have the race taken from him.

WAS THE REFEREE RIGHT?

Even in accident, should the winner receive a benefit from a too powerful start, he should be disqualified. But even in these cases the referee is supposed to investigate carefully, and if the points made above are found to be true, it is clearly his duty to disqualify. But can any man in a fair mind say the referee was right in disqualifying a man who was farthest from the pole, the last man started and yet wins by at least twenty yards, and whose starter, a man whose word cannot be doubted, will swear he did not step over the line? We wish it distinctly understood that we have no interest in the matter other than justice, knowing that the law is paramount and will right what is wrong. Will any legal mind or other say that a decision made under the idea that it was compulsory will stand when it will be shown that the man was in error and the facts do not warrant?

SOMETHING MORE ON THE SUBJECT.

Since writing the above I have been shown the letter from Mr. Schultz, who seems anxious to bring my name into notoriety. All I have to say to the gentleman is, his "insinuation" that there was any trap set for him or anyone else is a base fabrication and not practiced in Columbus. Our only idea of a conference was to keep Mr. Sanger from leaving the city with five Milwaukee people deeply offended at us for the outrageous ruling of a referee for which we were responsible and yet deeply regretful. We know none of the facts and our personal idea was to have Mr. Van Sicklen talk to Mr. Sanger and explain matters and try to have him remain until the close of the meet. There was positively no other thought and

we never dreamed of a reconsideration of the decision until at this meeting out of the referee's own mouth was heard the proof of the unrighteousness of the decision.

CHAMPIONS SANGER'S CAUSE.

Then when we discovered that he had made no investigation other than the statement of the umpire, and then made a decision on a wrong understanding of the rule, of course we wished a reconsideration, and I would like to look at a man who, knowing all these facts, would wish differently. As to myself or the management being gentlemen, I fancy that the reader can by this time read between the lines, and I for my part am willing to have myself compared with the referee on this occasion and let you make this decision. One word and I am done with this matter. I do not pose as a model, honest man, but in the same spirit that a few days ago I compelled a lunch counter fiend to refund a country boy the money he had flim-flamed him out of at the state fair, I champion the cause of Walter C. Sanger, who, not a poor country boy, still deserves the protection of the law when robbed of the hard earned honors of the race track. DR. A. A. THOMEN, Chairman Executive Committee, Columbian Cycling Tournament.

Sanger Ends the Trouble.

Saturday, Sanger sent Dr. Thomen a letter in which he said his father had a paralytic stroke and was unable to give the matter his attention. He did not court trouble and didn't care for the prize. He won the race, he said, and the honor of that could not be taken from him, so he advised the management to send the prize "to the man whom the referee thinks, with a clear conscience, the winner." Therefore Berlo gets the first prize and Lumsden the second.

An Interesting London Letter.

LONDON, Sept. 14.—For the first time in many years I was last Saturday compelled to miss the North Road Club's twenty-four hour race on the road. This event and the Surrey Bicycle Club's autumn meeting were both fixed for the same day, and being unable to attend both events, I chose the latter. It was as a matter of fact a very characteristic

wind-up of what has been a by no means a brilliant racing season. The grass track was rather dead, the attendance was not so big as it has been at some former meetings, and the racing, although good, was never wildly exciting. Both the one and ten mile scratch races fell to the Leicester lad, A. W. Harris, who has been very successful during the latter part of the season. In the shorter race he had nobody in particular to beat, and in the ten-mile his way was smoothed by the fall of the holder, U. L. Lambley. The latter was brought over by the wobbling of little Ede, who has lately developed a most ragged and careless way of riding. On this occasion he not only came down himself but brought over Lambley, and once before during the afternoon he charged a post and only avoided a bad fall by the greatest good luck.

THE BIG ROAD EVENT.

In the twenty-four hour race on the road the field was not quite so numerous as in former years, but twenty-eight men started, some of them taking this opportunity to go for club standard medals under favorable conditions for feeding and checking. It has been openly stated that if Holbein started Shorland would not. And so it proved. On Friday it was announced that Holbein had strained or sprained his arm the day before when experimenting with a geared ordinary, and although he took no part in the race he was on the road during the day with his left arm in a sling. With Holbein out of it Shorland had nobody whom he need greatly fear, in fact he had only accidents and other untoward circumstances to be in any way afraid of. He arrived at the starting place just before midnight, but discreetly kept to himself the fact that he had been suffering from a bad bilious attack and had absolutely nothing to eat

for several hours. Under these circumstances he, with much wisdom, rode quietly for the first two hours and made no attempt to get away until Huntingdon (103 1-2 miles) was reached. Here the others of the leaders made a short halt for refreshments, but he did not dismount, and so gained a lead which he never lost.

WITHIN A MILE OF RECORD.

About noon he had a very bad time, but in the first twelve hours he covered 193 1-2 miles—within a mile of record—and pulling himself together toward the finish knocked off his last two miles in five minutes, and putting in a total of 367 miles beat Holbein's record by eight miles. The second man was Arthur Bennett, of the Anfield, who rode 352 1-2 miles. J. H. Cocker of Sheffield, who lost year was pacing and helping his club-fellow Lancashire, finished third, with 346 1-2 miles. J. M. James, the second man in the Cuca cup race, after after having his tires punctured twice came in fourth, with 339 1 2 miles. A very good judge tells me that had Shorland been pressed he could have easily put on a few more miles. As it is, it is probable that Holbein will shortly have a go at the record, and when he has raised it, Shorland will put it a bit higher up still. From all I hear there were several very dirty tricks attempted in order to prevent Shorland winning, but they all failed. Just at present the business element enters too much into these competitions to allow of their being carried out in the sportsmanlike way the competitors would desire.

COMING TO THE STATES

The exodus of English manufacturers and their representatives on their way to the United States still continues. On Wednesday week William Starley, of Starley Brothers, sets out on his annual journey to America. He will bring

with him a sample of the new frame which his firm has patented throughout the world. Their plan is to do away entirely with castings and stampings by using instead pieces of rolled steel left with shaped lips, which are brazed into the tube. A roadster frame thus made weighs just over three pounds. Another improvement which is Starley's own invention is in connection with tricycles, which they now make without any bridge above the axle, and with two sets of bearings close under the gear box and the others at the extreme end near the hub. Next Wednesday Herbert Hadden, of Bayliss, Thomas & Company, is also setting out for the States in the City of Berlin.

THE BIG CYCLE SHOWS.

The National cycle show at the Crystal Palace has already received the support of over sixty firms, and space has been taken for more than a thousand machines. Frank Peach, of Holborn Viaduct, of the financing firm of Peach & Doggett, has been appointed secretary and manager. The Staley show, on the other hand, has also received big support. The Rudge Cycle Company has taken space for thirty machines, and the Whitworth and New Howe people will show the same number.

OSMOND WENT TO PIECES.

On Thursday evening at Herne Hill F. J. Osmond had a go at the fifty mile record. The weather and track were perfect and his brother, Ernest Osmond, looked after the pacemaking arrangements. After doing his first ten miles in 26:25 2-5, twenty miles in 52:40 2-5, and 22 miles 1420 yards in the hour, Osmond began cutting record at twenty-six miles, and continued in front until the forty-first mile was reached. Then he went all to pieces; he seemed absolutely unable to pedal, and after going forty-two miles he retired. His time for forty-one miles (as taken by Pembroke Coleman) was 1 hr. 50 min. 21 2-5 sec. The next mile occupied 2 min. 53 sec.

Peoria's Tournament.

PEORIA, Ill., Sept. 27.—It has been a great day for windmills and lightning rods and Berkshire hogs and prize "punks." The fair grounds have been alive with as large an attendance, according to the fifteenth-season gatekeeper, ever seen there. The crowd was variously estimated at from twelve to twenty thousand. Anyhow, it was an immense attendance, and that is about all that can be said in its favor.

The meet, generally, was by no means the Peoria meet we have known and learned to love. Many of the elements which have served so faithfully in years gone by to make this the greatest of western meetings and a rival of any in the country were missing.

The club had made little or no preparation for the entertainment of visitors, except after the races were over, because it was not its affair. It was a bicycle day in connection with the state fair—that's all. No attractions, other than a sight of the races, the hogs and the windmills had been promised, and therefore no one was disappointed and no great number of cycling visitors appeared.

The men spent the morning quietly chatting in the rotunda, visiting the various cycle establishments and drinking in the refreshing country air and other things.

Great was the disappointment when it became known that nearly all, if not all, the eastern men would be absentees. Later came a telegram from Milwaukee to the effect that the serious illness of Mr. Sanger, Sr., would prevent the attendance of his son, Walter. Of course all the western men of note were present, and about noon a rumor was in circulation to the effect that in a trial during the morning Johnson had ridden a mile on the track in 2m. 0s. The Minneapolis celebrity had arrived Monday evening with his trainer, Tom Eck. The former had nothing to say concerning his Independence records, but assurances of their genuineness were handed around by Eck, ad lib. The latter stated that he had forwarded to the REFEREE office ample proofs that the records were regularly and properly made.

Perhaps the absence of the eastern men accounted for the lack of enthusiasm in the crowd. At any rate the faintest sign of the old Lake View track applause would have drowned any demonstration to-day. It wasn't a Peoria bicycle race-going crowd by any means, and none of the men, except Bert Myers and "the boy wonder," Johnson, who had been written about in all the farm journals, seemed to be known to the rural visitors. By the way, the sooner Johnson manages to live down that first-class dime museum sobriquet the better. He doesn't deserve it or desire it, for, as far as pretensions go, he is one of the most unassuming of men.

The fair ground track is an abomination. The finish is on a sharp curve at one end, behind which is a knoll entirely cutting off the view of the track. The management would have been much better had the track been kept clear.

The racing, generally, was tame. Johnson fell in the first event he entered and

thus ended any chance he may have had to prove his recently developed speed. Munger, on a wheel with an elliptical sprocket wheel, showed some improvement over recent performances, and Tuttle, considering how little work he has had this season, showed fairly good form. The results follow:

One-mile, novice—E. E. Anderson, Roodhouse, Ill., 1; A. F. Gates, Racine, 2; D. F. Miller, Peoria, 3. Nine men—novices every one of them—turned out. At the pistol shot Anderson let out and gained a lead of twenty yards in the first half. This he steadily increased all the way and eventually won easily. Gates beat Miller about five yards, the others finishing at intervals of from five to twenty yards. Time, 3:01 2-5.

Half-mile, open—Lumsden, 1; Rhodes, 2; Davis,

tions of his friends, but it proved that he had fallen at the start, and, remounting, had ridden one lap! Time, 2:45 2-5.

One-mile, 2:30 class—Bliss, 1; Thorne, 2; Tuttle, 3; Bode, 4; Stenson, 5. These were all the starters. They rode easily up to the half, at which point Thorne won in front. Bliss won by fifteen yards. Time, 2:54 4-5. A time limit of 2:40 had been placed and the event was declared no race. At the second attempt Stenson was absent. Tuttle and Thorne let out for the lead, the former, on the inside, securing it. Thorne led at the half. Bliss had no difficulty in winning by six yards; a similar distance between second and third and third and fourth. Time, 2:47 3-5.

One mile, open—Munger, 1; Johnson, 2; Lumsden, 3; Davis, 4. When Johnson appeared for a preliminary circuit of the track he showed sundry scrapes and bruises as the result of his fall. He was evidently a favorite, for the applause was liberal. Ten men lined up for the word, Johnson on the outside. They were rather slow at the start, Githens being forced to make pace. This only lasted a furlong, however, and then Bode made pace. Merrill was out of it from the start. At the half Bode was still leading, Githens second, Bliss third, Johnson fourth. Five hundred yards from the finish Munger, who seemed to

One-mile, boys—H. Brittingham, 1; Carl Palmer, 2; C. Boyschou, 3. A swarm of youngsters started, two rows being necessary; but only the placed men—or boys, rather—were fairly in the race. Four yards covered the trio. Time, 2:54 4-5.

Two-mile, safety, residents of Illinois outside of Cook County—Bert Myers, scratch, 1; Stringer, 75 yards, 2; C. Brittingham, 40, 3. Myers won by two feet. Time, 5:30 3-5.

One-mile, invitation—Lumsden, 1; Munger, 2; Davis, 3; Thorne, 4. Githens made pace to the three-quarters, where he was headed by Lumsden, who, coming on the inside, beat Munger about two yards. Myers and Githens were many yards behind the others. Time, 2:47 1-5.

* * *

The Park Avenue Races.

The third annual meet of the Park Avenue Wheelmen, held last Saturday, was by far the most successful ever given in Philadelphia save only in point of attendance, and had the weather been just a trifle less threatening there is little doubt that more people would have passed through the gates than on the 17th, when the largest audience of the year was present. Nearly four thousand people, however, crowded the grand stand and field, notwithstanding the fact that rain had threatened all morning, and the manner in which the crowd was handled was a pleasing contrast to the incompetent and ship-shod management of the previous week. It seems strange to assert that 4,000 or 5,000 people are difficult to manage, but such is the case in Philadelphia, and the number of privileged characters who appear to be able to bluff the most vigorous policeman is surprisingly large. But on Saturday for once the track was clear the entire afternoon, and none but the officials, who were provided with suitable badges, was allowed within the enclosure—even His Imperial Highness, the member of the racing board for this district, being twice shown his way out.

The same business policy obtained in every detail of the day's work, the club and its hustling president, to whom the lion's share of the credit is due, receiving many compliments. The prizes were extremely handsome, and were thought by many to rank second only to those of Springfield in value; certainly they were superior to any ever before offered at a single-day tournament. The talent was all present with the exception of Windle, Tyler, Taylor and one or two of the lesser lights, Zimmermann, of course, taking every event in which he rode, and Brother-in-law McDermott started to drive home before the races were over, with the fourth horse of the new Manasquan stable. A number of novelties were introduced, prominent among which were the 2:35 class handicap, no one being eligible not having a record of 2:35 or better, and the club race, in which the handicapping was done by seconds instead of yards, the latter making an extremely interesting race with a very close finish.

A pretty Philadelphia girl, Miss Donnelly, a sister of the popular Oxford Wheelmen's rider, occupied a front seat and presented handsome bouquets to a number of the winners, performing this duty on behalf of the club. A first class band furnished music, Fred Cope gave an exhibition of trick riding, and W. Wilhelm, of Reading, the old Star rider, rode in a few events "just to see how much faster the men were riding now than when he quit." The handicapping was good and the events run off promptly. Altogether the meet was a rousing and unqualified success, a credit alike to the club and Philadelphia. After the races, the officials and a number of invited guests were entertained at supper.

Following is the summary:

One mile, novice—A. C. Marple, T. A. A., 1; F. Zook, D. A. C., 2; F. G. Brick, 3; time, 3:03 1-5.

Half-mile, handicap—First heat—J. J. Dyer, A. C. S. N., 100 yds., 1; B. F. McDaniel, W. A. C., 100

3; Munger, 4; Bliss, 5; all of Chicago. A capital field turned out, consisting of thirteen men. It was the first meeting of Johnson with fast men since his great performances at Independence. A ripple of applause stirred among the spectators as he appeared on the track with his silver-haired mentor. The race was a great disappointment, however, for soon after passing the quarter Johnson took a heavy fall. Happily he was not severely hurt, but the race was robbed of much of its interest. Lumsden won rather easily; Rhodes about two yards ahead of Davis. The rest of the field was closely bunched. Time limit, 1:25; time of race, 1:10 3-5.

One-mile, handicap—Munger, 50 yards, 1; E. V. Minor, 120, 2; Bert Myers, 45, 3; George Thorne, 50, 4; F. H. Tuttle, 90, 5; C. D. Cutting, 130, 6. Twenty-three men answered the roll call. In the absence of Zimmerman, scratch, Tyler, Johnson, Sanger and Lumsden, 25 yards; Githens, 40 yards, was the virtual scratch man, Munger being ten yards ahead of him. At the half Munger had gained considerably more than half the lead of the long markers and seemed all over a winner. Githens was still in last place, with little chance of getting up. Eventually Munger won by three yards; two between second and third. The others finished at intervals of a yard or two. Stenson of Peoria came over the tape five yards ahead of Munger and proceeded to receive the congratula-

have regained a little of his old form, rushed to the front, and, despite the efforts of the Minneapolis man, retained a lead of three yards to the finish. Lumsden was the same distance behind Johnson. Time, 2:32 2-5. Bode took special prizes as leader at the quarter and half, and Munger at three-quarters.

One-mile, 2:50 class—H. N. Stringer, 1; A. T. Heywood, 2; M. W. Thompson, 3. A round dozen came out. Twenty-five yards from the finish a man fell, and some one with no authority rang the bell. The men were stopped at half a mile. At the second trial Heywood of Chicago took the lead and was at the head of the procession at the half. He was not dispossessed until the last furlong, when Stringer, an improving Elgin rider, came to the front and won by three yards; five between second and third; the others at long intervals. Time, 2:45 1-5.

Two-mile, handicap—Bliss, 90 yards, 1; Rhodes, 100, 2; Munger, 100, 3; Minor, 230, 4; Thorne, 150, 5. Of the forty-two entries only ten men came to the mark. Keator, 235 yards, lead at the first half, Minor at the mile. At one mile and a quarter the whole field was bunched. Ballard was first to enter the last lap, closely pursued by Bliss. In the last 200 yards only four men were in it. Bliss, ran very wide by Rhodes, won by a yard; two separating second and third. Thorne was fifty yards behind. Time, 5:11 2-5.

THE TOURIST.

The Highest Grade Bicycle in the World. Perfect in Material, Construction and Finish.

Made at Colt's West Armory, Hartford, Conn., under the same system and with the same attention to detail followed in the manufacture of Colt's fine fire arms. Gun steel forgings; all cones and bearing cups cut from the bar, not stamped.

WEIGHT: { Road Racer, 34 lbs., } PRICE, \$150
 { Roadster, 42 lbs., }

Fitted with BIDWELL (THOMAS) PNEUMATIC TIRES, guaranteed against puncture, bursting and leakage.

A GENUINE NOVELTY.

THE TOURIST BALL-BEARING LAMP WITH EQUIPOISE BRACKET.

THE MOST PERFECT LAMP MADE

WILLIAM BOWN, BIRMINGHAM, ENGLAND, Manufacturer.

A Few of its Strong Points

- Ball-Bearing Bracket.
- Ball-Bearing Equipoise Attachment, preventing the spilling of oil.
- Double Convex Lens.
- Salsbury Non-Breakable Side Lights.
- Detachable Top, Bottom and Reflector.

BIDWELL (THOMAS)

PNEUMATIC TIRES.

The races that have been won, the records that have been broken and made on our racing tires this season have been made a matter of comment by nearly every daily and every weekly paper in the country, in addition to the cycling press. Note

The Quarter-Mile in 27 Seconds.

Half-Mile in 1m. 01 4-5s.

One Mile Beating Nancy Hanks.

Two Miles in 4m. 37 2-5s.

And, in fact, all the World's Records up to five miles are on Bidwell [Thomas] Tires. They don't burst, they don't leak and they are very fast. We want you to NOTICE these statements for we shall refer to them in our adv. on 1893 tires which will shortly appear. We shall prove that the Bidwell (Thomas) Pneumatic is a long way ahead of all competitors.

Bodach Won From Scratch.

The ten-mile handicap road race of the *Æolus* C. C. was run over the west side course Sunday morning, and Frank Bodach finished first from scratch, notwithstanding a heavy road from the night's rain. There were several mishaps. Bray taking a fall, Herman's mis-

puncturing and Bretschneider's wheel breaking down. Twenty-five started and the following were the finishers:

	H'd'p.	Time.
Frank Bodach	Scr	29:40
William Bodach	4:00	34:00
Paul Teutsch	3:00	33:20
F. P. Gregg	1:00	31:55

Milwaukeeans Win All at Racine.

There is a compensating balance wheel in everything in life, and bicycling is no exception. A few weeks ago a Racine wheelman, heretofore unknown to the cycling world, experienced no trouble, with a liberal handicap, in securing the first prize in the Milwaukee Wheelmen's Waukesha road race, and shrouded the

that could by any possible means disturb its tranquil sleep.

* * *

Won by Detleson.

With a handicap of four and a half minutes Detleson was first over the tape in the ten-mile road race of the Viking C. C. last Sunday. The time prize fell to O. Peterson, who finished fourth from scratch in 30:15. The finish was as follows:

	H'd'p.	Time.
H. Detleson	4:30	24:25
H. Kamberg	1:30	31:28
Abe Hanger	4:00	33:24
O. Peterson	Scr	30:15

The Minnette C. C. Race.

Owing to the poor condition of the Garfield race track Saturday the Minnette Cycle Corps was satisfied with a

* * *

SPRINGFIELD, MASS

local talent in garments of mourning. On Saturday last the Milwaukee crowd, at the races given in the Racine exposition, got back at the Bell City boys in a manner that will leave with them a lingering recollection of what the Milwaukee push can do. The races were given under the auspices of the Racine Wheelmen's Club and their efforts were well received, a large audience enjoying the sport. The Racine riders were in about the same predicament as the fellow who fell out of the balloon, and failed to secure a single first prize. John F. Reitzner, of the Mercury Cycling Club, Milwaukee, carried off almost everything in the prize line. He won the half-mile handicap from scratch in 1:13 1-2, and the quarter-mile handicap in 36 1-4. Hueffner, who won the Waukesha road race, with twenty-five yards, finished a close second, and Wegner, from scratch, third. Reitzner also distinguished himself in the fourteen-mile race over Parkes and Bayton, of Milwaukee, and a large field. He won both the race and the time medal; time, 51:25 1-2. Quite a large crowd from Milwaukee attended the meet. The inauguration of bicycle races in Racine created quite a little excitement in that Rip Van Winkle city, and it is about the only athletic sport

five-mile road race on Douglas boulevard, between Garfield and Douglas Parks. Fully a thousand people witnessed the race. Following is the order of the finish:

	Time.		Time.
A. Soderstrom	16.24	J. J. Mundy	16.01
F. S. McGuire	15.37	L. H. Smith	16.32
A. Atchison	16.50	G. A. Jackson	18.14
P. Grant	15.57	R. L. Darrow	16.33
J. B. Woollas	15.58	George Edmunds	16.40
H. M. Stringer	15.59	F. B. Whitlock	16.04
W. B. Lewis	15.49	F. S. Olds	19.35

* * *

Zimmy Gets Another Horse.

Some 3,000 people saw the Reading, Pa., bicycle races Thursday of last week, and also saw Zimmerman add another horse to his collection. The weather and track were quite good and the races were run in a business-like manner. In the ten-mile road race Krick, the winner, had a bad fall about two miles from Reading, and received ugly cuts on his arms. He won the race in 32:52 2-5, with C. B. Jack a good second. The summaries show the results:

One-mile, novice—W. Maxwell, Lewisburg, 1; Allen F. Riegel, 2; time, 2:54 2-5.
Half-mile, open—W. W. Taxis, P. A. W., Philadelphia, 1; S. H. Bilyeu, C. C. C., 2; time, 1:16 3-5.
One-mile, 3:10 class—Fred Ermentrout, P. W., 1; A. F. Riegel, Reading, 2; time, 3:05.
One-mile, championship of Berks county—W. B. Riegel, 1; E. A. Yowse, 2; time, 2:45 4-5.

One-mile, handicap—S. H. Bilyeu, P. A. W., 95 yds., 1; A. A. Zimmerman, N. Y. A. C., scratch, 2; time, 2:28 4-5.

One-mile, 2:40 class—B. M. Murphy, N. Y., 1; E. A. Yowse, 2; time, 2:43 4-5.

Quarter-mile, open—A. A. Zimmerman, 1; H. C. Weaver, M. A. C., 2; time, 33 3-5.

One-mile, ordinary, handicap—Frank Strubel, 1; Frank Ermentrout, Reading, 2; time, 3:37 1-5.

One-mile, open—A. A. Zimmerman, 1; W. W. Taxis, 2; time, 2:48 3-5.

One-mile tandem, handicap—J. C. Donnelly and S. H. Bilyeu, 100 yds., 1; W. W. Taxis and A. A. Zimmerman, 2; time, 2:46 4-5.

One-mile, championship of Pennsylvania Wheelmen—W. B. Riegel, 1; E. A. Yowse, 2; time, 3:06.

Half-mile, boys—Ralph Scheffe, Pottstown, 1; David Green, Reading, 2; time, 1:48.

* * *

The Akron (Ohio) B. C.'s Races.

The meet of the Akron B. C. last Thursday was a decided success, notwithstanding the fact that the track was not in good shape and a strong wind was blowing. The crowd was small but enthusiastic. W. A. Skinkle of Cleveland was referee, James Josephi starter, H. D. Talley clerk, E. A. Hersly, C. E. Howl and F. H. Adams timers, W. B. Gamble, Clarence Howland and J. B. Campbell judges. Baker, Brown, Johnson and Collings had things all their own way, as the summaries will show:

One-mile, novice—George Alden, 1; W. C. Talley, 2; J. T. Malone, 3; time, 2:50 2-5.

Half-mile, open—L. C. Johnson, 1; A. L. Baker, 2; T. C. Collings, 3; time, 1:15 1-5.

One-mile, handicap—A. I. Brown, fifty yards, 1; Con Baker, fifty yards, 2; L. C. Johnson, fifty yards, 3; time, 2:50. No starters back of fifty yards.

Half-mile, boys—Lyman Jasper, 1; H. N. Jasper, 2; R. Washer, 3.

One-mile, open—A. I. Brown, 1; A. L. Baker, 2; L. C. Johnson, 3; time, 2:55 1-5.

One-mile, 3:00 class—A. I. Brown, 1; B. O. Gamble, 2; E. Zansky, 3; time, 2:52.

Two-mile, lap race—A. L. Baker, 11 points, 1; T. C. Collings, 8 points, 2; L. H. Bannister, 4 points, 4; time, 6:27 3-5.

One-mile, Summit county championship—E. Zarsky, 1; Walter Kern, 2; J. A. Weston, 3; time, 3:08 2-5.

Quarter-mile, open—A. I. Brown, 1; A. L. Baker, 2; L. C. Johnson, 3; time, 35 4-5.

* * *

Taylor and Wells Win at Toronto.

The meet of the Wanderers' B. C. at Toronto, Ont., last Saturday, on the Rosedale track, was well attended, Lieut.-Gov. and Mrs. Kirkpatrick being among the spectators. The weather was fine and good times were made, George F. Taylor equalling the Canadian quarter-mile record of 32 sec., made by Zimmerman. In the mile open Taylor and Tyler went down together and Wells won. The summary follows:

Quarter-mile, flying start—George F. Taylor, New York, 1; G. M. Wells, Toronto, 2; time, 32.

Half-mile, open—George F. Taylor, New York, 1; Harry Tyler, New York, 2; time, 1:12 2-5.

One-mile, open—G. M. Wells, Toronto, 1; William Hyslop, Jr., Toronto, 2; time, 2:39 4-5.

Half-mile, handi ap—G. M. Wells, Toronto, 1; William Hyslop, Toronto, 2; time, 1:09.

* * *

An International Race at Vienna.

A despatch from Vienna, dated Sept. 23, says that wheelmen from all nations have been invited to compete in the long distance race between Vienna and Trieste via Grasse. The route is 310 miles long. The race will take place at the same time as that of the Berlin-Vienna officers' race. Originally it was intended that the wheelmen should take the Berlin-Vienna route, but the officers objected. Among the 132 German officers that will start in the race from the barracks of the Queen of England's dragoons in Berlin are eight Saxons, six Bavarians and four Badenese. The rest are Prussians.

* * *

Buffalo Race Doings.

Up to date but two clubs have sent in entries for the Ross road race, but we believe that the Buffalo Athletic Club, the Wanderers B. C. and the Comrade C. C. will send in teams so that there will be an interesting race and a worthy

302 WABASH AVENUE, CHICAGO.

THAT'S RIGHT,

my son, always give your seat to a lady. She expects it, and it would reflect on your training if you did not. True, she won't move her skirts to make room for you to sit, but that is not her fault. She don't think. She has not learned to look out for seats for others. No, there is no helping it. It's the custom of the country and stronger than law. However, you can dodge the occasion by buying

A SYLPH BICYCLE

And not patronizing the street cars. You will then be independent, always have a good seat, pure air, splendor appetite, and save time and money.

SYLPH CYCLES RUN EASY, AND RIDE EASIEST. TRY ONE.

You can get full particulars of the finest carriage made by addressing

ROUSE-DURYEA CYCLE CO., 89 G. Street, PEORIA, ILL.

competition for the very fine trophy. The course—Buffalo to Corfu and return—is one with which all the road riders are familiar, and the favorite one for a fifty-mile race, so on that point, at least, everyone should be pleased and ready to enter.

The Comrades C. C. held its outing Saturday, at the Hamburg fair grounds, and was very successful. All the members of the club were present and a large number of its friends. The events were as follows:

Half-mile, safety—C. Malzen, 1; Gilbert Irr, 2; F. Morlock, 3; time, 1:32.

One-mile—W. Kempf, 1; F. Morlock, 2; C. Malzen, 3; time, 2:58.

One-mile, club championship—G. Engelhardt, 1; P. Saenger, 2; C. Laas, 3; time, 2:58.

Half-mile, club championship—P. Saenger, 1; J. Schultz, 2; C. Laas, 3.

Eighth-mile, slow race—F. S. Smith, 1; J. Schultz, 2; A. Connors, 3.

Third-mile, club championship—C. Malzen, 1; C. Laas, 2; C. Egner, 3.

* * *

Two Chicago Road Events.

In the Ashland club's race last Saturday there were but four starters out of the twenty-one entrants. The course was from the Oak Park school to Washington boulevard and Forty-first street. Hall won from the hundred-yard mark, Fordham, scratch, 2; Thatcher, 100 yards, 3; Street, scratch, 4.

The five-mile road race of the employees of Henry W. King & Company Saturday, from Garfield to Douglas Parks, was won by R. T. Brady, Frank Woodrigh second and Frederick Mann, third. The time prize was won by Consover.

* * *

Racing at Lynn, Mass.

Friday the West Lynn Rovers held their annual meet on the Glenmore Park track. The winners and times were as follows: Mile, novice, R. M. Madden, 2:43 4-5; mile, handicap, P. Keown, 100 yards, 2:27; two-mile, lap, T. Relph, Springfield, 5:33 1-5; mile, three-minute class, Edward P. Keown, Lynn, 2:49 3-5; two-mile, handicap, J. P. Clark, Dorchester, 5:15 3-5; mile, handicap, J. P. Clark, 2:58 2-5; mile, scratch, T. Relph, Springfield, 2:35 2-5.

* * *

Slightly Mixed Up.

A mixed meeting of cycle and athletic events, is not a very robust success, and the athletic club known as the Riversides of Newark held a mixed meeting at Newark, N. J., last Saturday. The five-mile bicycle race was so badly mixed at the finish that it would be hard to convince Fred Hawley, K. C. W., and H. Hawthorne, of the Orange A. C., that there was only one winner. As the referee was speeding towards New York, "having to catch a train," the information as to who won that five-mile race will be hard to get, and the subject will be a good one for the two clubs to debate this coming winter.

Paul Grosch, "a coming man," won the two-mile from forty yards in 5:58 3-5; H. Hawthorne, 110 yards, second; George W. Coffin, who was nearly a corpse when he finished, third. The five-mile handicap ended in two men claiming the race, H. Hawthorne, 300 yards, and Hawley, 250 yards, assisted by several referees and judges.

The St. Louis Boys Hustling.

St. Louis, Sept. 28.—The Jacksonville tournament is the principal subject of conversation with local wheelmen at present. The short distance between here and Jacksonville will undoubtedly help make the attendance very large. Fully twenty members of the St. Louis Cycling Club will be there, most of them leaving here Saturday night. It is not known how many the other clubs will

take up, but there will be a good many. Much disappointment is felt over the report that Zimmerman will not be on hand; but it is not likely that his absence will make any difference in the number of prizes won by the fast men from the "wild and woolly west."

The South Side Club, with its well known push and energy, has issued invitations for a smoker to be held Friday evening in its new quarters. The St. Louis Cycling Club has received an invitation and will attend in a body.

GOOD MILITARY CYCLING.

Anyone who has ever seen farmers work out their road tax on the county roads in Missouri will have an idea of the time the Cycling Club boys had in their cross-country trip from Jefferson Barracks last week. Some parts of the roads were just in good condition for planting, except that a little harrowing would be needed. The distance covered while on duty was eighty miles and it was ridden in nine hours, including about two hours in stops for inspecting tunnels, bridges, etc. Another good point made by the wheelmen was that the run was not made by picked men. The captain simply sent out run cards to the entire club and took with him all those who showed up, and every man that started finished at the barracks in good shape and not too tired for the ride back to St. Louis after supper. The total distance covered during the day was 106 miles. The route was from Jefferson Barracks to Barrett's Station, on the Missouri Pacific Railway, twenty miles, going out through Meramec Highlands; then straight across country through Manchester to Bellefontaine postoffice, on Olive street road, and out that road to Drew, on the Kansas City & Colorado Railroad, twenty-five miles from St. Louis, and about eleven miles across from Barretts. The trip in was made through Clayton and St. Louis. The trip was spoken of very highly by Colonel Young, who said that it would take the average cavalry company two days to cover the route, and then at a risk of injuring their horses.

* * *

Small Michigan Meets.

GRAND RAPIDS, Sept. 25.—The past week has been a very lively one for the local cyclists. Besides the races at the fairs there have been numerous runs in the evening. The races given by the West Michigan Fair Tuesday were well attended. In the five-mile handicap there were nine starters. They finished in the following order: Troop S. Richmond, F. A. Richmond, C. M. Boitree, F. S. Gilbert, G. A. Chafe, W. D. Phippen, W. N. Souser, Edgar Amidon, E. J. Curtiss; time, 16:51 4-5. The prizes were three gold medals, valued at \$25, \$15 and \$7. The second race was the three-mile lap race. There were seven starters, who finished as follows: T. S. Richmond, F. A. Richmond, F. S. Gilbert, G. A. Chase, E. J. Curtiss. C. M. Boitree and W. D. Phippen withdrew after the first mile; time, 9:54. The prizes were gold and silver medals valued at \$25 and \$15.

Next Friday the Grand Rapids Bicycle Club will hold a race meet at the Comstock Park for local riders only. It promises to be a very interesting meet.

Several of the local riders have entered for the races given by the Berlin fair next Thursday.

The Kent County Fair Association gave a one-mile handicap race Friday. There were eight starters and they finished in the following order: Troop S. Richmond, Charles Richmond, Souser, Chase, Saliers, George, Curtiss and Gilbert. The time was 2:46 1-2. The prizes were an opera glass, gold headed umbrella and scarf pin.

HALL.

Race Notes.

Gold medals only will be the prizes at the meet at Lancaster, Pa., to-morrow.

Oct. 21 is the date set by the wheelmen of Leavenworth, Kas., for a meet.

Oct. 8 the First National Bank C. C. of Chicago gives a ten-mile handicap road race over the Garfield course, at 4:30 o'clock.

The Elgin (Ill.) meet, Oct. 1, promises to be a successful affair, as the prize list and the number of entries is already very large.

The tournament to-day at Bay City, Mich., promises to be a success. The open events are two-mile, handicap; half-mile, open; three-mile, lap; quarter-mile dash; five-mile, handicap; one-mile, handicap.

At Helena, Mont., Sept. 18, William Swendeman captured the quarter, half, one, two and five-mile open races and made a state record of 14:15 for the five-mile event. C. K. Anderson took the quarter and half-mile novice races, and the mile handicap.

The Colorado Wheelmen of Denver are making every arrangement for the success of their tournament Oct. 8, and at their last meeting the committees reported everything as moving nicely. There have been some very valuable prizes offered by Denver business houses.

The Owosso (Mich.) Wheelmen announce the following programme for their meet for Sept. 29: One mile, novice; half-mile, open; one-mile, club championship; one-mile, open; half-mile, for boys; one-mile, county championship; three-mile, lap race; quarter-mile, open.

The Buffalo fifty-mile team race for the Rose prize will take place Saturday over the Corfu course. F. A. Foell, F. W. Runser, J. W. Linneman, Jesse Kittinger and C. H. Callahan will represent the Press C. C., and the Rambler team will be E. F. Weinig, G. G. Buse, W. F. Buse, F. C. Fuhrman, F. E. Klipfel and Dan Buse.

The first race meeting of the Hudson (N. Y.) Bicycle Club will take place on the fair grounds on Saturday, Oct. 22. The races will be open to all Columbia County wheelmen, except the one-mile club championship, which will be confined to members of the Hudson club. Entries will be received up to midnight of Friday, Oct. 21, by Louis H. Payne.

The contestants in the mile open race at the Eastern New York and New England Agricultural Society's fair last week all came to grief, one, Charles Devine, receiving a broken leg, and several others being more or less hurt. Just as the men were nearing the quarter pole two women drove a horse and buggy across the track and every man rode straight into the rig. The buggy was demolished, but the women and horse escaped injury.

The Ravenswood Cycling Club has issued its programme of winter entertainments, the first series of which is as follows: Sept. 21, donation party; 28, cinch; Oct. 5, euchre; 12, musicale; 19, cinch; 26, dancing; 31, Hallowe'n party; Nov. 2, euchre; 9, Friday afternoon in a country school; 16, cinch; 23, dancing; 30, euchre, Dec. 7, bonnet party; 14, cinch; 21, auction party; 25, Christmas tree. In the card tournament there will be seventy-seven games, eleven each evening for seven evenings. Four handsome prizes will be given, two for gentlemen and two for ladies.

The Winton Company Reorganized.

The Winton Bicycle Company, of Cleveland, Ohio, has recently been reorganized with a paid-up capital of \$100,000, and is now located in its extensive factory corner of Perkins avenue and C. & P. R. R. The following are the offi-

cers of the new company: F. L. Alcott, president; Z. Davis, vice-president; W. H. Boardman, treasurer and general manager; George H. Brown, secretary. Mr. Winton will continue to have charge of the mechanical and designing departments. The well-known business ability of these men, together with ample means and practically unlimited facilities insures to Cleveland one of the leading bicycle manufactories of the country. The plant is equipped with the most modern machinery. Models of roadsters, racers and ladies' machines are being made, and the company will be in position to turn out wheels in quantity for 1893.

The Winton wheel has a double frame made of continuous steel tubing, with a brace running from the saddle post to the fork crown, forming a perfect diamond and making a frame of great strength, beauty and lightness, with an extended wheel base. Arrangements are being perfected by which they will be able to furnish any of the popular tires. The company owns a number of valuable patents covering the frame, special bearings, chain adjustment, etc. It has lately completed an original racing tandem, with patent anti-friction chain gearing, and weighing only forty-eight pounds, and will in a few days turn out the first American triplet, with the new gearing and correspondingly low weight. Edwin Oliver, who is so well and favorably known to the trade throughout the country, will represent the house on the road in the middle and eastern states.

The Trade in Chicago.

R. D. Garden has been on the sick list.

L. Danziger returned Monday from a tour in Wisconsin.

A. C. Banker, the New York racing man, was in Chicago over Sunday.

The Windsor C. C. has decided to rent a house for the winter, as the new club house can not be completed in time.

Louis Jordan has returned from a week's trip east, where he met his family just home from Europe, and transacted a little business. For next season Mr. Jordan proposes to build a few wheels, some for the market and some for exhibition at the World's Fair. He will also show some fine shot guns at the fair. A few racing wheels may be made, too.

Arthur A. Taylor, of the Taylor Cycle Company, is now in Europe, having sailed Sept. 21 with Thomas Sanders. Mr. Taylor is abroad to close a contract for Psychos for 1893. The Taylor company will handle some racers next season, and will probably have no trouble to get some of the best men on this popular wheel. Saturday the Taylor company disposed of a lot of cushions and solids at auction, as high as \$80 being realized on some machines.

Frank Douglas, of the Kenwood Manufacturing Company, who is just home from abroad, says the styles of machines are not to be changed much for 1893, as far as he was able to learn while on his trip. He kept his eyes open for tires, but found that almost everybody recommended the Dunlop, which, he says, is most generally in use. His concern will build three weights of gentlemen's wheels next year, the roadster, about 35 to 37 pounds; road racer, 32 or 33 pounds, and the path racer 26 pounds.

Golder in America.

Stephen Golder, armed with a quarantine certificate and samples of the New Howe, is one of the sights in New York cycling circles these days. He is getting very stout and is as full of his quiet tricks as ever. On his arrival in New York he found eleven hundred applica-

SALADEE'S PATENTED INTERNATIONAL STANDARDS

For the UNITED STATES, CANADA, ENGLAND, FRANCE,
GERMANY, BELGIUM, AUSTRIA AND SWITZERLAND.

**Saladee's
Standard Road Saddle**
For Ladies and Gents.
Weight, 2 lbs., 2 oz.

**Saladee's Standard
FOR
SCORCHING SADDLES.**
Weight, 1 lb., 14 oz.

The arrow points in Fig. 1 indicate the open spaces between the plates of the spring in front and rear of the clasp, and which are closed as the weight is applied to the seat, reinforcing the spring as it is depressed, and thereby affording an AUTOMATIC ADJUSTMENT, to a light or heavy rider. Never before attained in cycle saddlery.

Correspondence Solicited for next season's trade.

The Whitten-Godding Cycle Co.
PROVIDENCE, R. I.
Sole Manufacturers for the U. S.

The simplicity, style, and comfort embodied in Fig. 2, as a "Scorching" Saddle, has never yet been equalled.

In this spring, the weight of the rider is so balanced, in relation to the L-Rod, that the absolute rigidity of the old "Hard Shell" is avoided, and hence a degree of comfort is retained that all expert cyclists riding a "Scorching" will duly appreciate.

Established 50 Years. BIRMINGHAM, ENG.

"PERFECT" POCKET OILER.

Best and neatest can in the world. Throws only a small quantity of oil at a stroke; no leakage; handsomely nickel-plated. For sale everywhere. Price, 50c. each.

"PERFECT" POCKET OIL HOLDER
Best and most convenient device for carrying an oil can on a bicycle. Thoroughly adjustable and easily attached to any part of the machine; no rattling; handsomely nickel-plated. Price, 25c. each.

CUSHMAN & DENISON
172 9th Ave., - New York.

"PERFECT" Pneumatic Pump Holder
Similar to oiler holder, but slightly larger. Pump is always convenient and vexatious delays avoided; handsomely nickel-plated. For sale everywhere. Price, 25c. each.

CUSHMAN & DENISON
172 9th Ave., - New York.

THE MOST NEWSY CYCLING JOURNAL IN EUROPE.

For really pleasing cycle reading, bright, chatty and light, commend me to the *Irish Cyclist*. Although it necessarily devotes much of its space to Hibernian affairs, it always contains matter of general interest, while its little stories and anecdotes are well seasoned with Attic salt. Mr. McCreedy would certainly satisfy Carlyle's requirement in "able editing," the whole paper is stamped with his pleasant imprint.—*The People, London.*

The ablest edited and most newsy cycle journal in Europe—*Irish Times, New York.*

One of the smartest and liveliest of cycling papers—*National Press.*

Mr. McCreedy's admirable cycling journal has pushed its way by sheer merit and enterprise into the very front rank of sporting papers.—*Freeman's Journal.*

Specimen Copy, post free, from **MECREEDY & KYLE, 49 Middle Abbey St., Dublin.**

SUBSCRIPTIONS, POST FREE, SIX MONTHS, 5s 6d; ONE YEAR, 10s.

The best paper in its peculiar line published.—*Irish Society.*

Its literary fare is still as bright and interesting as ever.—*Cycling.*

Although some of our English cycle journals are reckoned pretty smart, they cannot beat it.—*Hull Daily News.*

Matter which from beginning to end is thoroughly interesting, not only to Irish riders but also to English wheelmen.—*Liverpool Athletic and Dramatic News.*

The most interesting of wheel papers.—*Cricketer and Football Field.*

A credit to the country.—*Belfast Morning News.*

Admirable miscellany of everything interesting to cyclist.—*Weekly Irish Times.*

tions for New Howe agencies—more than half of them from the west.

Won On a James.

At the Racine tournament, September 24, I. F. Reitzner, of Milwaukee, made a clean sweep of all the first prizes, starting at scratch and winning five events. He also won first prize and time medal in the fourteen-mile handicap, starting from scratch. Reitzner rode a James track racer.

Illinois Road Book.

We have received an advance copy of the new Illinois Division Road Book, the work, for the greater part, of L. W. Conkling. It is by far the finest thing ever issued, in the west, at least, and contains no less than seventeen first-class maps. A supplement of the Southern Wisconsin riding district is included. The book may be obtained on and after May 25, at two dollars per copy, of L. W. Conkling, 296 Wabash avenue; F. W. Gerould, 108 Madison street, B. F. White, 832 Washington boulevard, or the cycle stores. We believe arrangements have been made to supply league members at a reduced figure.

Frank G. Lenz, *Outing's* correspondent, is expected in California about the middle of October.

SUPERINTENDENT WANTED.

An Experienced man to act as superintendent of a High Grade Bicycle Manufactory. Address, SUPERINTENDENT, this office. 22-1

THE NATIONAL L. A. W. SOUVENIR MEDAL made in bronze, gold finished, and the Cottage City medal finished in silver nickel. Both mailed together for 75c; 50c. singly. A handsome offer and one you should take advantage of. The J. E. POWER MEDAL Co., makers, 15 Cornhill, Boston.

FOR SALE.

A 36 inch Crypto Geared Ordinary, geared to 60 inches, 1 3-4 Boothroyd tires, pump, tools and lamp. Has not been ridden 100 miles. A splendid roadster, fast and safe. Also a Lady's Phoenix, M. & W. tires, bell and lamp. Has not been ridden 50 miles. Also a Lady's Paragon, cushion tires. Ridden one season, and in perfect condition. Every one is a bargain. Owner must sell at once. Will send any machine C. O. D. with privilege of examination, upon receipt of express charges. Address E. H. W., No. 17 Clark Ave., Freeport, Ills.

CHICAGO, ILL.

The Trade in Great Britain.

LONDON, Sept. 10, 1892.—The sixteenth annual Stanley show will take place from Nov. 18 to 26, inclusive, at the Agricultural hall, Islington, which is located in the north of London. This is the only building of sufficient size, within the metropolis, which is available for the great cycle exhibition. The show was held here ten years ago for one occasion only. The space is sufficient for the display of 2,400 machines, in addition to accessories of every kind. This year a great success is anticipated. There will be free entertainments every evening, including concerts, elaborate lantern shows, trick riding by Nick Kauffman, and a lecture by an eminent cycling doctor. Among the firms which have decided to exhibit are the New Howe Company, Whitworth Cycle Company, Crypto Cycle Company, Wenham Company, Morris, Wilson & Company, Trigwell & Company, Clement et Cie of Paris, and three other French firms; Newton & Company and many others. The Dunlop, Seddons, Preston-Davies and Michelin are among the tires that will be exhibited. There will be a Stanley Welcome Club during the show, which will greatly add to the comfort of visitors desirous of engaging in conversation with their friends apart from the crowd and bustle of the show, while taking rest and refreshment. The Stanley dinner will be held in November, before the show, and the list of invitees will be larger than usual. Two enormous invitation smoking concerts will be held before the show, one in North, the other in South London, to which the metropolitan clubs will be invited. There will be a formal opening of the show by a public man of eminence, followed by a luncheon. Mr. John Dring, 57 Chancery Lane, W. C., is the secretary of the Stanley show, and his experience and tact are only equalled by that of the committee supporting him.

PREVIOUS STANLEY SHOWS.

For many years past the Stanley show has been a difficult enterprise to manage. The manufacturers, or some section of them, have always had a grievance which it has been found impossible to remedy. Joint conduct by a committee formed of representatives of the leading firms and the Stanley club only resulted in the smaller firms boiling over with jealousy and distrust. The Cycle Manufacturers' Association, formed in 1889, was instrumental in inducing some eighty firms to sign an agreement not to exhibit at any show during 1891. This arrangement worked badly for the signatories, as the two Stanley shows held during the year in question proved hugely successful. This year the Manufacturers' association is making an attempt to hold a rival exhibition after the Stanley show. Unfortunately for its chance of success it only possesses the confidence and promises of support of a section of the trade, which section, however, includes several of the large firms, and has adopted the unwise policy of boycotting the firms who are supporting the Stanley show.

The dates fixed for the Manufacturers' show are from Jan. 20 to 28, at the Crystal Palace, whither the association was compelled to resort for the reason given above. It remains to be seen what share

of support from the general public the venture will attract, but at the time of writing there does not appear the least likelihood of the original Stanley show being shorn of its usual importance.

THE HUMBER FRONT DRIVER.

I called recently at the viaduct premises of Humber & Company, but in response to my enquiry could learn nothing respecting the front driver safety which rumor has credited the firm with being interested in. From information which has reached me from reliable sources outside the trade I am, nevertheless, able to state that the firm has in its possession a front driving gear of remarkable simplicity. It is good to look at, but experiments have proved not altogether satisfactory in actual use upon the road. Whatever the firm may do in the future, it has no present intention of forcing a F. D. safety on the market for 1893, partly because of the immense success of their present patterns and partly because to do so would cause the entire trade to swing round imitatively and rush headlong into the production of the novelty.

RUDGE PEOPLE HAVE ONE, TOO.

The Rudge Cycle Company has entered the field with a front driver safety. I regret I have not yet examined it, as the only specimen in London is undergoing trial on the road just now. Its general principle, however, may be gathered when it is stated that its gear resembles the M. A. C. in appearance, being attached to the crank on one side, but that there is no chain. When I have seen it I will speak further of the Rudge novelty.

STILL LIKE THE ORDINARY.

Macbeth, Phillips & Taverner are having the gear for their geared ordinary, referred to in a previous letter, made by the R. F. Hall Manufacturing Company. Unfortunately the gear is not adaptable to a F. D. safety, but a very satisfactory demand for the higher mount has already been manifested. Both Mr. Macbeth and Mr. Phillips were enthusiastic ordinary riders a few years back, and, although their success with the Macbeth safeties has brought them fame and custom from far and near, they still speak lovingly of the delights of the high wheel.

NOT QUITE READY.

The New Howe Company, upon one of whose safeties—the first ever turned out, by the way—E. Dance has just lowered the London-to-Brighton-and-back record, will have its forthcoming F. D. safety on view at the Stanley show. The details as to its construction are not yet definitely settled, but I have little doubt we shall see something good between now and November.

HAS A VERY NARROW TREAD.

In a recent letter I referred to the special gear undergoing trial by Morris, Wilson & Company, with the view of adoption for their F. D. safety. This week I had a chat with Mr. Morris and learned that although the safety constructed ran very fairly on the road, it had not given entire satisfaction and had been set aside in favor of another gear, without toothed wheels, but possessing a short chain. Of course, the Referee firm will turn out nothing that is not first-class of its kind, and in the meantime they have executed several orders for front drivers by fitting the Crypto gear. I was shown the frame of the 1893 Referee racer, which will be seen at

the Stanley show, and weighs thirty-two pounds. The gear will be sixty-eight inches, and by an entirely original mode of construction the bottom bracket boasts ball races considerably apart, combined with the narrowest tread I have ever seen on a safety. By a novel and ingenious method the bottom tubes are kept quite straight, a great advantage, especially when accompanied by the narrow tread, which racing men will be quick to note.

HAS TRIED THE CRYPTO.

Since last writing I have given the Crypto light roadster F. D. safety a thorough trial upon the road, having ridden it considerably over 100 miles.

The machine, I think I mentioned, was a thirty-six-inch, geared to sixty inches, with a twenty-six-inch back wheel, shod fore and aft with one and three-quarters inch light roadster Boothroyd tires. Of course it had no brake or back wheel mud-guard, and its weight, when equipped with bell, lamp, tool valise and pump, was between thirty-three and thirty-four pounds. After getting off a full roadster geared ordinary weighing, when similarly equipped, fully forty-four pounds, the difference was, of course, most marked. The little machine seemed to fly along, and the steering never caused me a moment's uneasiness. As far as I could discover it was as safe on greasy roads as its high brother, the geared ordinary. At all speeds it ran perfectly steadily, a fact due, I presume, to the size of the back wheel. Except upon the vilest, worn-out granite sets, the safety seemed every bit as comfortable as my own mount. So sweetly does the machine run that it is only possible when traveling at top speed to tell one is not pedaling a direct-driven cycle. When going very fast a faint whirr is heard from the gear box, if silence prevails along the road, but this is so slight as to be scarcely noticeable.

A GRAND HILL CLIMBER.

Up hills I discovered the machine to be remarkably rigid and found its propulsion quite as easy as any rear driver I have tried. The machine possesses plenty of life, and runs at least quite as fast and more smoothly than a chain-driven wheel. Against a wind, of course, the rider is no more exposed to windage than on the rear-driver, whilst when traveling by night at speed, the remarkable ease with which a backward dismount can be effected, adds vastly to his confidence. Altogether I was very delighted with the mount. If I could own two cycles I should keep a Crypto light roadster F. D. safety for speed work and night riding. As it is, however, I remain content with my geared ordinary for all-round use, in spite of its stable companion's attractions.

P. S. Sept. 11.—After closing this letter I see F. W. Shorland has won the North Road Club's open twenty-four-hour road ride, and established a new record of 370 miles, beating Holbein's recent road ride of 359 1-2 miles by ten and a half miles. Shorland rode his usual F. D. safety, and the four who finished behind him rode rear-drivers.

STANLEY.

Eastern Trade Notes.

The George R. Bidwell company had a fine exhibit of its famous goods at the New York state fair, Syracuse. N. G. Peoli, their New York retail salesman, had charge, and duly impressed the natives with his eloquence.

George Atwater of the Stover Manufacturing Company is showing an all bright Phoenix through New York state, and booking not a few orders. Jack Ketchum, who is in charge of the com-

pany's Broadway store, in Atwater's absence, says so.

The Metropolitan Hardware Company of New York is struggling with several law suits, or will have to before some of their Rudge agents will pay full price for some Ridges that went wrong. So say Bensinger, Bowdish & McDonald, the Brooklyn agents.

Herbert Laurie, the English amateur, has been in a condition bordering on "strap" of late, and failed to secure employment in the trade. He is now in hopes that his father will start him in some business in October. Some money for that purpose, he says, is forthcoming.

A. H. Overman, president Overman Wheel Company, landed from a North German Lloyd steamer at New York Tuesday, Sept. 20, looking ruddy and happy, and stated that he had a most delightful time abroad. There will be much activity at Chicopee Falls from this time on.

Elliott Mason of the Pope Manufacturing Company recently sold a lady's Hartford to Miss Cecil Charles, World's fair commissioner to Costa Rica, who will contribute articles to *Good Roads*. The dark-eyed South American young woman is riding around Long Island and is delighted with the exercise and sport.

A. C. Banker, the well known dealer, is figuring on a trip to England to act as the broker or agent for firms in the cycle trade both sides of the Atlantic. Being a practical man in the trade, Banker thinks he can save many a trip for people who might entrust their business to him. His headquarters will be in London. He is now on the way to Chicago to see some firms there.

Mr. Philpot, manager of the New Howe Company, Glasgow, writes that the REFEREE was mistaken as regards his health, and that it was W. Rodford of the company who had been ordered abroad for his health. Mr. Philpot is enjoying good health, having spent several weeks at his charming Highland residence, some miles from Glasgow. W. Rodford is a draughtsman with the New Howe Company.

Lon Crondel of Howard A. Smith & Company, Newark, is a deputy sheriff for Hudson and Essex counties, and recently a man did something shady in a business way with his firm. Crondel put on a star, chased his man over to New York, caught him and soon had him behind the bars in Newark, and kept him there long enough to get the money he owed his firm, while the other creditors mourned. Lon has pink hair, like Herrick, but he is much all there, like the Chicago man.

The Raleigh company has given territory to the following firms: Pennsylvania, south New Jersey and Delaware to the millionaire concern, John T. Bailey & Company, Philadelphia, who have ordered \$20,600 worth of wheels; H. T. Hersey & Company, Indianapolis, which has the entire state of Indiana, and ordered \$15,000 worth of "Zim's" favorite, J. E. Poorman, Cincinnati, central and south Ohio, Kentucky, West Virginia and Tennessee. Poorman, who must be a rich man, ordered \$20,000 worth of Raleighs.

Called at Our Eastern Office.

The following people called at the REFEREE's eastern office last week: Stephen Golder, B. Ripley, Arthur Barrow and C. Vernon Pugh of Coventry, Eng.; Frederick Jenkins, founder of the *Wheel*; L. B. Whymper, Schoverling, Daly & Gales' manager; W. M. Perrett, representative of Bretz & Curtis Company, Philadelphia; E. J. Righter, Lincoln,

2:08 4-5

TYLER'S MILE AT SPRINGFIELD WAS MADE ON THE

AIRTITE TIRE

FIG. 2.

A WORLD'S RECORD FOR A STARTER.

The AIRTITE cannot be torn off the wheel when inflated, and you don't have to call in the police to remove it when it is deflated, nor commit a murderous assault on its vitals to repair it. It's a Jim dandy from Beantown. Write for particulars to

AIRTITE PNEUMATIC TIRE COMPANY,

172 Columbus Avenue, **BOSTON,** KIRK BROWN, Manager.

P. S.---DEAR MR. HICKORY ELLIOTT:---We respectfully submit the above in answer to your conundrum of last week. Give us something hard.

Neb.; C. P. Root, Chicago; L. M. Boardman, H. Laurie, T. Mallinson, Eng.; A. C. Banker, Alexander Schwalbach, M. Quinlan, James Sullivan, *Sporting Times*; James J. Corbett, champion boxer of the world; Manager William Brady and C. A. Persons, Person & Mülle, saddle makers, and Thomas Connell.

A Good Saddle Combination.

Last week saw the close of the largest deal in saddles ever reported, which will amount to over 60,000 in number. For a number of months back the Garford Manufacturing Company and the firm of Parkhurst & Wilkinson have been negotiating to the end that the latter house should handle the output for all territory west of Elyria. The Garford business has grown to such an extent that Mr. Garford thought it necessary to give the factory more of his time, and this could not be done if he did not succeed in securing such a house as the Parkhurst & Wilkinson to handle half the territory. Mr. Garford was particularly anxious to secure this firm for the reason that the house did not handle bicycles, and therefore there would be no cause for jealousy. The contract has been closed and takes effect Oct. 1. Both firms are to be congratulated upon the successful termination of the deal. Messrs. Parkhurst & Wilkinson will not job to the dealers, but will confine their attention to wholesale houses, and so arrange it that hereafter the trade throughout the country will have no difficulty in getting Garford saddles. This firm is the oldest and one of the best dealers in parts. The wonderful success the house has had in the bicycle parts line is due to R. B. McMullen, a gentleman who is known to manufacturers from the Atlantic to the Pacific. This house has, up to the present time, been the largest customers in America for Warwick & Sons. These goods will now be made by C. J. Smith & Sons, Milwaukee; in fact the entire output of forksides, seamless and brazed, rims, guards and other specialties of the Milwaukee factory will be taken by Parkhurst & Wilkinson. Coming back to saddles again, we are assured that the '93 patterns will be the finest ever turned out. Experts have been at work for months on the new saddles. The line will include twenty in number, embracing the English and American patterns. Illustrations of the new patterns will soon appear in these columns. East of Elyria the selling of the Garford is in the hands of Ned Oliver.

Messrs. Parkhurst & Wilkinson are the largest importers of tubing in the world. Two million feet have been contracted for the coming season. The firm also contracts the output of the Indianapolis Chain and Stamping Company, Indianapolis, and Union Drop Forging Company, Chicago.

The American Ormonde Company.

The affairs of this popular concern have been much talked about of late, and formed the topic of interest among the trade at Springfield, a report being in circulation that it had been closed up on a judgment. To get at the facts a REFEREE representative called on Secretary Bridgeman last week. At the company's spacious and handsome quarters on One Hundred and Twenty-fourth street and Seventh avenue, the usual activity pervaded the salesroom and office.

"Is it true that you were closed on a writ, Mr. Bridgeman?"

"Yes, quite true, and I will explain matters. We had trouble with the Westboro saddle maker over some saddles, having given him a heavy order early last spring. Some of them did not come

up to our expectations, so we refused to meet the notes we gave in payment for the same, but returned sufficient saddles to square the account. In the meantime the notes had been transferred to a Westboro bank, which sued us and attached at the same time, much to our astonishment. The Westboro man attached our New England accounts and our New York bank account, which did us a great amount of injury; in fact, came near forcing us to the wall, and if it had not been for friends and other creditors who came to our rescue, I don't know how things would have turned out. We will fight the saddle claim in the courts."

Here Mr. Bridgeman showed a statement of the financial condition which has been sent to all the creditors, and which shows that the company's assets are \$125,000 and liabilities \$75,000, leaving a balance of \$50,000 to the good. The company has had a very successful first year, its profits amounting to \$21,000, and the losses very small. The greater part of the large stock of goods is saleable.

"There is no doubt that we are overstocked," said President Willis, "and the slowness of the trade the early part of the season is responsible for it, as our western business suffered as much as that of other houses. We have made satisfactory arrangements with the majority of our creditors for an extension of time, which they themselves proposed, and we heartily thank our friends for their confidence and help at the critical period when the wrecker was abroad. We will repay their confidence, I feel sure."

It seems the English Ormonde Company was the largest creditor, \$20,000. This young and enterprising firm is out to do what is right, else what would have been easier than for President Willis, who is a brother of the president of the English Ormonde Company to have stepped in and wrecked the whole concern, gobbled the lion's share, and told the American creditors to whistle for their dues? It looks as if the American Ormonde Company is to be treated with confidence by its creditors, who assure the REFEREE that they have implicit confidence in the young men who are pursuing the right way in their temporary difficulty, and it is to the credit of their creditors that they have extended a friendly hand to young men who seemingly deserve the same.

The Popular King and Queen of Scorchers.

Mr. Mushing, of the Centaur Cycle Company, is paying his third visit to this country, having left Liverpool on the City of New York on Aug. 31. The Centaur Cycle Company is one of the few leading firms which lays claim to having had a most successful season. This success is without doubt attributable to the fact that it was the first of the "old firms" to break away from the traditional prejudice of using unnecessary weight in the construction of its wheels. The firm has acted as a pioneer in demonstrating that it is possible, with experience and skill, to produce a wheel that will stand even American roads at a weight well under thirty pounds. At the present moment it is no exaggeration to say that the King and Queen of Scorchers (as the Centaur Cycle Company's wheels are called) are two of the most popular English wheels imported into this country. It is an open secret that the firms which handle these wheels—Kingman & Company, of Peoria; McIntosh-Huntington Company, of Cleveland; Hulbert Brothers, of New York; Wright & Ditson, of Boston—could have sold double the quantity during this season if they could have procured them. Under these favorable cir-

cumstances we may expect that Mr. Mushing will have little trouble in making satisfactory arrangements with these firms to handle these wheels for next season, and that after he has finished his pleasant visit to us he will be able to return home with a full book.

We understand that he has another surprise in his bag for American wheelmen in the form of a K. O. S. racing safety weighing twenty pounds. This shows that this enterprising company is determined to keep to the front by utilizing its past season's experience in producing something that will startle the racing cracks. George M. Hendee, who has recently paid a visit to Coventry, was so struck with the construction of this wheel that he insisted on bringing one back with him; Mr. Hendee, with his "featherweight" of 210 pounds, having satisfied himself of its strength by riding it for some days over English hills and dales.

Praise for the Hall Chains.

In the manufacture of chains the R. F. Hall Manufacturing Company, of Birmingham, Eng., has been very successful. The strongest kind of endorsement has been received from such houses as Humber & Company, Whitworth Cycle Company, Bigbie, Twentyman & Company, Bayliss, Thomas & Company, Calcott Brothers and many others. Humber & Company say that "since using the R. F. Hall chain we have had no reason to regret our choice." The Whitworth people say, "We have found your chains very even in pitch, which we require to be very exact, and they have more than answered our expectations in wearing qualities. Bayliss, Thomas & Company: "We cannot speak too highly of the quality of your chains. They have given general satisfaction. In no instance have we had any complaint from any of our customers."

Doesn't Subsidize Riders.

The New Buckingham & Adams Company, of Coventry Works, Birmingham, gives this thrust to the English trade who employ amateurs. In its *Cyclist* advertisement it says: "We have never yet subsidized amateur riders, being a controversion of the rules and regulations of the National Cyclists Union and a breach of amateur law. We do not intend to depart from this principle, but will present a prize, value one hundred guineas, to the first amateur who succeeds in lowering the one-mile record on one of our champion racers, while we will give a similar amount in hard cash to the one who succeeds in lowering the mile record on our machine."

New York Trade Matters.

A. E. McKinnan, an employee of the Pope Manufacturing Company, wishes it to be known that he rode his Century Columbia shod with "hose pipe" tire from Boston to Washington in four days, without a mishap of any kind, and having covered 2,000 miles in and about Boston sh's season on the same machine. Mr. McKinnan don't claim a record, but simply wishes the fact known.

Samuel Snell is expected shortly in New York. The famous lamp man is to become a resident and citizen of the United States, and has expressed his intention of starting a lamp factory here.

The new ruling of the treasury makes it impossible to land an old bicycle or any kind of a bicycle without having to pay duty thereon, and even professionals can not land wheels now because they are "tools of their trade. This move makes it impossible for the tourist to land his wheel when purchased in England, free of duty.

W. M. Perrett, or "Billy" Perrett, as

he is better known, is doing great work for Bretz & Curtis, Philadelphia. He has booked many large orders for the Scorchers on his recent trips east and west.

The Ormonde Company of London has an attractive half-page advertisement in one of the English cycling papers, headed "answers to correspondents," giving enquirers advice to buy Ormondes.

Kirk Brown, manager of the Airtite Tire of Boston, was a caller at the REFEREE office, New York, last week. The ex-Philadelphian exhibited a letter from his political district in Quakertown which said they wanted Kirk to run for the state legislature. Brown is running in another direction just now, and looks like a winner.

It won't do to call Schoverling, Daly & Gales manager plain L. B. Whympers any more; he is now Editor Whympers, and the little Kings County Wheelmen club paper, the *American*, does him credit.

The official programme of the Maryland Bicycle Club's fall tournament was a work of art and a credit to Guy P. Wilson of the *Baltimore News*, who was responsible for it. Several REFEREE pictures graced its pages.

Robert R. Perkins, the energetic and capable Rockaway factory manager, states the Liberty will be greater than ever next season. Models of the new wheels are nearly ready. Mr. Perkins feels the loss of his little son, recently drowned, very much, which so upset his wife that a long illness was feared.

Louis Jordan, the well-known Chicago repairer, landed in New York last week and stated that he would build twenty-four exceptionally fine wheels for World's Fair for exhibition purposes, and will build a few wheels this coming season.

Frank Douglas, of the Kenwood Manufacturing Company, was a guest at the Everett House, New York, last week, accompanied by his wife and daughter. The Kenwood man was feeling first-rate and stated his firm would build three wheels next year, roadster, road racer, and path racer, and would increase their factory space considerably.

J. H. Starley, of Rover fame, is expected in this country in a few days, according to New York advices.

A. Stainforth, of the Union company's Boston house is the inventor of many novelties used by cyclists. His picturesque ads, written about and for 2:10, show he is an advertising expert also.

G. C. Moore, of the Glendale Fabric Company, of East Hampton, Mass., is making some pneumatic tire fixings.

Messrs. Kirkpatrick and Crondel, of Howard A. Smith & Company, are hustling for their house through the east.

Joseph Ketchum, of Brooklyn, is showing New Howes and making many friends for the Glasgow product in Brooklyn and New York.

Hollander, Bradshaw & Folsom, Washington street, Boston, are doing a heavy business in boys' and girls' bicycles, toys, etc.

An American-Made Triplet.

The Winton Bicycle Company, of Cleveland, has just completed a triplet, the first machine of the kind built in America. It is made with a new anti-friction chain gearing and weighs only seventy-five pounds, and in a private trial on the track under three untrained riders made a mile in 2:10, and a half in 58 3/4 sec. It is confidently expected that the machine will make a mile in less than 2 min.

Harry Hall, of the Raleigh company, New York, was in Chicago during the week.

A Fair Field, No Favor,

And May the Best Man Win!

The work performed on the MORGAN & WRIGHT Pneumatic Tire proves that it has adequate durability and speed.

AT LIGHTNING SPEED.

HALF MILE ON THE BICYCLE GONE
AT INDEPENDENCE IN: 55 1-2.

J. S. Johnson's Record Time—Hundreds of Spectators Bear Witness to the Feat—Notch for the Mile to Be Soon Attacked.

INDEPENDENCE, Iowa, Sept. 17.—(Special Telegram.)—The Independence kite track has another world's record in the bright constellation of sensational performances which have from time to time sprung from the impress of its glistening surface. It is not a trophy to the prowess of a harness racer this time, but of something infinitely faster than any trotter or pacer may hope to become for a decade.

For the last three days a modest, unassuming young man, giving the name of John S. Johnson, and claiming Minneapolis as his home, has been seen about the track, usually astride a bicycle, and it has been noticed by the more observant of the track habitués that he could ride a little bit. Johnson has been invariably seen in the company of two other individuals and the fact soon became apparent that he was ambitious for championship honors among the cyclists, and that the men with him were his trainers.

Day before yesterday quite a ripple of interest was created by the story that got bruited about that Johnson had covered a quarter of a mile in 27 4/5. Consequently when the announcement was made that he would start against the world's record for the quarter and the half miles under circumstances that would make the performance perfectly legitimate and standing a crowd of several hundred people assembled at the track to-day. The preliminaries were arranged by the selection of the following gentlemen as judges: J. B. Chesebro, of Waterloo, Iowa, and C. A. Rosemond and W. C. Littlejohn, of Independence. F. S. Hillsiger, of Waterloo, acted as referee, and for timers the following consented to act: B. W. Tabor, O. O. Tibbetts, Independence; C. M. LeDue, Luvern, Minn.; J. L. Dougherty, Clinton, Canada, and John Hussey, Independence. All the above men are professional trainers of trotters.

Johnson came out at about 5 o'clock for a preliminary brush of a quarter of a mile, and to keep his pace up, C. W. Williams appeared behind his celebrated old running horse, Ned Gordon, hitched to a bicycle sulk. Johnson started at the third quarter, and pumped his way to the wire in 27 1/2 seconds, lowering his best record, which previously stood at 28 1/5 seconds.

Half an hour later, after he had been rubbed down, he again came out, and starting at the half-mile pole, he followed the runner home in 55 1/2 seconds, lowering the previous world's record for the distance, which was 1:00 1/5.

Not satisfied with the first performance he came out again at 6 o'clock and, starting at the half, rolled down to the third quarter in 26 3/5 seconds, being compelled to slow up because old Ned was not fast enough to get out of his way.

NEW LAURELS GAINED.

BICYCLIST JOHNSON PUSHES HIS
WHEEL A MILE IN 2:04 3-5.

INDEPENDENCE, Iowa, Sept. 20.—(Special Telegram.)—John S. Johnson, the phenomenal young Minneapolis bicyclist, whose remarkable time on the Independence kite track for a quarter and half-mile electrified the riding world last Saturday, made another record look pale to-day in the presence of a good crowd. It had been announced that he would attempt to beat the world's record for a mile from a standing start, and elaborate preparations were made to have the performance correctly timed and rendered eligible to record. The following were chosen as timers: Fred Seacord and Judd Seacord, leading breeders of trotters, of Galesburg, Ill.; F. D. Stout, owner of Nutwood and proprietor of the Highland Farm at Dubuque, Iowa; M. Ladque, Luverne, Minn.; Sam Caton, Dubuque, Iowa, and C. A. Thompson, of Independence. For judges the following well known local bicycle men were chosen: J. W. Evans, C. F. Tucker and W. S. Tidball.

Johnson came out at 5 o'clock in charge of his trainer, T. W. Eck, and his well-knit, athletic figure evoked many expressions of admiration from the crowd. The track was freshly planed and C. W. Williams appeared behind his running horse, Ned Gordon, to make the clip.

The first performance was a start against the best record for a quarter-mile from a standing start, which was 31 1/5 seconds, and Johnson easily made it in 30 flat. Twenty minutes later Johnson came out again fresh as a rose, ready for the greater spin of a full mile. The regulation bicycle track is one mile eighteen inches from the pole. The kite track here measures a mile three feet from the pole, and in order to have the performance safe and legitimate, Johnson was started ten feet back of the wire.

Dr. A. E. Spalding was chosen as starter, and as he said go, the watches snapped and Johnson launched out on his journey. The runner swung in ahead and the bicyclist trailed along snugly behind. The first quarter was not timed, as Johnson had already beaten it. The half was reached in 1:03 1/5, which was behind the record for that distance from a standing start by about a second. At the three-quarters the watches split at 1:34 1/5, beating the record for that distance, which was 1:35 3/5.

At this point Johnson shouted to Williams to urge the runner faster or get out of the way, and as Old Ned was already at the limit of his speed, Williams turned him out and Johnson passed him by a mighty spurt and came up the stretch alone, reaching the wire twenty lengths ahead of the horse in 2:04 3/5, beating the best previous record of Zimmerman, which was 2:08 4/5 from a standing start. The last quarter had been covered in 30 2/5 seconds.

BREAKS ALL RECORDS

JOHN S. JOHNSON COVERS A MILE
IN 1:56 3-5 AT INDEPENDENCE.

He Takes a Flying Start—Two Running Horses Make the Terrific Pace for Him—No Doubt as to the Accuracy of the Time.

INDEPENDENCE, Iowa, Sept. 22.—(Special Telegram.)—On the kite track in this city to-day, John S. Johnson, the young cycling marvel from Minneapolis, knocked eight and one-fifth seconds off the world's bicycling record at the flying start and achieved the distinction of being the first person who ever wheeled a full mile below the heretofore impregnable two-minute barrier.

The officials selected to judge and time to-day's performance were as follows: Judges—W. C. Littlejohn, J. W. Evans and C. F. Tucker, bicycle men, all of Independence. Timers—S. L. Cates, of Dubuque, Iowa; Judge Seacord, of Galesburg, Ill.; J. L. Doherty, of Clinton, Canada, and C. A. Thompson, J. T. Martindale, and O. O. Tibbetts, of Independence, Iowa.

They Traveled at a Dizzy Speed.

As the flying pair rounded the turn the dust was not so thick, and a more adequate idea of the dizzy speed at which they were going could be noted. The half was reached in 58 3/4 seconds, and without a perceptible slacking of the clip the other runner was brought in and the journey continued. When the third quarter was reached the watches split at 1:28 1/2, showing that the speed so far had been well maintained. Up the stretch to the wire the contest took on the complexion of a hot finish between the horses as the two runners came up abreast, their drivers whipping and shouting to coax out a little more speed, until the very last limit of both animals had been spent. But it required but a glance as they neared the wire to see that Johnson was right behind and the runners couldn't open the gap by a foot at any part of the stretch. Indeed, before the wire was reached it became evident that the man could outfinish the horses were there room to get by.

Under the Wire in 1:56 3-5.

The watches stopped at 1:56 3/5 as Johnson rolled under the wire, and the herculean effort had been accomplished.

MORGAN & WRIGHT,

MANUFACTURERS OF RUBBER GOODS,

321-339 W. Lake Street,

CHICAGO.

THE CLEVELAND NO. 4.

IS A WHEEL BUILT FOR FAST ROAD RIDING.

It weighs 32 pounds, stripped.
It has won many races in competition with wheels weighing from seven to ten pounds less.
It has the greatest Pneumatic Tire (the Cleveland) ever put on a wheel.
It has the most perfectly constructed dust-proof bearings on the market.
It has three pals, the Cleverlands No. 1, No. 2 and No. 3. "They're all right."

WE USE THE CLEVELAND PNEUMATIC ONLY.

WHY DOUBT JOHNSON'S RECORD?

Judging from the tone of the last issue of the *Sporting Life*, Frank Egan must have been in a very unsettled frame of mind during the few days previous to the paper going to press. He was evidently well supplied with caustic and cold water, for there was a liberal sprinkling of each thrown on everything that went before the great editor's eye.

He found in Johnson's records a subject almost large enough on which to vent his pent-up feelings; still he had enough left to give others a taste. Egan seems to be wonderfully worked up because a young westerner had, under the most favorable circumstances, the ability to knock a few seconds off the existing records from a quarter to a mile. If some of the eastern men had made or claimed to have made this record, we doubt not that Egan would have believed it to be true; but like others in the east he is of too narrow a gauge to give a westerner a little credit. Egan wants to wager \$1,000 that Johnson cannot defeat Zimmerman—he is safe, undoubtedly. Because a man can ride against time is no sign that he could do remarkably well in competition. Nobody supposes he could beat Zimmerman, and the REFEREE believes the lengthy young Jerseyman could eclipse Johnson's records on the Independence track under as favorable conditions as Johnson had.

When Johnson made his records there were several hundred people about the Rush park track. Some of them were newspaper men, others wheelmen, and the rest horsemen. A goodly share of them, knowing that Johnson was to attempt to break the mile record, must have gone there prepared to time him themselves and not be compelled to believe what others might say. Horsemen would never admit the record if it had not been made; every newspaper representative would not have been duped into believing something that had not transpired, and every wheelman on the grounds would not have stood by and allowed a faked record to go broadcast over the country. If there had been any crooked work some one newspaper man would soon have discovered it—and what a sensation he would have had for his readers a few days after!

But not a single man that saw the performance has doubted the correctness of the time. No one has disputed the fact that the track is a full mile at a point three feet from the pole—and it must be remembered that Johnson started back of the tape to make up the difference. Besides all these facts we do not believe

the gentlemen who acted as judges and timers would all risk their reputations for the benefit of giving Johnson the record, by giving out the time other than that really made. There would be too much chance to be found out. Sizing up the whole matter it appears as if Mr. Egan had been a little soon in jumping at conclusions.

WHERE THE FAULT LIES.

There are rumors, large and small, to the effect that there is an association now being formed for the purpose of running bicycle races on the cash prize plan, and one paper openly asserts that it is at the head of the movement. It tells in charming language what a benefit such an organization would be to the league, how it would take from among the pure amateurs the men who must needs be, under the present rules, crooked, and how much time the league could then give to improving the country's roads. To be sure, such a scheme would get rid of a lot of men who care only for what "there is in it," but the league was organized for and by amateurs, and while many would like to make something out of their winnings there are not many who would desert the ranks of the amateur for the ranks of the cash prize pot hunters. Amateur racing has to-day many faults, and a change of some sort is needed; but amateur racing has prospered, has attracted the attention and respect of the best people, while professional racing has died a natural death.

The trouble of the past and the unfortunate state of the present is wholly due to the management of the men; the rules for their government have not been strict enough—or if strict enough have not been enforced. Rule after rule has been openly violated this year, not by one but by a dozen or more prominent racing men; yet the racing board hesitates to inflict the prescribed penalty on the guilty ones. What if the board cannot prove charges; it don't have to. He has to prove his innocence—the board is not compelled to prove his guilt. If the board had governed these men with an iron hand, regardless of the wishes of others, there would have been no talk of prize selling or crooked work. It is simply a case of a spoiled child. The trouble has always been that the board would pronounce a sentence when the guilty one cared not. Few men of prominence have been suspended during the racing season, the time when punishment would have been the more keenly felt. Probably along about Nov. 1 there will be suspensions by the wholesale.

There is no reasonable excuse why amateur racing should not thrive in the United States. It is what the people want and what they should have. They do not want the professional class; they have seen enough of that in every branch of sport. What the league needs, to maintain successful amateur sport, is a racing board with backbone to handle the racing men as some fathers handle their unruly offspring. Lay on the gad and the obstreperous youth will soon come to terms.

THE REFEREE does not agree with its correspondent, La Cote Mal Taile, regarding Johnson's record. He does not think Johnson made the mile in 1:56 3-5; THE REFEREE does. Nor does he believe in the merits of the elliptical sprocket, but we think there is great merit in it; in fact, a member of the staff has tried it and believes it to be a great thing. La Cote Mal Taile thinks that if Johnson can do 1:56 3-5 Zimmerman can make the mile in 1:30. Not much he can't; the running record is only 1:35 and a

fraction and no horse could do better than 1:45 if hitched to a sulky. We think Zimmerman could do 1:45 on a kite track if he could have the pace that fast.

It really would be hard to tell whether Vol. II, No 10 of the *Southern Wheelman's Gazette* or not. No less than seven separate pictures which graced its pages were from the Indianapolis production. But credit was given, and that's something unusual with the Louisville paper.

IN the case where a Louisville doctor was discharged after his hearing, having been arrested for driving over a wheelman, the "cycling authority of the south" says that Judge Thompson in his decision made it clear that there was no malice in the physician's action. May be not; but while road hogs do not show malice toward a wheelman in all cases they do exhibit a lot of stubbornness, and this was probably the trouble with the doctor. He merely thought he could play a good bluff game and was called.

NOTES AND COMMENTS.

A western cyclist ran into a doctor on the sidewalk, and the gentleman of medicine flogged the youth with a walking stick. [That's the way to kill sidewalk riding.—Ed.]—Exchange.

It is such cyclists as the above that have brought all the prejudice and malice of pedestrians and horsemen upon the devoted heads of the wheeling public, and it gives one pleasure now and then to find someone who is man enough to personally chastize the crazy loon who has no more sense than to career up and down the sidewalk on a bicycle that he cannot (in all probability) begin to control. I have seen him many times—he is generally a half-grown boy, but sometimes he has arrived at the age that ought to give him discretion. Even in the last case he generally lacks ordinary brain power. These things do not in any way affect the newspaper reporters who give the news that "John Smith was run down by a bicycle on the sidewalk north of Main street and badly hurt. How long is this going to continue? We must call upon the city council to prohibit bicycle riding on our streets; it is too dangerous," etc., etc. What a world of trouble the small boy and the fool man have caused the great army of wheelmen.

**

IT'S DIFFERENT NOW.

What a wonderful difference there is in the treatment of cycling subjects by the daily press in these days and a very few years ago, now that the crack bicyclist can give the crack trotter odds at any distance, and when there are more bicycles to be met than teams in a day's journey. And after the years of toil and abuse that wheelmen have endured the great public has discovered that it has been making a fool of itself and is making up for lost time. The *News Record*, which, by the way, has always been the friend of the sport, is publishing column after column of cycling news and illustrating its remarks in a very good style. Many other papers are doing likewise—good luck to them. I notice also that the stale and obsolete quips and puns on the unfortunate cyclists are not so common as a few years ago. And now that the bicycle has displaced the bat and ball, the horse and the boat as an amusement creator, I see with prophetic eye the cycle millenium at hand.

Apropos of newspaper reports, the "Minneapolis wonder," with his trainer and elliptical sprocket wheel, is not getting as much gratuitous advertising as he was. He may or may not have made

the wonderful time credited to him at Independence, but he could not hold the pace with second-rate men at Peoria. Poor lad; like many another better man he has been led astray by a notion that power could be manufactured without loss of speed. It is strange that this many times exploded idea still lives to vex mankind. Most of us remember Levi's invention of the telescope crank, which was to do for the ordinary what the elongated sprocket is going to do for Johnson, make power and increase speed at the same time. I would like to wager a meerschaum hat that Zimmerman can beat Johnson fifty yards in the mile, and if Johnson can ride a mile in 1:56 3-5 Zimmerman can, under the same conditions, do it in 1:30. LA COTE MAL TAILE.

MEN WE ALL KNOW.

Chief consul Michigan division, a hustling politician and all-around good fellow.

low. The chief consulship occupies the larger portion of his time, though he is engaged in looking after his father's real estate interests.

Cycling Matters in Rochester.

ROCHESTER, N. Y., Oct. 4.—The recent trouble in the Rochester Wheelmen's League has almost been patched over. At a special meeting of this body a few evenings ago, the office of secretary was declared vacant and a committee was appointed to notify R. B. Stevenson, who has held that office, of the action taken. W. J. Haye, of the R. G. C., was chosen to fill the vacancy. Gordon S. Montgomery, representative of the Genesee, officially stated that the organization to which he belonged had withdrawn from the city league because of lack of interest shown in the work by the league managers. Mr. Montgomery stated that the Genesee would be willing to remain in the league if a complete reorganization of the same could be effected.

Mrs. C. H. Cranch has been elected president of the ladies' auxiliary of the Lake View Wheelmen.

The Crescents propose to make this the banner social season of its existence, a series of whist, euchre and dancing parties being projected, interspersed by a pool tournament, smokers and musicals. William Le Messurier has about everything his own way around Rochester. Last Thursday he won the mile open race at Batavia.

Harry Hanens, a bicycle thief, was to-day held for the grand jury.

PANHANDLE.

The New York A. C. will have a two-mile open race on its athletic programme for Saturday.

HOW ZIMMIE TRAINS.

THE "JERSEY SKEETER" TAKES TO WRITING FOR THE PRESS.

He Does Not Ride During the Winter, Preferring a Complete Rest—What He Eats and Drinks—Had a Good Time in England.

My method of training is not easily described, says A. A. Zimmerman in a syndicate article. I do no training whatever during the winter, but take a complete rest. Last winter I mounted a wheel only once between Oct. 16 and the middle of March. In my opinion this is a better course for an American bicycle rider to pursue than to attempt to keep in shape all winter. I have noticed that the men who train even a little all winter generally go stale before the fall meets are over. My body seems to want plenty of rest and I don't think I am very different from the rest of mankind. Perhaps I can stand a little more than my share of rest.

In early spring I begin to ride on the road with a road wheel, doing from ten to thirty miles a day. I take it easy and do not attempt to do any fast work whatever at this time. I continue this for about three weeks, or until I find that my muscles are working all right, and all the feeling of stiffness which always comes to me when I first begin to train has entirely left me. Then I take a racing wheel and begin work on a track. During my trip to England I generally worked on the Herne Hill and usually did about ten miles in the forenoon and the same in the afternoon. Sometimes I worked five miles after supper, but this was the exception.

I work at about a three-minute gait for several days after taking up track work. When I find I am going all right I try to spurt a hundred yards or so, and keep on increasing the distance each day until it reaches a quarter of a mile.

MASSAGE TREATMENT.

After each ride I am rubbed thoroughly dry with towels; then my whole body undergoes a sort of massage treatment from the bare hands of an attendant, and then some liniment is plentifully applied and rubbed in. I consider rubbing with the bare hands by a strong, healthy person one of the most valuable adjuncts to good training. By it the muscles are made free and pliable and the skin is kept in a smooth, healthy condition. After a hard race there is nothing so refreshing as to be well worked by the bare hands. No amount of rubbing with any kind of towels seems to have the same effect. It seems to revive one more than anything that I have ever seen tried. The effect is felt at once, and there is no reaction, as is the case with stimulants.

Regularity in work is a very important element in making a success in training. The morning exercise should be taken from one and a half to two hours after breakfast. I do not believe in taking any exercise before breakfast, as some well-intentioned writers on this subject advise. I have tried it, but it was not a success. It seemed to me like trying to run an engine without fuel. There was no question in my case but that half an hour's work before breakfast took more vitality out of me than an hour's work after a good meal had had time to digest. I found it did not agree with me, and therefore discontinued it. If exercise can be taken in the afternoon it should be about two hours after the dinner hour. To ride

immediately or soon after a hearty meal, whether it is breakfast, dinner or supper is of no value to a person training. A feeling of dullness is sure to come over one and the best efforts can not be put forth under such circumstances.

I have followed no particular line of dieting. I do not eat potatoes except in very limited quantities, neither do I drink coffee, but nearly all other table luxuries I indulge in and enjoy. I drink tea in preference to all other beverages. I have found nothing better or more refreshing in the dressing room after a hard race than some nice, cool tea with a little lemon juice added and sweetened just a little. It is much safer than water and certainly free from all germs of disease. I know of nothing better. In training for bicycle riding the same general rules must be followed as in foot racing, although they need not be so closely adhered to. Train for the distance which after a little experience you find best adapted to your capabilities.

TRAINING FOR VARIOUS DISTANCES.

Some men have the power to stay long distances at a moderate pace, but cannot spurt at all, while others can do just the opposite. A very few can do both. Frank Shorland is a wonderful example of a man that can both stay and spurt. His record of 413 miles in twenty-four hours places him at the head of all riders as a stayer, and his ability to do the last mile of that distance in 2m. 42s. shows that he should not be overlooked when

Drawn from instantaneous photograph.

it comes to a driving finish. I have not met another man in whom both these qualities were so well developed. On the other hand, there is George C. Smith, the holder of the world's record for a quarter of a mile—31 2-5 seconds.

This record stamps him as first class at the short distances, but the handicappers generally allot him from sixty to 100 yards in a mile in races with men like Taylor, Windle and Tyler.

If you have found out the distance you can ride best, try that distance about once a week and have some one hold a watch on you and clock each quarter of a mile. At each attempt try to improve each quarter a little, but hold enough power in reserve to do the last quarter faster than any of the others. Practice with the thought in your mind that the race is always won in the last quarter and not in the others. If one has trained for short distances, say five miles and under, it is certainly very hurtful to try very much longer distances.

In England I had trained for the short distance, and without any preparatory work entered and rode in the fifty mile championship. I had already won the one and five-mile championships, and wanted the fifty also. The lesson that I learned in that race was a costly one. During the latter part of that race my legs began to feel numb, and while they kept at work, yet the life seemed all gone out of them, and for several miles before the end of that race I thought they would not last the race out. They did not reach a normal condition for

about three weeks after this effort. From examinations made since then I learn that the cause of this was that my heart had failed to properly do its work owing to the excessive strain upon it for so long a time. In other words, my heart had not been trained for long distance racing. I cannot advise any one to train for pleasure.

VERY LABORIOUS WORK.

Taking a little exercise to keep from getting entirely out of practice is very often called training. That is not my experience, however. I am often asked if I had a pleasant time during my English trip. I always answer "yes," because there were a great many pleasant things connected with it, and I met a number of very agreeable people who tried to assist me in every way; but I don't think most people would have called it a pleasure excursion to be obliged for five months to follow a strict routine, each day exactly like the other. It got to be very monotonous, and at times I felt like quitting. I keep a record of the miles I ride while in training, and I find that I had ridden over twelve hundred miles this year before I was able to win a race. I know that I am one of the hard men to get "fit," but I have very little trouble after I once reach perfect condition. In getting fit for a race I am compelled to train much longer and do more hard work than most of the racing men.

If I stop my work for a few days and

one I now have was built for me, but does not vary much from the regular stock racer. It weighs between twenty-six and twenty-seven pounds when fitted with Thomas pneumatic tires.

The all-absorbing question now with wheelmen is, Will the trotting record be broken? I am of the opinion that the record of Nancy Hanks, 2:05 1-4, made on a kite-shaped track, will be beaten by a bicycle on a circular track. I have never tried a kite-shaped track and am therefore unable to express an opinion as to whether it is faster for cycle racing than the circular tracks. My record of 2:06 4-5 for a mile with a flying start was made on a half-mile track. I think this can be lowered on the same track. Within half an hour of the time that record was made I had ridden a mile in 2:08 4-5, and this had taken some of the snap out of me, or I think the last effort would have been somewhat faster. I don't know the time of the two fastest heats trotted, but I think that the times on the cycle will compare favorably with them.

Business and training should not be attempted. One or the other will suffer. The cares of business have a depressing effect, and to train to the highest point the mind must be free from all worry. Late hours can not be indulged in, either. A regular hour for retiring must be rigidly followed or the best results will not be obtained, no matter how carefully and well all the rest of one's work may be done.

If you wish pleasure, ride for exercise but don't train.

Rain Spoiled the Elgin Races.

The large grand stand at the Elgin (Ill.) Driving park was well filled Saturday afternoon, the occasion being the field day and tournament of the National Athletic Club. Many Chicago riders and athletes were competitors and they won their full share, Thorne securing the quarter and mile open events. The track, a half-mile circuit, was in miserable shape and after the rain was three inches deep with mud, so that three events were postponed. Thorne was third in the two-mile scratch race, but if he had not made the pace for two-thirds of the way he would undoubtedly have won, though young Heuman, the winner, might have given him a good tussle. Heuman, by the way, in a coming man. He is built Zimmerman-like and was a great Elgin favorite. The results were as follows:

One-mile, scratch—G. A. Thorne, Chicago, C. C., 1; H. N. Stringer, Elgin, 2; C. D. Cutting, C. C. W., 3; time, 2:51.

Two-mile, scratch—W. F. Heuman, Elgin, 1; W. Bainbridge, C. W., 2; G. A. Thorne, C. C. C., 3; time, 6:30.

Quarter-mile, scratch—First heat—C. P. Smith, I. C. C., 1; W. F. Heuman, Elgin, 2; W. M. Shumway, C. C. W., 3; time .38.

Second heat—H. MacLagan, C. W., 1; G. A. Thorne, C. C. C., 2; G. C. Hobbs, A. C. C., 3; time .39.

Final heat—G. A. Thorne, C. C. C., 1; H. MacLagan, C. W., 2; C. P. Smith, I. C. C., 3; time .36 3-4.

One-mile, handicap—H. N. Stringer, 90 yds., 1; J. I. Oakley, I. C. C., 75 yds., 2; F. B. Hart, 130 yds., 3; time, 2:31.

One-mile, Elgin riders—walk-over for Heuman, others not responding to the call.

Division Officers Nominated.

At a meeting of the San Francisco B. C. the following officers were nominated: Chief consul, G. H. Strong, San Francisco; vice-consul, J. S. Thayer, Los Angeles; secretary-treasurer, L. W. Ripley, Sacramento; representatives, J. G. Bothwell, Garden City Cyclers; Al Cole, Garden City Cyclers; W. H. Seaver, Alameda County Wheelmen; L. A. Lamory, Acme Athletic Club; W. K. Cowen, Riverside Wheelmen; J. G. Vidy, California Cycle Club; A. T. Jantzen, Pacific Road Club.

JOHN S. JOHNSON

L. C. Boardman, Cycle Crank.

The Associated Cycling Clubs of the Metropolitan district is the creation of L. C. Boardman, cycling editor of the New York Recorder, who has at times lived in Chicago and Philadelphia. Boardman is a restless sort of chap and arrived in New York some seven or eight months ago. Ever since then he has been stirring up schemes to benefit cycling—and the Recorder and Boardman as well. When the REFEREE representative arrived in New York he was advised not to pay too much attention to Boardman, who was stated to be a little too enterprising and somewhat of a “crank;” but as the REFEREE man has passed a good deal of his time in various parts of this big country among cranks, he was disposed to study this particular New York “crank,” to find out in what particular form the crank cropped out. After a few months I came to the conclusion that the trait of crankiness exhibited by Boardman was rather more beneficial to cycling than harmful. Boardman is an enthusiast of a high order, about thirty years old, with stout, strong frame, and of a very versatile and inventive turn of mind when schemes are the order. You will generally find him on the hustler, dressed in English bloomers, light outing shirt and coat, and cap pushed on the back of his head, riding a Century Columbia with a small leather trunk strapped to the frame with the name of his paper thereon. He creates a panic by his boisterous manner in store or editorial room and his one subject is cycling. He turns the business office upside down and is very popular with his fellow employees. His copy is far from brilliant, but he gives facts, and some very straight advertisements to his friends in the trade, actually running in testimonials on occasions. His copy has wonderful latitude and is only read for English and grammar, and if he chose he could ring in some libel suits on the proprietors of his paper. But once in a while his copy is side-tracked for “Petee” Donahue’s more interesting fighting news, and a description of some new rider or cycle house is cut in two, while a “knock out” article fills out the cycling story.

NOT A BAD FELLOW, THOUGH.

Altogether Boardman is not a bad fellow; rather loud in manner and actions, the owner of a tongue that never hesitates in an opinion of friend or foe, a little self-advertising and persistent. This is a fair pen picture of the man who handled the New York end of the Chicago-New York relay race, started the Associated Cycling Clubs, got up the piano contest, and, with the REFEREE, started the ball rolling for the big parade of clubs during the Columbus celebration the evening of Oct 12. Boardman was looked upon as an interloper by the editor of a New York cycling paper and a few others, but he had the inside track by being able to talk to over a half-million of people weekly through his paper. He thrived under persecution; so did Walter Masterson, the Sun’s cycling editor, who was looked upon as treading on private grounds, as Masterson said yesterday. But there seems to be room for all; at least all flourish. Boardman

started the associated club scheme and was supposed to represent the Staten Island Athletic Club’s cycling division by virtue of being a member of that organization. Previously he was a delegate from the Manhattan Bicycle Club, but Messrs. Prial, Sheehan and Betts were elected to do the representing for that club, so Boardman was left out. He commenced to feel that he was being crowded, joined the Staten Islands and procured his letter, on the strength of which he was elected secretary of the A. C. C. He was advised by the New York cycling editor (who in a patronizing way complimented him on the good he had done) to “step down and out,” now that the scheme was a success, but Boardman did not heed the advice. Therefore one Johnson, who is in charge of the Staten Island cycling division was seen by one of the three Manhattan delegates and disclaimed the idea that Boardman was the club’s delegate, even though the latter had the president’s letter. To cinch matters the by-laws of the associated clubs were searched and a clause prohibiting athletic clubs’ cycling divisions from being members was found. That settled Boardman’s hash. He was accordingly fired from the secretaryship, and the conspirators chuckled softly to themselves.

GOT BACK AGAIN, THOUGH.

Boardman was not done for yet. He went to the Riverside Wheelmen and said: “I will join your club if you will elect me a delegate to represent the Riversides in the A. C. C.” They hearkened unto the wily scribe, and when the conspirators were counting him a dead cock in the pit, and preparing to further sit on him at the meeting last Friday evening at the Columbia restaurant, Boardman created a panic by springing the Riverside document on the crowd in a very dramatic manner, being flanked by the president of the Riversides, who calmly seconded the Boardman thrust. You could have heard a cholera germ squeak for a minute, and then Boardman reared to his haunches and told the Associated Cycling Clubs the history of what he termed “his persecution,” and wound up with this: “I most earnestly object to being taken by the nape of the neck and hoisted out of the window or thrown into a sewer to drown like a rat.” Boardman was, it seems, a water rat. They don’t drown, they swim; it is only ordinary ground rats that drown, and Boardman is not that kind of a rodent.

President Luscombe was in the chair, and with impatient patience listened to Boardman. C. A. Sheehan, R. G. Betts and Waldorf Fuller also seemed to “have it in” for Boardman.

The discussion became so incriminating and cat-and-dog like that President Luscombe suggested that all but the delegates retire, as the association would go into private fighting session. C. A. Sheehan, a very dudish young man who is fond of saying that he represents the Vanderbilt interests (as a clerk in the West Shore office at so much a week, and who arranged the Pennsylvania railroad excursion to the league meet at Washington, out of which he got fifty cents a head from all the pure and impure ones who went over the road), was the leader in the debate against Boardman, and made about ten long-winded boyish speeches. After it was all over he wanted to assure Boardman that both himself and those in cahoots with him

appreciated Boardman very much, and quoted “the beautiful sentiments” uttered in print by the editor of the New York cycle journal for which Sheehan works in a cash prize way.

Sheehan, like man other lovers of the sport, is in cycling for what there is in it, and the “representative of the Vanderbilt interests” is generally found soliciting advertisements for a program from the trade, and the trade knows his methods, too. Before the winter season is over you will see Sheehan & Company dipping their fingers into the “cash prizes” of some tournament “for the love of the sport.” Just you watch them.

WHY SHEEHAN BOLTED THE BANQUET.

A very funny story was told me about Sheehan and the banquet Boardman got up for the western riders immediately after the relay ride. It seems Boardman tendered the banquet in the name of the A. C. C., and sent invitations. Two of the gallant westerners invited the Pollack girls of Harrigan & Hart’s theater. When all were seated, together with a well-known and respected western woman and several New York ladies, Sheehan appeared, but after sizing up the company in an aesthetic manner whispered to his companions: “Oh, those naughty theatrical girls are here; let us go home,” and home they went. One of the western men is much incensed at Sheehan for his remarks concerning the Misses Pollack, and vows he will thrash him on sight.

Boardman’s action in giving the banquet in the name of the association was condemned by some of the members, who joined with Sheehan in saying that the riders entertained “were not representative western cyclists,” which remarks referred to the entertained.

To further show the calibre of this youth Sheehan, it is only necessary to refer to the recent excursion he arranged. It seems Boardman was interested in booming the B. & O. excursion, out of which he got his little fifty cents a head, and says so frankly, and Sheehan did not like the looks of Boardman’s cycling column—all B. & O. and no Pennsylvania, so went to Business Manager Turner of the Recorder, as “representative of the Pennsylvania system” this time, and wanted to know why the Recorder was booming the B. & O. and freezing out the Pennsylvania. Boardman was called in to see the director and was questioned about it. He made a very frank statement, and told the Recorder people that he could and would run his department without Mr. Sheehan’s assistance, and continued booming B. & O. Sheehan’s action might have resulted differently in newspaper offices where meddlesome busybodies with axes to grind are listened to. This only serves to illustrate the high-toned methods of C. A. Sheehan, who is no relative of the lieutenant-governor of the state, by the way.

But to return to the associated metropolitan cycling clubs a moment. The scheme started with about twenty clubs, and in a very short time a third of them were dropped from the roll, and the treasury holds the robust balance of \$50. It will only be a little while before the A. C. C. will go the way of nearly all such organizations, when wire pulling and backbiting are the principal features.

The Cycling and Carriage Trade.

While sitting at the feet of the well-posted Manager Day of R. L. Coleman & Company the other morning, and trying to run down a rumor of robust proportions regarding the combining of the principal eastern factories, [which is likely to occur, Day showed me a letter written by a carriage journal soliciting

advertising, which made the startling statement that the cycle business rightly belonged to the carriage builders, as it was in the wheel line. On the face of it the argument looked O. K., but we can not forget the fact that it was the cycle trade which forced itself into the carriage business and among horsemen with the pneumatic sulky, and while the carriage trade is a prosperous and conservative one, it has not taught the cycle trade anything. The teaching has all been on the cycle side. There seems to be little doubt, though, that the cycle trade will in the future be closely connected in this country with the carriage business, to the great advantage of both—for the carriage trade is a power financially. Cycle manufacturers then will not be under the necessity of placing agencies, and trust their wares in the hands of local and national racing lights, small hardware people (who don’t know a bicycle from a saw) or the cash store merchants. It looks as if the carriage people are preparing to go into the business, as the following from the Carriage Monthly shows. The article, an editorial, says:

GETTING CLOSER TOGETHER.

The relationship between the bicycle and the wagon has become very close of late. The law has established the status of the former and declares that it is a vehicle having all the rights and only the privileges of the wagon. The bicycle and the buggy are, therefore, second cousins, so to speak, and in the repositories of many enterprising vehicle dealers they are displayed together on the same floor. It is said that the dealers who do this have made a decided hit in their business, and their example is being very generally followed by other dealers. But the family bond between the bicycle and the wagon has been made stronger by the appearance within the past few weeks of a new speeding vehicle, that is a cross between the sulky and the cycle. Horsemen were at first skeptical about its utility, but as soon as they gave it a fair trial there was a tumbling of the world’s trotting and pacing records.

Carriage builders and bicycle manufacturers have been learning something from each other, and are getting closer together in business. The ball-bearing axle was used in Germany fifty years ago on carriages, and was abandoned because it was expensive and the method of application was clumsy. Bicycle manufacturers revived and improved it, and now no bicycle is considered fit to use without the ball bearing axles. Carriage men have recognized its advantages. They have borrowed it and the pneumatic tired small wheel from the bicycle manufacturer, and these constitute the salient points of the so-called bicycle sulky which we illustrate and describe on another page. While the inflated tire, as at present made, may not be adopted for all vehicles, ball bearing axles doubtless will be, and since a partnership in inventive genius has been formed between the bicycle manufacturer and the carriage builder, it will not be difficult to evolve something that shall combine many of the advantages of the pneumatic tire of the bicycle with the increased durability of the solid rubber tire of the carriage. It is a happy circumstance that bicycle and buggy manufacturers and dealers have been brought into such close and interesting business relations.

The Professional League.

Seated in the grand stand of the Manhattan field Saturday with A. A. Zimmerman, George Taylor, W. F. Murphy, George Banker and Willis B. Troy, the ever-green cash prize question came up by my reminding Troy of that fairy story he told a Baltimore reporter, who in turn told it to many American papers by aid of the telegraph the same day. Troy at first refused to father the story, and stated that no one had been authorized to use Spalding’s name. It was there the schemers made a mistake, as your correspondent got a denial from Spalding and in turn gave it to the Associated Press man, who pricked the fairy tale pretty effectually. Troy, in an unguarded moment, however, owned up to being one of the originators of the story, and remarked that he had mentioned to the other one (a Philadelphia young man): “I know one who will smile at this story, and that is Morgan,” but who was not deceived by the report. Troy says now that it may not

come next year, but it will come sooner or later. I do not believe that there is any good ground for the statement that the *Sporting Life's* assertion that "an association to run professional cycling is being formed by that paper," and will believe it when the men behind it are named, and not before. There is no doubt that with money the *Sporting Life* could run it; so could other people just as well. A good organization is all that is needed, besides the cash to run it. I know of three men who would back such a scheme, and one of them saw the REFEREE to that end in New York last week, but they want pool selling and Sunday racing.

SUNDAY RACING AND POOL SELLING.

This should not be encouraged, and here is the hitch. It will prevent such people taking hold. Open betting would kill the scheme, and we had better put up with the amateur farce a little longer than force the professional idea by such means. The scheme will pay without such aids as pool selling, Sunday racing, or selling of liquor on the grounds, and there is the secret of the comparative success of the National base ball league, for the rules of the association strictly prohibit pool selling, Sunday playing and the sale of intoxicants on the association's grounds—all to the credit of Spalding & Company, be it said. I'm afraid the *Sporting Life* is forcing the growth of the cash prize idea, and much as I wish it success, I cannot but think that the present wild rumors and claims will only act as a boomerang to the scheme later on.

"What would you do in the matter, boys?" I asked, turning to Zimmerman & Company. Their reply was that if an association was formed and a success guaranteed they would undoubtedly ride for the cash. Zimmerman said that

"Pete" Berlo, on being asked what he proposed to do in the matter, asked in turn if all the best men would turn professionals. On being assured that they would, Pete said: "Then I guess I'll remain a pure amateur; there's more in it for me." Later in the day Pete's palm itched, and he went up to George Taylor and whispered: "Will they pay expenses this winter, and do they offer any advance money?" This made Taylor collapse.

ZIMMY TO HAVE A CAB STAND.

On asking "Jimmy" if he intended starting a stock farm with his four prize horses, the "skeeter" shook his head and stated that he thought he would start a cab stand at Asbury Park and have Troy as head "cabby." "It would be expensive to keep them idle this winter; they would eat up all my pianos," continued "Arthur the Great." Zimmerman can now lay claim to four industries: a stock farm, piano store, cycle store and general merchandise store, all places stocked under the protection of the amateur rule.

"You were quite right, and I'm glad you quoted me on the demoralizing influences of the race path," said the ex-college man, George F. Taylor. "I really believe and know from my past season it is true. I shall enter the Boston Dental College next week, and will use up my gold and silver medals in filling molars. I'm out of the racing business—it is demoralizing," and with that all hands went across the way to celebrate the wind-up of a great racing season.

Emanuel Got Satisfaction.

A card with the names S. Golder, T. Mullinson, A. Barrows, and the time of their call, 12:21 4-5, lay on my desk last Monday. My office assistant said: "There

has also been a young man in twice to see you; here is his card—B. D. Emanuel. He said the last time he called that he was going to get satisfaction and would not let you escape." This looked serious, especially as I had heard the "minor" cycle dealer had told a Brooklyn man that both the *Sporting Times* and the REFEREE representatives would get hurt for certain plain statements they had made in their respective papers about a young man (a minor) who had ordered goods and executed a song and dance when payment was spoken of. So not wishing to disappoint B. D. Emanuel or try to escape, the REFEREE representative thought he would look over his exchanges and await the destroyer's coming. Just when he had got mightily interested in an English *Cycling* editorial about "Two shows a mistake," a voice at his elbow said:

"I'm the amateur bicyclist."

"What's that?" abstractedly queried the REFEREE man, still reading Sisley on shows.

"I'm the amateur bicyclist," came the voice in louder tones.

"One of them, I suppose," the REFEREE man responded, getting more deeply interested in cycle shows; "do you go for cash or pots?" was ventured.

"I'm B. D. Emanuel," came again.

"Emanuel, Emanuel—seems to me I have heard that name before." Emanuel was a good man but, never rode a bicycle, so the REFEREE man turned and beheld a very ordinary looking "amacher," who did not look as if he would injure a fly, and asked to what was he indebted for Emanuel's visit. Flourishing a copy of the REFEREE the "amateur bicyclist" demanded in blood-thirsty tones if I had written "that," pointing to a little notice of a "minor, who looked like a man to the Bidwell and Gendron people when they sold him

goods." The REFEREE man pleaded guilty to the soft imprachment, and read a little more of the Sisley show article.

"It's false, every word of it," protested the man or minor, "and I'll make you prove its truth."

"That's for you to do; you must prove its untruth, which I fancy you will have hard work to do," replied Sisley's admirer. "But, Emanuel, if you will only go with me to-morrow and have a little talk with the Bidwell and Gendron people and explain away to my satisfaction certain charges, I will make the *amende honorable*."

This Emanuel preferred not to do, but left after being assured that the REFEREE was responsible, and his threat of a disastrous suit would not cause any loss of sleep to the staff, and that birds of his plumage looked really more dangerous than they actually were. B. D. Emanuel came into the REFEREE office with a lie on his lips and stated an untruth when he said that he had not bought any goods of the Gendron company. Mr. Emanuel would possibly like to see a bill of the goods, and for his ready lie this additional notice. What the REFEREE stated was a fact, and when a New York paper attempts to shield a trade swindler it is simply placing a premium on dishonesty.

The Madison Square Garden.

When a representative of the Associated Cycling Club called on the Madison Square Garden company to talk up an amateur six-day meet, the garden people talked cycle show in connection and suggested that the amateurs pay all expenses and then divide with the garden the profits, if any. R. G. Betts jumped up in the meeting and said: "Nay, Pauline, no cycle show; the trade is not over the shock of the last one yet." There can be only one cycle show this year, and that not in Madison Square Garden,

RAGLAN CYCLES

And Manufactured of the Best of Everything by

TAYLOR, COOPER & BEDNELL, LTD.

Raglan Works, - - - COVENTRY, ENGLAND.

LONDON, 33 HOLBORN VIADUCT, E. C.

But "the representative of the Vanderbilt interests" stated that he had seen the garden people and he thought the company would pay all expenses of a meet and then divide with the A. C. C. the profits after expenses were paid. The A. C. C. could not lose anything by the latter proposition—only have the work for the reward. But then they are in the sport for the love of it only. There is no doubt that one or two will find some "cash prizes" in it, even though it be a financial failure. Keep track of it and see!

Good Meet at Wellsville, O.

Something like 1,200 people attended the first race meet of the Tuscarora C. C. at Wellsville, Ohio, Thursday last. The races were well managed and proved interesting. Among the thirty entrants were a half dozen from Pittsburg and Brown of Cleveland. Yarsky of Akron and Bannister of Youngstown. The track was in fine shape, but no remarkable time was made, 2:40 being the fastest for the mile. The results were as follows:

One-mile, novice—W. C. Moore, 1; A. M. Irwin, 2; P. J. Myler, 3; time, 2:46 1-4.
Quarter-mile, boys—Clyde Quimby, 1; Kennedy Lang, 2; time, :39 1-2.
Half-mile, open, fifty yards flying start—L. H. Bannister, 1; A. L. Banker, 2; C. K. Gibson, 3; time, 1:14.
Mile, handicap, open—A. I. Brown, 1; E. Zarsky, 2; W. C. Moore, 3; time, 2:35.
Half-mile, club championship race between Wellsville amateurs—C. R. McDonald, 1; W. L. Barnes, 2; time, 1:30.
One-mile, club championship—C. R. McDonald, 1; A. C. McBane, 2; time, 3:02.
One-mile, open—A. I. Brown, 1; L. H. Bannister, 2; A. L. Banker, 3; time, 2:41.
One-mile, 3:00 class—W. C. Moore, 1; C. K. Gibson, 2; time, 2:56 1-2.
Quarter-mile—E. Zarsky, 1; A. L. Banker, 2; C. K. Gibson, 3; time, :37 3-4.
Two mile, handicap—A. I. Brown, 1; L. H. Bannister, 2; E. Zarsky, 3; time, 5:36.
Hundred yards, slow race—A. L. Banker, 1; Frank Morrow, 2; C. R. McDonald, 3.
Two-mile, open—C. K. Gibson, 1; L. H. Bannister, 2; time, 5:45 1-2.

FEATHERSTONE DEFEATS BIDWELL.

The Suit over the Pneumatic Tire Decided by the Circuit Court.

Information was received in Chicago Saturday that Judge Townsend, of the United States Circuit Court for the southern district of New York, had rendered his decision in favor of A. Featherstone and against the George R. Bidwell Cycle Company and the Thomas Inflatable Tire Company in the great suit over the pneumatic tire patents. The result was, of course, the talk along Cycle row. Just what the result will be cannot now be told. The suit was brought July 9, 1891, and argued finally in June, 1892, by Duncan & Page for Featherstone, and Francis T. Chambers for Bidwell. The suit was for an injunction and accounting, and was brought on claims 4 and 5 of the reissue of the Dunlop patent. In the decision, which Mr. Featherstone showed a REFEREE representative, the court defends the presence of claims 1 2 and 3, but does not pass on their validity because the suit was brought on the other two claims. The history and result of the case is best told by Mr. Featherstone in an interview with a REFEREE representative. Mr. Featherstone said:

"In regard to the decision in our suit against the George R. Bidwell Cycle Company and the Thomas Inflatable Tire Company, will say that we have secured an injunction against them and an accounting. The patent sued on was our reissue patent of March 24, 1891. We only insisted upon infringement of the fourth and fifth claims of our patent, not arguing any other claims but these, as it was not necessary to do so. The question of the validity of only these two claims was argued, as will be seen by quoting from the decision handed down by Judge Townsend, in which he says: 'Since upon the argument of the case complainant only insisted upon the infringement of claims 4 and 5 of the reissue, and question of the validity of the other claims need not now be considered.'

"We brought into question only two of the claims of this patent, and both of them the court decided to be valid, and at the same time, saying

(that as we have not insisted on the other claims, it was not necessary to pass upon them. We were allowed all we asked for. The claims we sued on were decided valid. The validity of the other claims will probably be tested on some other tire.

"Yes, it is possible they may appeal this case and we hope they will, but we do not see what they can gain by it. When a patent case has been passed upon by so eminent a jurist as Judge Townsend, who passed upon this case, there is not one chance in a thousand of the decision being reversed. Even if this case is appealed it will soon be reached, as it must go to the new court of appeals, which is a newly established court with a clear docket. As soon as this case is taken before it, it will be immediately passed upon. If the case is appealed we shall feel just as we have felt all along—that we are in the right and will carry our point.

"We have said very little about what we were doing and what we were going to do for the past six months in regard to these patent suits. We have only asked the trade to wait and see the result. We think it is generally found that we do pretty nearly what we say we will, and we are always ready to stand behind what we do say.

"This is our first suit under these patents. We have won it and have been allowed an injunction and an order for an accounting. If our patent was not considered valid by the court, we do not think we should have obtained this injunction. Only two claims of this patent were litigated and passed upon, and those two claims were sustained. The Bidwell Company is effectually shut out from making anything that infringes claims 4, 5, 6 or 7 of this patent. The remaining claims were not passed upon. If this case is appealed a decision on the appeal should be reached in sixty days, and we have not the least doubt in the world but the court of appeals if called upon will sustain Judge Townsend's decision."

The Bidwell company write us as follows:

THE REFEREE—The decision in the suit of Featherstone vs. Bidwell has just been handed down by a lower court judge. The suit was originally brought on seven claims for the mode of attaching pneumatic tires to the rims of bicycles, etc., and all but one claim was thrown out by the court. The claim allowed was the mode of fastening the flaps to the canvas tubing and cementing the same to the rims. This method of making the tire we discarded some time ago in making our experiments for 1893, and is entirely eliminated from our 1893 tire, as we have made a marked improvement. We immediately entered

an appeal and feel confident that the decision of the court of appeals will be in line with the decision of the other six claims of the present suit. GEORGE R. BIDWELL, CYCLE COMPANY.

There is no telling just what effect the decision will have on the tire business in this country, but that it will have some goes without saying. Those who have used tires which were infringements on the Dunlop patents can undoubtedly be asked and made to settle, the same as those who made infringing tires. The result probably does not affect Morgan & Wright, whose tires are not infringements, at least so far as claims four and five are concerned; and other makes would probably escape also.

Who Was the Victim?

En route to Peoria Sept. 26, on the C., B. & Q. train which left Chicago at 10:30 at night, a party of toughs boarded the train and assaulted the passengers, a wheelman being among those roughly handled. This gang has been arrested and will be prosecuted, but the wheelman who was assaulted is unknown. The railroad officials desire him to send his name and address to T. F. Sheridan, lock box 951, Chicago.

The Riverside A. C. cyclers will hold the following races at the Waverly, N. J., track on October 15: One-mile, novice; two mile, scratch; three-mile, team, open to New Jersey clubs; one-mile, handicap; half-mile, handicap, and two-mile, handicap.

The fifteen-mile handicap road race of the colored wheelmen of Plainfield, N. J., was held Thursday of last week over the Fanwood-Cotch Plains course. It was won by J. Bolden (five minutes) in 54:32 1-2; E. Martin (four minutes) was second.

The Chicopee Falls (Mass.) riders will enjoy a five-mile road race to-morrow.

JACKSONVILLE'S MEET.

THE CHICAGO MEN CAPTURE ALL THE IMPORTANT EVENTS.

Johnson Secures Only One First, but Makes a Fast Mile—Lumsden Wins an \$800 Piano—Other Men Ride Well.

JACKSONVILLE, Ill., Oct. 3.—Jacksonville, the peer of the western circuit thus far, may well be proud of her race meet, her track, to-day's races and the royal reception which her wheelmen have given the half-thousand visitors within her gates. The city is in holiday attire and all is interest in the cycle races and their outcome. The reception committee, headed by the Juvenile band, met the visitors as they alighted from the trains and escorted them to the various hotels. The Dunlap, conceded to be headquarters, is full to the doors and the Pacific is just as crowded. The big bugs are at the Dunlap, but not all, for Chief Consul Gerould and the Chicago club's team, together with the St. Louis delegation, including Chief Consul Bob Holm, is at the Pacific. A photo was taken after dinner at the Dunlap, and the wheelmen fell in line for a mile and a half march to the track. To-night a lantern parade was held, two or three hundred people being in line, many with handsomely decorated wheels. A ball is in full blast, to which none but L. A. W. members who can show their cards are admitted, others being charged \$2.

HAD GOOD WEATHER.

The weather is grand although a little warm for comfort indoors. A stiff breeze has blown all day, but made little difference at the track, as it is well shielded by the buildings and hill, on whose sloping side it is built. This track is a half-mile in circumference and cost some \$30,000. The track has easy turns with a long straight. It is situated on the grounds of the Morgan County Fair Association, a mile and a half from town. From the grand stand, a two-story affair, every foot of the surface can be seen. The track surface is hard and smooth and very tempting to the speedy pedalers, as was evinced in to-day's races.

Probably not over 2,500 people witnessed to-day's events and this was a chilly crowd, which knew not when to cheer. It was thought to awaken interest by announcing that Johnson would go against his own records to-morrow, paced by a running horse, nor was the effort in vain. The races were run promptly. No time limit was placed nor was any needed, for all times were fast.

THE OFFICERS.

The officers of the day were: Referee, F. P. Priol, New York; judges, H. G. Rouse, C. H. Robinson, James Joyce, Jr., and Dr. J. W. Hairgrove; clerk of the course, Fred Pattee; starter, A. L. Atkins; timers, F. W. Gerould, Ed De Blois, Boston; W. M. Brewster, Quincy, and J. L. Wister, Peoria; announcer, W. A. Shockley, Boston.

Johnson made his appearance but got no better than second to Lumsden. Munger remained in Cincinnati and will meet the team at Evansville. Rhodes had suffered intense agony for twenty-four hours from toothache and had the molar yanked. He rides Tuesday. Otherwise the Chicago club men were all right and showed it by carrying their colors to the front in nearly every race.

LUMSDEN AND BLISS FELL.

Fully 2,500 people were seated in the spacious grand stands, the main stand

two stories high. The track center was entirely clear, even the band being taken over to the other side. The contest began at 2:45, and two hours and a quarter were taken to run off the ten events. In addition to the race programme A. J. Nicolet of Chicago gave a clever exhibition of fancy and trick riding. He used the ordinary, eagle and safety, and rode a quarter-mile on one wheel of the safety.

Githens went a mile to break the track record of 2:27 3-5 and lowered it exactly ten seconds. There was but one serious trouble, serious in two ways. In the mile handicap Lumsden had the mile record in competition well within his grasp at the three-quarter pole, when, in passing the bunch, some one wobbled. Lumsden went down, and Bliss, who was close up, raising his front wheel, cleared Lumsden with that but ran over his stomach with the rear, and then went down himself. Both wheels were damaged, that of Bliss being irreparably broken. Lumsden was somewhat hurt and was afraid he would not be able to ride Tuesday. Every event was run in good time. There were no claims of foul, and not a hitch of any kind.

CHICAGO SCORES FIRST.

The first event was the novice race, in which eight men started. The field was bunched to the three-quarters, when A. Green of the Chicago club came to the front rapidly and in a long sprint won by a half-dozen lengths from Frank

feet in 33 4-5 sec., the Minneapolis man apparently sprinting as well as Lumsden but not better. Githens was third and Stevenson of Peoria fourth. Bliss was out of it in the sprint as was also Harding and Tidd.

The Lockwood Cycling Club's two-mile handicap was an easy victory for C. R. Kirby from the 150 yard mark, Irving Woods, the scratch man, second, and E. L. Angle, 300 yards, so far back they failed to count him. These were the only starters.

Lumsden was scratch man in the one-mile handicap, and Bliss twenty-five yards. These two and Bert Myers, forty-five yards, soon gathered together and at a quarter from home Lumsden was passing the leader and had the mile competition record well in hand. A rider in front wavered, wobbled, and Lumsden struck him, falling on his back and throwing his arm up just as Bliss, who had been following closely, rode over him. Bliss came down hard and his wheel was a wreck. H. R. Steenson won by a length from O. C. Green, of the Chicago club, while H. N. Stringer just defeated Keator for third place and that was all.

DISTANCED THE G. O. O.

An ordinary race is such a rarity that sounds of ridicule were heard when E. D. Bamberger mounted his geared ordinary for the contest, which he won handily from F. C. Wing on a pneumatic Pony Star. Frank Padgett, of Jackson-

Githens was but six inches behind Johnson, and Roy Keator a good fourth, beating Bliss for the third time in two days racing.

A. Green captured two firsts, O. C. Green, his brother, one first and two seconds, Lumsden two firsts, and Ballard one first, all the other Chicago men faring well.

THE SUMMARY.

One mile, novice—A. Green, C. C. C., 1; Frank Padgett, Jacksonville, 2; R. A. Waters, Bloomington, 3; time, 3:44.

Two-mile, handicap—H. N. Stringer, Elgin, 300 yards, 1; O. C. Green, C. C. C., 180, 2; Roy Keator, L. C. C., 275, 3; J. S. Johnson, C. C. C., scratch, 4; J. P. Bliss, C. C. C., 40, 5; time, 4:50 4-5. Time of scratch man, 4:52 2-5.

One mile, Illinois division—E. W. Ballard, C. C. C., 1; F. H. Tuttle, C. C. C., 2; time, 2:40.

Quarter-mile, open—A. E. Lumsden, C. C. C., 1; J. S. Johnson, 2; H. A. Githens, C. C. C., 3; H. R. Steenson, Peoria, 4; time, 33 4-5.

Two mile, Lockwood C. C., handicap—C. R. Kirby, 150 yards, 1; Irving Woods, scratch, 2; E. L. Angle, 300 yards, 3.

One mile, handicap—H. R. Steenson, 120 yards, 1; O. C. Green, 100, 2; H. N. Stringer, 150, 3; Roy Keator, 120, 4; time, 2:19 1-5.

One mile, ordinary, open—E. D. Bamberger, Chicago, 1; F. Wing, Ottawa, 2; F. Padgett, 3; time, 2:51 3-5.

Half-mile, handicap—O. C. Green, 50 yards, 1; H. A. Githens, 25, 2; Roy Keator, 65, 3; J. P. Bliss, 15, 4; time, 1:07 1-5.

Two-mile, 6.00 class—A. Green, 1; H. N. Stringer, 2; E. E. Anderson, Roodhouse, 3; R. M. Tidd, Elgin, 4; time, 5:36 2-5.

One mile, open—A. E. Lumsden, 1; J. S. Johnson, 2; H. A. Githens, 3; Roy Keator, 4; J. P. Bliss, 5; time, 2:51 3-5.

Jacksonville's Second Day.

The races of to-day were brilliant in every way. They were run promptly and with a vim which aroused the crowd that was lacking in enthusiasm the first day. The weather was perfect and the breeze not at all stiff. Probably 2,000 people were in attendance. When Johnson won the two-mile open race, the first event of the day, there was a great hulla-balloo, and this was intensified in the later contests over the hair splitting finishes. It is very doubtful if a meet was ever held where so many close and exciting finishes occurred. The men were evenly matched in every contest. The Green brothers, of the Chicago club, were a surprise to their friends. They won seven prizes of a total value of \$700, and had only one wheel to ride. The elder Green, father of the boys, came down to see his boys race to-day. He is a prominent Chicago merchant. Rhodes' improved form was also a surprise. The happiest man to-day was Arthur E. Lumsden when he won the cabinet grand piano. For a long time Lumsden had wanted a piano, which he failed to get in two contests. Johnson had made preparations to go against his own records to-day, paced by a running horse, but the horse could not be found that was fast enough. He rode a mile to lower the track record made by Githens yesterday, and succeeded in doing 2:13. Githens' record was 2:17 2-5.

The last quarter of the great five-mile open race was ridden by Lumsden in 28 2-5 sec., and Rhodes rode a flying quarter this morning in 27 1-5 sec.

The three-minute class race was won to-day in 2:37 1-5, fast time surely for a three-minute class race. Keator and Myers had prepared to ride a unicycle race but Myers unfortunately broke a pedal.

JOHNSON'S FIRST WIN.

The first event was the two-mile open, in which Johnson, Rhodes, Myers, Githens and Bliss were competitors. The race was all in the last quarter, Johnson succeeding in getting first place, his first and only win of the meet. Rhodes made a great effort but lost by a foot. Bert Myers flew into third place on the sprint with Keator at his heels and Bliss a good fifth.

The mile ordinary handicap brought

AN INCIDENT OF THE ELGIN TRACK.

Padgett, of Jacksonville. The time, 2:44, was better than that of several other races. Green rode his brother's wheel, owning none of his own—a novice surely.

In the two-mile handicap fourteen men started. Johnson was sent away from the scratch mark. Bliss had forty yards, Githens seventy-five and Keator 275. The limit man, W. A. Young, had 250 yards. Keator was soon leading the procession, but Johnson, with Bliss and Githens as pacemakers, rapidly overtook them. Stringer of Elgin was away like a shot on the last quarter, with O. C. Green in hot pursuit. Stringer won by a length, Green second and Keator third, with Johnson close to his rear wheel and Bliss fifth. The winner's time was 4:50 4-5, Johnson's time 4:52 2-5, the record being 4:51.

BALLARD WINS FROM TUTTLE.

The one-mile Illinois division championship race was a failure. E. W. Ballard defeated F. H. Tuttle a couple of lengths, the latter setting nearly all the pace in 2:40.

The quarter-mile open was a red-hot contest between Lumsden and Johnson. The latter trailed the Chicago man throughout and was beaten by a couple of

feet, on a g. o. o., being an eighth of a mile behind.

The two-mile handicap was a great contest. Seventeen starters, with Johnson on scratch, Bliss, fifteen yards and Githens, twenty-five. The latter ran into second place, O. C. Green, fifty yards, winning in a great sprint, while Keator was third, some yards ahead of Bliss, who could not sprint with a sixty-two and a half inch gear on a strange machine, being accustomed to a sixty-eight inch gear.

The two-mile, six-minute class, was a fine race between a dozen men who used head-work for three laps, then threw all to the dogs and rode like a whirlwind, all bunched down the home stretch. A. Green, who had just won his novice race, won this, although he unintentionally fouled Stringer, of Elgin, by cutting across the track. E. F. Anderson was third, but a foot behind the Elgin man, and R. M. Tidd was fourth.

LUMSDEN BEATS JOHNSON.

The last race of the day was the one mile open in which Lumsden appeared all bandaged up and looking a loser. Johnson was in for blood and rode well and hard, but Lumsden was too much for him and won by about six inches.

BIDWELL

PNEUMATIC TIRES, 1893.

During the past season we were at the head of the Pneumatic Tire business in the United States, looking to improve the tire for the season of 1893. Naturally we have not been idle in experimenting. We are **now ready** with our **new tires**, which surpass anything ever put on the market.

They Cannot Burst,

They Cannot Come Loose,

They Cannot Leak.

Before placing your order see them. A full description will be sent you at once.

GEO. R. BIDWELL CYCLE CO.,

306, 308 and 310 West 59th Street,
NEW YORK.

Tire Factory, 49-51 West 66th Street, New York.

three starters. The handicapping of Bamberger over Wing was a surprise, and the Chicago man was asked to ride from scratch with Wing, whom he had easily beaten the day before. On the last quarter it was any man's race. Wing won by a very narrow margin right on the tape; Bamberger second; time, 2:42 2-5. Wing rode a pony pneumatic Star, and Bamberger a geared ordinary.

KEATOR IS A CHAMPION!

Three men appeared for the two-mile Illinois division race. E. W. Ballard led easily on the last quarter, Keator second. Ballard's tire became uncemented and out off the valve, so he was out of the race. Keator sprinted rapidly into first place, Steenson second, and Ballard walked into third place; time, 5:53.

In the half-mile open seven men started. It was a procession to the quarter, when Lumsden and Johnson shot to the front, with Githens fighting his way out. Lumsden won first place and Githens beat Johnson out for second, J. P. Bliss being fourth to cross the tape; time, 1:12.

In the three-minute class seven men started and rode in procession for three-quarters of a mile, when suddenly the entire field broke for home as if by pre-arranged signal. Stringer took the lead and crossed the tape in the lead with Green a good second and Dever third. Time, 2:37 1-5.

BLISS BEATS JOHNSON.

The two-mile handicap race had but seven starters, with Johnson on scratch, Bliss, 45 yards and Bert Myers 120 yards. Eck sent Johnson off, and he quickly overhauled Bliss and Myers and later the entire bunch. Bliss led on the last quarter and crossed the tape first. Johnson had delayed his spurt too long and was beaten out by Bert Myers, who took second, O. C. Green third, Johnson getting only fourth place; time, 5:15 2-5.

The team race was conceded to the Chicago Cycling Club without contest.

Seventeen men were away with the crack of the pistol in the mile handicap, the largest field of the day, with Lumsden at scratch out for the mile competition record. Lumsden soon caught Githens, and on the last lap rapidly passed the field one by one, but the effort was too much and Myers won, Ballard just drawing into second place, with Lumsden third; time, 2:17 3-5. Lumsden's time was 2:18 2-5, some three seconds shy, the fastest time, nevertheless, for two miles that was ever ridden in the west.

Irring Wood easily won the mile Lockwood Cycling Club race, C. B. Kirby second and F. H. Mosely third; time, 2:50 3-5.

LUMSDEN WINS THE PIANO.

The last even of the day was the contest for a cabinet grand piano for five miles. The starters were Rhodes, Githens, Lumsden, Johnson, Bliss, Keator, Steenson, Myers, Green and Merrill. The latter was quickly out of it, although the pace was not fast. Lumsden was in the race to win, and well did he perform the work laid out before him. The men were put under a fifteen-minute limit, with no run over. All took a hand in the pace making, Myers probably doing more than his share. A half-mile from the finish all looked anxious. Steenson took the lead on the back stretch and made it red-hot for a quarter, when Lumsden, with Bliss at his heels, shot out and won, Bliss just back and Rhodes struggling under adverse circumstances for the lead. Rhodes was never riding so well as then, and but for Johnson's break in ahead of him stood an excellent show of winning. Johnson rode into fifth place, Githens beating him

out. Myers was sixth; time, 14:00 3-5. The Chicago club men went wild over their favorite's victory, and carried him on shoulders down by the grand stand, even Lumsden himself joining in the club yell.

THE SUMMARY.

Two-mile, open, seven starters—J. S. Johnson, C. C. C., 1; W. A. Rhodes, C. C. C., 2; Bert Myers, Peoria B. C., 3; J. P. Bliss, C. C. C., 4; H. A. Githens, C. C. C., 5; time, 5:53 3-5.

One-mile, ordinary, handicap, three starters—Frank Wing, Ottawa, scratch, 1; E. D. Bamberger, Chicago, 50 yards, 2; Frank Padgett, Jacksonville, 3; time, 2:42 2-5.

Two-mile, Illinois division—Roy Keator, L. C. C., 1; H. R. Steenson, Peoria, 2; E. W. Ballard, C. C. C., 3; time, 5:52.

Half-mile, open, seven starters—A. E. Lumsden, 1; H. A. Githens, 2; J. S. Johnson, 3; J. P. Bliss, 4; W. A. Rhodes, 5; time, 1:12.

One-mile, 3:00 class, seven starters—H. L. Stringer, Elgin, 1; O. C. Green, C. C. C., 2; H. A. Dever, Rockford, 3; E. E. Anderson, Roodhouse, 4; time, 2:37 1-5.

Mile, handicap—J. P. Bliss, 45 yards, 1; Bert Myers, 120, 2; O. C. Green, 150, 3; J. S. Johnson, scratch, 4; Roy Keator, 200, 5; time, 5:15 2-5; Johnson's time, 5:16 2-5.

One-mile, handicap, seventeen starters—Bert Myers, 60 yards, 1; E. W. Ballard, 70, 2; A. E. Lumsden, scratch, 3; H. A. Githens, 50, 4; time, 2:17 3-5; Lumsden's time, 2:18 2-5.

One-mile, L. C. C.—Irving Woods, 1; C. B. Kirby, 2; F. H. Mosely, 3; time, 2:50 2-5.

Five-mile, open, for cabinet grand piano, ten starters, five prizes—A. E. Lumsden, 1; J. P. Bliss, 2; W. A. Rhodes, 3; H. A. Githens, 4; J. S. Johnson, 5; Bert Myers, 6; time, 14:00 3-5.

Milwaukee Race Gossip.

The rainy weather played havoc with the race meet of the Winnebago Wheelmen, which was to have been held at Fond du Lac on last Saturday. Terry Andrae and John Schmitbauer, of this city, and Louis and Roy Reed, of Ripon, were among the entrants. The Winnebago Wheelmen number about fifty active riders, all of whom are very enthusiastic over the sport. The club is already setting its pins for the next state meet, and aided by citizens of the beautiful city of Fond du Lac, who are also very much interested in cycling, will make a strong pull for the honor.

The racing board of the Milwaukee Wheelmen, encouraged by the success of the recent meet at National Park, have decided to give a series of races at the exposition during the month of November. Five afternoons and a like number of evenings have been agreed upon. This includes a grand Thanksgiving matinee and evening performance. The project will be carried out on an elaborate scale. A grand prize list and other attractions it is thought can induce some of the best talent in the country to participate.

The Mercury Cycling Club, on account of rain, was compelled to postpone its second annual road race. The event, weather favorable, will take place next Saturday.

Terry Andrae and John Schmitbauer attended the county fair at Chelton, Wis., last week. They were not looking for anything in the "pot-hunting" line, but nevertheless brought home a silver water set and a gold watch.

Milwaukee will send a number of her best racing men to Chicago to attend the coming tournament. They are training hard under the direction of a well-known trainer, and something is going to drop. Last Thursday Sanger went a half mile in 1:05 flat. It is remarkable time considering the fact that he was not paced by any one. Two men held watches and each caught the same time. A few weeks ago this would have beaten the world's record.

JACK ROYAL.

Five Mile Road Race.

The Somerville Rovers will hold a five-mile road race on Friday, Oct. 21. The committee in charge consists of Messrs. C. S. White, F. S. Lincoln, Fred Haley, William G. Page and W. F. Nelson.

Louisville's First Night.

The "electric tournament" of the Louisville Cycle Club which began on Thursday night of last week at the Auditorium track proved what the management claimed it would be, a success. There were 7,500 people in the grand stand and a quarter of them were ladies, all being very enthusiastic. The track was in good shape, and though there were one on two falls no one was injured. The sixth of a mile circuit is altogether too small to hold races now-a-

W. C. PAINE.

days, when there are such big fields. A quarter-mile track is bad enough, but a sixth is positively dangerous. The officials had things nicely arranged and as a result the races were started with promptness, 8:15 being the time of the first crack of the pistol. Lumsden, Munger, Bliss, Githens and Rhodes were the only fast men there, Johnson and the easterners not showing up, much to the crowd's disappointment. The races resulted as follows:

Half-mile, novice—First heat—Will Boone, 1; T. W. Scholtz, 2; C. L. Bailey, 3; time, 1:30. Second heat—W. H. Irish, 1; C. P. Dodd, 2; F. D. Barber, 3; time, 1:23. Final heat—F. D. Barber, 1; W. H. Irish, 2; C. P. Dodd, 3; time, 1:29.

One-mile, open—A. E. Lumsden, Chicago C. C., 1; W. A. Rhodes, Chicago C. C., 2; H. A. Githens, Chicago C. C., 3; time, 2:40 3-5, track record. Munger made pace two laps, but was afraid of the track and quit. Then Ballard took up the lead, Lumsden and Bliss close up. On the last lap Lumsden spurred and won by twenty yards, while Rhodes beat out Githens by a foot for second.

One-mile, Kentucky riders—T. E. Jeffries, 1; W. M. Guyol, 2; W. A. Rubey, 3; time, 2:51 3-5.

Quarter-mile, open—J. P. Bliss, C. C. C., 1; H. A. Githens, 2; E. W. Ballard, 3; time, :39 1-5. Bliss went out at the start and won by two yards.

Two-mile, handicap—J. P. Bliss, 40 yards, 1; W. A. Rhodes, 40 yards, 2; L. D. Munger, 50 yards, 3; time 5:21 3-5. No scratch men, the forty-yard men being virtually on scratch. Bliss, Rhodes and Ballard soon caught Munger, who then made the pace, the field being overtaken easily. On the last lap Bliss went out and won by a yard.

One-mile, 2:45 class—First heat—J. H. Gardner, Nashville, 1; W. M. Guyol, 2; J. Newson, 3; time, 2:52 2-5. Second heat—T. E. Jeffries, 1; C. E. Tudor, 2; W. A. Rubey, 3; time, 2:51 1-5. Final heat—Gardner, 1; Tudor, 2; Jeffries, 3; time, 3:01. Gardner was disqualified for passing on the inside, and the race was given to Tudor.

One-mile, open—A. E. Lumsden, 1; A. L. Baker, Columbus, 2; H. A. Githens, 3; time, 2:41 1-5. Lumsden made pace all the way and won by a length, while Baker, a promising rider, beat Githens for second.

The officers of the day were: Referee, W. A. Shockley; judges, Hon. Sterling B. Toney, Hon. William L. Jackson, E. A. DeBlois, Dr. H. B. Tileston, G. E. Johnson; announcer, W. C. Marion, Jr.;

assistant announcers, Thomas P. Watts, Eli M. Watts; starter, Will Paine; timers, H. E. Jeffries, Edward E. Ledman, P. E. Allison; clerk of the course, Orville W. Lawson.

The Second Night's Races.

The attendance the second night was even larger than that of the first, and the crowd was more enthusiastic. Munger gathered in another piano, winning the five-mile open from Lumsden by five yards. Lumsden made a protest, claiming that the number of laps posted was wrong and thereby misleading, but the protest was not allowed. In the evening the prizes were distributed at the club house of the Louisville C. C., and several hundred guests were royally entertained. The second day's races resulted as follows:

Three-mile, Louisville club championship—J. E. Jeffries, 1; W. A. Rubey, 2; W. P. Boone, 3; time, 9:20.

Half-mile, open—A. E. Lumsden, 1; W. A. Rhodes, 2; time, 1:20. Only two starters; Lumsden led all the way and won by a yard.

One-mile, handicap—A. L. Baker, 50 yds., 1; J. P. Bliss, scratch, 2; H. A. Githens, scratch, 3; time, 2:38. Bliss' time was 2:38 2-5, a new record for the track, and for which Bliss received a \$50 cup. The whole field was within a hundred feet.

One-mile, 3:00-class—T. E. Jeffries, 1; W. A. Rubey, 2; Cliff Creed, 3; time, 3:01. Jeffries was pushed by Rubey at the finish only.

One-mile, invitation—T. E. Jeffries, 1; W. A. Rubey, 2; W. M. Guyol, 3; time, 2:58 3-5. Jeffries finished a yard ahead of Rubey, who was the same distance in front of Guyol at the finish.

One-sixth mile, heats—First heat—J. P. Bliss, 1; L. D. Munger, 2; W. M. Guyol, 3; time, :27 3-5. Second heat—Same result; time, :27 2-5.

Five-mile, open (piano race)—L. D. Munger, 1; A. E. Lumsden, 2; A. L. Baker, 3; time, 14:58, two seconds inside the time limit. Baker began the running and Munger soon took it up, with Lumsden and Bliss close up, and Guyol dropped out at the end of a mile and Githens went to the front. Munger made pace the third mile and pretty much every lap thereafter and then won from Lumsden, Baker beating Githens and Bliss. The miles were made in 2:54, 2:52; 3:01; 3:12 and 2:59, respectively.

* * *

Chicago's Coming Meet.

Unless all signs fail, the meet of the Chicago Cycling Club at Washington Park Oct. 21 and 22 will, the weather permitting, equal Springfield's diamond tournament. If Zimmerman and Tyler keep their word and attend, the club arranges to have Nancy Hanks go for a record at a cost of \$2,500, as the scheme now is, or a match is arranged between Nancy and Jimmy, then it will be the banner meet of 1892. Thousands will be in Chicago on those days, the time of dedicating the world's fair buildings and grounds, and the bicycle races should secure a large attendance. The grounds will easily accommodate 60,000 to 75,000 people, and with the programme as now arranged fully 50,000 people should pass through the gates during the two days. Several committees are actively at work on the meet, and the details are being arranged rapidly.

Besides the Illinois Central road the L road and cable line will reach the grounds, so that transportation facilities will be unsurpassed, and as the distance is but six miles from town by wheel, many can ride and find a safe place to leave their wheels.

Some 10,000 handsome souvenir programmes are being printed, which will be sent out and the city will soon be placarded with new and handsome bills. The track is now in shape to train on, and those who have entered and paid their fees will be given tickets admitting them to the park to practice. On the 15th all horses will be ordered off and then the track will be put in the

Buffalo Ramblers Beat the Press C. C.

Saturday, although favored with sunshine, clear skies and a medium temperature, was not one of the best days for making time over the Corfu course, as a strong wind was blowing. It was as early as 2 p. m. when the wheelmen began to congregate at the Parade House to witness the start in the Rose team road race. It was expected that all the wheel clubs in the city would be represented and the cycling section of different athletic clubs as well, but entries from the Ramblers B. C., the Press C. C. and the Wanderers B. C. were the only ones received. When the time for the placing of the men arrived but twelve men faced the tape. The clubs were represented as follows: Ramblers B. C., F. E. Klipfel, B. Cleveland, E. E. Weinig, W. F. Buse and F. C. Fuhrmann; Press C. C., C. H. Callahan, J. W. Linnemann, F. W. Runser, G. W. Luce, R. W. Conn and Jesse Kittenger.

The starter, W. C. Mason, got the dozen men away at 2:28:30. The high

lunge the Buffalo Ramblers B. C. to a team race from one to 100 miles for a trophy valued at from \$50 to \$100, teams to consist of three to six men, race to be run Saturday, Oct. 15, the course to be decided upon later.

C. H. CALLAHAN, Captain.
W. H. LAMPMAN, First Lieutenant.

On behalf of C. H. Callahan, I hereby challenge any member of the Buffalo Ramblers B. C. to a race from one to 100 miles for a trophy valued at from \$50 to \$500. Messrs. Weinig, Buse, Banker and Cleveland preferred.

W. H. LAMPMAN, First Lieutenant.

The challenge will not be considered by the Ramblers, as they feel that the one just finished should end the matter for the season, but are willing to take up the question next year. The defi from Charles Callahan will be accepted and a man will be chosen at an early date to meet him.

The Wilmington Races.

The Wilmington Wheel Club joined forces with the Warren Athletic Club in conducting the fourth annual road and track races this year. The date was originally set for Oct. 1, but was changed to Friday, Sept. 30, in order to secure the attendance of Zimmerman, who was due at New York on Saturday. The Boston road race also interfered by keep-

One-mile, 2:35 class, time limit 3 min.—S. H.

JACKSONVILLE—GRAND STAND AND TRACK.

with doing five miles in 11:41, for on Friday last he made an attack on Zimmerman's two-mile record of 4:37 2-5, and cut it down to 4:28 3-5, and his flying mile record of 2:06 4-5 to 2:04 4-5. There was a strong wind blowing at the time, and he intends making another attempt to place the figures at 2 min. or under. He was paced by Harry Arnold, E. A. Nelson, E. A. Smith, C. F. Martin and C. T. Nelson, each a half mile, while at the first mile and a half and the last mile, he was paced by Dornitge, Murphy and Campbell on the triplet. A despatch to the New York Times says: "Windle has just received a letter from Independence, Iowa, describing how Johnson made a mile in 1:56 8-5 out there. A screen behind the sulky drawn by the pace-making horse cut the wind the entire distance. If this record is allowed to stand Windle says he will fix up a mile straightaway course between two railroad tracks, secure a locomotive which shall make the pace, drawing a huge screen in front of him. As the obstruction of the body against the air is the principal obstacle in racing, Windle

wind prevented fast riding, but upon making the turn the scramble for positions occurred and the race began in earnest. As soon as the riders felt the wind upon their backs they began making a good hot pace, and in a short time were strong out over the course. At 5 o'clock at the finish, which was in front of the Parade House, the large crowd was augmented by several hundred wheelmen, who spent the time in a discussion as to the merits of the several contestants.

The following is the official time:

Name.	Time.
C. H. Callahan, P. C. C.	3:04 00
J. W. Linnemann, P. C. C.	3:05 15
W. F. Buse, R. B. C.	3:05 45
B. Cleveland, R. B. C.	3:07 10
F. W. Runser, P. C. C.	3:08 40
E. F. Weinig, R. B. C.	3:16 15
F. Klipfel, R. B. C.	3:16 40
G. Buse, R. B. C.	3:23 00
F. C. Fuhrman, R. B. C.	3:24 30
G. W. Luce, P. C. C.	3:24 45
R. W. Conn, P. C. C.	3:46 00
Jesse Kittinger, P. C. C.	3:47 00

The following challenges have since been published in the daily papers and are self explanatory;

On behalf of the Press C. C. we hereby chal

ing away a number of good road riders. Marriott, of the South End Wheelmen, who won third time prize at Irvington-Milburn Decoration day, was on scratch in this event and captured the time prize and also broke the course record of 1:23 made by McDuffee last year. About 1,500 people were in attendance. The summary follows:

TWENTY-FIVE MILE ROAD RACE.

Zimmy Won Easily.

The two events which commanded the most interest Saturday at the National Amateur Athletic Association championship games was the two-mile bicycle and the five-mile foot race. The bicycle race had Zimmerman, Taylor, Hess, Banker and Murphy as starters. George Taylor was very lame from his Canadian fall, so Banker made a pretty finish for his club with the winged-foot man, who won by a yard, looking around; Taylor third, a yard away; time, 6:35. The race was a sort of pace-in-turn affair, and a very friendly feeling seemed to exist between the men. At two laps Zimmy got his position and a perfect roar of applause greeted him as he played with his field home.

The Boston Road Race.

The Boston Athletic Club's fourth annual twenty-five mile road race was

THE SIMONDS

ROLLING MACHINE

★ COMPANY ★

MAKES THE BEST BALLS IN THE WORLD.

This has been proven by Actual Tests. The letter

below explains itself:

HARTFORD, CONN., July 11, 1892.

G. W. WEYMOUTH, ESQ., Gen. M'g'r Simonds Rolling Machine Co., Fitchburg, Mass.

DEAR SIR:---Replying to your favor of the 9th inst., would say: That we did make a very thorough test of your steel balls in connection with other makes. All the balls we used were purchased in open market, so as to provide against any selection whatever. This was done for the reason that they would show the run, or about as the balls would be delivered from the manufactory. For uniform strength and size yours far exceed any of the other makers, and, therefore, as the result of the above test, we decided to use the balls manufactured by you.

Yours very truly,

COLT'S PATENT FIRE ARMS M'F'G CO.,

(Signed) L. C. GROVER, Supt.

ANGLO-AMERICAN IRON AND METAL CO.,

PLATT AND PEARL STREETS, N. Y.

TO CYCLE MANUFACTURERS:

"Hercules" Chains, 1 inch pitch, Humber pattern, 1-2, 7-16, 3-8, 5-16 widths, hardened and unhardened. We are prepared to deliver 100,000 chains for this season's business. The **most accurate** chain made in the world. Twenty per cent. lighter than block chain, same size.

"Goodstuff" spoke wire and spokes. Unstretchable, unbreakable, costly; but no first-class maker of light wheels can afford to use any other wire.

Rims for all makes pneumatic tires. Made from best quality **spring temper steel**, smooth and bright; not as low-priced as **hoop iron** rims, but are intended for use. All rims should be lighter in gauge this year. We make them **right**.

Hollow Rims, if you want them. All sizes.

Cement—our own **"Goodstuff"** brand. Best in the market. Loudon's also, if you will have it.

Nipples that are nipples. No poor brass or poorer workmanship, such as some are making. Can deliver 50,000 per day.

Forksides, weldless or brazed.

Mudguards, either steel or aluminum.

Pedals. Bown's and several other makes; rat trap or rubber.

Steps, Lamp Brackets, Coasters. Several varieties of each.

Cups, cut from bar steel (not stamped), finished all over and hardened. You may have had trouble with poor cups. Don't be "bit" again. These are right.

Balls. Our balls are simply **perfection**. We will enter into contract to pay all damage arising from any failure of our balls. Don't buy poor balls. They don't pay.

Bar Steel. C. R. strip steel, screw rod, round, square and hexagon, bright or black. Axle steel, tool steel. We know something about the **steel** business and are willing to give you the benefit of our knowledge.

 **MORE FURTHER ON.**

Anglo-American Iron and Metal Company,

Platt and Pearl Streets, New York.

AGENTS WANTED.

The Agency for the above has been secured by the

JAMES CYCLE CO.,

113 Adams Street,
CHICAGO, ILL.

L. A. W. MEMBER:—"Yes, it is considerably improved, but it won't be perfect until we move it to Chicago."

held Saturday over the regular course to Wellesley and return. There were ninety-five starters, and the winner turned up in F. B. Emerson of the Press C. C. of Chelsea, an eight-minute man. Fred McDevitt of the Winnimmett C. C. of Chelsea, with nine minutes, was second, and Lonnder of the Malden bicycle club, eight minutes, third. Emerson's time was 1 hr. 22 min. 7 sec. McDuffee from scratch captured the time medal in 1 hr. 18 min. 7 sec., while Monte Scott of Providence started with McDuffee and finished two seconds behind him, thereby securing second time. Van Wagoner of Newport made third best time, 1 hr. 18 min. 18 sec. Thirteen prizes were given, and fifty-six men who finished within twenty minutes of the first man received bronze souvenirs.

Chicagoans Win at Cincinnati.

The racing contingent which was at Louisville Friday night, and which included the Chicago C. C. team, arrived at Cincinnati Saturday morning to take part in the races of the Crescent Wheelmen at the Gentlemen's Driving Park. The crowd numbered about 2,500 people, the track was dusty and slow, there was a strong wind on the backstretch and the races dragged. Eleven out of the dozen events on the programme were run off, the Crescent club's championship being postponed. Jeffries was ruled

out of the three-minute class, and Van Tine, who won it, was disqualified because he had been cautioned not to ride, not being eligible. Rhodes secured one and Lumsden two firsts. The races were as follows:

One-mile, novice—S. Runk, Cincinnati, 1; H. L. Sayers, Hartwell, 2; A. S. Neuch, Cincinnati, 3; time, 2:44 2-5.
One-mile, 2:45 class—Charles Roth, Cincinnati, 1; F. S. Davis, 2; Charles Tudor, 3; time, 2:40.
One-mile, open, flying start—A. E. Lumsden, 1; L. D. Munger, 2; H. A. Githens, 3; time, 2:38 4-5. French set the pace to the three-quarter pole, when Lumsden spurred, barely winning from Munger.
Two-mile, handicap—A. N. French, Cincinnati, 125 yards, 1; L. Munger, scratch, 2; Roy Keator, 90 yards, 3; time, 5:02 4-5. Bliss had 60 yards but forgot to spurt and got only fourth.
One-mile, 3:00 class—C. C. Van Tine, Findlay, 1; L. H. Sayers, 2; C. W. Nisewonger, 3; time, 2:43. Van Tine was disqualified, being ineligible, and Sayers was given the race.
Half-mile, open—J. P. Bliss, 1; W. A. Rhodes, 2; H. A. Githens, 3; time, 1:24; time limit, 1:18. Run over—A. E. Lumsden, 1; J. P. Bliss, 2; H. A. Githens, 3; time, 1:20; limit raised to 1:18.
Cincinnati riders—C. E. Tudor, 1; F. S. Davis, 2; H. Bauers, 3; time, 2:43.
One-mile, handicap—A. N. French, 60 yards, 1; A. L. Baker, 60 yards, 2; A. E. Lumsden, scratch, 3; time, 2:17 3-5. Lumsden's time was 2:19 2-5, the western competition record.
Half-mile, boys—R. Runck, Cincinnati, 1; time, 1:21 2-5.
One-mile, open—W. A. Rhodes, 1; A. L. Baker, 2; L. D. Munger, 3; time, 2:57 1-5. This was a loaf, but a good finish, Munger starting the spurt. Rhodes beat him a foot, however. The time limit was 2:50, but the race was allowed.
Githens attempted to break his own

mile record of 2:22. He was paced by Lumsden, Munger and Bliss on a triplet, but as the pacers could not get around the turns on the long machine and only made the mile in 2:19 3-5, Githens' time was just inside of 2:20.

Gregg Won the Cup.

The Aeolus club's ten-mile road race for the Keats cup was held Saturday on the Humboldt and Douglas park course. Frank Bodach, from scratch, won the time, and was second to Gregg, who won from the 1:30 mark in 32:33. There were fifty entries but few starters. W. E. Bond, E. Mahr and C. E. Croisit were judges, and R. H. Ehlert timed. The first five men in were:

Name.	Handcp.	Time.
P. P. Gregg.....	1:30	32:33
F. Bodach.....	scratch.	31:18
J. Neuman.....	2:00	34:18
B. Wadrich.....	1:30	32:58
L. Bodach.....	2:00	35:00

A Meet at Muscatine, Ia.

The wheelmen of Muscatine, Ia., are arranging a tournament for next Friday, to be held at the fair grounds. There will be three prizes offered in each race. In the open events gold medals will be given for first prizes. All other prizes will be articles of merchandise. The list of events is as follows: One-mile, novice; quarter-mile, open; two-mile, handicap; half-mile, boys under eighteen; half-

mile, open; one-mile, county championship; half-mile, Muscatine city boys under eighteen years; one-mile 3:30 class; one-mile, open; half-mile, consolation.

The Wicker Park's Road Race.

The ten-mile road race of the Wicker Park C. C., held last Sunday, was won by Henry Rathjen in 34 1-2 min. from the five minute mark. The time prize was secured by Leo Karpen, who covered the course in 32:08, starting from scratch and finishing in ninth place. The order of the finish and the times follow:

	H'd'p.	Time.
Henry Rathjen.....	5 min	34.30
W. B. Ryerson.....	6 min	36.05
Otto Hermann.....	2 min	32.09

Six Races at Pontiac, Mich.

Six interesting races were run Friday

For Agencies for the Celebrated

EXCELSIOR WHEELS

Address our MR. HADDEN, care "The Referee."

BAYLISS, THOMAS & COMPANY,

EXCELSIOR WORKS, COVENTRY, ENGLAND.

at Pontiac, Mich. J. A. Carpenter was referee and F. Boyd, Jr., was starter. The results were as follows:

One-mile, novice—Charles Lewis, Pontiac, 1; Chester Kelly, Pontiac, 2; Charles Justin, Holly, 3; time, 3:03 1-2.

Two-mile, club handicap—Charles Lewis, 40 yards, 1; E. A. Merritt, scratch, 2; D. C. Backenstose, 100 yards, 3; time, 6:17.

Half-mile, boys—Howard McCotter, 1; Claud Mattison, 2; time, 1:48 2-5.

Half-mile, open—P. E. Phillips, Detroit, 1; T. W. Cooper, Birmingham, 2; H. D. Osborne, Detroit, 3; time, 1:17 3-4.

One-mile, open—P. E. Phillips, 1; T. W. Cooper, 2; H. D. Osborne, 3; time, 2:55 3-4.

One-mile, handicap—P. E. Phillips, 50 yards, 1; E. A. Merritt, 90 yards, 2; H. D. Osborne, scratch, 3; time, 2:49 1-2.

* * *

The Grand Rapids B. C. Meet.

The first annual race meet of the Grand Rapids Bicycle Club was held at Comstock Park last Friday. About 500 wheelmen and their friends witnessed the races. The officers of the day were: Referee, A. B. Richmond; judges, P. S. Hunt, J. H. Taylor and E. A. Crozier; timers, E. E. Peck, F. M. Lee and F. M. Stirley; starter, H. W. Stebbins; clerk of the course, Fred N. Hyman; scorer, Frank H. Escott. The summaries of the day are as follows:

One-mile, novice—Charles Letts, 1; A. I. Saliers, 2; time, 2:55 1-2.

Three-mile, lap—Charles Letts, 1; Chase, 2; Souser, 3; Stadel, 4; time, 9:43.

One-mile, fat men's race—F. U. Garrit, 1; W. B. Folger, 2; W. M. Wells, 3; Dr. C. H. Holt, 4; time, 3:40.

Half-mile, open—F. S. Gilbert, 1; E. J. Curtis, 2; A. I. Saliers, 3; R. B. Hain, 4; John Hazenwinkle, 5; time, 1:26 1-2.

One-mile, Grand Rapids B. C. championship—Troop Richmond, 1; Frank Richmond, 2; time, 2:55 1-4.

Half-mile, heat—three heats—F. S. Gilbert, 1; E. J. Curtis and L. A. Hinman tied for second place; A. I. Saliers, 3; time, 1:23, 1:25 3-4, 1:21.

Quarter-mile, Grand Rapids B. C. championship—Frank Richmond, 1; E. J. Curtis, 2; W. N. Souser, 3; time, 1:42.

Five-mile, handicap—Troop Richmond, scratch,

1; Frank Richmond, scratch, 2; Charles Metts, 300 yds., 3; time, 15:00 2-5.

E. J. Curtis vs. ChSrls Rchmond—Richmond, 1; time, 3:05. Richmond ran a half mile while Curtis rode a mile.

In the evening winners of races and their friends congregated in the club house, at which time the victors were awarded their prizes, after which an oyster supper was enjoyed.

* * *

At Medford, Wis., Two Days.

During the Taylor County fair at Medford, Wis., last Friday and Saturday, several interesting bicycle races were held on the half-mile track, a quart r of which is up-grade. On Saturday the morning's rain made the track heavy and the times slow. A lantern parade in the evening ended the meet. The results:

FIRST DAY.

One-mile, hand cap—F. S. Benedict, Medford, 125 yards, 1; F. R. Zeit, Medford, scratch, 2; L. W. Gibson, Longwood, 75 yards, 3; time, 3:10 1-4.

Quarter-mile, best two in three heats—F. R. Zeit, 1, first and second heats; M. Bach, 2, second in second and first in third; times, 39 1-4, 39 1-4, 43 3-4.

Half-mile, 1:40 class—F. S. Benedict, 1; L. W. Gibson, 2; time, 1:34 1-4.

Half-mile, Taylor County championship—F. R. Zeit, 2; F. S. Benedict, 5; M. Bach, 3; time, 1:28.

Half-mile, flying start—M. Bach, 1; time, 1:45 1-4.

SECOND DAY.

Half-mile, handicap—F. S. Benedict, 60 yards, 1; L. W. Gibson, 35 yards, 2; G. H. Elvis, 60 yards, 3; time, 1:33 1-4.

Half-mile, 2:00 class—William Toonie, 1; P. Danielson, 2; time, 2:07.

Quarter-mile, open—F. R. Zeit, 1; M. Bach, 2; time, 1:42.

One-mile, handicap—L. W. Gibson, 175 yards, 1; F. R. Zeit, scratch, 2; F. S. Benedict, 175 yards, 3; time, 3:21.

The Trade in England.

LONDON, Sept. 24, 1892.—The forthcoming rival cycle exhibitions continue to engage the attention of the English trade. The manufacturers' display at the Crystal Palace next January is now styled the "National Cycle Show," and the secretarial services of Frank Peach have been secured. Mr. Peach is a member of the well-known firm of Peach & Doggett, 48 Holborn Viaduct, E. C., whose business enables manufacturers and agents alike to dispose of machines on the hire-purchase system without incurring either trouble or risk over their transactions. It is now evident that, as regards the number of exhibitors secured, the National show will rank as a success. The makers of accessories, tires, machinery, etc., are at liberty to patronize both shows, but the exhibitors of cycles at the Stanley show will not be allowed to send their goods to the Crystal Palace. I anticipate that a section of the public, and most of the agents from abroad, will visit the Palace, but the fact of the Stanley show having already taken place, and the absence of the powerful social attractions associated with the parent show, will reduce the gate far below last year's numbers. A meeting of makers will be held in Coventry shortly to endeavor to establish some *modus vivendi* between the Stanley Club and the rival exhibitors, but I fear it is too late now for much good to result. Next year, however, a strong effort will be made to regain the confidence and support of the entire trade so that only one exhibition will be held.

STANLEY SHOW PREPARATIONS.

The Stanley show preparations are proceeding apace. Overwhelming attractions will draw thousands daily to the Royal Agricultural Hall, which is easily accessible from all parts of London. The Rudge Cycle Company, which does the largest export trade of any firm in England, will show here. The surprising number of new and rising firms scattered about the country will all be found at Islington. It is their one annual opportunity of making a big, effective display of their goods, whereas the large viaduct firms maintain on view throughout the year, at their depots, an array of patterns which may be inspected at any time by their patrons.

The Stanley show will be advertised on a scale hitherto unattempted. Striking new posters of a large size, in five colors, designed by George Moore, will blaze from every London hording in a week or two. Each of the nine hundred cycling clubs in the country has been circularized concerning the show. The support of all sections of the press has been secured. During the show there will be held Bohemian concerts, lantern shows, a conference and discussion on new cycling inventions, demonstrations of cycle making and tire repair, lectures by experts on foreign tariffs and new markets for English goods, an exhibition of record machines with photographs of the riders, and a trick-riding championship. Experience, influence and a lavish expenditure combined, are bound to result in the colossal success which is confidently anticipated.

THE 1893 DUNLOP TIRE.

The other day I had the pleasure of

inspecting the 1893 Dunlop tire, about which the most tantalizing rumors have been current lately. It is a great advance on the existing tire, enabling a repair to be effected by an expert in five minutes, or by an ordinary novice well inside a quarter of an hour. In appearance, too, there is a great gain, as in future, in place of the drab mummy-like canvas around the rim, the elegant black enamel will be fully exposed. The security of the new pattern, too, is perfectly satisfactory, its shapeliness cannot be destroyed by clumsy repairs, and the use of solution for repairs is entirely confined to sticking the patch on the air-tube. The present flat rim is abandoned. A grooved U-shaped hollow rim will be substituted. The outer case, which is lined with canvas, is arch-like in section. The edges contain electro-coppered wires which are firmly gripped by the grooves in the rim when the tire is inflated. The air tube is easily got at by deflating the tire, squeezing the case at one point and pressing down its edges into the bed of the rim, when it becomes possible, at a point opposite, to slip the case out of the rim and entirely remove the air-tube. All this is done with the fingers alone, no tool being necessary. The novelty will assuredly prove a powerful rival to any tire at present on the market. The weight of a pair of tires, thirty inches by two inches, is only three and a quarter pounds. There are also some minor improvements of the valve and its mode of attachment to the rim. Altogether the oldest of the air tire making firms may be heartily congratulated on having at last presented the world with an ideal pneumatic tire. The 1893 Dunlop embodies two or three patents which have been bought up by the company.

ANOTHER NEW TIRE.

While on the subject of tires I may mention the Stratton & Nethercott pneumatic, which promises very well, and will be largely in evidence at the Stanley show. The idea is not brand new, but the application of it is highly satisfactory. It resembles an ordinary pneumatic on Boothroyd lines in a crescent rim. The running surface consists of a three-fourths-inch solid tire moulded into the pneumatic proper. The advantages claimed for the pattern—which has been freely tested by many Dunlop users and pronounced favorably upon—are immunity from injury by puncture, greater resiliency, absence of drag in ascending hills, freedom from side slipping, greater cleanliness through mud than with the ordinary pneumatic, and lastly, but by no means least, its moderate price. Roadster tires weigh six and a half pounds per pair and cost \$12.18 per pair. Racer tires weigh three and a half pounds. Of the durability of the tire I have no doubt. As to its comfort and pace, I must try it myself before I speak positively. The tires are being made by Waddington & Company, in special moulds of an improved design. They are claimed to be vastly superior to mandril-made tires. The address of Stratton & Nethercott is Hindon street, Pimlico, S. W. One word more and I am done with tires. The Preston-Davies tire has commanded a very fair share of adoption during the past season, and its reputation stands higher since it has been fully tested. Paul Hardy, who controls the Michelin tire in England, is not a little elated at the circumstance of both the road and the path world's records for

fifty miles standing to the record of his tires. Dubois did the path record on the 17th inst. at the Velodrome Buffalo, Paris, in 2 hrs. 11 min. 10 sec., and Begbie and Arnold, on a tandem, the road records of 2 hrs. 19 min. 9 sec.

TRIED THE FRONT DRIVER.

I pounced upon the new front driver this week at the Viaduct depot of the Rudge Cycle Company. It is an out-and-out safety. The front wheel is thirty inches geared to 62 1-2, and the back wheel twenty-four. The backbone, instead of curving, *a la* ordinary, as in the Crypto pattern, is as nearly as possible horizontal, the saddle being attached to an ordinary adjustable L pin. The driving gear, which has no chain in it, outwardly resembles that on a Marriott & Cooper geared ordinary, being encased in a steel box, but on a second glance is found to be rigidly attached to the left fork end, instead of to the crank. With a full roadster equipment, including effective mudguards to both wheels, the machine weighs thirty-four pounds. It is handsomely turned out, needless to say, and presents a very original appearance, its lines being more suggestive of a safety than those of any front driver safety on the market. The front wheels will be made thirty, thirty-two or thirty-four inches in diameter, to order. The gear consists of four cog-wheels, two large and two small, and on spinning the wheel it seemed to run smoothly and freely enough to satisfy any one. I hope to test one of the Rudge front driver safeties on the road during the coming winter.

A NEW SUNBEAM TRICYCLE.

John Marston, of Sunbeam fame, has placed upon the market a very beautiful pattern of tricycle, suited for a gentleman, or, by the removal of a stay, adapted for ladies' use. Of course it is an ordinary direct steerer in design, and its chief features are its lightness and exquisite finish throughout. It is not a cheap mount, being listed at \$146, but it is well worth its price for its quality. It weighs just over forty pounds with Dunlop tires—the weight of a heavy safety. Its points embrace a very narrow tread, a neat eccentric chain adjustment, long ball head, new fork crown, corrugated spoon brake, four bearings to the axle and the compact Abingdon driving gear, hollow rims, tangent spokes, together with mudguard, foot-rests and lamp bracket. The Carter chain case would add one and a half pounds to the weight quoted. This splendid three-wheeler is a worthy follower of the twenty-two pound Sunbeam safety I described some weeks ago.

I observe, in the issue of the REFEREE just at hand, that you describe a Crypto F. D. safety referred to by me therein as a thirty-inch instead of a thirty-six inch. The Standard pattern, the light roadster and the racer are each made thirty-four, thirty-six or thirty-eight inches in size, and no pattern with a thirty inch wheel is being made at the present time.

STANLEY.

The Airtite Tire.

The Airtite tire, a cut of which is shown in this issue, bids fair to prove one of the best pneumatics on the market, and already the company is making a strong bid for supremacy. The tire is very simple in its construction, having a wire in each edge and running the full length of the tire, which sets into the groove when inflated. The tire is repaired in a very simple manner. According to the company's circular, to open the tire, open the valve and permit the air to escape; pinch the sides of cover together (see left side of cut) and force it into the bottom of the rim. This will

make the cover project beyond the rim at the outer side of the wheel, as shown in right side of cut. The cover can then be brought entirely over the rim by the use of the hook as shown. To close the tire, put the valve stem through the rim and let the tube hang over; slip one edge of the cover over the side of the rim from which the tube is hanging; tuck the tube into the cover, replace the other edge and inflate the tire. It is certainly very simple and the sample shown a REFEREE man by Kirk Brown showed the tire to be made in a very perfect manner and of the best of material.

An Aluminum Lock.

We show this week a cut of an aluminum lock, made expressly for the bicycle trade by Slaymaker, Berry & Company, Lancaster, Pa. It weighs about a

quarter of that of the same size lock made in bronze, and is equally strong. It is self-locking and each lock has two keys. The all aluminum locks list at \$4.80 per dozen.

Peregrines to the Front.

The Peregrine, made by the Leicester Cycle Company of Leicester, Eng., has had some clever performances to its credit. It was on this wheel that J. H. Cocker of the Sheffield Sharrow C. C. rode 346 1-2 miles in the Bath Road Club's twenty-four hour road race, in which he finished second, though having no training. He went through on a single wheel, which never needed touching. It was also on a Peregrine that Tommy Edge made his great Land's End to John O'Groat's record, while Carlisle nipped the London to Liverpool record on the same wheel. Harris, too, has scored his many successes on the Peregrine.

Mr. Cocker was so well pleased with his mount that he sent the makers the following letter:

I desire to express my entire satisfaction with the Peregrine safety which I rode in the recent twenty-four hours' ride promoted by the North Road Club. I started as a novice, having made no arrangements whatever either for food or pacing, which fact placed me at a disadvantage as compared with the other leaders in that ride. My previous best performance on other makes was 150 miles. It is no slight increase from this to 346 1-2 miles. The credit is due to your excellent machines, than which I have never bestraddled a better. It never needed the slightest attention during the whole of the ride, neither was it a machine specially built for this event, but was an ordinary roadster machine weighing thirty-four pounds, and not even fitted with a gear case. Should you think fit to use this you have my hearty permission to do so.

Peoria Trade Items.

PEORIA, Oct. 4.—The bicycle trade in Peoria the past week was what might be termed good. This increase was occasioned by the state fair being held in this city. A large number of high grade machines and a still greater number of medium-priced wheels were sold by the different bicycle houses. This will be about the last boom the retail trade will have here this year.

Basil Riley, managing director of Bon-

TRIUMPHS ARE COMING!

Never came a wheel more quickly to the front in Europe than the
TRIUMPHS.

Speed, Strength, Beauty, Durability, Lightness, are the leading points of
TRIUMPHS.

These Genuine High-Grade Wheels will shortly be introduced to American wheelmen,
 and no doubt will soon become favorites.

TRIUMPHS
 For Speed and Easy Running.

[“Wheeling,” 7th September, 1892.]

The second big Danish road race “round Seeland” was started on the 1st September from Copenhagen. The riders had to pass nearly all towns in Seeland, the whole distance being 66 Danish miles (310 miles). The weather was very unfavorable, a western gale blowing, and showers falling now and then. Twenty-four started, but most of them retired during the night owing to puncturing and the awful weather. The race was not finished when this was written, but Randrup, from Jutland, was leading, and likely to be the winner. The time is very bad, of course. [We have just learned that the race was won on a TRIUMPH, and that the second man arrived nearly three hours after the winner.—Eds. W.]

TRIUMPHS
 For Lightness and Strength.

There is no better judge of a good machine than Mr. R. J. Meccredy, Irish champion and editor of the “Irish Cyclist.” Advising a correspondent he says: “The TRIUMPH is the best of those mentioned. We have had one in use for months, and it is a grand machine—light, strong and easy running.—Irish Cyclist, 31st August, 1892.

TRIUMPH CYCLE CO., L’t’d, Coventry.

These reliable WELDLESS and BRAZED STEEL FORKS are renowned throughout the trade. We also manufacture MUDGUARDS, STEEL CUPS, Footrests, SAFETY FRAMES and PARTS.

YOU USE THESE GOODS.

Send for our List at Once.

Butler's Cycle Fittings Company, Ltd., Birmingham, Eng.

The Telegram Pneumatic Tire.

We present herewith cuts illustrating the new Telegram pneumatic tire. It is simple in construction, and is being placed on the market by the Sercombe-Bolte Manufacturing Company. The company will apply it to its own machines or will apply it to rims for the trade. As shown in the cut, it will be seen that the edges of the outer cover are simply hardened and hooked in over the edge of the

rim that turns back on itself. After a great deal of experimenting a very light steel rim has been adopted. These tires will be furnished to manufacturers and jobbers at \$25 per pair with hollow rims, and \$20 per pair with solid rims. The solid rims, which are especially well made, will possibly be the favorite, both on account of the price and the lightness and rigidity, as owing to the peculiar shape

of the rim it has the same stiffness as though it were hollow. These tires can easily be deflated, the air tube removed, as shown in cut, replaced and inflated again in only one minute, it is claimed. There is no tire on the market lighter and more resilient, and as it has had a four months' test it can be positively relied upon as practicable and durable.

essential inventions used in the modern
OLD CYCLE CRANK.

Stokes Wants \$60,000.

Charles F. Stokes has brought suit against the Standard Sewing Machine Company for \$60,000. Stokes claims that he spent this amount in developing the Chicago business for the sewing machine company, and that when he had it moving along nicely and a good trade worked up the concern suddenly left him in the lurch. He now seeks to recover what he invested in building up the trade.

Thomas Sues Bidwell.

A despatch from Philadelphia says that Amos W. Thomas, inventor of the Thomas tire, has brought suit in equity against the George R. Bidwell Cycle Company, the Thomas Inflatable Tire Company and H. W. Sheibley, all of New York. The parties secured the right to make the tires on a royalty, and he alleges that no money has ever been paid him. It now amounts to \$40,000. He alleges that the defendants took advantage of him because he is weak-minded.

New Bicycle Concerns.

Within the past week three new houses have been licensed to do business in the bicycle line. The Bradley Chainless Bicycle Company of Albany has been incorporated with a capital of \$125,000,

divided into shares of \$100 each. The directors are James Bradley, Robert W. Shannon, Harrison W. Bullock and Camp Keller. At Denver the Sperry Cycle Company was incorporated by H. T. Sperry, W. L. Sperry and E. A. Sperry, the directors. The capital stock is \$20,000. Thursday last the Roddell Cycle Company was authorized to do business with \$2,000. Samuel J. Sloan, Arthur F. Leslie and Jennie V. Engstrom were the incorporators.

Knowing Thieves.

According to an English paper thieves entered the Wearwell Cycle Works at Wolverhampton and helped themselves to wheels. Finding but one machine ready for use, they gathered the parts and soon assembled another. Then they helped themselves to lamps, bells, etc., and left through the front door. The paper had no idea who the marauders were. Under the circumstances given they might suspect some of the employees.

The 1893 Garford Saddles.

The line of Garford saddles for next year embraces some twenty-two varieties, and is now ready for the cycle manufacturers. In making three-coil saddles they follow closely the lines of the three-coilers made by Brookes and other celebrated English makers. The full roadster Garford saddle for 1893 weighs under two pounds, and one of their scorcher tips the scale at three-

quarters of a pound. The new Garford factory approaches completion and will be under roof within three weeks. It is 40x100 feet, three stories and basement.

The Swift American Factory.

It has been known for some months past that the Coventry Machinists' Company intended erecting an American factory, but just where was a matter that was kept pretty quiet. Since some of the company's directors have been in this country it was a well-known fact that the site question would soon be settled. The following despatch explains itself:

RICHMOND, Ind., Sept. 29.—Alderman Maycock and Mr. Marrett of the Coventry Machinists' Company, England, have been in this city since last Sunday, with the view of locating a factory here, with a capital of \$200,000, one-third to be taken by Richmond capitalists. McHenry, the roller skate man, and George Knollenberg succeeded in getting \$70,000 stock taken by Richmond capitalists, and the contracts are being signed to-day. The factory will be built in the eastern part of the city and will employ 400 men. Richmond will have three directors out of five.

EDITOR REFEREE.—As much has appeared in the cycling press during the past few months bearing in one way or another upon the prospects of our opening a branch factory in America, it seems clear to us that our negotiations to this end have been regarded as a matter of considerable public interest. We therefore, now that affairs have assumed sufficient definite shape to do so, take this opportunity to inform the cycling public through your columns of the exact status of this affair.

It has been growing more and more evident to us, for several seasons past, that our rapid increase of trade in America would sooner or later necessitate such a movement as we are now making, for although we have been possessed of exceptionally good facilities for rapid importing and communication with our factory, we have, nevertheless, felt that we could give our trade better service were our factory nearer.

With this end in view, and with the intention of preparing ourselves to meet the future growth of our trade, and also to enable us to take a most advanced and aggressive position, we have decided to establish an American factory, making it in every way a counterpart of our English factory as to methods employed and goods produced.

The machines we shall put on the American market will be identical with those made in England as to quality of materials, workmanship and general design, and will be worthy to maintain the high reputation which our goods have held for so many years.

We shall confine ourselves entirely to the production of the very highest possible quality of work and most modern designs.

The plant will be located at Richmond, Ind., a city of almost unequaled railway and manufacturing facilities, and from here we expect to be enabled to deliver goods more promptly and more economically than from any other center we could select.

The construction of the buildings will commence as soon as plans can be prepared. Those first put up will embrace a floor space of 80,000 square feet, and will contain the finest, most expensive and modern machinery which can be purchased or built for our special purposes. We shall push everything with the utmost speed, and have our goods on the market in ample time for the season of 1893.

COVENTRY MACHINISTS' COMPANY.

New English Inventions.

These abstracts are prepared immediately after the patents are applied for by G. Douglas Leechman, consulting engineer, Coventry, England:

[All persons interested in opposing the grant of a patent on any one of the undermentioned applications may, at any time within two months from August 24, give notice in the prescribed form of such opposition.]

No. 17912. W. Bown and G. Capewell's "Improvements in inflators or hand air pumps for inflating pneumatic tires and other like purposes." Oct. 19, 1891.—The objects of this invention are to reduce the size of the inflator and at the same time increase the power of the pressure of air; to facilitate the return action of the piston and piston rod, and to provide better means for securing the nozzle of the inflator into the mouthpiece of the article which it is intended to inflate; and lastly to provide means whereby the said inflator may be used for carrying requisites such as are used by cyclists. Figure 1 is a plan view and figure 2 an end view of the inflator, and figure 3 represents a modification. A and B are two cylinders preferably joined together by the double flanges (C and D), and provided with a like number of suitable pistons and piston rods. The said piston rods are preferably joined together at their top ends by the stay (E), but they may be joined

nick & Company, Coventry, Eng., who manufacture Telephone cycles, has returned home after a two weeks' visit to this country. He contracted with Kirkwood, Miller & Company for Telephone cycles for another year. The Telephone during the past season has given very good satisfaction, and as a result Kirkwood, Miller & Company placed a large order for 1893 with Mr. Riley. The importers of the Telephone are now in possession of 1893 samples, and are in a position to talk terms and territory with intending purchasers. The gentlemen's wheel weighs, all on, thirty-four pounds, and the ladies' machine thirty-six pounds.

J. H. Sager of Rich & Sager, Rochester, was in Peoria last week with a sample of Sager Scorchers saddles. He left the western agency in the hands of a well-known dealer in this city. The Sager Scorchers saddle is a very neat and lightly-constructed saddle. It lists at \$5 and weighs two pounds.

H. G. Rouse was in Chicago the latter part of last week looking after wheels for 1893. From that point he went to Jacksonville to attend the races. Mr. Rouse is much sought after now by manufacturers and advertising agents. He generally buys considerable advertising space and any number of bicycles about this season of the year. Hence the demand.

American Ideas in the Majority.

EDITOR REFEREE.—The item in your Sept. 23 issue regarding the few American ideas used in English cycles conveys a wrong impression, one that I cannot permit to pass unquestioned. I had occasion several years since to look up this question, and without taking time to quote dates, numbers of patents, etc., will say that I can prove the following facts: The suspension wheel (radial wire spokes) was first made in the United States, and the tangent spoke was patented here before England made a bicycle. The rubber tire is an American idea, and hollow wheel rims are first described in an American patent. Tubular frame work for bicycles is first shown in an old United States patent, and the plunger brake first appears in another old United States patent.

To get down to more recent times, America gave the world the cushion tire, the hammock saddle, and improved that by adding independent springs at front and rear. We also were first to make butted spokes by drawing instead of upsetting the wire, and were first to make the double butted spoke. America made the first hollow forgings to connect the tubular parts. An American claims to have made the first entire frame of tubing and sheet steel, a claim I believe to be good. All the above-mentioned inventions are used in England, together with others of less importance, such as the square (Victor) and fluted square (Columbia) pedal rubbers.

Finally, America made the first successful ladies' bicycle. England is justly credited with the two most important inventions pertaining to cycling—the Rover type safety and the pneumatic tire; but I know of no other important inventions for which she should receive sole credit. I know that some claim for England the honor of first making adjustable ball bearings, the balance gear for tricycles and the geared ordinary, a claim that must be restricted to first introduction only, as these were all experimentally made and patented in the United States long before they were known in England. Everything considered, I claim that England uses as many American ideas in cycle building as we do of hers, and that America is entitled to credit for at least half of the

A Fair Field, No Favor,

And May the Best Man Win!

The work performed on the MORGAN & WRIGHT Pneumatic Tire proves that it has adequate durability and speed.

AT LIGHTNING SPEED. NEW LAURELS GAINED. BREAKS ALL RECORDS

HALF MILE ON THE BICYCLE GONE AT INDEPENDENCE IN :55 1-2.

J. S. Johnson's Record Time—Hundreds of Spectators Bear Witness to the Feat—Notch for the Mile to Be Soon Attacked.

INDEPENDENCE, Iowa, Sept. 17.—(Special Telegram.)—The Independence kite track has another world's record in the bright constellation of sensational performances which have from time to time sprung from the impress of its glistening surface. It is not a trophy to the prowess of a harness racer this time, but of something infinitely faster than any trotter or pacer may hope to become for a decade.

For the last three days a modest, unassuming young man, giving the name of John S. Johnson, and claiming Minneapolis as his home, has been seen about the track, usually astride a bicycle, and it has been noticed by the more observant of the track habitués that he could ride a little bit. Johnson has been invariably seen in the company of two other individuals and the fact soon became apparent that he was ambitious for championship honors among the cyclists, and that the men with him were his trainers.

Day before yesterday quite a ripple of interest was created by the story that got bruited about that Johnson had covered a quarter of a mile in :27 4 5. Consequently when the announcement was made that he would start against the world's record for the quarter and the half miles under circumstances that would make the performance perfectly legitimate and standing a crowd of several hundred people assembled at the track to-day. The preliminaries were arranged by the selection of the following gentlemen as judges: J. B. Chesbro, of Waterloo, Iowa, and C. A. Rosemond and W. C. Littlejohn, of Independence. F. S. Hillsiger, of Waterloo, acted as referee, and for timers the following consented to act: B. W. Tabor, O. O. Tibbetts, Independence; C. M. LeDue, Luverne, Minn.; J. L. Dougherty, Clinton, Canada, and John Hussey, Independence. All the above men are professional trainers of trotters.

Johnson came out at about 5 o'clock for a preliminary brush of a quarter of a mile, and to keep his pace up, C. W. Williams appeared behind his celebrated old running horse, Ned Gordon, hitched to a bicycle sulky. Johnson started at the third quarter, and pumped his way to the wire in 27 1 2 seconds, lowering his best record, which previously stood at 28 1-5 seconds.

Half an hour later, after he had been rubbed down, he again came out, and starting at the half-mile pole, he followed the runner home in 55 1-2 seconds, lowering the previous world's record for the distance, which was 1:00 1-5.

Not satisfied with the first performance he came out again at 6 o'clock and, starting at the half, rolled down to the third quarter in 26 3-5 seconds, being compelled to slow up because old Ned was not fast enough to get out of his way.

BICYCLIST JOHNSON PUSHES HIS WHEEL A MILE IN 2:04 3-5.

INDEPENDENCE, Iowa, Sept. 20.—(Special Telegram.)—John S. Johnson, the phenomenal young Minneapolis bicyclist, whose remarkable time on the Independence kite track for a quarter and half-mile electrified the riding world last Saturday, made another record look pale to-day in the presence of a good crowd. It had been announced that he would attempt to beat the world's record for a mile from a standing start, and elaborate preparations were made to have the performance correctly timed and rendered eligible to record. The following were chosen as timers: Fred Seacord and Judd Seacord, leading breeders of trotters, of Galesburg, Ill.; F. D. Stout, owner of Nutwood and proprietor of the Highland Farm at Dubuque, Iowa; M. Ladque, Luverne, Minn.; Sam Caton, Dubuque, Iowa, and C. A. Thompson, of Independence. For judges the following well known local bicycle men were chosen: J. W. Evans, C. F. Tucker and W. S. Tidbal.

Johnson came out at 5 o'clock in charge of his trainer, T. W. Eck, and his well-knit, athletic figure evoked many expressions of admiration from the crowd. The track was freshly planed and C. W. Williams appeared behind his running horse, Ned Gordon, to make the clip.

The first performance was a start against the best record for a quarter-mile from a standing start, which was 31 1-5 seconds, and Johnson easily made it in 30 flat. Twenty minutes later Johnson came out again fresh as a rose, ready for the greater spin of a full mile. The regulation bicycle track is one mile eighteen inches from the pole. The kite track here measures a mile three feet from the pole, and in order to have the performance safe and legitimate, Johnson was started ten feet back of the wire.

Dr. A. E. Spalding was chosen as starter, and as he said go, the watches snapped and Johnson launched out on his journey. The runner swung in ahead and the bicyclist trailed along snugly behind. The first quarter was not timed, as Johnson had already beaten it. The half was reached in 1:03 1-5, which was behind the record for that distance from a standing start by about a second. At the three-quarters the watches split at 1:34 1-5, beating the record for that distance, which was 1:35 3-5.

At this point Johnson shouted to Williams to urge the runner faster or get out of the way, and as Old Ned was already at the limit of his speed, Williams turned him out and Johnson passed him by a mighty spurt and came up the stretch alone, reaching the wire twenty lengths ahead of the horse in 2:04 3-5, beating the best previous record of Zimmerman, which was 2:08 4 5 from a standing start. The last quarter had been covered in 30 2-5 seconds.

JOHN S. JOHNSON COVERS A MILE IN 1:56 3-5 AT INDEPENDENCE.

He Takes a Flying Start—Two Running Horses Make the Terrific Pace for Him—No Doubt as to the Accuracy of the Time.

INDEPENDENCE, Iowa, Sept. 22.—(Special Telegram.)—On the kite track in this city to-day, John S. Johnson, the young cycling marvel from Minneapolis, knocked eight and one-fifth seconds off the world's bicycling record at the flying start and achieved the distinction of being the first person who ever wheeled a full mile below the heretofore impregnable two-minute barrier.

The officials selected to judge and time to-day's performance were as follows: Judges—W. C. Littlejohn, J. W. Evans and C. F. Tucker, bicycle men, all of Independence. Timers—S. L. Cates, of Dubuque, Iowa; Judge Seacord, of Galesburg, Ill.; J. L. Doherty, of Clinton, Canada, and C. A. Thompson, J. T. Martindale, and O. O. Tibbetts, of Independence, Iowa.

They Traveled at a Dizzy Speed.

As the flying pair rounded the turn the dust was not so thick, and a more adequate idea of the dizzy speed at which they were going could be noted. The half was reached in 58 3-4 seconds, and without a perceptible slacking of the clip the other runner was brought in and the journey continued. When the third quarter was reached the watches split at 1:28 1-2, showing that the speed so far had been well maintained. Up the stretch to the wire the contest took on the complexion of a hot finish between the horses as the two runners came up abreast, their drivers whipping and shouting to coax out a little more speed, until the very last limit of both animals had been spent. But it required but a glance as they neared the wire to see that Johnson was right behind and the runners couldn't open the gap by a foot at any part of the stretch. Indeed, before the wire was reached it became evident that the man could outfinish the horses were there room to get by.

Under the Wire in 1:56 3-5.

The watches stopped at 1:56 3-5 as Johnson rolled under the wire, and the herculean effort had been accomplished.

MORGAN & WRIGHT,
MANUFACTURERS OF RUBBER GOODS,
331-339 W. Lake Street, CHICAGO.

by any other suitable connection. The handle (F) is detachable and is hinged at Z to the stay (E), so that it will fold over and rest upon the cylinders (A and B), thus enabling the inflator to occupy a very small space. In order to fasten the handle (F) to the stay (E) when using the inflator, a slot or opening (Y) is formed in the said stay (E) (see fig. 2), the T-shaped piece (X) or its equivalent, which is fastened to the said handle (F), passes through the slot (Y), and by turning the handle (F) the said T-shaped piece (X) securely fastens the handle to the said stay. As a modification, the handle may be screwed in the stay, and when detached may be screwed into a suitable socket formed on the flange (D). An-

other method is applied to a single cylinder inflator. In this case the handle is screwed into the top end of the piston rod and a chain provided to connect the handle to the inflator when it is detached from the piston rod. Instead of employing a folding or detachable handle a tubular handle, as shown at H in figure 3, may be employed; or instead of the said handle (H) being made tubular, it may be formed so as to slide or take over the cylinder or into the piston rod or rods. These methods are equally applicable to inflators with two or more cylinders. Instead of pumping the air out of the two cylinders (A and B) through one outlet, as shown in figure 1, when desired one cylinder may be formed with an outlet into the other. The air then passes through an ordinary outlet, such as U in figure 3, such outlet being provided with a non-return valve. The outlet (V) of the inflator, as shown in figure 1, has a screw-thread formed thereon, onto which is screwed a cap (I) or its equivalent. Fastened to the said cap is a piece of tubing (J) for connecting the inflator to the article to be inflated. In order to securely hold the nozzle (U) of the inflator to the mouth of the article being inflated or anything connected thereto, a hinged ring (T) (see fig. 3) or other suitably-shaped holdfast held in position by a spring catch (S) or its equivalent, is secured to the said nozzle or any other convenient part of the inflator. Or instead of hinging the ring (T), two or more spring catches or their equivalents may be employed. For the purpose of facilitating the upward stroke of the piston there is connected to any convenient part of the piston rod, but preferably to the top thereof, a suitable valve which allows the piston rod to move more freely when making its upward stroke. If desired, the stay (E), which joins the piston rod, may be dispensed with and each rod actuated separately. The invention also consists in reducing the cost of manufacture by stamping or pressing the parts C, Q, R, U and I out of sheet metal or a combination of sheet metal and tubing or other suitably-formed material.

No. 17914. P. Davies' "Improvements in and to the wheels of cycles and other vehicles. Oct. 20, 1891.—The object of this invention is to provide a means for the absorption of vibration. To an outer rim (A) is fixed any suitable tire (Z). The rim (A) is connected by the spokes (B) to a metal ring (C), which forms the hub. A rim (D), of smaller diameter than the one (A) is carried between the spokes (B) and is connected to the hub (F), which is constructed in the usual way with suitable bearings by the spokes (E). Be-

tween the ring (C) and the hub (F) there is placed a suitably-shaped bag (G), composed of india-rubber or other similar material, and covered so as to prevent undue expansion or bursting. This bag, when inflated, forms a buffer between the inner hub (F) of the wheel of smaller diameter and the one (C) of the wheel of larger diameter. To limit the amount of play between the two hubs, and to prevent one wheel being partially revolved without the other, the two rims (A and B) are attached to one another by means of india-rubber, leather or like bands (H) at intervals around them. The bands may be stretched over and riveted or otherwise suitably secured to the rims, and are preferably 8-shaped in transverse section; that is to say, they go from the right side of one rim to the left side of the other, being crossed between the two.

Will Manufacture in Chicago.

A letter from Samuel Snell, dated Birmingham, Sept. 17, says that he will leave for America very soon and will commence the manufacture of lamps, bells and fittings of all kinds. Tools for the factory are now being got ready. Mr. Snell assures us that he will make some elegant patterns in lamps for 1893. Besides the manufacturing business Mr. Snell will have exclusive control of some of the best known firms of specialties, such as Thomas Warwick & Sons, Hudson's tubing, etc. The location for the lamp factory has not yet been decided on, but in all probability Chicago will be the place.

Two Stolen Wheels.

S. W. Clark, 310 Woodward avenue, Detroit, reports the loss of a King of Scorchers, No. 22,081. Jay A. Hinman of Oshkosh is also a victim, having had an 1891 solid tired Columbia, No. 17,575, stolen by a man giving his name as Henry Haase.

The Imperial Sulky.

In the races at Terre Haute the Imperial carried off all the honors of the day, these wheels being used in the sulkies drawn by Nancy Hanks in her record of 2:04 and Mascot in same time; also by Monbars and Flying Job, the former breaking Axtell's record of two years ago. The Imperial sulky weighs but thirty-six pounds, which is twenty-six pounds less than the pneumatic sulky

previously used by Miss Nancy in all her fast work. The Ames & Frost Company has certainly come to the front in this branch of its business and it will, no doubt hold its own against all competition. Twenty-six pounds gain in weight means a great deal to horsemen, and this in itself creates a large demand for Imperial sulkies.

Recent Patents Granted.

The following is a list of recent bicycle patents, reported especially for the REFEREE by W. E. Aughinbaugh, patent attorney, Washington, D. C.:

- 483,131, tire for vehicle wheels; John H. Bingham, Chicago, Ill.; filed Oct. 6, 1891; serial No. 407,888.
- 483,146, bicycle support; Francis Gleason, Philadelphia, Pa.; filed Oct. 29, 1891; serial No. 410,251.
- 483,238, pedal for velocipedes; Frederick C. Rockwell, Hartford, Conn.; filed Oct. 1, 1891; serial No. 407,431.
- 483,278, bicycle, William O. Wakefield, Lynn, Mass., assignor to F. W. Webster and Edwin W. Rice, Jr., same place; filed March 28, 1889; serial No. 305,152.
- 483,344, pneumatic tire; James H. Bullard, Springfield, Mass.; filed April 16, 1892; serial No. 429,410.
- 483,373, cycle wheel; Charles E. W. Woodward, Chicopee Falls, Mass., assignor to the Overman Wheel Company, same place; filed April 11, 1892; serial No. 438,638.
- 483,422, ice velocipede; Phillip H. Class, Northampton, Mass.; filed Feb. 16, 1892; serial No. 421,666.
- 483,493, pneumatic tire for cycles; Thomas H. Hicks, Detroit, Mich., assignor of one-half to George F. Case, same place; filed April 23, 1892; serial No. 430,299.
- 483,495, tricycle; Andrew Hunter, Chicago, Ill., assignor of one-half to John W. Ward, Postville, Ia.; filed Nov. 23, 1891; serial No. 412,778.

Where to Find "The Referee."

The news stands at the Astor House, Herald office and the stand opposite 21 Park Row, New York, are selling a good

many REFEREES. Copies can also be purchased at the REFEREE eastern office, 21 Park Row. The REFEREE reached New York last Saturday before noon. Western people going east, or REFEREE readers from any part of the country are invited to have their mail sent in care of our eastern office. English trade people coming this way are also reminded to make use of our New York address.

A Sulky Frame of Tubing.

One of the lightest sulkies in the world has just been made in Rochester by George Clark, a well-known local wheelman. It is a wonderful vehicle and was invented by Mr. Clark. Some of the most noted horsemen in the state have examined it, and in their opinion Nancy Hanks, for whom the sulky was made, will be able to reduce her present record of 2:04. It is made exclusively of steel tubing, and more enthusiasm has naturally been centered on the cart on account of the world-wide interest manifested in the alternating records of the wheelman and horse. The frame of the sulky is made of English weldless steel tubing and weighs only eight pounds, and the steel braces will weigh two pounds more. The vehicle is called the "Two Minute Sulky," and attached to it Nancy will again try for her record at Lexington, Ky., next week.

Some Good Results on the James.

W. S. Chestnut, of Mason City, won the ten-mile road race and Roy Donaldson came in second at Springfield, Ill., on Sept. 25. The Springfield *Morning Monitor* says: "This is the first time in the history of the club that both the Klaholt cup and time medal were won by men who live outside the city, Chestnut being from Mason City and Wykoff a New Berlin boy." Chestnut and Donaldson, who won the first and second prizes, both rode James wheels.

The *Cyclist* (England) of Sept. 21 says: "The Midland fifty mile record now stands to the credit of I. H. Reece, of the Speedwell B. C., who accomplished this time in his club's championship race on Saturday. His machine was a James with Dunlop tires.

The *Æolus* Cycling Club's road race last Saturday was won by P. P. Gregg, who rode a James road racer.

Says the Elliptical Wheel Is Old.

An English gentleman, well posted in the cycle trade, says the elliptical sprocket is only new as applied to the bicycle; that for many years it has been used by Shanks, of Glasgow, Scotland, in shaping machines, as a means for obtaining a slow-forward and quick-return motion.

Miscellaneous Trade Jottings.

Palmer, the Canadian crack, uses an elliptical sprocket wheel.

Tom Roe leaves in a few days to travel for the Ariel Cycle Company.

Mr. Hughes, of the Quadrant Company, is still in Philadelphia.

Thorsen & Cassady have concluded to handle the *Æolus* for next year.

The Raleigh Cycle Company has closed a contract with Harry T. Hearsey of Indianapolis.

Charles F. Stokes says the wholesale trade in all kinds of wheels is very good, but the retail is slow.

The McCune Cycle Company has contracted with parties who will take its entire output of wheels.

The Laing Cycle Company, St. Louis, reports the theft of a Century Columbia No. 6042, with red enameled rim.

Walter Keenan, Dayton, O., has made a contract with the James Cycle Company to handle the James, South Road

and B. & A. for that city. Mr. Keenan will form a company.

W. W. Taxis, the Philadelphia racing man, is having a Humber built after his own design. It is to be fitted with Air-tite tires.

Bonnick & Company, Coventry, Eng., through their representative, Mr. Riley, closed a contract last week with Bostwick of Toronto.

The Metropolitan Hardware Company of New York is closing out its bicycle stock, and next year will not be in the cycle business.

A gentleman who has had years of experience in cycle and saddle making is open for an engagement. His address is care of the REFEREE.

Warman & Hazlewood, Chicago, are agents for the celebrated Foley & Webb saddles, and are now carrying a big stock of the latest patterns, some of which are exceptionally fine.

The 1893 Moffat will be greatly improved and samples are almost ready. Mr. Fowler assures us that the new wheel will be one of the most handsome and perfect on the market.

The Union Cycle Company is now puzzled for a name for next year's wheel. Mr. Measure is authority for the statement that June 1 saw the factory cleaned out of wheels.

Warman & Hazlewood have purchased the business of W. N. Paterson and added it to their Manchester depot as a show room for their wheels. Mr. Paterson will manage the depot.

Howard A. Smith is just now swelling with pride over the great athletes his state has produced. He claims Corbett, Zimmerman, Brewer, the champion shot, and Willie Day, the champion runner.

Arthur Barrows, representing the Rudge Cycle Company, Coventry, arrived in Chicago Monday. He is now in Peoria with the purpose of closing with Rouse, Hazard & Company for next year.

L. Fewsmith, for many years a well-known Cleveland dealer, has joined the force of the Eclipse Bicycle Company at Beaver Falls, Pa., and will soon be among the tradespeople in that neighborhood.

The Brown Brothers Manufacturing Company is turning out some very nice models for next year. The Greyhound was a good-selling wheel during the season, and next year's output will be considerably larger.

One of the happiest individuals in Peoria is Frank Henning, the able manager of Kirkwood, Miller & Company's bicycle department. He has just returned from his wedding trip, and during the tournament was all smiles and good words for everybody.

The Marriott Cycle Company, of Birmingham, Eng., is open to deal with a few good firms, and from what we know of its goods we are certain they will sell well in America. Recently the No. 15 racer has been scoring splendidly. The office of this company is located at 71 Queen street, London.

The Chicago Bicycle Company is out with an advance '93 circular letter. The Worth Convertible Tandem and the Worth Twin Sociable occupy the principal portion of the letter. We quote the following from it: "We are glad to inform you that we have very satisfactorily proved the practical utility and wearing power of our new balanced gear for the convertible tandem, which enables the back rider to pedal in unison with the front one, and at the same time affords such a simple construction that the whole of the tandem attachments

THE METAL TURNING CO.'S MAGIC BICYCLE OILER.

Patent applied for.

We are now ready to supply these goods to the general trade, and claim for them the following points of superiority over any others on the market.

First: They do not leak, and are as clean to carry in the pocket or tool bag as a knife or wrench.

Second: You can get as much or as little oil from them as you need. When a drop only is required, place the feed wire where the drop is needed and press down. If a larger quantity is required press the bottom of the oiler, and the oil will flow freely from the wire. You do not need to waste oil and daub your machine with this oiler. And you can oil your wheel quicker than with any other.

Full size cut.
Patent applied for.

Manufactured Exclusively for

The Whitten-Godding Cycle Co., - Providence, R. I.

"PERFECT" POCKET OILER.

Full Size.

Best and neatest can in the world. Throws only a small quantity of oil at a stroke; no leakage; handsomely nickel-plated. For sale everywhere. Price, 50c. each.

"PERFECT" POCKET OIL HOLDER

Best and most convenient device for carrying an oil can on a bicycle. Thoroughly adjustable and easily attached to any part of the machine; no rattling; handsomely nickel-plated. Price, 25c. each.

CUSHMAN & DENISON
172 9th Ave., - New York.

"PERFECT" Pneumatic Pump Holder

Similar to oiler holder, but slightly larger. Pump is always convenient and vexatious delays avoided; handsomely nickel-plated. For sale everywhere. Price, 25c. each.

CUSHMAN & DENISON
172 9th Ave., - New York.

THE MOST NEWSY CYCLING JOURNAL IN EUROPE.

For really pleasing cycle reading, bright, chaty and light, commend me to the **IRISH CYCLIST**. Although it necessarily devotes much of its space to Hibernian affairs, it always contains matter of general interest, while its little stories and anecdotes are well seasoned with Attic salt. Mr. McCreedy would certainly satisfy Carlin's requirement in "able editing," the whole paper is stamped with his pleasant imprint.—The People, London.

The ablest edited and most newsy cycle journal in Europe.—Sporting Times, New York.

One of the smartest and liveliest of cycling papers.—National Press.

Mr. McCreedy's admirable cycling journal has pushed its way by sheer merit and enterprise into the very front rank of sporting papers.—Freeman's Journal.

Specimen Copy, post free, from **MECREDY & KYLE, 49 Middle Abbey St., Dublin.**
SUBSCRIPTIONS, POST FREE, SIX MONTHS, 6s 6d; ONE YEAR, 10s.

The best paper in its peculiar line published.—Irish Society.

Its literary fare is still as bright and interesting as ever.—Cycling.

Although some of our English cycle journals are reckoned pretty smart, they cannot beat it.—Hull Daily News.

Matter which from beginning to end is thoroughly interesting, not only to Irish riders but also to English wheelmen.—Liverpool Athletic and Dramatic News.

The most interesting of wheel papers.—Cricket and Football Field.

A credit to the country.—Belfast Morning News.

An admirable miscellany of everything interesting to cyclists.—Weekly Irish Times.

I. A. WESTON & CO., JANESVILLE (near Syracuse), N. Y., SAFETY BICYCLE WHEELS.

Wheels only. Solid, Cushion and Pneumatic. Everyone using our wheels can tell you about them. Send to us for lists with prices and discounts. To those going to manufacture bicycles later On, we shall be especially glad to hear from. Newmatics of any make wanted.

FOR SALE.
A 36 inch Crypto Geared Ordinary, geared to 63 inches, 1 3/4 Boothroyd tires, pump, tools and lamp. Has not been ridden 100 miles. A splendid roadster, fast and safe. Also a Lady's Phoenix, M. & W. tires, bell and lamp. Has not been ridden 50 miles. Also a Lady's Paragon, cushion tires. Ridden one season, and in perfect condition. Every one is a bargain. Owner must sell at once. Will send any machine C. O. D. with privilege of examination, upon receipt of express charges. Address E. H. W., No. 17 Clark Ave., Freeport, Ills.

A GOOD START

Was made early in '92. "IMPERIAL" parts and "IMPERIAL" frames, combined with A1 material did it.

SUCCESS WAS WITH

"IMPERIALS" from the start. It could not have been otherwise under the circumstances.

ALL AGENCIES

Established have been good ones. "IMPERIAL" agents, we call them. They will stick by "IMPERIALS."

WE COVERED THE COUNTRY

As far as our product would permit; quit trying to sell long ago and took care of "IMPERIAL" agents.

WE WILL HAVE FOR '93

Five times as many wheels; all "High Grade," but only need twice as many agents to sell them.

A GOOD TIME TO CONTRACT

Is now. Write us. We will give you all necessary information.

AMES & FROST COMPANY, MAKERS,

302-304 Wabash Ave., CHICAGO.

CHAS. H. SIEG M'F'G CO., Chicago Retail Agents.

can be taken off or put on in less than thirty seconds, when once accustomed to making the change, from a tandem to a single, or vice versa, and so in either instance securing the use of a perfect tandem or single safety as desired."

A rumor is floating about that two eastern manufacturing concerns are about to consolidate and manufacture under the same roof. Our representative is in possession of the names of the concerns, but cannot state the particulars until the deal is completed, as it is only being considered at present.

The Butler Cycle Fittings Company, of Birmingham, Eng., is in a position to supply the American market with parts in any quantity. The reputation of this firm is of the very best, and some of the bicycles made in England contain parts made by the Butler company. Mr. Westwood, manager of the concern, is a practical machinist and an inventive genius.

C. H. Weld, assistant manager of the Royal Cycle Works, Marshall, Mich., rode from that place to Detroit, 114 miles, in ten hours on Saturday. C. E. Gaus also made the trip. Though it was their first century they finished in good shape. They each rode one of the 1893 Royal Scorcher weighing twenty-nine pounds, and no trouble whatever was had with the light wheels.

A San Francisco firm writes the REFEREE as follows: "In a late issue of your paper we notice that you have an item to the effect that dealers on the Pacific coast pay freight on each machine and add \$5 to the cost. We think you have made a slight mistake, as the freight on a machine averages about \$7.50, the rate being \$8.40 per hundred pounds from Boston and New York."

The James Cycle Company reports that sales are being made every day of James, B. & A. and South Roads. Mr. Bridger says that no retail store will be opened on Wabash avenue, as contemplated, but that the present premises will be so altered and improved that room will be had to store nearly two thousand wheels. Mr. Bridger says that the James, B. & A. and South Road will be the lines for next year, besides the Mason saddle.

E. C. Stearns, of E. C. Stearns & Company, Syracuse, called Saturday on his way to Jacksonville to see the races, but more especially to have a talk with Johnson. Mr. Stearns reports that after his year's experimenting his firm is confident that the wheel it is about to place on the market this fall will be second to none. Four styles will be made, weighing twenty, twenty-five, thirty-one and forty-one pounds. E. C. Stearns & Company is one of the established concerns

in that state. For years it had been manufacturing specialties. The new factory for the making of cycles is 150x60, four stories high.

The result of the North Road 24-four hours' ride does great credit to New Howe machines and their riders. J. A. Bennett of the Anfield B. C. rode second, doing 352 1-2 miles, this being the greatest distance ever ridden on any safety bicycle in open road competition, and J. M. James, who rode fourth, did 339 miles.

Rain Spoiled the Milwaukee Century.

For weeks past active preparations have been under way for the second annual century run of the Milwaukee Wheelmen over the Watertown course. A great deal of interest in the affair had been manifested, and a number of outside riders were in the city ready for the start Sunday morning, but all were doomed to disappointment, for at the hour set for the start it was raining a perfect deluge, accompanied by a terrifying electrical display, which lasted until noon.

The road officers decided to postpone the affair until Sunday, Oct. 16, when the run will take place according to the arrangements previously made. But Morrison, undaunted by the rain and muddy roads, started from the club rooms at 7 o'clock. He rode the entire trip alone, taking dinner at Watertown and reaching Milwaukee about 8 o'clock in the evening. He was compelled to walk several miles at a time, as the rain made it impossible to ride through.

Martin Rotier, editor of the *Pneumatic*, has returned from a business trip to St. Paul.

Casper Sanger has about recovered from his recent illness, much to the pleasure of his numerous friends.

Fenton Fox, traveling representative of the Sercombe-Bolte Manufacturing Company, is enjoying a short vacation, having just returned from a trip through Nebraska, Indiana and Ohio.

Arthur Thompson, during the past season in the bicycle business at Janesville, Wis., has returned to Milwaukee and accepted the position of superintendent of the Automatic Timekeeper Company.

A. A. Hathaway, 112 Mason street, had his Rover roadster, No. 15,608, stolen. The wheel was the curved frame pattern, with extra long seat post.

JACK ROYAL.

Club Doings in Buffalo.

BUFFALO, Oct. 4.—The Comrades C. C. is now located in very commodious quarters at the corner of Best and Rich streets. It has now a membership of about sixty and is beginning to feel its strength. New men are entering this club at every meeting, and its fast men

are distinguishing themselves and adding honor to their club, so there is no doubt that by next season the Comrades C. C. will be equal to any of the older organizations in Buffalo. Much of the success and advancement of this club is due to the untiring efforts of the club's president, John Roedel, who by his energy and ambition has developed the material at his command in an astonishing and able manner.

Charles Callahan, captain of the Press club, deserves great credit for conducting the recent century, as it was the largest of any yet attempted in this town.

Saturday when Frank Klipfel finished the road race, he at once put on extra clothing and started off to make a century by going over the same course again, i. e., to Corfu and return, which he did, making the entire hundred miles in 8 hrs. and 10 min. On Sunday morning at 7 o'clock, in company with P. J. Knapp, he left Buffalo for another century over the Dunkirk route. He arrived at his destination at 11:45 a. m., giving him twenty-three centuries thus far for the season and putting him on a tie with Foell, of the P. C. C. Centuries were made over the different routes yesterday by a party of wheelmen from Akron and Tonawanda, also by members of the Ramblers and Press.

WILLIE DUNN.

Peorians to Make a Century.

PEORIA, Oct. 4.—The Peoria Bicycle Club gives its second annual century run next Sunday. About forty members have signified their intention of making the run. A souvenir is always given to every member that completes the century, and nearly all who start will try and make the hundred miles before giving up. The start will be made from the club house at 3:30 a. m., and the "push" expects to get back in time for dinner. The average rider, however, will not reach the club house until evening. All members are cordially invited to make this run.

Mortimer Redman, formerly a resident of this city and secretary of the Peoria Bicycle Club, has taken up his residence in Washington, D. C., where he will engage in the life insurance business.

Decidedly Against a Change.

ROCHESTER, Oct. 3.—Professional racing, it seems, has been many times experimented with, with suicidal results, yet the Spalding scheme is endorsed by Zimmerman, Taylor and other crack racing men, who pledge themselves to sell their amateur status to the syndicate which Spalding represents. If the project should materialize and the fastest men of the United States enter the professional arena, there will be plenty of

men to step forward and take their places in the amateur ranks and vacated by them in their bright anticipation to get the gold that will, perhaps, be put up by the syndicate.

In speaking to the local representative of the REFEREE, C. J. Iven, an old and well-known wheelman said:

I do not believe it will go through, and furthermore I do not favor cash prizes. I think, if introduced, they will tend to lower the present high standard of bicycle racing by making it a gambling game. Cash prizes were tried a few years ago, and what was the result? Bicycling racing degenerated, and it took a long time to recover from the effects. What do Spalding and his crowd care for bicycling as a sport? Once let them get control of it and wheeling contests would sink as low in public estimation as has base ball under their management. I do not believe Zimmerman will sacrifice his membership in the L. A. W. and the benefit he enjoys therefrom and the comparatively small amount he might receive from Spalding's crowd. Why, Zimmerman has won not far from \$10,000 worth of prizes this year, including the \$1,000 team of horses and carriage he captured at Springfield a few days ago. Could he do as well racing for money? You ask of what good are his prizes if he cannot convert them into cash or something substantial? Well, if he can keep up his present gait he will win as much more next year and then he can snap his fingers at the L. A. W. and sell his prizes. Nevertheless, I would not mind Zimmerman, Windle and the other fast men going in with the syndicate. It would bring other amateurs to the front, speedy men who are now loath to compete in big events because Zimmerman and his contemporaries enter and carry off all the prizes worth having. They are just laying for what they can get. I want bicycling kept up to its present high standard, not degenerated into a money-making scheme.

The second annual lantern parade given under the auspices of the Yonkers Bicycle Club took place Thursday night, two hundred wheelmen, including the Kingsbridge club, Mount Vernon club and guests from other organizations and members from various sections took part.

The Chief Sinners.

While the racing board has been chasing the festive salaried amateur artist aimlessly around, did it ever occur to the members that to stop a disease it is necessary to commence doctoring at the root of the trouble? Therefore, would it not be well to deal in a heroic manner with the fountain-head of all the trouble—the manufacturers and agents. The man who accepts the stolen goods is punished, but the man who steals the goods is allowed to go scott free! The man who gives or sells the Indian whiskey out in Oregon is severely punished with imprisonment, and the Indian goes free—not because he don't know any better, for some of those "noble red men" are cute to a degree. So the L. A. W. racing board adopts an entirely opposite course; it meets the wealthy manufacturer at lunch, cracks a bottle and sympathetically asks the wealthy one if he ever paid Johnnie Jones anything for that mile record, or for winning that team of mules and that graveyard lot. The wealthy one (if smart) will dodge the question, through previous arrangements, and will compliment the L. A. W. and its racing board on the purity of the amateur race path; the good work the league is doing in chasing the innocents, etc. Then Johnnie Jones is pronounced pure and free from financial germs. If the racing board and the L. A. W. wish to stop what they would have us believe they do, they would go to the root of the trouble; they would first investigate the manufacturer, the fountain-head of the disease; suspend him a little or make it sufficient cause to bar his wheel from the path unless he could show a clean bill of health. That

would settle that part of the business. But would the L. A. W. have the moral courage to do that? I trow not; the league and the manufacturer are too closely connected in some instances to allow such an impertinent proposition. A circular asking for information does the work better, and the board can afford to be severe and stern with Johnnie Jones; he is a financial and social nonentity. Farcial, hypocritical racing board.

Charles P. Sisley on Amateurism.

I am in receipt of a letter from C. P. Sisley, editor of *Cycling*, London, which in my mind would prove the greatest endorsement the cash prize advocates in this country could wish for, if the editor had not marked "private" that part which should be made public. Mr. Sisley says his editorial, published

facturing Company in Boston, whose agent he was. Pit was staggered when he was told that Worcester made bicycles and that the firm was Hill & Tollman; that one Green, who had recently come from England full of the manufacturing spirit, had persuaded Hill & Tollman to back the enterprise. The first wheel made weighed about sixty pounds and was made of gas tubing—had very thick spokes—and on this all the members of the firm learned to ride in a quiet spot. Pitman was soon in pursuit of the illicit factory and advised the firm to go and see the colonel before becoming wealthy. So Tollman took the advice, and instead of manufacturing, Hill & Tollman became Columbia agents in Worcester. That's a bit more history in which the "old vet" figures. At the Philadelphia cycle show "Pit" made a speech having for his seconds and "bottle holder" Kennedy Child and Frank Egan. In that speech the old vet said, speaking of the pure period:

"Those were the days of the pure amateur, truly. We raced and paid our own expenses, and thought a \$10 prize a satisfactory reward for winning. Why,

and sent same to the genial Columbia bicycle president, deploring the fact that he should be used in such a manner. Here is what the colonel said in reply, in his well-known handwriting:

MY DEAR SIR:—Thank you very much for your polite letter of the 5th inst., calling my attention to the error of the "Recorder" in publishing my picture for that of Minister Egan. We are doing great deeds with pneumatic tired bicycles, and revolutionizing the sports of the turf by the use of Columbia pneumatic tires on sulkies; we are "riding on air and racing with the winds." As the affairs of Chili have been rather windy of late, possibly the editor got the idea of diplomatic wind mixed up with pneumatic tires and thus fell into the error. At any rate, your kind note is appreciated.

With best wishes,

ALBERT A. POPE.

It is no secret that Colonel Pope is the most popular and appreciated man in cycling in America to-day, and many a time at tournaments I have watched the enthusiasm his presence created. The most lowly can always expect and receive a genial hand-shake from the president of the Columbia company, be they riders of blue rims or not. The man is enshrined in the affections of the American cycling public as no other is, and it will be a sorry day when we lose him. I used to roast the Columbia monopoly, and have written pages antagonistic to what I thought was a monopoly in those days, but I did not know the man, and not having received one cent from the Pope Manufacturing Company outside of what I earned from it, I am under no obligations to the company. But I can find room for admiration for such a sport-helper as Albert A. Pope.

Editor R. J. McCreedy.

It is not often that you find an editor of unusual ability a crack racing man, and the path does not afford many instances where the wielder of pen and shears attains championship honors on the path; but in the case of the Dublin editor, R. J. McCreedy of the *Irish Cyclist*, we find a busy editor right up in the front racing ranks. I know his methods—or rather lack of methods—in training, having seen him try to get fit in Dublin in 1887, and it was hard work all day and a few stolen moments in the evening for training purposes. N. H. Van Sicklen is as near like the spectacled Irish editor as can well be in his training methods, and has been quite as successful. Many an evening the writer has plugged around a track with "Van," after his hard day's work was done. I think such men should be given more credit for their performances than the man who makes a specialty of the game and lives on the track the best part of the day. I have often wondered if the bespectacled pair, Van Sicklen and McCreedy, would ever retire from the path, and by a letter just received from the gay Dubliner it looks as if he will be at it again next year. McCreedy writes as follows:

I enjoy reading your contributions to the American papers very much, and I am glad that you appreciate the "Irish Cyclist." I show no signs of failing yet on the race path, and I fancy I will continue as long as I am able to hold my own. This year I would have done well but for a series of misfortunes. I ran stale before the N. C. U. championships; then just as I was getting right and had beaten Adams and Schofield, etc., I got blood-poisoning in my arm. When I was recovering from that I started racing again and beat Arthur du Cross and others. I then went to Scotland, but caught cold going over, and got very bad neuralgia, which kept me awake every night while I was there. Notwithstanding this I beat Harris, Schofield, MacLaren and Vogt, but got a bad fall at one meeting, which compelled me to stop. Cycling circles have changed greatly since you were here, and very many of the old faces are gone. Yours very truly,

R. J. McCREEDY.

There is something pathetic in "very many of the old faces are gone." I was looking at a group of pictures of about sixty of us, the other day, taken at Pow-

W. C. Sanger, mounted on the Sanger racer, made to measure only.—This cut of W. C. Sanger shows the popular Milwaukee flyer in a racing position and going at the top of his speed. It was taken from an instantaneous photograph and is the first picture of the kind ever taken.

in the REFEREE, on "Humbug—no More" is applicable to both path and road racing in England. The English editor is hot under the collar over the apathy shown by the English amateur governing body, and we can look out for a merry war led by *Wheeling's* and *Cycling's* heavy fighting guns. I can not see, however, why Editor Sisley's letter should be marked private, and for the true interests of the sport it should be made public. But all I can do is to ask the author the privilege of giving to American cyclists what is known already by all, and that is that amateurism is not amateurism any longer. Humbug? Yes, just a little!"

The Old "Vet," Pit.

The recent discussion about Pitman reminds me that while in Worcester last spring I was told that Pitman was the first man ever seen in Worcester on a bicycle, about 1878. Pitman startled the city by riding along the streets, and announced that the only bicycles manufactured were made by the Pope Manu-

I remember the first race I rode in New York. It was in the American Institute. I rode a Columbia and the colonel paid my expenses."

Kennedy Child called time on the old vet and Egan threw up the sponge; their man was hopelessly drifting to the bad, and the colonel present, too. But Pit is a good boy and was as pure as any of them.

The Colonel and Minister Egan.

The friends of Colonel Pope were justly indignant last week on seeing the well-known picture of the "Father of American Cycling" used by the *Recorder* to represent Minister Pat Egan of Chili. Now, I never knew there was anything Irish about the colonel, and as a scheming diplomat he would be much out of place. The colonel hits too straight from the shoulder to be minister to a one-horse country like Chili; he could whip the Chilians single-handed. So when New York read Minister Egan and saw Colonel Pope a loud protest arose. The writer clipped the article and picture

THE WHITE ELEPHANT OF THE L. A. W.
THE PRESIDENT: "Wonderful; wonderful. But, my goodness, how it does grow!"

erscourt Falls, outside of Dublin, and four out of that happy throng will not answer the roll-call again. The bright (rightly named "energetic") brother of the editor of the *Irish Cyclist* was one; Woodside, senior and junior, and Ross, the agent, are three more. Possibly others of that group are no longer with us.

Respects to Frank Egan.

In the last issue of his pneumatic sheet Frank Egan deals the writer one of his favorite below-the-belt blows, while in two other places printing eulogistic notices of him. The cause of Egan's wrath was my article on Crowther's treatment by the Philadelphia paper, and while writing the same in the spirit of fair play, I was prepared to have Egan hurl that old chestnut roast at me. One of the grave charges preferred against me by Frank is that I was once an undertaker and buried people for a living, and in truth I have planted people before breakfast just as smart as "Aranza." But then, that is a dead issue—so are women cyclists in racing. We must deal with the present and live issues. Regarding women, if my idea of woman was not more exalted than that held by Egan, I would and could preach a little sermonette on that, entitled "Learn the Truth." But that is not cycling. Mr. Egan's sympathy with my desire "to live down former mistakes" is touching, and I appreciate its true worth, after reading the introductory remarks to the "roast." Mr. Egan does not attempt to controvert my

article on the paper's roast of Crowther, but in a letter Egan tells me that "if I knew all I would not be so positive," and that he is "awfully near right at times, and this is one of the times." With due respect to the roastologist, I do not think Frank Egan was within a mile of the right road when he published "Learn the Truth." Frank Egan is proving himself to be a regular Hermann in scientific journalistic slight of hand juggling, but if my future success is to be carved out through the forbearance and mercy of Frank Egan holding anything back of more discredit than the "crimes" I am charged with, I beg of the "commentator" to enlighten the world with another "learn the truth" article. It has been generally supposed that Frank Egan and myself had formed a mutual admiration and roastology society for advertising purposes, but I can assure an anxious public that such a thing does not exist, for I believe in consistency. Egan doesn't. On the cash prize and amateur question we agree, and on one or two other things, but I do not believe in unwarranted abuse as practiced by the lively Egan.

Pneumatic Scheme No. 2.

The cash prize scheme, which is said will be fathered by the *Sporting Life*, may be a go the coming year, but I am willing to risk a prediction that it won't. But the scheme has proved valuable from an advertising point of view for Professor Egan and the *Life*. Now we are treated to scheme number two in the shape of a special car tendered the

"kings of cycling" for a trip west. This is a trifle inconsistent, too. The *Sporting Life* has roasted amateurism all summer; now it proposes to send the amateurs to a warmer climate this winter because they will furnish a first rate advertisement for the *Sporting Life* scheme. The enterprise, though, is very praiseworthy and is easier than the professional league scheme, but the rule of inconsistency crops out very forcibly. Egan writes me regarding the plans and makes the startling announcement that he has "more shots of the same kind in the locker," and to keep an eye on the professor so we can expect a lot of sensationalism from Quakertown this winter. *Vive le roi!* Well, let's hope they will, if consistent with Egan's teachings.

MORGAN.

The Belle Lap.

Bliss' Baltimore Trouble.

Bliss, the Chicago man who made his appearance in Baltimore at the Maryland Club's meet, and who scored such excellent records in the 34-class quarter and 2:25 class races, winning both, will

not be awarded the prizes he was supposed to have won. Chairman Raymond of the national racing board handed down the decision last week.

Bliss, it has been discovered, was not eligible to either of these two races, as he on previous occasions had made better records than the class limit specified. Handicappers Gideon of Pennsylvania and Goodman of Connecticut both wrote in testimony of this fact to the national racing board. This little incident will serve as a warning to would-be record-jumpers in the future who seek to take advantage of handicappers by making their real records and running in classes where they have no business.

Without these class races the cycle track would soon lose its attraction for the great body of people who now patronize the races. To have one or two men crowd into each event and win time after time, as would be the case without the class limit, which freezes them out, the contests would grow tiresome to the spectators and discouraging to less experienced or less expert riders. If such men as Zimmerman, Taylor, Tyler and others of their class could go in all races put upon the meet programme, where would the rising talent be? The incentive which urges the men to contest would be gone, the races would be flat and the patronage soon dwindle away. Bliss had no business in those races, and the decision against him is but just to the other riders.—*Baltimore Herald*.

Horace Bell was in New York during the week.

CHEAP

Only one thing CHEAP about the
CLEVELANDS.

It does not cost much to sell them. After a man rides the "Thread Tire" he talks about it to his friends. It's different, you know. **CLEVELANDS** are fitted with the Cleveland Pneumatic only.

GOOD ROADS DEPARTMENT.

"What are all those magazines with the wrappers around them?"

"Copies of *Good Roads*."

"But why thus neglected?"

"Because there is nothing in them of interest to us."

Brief but very suggestive was this conversation, which occurred recently in a cycle store. There is nothing new about it. Every one knows that by forwarding a copy of each issue of this work to every member the league throws away so much money each month. The management has shown a lamentable lack of the methods usually employed in placing a new publication before the public. It has relied on the enthusiasm of individual members, clubs and divisions to swell the subscription list. It has made comparatively few efforts to place the journal where it belongs—before those classes which would be benefited by improvements, but as yet can not see it in that light—men who think only of the taxes and give no thought to the benefits to accrue.

The paper started out with great prospects, made greater in the eyes of league members by hiding some of the conditions attached to munificent donations. The great expectations have not been realized and unless a change takes place the magazine will shortly have become as great an elephant on the league's hands as it is at present a failure so far as the objects for which it was founded are concerned.

Thirty thousand copies, roughly, are sent to league members. Two-thirds of these are of no use—money thrown away, seed sown on stony ground and producing literally no return. The management of *Good Roads* and the executive committee of the league know this—are bound to know it. If they do not they can easily test the truth of the assertion by inquiry. It will be remembered that the league *guaranteed* at the outset of the journal's career the sum of \$6,000.

Where is that \$6,000?

Far, far away.

And "twill never come back."

The amount guaranteed was used up in next-door-to-no-time and soon a second like sum will have gone the same way.

Where, meantime, are the thousands alleged to have been given by manufacturers of bicycles—on whom, by-the-way, the management had no more right to call than on makers of buggies and steam rollers, owners of gravel pits and contractors? It now appears that one

"guaranteed" so much, on condition that it was "necessary," while another contributed only on condition that somebody else gave so much, and so it goes. As to the support the journal is receiving from other sources, if every advertiser paid at the same rate as the bicycle makers, money would be plentiful. But they do not.

Three people only seem to be benefited by the publication of *Good Roads*. They are, first, the printer, which gentleman, be sure, is in clover; second, Mr. King, the advertising man, who draws a liberal percentage on all business, regardless of gains or losses of the management; third, Mr. Potter, editor, to whom is paid \$5,000 a year, same conditions as Mr. King, except that should enough business be done Mr. Potter shares in the proceeds until his salary reaches \$6,000. On this basis Mr. Potter holds a contract for either three or five years, we are not sure which.

This contract was made, we understand, on condition that Mr. Potter gave the work his entire time and attention. He may have done so, but it is hardly likely, inasmuch as the law firm in New York and the real estate firm in Brooklyn, of both of which he is—or was—a member, still carry on business under the same name, and with no apparent change.

The work so far displayed has hardly been creditable. Mr. Potter is a lawyer,—probably fair to good; he is a statistician—good; but he is not an editor except in name. It has been said that the successful editor is the man who knows what to leave out, rather than he who knows what to put in. If Mr. Potter had exercised better judgment in that respect his rating would be higher.

Taken altogether, we submit that Mr. Potter is on a very advantageous footing; that a great mistake has been made in the conduct of the roads department; and that the money so far used could have been far more judiciously expended than in supplying 20,000 copies monthly of arguments in favor of good roads to men who are as earnest advocates of the same as is the editor himself.

THE CASH PRIZE LEAGUE.

Assurances reach us to the effect that the proposed cash prize league is sure to be one of the institutions of 1893. It is further asserted that it will not be antagonistic to the league. So far, good. The L. A. W. does not cater to professionals—for as such, no matter what the new association may call them, will the league class all members of the new body. The league has been urged, at one time and another, to assume the control of professionals, the advocates of that idea believing that races for money could be run honestly if they were taken in hand by some body able to punish offenders. It has paid no attention, however, and cannot now complain if some other association comes into the field.

A league for the government of professionals, properly conducted, will, we think, prove beneficial. It will at least enable the L. A. W. to enforce its amateur rule, and bar from its races those men who, by reason of "expense" abuses, are better able to fit themselves for competition than the man who earns his daily bread by labor in other fields.

It is fair to presume that the founders of the new league are not working in the dark, and have assurances of some sort from some of the riders that they will be on hand to compete when the proper time arrives. In that event we may have the pleasure of saying goodbye, before 1893 closes, to many men who have been allowed to compete as amateurs though possessing no real claim to that title—good, hard-working fellows

in their way, but masquerading, through no fault of their own, in wrong guise. In their proper sphere they will get more racing, be beyond the reach of critics, and, if they conduct themselves properly, will retain every bit of respect which the public now has for them.

Does the vocabulary of some American cycling journalists contain such a word as "rot"? Read this: "What a lucky thing for English pride it is that Zimmerman has turned out a world-beater. It enables Englishmen to say that if he had not been one he never could have ridden away from their fastest men as easily as he did."—Scottish Cyclist.

Yes, Jimmy is a world-beater—he has beaten all the cracks on this side and the other side of the water. We might add that there are a full half-dozen men in America who can get away with the fastest of the English riders, not barring F. J. O., either.

NOTES AND COMMENTS.

The Hartford Y. M. C. A. secretary says that "the great enemy of a proper observance of the Sabbath is not the saloon, great as that is. It is the bicycle. It is our opinion that the bicycle causes more young men to neglect church and Sunday school than almost anything else."

What rot! It is absolutely amazing what curious things one does meet with when he does not have his gun handy. Someone should labor with the backwoods secretary of the Hartford Y. M. C. A. The good that this mighty organization has done for humanity is as unquestioned as is that which has been performed by the church at large, but it has not been done in either case by men bearing the stamp of such hereditary dogmatism such as is evinced by the Hartford man. The good that both organizations have performed has been in a great measure forced upon them, particularly during the past twenty-five years. Had it not been for the college, the district school and the newspaper, the Y. M. C. A. could not have existed, and the church would still have held the power that made the old world (and America likewise) a place well exemplified by a literal hell a hundred years ago.

The Y. M. C. A. is composed of young men—supposedly bright, pushing, reasoning young men—and an emanation from a prominent secretary of the society will no doubt set them thinking. I am well assured that the one at the head of this article will not redound to the credit of either its author or the order he represents. Religion is a great and grand thing, but the religion of the last half of the nineteenth century is not one of books, gowns or dogmatisms. It is one that teaches the right of all men to be free and equal, to worship according to his conscience and in the manner which he finds the most fit. If the contribution baskets of the church and Y. M. C. A. suffer in consequence, let them look further than the seductive "rig" and the still more seductive bicycle. Stop the wail that innocent recreation is employing the sanctuaries, for all nature is as glad, as sorrowful and as busy on the seventh day as upon any other. Brighten the churches, feed men on the meat of intellectual discourses, good music and a joyful life-loving, pleasure-giving faith in mankind, and a future full of joy and gladness, and not on the milk of woe and fear made more impressive by sombre, silent houses of worship, superannuated preachers and ghostly music. Don't peach hell here and hereafter and don't pass the basket too often. Life here below is not too full of joy; neither is there too much comfort. Attend to the soul's welfare in a clean and healthful manner, and don't demand too much of frail humanity. It seems to me that the comparison made by the no doubt zealous secretary between

whiskey—the greatest of body and soul destroyers—and the bicycle—the greatest of all *body* (at least) improvers—is rather overdrawn. In the words of the immortal poet, I am strongly inclined to think that the secretary "don't know what he is talking about."

* * *

DIFFICULTIES IN THE TRADE.

I am credibly informed that Pope has formed a partnership with the makers of the elliptical sprocket. I am surprised to learn that one so astute as the redoubtable colonel should still believe in the "lifting himself by the boot strap theory." Natlless, I doubt not that the small makers will suffer as usual. It is amazing what little hard, common sense is evinced in the bicycle trade. Apropos of this I have just heard of another cycle concern that has given it up. Cause, big discounts and big credit to unworthy patrons; and so it goes. How long will this thing last?

It would seem that no amount of warning or experience can teach the trade the folly of doing business in the slack and unworkman-like way which has been so long the curse (like Democles' sword) hanging over the heads of maker and dealer. Failure after failure, loss after loss, have signalized the bicycle business during the last three years, as being about the most unsafe thing that one could invest his money in—and still no change. It is time that bicycling as a money-producing business be placed on a solid basis, and the cycling press should use its influence to that end.

LA COTE MAL TAILE.

A Division Fight in California.

There is a lively fight now on in the California division, and beginning tomorrow the election of officers will continue one month. Everything has not been pleasant among the members of this division. The present officials, or their side, have had control of league affairs for a half-dozen years and a strong effort is being made to oust them. As stated in last week's REFEREE, a new ticket was nominated at a meeting held at the San Francisco Bicycle Club's house. At this meeting a platform was also adopted, in which the work of the national body in road improvement was recognized as of paramount importance to all classes of persons, the newly organized California Associated Cycling Clubs was welcomed as a valuable auxiliary to the division, a separate division for Southern California was favored, and "we consider it essential to the welfare of this division that the administration of affairs be taken out of the hands of those who, with reckless disregard of public opinion, have so long prostituted the division to their own selfish purposes, and, refusing to heed the popular demand for their retirement, are now desperately struggling against the wave of unpopularity about to engulf them, and, by a pretended surrender of the principal office, are seeking to support in the remote sections of the state, where their misdeeds are not known and undisturbed."

"Pop" Worden Leads.

In the Recorder piano prize contest race for the most popular cyclist in New York, G. Minturn ("Pop") Worden leads the dozen cyclists voted for with 4,000 votes. Some of the contestants, Albert, the professional for instance, are evidently buying heavily of *Recorders* for the sake of the coupons which are used for ballots, as many of the competitors are known but little by metropolitan riders. And still their votes run up in the thousands.

the cycling events created the greater enthusiasm and was no doubt the magnet of attraction for the large crowd in attendance. The whole affair was managed by the boys, who took every precaution to have each event pass off in the smoothest possible manner, and their efforts were more than successful.

The programme opened with a one-mile novice race, which was captured by a dark horse, Edward Vogel, with William Murphy second, and Charles Ide third; time, 2:55. This race gave a fine exhibition of pretty riding, with an exciting finish.

In the quarter-mile dash six starters faced the flag at the quarter pole. Frattenger won in 37 2-5 sec., Howie second, and Vogel third. Edward Vogel was victorious for the second time in placing the half-mile handicap to his credit, with Frattenger second, and Anderson third; time, 1:12 1-5. Kuensel, who finished second in the Waukesha road race, was the only scratch man.

The day's sport closed with a three-mile handicap, which was won by L. Klug (175 yards), Frattenger second, and Kuensel third; time, 8:42 1-2. The exercises also included exhibitions in all kinds of athletic sports, in all of which the students showed great skill. The track was in excellent condition and in all prize contests medals were given.

Rochester Race Matters.

ROCHESTER, Oct. 10.—Perhaps no two cities in the union have been at odds over races as much as Buffalo and Rochester.

As is almost universally known, the Flower and Queen cities are the greatest wheeling centers on this side of the Atlantic. With fine streets and astonishing privileges it is a veritable mecca for bicyclists in the two places, and in view

—Bicycling News.

of this and the intense rivalry between these two bergs in Uncle Sam's baliwick, widespread interest is shown in the matter of a race between the cracks of the two cities.

It's a case of "one's afraid and the other dar'n't," as has been demonstrated in the tilts through the newspapers of both towns. Ultimately all the talk and bluster may result in a contest over the road. The Buffalo Courier, in speaking of the affair, says:

"It is a possibility that a club team road race for the championship of western New York will be arranged to take

place Oct. 22 on the Buffalo-Rochester course. The race will be open to all clubs in this part of New York, and is especially intended to bring about a meeting between Buffalo and Rochester riders.

"Six men will be allowed in each team, and every club represented will be assessed a certain sum, the total to be used in purchasing a trophy that will go to the winning team. All this season there has been talk of a road contest between Buffalo and Rochester, and each city has been looking for a challenge from the other.

"As Rochester issued the challenge in 1889, and also won the race, it is now Buffalo's turn to send out the defi and make an endeavor to regain the lost honors. The Press C. C. is considering the idea of challenging, and may do so in a few days.

"As the Rochester riders would be the challenged ones, they would have something to say about the course, and would undoubtedly select Buffalo as the starting and their own city as the finishing point."

With the elasticity of rubber the Genesee Club of Rochester will accept the challenge just as soon as it is out, and will proceed on the day of battle to exterminate the Bisons completely. The Geneseees are prepared to put in the following team: William Le Messurier, Fred H. Smith, George McTaggart, C. J. Iven, George Montgomery and Frank Schantz.

M'TAGGART WON EASILY.

When the Genesee Club held its sixth and last handicap race Tuesday evening a strong wind caught the riders in the face on the backstretch of the Rochester Driving Park, and made the pace slower than it would have otherwise been. George McTaggart had pacemakers, a decided advantage in the face of the wind. He had a handicap of 1 min. 30 sec., and naturally enough he finished first. George E. Montgomery, with 5 min. 40 sec. start, was second; Charles Penny, 9 min. 45 sec., third; C. J. Iven, scratch, fourth, and William Le Messurier, scratch, fifth. An eighth of a mile away from home Iven drew away from Le Messurier and finished strong, with his opponent well up. Iven's time from scratch was 36 min. 30 sec. Penny finished only a few yards ahead of the scratch men.

McTaggart wins the wheel, but only

Leonhardt Won from Scratch.

The Calumet C. C.'s last ten mile handicap road race of the season was held Saturday over the Lake View course. Leonhardt, from scratch, won the race and time, the latter being 32:05. H. C. Jacob met with an accident but got another wheel and finished. Pauli punctured his tire at five miles and Ambos finished by running in. The result was as follows:

Name.	Handicap.	Time.
A. Leonhardt.....	Scratch	32 05
Hermann.....	2 30	34 00
W. J. Jacob.....	2 00	34 45
Ambos.....	3 30	36 12

The Bidwell Pneumatic Sulky.

The George R. Bidwell Cycle Company has finished the bicycle sulkies for Robert Bonner, with forty-eight, thirty-six and fifty six-inch wheels, which the millionaire publisher and horse fancier will test to find, if possible, the advantages and merits of the different sized wheels for speeding. Maud S. will draw the large wheel sulky first in a trial. Bidwell will possibly build a few pairs of wheels for exhibition purposes at the shows.

* * *

Evansville's Big Meet.

The Evansville races last Thursday and Friday closed the western circuit until next week's Chicago tournament. At this meet there were some surprises, Johnson winning the piano race against a big field, and Lumsden breaking the five-mile competition record. He rode

the distace in 12:36 3-5, lowering Taylor's record of 13:39, made at Buffalo. Rhodes defeated Johnson, Munger and others in the quarter, flying start, and Bliss won his favorite race, the two-mile handicap. The track was in good shape, though somewhat dusty. The grand stand contained 5,000 people the first day. The officers of the day were: F. P. Prial, New York, referee; judges, H. T. Hearsey, Indianapolis; J. C. Combs, Nashville, and Dr. H. B. Tileston, Louisville; timers, Fred Patee, Peoria; E. A. DeBlois, Hartford, and Joseph Goodman, Hartford; clerk of the course, Fred P. Straub; announcer, W. C. Marion, Hartford; starter, W. A. Shockley, Boston.

The piano race brought out E. V. Minor, Indianapolis; A. E. Lumsden, J. P. Bliss, W. A. Rhodes, L. D. Munger, Roy Keator, and John S. Johnson. A time limit of 2:35 was placed on the race. Rhodes was first in the stretch, with Lumsden and Munger close up. Rhodes

sprinted, Lumsden got the lead and won, Munger losing by six inches. Johnson followed Munger and beat Rhodes by six inches. Minor of Indianapolis was fifth, Bliss and Keator dropping out. Ballard and Keator went in to pace on the run-over. Keator got so far ahead in the last half that he could have won, but actually backpedaled and waited for the others. They were in a bunch at the three quarters, when Rhodes went out and Johnson after him. Johnson went by Rhodes and was never again headed, winning the race from Rhodes, Munger third and Lumsden fourth. The first quarter was run in :36 1-5, the half in 1:11 1-5, the three-quarters in 1:48 3-5, and the race in 2:23 3-5. Munger had the race won, but pulled his handle bars out at the quarter pole, and after shoving them back rode the race with practically no bars.

The last race was the five-mile handicap. Twelve men started, Lumsden and

Munger on scratch, Bliss 225 yards, Ballard 300, Minor 475, Keator and Guyol 600, Stringer, 650, and Hay 950. Bliss made up Ballard's 75 yards in the first mile, and Keator and Stringer were riding with the limit man, Lumsden and Munger making pace alternately. Keator went for a lead on the fourth mile, when Lumsden and Munger had overhauled Bliss and Ballard, the latter soon dropping out. Guyol quit at the beginning of the fifth mile. Keator, Stringer and Hay were 100 yards ahead of Bliss, Lumsden and Munger, the six then in the race. The latter overhauled the bunch, and Lumsden and Bliss came down the homestretch, Lumsden winning by a length, with Stringer third and Munger fourth. The summaries follow:

One-mile, novice—E. R. Lozier, Cleveland, 1; C. H. Filbeck, Terre Haute, 2; F. Wilson, Fairfield, 3; time, 2:52 4-5.

Half-mile, handicap—J. P. Bliss, C. C. C., 20 yards, 1; E. V. Minor, 45, 2; Roy Keator, 60, 3; time, 1:05; Lumsden's time, 1:06 3-5 from scratch—fourth place.

One-mile, 2:45 class—H. N. Stringer, Elgin, 1; Thomas Hay, Indianapolis, and W. H. Irish, Cleveland, tied for second; time, 2:37 4-5.

One-mile, open, "piano race"—A. E. Lumsden, C. C. C., 1; L. D. Munger, C. C. C., 2; J. S. Johnson, C. C. C., 3; time, 2:43 2-5. No race; time limit, 2:35. Run over—J. S. Johnson, 1; W. A. Rhodes, C. C. C., 2; A. E. Lumsden, 3; time, 2:23 3-5.

Two-mile, Evansville C. C.—W. T. Bonfield, 1; W. M. Dunham, 2; J. B. Green, 3; time, 6:08 4-5.

Quarter-mile, flying start—W. A. Rhodes, 1; J. S. Johnson, 2; L. D. Munger, 3; time, :31 1-5.

Half-mile, Evansville C. C.—W. C. Paine, 1; W. T. Bonfield, 2; W. M. Dunham, 3; time, 1:18 3-5.

Five-mile, handicap—A. E. Lumsden, scratch, 1; J. P. Bliss, 225 yards, 2; H. N. Stringer, 650, 3; L. D. Munger, scratch, 4; time, 12:36 3-5, world's record.

SECOND DAY'S DOINGS.

The second day of the meet was even more of a success than the first, though the racing was hardly as spirited. Johnson was put out because he was given a start and would not ride. He said he had a cold and could not be induced to

Commends the "Referee's" Stand.

MINNEAPOLIS, Minn., Oct. 10.—Editor REFEREE.—I received the Oct. 7 issue of the REFEREE, and in addition to saying that I have not seen a cycling paper which excels the REFEREE, and scarcely one that equals it. I want to thank you for the fair treatment you have given our friend, John S. Johnson, the pride of Minneapolis cyclists. Your editorial is unanswerable, and the contemptible insinuations and boyish, ungenerous criticisms made by some writers appear more foolish than ever after reading your editorial. A comment in the *Bearings* of Oct. 7, under the head of "Be Fair," explains the discrepancies between his Independence record and those made since. It must be remembered that Johnson has not had much experience in competition races.

Another thing that pleased me exceedingly was your cartoon about the organ. *Puck* or *Judge* never made a better cartoon. It reminds me of a recent law suit I tried about a pipe organ, in which I learned that the best mechanical facilities in world are insufficient to build a good pipe organ without the aid of an experienced musician to act in the capacity of a "voicer." Harmony and finish in tone can be attained only by the co-operation of the voicer and the mechanic. When the organ seems to be mechanically perfect, the voicer, at the key-board, tests the organ from a musician's standpoint and gives the mechanic instructions to bring out effects no other way obtainable. Mr. Bassett in your cartoon seems to be acting as a voicer, but I am disposed to believe that your cartoon is not true to the facts in that regard. If Mr. Bassett could be the voicer (editor) in fact, the mechanical faculties seem to be sufficient to give us a good organ. Whether the proper combination can be secured east of Chicago or not remains to be proven. A. B. CHOATE.

Buffalo Cyclers Busy.

BUFFALO, Oct. 10.—Of course centurion F. A. Foell made another 100-mile run yesterday. The condition of the roads was nothing to be proud of, but an extra effort enabled him to complete his run. W. F. Runser accompanied him from the club house, which they left at at 10 a. m. to Dunkirk and returning to their starting point at 8 o'clock in the afternoon. This makes twenty-six centuries from Foell, and up to date he stands at the head of all our centurians, Klipfel ranking second.

The events of the past week have been confined to club-room talk, renewed challenges and arrangements for the winter months. We are able to wheel into the country all the fall and during a part of the winter season, so long as the weather is dry, for the roads in this neighborhood remain in fairly good condition when not cut up and made rutty through the rainy weather. This enables the clubs to have fox chases, paper races and other sports a wheel, and gives fresh life to the club's history and ruddy cheeks and improved appetites to its members.

The topic of importance which is being discussed in club circles, is the acceptance of the various challenges be-

tween the Ramblers B. C. and the Pressites. Charles Callahan says that up to date he has not heard from the Ramblers, and the latter declare they have not heard from Foell in answer to the 200-mile challenge from Klipfel, but things can not go on in this way much longer, and doubtless by the end of the week both their defies will both have been answered. That some of these challenges will go begging seems possible, and it will be quite unlikely that the weather will be of such a favorable condition that the dates will fall upon pleasant days.

TOO MUCH FOR THE GLORY.

These team races of fifty miles seem to be quite large undertakings for very little glory (a trophy of which goes to the club). If each man in the winning team were to receive a suitable prize, he would have something besides glory to work for. Glory is all right enough once in a while, but it does not indemnify a man for lost time, impaired health and injured wheels. Did any body ever make a good dinner from glory and quit the board perfectly satisfied?

The Press C. C. is determined that some notice will be taken of the following challenge:

To the Bicycle Clubs of Buffalo:—The Press Cycling Club hereby challenges any and all clubs in the city to a fifty-mile team (three to six men) road race for the city championship and a suitable trophy; time, course and value of trophy to be decided by joint committee appointed from competing clubs. CHARLES H. CALLAHAN, Captain.

The Press C. C. will give a grand entertainment at the Music Hall on Thursday, Dec. 8. Its ability to cater to the pleasure of its friends was amply demonstrated last season by the well managed ball given at the same place. A committee has the arrangements well under way and promises that it shall eclipse any of their previous efforts. This club has a fine programme of winter sports, including pool tournaments and bowling parties, besides several whist and other card parties. Taken all-in-all, the Pressites are determined to have a good time this winter.

DOINGS AMONG THE CLUBS.

Freitag and Saenger of the Comrades Cycle Club are the star centurians, the former having nine to his credit and the latter seven.

The Wanderers B. C. will this week hold a Columbian entertainment, and the committee promises great things. The boys will have quite a lay-out, as a menu has been arranged complete enough to satisfy the most exacting gourmand. This club has not been able to find suitable rooms up street, but are still on the lookout.

The Iriquois Wheelmen are fast coming to the front, and at present their section is making more of a disturbance and excitement than the Athletic. A grand ball to be given on the 17th of next month is a pleasing feature on their programme, and already many tickets have been sold.

The wheelmen in this vicinity are very skeptical about receiving the records made by J. S. Johnson, and we do not see the reason, if they will understand that that this man Williams is a gentleman who has never permitted fake racing or records, or allowed even the appearance of faking upon his track, for his reputation, standing second to none for honesty, uprightness and probity in the section of the country in which he

lives. Besides, the manner in which these records were made has been most fully illustrated, explained and described at various times in the REFEREE. What under the sun more is required to make the question clear?

WILLIE DUNN.

Milwaukee Club Matters.

MILWAUKEE, Oct. 10.—The North Side Wheelmen, at their regular meeting Tuesday evening, elected the following officers for the ensuing year: President, G. Aussen; vice-president, E. E. Miller; secretary, L. Perrin; treasurer, E. A. Reddy; captain, W. M. Breckenridge; board of directors, J. E. Rider, Peter Knock, A. Burke, A. C. Runkee.

The club has a membership of seventy-three and is in good financial condition. It will give a time race on the White Fish Bay road Thanksgiving-day afternoon.

The century riding fever has given Milwaukee a wide berth this season, and centurians are at a premium. The annual century run of the Milwaukee Wheelmen has been indefinitely postponed. On last Sunday Morrison, Paine and Sercomb rode over the Watertown course, for which each will be decorated with another bar.

A number of Milwaukee riders will attend the Beloit-Janesville road race the middle of the month. A large crowd is also expected from Madison and Appleton. The event promises to be a great affair. JACK ROYAL.

Question for the Racing Board.

SAN FRANCISCO, Sept. 30.—Editor REFEREE.—I am in trouble and hereby appeal to you. I am an amateur—not "choor". I want to remain an amateur, but am confronted by the following temptation:

Here is the (hypothetical) case: A \$1,000 team and a suckling white elephant are offered at a coming race meet. I am liable to win them. If I win, is it not the business of the league (in the interest of amateurism) to provide me with labor whereby I can support said prizes, or can they not compel the club offering such prizes in the future meets to have as prizes provender of some infant food for the maintenance of said prizes? Please do not regard this as an attempted joke. It is serious, and I lay awake at night and think of it.

PANVRETTE.

Philadelphia's Social Season Opens.

PHILADELPHIA, Oct. 10.—While the riding season here is by no means over, and, in fact, there is as much activity displayed as at any time of the year, the various clubs are beginning to think of the social season and to make arrangements for the same. Entertainment committees are being appointed in almost every club, which will have sole charge of the entire season's programme, and if present signs fail not, the winter of 1892-'93 will far surpass all former records—and this is saying a good deal, as the local clubs are noted for the magnificent way in which they have entertained their members and friends in years gone by. One popular feature of past seasons, which has also proved a remunerative one, is likely to fall into disuse, and that is the theatre party. It has always been possible heretofore to secure a profit of fifty per cent on all tickets sold by the club members for affairs of this kind, which amounted to quite a handsome sum generally and was either put directly into the club's treasury or used to defray a part of the expenses of the remaining entertainments of the season, but now the theatrical managers have formed a "combine," a

sort of trust, as it were, and will give only twenty-five per cent hereafter.

SURPRISED THE PRESIDENT.

Some forty members of the Park Avenue Wheelmen prepared a pleasant surprise for their worthy president last week in the form of a testimonial banquet. Mr. Bunnell was beguiled into paying a visit to one of the club's members who intended to have a little birthday party or something of that kind at his residence, and the boys who informed him that owing to the number of guests invited to this shine it had suddenly been determined to hold it in a well-known up-town restaurant. So well was the secret kept that Mr. Bunnell, shrewd as he is, did not discover the scheme or suspect anything at all, and was consequently taken completely by surprise when as he entered the banquet room he discovered from the lay of things there that he was the guest of the evening. The evening was passed merrily with the discussion of a pleasant menu and many good after-dinner speeches, Vice-President E. C. Taulane being delegated to relate the cause of the gathering and the appreciation of the club's members of their chief executive's work in the interests of the organization.

NOT A BIG SUCCESS.

The third annual lantern parade was not the glittering, dazzling success which that of last season was, owing, probably, to the reason that Philadelphians, like many other wheelmen, have grown tired of the show business and of parades in general. The committee in charge, headed by Captain Hirschler, certainly did all in their power to make the matter a success, and while they were successful in securing a fairly good-sized parade as to number, there was comparatively little in the way of decorations as compared with last year, when hundreds of dollars were spent on the display. It was decided some time since to make the parade a testimonial to Mayor Stuart, that gentleman being asked to review the display, and this fact undoubtedly caused a good many wheelmen to turn out from pure patriotism, who otherwise would not have taken part. The route was confined to Broad street, which is now a magnificent asphalt paved thoroughfare, thanks to the efforts of the mayor, and an immense crowd lined the streets the entire distance, but the police arrangements were perfect. There were numerous decorations all along the route as well as displays of fireworks from club houses and cycle stores. The Park Avenue Wheelmen erected a reviewing stand in front of their club house, from which the mayor, several members of his staff, Chief Consul Boyle, President Tucker of the A. C. C. and other invited guests reviewed the parade and afterwards, together with representatives of the press, were entertained at supper by the club.

Fred Garrigues, formerly a well-known local racing light and a general all-around hustler in the Century Wheelmen, was married on Thursday evening last to Miss Annie Mole.

On Saturday evening the Columbia Cyclers celebrated their fourth anniversary at their club house, 1610 Diamond street. An interesting programme was presented composed both of club talent and visitors. President Harry Lawser also made an interesting address and Dr. Hill presented the prizes won at the road race in the afternoon.

PAUL BERWYN.

Busy Asbury Park Wheelmen.

ASBURY, Park, Oct. 10.—This prosperous bicycle club is enjoying a season of unusual popularity. At the last meeting

the membership was increased by thirteen, and applications are in which if favorably acted upon will bring the membership of the club to over a hundred. One-half of all the business men in the place own and ride wheels, and the number is increasing every week.

The club will have a ten-mile road race on Oct. 15. The route will be from Asbury Park to Spring Lake and return. Prizes will be given to the persons making the fastest time and the winner of the event.

When a committee composed of leading knights of the wheel chartered a steamboat and went down the bay to meet Champion Zimmerman last July, the A. P. W. went down into its exchequer and contributed a tidy sum. Now they have repeated the thing and have contributed \$50 more. The committee was short \$150, and asked for contributions. Surely the local club must have a warm spot in its heart for "Zimmy."

Zimmerman, whose home is only six miles from Asbury Park, drove through town this week behind his \$1,000 team of horses which he won at Springfield. He had just returned from Philadelphia and made his way to the athletic grounds, where he indulged in a five-mile spin in order that he might be all right for the races in which he was entered the day following. A REFEREE reporter asked him what he thought of Johnson's remarkable time. "Oh, I hardly know what to say on the subject. I saw it in the newspapers and that's all I know

WINDLE'S GREAT RECORDS.

Flying Mile, 2:02 3-5—Standing, 2:05 3-5—Half-Mile in 57 4-5 Seconds.

All eyes and ears are turned Springfield-way these days, to catch Windle's contest, for it seems a slow week if one or two records are not broken. There is no doubt that Windle is in great form just now for trials, and there should be no great surprise if Windle rode a mile in two minutes dead. Just before noon on Friday of last week Windle made his appearance on the Hampden Park track to go for the flying start mile record, notwithstanding the fact that a strong wind prevailed. He was after Nancy Hanks' 2:04 record. Two triplets were used for pacemaking. Campbell, Murphy and Wheeler took the record-breaker the first half-mile in 59 4-5 seconds, as three watches registered. Saving Johnson's half, this is world's record. Dornitge, Smith and Arnold, on a triplet, took him the last half. The pacing stallion, Nelson, also helped him down the stretch.

The time by quarters was: First quarter, 29 2-5; half, 59 4-5; three-quarters, 1:30 4-5; mile, 2:02 3-5. The officials were: Referee, A. O. Sinclair; timers, C. T. Shean, J. A. Bryan and W. H. Jordan; judges, G. E. Stacey, H. G. Peet and John W. Drown; starter, Harry Rue. The fact must not be forgotten that this record was made with the assistance of a horse as pacemaker as was Johnson's.

Saturday Windle again went for record, the standing start this time. He cut Tyler's mile record, standing start, of 2:08 4-5 to 2:06 2-5, and in the afternoon he set the mark at 2:05 3-5. In the first attempt he had quite a little wind to contend against, but after dinner the circumstances were more favorable. He made the middle half-mile in 57 4-5 and the three-quarters in 1:34 flat. The pacing in the afternoon was better than that of the morning, and it was warmer, too. In the forenoon's trial two triplets were used for pacing and there was trouble in getting under way, but in the second attempt Harry Arnold took him the first quarter in :33 4-5, while the triplet, with Wheeler, Nelson and Campbell up, took him to the half in 1:08 3-5, and the three-quarters in 1:34. Then George Smith brought him to the tape in 2:05 3-5, or :31 3-5 for the last quarter.

In the first attempt Arnold, Smith and Dornitge were to take him the first half. Windle thought the men were going too fast and shouted to them to slow. As a result he had to pass them and cut wind for himself to the first part of the backstretch. There they caught up and passed him, but only got him to the half in 1:06 3-5. The second triplet picked him up in good shape at the half and took him to the three-quarters in 1:36 2-5 and the mile in 2:06 2-5. This made the last half-mile in :59 4-5, with :29 4-5 for the first quarter and :30 for the last.

A little later the Milbury lad put the flying half record at :57 2-5. He announced his intention of again trying for the mile record. The trials were refereed by George S. Atwater, ex-chairman of the racing board; judged by D. E. Miller, H. C. Tyler and J. E. Sanborn, and timed

by C. F. Shean, James Bryan and George Warwick, while Harry Rue acted as the starter.

* * *

The Vet Has the Last Word.

NEW YORK, Oct. 8.—Editor REFEREE:—If you will pardon me I would say that I feel that you, knowing my tendencies on the subject of professionalism, should have written and asked if I had any feeling in the matter before publishing me in the list of professionals. You know as well as any one that the race you refer to was a straight out amateur race and not one of all the riders had a thought of money. I fail to recall whether Harrison rode at Lynn against me. My impression is he did. As for the afternoon, of course everything shows he was a contestant against me; for the riding for money, I was not aware of it at the time I rode him, and must qualify by saying that I don't recall whether it was after the races were over that I found out or between that time and the date of the letter which I hold from Charles Howard of Brockton, who secured the riders and made the arrangements for the race. The date of his letter is July 15. There is some memoranda which I have lost which would place me right on this. At any rate, for winning each race I received a prize, at Lynn a pitcher, at Brockton a cup. I quote a line or two from Mr. Howard's letter: "I need not go into particulars that both of you entered for prizes, but not enough appearing to fill the race, you offered to ride on any terms that would satisfy the committee. Mr. Harrison offered to ride for \$15, but finally left it with the committee to give him what they thought best. After the race he said he would be satisfied with \$10, which was paid him. The committee then presented you with the cup, as you would not accept money." The closing sentence of the letter is, "I would further say that if in any way I can assist you, except through the newspapers, consistent with actual facts, I will cheerfully do so. I neglected to say that we were disappointed in some who were entered not putting in an appearance: you very generously offered to ride without any compensation, which was appreciated by the committee."

As you see, he used the word "compensation," but I have quoted you what he says, which proves to you what he means by saying "prize." Now you know mighty well that I never proposed to be a professional in the past and certainly do not in the future, and I think it is illbecoming in any one to in any way put me down in the professional list. It is not right and it is not correct, and it was some time after '79 before they had races on the Boston Common.

Yours truly, W. R. PITMAN.

* * *

Nashville's Big Meet.

The Capital City Cycle Club is to have its big meet on the 26th and 27th of this month. These races we intend to make the best ever held in the south, and, in fact, they will be the largest ever known south of the Ohio. We are at work getting up a \$8,000 prize list which we think has never been equalled in any city in the south, and as the rates are unusually low from Chicago here there is no reason why we should not have a large delegation from your city. The race list is made up of twelve races, eight of which are open, so it would pay any

northern rider to enter, as he will have any amount of show to win. The race list is as follows: One-mile, novice; one-mile, handicap; one-mile, scratch; quarter-mile, open, flying start; half-mile, scratch, Capital City Cycle Club; five-mile, handicap, open; one-mile, scratch, open; half-mile, handicap, open; one-mile, handicap, open; two-mile, handicap, open; half-mile, open; one-mile, handicap, Capital City Cycle Club. The tournament on the 26th and 27th is under the sole auspices of the four C's. Everybody attending will be guaranteed a jolly good time, and all wheelmen, especially those who are troubled with blues are invited to attend. J. OF J.

A New Club's First Race.

The first annual five-mile road race of the new Building Cycling Club was held Saturday over the west side course. E. Kozelski won a large Turkish rug for first prize, while Mershback secured the time medal in 18:04. The finishers with their times were:

	Time.		Time.
Kozelski,	18.10	Mershback,	18.04
Lindgre,	18.12	Pieronnet, scr.,	18.13
Ambeer,	18.14	Solum, scratch,	18.25
Clarke,	18.08		

* * *

Lincoln C. C. Races.

The Lincoln Cycling Club's races at Parkside Saturday attracted fully a hundred people, but the day was cold and disagreeable and people were not blamed for staying at home. The races were good however, though in the club events Haywood had his own way and won all but the novice, while the Green brothers of the Chicago Cycling Club captured

about it." He then mounted his wheel and spun around the track at a three-minute gait.

Rochester Gossip.

ROCHESTER, Oct. 10.—"What wheel will you ride next year?" seems to be the all-absorbing topic in this city now-a-days.

E. C. Bickford, treasurer of the Crescents, has gone to Buffalo to live. He will prove a worthy member of any Buffalo club.

As a proof that bicycling is unusually popular, it may be cited that there are many Catholic priests in this city, usually the most conservative men in the world, who are not ashamed to be seen on their wheels, and among the number are one or two speedy riders. In the west, where priests have large and widely scattered parishes, nearly all the younger priests ride wheels.

A correspondent of the New York Morning Advertiser says there are no handsome lady bicyclists in New York. He should pay a visit to Rochester and he would see hundreds.

PANHANDLE.

A. C. Banker is now representing the Columbia Rubber Company, Chicago.

the three open events. The results were as follows:

One-mile—Charles Heile, 1; F. H. White, 2; A. P. Peck, 3; time, 2:59 1-5.

One-mile, club championship—A. T. Haywood, 1; A. H. Radell, 2; time, 2:59 1-5.

Quarter mile, open—O. C. Green, C. C. C., 1; Gus Steele, 2; H. M. Taylor, 3; time, :38 1-5.

Half-mile, handicap—A. T. Heywood, 1; A. H. Radell, 2; A. P. Peck, 3; time, 1:17 1-5.

Two-mile, handicap—A. T. Heywood, 40 yards, 1; D. B. Southern, 30 yards, 2; A. H. Radell, 60 yards, 3; time, 6:19 1-5.

Half-mile—A. T. Heywood, 1; A. H. Radell, 2; time, 1:23.

One-mile, handicap—Bert Green, 40 yards, 1; Gus Steele, 30 yards, 2; H. M. Myers, 50 yards, 3; time, 2:49 1-5.

Quarter-mile—A. T. Heywood, 1; A. H. Radell, 2; J. W. Adams, 3; time, :40.

Two-mile, handicap—Bert Green, C. C. C., 75 yards, 1; E. Ulbrecht, scratch, 2; D. B. Southern, 30 yards, 3; time, 5:29 2-5.

* * *

A Milwaukee Field Day.

The Milwaukee High School field day at National Park Saturday last was a great success, both in point of attendance and the enthusiastic manner in which all the events were received. Nothing augurs so well for the future popularity of cycling as the fact that the young people are interested in the sport. The high school boys are all infatuated with the healthy sport, and although the programme was of a mixed character

compete, though he wanted to try for the quarter-mile flying start. Bliss rode a good race in the two-mile handicap. He was caught by the scratch men before he had gone half a mile, but stayed with them until the spurt, fifty yards from the tape. The day's summaries follow:

One-mile, Indiana riders—E. V. Minor, Indianapolis, 1; W. T. Bonfield, Evansville, 2; E. P. Roll, Indianapolis, 3; time, 2:39 4-5.

Two-mile, lap race—First lap, L. D. Munger, C. W. Davis, W. A. Rhodes. Second lap, L. D. Munger, C. W. Davis, Roy Keator. Time, first mile, 2:49; two miles, 5:43 4-5. Munger scored seven points, Davis four, Keator one.

Half-mile, boys—Warren Guyol, Louisville, 1; Charles Dexter, Evansville, 2; time, 1:35 2-5.

One-mile, handicap—E. W. Ballard, Chicago, 90 yards, 1; W. S. Irish, Cleveland, 135, 2; J. H. Gardner, Nashville, 140, 3; time, 2:18 3-5.

Half-mile, open—A. E. Lumsden, 1; L. D. Munger, 2; W. A. Rhodes, 3; time, 1:17 1-5.

Two-mile, handicap—J. P. Bliss, 70 yards, 1; L. D. Munger, scratch, 2; C. W. Davis, 100 yards, 3; time, 4:59 1-5; scratch man's time, 5:00 1-5.

One-mile, handicap, Evansville riders—W. T. Bonfield, scratch, 1; W. C. Paine, scratch, 2; G. Alf, 50 yards, 3; time, 2:43 3-5.

Five-mile, relay, club race—Chicago Cycling Club, 1; Evansville Cycling Club, 2; time, 13:41 2-5.

Saturday Johnson rode a mile in 2:13, which showed that he has speed.

Racing at Fort Scott, Kas.

The first annual race meet of the Solid City Wheelmen on Thursday of last week was a complete success. Over 2,000 people were present. Some of the close finishes made them very enthusiastic. An old attendant of race meets might have complained of the rather slow times, but these are accounted for by the extremely strong wind blowing up the finishing straight. To sprint against such a wind was a cruel punishment to the men. The new track upon which the races were run was in good condition, considering the fact that it is so new. Two months ago the spot where it now lies was covered with prairie grass. To-day a splendid quarter-mile track, which when it has passed the winter and been finally put in condition next year will prove as fast as any in the country, invites the racing man to try his speed. Best of all, it is paid for and the company owning it has a twenty-years lease on the ground and on a grand stand which will accommodate 3,000 people. Of the twenty-eight men entered, H. C. Wheeler, of the Manhattan Athletic Club, New York, was the only one who failed to show up. The accommodations for the racing men were excellent. Large tents were placed on a slight elevation east of the track and furnished with plenty of cots, blankets, etc., and ample facilities for bathing. From these the men could view the races while being attended. Without exception they left the city pleased, and promised to come again next year.

James Joyce, Jr., of Hartford, Conn., was referee, and Austin Harvley, of Girard, clerk of the course. Prominent wheelmen judged and timed. To show how excellent was the work done by them it is only necessary to state that the seventeen heats were run off in three hours and there was not an accident of any character. Summary:

Half-mile, novice—Sam Patterson, Plattsmouth, Neb., 1; G. P. Moore, Kansas City, 2; Lawrence R. Harris, Fort Scott, 3; time, 1:33 1-5.

Half-mile, open—Three heats and a final—First heat—C. Kindervatter, 1; Kansas City, 1; R. M. Tidd, St. Louis, 3; time, 1:38.

Second heat—T. M. Patterson, 1; B. Hinchcliffe, Parsons, 2; time, 1:32 3-5.

Third heat—E. E. Mockett, Lincoln, 1; Bert Harding, St. Louis, 2; time, 1:25 3-5.

Final heat—R. M. Tidd, 1; E. E. Mockett, 2; time, 1:24.

One-mile, open—Three heats and a final—First heat—Kindervatter, 1; Tidd, 2; time, 3:22.

Second heat—F. F. Rough, South Bend, Ind., 1; Hinchcliffe, 2; time, 3:24 4-5.

Third heat—Harding, 1; W. R. Millison, Wichita, 2; time, 3:29 3-5.

Final heat—Harding, 1; Rough, 2; time, 3:19 3-5.

Quarter-mile, boys under sixteen—Herb. A. Bodecker, 1; Andrew Logan, 2; time, :51 2-5.

Half-mile, handicap—Fifteen starters; E. E. Mockett, 60 yards, 1; T. M. Patterson, 80 yards, 2; W. R. Millison, 50 yards, 3; time, 1:14.

One-mile, club championship, Solid City Wheelmen—Laurenz R. Harris, 1; W. C. Hahn, 2; time, 3:14 1-5.

Trick and fancy riding contest—George Fowell, Lamar, Mo., 1; R. M. Rodecker, Mansfield, Ark., 2. One-mile, handicap—Fifteen starters; Bert Harding, 130 yards, 1; E. E. Mockett, 175 yards, 2; W. R. Millison, 160 yards, 3; time, 2:23 3-5.

Quarter-mile, open. Run in two heats—Final heat—F. F. Rough, 1; Bert Harding, 2; R. M. Tidd, 3; time, :38.

Windle's Scheme Outdone.

Not to be outdone by Johnson, with his running-horse pacer and wind screen, or by Windle, with his proposed locomotive pacer and screen attachment, a Toronto racing man has solved a tremendous scheme to aid him in lowering Nasmith's new 100 miles record, says the Toronto Mail. He proposes to engage a trolley car on the belt line to act as pace-maker, attached to which will be a three-sided screen, with a cover, which

will keep the air cool and moist, whilst foot-warmers will be attached to the rear platform of the car. A sweeper will be fixed to the front of the car to keep the pavement clear of tacks and other obstacles. The timekeepers and other officials of the ride will have elegantly fitted up apartments in the interior of the car, and a brass band will go along to cheer the rider and officials. As nearly every C. W. A. member of note and affluence will be invited to act in some official capacity it is not improbable that a supper and smoking concert will form part of the entertainment aboard.

Three Days of Racing.

Three days of racing were enjoyed by the several hundred people who attended the tenth annual reunion of the Soldiers' and Sailors' Association at Belleville, Ill., on Wednesday, Thursday and Friday of last week. The track, which is a half-mile, was in good condition, and large and enthusiastic crowds at-

Winnebago Wheelmen at Fond du Lac last Saturday afternoon. The races were postponed on account of rain, and fear was expressed that it might injure the attendance. Such was not the case, however. All the visitors were loud in their praise of the hospitality extended them. Fond du Lac holds the world's record for pretty girls, and the wheelmen are to be congratulated on having such a valuable auxiliary. The races were run in a prompt, business-like way, which added great success and pleasure to the effort. The track was rough in places. The results were as follows:

One-mile, Fond du Lac championship—Louis Vennie, 1; Liu Lusk, 2; time, 3:09.

Half-mile, open, heats—Louis Reed, Ripon, first and second heats, 1; Roy Reed, Ripon, 2; time, 1:17.

Five-mile, handicap—Louis Reed, scratch, 1; John Schmitbauer, 2; L. Beyer, Sr., 3. Andrae and Martin also started from scratch.

Douglas Finished First.

The ten-mile race of the First National Bank Cycling Club took place Saturday afternoon on the Douglas and Garfield Park course. The first man to finish was C. G. Douglas, who had a handicap of nine minutes. A. Briggs, scratch, won the time medal, covering the course in 36:48. The order of finish and the times follow:

Name	Time
C. G. Douglas	38 15
G. H. Kittoe	40 15
R. J. Cody	43 23
Frank Pearson, Jr.	37 03
A. Lattmann	43 40
F. H. Stanwood	37 41
B. J. O'Neill	39 23
W. A. Binnie	41 30
W. F. O'Leary	40 25
H. W. Harris	43 30
W. D. Keats	42 23
A. Briggs	36 48
H. Dengel	39 53
E. A. Herrman	36 55
C. R. McKay	40 30
W. E. Pond	49 45
W. Austin	48 15
T. H. Morris	45 55
J. C. Hansen	60 25

At Wauseon, Ohio.

A number of Toledo men swooped down on the Wauseon, Ohio, meet last Friday and captured a goodly share of the prizes. After the races a reception was held at the opera house, where the prizes were given out. The results follow:

Half-mile, novice, Fulton County—A. M. Wilkins, 1; H. D. Meister, 2; Ham, 3; time, 1:32.

Half-mile, open—A. L. Baker, 1; J. G. Perrin, 2; C. Baker, 3; time, 1:21 1-4.

One-mile, 3:00 class—Orra Brailey, 1; Bert Gamble, 2; Lew Colton, 3; time, 3:02 3-4.

One-mile, open—A. L. Baker, 1; C. Baker, 2; C. Van Time, 3; time, 3:14.

Half-mile, 1:30 class—J. G. Swindeman, 1; Orra Brailey, 2; Bert Gamble, 3; time, 1:24 1-2.

One-mile, Fulton County—C. C. Handy, 1; Orra Brailey, 2; A. M. Wilkins, 3; time, 3:02 1-2.

three-mile lap race A. L. Baker, 15 points, 1; C. Baker, 11 points, 2; C. C. Van Time, 10 points, 3; time, 9:19 3-4.

One-mile, Fulton, Henry, Williams and Defiance Counties—C. C. Handy, 1; Orra Brailey, 2; Bollmeyer, 3; time, 3:36.

Two-mile, sealed handicap—A. M. Wilkins, 30 sec., 1; J. G. Perrin, 20 sec., 2; J. S. Brailey, 20 sec., 3.

Good Racing at Denver.

The Colorado Wheelmen's races at Denver Athletic Park last Saturday were attended by several hundred people, who saw some excellent sport and manifested much interest in the events. Notwithstanding the prevalence of a high wind good times were made and several state records were nearly equalled. The following were the officers of the day: C. C. Candy, referee; N. U. Carpenter, clerk of course; Robert Gerwing, starter; C. A. Hackney, W. W. Hoag, C. C. Harvey, judges; G. E. Hannan, F. T. Collins, H. G. Kennedy, timers; W. L. Sperry, P. O. Dolson, C.

will completely box him in and protect him from any possible draughts during his transit. The trip will commence at midnight to enable the car to attain a pace of forty miles or more per hour. The rider's box stall will be brilliantly illuminated, and the rear platform of the car will be converted into a refreshment booth, from which by a mere stretch of the arm he may obtain whatever article of food or drink he may desire. The stall will be comfortably upholstered, and at each side of the wheel will be stretched capacious hammocks, so that in the event of a fall the rider will not be seriously injured.

A bellows fixed up in his rear and operated by electricity will relieve him of that tired feeling and keep him blown up near the counter. An electric roller to the bottom of the stall will keep his rear wheel tipped up in such a manner that he will have that pleasant sense of going continually down hill. A refrigerator attachment in the roof of the box

tended the races each day. The slow time in the two-mile 6:00 class was caused by the fact that the contestants were very much afraid of each other, and it was a "loaf" for a mile and three-quarters, with a quarter-mile spurt. The results were as follows:

One-mile, novice—Al Baker, Belleville, 1; Eli Silverburg, St. Louis C. C., 2; time, 3:20.

One-mile, St. Clair County championship—L. J. Winkler, Belleville, 1; Al Baker, 2; time, 3:10.

Half-mile, 1:37 class—Gus Loeffel, St. Louis C. C., 1; George Tivy, St. Louis, 2; L. J. Winkler, 3; time, 1:23.

One-mile, 3:00 class—Gus Loeffel, 1; W. Wicke, St. Louis C. C., 2; W. P. Laing, St. Louis C. C., 3; time, 3:18.

Two-mile, handicap—L. J. Winkler, 120 yards, 1; W. Wicke, 40 yards, 2; W. P. Laing, 120 yards, 3; time, 6:18.

One-mile, handicap—W. P. Laing, 60 yards, 1; L. J. Winkler, 80, 2; Gus Loeffel, 85, 3; time, 2:40.

Two mile, 6:00 class—W. P. Laing, 1; L. J. Winkler, 2; Gus Loeffel, 3; time, 7:45.

GRANT ANTI-FRICTION BALL CO.

—FITCHBURG, MASS.

The Chicago Cyclists at the Non-Day Meal—Siegel & Cooper's Restaurant, Familiarly Known as the "Rag Shop."

H. Hilton, scorers, and Joe Hutchinson, announcer. In the quarter-mile open Boles fell and everybody went over him. Black, Boles, Rutherford and Taylor being badly cut. Rutherford managed to get out and on his wheel, however, and won the race. The results follow:

One-mile, novice—H. A. Pippin, D. W. C., 1; J. A. Perkins, 2; Knox, 3; time, 2:50.
Half-mile, open—O. E. Boles, 1, Louis Block, 2; time, 1:17 2-5.

One-mile, 3:00 class—first heat—Harry Croll, 1; J. L. Frazier, 2; time, 2:47 3-5.

Second heat—John A. McGuire, 1; E. Hencles, 2; time, 2:55.

Final heat—Croll, 1; Frazier, 2; time, 2:51 2-5.
Quarter-mile, open—George Rutherford, 1; L. Block, 2; no time.

One-mile, D. A. C. championship—Sperry, 1; Whitney 2; Graham, 3; time, 2:53 1-5.

One-mile, Rambler championship—J. A. McGuire, 1; Lyons, 2; Perkins, 3; time, 2:47 4-5.

One-mile, D. W. C. championship—J. L. Sutton, 1; Bert Cassidy, 2; B. J. Sylvester, 3; time, 3:06 1-5.

One-mile, C. W. championship—Louis Block, 1; Rutherford, 2; Croll, 3; time, 2:52 3-5.

Two-mile, handicap—Pippin, 300 yards, 1; McGuire, scratch, 2; time, 5:16—McGuire's time, 5:21, eight seconds better than state record.

One-mile, 2:50 class—J. L. Sutton, 1; B. J. Sylvester, 2; time, 2:44 4-5.

Five-mile, handicap—O. E. Boles, scratch, 1; N. B. Taylor, scratch, 2; R. B. Wilson, 400 yards, 3; time, 15:08.

One-mile, club competition—J. A. McGuire, Ramblers, 1; Louis Block, Colorado Wheelmen, 2; John Sutton, Denver W. C., 3; time, 2:40.

Will Be a Big Success.

If the World's Fair dedication tournament of the Chicago Cycling Club, at Washington Park next Friday and Saturday, is not a huge success, then the whole blame will be laid at the door of the weather-clerk's office. Every committee and each club member is on the hustle, and with good weather the meet will be the greatest cycling event ever held in the west, if not in this country. The city and suburbs have been literally plastered with lithographs and pictures of the most prominent racing men. The prize committee is working with a will and so far has succeeded beyond expectations.

The cracks will all be here. Captain Van Sicklen went east to bring the flyers back and this is what he says in a message:

SPRINGFIELD, Mass., Oct. 11.—W. F. Tuttle, president Chicago Cycling Club:—Have Tyler, Campbell, Wheeler, George Smith, Arnold, Billy Murphy, Rich, Dorntge and Zimmerman promised. Winkle doubtful; will know to-morrow sure.

VAN SICKLEN.

Johnson, Sanger, Munger, Lumsden, Ballard, Davis, Keator, Rhodes, Bliss and a dozen other good men have all entered and many are in practice at the track now. The entries close Saturday night (Oct. 15) at midnight with Charles P. Root, 334 Dearborn street.

Arrangements at the track are now complete. The dressing-rooms are splendidly arranged and cots will be put in. The track, after to-morrow, will be put in the best shape possible and no horses will be permitted on it until after the meet closes.

General Race Gossip.

Charles Grant won the eleven-mile road race at Logansport, Ind., in 34 min. 48 sec. Wash Roach was second in 36 min. 6 sec. The race was promoted by the *Journal* of that place.

The Waukesha Bicycle Club gave a five-mile race for members only on Friday last. The route was over the Pewaukee road. S. D. James, Jr., finished first in 21 min., F. A. Evans second, E. A. Morley third.

Philadelphia is to have one more cycling tournament this year—that of the Tioga Athletic Association, on Columbus day, Oct. 21. The present prospects are that this meet will be as successful as any of the others which have been held this season.

The Adrian (Mich.) Wheelmen hold a meet Monday next at the Lenawee fair grounds, beginning at 2 o'clock. The programme is as follows: Half-mile, Adrian County riders; one-mile, open; half-mile, novice; one-mile, Adrian

County; one-mile, ordinary; five-mile, lap, Adrian County.

The Leavenworth County Wheelmen of Leavenworth, Kas., will hold their first tournament next Friday. The programme is as follows: One-mile, novice; one-mile, open; half-mile, boys'; one-mile, club championship; half-mile, open; half-mile, hands off, open; fancy and trick riding contest, open; half-mile, consolation.

The Columbia Cyclists of Philadelphia held their annual five-mile road race Saturday over the Park avenue course. Twenty-three men started, Biddle, three minutes, winning in 16:23. Gracey, the scratch man, rode in 18:48 2-5, thus breaking the best previous record. Donnelly and Bilyeu also made an attempt on the five-mile tandem record, successfully covering the distance in 13:12.

Johnson, Bliss, Keator, Davis and several other good men will attend the Aurora C. C.'s third annual tournament Saturday. The events will be: One-mile, A. C. C. championship; one-mile, open; one-mile, 3:10 class; half-mile, boys'; half-mile, handicap; quarter-mile, open; two-mile, handicap; five-mile, handicap; one-mile, A. C. C., sealed handicap. The prizes include bicycles, watches, medals, etc.

The Columbus day race meet of the Tioga Athletic Association will wind up the racing season in Philadelphia. A programme of eight events was prepared which has been equally divided between races for fast men and for the slower riders. The prizes will be good—not grand pianos, bicycles and such articles, but at the same time well worth riding for. As the majority of the cracks will be at Chicago and there is absolutely nothing else of the same character in or near Philadelphia, the meet should attract a good attendance of riders.

Corbett on the Bicycle.

While an admirer of boxing, I am not partial to prize fighting; I would rather see men disable themselves with gloves than with pistols or swords; it seems to me to be a more manly way of disabling. My experience with the prize ring and Queensberry has been such that I no longer want to join those with a quiet tip in an excursion to the woods at night, and a little incident in Utah three years ago did not help to enthrone me with fighting. Frank Glover, who died recently, was in Denver and joined several cyclists, who were headed for 'Frisco and the antipodes, myself being among them. While in Salt Lake a proposition from an Ogden bruiser to fight came to our camp and was accepted. The affair was managed as far as preliminaries went in regal style, special trains from Salt Lake and Ogden being run to the battle field, which was on the dancing platform at Lake Park, right on the shores of the Great Salt Lake. The train arrived in due time, and another special train, not on the programme, met our train on the return trip, having on board Governor Thomas and a beautiful lot of uniformed deputy sheriffs, who did not arrive in time to see Glover "do" his man. But they had the right-of-way of the line, and as the track was a single one we could not jump over their engine and coaches, so all hands gave their names—except those who took to the car roofs and prairies. Glover took to the fields, Knapp hid the gloves in the coal box of the engine and was busy polishing brass with a dusty piece of cotton when a deputy interviewed him. What tall lying was done! Nobody on that train would recognize now the names they bore that night.

THE CYCLIST'S ESCAPED.

The next day Glover was enjoying a drive with the writer in Ogden as far as Chase's Corners in order to take a train for 'Frisco, but an unfeeling constable

THE REFEREE is well worth the price, isn't it?

who met our carriage gave chase, and possessing the faster team would have overhauled us if Glover had not jumped and took to a corn field, while the other two occupants went in other directions. Glover was overhauled finally, and after deploring Governor Thomas' unappreciation of the "manly art," the cyclists were glad to leave such a territory. This and one or two other experiences spoiled my appreciation of the sport which is undoubtedly degrading and demoralizing, so I have sworn off on professional "finish" fights, but still admire the so-many-round affair which the law allows and is oftentimes as exciting and real as the finish one. Therefore when I saw that James J. Corbett had matched himself to fight Sullivan, I felt sorry that the manly professor of boxing of the San Francisco Olympic Amateur

neglect in not replying to your last to my training quarters at Asbury Park, but you can appreciate the work I was doing for my match with Sullivan. I used the bicycle considerably in my training, and find it was of great use in leg development besides having lots of sport with it. The exercise is entirely different to anything else and don't seem to tire one half so much as the other work I did, such as running, walking, wrestling and throwing the ball. The safety is superior to the ordinary you and Knapp taught me to ride. I will ride as much as possible in the future, and have a number of letters from clubs inviting me to take a ride with them while on my tour, and I will try and do so if my engagements permit. I am much interested in the sport and find cyclists a good class of young men. Many thanks for the REFEREE you send me. Will be pleased to have you call on me at the Coleman House at any time between now and Friday, when I leave with my company on a tour. Be sure and see the show when an opportunity permits.

Yours truly,

JAS. J. CORBETT,

Champion of the world.

The signature is pardonable in the

World's Fair

DEDICATION TOURNAMENT!

Entries close October 15, with C. P.
Root, 334 Dearborn street, Chicago.

the battle. I don't believe one or two cigars hurt a man, but I never touch cigarettes; they are worse by far than cigars. I simply trained on the common sense plan—ate plenty and had plenty of sleep—and the most pleasing part of my exercise was bicycle riding. It made me forget that I was actually working hard."

Peoria Thugs at Work.

Charles F. Vail, well known in the cycle trade and a prominent member of the Peoria Bicycle Club, was severely dealt with by three toughs last week. When on Main street, directly opposite the court house, he accidentally ran into a man who was standing on the sidewalk talking to two other parties. The street was crowded with people at the time, and this caused the collision. Mr. Vail immediately apologized, though he very quickly found he was not addressing a gentleman, but a hoodlum, who at once pounced on him without giving warning. His two pals joined in the fight, and in less than a minute Mr. Vail was lying in an unconscious condition on the sidewalk. The toughs, after seeing what they had done, made quick tracks for the river, closely followed by a number of men who pursued them for a half-dozen blocks. It being late in the evening and dark they made good their escape. The hospital ambulance was called and Mr. Vail was conveyed to his

home on Seventh street, where a physician was called and dressed his wounds.

Miscellaneous Trade Gossip.

Hereafter the Secure will be handled by more than one agency.

Kirkwood, Miller & Company want a Chicago house to handle the Telephone and Kite. These wheels have had a successful season and have earned a good reputation throughout America.

Ned Oliver has closed with the Raleigh people and hereafter Garford's saddles will be fitted to Raleighs. The three-coil saddles were the ones which impressed Mr. Angois most favorably.

The manufacturers of the Parade, Pullinger & Company, are now in a position to appoint agencies for the United States. The Parade is an A 1 wheel and extremely popular on the continent.

Vandergrift & Company, of William street, New York, propose to make a bid for the handling of cycles and other goods between England and America, in a way that will command the attention of the trade.

The Illinois division has published an alphabetical list of towns in Illinois, giving the name of each local consul, the league and the best hotel and the number on the road-book map. This would lead one to believe that the best hostelry is not always the league "joint."

An Improved Brake.

A Chicago man, traveling with his wife in Switzerland, accompanied by a guide, was astonished to see the original of this scene in the Tete Noir Pass on the road from Martigny to Chamounix. The cyclist was coasting down a road some fifteen miles in length which was a very steep grade, and the only safe way to make the descent a wheel was to hitch a good-sized tree to the wheel to act as a drag. The last issue of Sporting Life contained a paragraph which describes the method of coasting in Switzerland exactly as shown herewith. The Chicago man actually saw it.

Athletic Club had decided to go into the finish business once again. Corbett gave some exhibitions for me at Portland, Oregon, and his popularity filled the largest building in the city, as his fame as instructor of the Olympic club had preceded him. While in Portland the "nimble professor" (a title Knapp gave him and by which many Portland people address him) became interested in bicycle riding, and soon mastered the ordinary. He tackled the safety later and used the wheel a good deal in his training, and here cycling comes in for praise. The noted athlete called at the REFEREE office recently after sending the following letter:

THE WHEEL FOR TRAINING PURPOSES.

COLEMAN HOUSE, NEW YORK, Sept. 20, 1892.—
Friend Morgan:—Please pardon my seeming

young Olympic professor, for he well earned the title. Calling at the Coleman House Friday morning I had a chat with the handsome and stalwart "Pompadour Jim," as the papers call him. I also had the pleasure of renewing my acquaintance with his handsome wife, who was a schoolmate of her husband at San Francisco. My visit was for information as to how he trained for the battle which meant so much for him, his family and friends.

"Well," said Corbett, as he munched toast and devoured lamb chops, "I trained just like I did in Portland; I did plenty of hard work and got anything I wished to eat of a nourishing kind, and I drank moderately of any drink I fancied. I smoked one or two cigars a day, but stopped them a few days before

THE SIMONDS ROLLING MACHINE CO.

A New England Concern Which Supplies Cycle Makers With Millions of Balls Annually.

(Fitchburg Daily Sentinel.)

Not only does this rolling-machine company add greatly to the prosperity of the city, but it gives Fitchburg the distinction of possessing the only mill of its character in the world. It was started in 1886, for the purpose of manufacturing, on a large scale, bicycle balls, pedal pins, crank axles, pins for the Westinghouse and other car brakes, and articles which have to be perfectly accurate in order to be of use.

One hundred skilled workmen, on an average, are given employment, and the expensive machinery used is all made in

GEORGE W. WEYMOUTH,
Manager Simonds Rolling Machine Company.

the works. The rolling-machine, from which the company takes its name, is one of the wonders of this advanced age, and was invented by Mr. George F. Simonds, the president of the company.

Since the introduction of the bicycle, the old-fashioned anvil has not been able to meet the demand for balls, pedals and other small parts of this machine. The balls, especially, need to be perfectly accurate. At the works of the Simonds Rolling-Machine Company balls are turned out by the million. Not only that, but they are tested and tried, so that if they vary the thousandth part of an inch they are thrown out as seconds, thirds, etc.

The reputation of this mill is such that they supply and deal with every bicycle manufacturer of any account in the United States. The customers of this company for brake pins comprise between fifty and sixty railroad corporations, while the products of the busy works are shipped to every state and territory in the Union and the Canadas.

The fact that the business of this now universally-known concern has quadrupled within the past two years speaks volumes for the skillful management and the demand for perfect work.

The grinding machine, like the rest of the machinery, is made in the works and has been proved the best in the world. The steel balls, after they are ground and tempered, are sent to the inspecting

room. A small quantity at a time are rigidly examined, and as a last trial they are put through the testing machine. If they vary one-half of a hair's breadth they fall into a seconds box.

While the writer was permitted to stay and examine the wonders of this testing machine, it may be said that few were other than O. K.

This manufacturing industry, like any new business, was hard to start. Several managers failed to bring it to a paying basis. The company owes a greater part of its success to able management the past two years. The officers of the company are as follows: George F. Simonds, president; Chauncey Smith, vice-president; Edward Sawyer, treasurer; G. W. Weymouth, general manager. The directors of the company, like its executive officers, comprise men of high financial standing. They are as follows: William H. Forbes of the American Bell Telephone Company; John E. Hudson, president of the same; Colonel Livermore, president of the Calumet & Hecla Mining Company, and Alfred Bowditch, all of Boston, and Fred W. Taylor of Philadelphia. The executive committee are Messrs. Chauncey Smith, Edward Sawyer and G. W. Weymouth. Mr. G. W. Weymouth, the efficient general manager, who has been a stockholder since the start, is a young man possessed of more than the average business capacity.

Mr. Weymouth was born in West Amesbury (now Merrimac), and was brought up in the carriage-making business. He came to this city in 1882 and started a carriage repository at 453, 455 and 457 Main street, which business he still carries on with marked success, in addition to the management of this rolling mill, which he has by personal application brought to a thriving standpoint. Since he became a Fitchburg man he has ever interested himself in its development, and it is the energy of men of his calibre that has made the city assume its recent rapid strides to the front. He was one of the four of the members of the Board of Trade who induced the Iver Johnson Company to manufacture bicycles in Fitchburg, with the well-known gratifying results. He has also served one year in the city government as member of the council from ward two, and after having received the nomination to the upper board he declined the honor.

Mr. Weymouth is a member of the Merchants' Association, the Park Club and the Fitchburg Athletic Association. He is also a director in the Fitchburg National Bank, and was one of the promoters of the Fitchburg and Leominster street railroad, of which he is a director. He was also one of the founders of the Orswell mills, and has been on its board of directors since its start. He is, as well, a director in the Worcester Society of the Aetna Life Insurance Company, the Fitchburg Board of Trade, a member of the board of trustees of the Fitchburg Savings Bank, a stockholder in the Wachusett National Bank and the Fitchburg Gas Company, and vice-president of the Rifle and Gun Club.

Few business men, on the whole, are more active than is the general manager of the Simonds Rolling-Mill Company. He is naturally fitted to successfully control an enterprise of such magnitude and recognized benefit to the modern manufacturing world.

The Eagle Is Flying.

The Eagle Bicycle Manufacturing Company, of Torrington, Conn., has

been for some time past exhibiting to the trade throughout the country a model of a beautifully designed thirty-pound wheel, which will be its leader for 1893. The wheel at this weight will be thoroughly guaranteed for all ordinary road use. It has been received very favorably by experts in the trade, and the Eagle company can be considered "the early bird." In competition with feather-weight racing wheels, the Eagle won several firsts at the Baltimore tournament, Sept. 21; also showing up well at Philadelphia. It all but secured the first time prize at the Boston A. A. twenty-five-mile road race, which had ninety-five starters. Mont. Scott rode the Eagle from scratch, securing second time prize—one second slower than the time winner.

A. Kennedy Child.

Some time ago we presented a picture of Kennedy Child as one of the "Men we all know," and spoke of that side of his career which one is liable to see only on occasions like league meets and such. Kennedy in business life, however, is a different man. Behold him. His career in the cycle trade dates back some years,

but for the past three or four years his energies have been devoted to the interests of the Warwick Cycle Manufacturing company. He holds the position of superintendent of agencies, and is a visitor at times to all parts of the country as far west as Chicago. When on business bent he attends strictly to it, hence he is known, and well known, to every prominent dealer in America.

Faults of the Trade.

"There is a tide in the affairs of men
Which, taken at the flood, leads on to fortune."

Yet, when we look over our memoranda of the ebb and flow of the cycle trade in general for several years back, we cannot help but say that there have been many concerns which raised their handle bars too high, and through mismanagement and the aspirations for sudden avarice, were compelled to lower them. The cycle trade, generally speaking, has for many years traversed a course far from the orthodox maxims of successful business careers. This is perfectly obvious to a practical business man of the old school, and it is strange that the founders of cycle enterprises have followed too much the old saw "live today and die to-morrow." I am not going to preach a sermon on this text, for to preach to cycle makers and merchants of the present day would be, with few exceptions, like trying to show a know-it-all novice how to repair a tire; but a few glittering generalities might be received by the benighted cycle manu-

facturer or merchant who will doubtless make his advent into cyceldom shortly.

THREE CLASSES OF TRADE.

I might prefix my remarks by dividing the trade into the three classes which have existed: (1) The manufacturer or merchant who handles cycles and accessories solely; (2) the manufacturer or merchant who handles cycles, etc., in conjunction with another or different class of goods; (3) the manufacturer or merchant who grasps at everything in the way of merchandise, both staple and otherwise. One thing done well is better than many things undertaken and half done. If one embarks in a venture to manufacture, produce or market coal, it does not necessarily follow that because we use coal mostly in winter we must plunge into our enterprise to manufacture ice in the summer; or, if we are marketing furs, it is not necessary to market electric fans in the summer in order to raise the business profits a hundred pegs in a fiscal year. A department retail establishment is one thing and is not a diverging of energy; but to generally mix up grindstones, bicycles, carpets and ship chandlers' goods is chaos that leads not to marked success in any one direction. True, a concern might think one class of commodity would help to sell another, but when energy and tact are so unconcentrated, so centrifrically diversified, how could it be possible? It reminds one of the shoe fable—of the boy who said the water came in a hole on the side of his shoe, and was told to cut a hole in the other side and let the water out.

WHEELS SOLD TOO EARLY.

There have been many new makers in the states, and some of the older ones in the last decade, who have somewhat upset the stability of the trade by getting up samples and hawking them all over the country and making deals seven months ahead for many more machines than the prompt output of their plant would justify. A policy of this description could only be adopted by a concern which loses confidence in its ability to find a market for the product it can promptly guarantee after considering the delays attendant upon the receipt of raw materials, etc., or which has directors who think that in large, black orders (long before they start the factory engine) is where the profits lie. The manufacturer who faithfully supplies five distributors early, each with one-fifth of his fanciful monthly output, will be more successful in the long run than he who, with capacity of only two hundred machines a month, attempts to supply thirty distributors whose requirements are over this proportion monthly. Thus few jobbers or merchants, unless manufacturers sing another tune, can yet push the interests of one or two makes solely. I am of course referring to prime, first quality goods, or what is termed by the United States custom appraisers as quality A. The result of this loss of confidence is evident to many who have oft heard the chant—

Samples in January,
So many in February,
So many in March.

The ultimatum of this plan has been that the trade is left as early as September each year in an apparently overstocked condition, because the makers seem to believe that throughout the best seasons of the cycle trade, to attempt to partially supply thirty is better than to fully supply five. The merchants will stand by the manufacturers if the manufacturers will stand by the merchants.

MANUFACTURERS AT FAULT.

When, some time ago, I came across a cycle merchant with twenty-three agen-

This has been proven by Actual Tests. The letter

below explains itself:

HARTFORD, CONN., July 11, 1892.

G. W. WEYMOUTH, ESQ., Gen. M'g'r Simonds Rolling Machine Co., Fitchburg, Mass.

DEAR SIR:---Replying to your favor of the 9th inst., would say: That we did make a very thorough test of your steel balls in connection with other makes. All the balls we used were purchased in open market, so as to provide against any selection whatever. This was done for the reason that they would show the run, or about as the balls would be delivered from the manufactory. For uniform strength and size yours far exceed any of the other makers, and, therefore, as the result of the above test, we decided to use the balls manufactured by you.

Yours very truly,

25 CENTS

For the "Perfect" Pocket Oiler, the best and neatest oil can in the world. Superior to all others in neatness, appearance, general utility and durability. A necessity to all riders who wish the best of everything.

CUSHMAN & DENISON,

172 9th Ave., N. Y.

**"PERFECT"
POCKET OIL HOLDER**

Best and most convenient device for carrying an oil can on a bicycle. Thoroughly adjustable and easily attached to any part of the machine; no rattling; handsomely nickel-plated. Price, 25c. each.

CUSHMAN & DENISON
172 9th Ave., - New York.

**"PERFECT"
Pneumatic Pump Holder**

Similar to oiler holder, but slightly larger. Pump is always convenient and vexatious delays avoided; handsomely nickel-plated. For sale everywhere. Price, 25c. each.

CUSHMAN & DENISON
172 9th Ave., - New York.

NEVER MIND THIS!

JOHN SHAW & SONS, Coventry,

THE OLDEST AND LARGEST

Hollow Fork Manufrs. in the World.

MAKERS OF ALL KINDS OF TUBE WORK.

cies for different makes, I said to myself, "Here is a vivid example of the lack of confidence brought about by the promises, as per the old chart, which many cycle merchants can call to mind. The trouble is that with so many agencies the chance of a dealer securing as many of the particular make or style that strikes the popular vein in the right season, has been certainly no better for a number of years, and the question of supply, demand, success and the consumption of the output in cycles looks as if the manufacturers were the only ones at fault. If they will not restore confidence among the trade, they must surely lose large amount of prestige their goods may obtain. The success in business known in almost every line, and which has brought many a concern of the present day to a top notch of fame, has been due to the mapping out of a programme, and carrying that programme through; but many cycle manufacturers and merchants spring up like mushrooms and without some programme sell 3,000 machines, when they know they cannot supply, between January and September, a quarter of that number. The slightly debilitated condition of the market at present in the states is due largely to the makers not figuring to supply the trade early, and it remains for confidence to be restored before early spring rolls around, or a competition for the most shop-worn safety of fall delivery, '92 crop, would be *appropo* at the fair.

OUTLOOK FOR 1893.

The prospects of a good trade throughout the states in 1893 are decidedly bright, although at present, in England, second qualities find a market with difficulty and the better grades are moving with more or less fatigue, owing to the large supply awaiting consumption. There is absolutely no prospect that any decided universal reformation in tire, pattern or mechanism will disturb the equilibrium of trade for next year on either side of the pond. A few late productions in the line of novelties, such as gears, may find a few spasmodic buyers. In the central states the fair will have no serious effect on the cycle trade, as many anticipate, and the current price of standard goods will meet with no material change until the house and senate together are less favorable to a high protective tariff.

In the matter of material, the cycle standard has reached in the better grades a higher mark. The quality of tubes and rims, the tensile strength of spokes, the ingredients of tires, the brackets and bearings and the luxurious ease of saddles are all going through an age of comparison. In examining some quarter-inch bearing balls, taken from a first-class machine, I found them to vary between one and three-tenths of an inch, which somewhat strengthens my opinion that we will see the day when the finest productions in safety bicycles will sell at \$250. I have seen shotguns made in 1890 that cost \$1,000, though to the uninitiated eye one appeared at a short distance like an ordinary \$100-gun.

AN OLD ONE.

Something of the Ideal Pneumatic.

You take the Pennsylvania road, foot of Courtlandt street, New York, and in less than an hour you are landed in the little town of Passaic, N. J. When you leave the little depot a walk of a hundred yards will bring you to the large rubber factory of the New York Belting and Packing Company, and the polite young manager, A. F. Townsend, will show you around, if you are a press representative or a customer. He will show you rubber in the state when extracted

from the tree and cooked by the South American, and then show it in tires of all kinds, incidentally telling you that Manager Strause, the tire representative, is a hustler and a great man. You will then take a ride to the suburbs, where tall, graceful trees and the real estate man's signs abound. You will see a two story and basement red brick factory, with the names of Phelps & Dingle thereon. Walking up the steps, the writer entered the factory, and a glance in the office and at the machinery on the first floor was sufficient to show that, it being lunch time, all hands were feeding. The REFEREE man, however, proceeded on a little tour of the factory alone, interviewing the inanimate machinery and heaps of pneumatic tires and rims that were scattered around. Just as he was examining the brazing of a rim a man said "Hello!" He introduced himself as one of the Phelps & Dingle staff of machinists—J. S. Hooper, who says a steady job with a moderate salary is ahead of the prospective millions of the hopeful inventor. He had given up experimenting with a rim-roller machine and other devices, and accepted a position with Phelps & Dingle.

Seeing a lot of new lathes, the REFEREE man suggested that it looked as if business outside of tires and rims was possibly in view. Mr. Hooper replied that the firm had not made him a confidant of its intentions regarding the new

decide the question in a few weeks. Our tire is simplicity itself."

HOW THE FACTORY IS ARRANGED.

A walk through the works shows that the basement has been used and will be in the future for the heavier work. The first floor is used for machinery space, the manufacture of valves and air pumps, and the company's office is situated here also. The second floor is used for tire making and rim rolling. Mr. Phelps said that they could turn out 50,000 pairs of rims and tires next season if needed. The firm is now experimenting with a self-closing rubber valve on which is the principal of the self-healing pneumatic tire, and which bids fair to do away with the automatic brass valve now in use. Mr. Phelps has applied for a patent, and has used the new valve on his own wheel this summer. He is satisfied with the merits of the scheme to do away with the brass valve. He did not wish full particulars of the invention to be made public until his patents are granted. To illustrate the rapidity with which his tire can be taken off and the inner tube exposed for repair in case of puncture, Mr. Phelps asked the REFEREE man to hold the watch on him, and from the word "go" until he had the inner tube exposed was just forty-eight seconds. Mr. Phelps is a broad-minded man, gives his brother inventors in the tire business great credit, and generously

machinery, but it looked as if something was up. Mr. Hooper further said that I would find Mr. Phelps, the mechanical and practical man of the firm, on Gregory avenue, next to the Methodist church, and as the Methodists of Passaic boast a taller steeple than the Baptists or any other denomination in town, I was soon ringing the door-bell of the mechanical portion of the Phelps & Dingle firm. Being ushered into a pretty parlor by Mrs. Dingle, the object of my solicitude was found stretched out on a lounge chair, and his thoughtful expression would lead one to suppose he was wrestling with some new mechanical problem. He told me, after a little probing, how he became interested in pneumatic tires and rims. "I bought a Columbia and fitted Dunlop tires thereon," said Mr. Phelps, "but soon saw that some scheme more simple to fasten the tires on and to take them off was needed, so I invented my present tire and exhibited it at the Philadelphia show last February. We were then making gas engines, but the tire business promised to take up too much of our space and time, so we have stopped all other work and go in for tire and rim making exclusively. From the present outlook and with a meritorious article we hope to do well. We have already received an offer from a large manufacturer to make tires exclusively for him, or to allow him to put capital into our business. We will

spoke a word for all, especially Morgan & Wright.

CONSTRUCTION OF THE IDEAL.

In speaking of the firm's tire Mr. Phelps said: "We call it 'the Ideal pneumatic tire' because it comes the nearest to the much talked of 'tire of the future' of anything that has heretofore been offered on the market of the world. It is light, strong, durable and resilient. It is shapely and ornamental in appearance and possesses in a remarkable degree all those qualities which constitute what is commonly called a 'fast tire.' It is regularly fitted to an ordinary concave rim, such as is used for cushion and Boothroyd tires, and can be stripped from the rim entirely and replaced again in a few minutes time by anyone. It is easily, quickly and permanently repaired. Six inches of the inflation tube can be exposed for repair, as shown in the cut, and replaced again ready for inflation in less than one minute. We use the very best rubber. The linen used in its construction is the very best that money will buy, and not a particle of cotton or cheap ducking is used. The wires which secure the cover to the rim are Bessemer steel. The loops at their ends are carefully brazed and each wire is tested with a strain of three hundred pounds before it is trusted to take a place in the construction of a tire, and then coated with varnish to prevent rust."

DETAILS OF THE WORK.

The tire is built in two separate parts. The inflation tube (I) consists of a single flexible rubber tube, its ends joined together to make a continuous air-tight ring in which the valve is securely fixed. These rings, after being completed, with their valves, are tested with an air pressure for several days before they go into tires. The cover (C) consists of a rubber tread with a linen lining to give it strength. This lining is constructed with hems on its two edges to carry the wires, and a flap which passes under the air-tube protecting it from contact with the rim. Wires are threaded into the hems, passing around the entire circumference of the cover, the ends passing each other and protruding from the hem about a foot. These protruding ends are provided with loops at their extremities which hook upon studs in the rim. There are four studs in each rim to receive the ends of the two wires, and one of these studs is provided with a screw to hold the loop down when in place. This screw stud is the last one to be secured when putting on the tire, and the first one to disengage when removing the tire or any portion of it for repairs. In securing the wires they are not drawn tightly, but lie loosely in the center of the rim before the tire is inflated. Inflating the tire forces them up the inclined sides of the rim, and the harder the inflation the tighter the wires. They are just short enough so that they cannot jump over the edges.

The weight of a 30x1 3-4 inch full road tire is two and one-half pounds; a racing tire of the same dimensions weighs one and one-quarter pounds. These tires have been repeatedly and severely tested during the season of 1892 by heavy riding for several thousand miles. These tests have proved beyond question the following points:

1. That the improved method of fastening the tire with wires is simple, practical and positive, forming a firm contact between the tire and rim that is absolutely proof against water, gravel or dust; and the tire cannot become loosened by use or disuse, heat or cold, wet or dry weather, or any other condition.
2. That the heavy pressure against the rim prevents any possibility of creeping, not a single tire having at any time shown the least tendency to creep.
3. The construction of the tire is such that there is practically no internal wear, which, it was well known, is the most frequent cause of failure in the original crude form of pneumatic tire.
4. That repairing a puncture by the roadside is not alone the work of an over-active imagination, but a matter of fact. Punctures in Ideal pneumatic tires have been repaired by the roadside on several occasions in less than fifteen minutes.

Trade Booming in Peoria.

PEORIA, Oct. 11.—A. Featherstone, of pneumatic tire fame, stopped off in Peoria one day last week while on his way to St. Louis. The fact of his winning the tire suit against Bidwell placed him in a very easy state of mind. While here he talked wheels for 1893 with a well-known jobbing house. From St. Louis he travels direct to New York and Boston, where he intends spending a few days looking after his tire factory, expects to be in Chicago again by 20th of the month.

J. Willard Parker, president of the Niagara Machine Company of Buffalo, was in Peoria last week with a sample of the Niagara pedal for 1893. This concern is indeed putting out a very neat pedal, being entirely dust proof and weighing exactly two pounds to the pair. This was Mr. Parker's first visit

3-BEAUTIES-3

The James Safety.

"JAMES" SPECIFICATIONS.

DIAMOND Frame, Warwick Hollow Rim, our unequalled Semi-Tangent Direct Spokes, Southard Cranks, Adjustable Handle-Bar and Seat Pillar, Perfect Chain Adjustment, Ball Bearings throughout (including head), Lamp Bracket, geared to 64 or to suit purchaser, quality ABSOLUTELY PERFECT, FULL GUARANTEE.

FRENCH & SONS, Balham, England.

AGENTS WANTED.

The Agency for the above has been secured by the

JAMES CYCLE CO.,

113 Adams Street,
CHICAGO, ILL.

to Peoria, and he was certainly very much pleased with the city. He took occasion to remark that he thought there was more bicycle business done, in proportion to the size of the city, in Peoria, than any other city in America. He had no difficulty whatever in securing two or three good orders.

A. A. Barrows, representing the Rudge Cycle Company of Coventry, Eng., was in Peoria this week settling up last year's business with Rouse, Hazard & Company, and making a deal with them to handle Ridges next year. The Rudge has given very good satisfaction, and Rouse, Hazard & Company will in all probability place a good order with him for 1893.

H. Kirkwood, senior member of Kirkwood, Miller & Company, has ordered a specially-built Telephone cycle for next season to weigh twenty-six pounds. "Kirk," as he is familiarly known, is fifty-five years old and a very enthusiastic wheelman. It is safe to say that when he gets his new twenty-six pound machine he will brush the dust off of some of the boys on their club runs.

C. F. Bostwick, who looks after the sundry department of Rouse, Hazard & Company, is off on a two weeks' vacation.

LAUREL.

Sercombe-Bolte's Trade Novelties.

This popular firm is out with two new novelties, and if practical utility stands for anything they are destined to be more than appreciated by wheelmen the length and breadth of the land. The first is a new device for regulating the handle bar to suit the taste and convenience of the rider, who can raise the bar while riding in the city or lower it for a scorching position. The post that supports the handle bar is made with a groove in it, which permits a cam to catch the post and hold it firmly. It is regulated by a thumb lever. The same principle is brought into use in regulating the seat post, both of which work to perfection. F. H. Bolte is the inventor.

What the Starleys Say.

Learning that J. K. and W. Starley, the pioneer makers of Coventry, were expected to arrive at the Astor House, New York, from Liverpool, a REFEREE representative looked out for them and had the pleasure of renewing an acquaintance made four years ago at Coventry. The two gentlemen looked well and said the trip across was a good one. Arthur A. Taylor of the Taylor Cycle Company, Chicago, returned home with them. Knowing that the views of the Starleys on the future of the cycle trade would command as much attention from American manufacturers as they would in England, the REFEREE asked J. K. Starley to give his views, and was first met with the query, "What do Americans think of the geared ordinary?" Mr. Starley then proceeded as follows: "I have little faith in the future of the geared ordinary, and do not believe it will have a successful future, as the gearing of the front wheel practically makes the machine a unicycle, and places all the strain on the front wheel. Further, when you gear the ordinary you take away the only charm the old ordinary possesses. There may be a few who will go in for the mixture of safety and ordinary, but I do not think they will become a rage in their present form, and will not compete successfully with the Rover type of wheel. The geared ordinary cannot be compared with the safety for grace, speed or simplicity, as those three points count for a good deal in the estimation of the rider. We will not make any radical change in the Rover next year. The only improve-

ment will be in details connected with the fittings. We are perfectly satisfied with the Rover as it is at present. When we invented and made the first Rover safety we knew we had hit on a good thing, but hardly expected it would become world famous and taken as the standard type for the world. No, there will be no radical change next year in patterns by English manufacturers, and the only change will be in details. Of course the tire question is still in an experimental stage. In regard to the two shows in England, I am inclined to the opinion that the National show by the manufacturers' association will be the best by far, as all the principal manufacturers will not exhibit at the Stanley show, because dissatisfaction has existed the past four years over the way it has been conducted. Two shows are not needed, but the principal manufacturers object to being dictated to regarding their business by a club or by individuals, and the National cycle show will undoubtedly be the show of the future."

WILLIAM STARLEY'S OPINION.

William—better known to the English trade as "Bill"—Starley, spoke as follows: "Yes, the report that the Starley Brothers will spring something new in the way of a frame is correct, and until my patents are passed at Washington I would rather not say anything regarding the form and merits of our invention, but you can say that it will be something very good. We expect great things from it. Our Psycho safety will be away up in merit next season, and I am now here for the purpose of pushing my patents through and arranging for a big supply of our wheels for American trade. I do not believe in two shows for England, and will exhibit at the only authorized one by the leading manufacturers—the National—in January. This is my sixth visit to America, and I brought my son with me this time for company. J. K. Starley, of J. K. Starley & Company, is my cousin and business rival, but we travel together on this trip and exchange views and assist each other in a business way all we can." This is J. K. Starley's first trip to America, and after a short walk around the business portions of New York, down town, he spoke in the highest terms of the greatness and activity of the panorama of American business as it can be seen any day in the metropolis. Taking an elevated train with W. Starley, Sr. and Jr. (the latter splendidly built lad of fifteen, standing five feet ten, whom the father says "works at a lathe, and can move a bit on a safety"), a visit to Bidwell's was made, where the palatial store was duly inspected and admired by the Coventry visitors.

The views on the English trade were similarly commented on by C. Vernon Pugh of the Whitworth Cycle Company, H. Hadten, Bayliss, Thomas & Company, and Percy Stevens, the Coventry Manufacturing Company.

New American Devices.

A NEW BAND BRAKE.

The invention of James L. Reaney of Bradford, Eng., provides for a hub brake, particularly applicable to pneumatic tired wheels. On the axle (H) is mounted a screw collar (E) which has an arm (A). A female cone (A) is mounted upon the collar (E) by the central hole (D) through its boss and riveted in that position so that the collar is free to turn with it, but is prevented from end motion in regard to it. The arm (E) is connected to the brake rod (G) which is operated in the usual manner, so as to partly turn the collar in the proper direction to move it upon the screw toward the

wheel. The pin (B) keeps the cone (A) from rotating, being firmly fixed to the periphery, loosely fitting the eye (K), secured to the fork (L). The male cone (J in figure 1) is rigidly secured to or forms part of the hub (J), and its periphery fits the interior of cone A, which is provided with a leather liner (C). The two cones may be renewed—that is, the

female cone may be secured to the hub and the male cone mounted upon the screw-collar. The claim is that in a hub-brake, the combination, with the wheel-spindle and the hub, said spindle having a threaded portion, as described, of a cone secured to said hub internally, an threaded collar revolubly mounted on the threaded portion of the spindle, a second cone mounted upon said collar and adapted to be moved laterally thereby to cause it to engage the first cone, and an operating lever connected at one end with the said collar and adapted to turn the same as described. The combination, with the cone (A) of the pin (B) fixed thereto and arranged to engage a stationary portion of the velocipede so as to keep cone (A) from rotation without materially interfering with the side motion of said cone (A) substantially as herein shown and described, and for the purpose specified.

PATERSON'S PNEUMATIC.

Thomas W. Paterson of Dublin has been granted a patent by the United States patent office for a pneumatic which seems to be somewhat on the order of the 1893 Dunlop. Two tubular channels or passages (D) are formed in

the outer cover (G), one at each edge, and through these wires (K) are passed. The ends of the wires merge from the passages (D) through holes in the rim (A). The ends are threaded and the nuts (L L) are screwed on the wire and

against the rim. This brings the edges well into the groove (B) in the rim (A). The valve (M) is attached by the usual method.

Recent Patents Granted.

The following is a list of recent bicycle patents, reported especially for the REFEREE by W. E. Aughinbaugh, patent attorney, Washington, D. C.:

483,559, velocipede saddle; Jonathan A. Hunt, Westborough, Mass.; filed March 16, 1892; serial No. 425,158.

483,583, pneumatic tire; Thomas W. Robertson, Dublin, Ireland; filed Sept. 17, 1891; serial No. 405,968; patented in England Nov. 20, 1890.

483,585, signal apparatus for bicycles; Arvid J. Sandgren, Hartford, Conn.; filed Dec. 7, 1891; serial No. 414,230.

483,621, brake for bicycles; David L. Roaney, Bradford, Eng.; filed March 5, 1892; serial No. 423,958.

483,661, bicycle; Henry W. Thurston, Woodside, N. Y., and Erik Stenersen, Rockaway, N. Y., assignors of one-third to George R. Barns, Brooklyn, N. Y.; filed Nov. 20, 1891; serial No. 412,484.

483,785, velocipede saddle; Fitz M. Stocum, Erie, Pa.; filed Nov. 28, 1891; serial No. 413,484.

Trade-mark, 21,833; velocipedes and parts thereof and wheels for use in light vehicles; Ames & Frost Company, Chicago, Ill.; filed Sept. 8, 1892; essential feature, the word "Imperial."

New English Inventions.

These abstracts are prepared immediately after the patents are applied for by G. Douglas Leechman, consulting engineer, Coventry, England:

[All persons interested in opposing the grant of a patent on any one of the undermentioned applications may, at any time within two months from August 31, give notice in the prescribed form of such opposition.]

No. 16,973. P. Davies' "Improvement in elastic tires and in means for s-curing the same to the rims of wheels." October 6, 1891.—The objects of this invention are, to obtain increased strength and to provide means for securing the tire to the rim so that the air-tube may be exposed for repairing or other purposes without the necessity of unsolulioning or unsewing the outer substances. Referring to the figure, the rim (B) is drilled with

holes at intervals through which hooks (C), made in one piece, are passed but not rigidly affixed to the rim. The two ends of the hooks are ground to a point. The air-tube (G) is protected from damage by covering the rim with leather (D), affixed to the rim and the edges of the rim are next outside the said leather (D) covered with sheet india rubber or other suitable material (E). Along the centre line of the concave side of the rim there is attached a strip of white half-strained sheep skin or other suitable material (F) wide enough to overlap on the tread of the air-tube (G) as shown at X. The air-tube (G) is of the ordinary construction, and to limit its expansion and to keep it in position on the rim a band (H) is employed. This band is formed of a continuous length of tape or similar material wound around itself in a close spiral, so that each succeeding turn overlaps the preceding one and doubly stitched near the edges forming loops (Y) through which wires (J) are passed and secured by the second row of stitching at each of the extreme edges of the band. The wires (J) are free to move within the loops and have their ends free and overlapping. Instead of having one wire forming a completed circle, at each edge of the band the wires may be divided into sectional parts in which case each of the ends of each section are made to overlap. On the outside of the band (H) a band of india rubber or other suitable material (K), preferably formed thicker at the tread, is firmly attached. This band (K) is sufficient width to form a complete covering and to encircle the wires at the edges of the band (H). A combined final covering is thus formed by the materials (H) and (K). This is affixed to the rim by passing it over the hooks (C) the wires (J) at the same time being caught over such hooks and encircling the convex side of the rim of the wheel. To get at the air-tube (G) it is deflated, the circumference of the wires (J) slightly diminished on one side of the wheel by easing their overlapping portions and releasing the same with their attachments, from the hooks (C) thereby enabling the jacket to be turned back.

No. 18,152. H. Kesterton's "Improvements in cycle wheels." Oct. 22, 1891.—In the specification of a former patent (No. 15,811, 1890,) granted

ROUSE-DURYEA CYCLE CO.,

89 G. Street, PEORIA, ILL.

to this applicant, there is shown a pneumatic tire and rim in which there is an india-rubber jacket surrounding an inflated tube, and in which the rim is of trough-like form, having tubular edges with the edges of the jacket nipped and held between the tubular edges of the rim. According to the present invention the rim (A) is formed so as to give a wider support to the tire. The tubular flanges (? edges) are dispensed with, but, the dovetailed recess (B) to receive the edges (C C) of the jacket (D) is retained. The edges of the rim are extended outward from the recess and inclined somewhat downward so as to form a broad base to rest upon the tire and conform to its shape. To prevent the edges of the rim cutting the jacket they are doubled inwards, and this also adds to its stiffness. The rim is notched or perforated to receive the inflating tube. The jacket is lined with canvas vulcanized on; it has lips (C C), and these are covered in like manner exteriorly with canvas. The jacket is preferably made as a complete tube, with the lips in one, and they are cut apart after vulcanization. The lips of the jacket enter into the recess of the rim and cannot escape whether the tire be inflated or otherwise, so that the tire can only be detached when uninflated by being pulled out. (E is the air tube.)

English Dealers in New York.

New York is deluged with English manufacturing representatives, who are hustling for next year's orders, and getting them, too. If the successes of Messrs. Golder and Hadden are examples, the east will see plenty of British mounts on the road and path next year. The REFEREE representative has seen contracts for 1,500 and 1,000 machines, being orders Messrs. Golder and Hadden secured last week for New Howes and Bayliss & Thomas' well-known Excelsiors. Golder's contract is the most iron-clad instrument imaginable, and says Joseph Ketchum & Company, of Brooklyn, must sell, or dispose of 1,500 wheels within twelve calendar months. The well-known Howard A. Smith & Company, of Newark, secures the sole agency for Excelsiors for New England territory, and must sell at least 1,000 wheels.

Mr. Percy Stevens, of the Coventry Cycle Manufacturing Company, is spreading the Secure agency, and is satisfied with the sales in America so far.

Mr. Bednell, of Taylor, Cooper & Bednell, is racing around, looking after the firm's Raglan business in America. C. Vernon Pugh thinks the present an auspicious time to introduce the Whitworth to America, and after looking around New York, jumped to Toronto and will see Chicago.

A. Barrows thinks the Rudge will bear a little more pushing in America, and is west looking into the prospects there. J. H. and William Starley, of Rover and Psycho note, talked eloquently to the REFEREE man of the past, present and prospective future of their excellent wheels, and fled to the national capital the next day after their arrival in New York. They will be seen in Chicago shortly. Several other English trade representatives are said to be floating around that part and more are on the way here from Liverpool. It looks as if Mr. McKinley and his hosts are defied and the English trade is mustering its old guards for a final battle for American patronage. They certainly missed a fat field the past five years.

Pretty Good, This.

The Hon. Jake Bretz, of Liberty cycle fame, has returned from his wedding trip, and is once more assuring people that the Liberty is the best wheel made. Many of the general manager's bachelor friends are trying to make Jake believe that his Liberty will be considerably curtailed in the future.

Testing Elliptical Sprockets.

Elliptical sprockets are being made in New York by many people for experimental purposes, and there seems to be a good deal of caution used when the new idea is given a trial. A. B. Rich has made one for himself and expresses

satisfaction with what he calls "Rich's true elliptical sprocket," as he considers the Freeport idea a flat oval and not a true elliptic. W. J. Corcoran stated that several men used Elliptics in the Boston road race, and no beneficial results were noted by the users, so Boston is undecided as regards Johnny Johnson's persuader, and New York don't know about it.

Selling Long Visor Caps.

The Standard Cap Company, of 56 West Houston street, New York, is making a big reputation with its Eaton and long visor cyclists' caps. T. Mallinson, late of Coventry, Eng., is traveling for the firm through the east, and being an old cyclist himself, knows exactly the wants of the cycling public in head-gear. Mallinson is the inventor of the long visor cap and is meeting with splendid success on the road among cycle dealers, as the prices and quality of the goods sold command attention. Mr. Myers, manager of the Standard company, speaks in the highest terms of Mr. Mallinson's ability as a salesman.

To Attach to the Wheel.

The Cyclist's Time Companion is the name given a neat little clock with a stand and attachment to fasten to the handle-bar of a bicycle, where it can be always seen by the rider. The price is only \$3.50. It is always in view and saves carrying an expensive watch, besides "having the time always before you." The whole outfit is beautifully nicked, and so constructed that vibration does not affect the little clock in the least. It is sold wholesale and retail by Kuhn, 141 Broadway, New York.

Another New Saddle.

Fred C. Smith, of Newark, N. J., is making a saddle which he claims will jump into popular favor when he is ready to talk to the trade. Mr. Smith will make up a large number shortly, and to that end has purchased the machinery and fixtures of the Empire Factory, on Lawrence street.

Placing Excelsior Agencies.

Herbert Hadden, representing Bayliss, Thomas & Company, of Coventry, and formerly representative of J. K. Starley & Company, is a shrewd young Englishman, fully capable of holding his own in a talk on trade or making a deal for a thousand wheels. Naturally, Mr. Hadden thinks the Excelsior is the best wheel made in England. He says this seemingly without any fear or mental reservation whatsoever, and thinks all men (i. e. salesmen) who sell cycles keep in touch with the ancient who declared that "all men are liars" when they tell you about the immense sales they make.

Mr. Hadden makes his statement after consulting his contract, and thinks he will make two or three more such as he closed with Howard A. Smith & Company before he returns to Coventry. He talked in an interesting way of the English trade, also of a trip around New York with a party one evening last week, and left for Toronto on Friday. In regard to next year's wheel Mr. Hadden says the changes in construction will only be in minor details. He expects to be in Chicago shortly to appoint a good western agent in the World's Fair City.

Whitworths in America.

C. Vernon Pugh left New York for Toronto and Chicago last week. Mr. Pugh is one of those quick, conservative young men who leave a good impression and talk to the point. Before looking for agents for the Whitworth he looked over the ground and, becoming convinced that his firm's wheels would find a hospitable reception in America, he announced that he would like to hear from reliable people about territory. Mr. Pugh thinks Chicago and New York are two excellent distributing points and will likely have the two principal agencies at these points, with Toronto the headquarters for Canada. Speaking of F. J. Omond, Mr. Pugh thinks it quite possible that the English champion will visit America next year, but could not say anything definite, and further stated that Omond has not been in fine fettle the past season.

Represents the Secure.

Percy Stevens, who represents the Coventry Cycle Manufacturing Company, makers of the Secure cycles, is a young man who will not make himself conspicuous if he relies on his talking. It is extremely hard work to get Mr. Stevens to talk, but he knows much about the cycle trade, all the same, although not as good a talker as Herbert Hadden. Mr. Stevens is satisfied with the business done by his firm in this country, and is here for the purpose of broadening it. He will probably appoint additional agents for the sale of Secures. Mr. Stevens will not visit Chicago on this trip, and will return home in about ten days.

Showing the Airtite.

E. J. Howell, representing the Airtite Pneumatic Tire Company, of Boston, is becoming as familiar a figure on the streets of New York as the man on Broadway with his stocking supporters. If you see a man with a tired rim swung over his shoulder, coming along the street, or struggling against time "in exposing the inner tube" in a dealer's place in New York these days you immediately say to yourself, "That's Airtite Howell,"

The Flyer.

The cut herewith represents the Flyer, the wheel to be put on the market next season by the Illinois Bicycle Company, recently organized, at the head of which is H. J. Winn, formerly president of the Speedy company. The Flyer is to be high grade in every respect and light and strong. The company is already equipping its new factory, which will be large and very complete in every detail. Mr. Winn's experience in building the Speedy should enable him to turn out a wheel second to none on the market. Certain it is the Flyer has splendid lines and should and no doubt will prove a popular mount.

Bringing Out a New Saddle.

Henry Bergfel, a clever young mechanic of Newark, N. J., has for the past year been making bicycle saddles, saddle posts, etc., to order, but next year proposes to market some inventions of his own. To that end he advertises a

saddle which all who have seen declare to be as near perfection as possible. The patents cover the saddle pretty thoroughly. It is on the same principle as the Saladee saddle. Mr. Bergfel talked interestingly on leather, its good points and defects, and none but the very best quality goes into the Bergfel saddle, which bids fair to become popular when once introduced. Mr. Bergfel is the junior member of the Newark Nickel-Plating Company, which has quite a large plant for manufacturing purposes at the corner of Mechanic and Lawrence streets, Newark, N. J.

Featherstone Must Prove Damages.

"Yes, the suit was decided against us, but on one point only, and that the method of fastening the tire to the rim—the lapping process," said Secretary Loucks of the George R. Bidwell Cycle Company; "but as we had determined to discard the old system in favor of a new one the decision don't worry us at all. We have taken an appeal, and Mr. Featherstone must prove damages to get any benefit through the decision. We believe we had our rights fully justified to manufacture our tire or we would not have fought the suit. We have taken off all our old tires this week and replaced them with our new tire."

Atwater Back in Washington.

George S. Atwater closed up the Stover Manufacturing Company's Broadway store by order of the firm, and goes to Washington next week to engage in the sporting goods and cycle trade, backed by New York capital. The man who will furnish considerable of the money is thought to be William L. Duryea, who was manager of the Keating cycle store, next door to Stover's, on Broadway, and who also turned over the place to Keating last week. Mr. Duryea was born with the proverbial silver spoon in his

BIDWELL

PNEUMATIC TIRES, 1893.

During the past season we were at the head of the Pneumatic Tire business in the United States, looking to improve the tire for the season of 1893. Naturally we have not been idle in experimenting. We are **now ready** with our **new tires**, which surpass anything ever put on the market.

They Cannot Burst,

They Cannot Come Loose,

They Cannot Leak.

Before placing your order see them. A full description will be sent you at once.

GEO. R. BIDWELL CYCLE CO.,

306, 308 and 310 West 59th Street,
NEW YORK.

Tire Factory, 49-51 West 66th Street, New York.

mouth, and the cycle business was not, according to his ideas, the royal road to further wealth. The Keating company has placed the popular Jim Murphy in charge temporarily, and the Stover people will open down town.

Perrett is Hustling.

The diplomatic, slick and altogether handsome Billy Perrett is always a welcome visitor to Gotham, and if there is one dealer or manufacturer in New York who has not heard of Bretz & Curtis' Scorch saddle it is because he was in Dr. Jenkins' hands in quarantine. William was in New York last week and assisted in the festivities with Steve Golder, Howell, Merrick, Callender, Newman, Hadden and a "friend" one night last week. It was a lovely time, sweet William declares.

Busy Making Rims.

R. H. Franklin & Company, the company being Charles A. Kirkland, a hustling and able seconder to R. H. Franklin's efforts to make the American trade understand that they make rims in quantity and quality, are busy with their specialties. The factory is situated near the Brooklyn bridge, 79 and 81 Washington street New York, and go when you will the firm is always too busy to talk. Franklin & Company are doing business with houses as far off as San Francisco, and make several good specialties outside of rims. The firm is a reliable one and "prompt attention to all orders" is their motto. Knowing the excellent workmanship and material used in their goods, a large jobbing house recently made Franklin & Company an offer to take all they could manufacture.

Combined Cycling and Boating Machine.

Land and water have been traveled over by vehicles or devices wherein each was adapted to its special sphere, says the *Scientific American*. Seldom have land and water been laid under contribution by a single mechanical device. It remained for the genius of a citizen of Chicago to devise a machine for both use and pleasure, which should enable his fellows to traverse with great speed either land or water, proceeding readily from one unto the other. This Thore. J. Olsen has done by means of a combined tricycle and boat, or boats, so connected that they operate together most perfectly on either element, although it takes but a moment to separate the boat from the tricycle.

In the accompanying sketch the machine is shown ready for use. It consists of twin boats rigidly connected and

a tricycle connected to said boats so ingeniously arranged that the machine is propelled and steered by the same mechanism. This machine has the most perfect stability in either element, is light, slightly and attractive, producing the liveliest interest when exhibited on account of its originality. In this device the traveler may carry his necessary baggage, tools and hunting and fishing tackle, yet the whole device without load weighs but from fifty to seventy-five pounds, and while it is arranged to carry but one person on land, its buoyancy is such that it will carry two and

sustain three or more persons on the water. Thus the traveler, the pleasure seeker and the military man will not be hindered from reaching each his destination on account of floods, washed-away bridges or no bridges or pontoons. This device has been patented and its capacity and popularity demonstrated during a part of the past season.

Trade Jottings.

J. K. Starley arrived in Chicago Monday.

Cushman & Denison contemplate making a high-grade wheel next season.

Warman & Hazlewood are now ready to fill large contracts for Foley & Webb saddles.

The Chicago Bicycle Company will move two blocks farther south on Wabash avenue Nov. 15.

H. A. Lozier & Company have on the way two Crypto f. d. safeties, a roadster g. o. and a light roadster f. d. safety.

Messrs. Mushing, of the Centaur company; Lucas, the lamp manufacturer, and Townsend, of Coventry, arrived in Chicago Sunday.

Lumsden used Dunlop racing tires through the east and west, and said "That pair of tires is the best that were ever put on a wheel."

ing on many makes of wheels are bringing them a nice fall trade.

Mr. Mushing, of the Centaur company, informs us that so far he has placed some very good orders. He is now in Peoria to close with Kingman & Company, and will be in Chicago next week.

Sobotka, on a Peregrine won the race from Vienna to Trieste, a distance of 310 miles, in 23 hrs. 45 sec., riding the same machine throughout. The Peregrines seem to be invincible on the road just now.

Quite a large number of New Yorkers will go to the Stanley show, from the present outlook. L. H. Johnson, Bidwell, Hendee, E. J. Willis, and Howard A. Smith, of Newark, are already booked to go.

There have been several auction sales of high grade pneumatic wheels in New York the past ten days, the \$135 wheels going for \$80. Fairly good cushion wheels and some pneumatics brought from \$50 to \$60.

On Sept. 23 Warman & Hazlewood's upper store was broken into and a lady's clincher tire Rival safety, No. 30,912, was stolen. The thief was seen and is described as being about five feet, six inches in height, with a small, dark mustache, and dressed commonly. A

Mr. Lucas has closed a contract with the MacIntosh-Huntington Company, Cleveland, whereby the latter will handle Lucas' specialties for the western states.

Davis Brothers, 718 Market street, San Francisco, will handle the Cleveland. Their cycle department will be in charge of T. S. Cobden, formerly with Osborne & Alexander.

Cushman & Denison have reduced the price of their Perfect pocket oilers to twenty-five cents each because of the increased demand, which permits them to make them in large quantities.

The Coventry Machinists' Company has received a Swift racer which weighs but eighteen pounds without tires. It is exceedingly rigid and is built on the same lines as the regular racer.

F. H. Tuttle shortly enters the employ of the Stearns Hardware Company, of Syracuse, N. Y., for which he will travel over the western territory. Stearns manufactures a line of light wheels.

Rouse, Hazard & Company, Peoria, have not yet announced their plans for 1893, but the trade can rest assured they will be "in it," as they have done a most satisfactory business this season. They report that the low prices they are nam-

liberal reward will be given for information which will lead to the recovery of the wheel.

Charles Thompson has withdrawn from the firm of Flavell & Co., who make the Reform, and Walter Thompson has been admitted to partnership. The business will be carried on as before by Arthur Edward Flavell and Benjamin Poole, together with Mr. Thompson.

The Triumph Cycle Company, of Coventry, is endeavoring to secure western agents. The triumph is one of the best known wheels on the track and road in England. Mr. Bettman, the representative, is now in America, and letters to him should be addressed to this office.

On Saturday, Sept. 17, W. R. Loft of the Anfield B. C. accomplished a remarkable record ride on north English roads, beating the 100-mile tricycle record for the north by twenty-eight minutes, being 6 hrs. 30 min. for the distance and covering 176 miles in the twelve hours, thus breaking the northern safety record by nine miles. He was mounted on a New Howe tricycle.

Director Paul Angois, of the Raleigh Company, is not simply an ornamental, but a very practical working director.

During the past week, according to John Turner, one of the Raleigh mechanics, Director Angois has been hard at work with his force of men placing machinery and constructing many things needed in

UNCLE SAM AND AUNT SALLY.
As Portrayed by "Bicycling News."

the Raleigh factory on Bank street. Turner says Angois knows the business of mechanics from A to Z, and is not afraid to roll up his sleeves and work among his men.

It is altogether likely that the popular Reform will be handled next year by the Ganse Cycle Company. With this wheel the agency in this country for 1892 proved a profitable as well as satisfactory one. Recently a representative called at the Reform works in Coventry and was there shown the new patterns for next year's American market. The works are being enlarged, and special attention will be paid by Messrs. Poole & Company to their foreign connections. As well as being a popular roadster, the Reform on the track has placed many victories to its credit.

W. L. Fish, the Newark saddle maker, is one of the landmarks in cycle saddle making. Away back in 1887 he started, when English saddles were mostly used, and the writer took three of the then excellent Fish ordinary saddles to England. Walter Phillips, of the Rudge company fell in love with one of them. It was with pleasure a visit to the Newark man was made last week, and it seems Mr. Fish has kept in line with the march of progress in saddles, as his present Scorch proves. Mr. Fish lays claim to being the first American manufacturer to make a safety saddle. A cut of his 1893 saddle appears elsewhere.

For a National Road Association.

Central Music Hall, Oct. 20 have been decided on as the place and date of the meeting for the purpose of forming a national highway improvement league. The general headquarters prior to the meeting will be in the club room of the Great Northern Hotel. Chauncey M. Depew, General Horace Porter and others have been designated by the Chamber of Commerce of New York to represent that body at this meeting. The National Board of Trade has sent a circular to all its constitutional bodies to send delegates.

The board of park commissioners of Cincinnati has passed an ordinance providing that no bicycle shall be propelled on any portion of the park at a speed exceeding six miles an hour.

The second edition of the Kansas division's hand-book has just been issued by Chief Consul Davis. It contains a report of the division's business meeting and finances and a state map.

MORGAN & WRIGHT TIRES HOLD ALL WORLD'S RECORDS

FOR THE MILE.

September 28th, at Terre Haute, Ind., Nancy Hanks, queen of the turf, trotted a mile in 2:04, which is a world's record.

It has been stated that other Tires than ours were used. This is untrue. We present the following letter in evidence from W. S. Frazier & Co., the great Road Cart and Sulky manufacturers of Aurora, Ill.:

AURORA, Sept. 30, 1892.

MORGAN & WRIGHT,
Chicago, Ill.

GENTLEMEN:---As you may possibly be aware, we have put a good many pairs of 28-inch wheels on track sulkies and all of them were fitted with your tires. It will, therefore, interest you to learn that in her great trial mile in 2:04 at Terre Haute, Wednesday, Nancy Hanks drew a sulky which was fitted with a pair of special light wheels having your racing tires. On the same day, the same sulky, Monbar lowered the three-year-old stallion record, and yesterday Mascot paced a mile in 2:04 (also world's record) to a sulky fitted with your road tires. The sulky weighs 36 pounds, wheels and tires only 9 pounds. Respectfully, W. S. FRAZIER & Co.

P. S.---We would further refer to Mr. Monroe Salisbury, owner of the great mare, which has repeatedly lowered the records.

... ON THE WESTERN CIRCUIT ...

The MORGAN & WRIGHT Tires won three times as many prizes as all the other tires put together. The reason is very apparent; they are the **best, most resilient and easiest repaired.** The East and West are calling for them.

MORGAN & WRIGHT,

339 WEST LAKE STREET,

— CHICAGO.

A GOOD START Was made early in '92. "IMPERIAL" parts and "IMPERIAL" frames, combined with A1 material did it.

SUCCESS WAS WITH "IMPERIALS" from the start. It could not have been otherwise under the circumstances.

ALL AGENCIES Established have been good ones. "IMPERIAL" agents, we call them. They will stick by "IMPERIALS."

WE COVERED THE COUNTRY As far as our product would permit; quit trying to sell long ago and took care of "IMPERIAL" agents.

WE WILL HAVE FOR '93 Five times as many wheels; all "High Grade," but only need twice as many agents to sell them.

A GOOD TIME TO CONTRACT Is now. Write us. We will give you all necessary information.

AMES & FROST COMPANY, MAKERS, 302-304 Wabash Ave., CHICAGO.

McGill Bldg. 908 24 "G" Street, Washington, D. C.

Rochester Riders Win.

At the Brockport races Friday the Rochester talent had everything its own way, beating some fat men of Buffalo and other places. Le Messurier won the mile open with George McTaggart second and E. C. Betner third. In the 2:40 class, F. H. Smith won, C. F. Ives second and McTaggart third. Le Messurier won the half-mile open with Ives second and McTaggart third. Smith won the mile handicap, with John Kelley second and Le Messurier third.

Competitors in the ten-mile road race of the Crescents Monday evening found bad road and a strong wind. Hogan, a five minute man, finished first in 43:42, with C. J. Conolly, two minutes, second, in 45:10, and Howard B. Mills, one minute, was fourth, in 41:18. Leighton Mills, scratch man, finished fifth in 40:20.

Notes.

The South Bend (Ind.) Cycling Club's home has just been re-decorated and re-furnished.

The Springfield (Mass.) B. C. is organizing a foot ball eleven, which will practice at Hampden Park.

The city council of Winona has passed an ordinance whereby every bicycle rider is required to have the name and make of his wheel registered and must pay a license.

The Illinois and Connecticut divisions are now tied for fifth place, each having 2,494 members. Massachusetts has 4,540, New York 4,096, Pennsylvania 3,384 and Ohio 2,507.

During the winter the South Bend (Ind.) Cycle Club will devote considerable preparation to social matters, and is already preparing the club rooms for the season's festivities.

SALADEE'S PATENTED

INTERNATIONAL STANDARDS

For the UNITED STATES, CANADA, ENGLAND, FRANCE, GERMANY, BELGIUM, AUSTRIA and SWITZERLAND.

Weight, 2 lbs., 2 oz.

Weight, 1 lb., 14 oz.

The arrow points in Fig. 1 indicate the open spaces between the plates of the spring in front and rear of the clasp, and which are closed as the weight is applied to the seat, reinforcing the spring as it is depressed, and thereby affording an AUTOMATIC ADJUSTMENT, to a light or heavy rider. Never before attained in cycle saddlery.

Correspondence Solicited for next season's trade.

The Whitten-Godding Cycle Co.
PROVIDENCE, R. I.

Sole Manufacturers for the U. S.

The simplicity, style, and comfort embodied in Fig. 2, as a "Scorcher" Saddle, has never yet been equalled.

In this spring, the weight of the rider is so balanced, in relation to the L-Rod, that the absolute rigidity of the old "Hard Shell" is avoided, and hence a degree of comfort is retained that all expert cycleclers riding a "Scorcher" will duly appreciate.

WHITWORTH CYCLES

. . . . U. S. A. 1893.

HIGHEST GRADE ONLY.

We are now prepared to place our celebrated wheels before American buyers. During the past season the enormous demand for the Whitworth, in Great Britain alone, absorbed practically the whole of our output. We have now quadrupled our manufacturing capacity and can guarantee prompt and regular deliveries of contract orders for the United States.

THE WHITWORTH is the leading English Racing Wheel, and is the mount of F. J. OSMOND, J. W. SCHOFIELD, J. H. ADAMS, M. B. FOWLER, and many other English riders.

The exhibit of the Whitworth at the World's Fair will be one of the finest displays of cycles ever made.

We propose to give control of large territory to responsible agents, and will carefully consider applications addressed to

TIME TO MOVE SLOWLY.

The season just closing has been, in some particulars, a disastrous one, and, if rumor lieth not, two or three concerns, each of great pretensions, are "lingering, shivering on the brink," and, if they manage to keep afloat through the winter, will find it necessary to carry less sail next season, even though it be World's fair year. Failures have not been particularly numerous. Indeed, if we except those precipitated by creditors whose claims are, to say the least, questionable, all have been caused by poor management, by poor judgment, by lax methods. Small concerns have endeavored to accomplish too much and in the end have lost all. There is too little conservatism in the cycle business. Racing men, Jacks of all trades dabble in it without sufficient capital, and in many cases without sufficient brains to carry on any industry successfully. We have seen, as specimens, men who start a store on wind, order from some maker whose anxiety to sell overcomes his discretion, and then, leaving some subordinate in charge, spend time, from days to weeks and from weeks to months, busily engaged in all kinds of pursuits from the pool table to the race track. There are just such people in business to-day. The great wonder is how they induce other men to trust them.

The failures of the past should serve as a warning. How much better it is to lose a sale at once than to lose the whole outfit three months hence. English houses have suffered more severely than American. The reason is plain in some cases. They do not realize the magnitude of this country, nor have they the means of ascertaining, as definitely as the home houses, the standing of the applicants for agencies. No English house, seeking an extensive trade, should place its business in the hands of any establishment without first sending a reliable man over the ground. We were struck by the remark of a recent visitor, who has been doing business in this country in a limited way for a long time. He assured us that he had not the remotest idea of the magnitude of the country, and considered that his visit would prove of the utmost value. He was very thoroughly convinced that no house could properly cover the whole country, no matter where its headquarters may be. He was about right. His visit seemed to show him that in the trade are many adventurers willing to transact business on some other people's capital and credit, obtained, goodness

knows how. Sometimes they win, sometimes they lose.

There has been too much inflation to the bicycle business. According to the enthusiast there was to be no limit to the business. All one had to do was to start a factory, make wheels—and there you are, fortune ready made. But conservative men knew better. They found, on investigation, that with proper management, the cycle trade would be profitable, but that the tales of the wind-laden enthusiast were not to be accepted. There have been no failures among these houses, no matter whether their sales have been in the dozens or hundreds of wheels annually. In this connection it may be well to sound a note of warning to people who regard World's fair year as certain to recoup all the losses of '93 and to make the rich immensely richer. We find among the careful men few who believe in anything beyond the natural increase of business. A few remarks on this subject will be found elsewhere. We commend to all a careful inquiry before entering into too great obligations for next season.

THE WHEELMEN'S FRIEND.

THE REFEREE is not a political sheet—it is neither a supporter of republicans nor democrats—but it believes in saying a good word for a man who has been a friend to the wheelmen. William Burke, candidate for representative in the first district—bounded by Van Buren street on the south, Ohio on the north, the river on the east and Ashland avenue on the west—is such. It was largely through his efforts that house bill No. 766, introduced April 14, 1891, by White of Stark County, was defeated. Many do not remember this country members' attempt to tread upon the poor wheelmen, while others will likely never forget it. The bill read as follows:

SECTION 1.—Be it enacted by the People of the State of Illinois represented in the General Assembly, That it shall be the duty of any person or persons riding on any bicycle, tricycle or velocipede, on the highways outside the corporate limits of cities and villages of this state, to stop, dismount and stand by their bicycle, tricycle or velocipede whenever they meet any person or persons going in the opposite direction on said highways with horses or other animals, until said horses or other animals have passed by, and said person or persons running or riding such bicycle, tricycle or velocipede shall stop and dismount when he, she or they are one hundred (100) yards distant from said horse or other animals, and sooner in case said horses or other animals become frightened at said bicycle, tricycle or velocipede before arriving at said distance, and it shall be the duty of the person or persons riding, driving or owning such bicycle, tricycle or velocipede to use all reasonable care and diligence to prevent the occurrence of any accident which might result in case said horse or other animals become frightened at said bicycle, tricycle or velocipede.

SEC. 2. Any person or persons who violate section 1 of this act shall be deemed guilty of a misdemeanor, and upon conviction therefor shall for each and every offense be fined not less than ten dollars nor more than fifty dollars, to be recovered before any court of competent jurisdiction, and shall also be liable for all damages that may be sustained by persons or property, by reason of his or they failing to comply with the provisions of this act; and said persons so offending shall stand committed to the county jail until such fine and damages are paid.

Mr. White showed his extreme ignorance in introducing and supporting such a bill, while Mr. Burke and others, it must be admitted, exhibited their good sense and fairness by squelching it. These facts should not be overlooked by the Chicago wheelmen who live in the first district.

The REFEREE has been favored with two large group photographs from W. R. Humphrey, photographer, Jacksonville, Ill. One is a picture of the racing men, officials, timers, etc., and the other shows a couple of wheelmen in front of the Dunlap house. Mr. Humphrey states that he will furnish duplicates at \$1 each.

FROM ACROSS THE DEEP

SPORT AND TRADE MATTERS IN THE BRITISH ISLES.

*Last of the Record-Breaking Season—
Doubt Johnson's Mile—Osmond the
Failure Now—Tire Makers
Busy—The Two Shows.*

LONDON, Oct. 8.—There has not been a great deal of history made during the past fortnight. The break-up of the weather has brought the racing season to a close without many of the promised attempts on records being carried out, and in trade circles things are generally quiet save in connection with the two rival shows.

We are yet in a state of profound doubt and wonder concerning the reported reduction of the mile record (flying start) to 1:56 2-5 by Johnson. Not a single person here can believe it is correct, and the only doubts are whether the reporters, the timekeepers or the track-measurers are responsible. So we are all waiting anxiously for the arrival of the REFEREE to bring the corroboration or refutation of the report. The very day that the news of Johnson's ride arrived F. J. Osmond went for the mile record from a standing start at Herne Hill. He rode his first quarter in :35 4-5, but before reaching the half he "cracked," and after completing the second quarter in :32 3-5 he pulled up and left the track. He was obviously stale after his attempt on the fifty-mile record a week earlier, and would seem to have lost both his pace and staying power. What he really wants is a long rest of a year or more, during which time he should live the life, not of a young man about town, but of an athlete, devoting himself to other sports, such as lawn tennis, rowing and gymnastics, which will help him to repair and regulate a rather damaged constitution.

NEW ENGLISH RECORDS.

On Monday, the 26th ult., M. B. Fowler, the supposed "unknown," who beat Zimmerman at Brighton last Easter, and who has since done much pace-making and won many good races, made his first attempt at record breaking. He went for five miles on a safety and succeeded in reducing the record by one-fifth of a second, bringing it down to 12:16 1-5, and also cutting the two and three-mile records by small fractions. Four days later F. T. Bidlake regained the London to York tricycle record, which he had twice before held, covering the 195 miles in 13 hrs. 19 min. The same time was accomplished on a tandem tricycle by Shorland and Holbein, who for the greater part of the journey acted as Bidlake's pacemakers, being themselves paced in turn by other riders. Once during the ride they were delayed for something like ten minutes, while Shorland repaired a crank which Holbein in his great strength had pushed off. And here for the present endeth the list of records.

BATTLE OF THE SHOWS.

The battle of the shows still continues, and both the makers and the Stanley people are almost daily engaged in issuing counterblasts. For the Stanley show something like 280 firms have entered, but a very great number of these are makers of accessories, tire, etc., and not of cycles. The National show, on the other hand, will have the solid support of a large phalanx of cycle manufacturers proper. Another advantage which the latter exhibition will possess is the aid of Frank Peach as secretary.

Mr. Peach is an experienced business man, possessed of a pleasant manner and any amount of tact, and is altogether a great contrast to Mr. Dring, who, although amiable enough from a social point of view, has as secretary a devil-may-care, take-it-or-leave-it style, which is by no means appreciated by some of those with whom he comes in contact.

COMING TO AMERICA.

The exodus of English makers and their representatives for America is by no means completed. On Wednesday next Mr. S. Bretman, one of the managing directors of the Triumph Cycle Company, Ltd., leaves Liverpool for New York, whence he starts on a tour through the states. He will carry with him samples of the Royal Triumph and the Chicago Triumph wheels. The latter is the company's special pattern for 1893, and is so named in honor of the World's fair. On the first machine turned out a Coventry rider of no very great note beat the Midland 100-mile road record by twelve minutes, and this in spite of muddy roads and an adverse wind. A few days afterward I had an opportunity of mounting the machine, and found it to be both firm and rigid. It is excellently designed, and there seems every reason to believe that it will fully uphold the reputation which the Triumph wheels possess for both pace and trustworthiness. I have been riding a Royal Triumph all the season, and have never had a machine which pleased me better.

A few days ago I had the pleasure of meeting J. W. Windle, a brother of Asa Windle, who is over here with a view of opening up in a big way in the cycle trade in Montreal. He has already offers of agencies for several big firms, and should he decide to go into the business there seems little doubt but that he will make things shift in the Dominion of Canada.

TIRE MAKERS BUSY.

The tire makers are just now very busy with preparations for the coming season. The Pneumatic Tire Company has already booked an immense number of orders for its new pattern tire—the Welch patent, or Dunlop detachable, as it is to be called. The two Du Cros brothers, who have been in America, are over here learning the details of the new tire, and Fred Du Cros, who manages the Paris factory, has also been similarly engaged. In the meanwhile the other tire makers are by no means prepared to let the Dunlop people have matters all their own way. The Leddin and Preston-Davies companies are both setting up depots in Coventry, so as to undertake the fitting of their tires in the very heart of the trade.

A Nice Trip He'll Have.

According to a Plainfield, N. J., despatch, Harry Villard Wylie, a New York cyclist, passed through there on his way to Chicago on a novel wager. The bet is for \$3,000 and was made with F. P. Priol. Its provisions are that Wylie is to travel from New York to Chicago without a cent in his pocket, is to beg, borrow or steal his food, and in general beat his way. He started from New York and had quite a time in getting across the North river. Finally a Pavana Ferry hand let him through and his journey was begun. He carried a book in which every one who helped him along or furnished him with money or meals inscribed his name to a certificate that he received no compensation for it. He expected to go by way of Philadelphia, Hagerstown, Wheeling, Columbus and Indianapolis. He has just completed a similar trip from Boston to Washington and back to New York with a total expenditure of thirty cents.

The following well-known people in cycling called at our eastern office, 21 Park Row, New York, the past week: G. M. Worden, Horace Bell, T. C. Boardman, N. H. Van Sicklen, Joseph Ketchum, Edwin Oliver, H. Crowther, S. Golder, J. W. Judge, "Airtite" Howell, C. V. Pugh, L. Crandel, S. G. Whittaker, J. I. Warman (Warman & Hazlewood), W. S. Maltby, Peter Gendron, M. Quinlan, Alex Schwalbach, Kirk Brown, H. W. Higham and wife, W. Newnan, Fred Pattee, Arthur Barrows, H. Laurie.

The Great New York Parade.

'Twas a good parade, considering the short time the committee had to work it up in and that the work was done by a few. Everybody did something, though, to make it a success and the turnout was most creditable and the largest number of cyclists seen in line this year. There is no gainsaying the fact that the average daily reporter has little use for cyclists, and never loses an opportunity to send a shot in their direction. As long as cyclists will play the fool on parade they can expect such sarcastic notices as the big metropolitan dailies leveled at them. The festivities in New York took the form of a celebration and demonstration, to show the result of the discovery of this fair land by Columbus, but many of the bicycle clubs seemed to labor under the impression that the occasion was for burlesque, and the pious-looking Christopher, who is depicted as with uplifted hands and eyes, was turned into a sort of Black Crook spectacular affair by some of the parading cyclers. Here's what the young man of the *Sun* thought of it:

Their steelsteeds did not flash in the conventional way. That was because the twinkling spokes were smothered in bunting or picturesquely beribboned, so that they looked like the scroll wheels in a fireworks exhibition. Some of the wheels were crowned with canopies of red, white and blue, some with immense Japanese umbrellas, and some with banners of both simple and variegated colors.

The approach of the women cyclists was indicated by a murmur of admiration that preceded them for a block or more.

Some wore jaunty Scotch caps and others the peaked regulation headgear of a wheelman. Their hair flew like penants in the breeze, and their cheeks glowed with excitement and the delight of being appreciated.

A remarkable part of the cavalcade was fifty or more Manhattan Athletic Club young men in fancy dress of mediæval times and Indian costume. They were experts, and when the crowd yelled its approbation they answered with their weird club cry.

The cyclers got mixed up with the floats, or the floats got mixed up with the cyclers, because four of the floats were sandwiched between two sections of steel cavalry.

Then the bicyclists came, and they continued to come for three-quarters of an hour. When they stopped the crowd told them to "get a move on," to "forward march," and when they moved on they were told that their wheels were going round.

Every time a girl rode by the crowd sighed, "Ah-ah ah!" The girls were uniformly pretty and rode well, but it must have required moral courage to skate through five miles of "ah-ah-ahs" and wafted kisses.

Some of the wheelmen thought to make life worth living by barking out in unison, "Rah! rah! rah!" Their attempts were received coldly. The great public is weary of this. A young man from Division street expressed it thus: "Dem blokes makes me dat tired I could go to sleep. I got a dawg can say 'rah, rah, rah,' jes' fr' all dewoy! like dat."

The *Herald* thought there were too

many cyclists in line, but the *Recorder* said something nice, as follows:

A feature of the night pageant that could not have been omitted without loss to the ensemble was the parade of cyclists. They came—an army of them—with their swift and silent wheels, wearing white sweaters and caps, carrying small flags and gliding along like so many will-o'-the-wisps.

The cyclists had been awarded the place of honor, acting as leaders and escorts for the big turnout. There were not less than 4,500 wheelmen in line, and one division, numbering about 150, was composed entirely of ladies.

LED BY MILITARY CYCLISTS.

Formation was made and the march carried out in the following order, the points of rendezvous being Fulton, Church, Vesey, Barclay and Park place. First platoon, mounted police, grand marshal and staff, military cyclists.

Metropolitan Association of Cycle Clubs: Harlem Wheelmen, Prospect Wheelmen, Riverside Wheelmen, Manhattan Bicycle Club, Ninth Ward Pioneer Corps, Tourists' Wheelmen, Brooklyn Bicycle Club, Kings County Wheelmen, Brooklyn Long Island Cycle Club, Metropolis Wheelmen, Montauk Wheelmen, Queens Bicycle Club, Castle Point Cyclists, Hudson County Wheelmen, Elizabeth Athletic Cyclists.

Among the clubs that followed the foregoing division were the Plainfield Bi. Club, F. L. C. Martin captain, fifty men; Business Men's Cycle Club, Atlanta Wheelmen, Essex Bicycle Club, Union County Roadsters of Rahway, Bergen County Wheelmen, Englewood; Rutherford

G. MINTURN WORDEN.

Wheelmen, Passaic City Wheelmen, East Orange Cyclists, Elizabeth Wheelmen, Hamilton Wheelmen, Union League Wheelmen of Westfield, N. J.; Roseville Cyclists, Manhattan Athletic Club Cyclists, Arlington Wheelmen, Alpha Wheelmen, Lenox Wheelmen, Yorkville Y. M. C. A. Wheelmen, Empire Wheelmen, Albert Pleasure Club, Greenwich Wheelmen, Gramercy Wheelmen, Sloan Cycle Club, Calumet Cyclists, Lafayette Bi. Club, Golden Rod Wheelmen of New York City, Prospect Harrier Wheelmen, South Brooklyn Wheelmen, Prospect Wheelmen, Amity Wheelmen, Centaur Cycling Club, South Side Wheelmen, Freeport, L. I.

As a Columbus parade will not come again for possibly four hundred years, for the benefit of the reporter of that period I give the 1892 parade for comparison with that of 2292; besides the doctor tells me I am suffering from "cholera-Columbus," and the parade helps me out this week. One thing was demonstrated in the parade, and that was that cyclists can not make a success of a parade mixed up with mounted police, floats and other features of a parade. Cyclists look and act well when they parade by themselves and have no dismounting, tedious waits, etc. The grand marshal of the cycling division—G. Minturn Worden—had to take orders from Colonel Gamet, the marshal of the entire outfit, and if Worden gave an order it was immediately countermanded. The writer had prepared "Pap" Worden for the kicks such a position as he occupied would get, and pap came in for all sorts of abuse the day of parade. The whole business worried the

genial Worden. He did the best he could with a difficult task, and such jobs are very thankless at the best. A man of physics told the writer that "health is more precious than parades," and his advice seemed good, so I took it, and instead of being in the parade took a breather for the day and escaped much discomfort thereby.

A young woman who took part in the parade sends me the following: "Well, I am almost gone. That parade nearly killed me; waiting for three hours at Church and Vesey streets and holding up my wheel, and then the mounting and dismounting we had to contend with! I have not got rightly over it yet. I saw nothing of the parade outside the bicyclists, took the 2 o'clock train home and arrived there almost frozen, and then had to ride two miles after leaving the train. It was 3:45 before my head touched pillow."

Such is the wail from one of the unfortunate. Fancy women parading at midnight and standing three hours in the chilly night air. Some of them no doubt contracted colds that will be hard to get rid of.

Then I want to compliment several of the clubs for the orderly manner in which they paraded and for the tasty manner in which they were costumed. The women, of course, looked well—especially the Newark girls in blue suits, white caps and gloves. Mrs. W. S. Smith the pioneer woman cyclists of America, was in line, being specially invited by Mrs. Peck and her committee, and the charming little Washington woman looked well and rode as only the pioneer can. By the way, the Smiths have a place in New York, 42 to 50 West Sixty-seventh street, and will manufacture the Dart and other wheels for the winter use.

**

Amateurs vs. Professionals.

THE REFEREE said editorially last week that "the people" did not want the professional, but wanted the amateur. So? Then "the people" would prefer, according to that theory, to see and hear the amateur actor, the amateur singer and the amateur in most lines of life. Cash produces the best in competition, and it is cash that has produced the splendid riding of our past season's pro—I beg pardon—amateurs. Amateurs there always will be, and they will be a seider to the professional class, which a racing board member told me yesterday will be a feature next season. The public will pay for the best in amusements, and to see the best they must see professionals nearly always. Why, George R. Bidwell told me yesterday that his firm did more business after the first Madison Square six day professional race than they have from all other tournaments for years. People got enthused, and it was the calibre of the men engaged that did it. The dealers sold bicycles as a consequence. You say professionalism died a natural death. Quite so; but amateurism would also if not organized. So would the National Trotting Association, the National Ball League and other associations. But govern your professionals in a class by themselves and they will thrive and do the trade and sport much good. The amateurs will always be more numerous than the professionals, as he has been seen on the path the past season, and the amateurs are about ninety per cent to the hundred in cycling—as per the definition, and therefore it is time the ten per cent was quarantined for the sake of the health of the ninety. To prove the drift of the amateur sentiment, I can only quote an advance article which will appear in the *Announcer*, the monthly

journal of that famous racing and road riding club, the Kings County Wheelmen. Editor Whympier would not divulge the name of the writer, but he is an old member, and says:

Great were the days of the g. o. o. Glorious are the memories of the events of those times!

What if we did ride wheels that weighed a pound for each inch in height and knew nothing of air for our tires? We got as much pleasure out of the fifty-four pounds and relatively did as great deeds as the men of to-day on their feather-weight, air-shod racing machines.

One hour and forty minutes for twenty-five miles on the road was for the times and wheels as great an achievement as the 1 hr. 18 min. of to-day over the same course.

What if our race meets were held on small, poorly-surfaced tracks? Didn't we get as much enjoyment from them, and didn't we cheer just as enthusiastically over 2 min. 58 sec. as ever we do now on a Springfield track and 2 min. 8 sec? I think we did.

Who ever hears now of a ten, fifteen or twenty-five mile race at race meets? Yet distances such as these were to be found at every meet. They were tests of manly strength, of sustained speed, of skill and endurance that are not to be seen in the little sprints so popular nowadays. The man who won his twenty-five mile medal on the soft five or eight-lap track worked for his honor, and his 1 hr. 48 min. was quite as good as the modern flyer's 1 hr. 1 min.

Consider the character of the men who did most of the fast riding in those days. They were not semi-professionals, carefully trained and maintained by cycle manufacturers or athletic clubs, who need grand pianos, teams of horses and silver tea sets to induce them to ride, but real amateurs, getting their training between the hours of business or study, to whom the twenty-dollar medal was as the laurel wreath of old—a simple evidence of an honor won, a victory gained. Its intrinsic value was not a matter of calculation.

The man who went about the country entering races where the prizes seemed valuable, and where he stood a chance of winning in the absence of better men, was contemptuously spoken of as a "pot-hunter," and his society avoided as of a person lacking honorable and sportsmanlike spirit. The word isn't often heard now, not because the pot-hunter has ceased to exist, but—well—look at the list of entries at all the race meets where the most valuable prizes are offered, and read the answer.

Here and there, in local circles, the real amateur is yet to be found, and all honor to him. He enters the races of his club or of his neighborhood, riding against the thoroughly trained professional brother amateur (?) well knowing he has no chance of winning a prize, but content with the excitement of the competition and the honor of third, fourth or fifth place against such riders as — and —.

If the happy day when the L. A. W. racing board shall again put the professional amateurs in a class by themselves and give the real amateurs, who do not earn their living by cycle racing, a chance to come to the front, race meet promoters will be relieved of a heavy burden, cycling meets will increase in number and interest, contestants will be better satisfied, their friends will have a personal interest in the result of each race, and the glory of the olden time will once again shine round about us.

**

The Great Advertising Scheme.

The *Sporting Life's* generosity to the dear amateur and the trade is touching in the extreme, and from what I can learn the principal manufacturers will do the generosity act and pay for the grease that will oil Frank Egan's advertising scheme. But more of this anon. Something will be heard to drop when or before that car starts. The dear "amachoor" who has suffered from Frank's witticisms is to be made use of as an advertising medium. But Zimmerman is sick. No, he has accused the "skeeter" of having flies on him, and while I believe that A. A. is off color, I also believe that this is the most convenient of all times for an amateur to be sick, although a trip south is supposed to be healthful.

This is one of the generousities of the scheme:

DEAR SIR:—We desire to call your special attention to the leading editorial in the *Sporting Life* of Oct. 8. The plan set forth there will merit the attention of every maker in the trade who desires to place his wares before the non-cycling public, to whom he must look for his future trade. Wherever the party may stop and be entertained the *Sporting Life* will be distributed and thousands of people will read the paper who have

"We are assured that Colonel Burdette, of Hartford, will again be a candidate for the presidency of the League of American Wheelmen. The opposition has the floor. What will it do with it?" We venture a reply.

never heard of, or seen a bicycle paper. These are the people you want to reach, and you cannot do so in any other way than through an advertisement in the Sporting Life. Do you not see the idea.

Yours truly, JAMES C. DAYTON
General Manager Sporting Life.

Why, of course they do, Mr. Dayton. They see, or should see, that they are expected to oil the wheels of the *S. L.* car, and the statement that the people cannot be reached except through an ad. in the *Life* as distributed from the "manufacturers' special" is stuff and nonsense. Why, every small village or the country reads the ads. of cycle manufacturers in many journals outside of your own, and "Columbia" is painted on every rock all through the benighted Rocky Mountains. If a man wants to buy a bicycle he will not wait for the "manufacturers' special," or do it because he saw the exhibit of pure amateurs you propose to have the manufacturers send out. The idea is entirely at variance with the amateur rule and the preachings of your cycling editor, and the scheme therefore is not on a solid foundation. If it is necessary to spring such schemes to get advertising it is bordering on the "last effort" order; and if the manufacturers are to grease the wheels, why not call it "The manufacturers' and *Sporting Life's* advertising trip, limited"—limited to the manufacturers who will send men in the car; limited in an advertising way to the *Sporting Life*. The wily Egan, in his *Vive le Roi* editorial mentioned in Manager Dayton's letter, invites all to join in the booming of the scheme, but dares not tell the other papers who it was that would furnish the wherewith, and that they would be allowed to distribute their papers from the "manufacturers' special." The scheme is a further prostitution of amateurism, and I'll prove my

statement just as soon as that car starts. If the *Sporting Life* scheme was founded on straightforward methods, I would add my mite in booming it, as per Egan's invitation free-for-all editorial, but being a consistent and unswerving advocate of separating the professional from the amateur, I must refuse to follow my cash prize co-worker through the Rocky Mountains of palpable hypocrisy.

Two Schemers and Their Scheme.

Frank Hall and A. N. Ridgley, of pedestrian and roller-skating fame, have humbugged press, public and the unfortunate competitor a good deal, but the "plans and specifications" of their proposed seven days' and nights' bicycle race in the *Galerie des Machines*, Paris, France, March next (according to latest change) about takes the bun for cast-iron nerve. I have a letter from Ridgely before me, addressed to one of the American professionals. Mr. Ridgely, writing from London, Sept. 13, says:

Your letters of 16th August received, and in reply would say that owing to Mr. Hall's bad health and also for other causes, we shall not run the proposed race in October. Mr. Hall left here for New York on July 20, and I cabled him that the race was off for the present. It is our intention, however, to run it in March, which will give us plenty of time to get ready, as the people in Paris move slowly and it takes a long time to get arrangements completed. The riders will be allowed to ride any kind of wheel they prefer—doubtless most will use safeties. I shall write for full details of the race as soon as the date is settled on. At present I can tell nothing more than you see on the margin of this sheet. I shall be in London about the end of October; after that my address will be Columbia Skating Rink, Galerie des Beaux Arts, Champ de Mars, Paris, France.

The reader may not have met Ridgely and Hall, so I'll describe them. Ridgely is tall, wears good clothes and big diamonds, looks like a farmer, has big ears

and mouth, and acts as if he didn't know over much. He deceives you. He is more cunning than the fox. He is a speedy skater. Here's an instance of his shrewdness. When the rinks tottered, and fell (for the good of morals) Ridgely, then a skinny youth in Baltimore, bought up thousands of pairs of skates—a shipload—and shipped them to Australia, where skating was just taking hold. After landing his skates Ridgely raised a rumpus in the papers about skates being admitted free of duty, and employed a lobby to go to the New South Wales legislature where a bill was pushed through placing a heavy duty on skates imported. The price of skates went up with a rush, and Ridgely opened twelve rinks in different Australian cities. When people were rink-mad Ridgely unfolded all his American skates, sold out his rinks at immense profit, and inside of a year landed back in San Francisco with \$300,000 profit.

Hall is almost as sleek a boomer, and wears a flowing black beard. I have met both men and don't know which to consider the biggest schemer. Hall, though, seems to lack honesty. He has done (or has been accused of doing) shady things with his tournament's for pedestrians. Still all the "peds" seem to like him. No doubt Ridgely understands Hall and Hall understands Ridgely.

The rules and prize money are curious in their different aspects. Think of the generosity of offering a man £1,000 if he can ride 3,000 miles in a week! It would look larger in the distance and be equally safe from capture. Fancy the managers instructing the referees and umpires as to what their decision shall be in case of dispute, and then a "pro" having to give his "last three perform-

ances" when entering a scratch championship race. Fancy a man receiving the munificent special prize of \$100 if he rides 2,000 miles and fancy a French cycle paper being the stakeholder for all subsequent matches. Well, here are the rules, and they should be preserved for the next Columbus turn-out. The first prize is £500, second £300, third £200, and so on down to £20 for the ninth man.

WANTED—An experienced man to take charge of the assembling department of a high-grade bicycle manufactory. None but the best need apply. Address, SUNOL BICYCLE Co., 16th and South Jefferson Sts., Chicago.

WANTED — Party with
experience to act as
inspector in a bicycle manu-
facturing business. Must be
competent to judge of the cor-
rectness of all work on various
parts. Address,
SUNOL BICYCLE CO.,
16th and Jefferson Sts.,
CHICAGO.

The "Dedication Tournament."

The "dedication tournament" of the Chicago Cycling Club at Washington Park Friday and Saturday will undoubtedly outrival any meet of the season excepting that of Springfield, Mass. The entry list in point of the number of individuals ranks next to the Springfield, though only one or two ahead of the Hartford meet. The meet has been most excellently advertised throughout the country, and particularly in Chicago. Several thousand large lithographs of the track and large card pictures of Zimmerman, Johnson, Tyler and Windle have been put in every available place in the city, while the daily papers have devoted many columns to the subject. As has already been stated, it is the first time the east and west has been fairly brought together. Windle, Tyler and Taxis are the only men of prominence who will not ride at this meet, but their ability is known, though every one would like to see what Windle could do against Zimmy since he has shown such remarkable record-breaking form. Tyler states that he has had very little training of late, because of the fall he received while in Toronto. The rest of the easterners, who are now here—Zimmy, George Smith, Dorntge, Hess and Wheeler—are in good shape, while the western men have had any amount of time to get in trim.

MEN IN GOOD SHAPE.

N. H. Van Sicklen, who went to get the eastern riders, returned Monday noon in company with Zimmerman, Smith, Culver, Tyler, Hess, Wheeler and Dorntge, and the men are nicely quartered in the parlor of the Chicago club, while Barrett and Davis have been living there with their trainer for some time. The eastern men have been on the track every day for two weeks, and some remarkable work has been done by them. Davis has ridden a quarter in 27 sec. and a half under a minute; Bliss, Lumsden and Johnson have covered a mile under 2:14; Barrett has been riding close to Davis; Sanger is said to have made a half in 1:05 alone, and the novices and class men are all going splendidly, so that some good, close finishes may be looked for. The track being eighty feet wide on the stretch will permit a large field to finish without danger, while in the handicaps the races may be run with few heats.

THE ACCOMMODATIONS.

The immense grand stand of the Washington Park club will seat 45,000 people, while the grounds about will easily accommodate as many more, and every portion of the mile track may easily be seen. The quarters for the riders are excellent, being light and roomy. These consist of two rooms that are used by the jockeys for dressing, and the office below, while the box stalls under the grand stand will be put in shape if necessary. The carriage sheds will be used for storing wheels, which will be checked. The grounds of the Washington Park Club are so beautifully laid out in every particular that they are almost perfect in every detail.

RAILWAY FACILITIES.

Unfortunately, because of the World's

Fair dedication, the Illinois Central road will be unable to run trains to the ground, so that the State street and Cottage Grove avenue cable lines will have to carry the bulk of the passengers. Those who take the Illinois Central to South Park can take the cable to the track, and from Woodlawn Park street cars run directly past the gates. The Alley L road may be able to carry passengers to Sixty-first street. At present the trains run to Fifty-fifth street, and work night and day has been going on to reach Sixty-third street. It is such an easy ride a wheel that many will doubtless go in that way, while others may drive out, and their vehicles can be well taken care of.

BIG CROWDS EXPECTED

At this time of writing the indications are that the weather will be most favorable and that many thousands will witness the close of the racing season. The committee in charge has issued 10,000 handsome souvenir programmes and with each two complimentary tickets for Friday and an invitation to attend

new plan—new in the west at least. In order to get through with the programme before darkness sets in, each race will be started at a given time, as announced on the programme, and a competitor who fails to be on his mark at the time stated will be cheated out of his chance to ride. The entry list is so large in some events that three heats will have to be run. This is the case with the half-mile handicap. The programme for the two days is as follows:

First day—One-mile, novice; one-mile, 2:20 class; half-mile, handicap, first heat; half-mile, handicap, second heat; two-mile, handicap; fancy and trick riding by A. J. Nicolet; quarter-mile, open; two mile, open.

Second day—One-mile, 2:40 class; two-mile, 5:00 class; one-mile, handicap, 2:30 record; five-mile, invitation, handicap; fancy and trick riding by A. J. Nicolet; half-mile, open; one-mile, triplet race, one-eighth mile flying start; one-mile, dedication; half-mile, handicap, final.

HOW THE EASTERNERS LOOK.

Washington Park was of course the objective point of the cyclists, the *News Record* said. "Zimmy" said to Van: "Where is your 'bloomin' race track?" Zim wears black clothes, black Fedora hat, black cravat and an "easy" expression of countenance. He walks with a New Jersey swagger and is apparently

The Washington Park Club's Track.

the races were sent, so that the first day will see 20,000 outside of those who will pay their way. The club believes in popularizing cycle racing and is doing so in the manner named. Saturday the dedication ceremonies will be finished and the thousands in the city on that day will want some place to go, so that it is reasonable to suppose the bicycle races will secure a goodly share. Everybody in Chicago who rides a wheel and hundreds of cyclists from near-by towns will attend. From Peoria comes this word: "All the prominent bicycle riders and men connected with the trade in Peoria will be in Chicago next Friday and Saturday to attend the 'dedication tournament' in that city. When Peoria gives a tournament the Chicago boys come down by the car load, and now that Chicago holds a race meet, the Chicago boys will try and reciprocate, although the reciprocity act will not be in carload lots—not because we are not willing enough, but because we have not got sufficient numbers. At all events Peoria will do the best she can towards making the Chicago tournament a booming success." Milwaukee will also send down a good delegation, as a special rate has been secured for the round trip.

TO BE RUN ON TIME.

The management has decided upon a

so loose jointed that he is in danger of coming apart at the knees. He says Chicago is far ahead of Freehold, N. J. His conversation is monosyllabic, except when temporarily excited, which is a rare occurrence.

Harry Tyler, the blue eyed idol of Highlandville, Mass., is mild of manner and says he is after regaining the records he has lost to Windle. Although suffering from his recent tumble, he will make attempts at the mile record, standing start, before quitting Chicago.

Dorntge will be remembered by his meritorious five-mile performance at Parkside last fall. He is sprightly, burly, knit in knots, wears a faded brown derby, and claims that he is going great, long half-mile sprints that are disheartening to opponents.

Carl Hess has fully recovered from the effect of Munger's imperial blow, and came into town humming a German-American version of "Comrades."

The prize list is large, including seven handsome diamonds, a \$650 piano, eight or nine bicycles, many pieces of bronze and silverware, sundries, merchandise, clothing, etc. There are three prizes in every race, four in some and five in one, so that contestants have a pretty good show for receiving something for their trouble.

Aurora C. C. Races.

The Aurora Cycling Club's race meet occurred last Saturday afternoon, a large number of Chicago cyclists going out. This number would have been more than doubled had not an error in telegraphing occurred. It rained the evening previous, and Saturday morning the track was heavy. George S. Webb, the manager, sent several telegrams saying the races were postponed. The weather cleared, however, and he sent the second saying "come." The attendance was slim, probably 500, but enthusiastic. John Taylor won the one-mile A. C. C. championship with a broken sprocket wheel at the finish. Lumsden captured four events. Bliss made a speedy ride in the five-mile handicap, but was far over-handicapped, having 300 yards to make up on the nearest man, which he did not do until the last lap. He was fifth. The limit men, Webb, March and Rogers, were never headed, and finished in that order in 12:47. The one-mile A. C. C. sealed handicap was not a success, John Taylor being unable to shake off Oleson.

Lumsden won the half-mile handicap from scratch, riding a very pretty race and winning by but a foot in 1:08. The track was not at all bad after so severe a rain.

Keator, after riding in five races, rode a half on a unicycle, his time being slow.

Officials were: Referee, William Herrick; announcer, Harry Hanford; judges, L. J. Berger, R. C. Lennie, F. Ed. Spooner and Hutchinson.

THE SUMMARY.

One-mile, A. C. C. championship—John Taylor, 1; A. T. Webb, 2; Fred Olson, 3; time, 2:39 1-5.

One-mile, open—A. E. Lumsden, 1; J. P. Bliss, 2; Roy Keator, 3; F. Nessel, 4; time, 3:21. A leading race.

One-mile, 3:10 class—W. Bainbridge, Columbia Wheelmen, 1; Fred Olson, 2; J. Clark, 3; time, 2:47 1-5.

Half-mile, boys—Ed Smith, Aurora, 1; Dugald Boyd, Ottawa, 2; Loren Ervin, Plano, 3; time, 1:25.

Half-mile, handicap—A. E. Lumsden, scratch, 1; Roy Keator, 60 yards, 2; H. N. Stringer, Elgin, 60. 3; W. N. Heuman, Elgin, 50, 4; Frank Wing, Ottawa, 5; time, 1:08.

Quarter-mile, scratch—A. E. Lumsden, 1; Roy Keator, 2; John Taylor, Aurora, 3; time, 1:35.

Two-mile, handicap—Roy Keator, 200 yards, 1; E. Ulbrecht, 200, 2; H. N. Stringer, 200, 3; W. N. Henman, 220, 4; time, 5:00 4-5.

Five-mile, handicap—A. T. Webb, Aurora, 880 yards, 1; A. R. March, Chicago, 880, 2; C. W. Rogers, Aurora, 3; Roy Keator, Chicago, 500, 4; J. P. Bliss, Chicago, 100 yds., 5; time, 12:46.

One-mile, A. C. C. sealed handicap—George Olson, 1; John Taylor, 2; H. A. Taylor, 3; time, 2:32 2-5. Five seconds handicap. Time of Taylor, scratch, 2:37 3-5.

Mercury Cycling Club's Road Race.

After two postponements on account of the weather, the Mercury Cycling Club, of Milwaukee, was successful in its negotiations with the weather bureau and secured an ideal day last Saturday for the holding of the club's annual road race. The Mercury is the representative cycling association of the south side and its friends are many. If any evidence were wanting as to its popularity and standing in the community, the large gathering at the finish of the race amply demonstrated its firm foothold with the public. It is estimated that fully 3,000 people lined the course near the finish, all of whom were largely repaid for their trouble by witnessing one of the closest and most exciting races of the season. As usual with road races, many of the racing buds blossomed into astonishing wonders, much to the admiration of their friends. Wells Prichard, the winner of both the race and the time prize, was one of the dark horses, and his winning both the honors was thought as improbable as a trip to the moon. He covered the distance, eight miles, in 23 min. 20 sec. Prichard had a worthy foe for time medal in the person of Martin Klevenow, who pressed him hard on the

spurt. Only two of the twenty-three starters failed to show up at the finish. One, was plucky young Mattie Martin, who was compelled to walk his wheel in on account of a puncture. The other was Henry P. Andrae, who will never plead guilty to the charge of finishing in any race he ever entered. As a ham winner Henry wears the crown. In selecting the course, as well as in carrying out all the details of the affair, the racing board displayed excellent judgment. After the race the club members and their invitdd guests adjourned to the club rooms, where later on a "feed" was set out. Following is a summary of the race:

Name.	H'd'p.	Time.
Wells Prichard (time medal).....	3 1-2	23:30
Thomas Stoll.....	3 1-2	23:41
George Walters.....	4 1-2	24:50
Jesse Pedreson.....	5	25:40
Henry Zirpel.....	3 1-2	24:55
Marrin Klevenow.....	2	23:26
Charles Wilson.....	3	24:27
William Hermann.....	2 1-2	24:10
Charles Gordon.....	4 1-2	26:11
Joseph Lauer.....	7	29:12
George Bender.....	3 1-2	25:25
Charles Wuster.....	2 1-2	24:12
William Schimmel.....	2	24:12
Theodore Fast.....	4 1-1	26:45
Charles Hintz.....	4 1-2	24:50
Richard Ebert.....	3	26:17
Otto Pegrade.....	3	26:28
Henry Stoll.....	5 1-2	28:54
Alexander Emery.....	3	27:11
Rober Dahliaman.....	3	27:33
Chris Christenson.....	7	34:38

At Westfield, Mass.

At Westfield, Mass., Saturday, a good crowd saw several interesting bicycle races and some riding against time. Murphy, Campbell and Dorntge on a triplet rode a trial mile in 2:18 1-4, doing the garter in :31 1-2 and the half in 1:07. Nelson rode a half in 1:10 1-4. A special race was held, in which Williamson, Catlin and Coombs of Pittsfield entered. The race was won by Williamson in 2:31 3-4, with Catlin second. In the one-mile novice there were two starters, Hisketh and Blakeslee, the former winning in 3:11 3-4. The half-mile for local riders resulted with Hisketh first, in 1:16 3-4, Rudall second and Fowler third. Four started in the mile open, Coombs, Hisketh, Fowler and Catlin, and Catlin won in 2:42 1-4, Hisketh second and Coombs third. In the mile lap race Rudall and Blakeslee collided. Hollister was first in 2:49 1-2, with seven points, Fowler second, three points, and Graham third, two points. The quarter-mile was won by Hollister in :33 3-4. Hisketh second, Kelley third. Two started in the mile for Berkshire riders, Coombs taking first in 3:24 1-2. The two-mile handicap was the race of the day, Hollister being first in 5:32 1-2, Fowler second and Graham third.

Rochester Race News.

Last Tuesday the second twelve-mile handicap race of the Lake View Wheelmen was held at the driving park. H. Barton, who had the limit, eight minutes, dropped out at the end of two miles, the pace being stronger than he could stand.

Carpenter rode seven miles, then stopped, owing to a poor machine. After riding five miles Barrows also dropped from the contest after being caught by the scratch man.

Every man in the race with his handicap, allowance had been caught by Iven at seven miles. He caught Servis, one-minute handicap, at four miles. After catching Crittenden with his more than a mile start, Iven and Servis rode leisurely home, allowing Crittenden to get a quarter of a mile away from them. In the final spurt Servis was beaten out by Iven.

Four of the participants in the final road race of the Crescent Cycle Club

were tied Monday afternoon. Howard B. Mills and W. Hogan each have thirteen points in their efforts to get the first prize, and Leighton Mills and C. J. Connolly are tied for third prize, with twelve points each.

Leighton Mills wins the time prize, a silver berry dish, his average time over ten miles of rough road, for the four races, being 40 min. 43 sec. The position at the finish of the last race was: Howard B. Mills, 10 sec., 1; time, 40:00. C. J. Connolly, 20 sec., 2; time, 41:30. Leighton Mills, scratch, 3; time, 41:13. George Hogan, 45 sec., 4; time, 43:45. Mason, 1 min. 30 sec., 5; time, 44:00.

The Ramblers Bicycle Club is talking up a road race to be open to all local wheelmen.

On Friday, Columabus day, it is expected that 1,500 wheelmen will turn out in the parade in honor of the great man.

PANHANDLE.

* * *

Buffalo vs. Rochester.

There is nothing definite as yet about the Callahan challenge to the Buffalo

under a special class, "paced by running horses."

Johnson rode a Star in the g. o. o. days.

Lumsden has joined the Manhattan Athletic Club.

Johnson always rides under the Chicago Cycling Club colors.

Steele, Stillwell, Helmich and Loonhardt will comprise the Lake View team next season.

The Independence track rises two and one-half on the last quarter-mile and is not down hill at all.

It is said W. B. Troy came to Chicago to secure riders for the *Sporting Life* western and southwestern winter trip. Lumsden may go, but Munger will not, except it be on his own hook.

* * *

At Muscatine, Iowa.

The Muscatine Wheelmen gave some very interesting races on Friday of last week, which resulted as follows:

One-mile, novice—H. Einhauser, 1; Fred Beach, 2; E. H. Berry, 3; time, 3:05 1-4.

H. A. COLEMAN.
Chairman Entertainment Committee, Milwaukee Wheelmen.

Ramblers B. C. as far as the public can ascertain, and it would be a good thing to either accept or refuse it at once. The defi from Klipfel to Foell has been accepted and the participants are busy arranging details. This will be a matter of some interest and will call for the observation of all wheelmen. These men are the first in this field and are both in good condition. They have any number of friends and it will be the most interesting event of the time. The challenge from the Press C. C. to all clubs in western New York for a team road race, six men to the team, has been accepted. There will be teams from three or four Buffalo clubs, and Rochester promises to send a team. The course will undoubtedly be from Buffalo to Rochester. This will give them all sorts and conditions of roads and will bring out every ability possessed by each.

* * *

Chicago Race Notes.

Johnson's records are to be accepted by the racing board, W. C. Thorne says,

Quarter-mile, open—Fred Bowman, 1; Clifford, 1; Friend, 3; time, 3:37 1-4.
Two-mile, handicap — Boyschau, scratch, 1; Hobs, scratch, 2; Smith, 60 yards, 3; time, 5:54 1-2.
Half-mile, boys' — Boyschau, 1; Morehouse, 2; Lewis, 3; time, 1:31 1-4.
Half-mile, open—Bowman, 1; Hobs, 2; Rowland, 3; time, 1:22.
One-mile, county championship — Clifford, 1; Beach, 2; Einhauser, 3; time, 3:18 1-4.
One-mile, 3:30—Friend, 1; Berry, 2; Beach, 3; time, 3:14.
One-mile—Smith, 1; Boyschau, 2; Kobs, 3; time, 2:52.

A Prominent Milwaukee Wheelman.

One of the most popular wheelmen in the city is H. A. Coleman, chairman of the entertainment committee of the Milwaukee Wheelmen. Mr. Coleman is very enthusiastic over anything that bears the imprint of cycling, and has labored hard and been untiring in his efforts to promote the interests of his club. During the past year the Milwaukee Wheelmen have enjoyed a number of first-class entertainments, several of which were exceptionally good; notably, the "hard times" smoker and minstrel

show, which attracted wide-spread attention. The latest undertaking of the entertainment committee and its efficient chairman is the giving of a good minstrel show at the Academy of Music, Nov. 16, for the benefit of the club. Mr. Coleman is greatly interested in the success of the entertainment, and is hustling to make it so, both socially and financially. He has just passed his twenty-fifth birthday and is prominently identified with the newspaper business, occupying the responsible position of manager of the advertising department of the *Herald*, the leading German paper of the city. We present an excellent portrait of Mr. Coleman in this issue.

NOTES AND COMMENTS.

I am glad to read the very excellent remarks by "Old One" in last week's REFEREE; it is a relief to have some one help in the good work? I have been abused as a calamity howler and a pessimist, whereas I am neither. I believe in the cycle business and have proved my belief, but at present it is not in a healthy condition. "Old One" thinks that the cholera scare and the great exposition will not hurt trade. I sincerely hope not, but I fear they will, nevertheless. There has never been a brighter prospect for the business—if those engaged in it keep their heads and don't overdo the thing—than there is right now. Should we have a long, cold winter and a fairly decent spring, there will be a mighty call for bicycles early in '93; and if the little makers (and big ones, too, for that matter) will not promise more than they can perform in the way of filing orders, there will be room for everybody.

* * *

The "season" seems to get earlier every year. I can remember when it would have been folly for a maker to have sent out his drummers before the first of March, and now we hear that salesmen are booking large orders even in this month of the sere and yellow leaf. On the other hand I mind me when it was no uncommon thing to hold a good trade right up to snow time, while now trade is practically done by July 15. I wonder why this is. The fall is about the only respectable season we have in this country, and is surely the most enjoyable season in which to use the wheel, but men will go tearing around in July and August, and lay away their mounts in October.

* * *

The season is done and the geared ordinary, of which we heard so much in the early spring, is still *statu quo*. What is the reason? The machine is certainly practical—is much more free from vibration, lighter, stronger and more silent than the safety, and it is fully as safe. It has proved its speed for long distances and as a hill climber. Why does it not become more popular? I have one and have given it a long and exhaustive trial and I must say that I shall never ride a safety again unless something in that line comes out superior to the present incumbent. The dwarf ordinary lays over everything I ever rode for everyday business. It is steady, true and comfortable, and one can sit up and rest himself if he wants to.

LA COTE MAL TAILE.

A Chainless Tandem.

The Sercombe-Bolte Manufacturing Company has just completed a chainless tandem which weighs only thirty pounds, half the usual weight of a tandem. The fact that it is chainless makes each rider entirely independent of the other. The machine was built for the Mueller brothers, of New York City.

GENT'S WHEEL Weighs 34 Lbs.

LADY'S WHEEL Weighs 36 Lbs.

Kirkwood, Miller & Company,

PEORIA, ILL.

General Buffalo Cycling Chat.

BUFFALO, Oct. 17.—It is noticed that the *American Wheelman* has taken up the good cause and is helping to boom the Cycling Protective League, which is very much appreciated by its projectors and supporters. The press has been very negligent in reference to this worthy association, and a little more encouragement and notice from all sources will not do it harm. However, there will be a meeting called at an early day, and perhaps the league will be made a success. It will be remembered that we have always spoken well and long for this movement and have for some time seen the many advantages to be derived from a society of this sort. Let it be hoped the public press will assist in this undertaking and keep its claims before the wheelmen.

There has been a great falling off in the attendance of all the club runs this season just finishing, and the reason is at once apparent, from the fact that these runs are made up mostly months before the season opens, and the ideas of the club members are not consulted. Some are for long runs, others for short ones, and again others are not in for anything calling for any amount of exertion. Club runs ought not to be allowed to go, for when properly arranged are most enjoyable. But they should be

selected with an idea for the general comfort and requirements of all the participants, neither too long nor too short, but made to some favorite and convenient spot where everyone can get a wash-up and a hearty dinner, after which a quiet smoke, a chat and a lying-around rest of an hour or two. As the membership of the club is largely made up from among those who are desirous of having a good time, it seems that some such scheme as has been shown would be all right. It depends upon them for its support and their desires should be catered to. Of course there are men who will desire the long runs of from fifty to a hundred miles, but they are of the few and should be permitted to accommodate themselves to circumstances.

Contention runs wild and rivalry is at fever heat just now. There has been no end of centuries made during the past week by members of the Press C. C. and the Ramblers B. C., and with the demolition of all previous records. There is not enough care given to the establishment of these records to make them marks of ambition. A rider starts out alone or with a companion, making places at the desired distance, and returns to town with the astonishing statement that the entire distance has been done in such-and-such a time. He has no proof and feels indignant that his story should be doubted. While the wheelmen in general believe him, there are others who doubt, and it would be better for the good repute of the sport that more pains were taken in this direction.

This week will see the marriage of one of Buffalo's well-known wheelmen and ex-president of the Ramblers B. C., Louis Burch, at present of Chicago, to Miss Helen M. Mason, one of Buffalo's fairest daughters.

Sunday the funeral of Frank J. Steinbach, president of the Columbia B. C., who died on Friday last, was held. Frank was well beloved by all his friends and acquaintances, being an interstate club worker. Resolutions of regret and esteem were passed at the last special meeting of the club.

The Comrades C. C. will hold a donation party on the 21st inst., when a programme of varied items will be presented for the spectators' benefit.

On the 22nd the Ramblers will have a formal opening of their gymnasium, and a special feature of the event will be the attendance of the officers from all the different clubs in the city and vicinity. The Ramblers never take a back seat in the matter of entertainment, and a long and interesting schedule is in preparation. This event will be made a reunion, where all may meet and exchange views and comments. On Wednesday of this week will see the formal dissolution of the Exposition Cycling Association of Buffalo, when there will be a general good time and a long farewell to this association.

Last Saturday the Wanderers celebrated the Columbian anniversary by a supper and entertainment, at which the membership of the club was well represented and a most enjoyable time ensued.

Yesterday Klipfel and Foell each made a century over the Le Roy course, the former in nine hours, being his twenty-eighth for the season, and the latter in eight hours and five minutes.

WILLIE DUNN.

Philadelphia Honors Its Mayor.

PHILADELPHIA, Oct. 17.—Philadelphia may be slow, but she must be given credit this time for having furnished the cycling world with a sensation when no one expected anything of interest would occur to ruffle the troubled waters of the amateur question until the meeting of the racing board in Chicago this week. Still, now that the sensation has been sprung and the news been told, it is surprising how flat the news fell. Instead of creating a great hub-bub of excitement the *Sporting Life's* various schemes have been received with very little comment, most people apparently thinking them too impracticable to be put into effect successfully. The knowing ones expected some remarkable developments when it was announced that Frank Egan was to be brought over to take Crowther's position as editor, and the expectations have certainly been realized as far as schemes are concerned. Richter, the editor-in-chief of the *Life*, is an old newspaper man who was formerly proprietor of a little afternoon paper called the *Sun*. The paper has undoubtedly been very successful as a base ball organ, and rumor has it that its owners would like it to occupy the same position in the cycling world, believing that to be the sport of the future, so that if a few thousand dollars spent in advertising by means of Egan's beloved "amachours," followed up at the proper time by the proposed professional league, will attain for them their desires and place the *Sporting Life* in the position of the cycling "organ," and give them the same position in this sport that it has in the national game, they will of course consider the money well spent. However, "we shall see what we are to see" in the future. Preaching for cash and riding for cash are two very different matters, and the promoters are not

meeting with unqualified success even in their efforts for the California trip, which is supposed to be a strictly amateur affair.

At a regular meeting of the South End Wheelmen, held last week, the following resolution was unanimously adopted:

Whereas, the South End Wheelmen, ever ready to recognize and acknowledge any movements in the direction of improving roads and highways have noticed with increased admiration the able and constant efforts of his honor, Mayor Edwin S. Stuart, both during his career in councils and since his elevation to the mayoralty, toward the improvement and betterment of the public streets of this city, and appreciating the fact that the recent paving of Broad street with asphaltum was accomplished largely through his untiring efforts; and

Whereas we, the members of this club, desiring to express our approval and appreciation as citizens and wheelmen of the course pursued by his honor in this direction, it is therefore

Resolved that the hearty thanks and grateful appreciation of this club be and are hereby extended to his honor, Mayor Edwin S. Stuart for his earnest, efficient and successful endeavors toward the improvement of the highways of this city and particularly that of Broad street.

PAUL BERWIN.

Milwaukee Wheelmen's Century Run.

MILWAUKEE, Oct. 17.—The Milwaukee Wheelmen's annual century run, while not in any way approaching in numbers the initial run of the club last year, can not be classed as a failure, for fifteen steady riders went over the course and excelled anything in the way of time heretofore attempted. The day was of the made-to-order style. The start was made at 6:30 a. m. Lieutenant Schmidt-bauer made the pace and was constantly urged to make it a little faster, with a result that it became almost a hundred-mile race instead of a social run. T. C. Nogaye, a plucky and nerry rider from the domain of his highness the Mikado, enlivened the run with numerous feats of wonderful riding on the outward journey, but relapsed into a very quiet

state on the return. An hour and a half was spent in Watertown, where everybody did justice to a splendid dinner, and endeavored to recuperate for the return trip. The road was in first-class condition, which may account for the great number of finishes, all registering within eleven hours except three, F. T. Prachthauser, Walter Durbin and Fred Pollworth. The following will hereafter be entitled to bear the distinguished title of cyclersian: E. W. Roth, C. A. Bennett, Theodore Geltaar, Will Klatte, F. T. Hoffman, George Schley, J. C. Schmidtbauer, George Becker, T. C. Nogaye, Otto A. Zachamer, Albert Mayer, L. P. Rhene, E. S. Regby, William Parr and F. Terry Andrae.

Charles Price, one of Milwaukee's best known racing men, will on Nov. 5 take his departure for a trip through the South American republics in the interest of the Sercombe-Bolte Manufacturing Company of this city. The firm is building him one of its very latest racing machines, and Price will endeavor to popularize the Sanger racer in the country where the thermometer has a vacation every day in the year. He will be gone about six months, visiting Havana, Kingston, West Indies and the republics of Central and South America.

Willis B. Troy, representing the *Sporting Life*, was in Milwaukee a few days ago for the purpose of making arrangements with Sanger to join his company of racing men which that paper proposes taking to the Pacific Coast this winter. Mr. Troy states that he has secured the consent of Zimmerman, Lumsden, Windle, Tyler and Berlo.

JACK ROYAL.

Music in Chicago.

The Chicago orchestra will inaugurate its second regular season at the Auditorium Saturday evening with a popular

programme, which will include five important compositions not heretofore heard in Chicago. The soloist for the occasion will be Bruno Steindel, the eminent violoncelloist. The first symphony concert is fixed for Friday afternoon and Saturday evening of next week, and the chief number of the programme will be Beethoven's seventh symphony. The single seat sale opened successfully last Monday, the moderate prices ranging from 25c. to \$1.00 for matinees, and 25c. to \$1.50 for evening concerts, having proved a great inducement to music lovers.

Off for Europe.

Mr. Warman, of Warman & Hazlewood, left Chicago last week and sailed on the Eurania for Coventry Saturday. He goes abroad for the purpose of carrying out the different alterations required for the American cycle trade for next season. Coventry Cross cycles will be made purposely for the American market next season.

Two Clubs Consolidate.

The Mercury and Girard Avenue Wheelmen, of West Philadelphia, have consolidated under the name of the West Philadelphia Cyclers, making the new club the second largest in West Philadelphia. The officers elected for the next six months are as follows: President, J. F. Neill; vice-president, W. Edgar Buchanan; treasurer, R. S. Doughty; secretary, G. M. Miller, assistant secretary, M. Meredith; captain, C. R. Warwick; first lieutenant, G. H. Paist; second lieutenant, C. L. Bryant.

The membership already numbers a hundred and the treasury is well filled. This consolidation has been long thought of, and now that it has been consummated the new club will soon rank among the best if the members manifest

the interest that they should. Suitable quarters are being sought, and when found will be furnished in first-class style. At present every indication points toward future success.

Big Deal in Wheels.

BUFFALO, N. Y., Oct. 19.—(Special telegram.)—H. C. Martin & Company this morning closed a contract with the Buffalo Cycle Works for one thousand wheels for next season.

Chicago Notes.

Misses Heggerty and Porter completed another century Sunday, Oct. 9 over the Elgin-Aurora course. This was Miss Porter's fifth and Miss Heggerty's sixth century, all but one this season.

The Ravenswood Cycling Club's social season opens very successfully. The club house is the scene of some sort of entertainment every Wednesday evening. Its entertainment of the Lincoln club at the Ethiopians' smoker was royal.

Will Not Be In the Parade.

At the regular meeting of the Associated Cycling Clubs of Chicago Thursday night, it was decided to take no part in the World's Fair parade. This action was taken principally because it would be almost impossible for wheelmen to keep even ranks in a mixed parade, because of the slow pace and frequent stops. The delegates to the meeting thought it would be better to turn all energy toward the monster parade to be given next year. The association also voted to send a letter of indorsement to the coming good roads convention to be held at Central Music Hall.

James Kirkham won a five-mile road race at Clinton, Ia., Friday last, in 18 min. 15 sec. Lucien Weston was second and Alfred Rowland third.

Grant Machine Tool Works.
(Fitchburg Daily Sentinel.)

This industry, in its methods of working, is unlike any other in existence. The machines are the invention of Messrs. R. H. and J. J. Grant, and patents on them have been applied for. The works are superintended by R. H. Grant, and John J. Grant is general manager. The latter went to work in a machine shop when but a boy and has had charge of different works since he was twenty years of age. He was nine years assistant superintendent of the Pratt & Whitney Company, Hartford, Conn.; two years superintendent of the American Sewing Machine Company, Philadelphia, and for three years previous to starting his present industry had been with the Simonds Rolling Machine Company, in this city.

The works are located at the corner of Lunenburg and Grant streets, a building being erected especially for them in August last. This measures 100x30, with ell 30x20 for boiler and engine room, but this is now all fully utilized and large additions to the building are in

J. J. GRANT.

contemplation. The products are anti-friction balls, ball bearings and specialties, the main feature of the business being at present the first named. The machines by which they are made are the product of many years of experience, observation and experimenting by Mr. J. J. Grant, and it is claimed they will revolutionize old methods. By their use the cost of labor is reduced to a minimum; they work automatically, feeding themselves, and a boy can attend to the working of thirty of them. Twenty are now in operation. This number is constantly being added to as fast as the machines can be made, and it is the intention to make this the largest anti-friction ball manufacturing plant in the Union. They are warranted in doing this because of so many manufacturers visiting here pronouncing their productions superior to any elsewhere made. The best of tool steel, made specially for them, is used, and is all handled cold except in the tempering, after being rough ground; and the method of tempering, which is peculiar to itself, is said to be the best anywhere used. The advantages claimed are that the ball is nearer a perfect sphere, that "piping" is impossible, that it is more durable and less liable to break.

Orders are now coming in faster than

they can be attended to, and large orders for export have been tendered as soon as facilities for their filling can be had. These machines are all constructed on the premises, and though now used largely for making balls, they are adapted for turning any round or spherical article from metal, and it would seem that the possibilities of the business are almost boundless.

English Visitors and Their Opinions.

Edward Mushing, managing director of the Centaur Cycle Company, and Joseph Lucas, who as a maker of lamps is well known wherever the cycle may be found, spent a portion of last week in Chicago. They have already visited many of the large cities. Heretofore the Premier Cycle Company of New York has handled the Lucas trade for the whole country, but, on investigation—the purpose which brought him here—he concluded that a good western agency would be desirable. Hence a good offer from the McIntosh-Huntington Company, of Cleveland, was accepted. A contract was entered into and hereafter that house will control the territory west of Ohio. It is probable that the Premier people will continue the business in the eastern states. Mr. Lucas has been in the lamp business nearly a quarter of a century. Originally he made ships' lamps and became famous on the introduction of the Tom Bowling. Since then lamps of all sorts and conditions have been made. The introduction of the king of the Road for cyclists' use gave him a grand reputation, which he has ever since maintained.

Mr. Mushing has some very pronounced ideas as to tires. He is a firm believer in the superiority of the Dunlop over all others, and says that eighty-five per cent of the tires used in England next year will be of that make. He believes, for the sake of resiliency, in the old method of affixing the tire, and so, he says, do the makers, but the demand for an easier method of repairing has caused the change for 1893.

"I am aware," said Mr. Mushing, "that the Dunlop has not been as successful here as in England, but that is due to carelessness in fitting. They have not received proper care. I have noticed this, that in 1891 only five per cent of the tires used in England were pneumatics. In 1892 this jumped to seventy per cent, and I can assure you that we have had less trouble with the seventy than we had with the five. This we account for by improvements in the tire to some extent, but very largely on account of the extra care in fitting." Mr. Mushing declares it to be the greatest of mistakes to use anything but the very best of materials in tires.

The Centaur agencies for '93 have been placed, to a large extent, with the old concerns, but some eastern territory remains to be assigned.

Peoria Trade Doings.

PEORIA, Oct. 7.—Charles W. Lynde, representing W. D. Allen & Company, of Chicago, was in our city last week, with a sample of the 1893 Protection Strip pneumatic. The Protection Strip will be self-healing. The different bicycle houses placed a sample order with Mr. Lynde and will give these tires a good test. If they are found to be what he claims for them, they will in all probability be largely used in Peoria the

coming season. Mr. Lynde had with him a sample pedal rubber. The body is made of a composition of cork and rubber, over which is cemented a sheet of pure rubber. In this manner the rubbers are made from four to eight ounces lighter per set than the solid rubber pedals. He also exhibited a new sample of a handle, which is made of a composition of rubber and cork, very light, and which promises to answer the requirements better than cork handles.

A large number of orders have been placed with Kirkwood, Miller & Company for their 1893 Telephone. This wheel is built on Humber lines, has an inch and three-quarters tire on rear wheel and an inch and a half on front wheel. The rear wheel is twenty-six inch and the front twenty-eight. The machine has a long wheel base, the saddle is well back and the handle-bars have a graceful curve and drop. The bearings on the '93 Telephone are guaranteed to be dust proof, and are as easy running as ball bearings can be built.

Charles E. Duryea, of the Rouse-Duryea Cycle Company, has been in Peoria for some time past looking after the new bicycle factory, which will be put in operation here soon. Mr. Duryea is one of the best posted men on bicycle construction in the country, and it is safe to say that whatever wheel he builds will be as good as the best. LAUREL.

The Trade in England.

LONDON, Oct. 8, 1892.—Over 280 firms have now taken space for the Stanley Show next month, and as quite fifty more are expected there is little doubt that the exhibition will prove the biggest on record. For the information of your readers I ascertained from Mr. Drury the other day that although the last date for applying for space has expired, there will be no difficulty in finding room for any invention, or other exhibit, received from the States, up to the date of opening. For an inclusive fee of \$4.87 any invention may be staged in the inventor's section during the whole period of the show.

The Rudge Cycle Company has issued a circular to all its agents announcing the intention of exhibiting at the Stanley Show, and giving as its reason the opinion that the date fixed by the Cycle Manufacturers' Association (January) is made too late to ascertain the views of customers regarding next year's trade. It adds that, considering the great changes that have occurred in the cycle trade during the last few years, it would be dangerous to dispense with such views, while if it waited till January there would be insufficient time to insure the manufacture and delivery of orders before Easter. I think the Rudge people are very wise and I have no doubt the Manufacturers' Association was compelled to select the date mentioned, owing to circumstances beyond their control. Speaking of the Rudge Company reminds me that it intends to exhibit at the Stanley Show an aluminum safety weighing seventeen pounds.

PERRY'S NEW GEAR.

Perry & Company, Birmingham, the well-known makers of cycle fittings, are placing upon the market their new geared hub, suitable for front driver safeties. It is practically identical with that applied to the Rudge f. d. safety described in my last letter, and is very similar to a gear with which the Referee people have been experimenting lately. As regards its lightness, neatness, simplicity and high quality, there can be little doubt, but as to efficiency no one seems to know anything. Doubtless it will answer sufficiently well to ensure the sale of the first machines fitted with

it, but up to the time of writing I have been unable to discover a scrap of evidence respecting its freedom of running at high speed, or its durability. I hope it may prove itself to be possessed of these qualities and I shall endeavor to obtain the earliest practical information concerning it.

THEIR GEAR SATISFACTORY.

Morris, Wilson & Company, who, by the way, are just converting their business into a private company to be called the Referee Cycle Company, Ltd., are now satisfied with the f. d. gear they have been testing for weeks past. They will exhibit a number of f. d. safeties at the show fitted with it. The other day I examined the drawings of the gear, which has four chain wheels and two chains. The whole is enclosed in a very neat steel case, is light, easy running and does not widen the tread—an important point. The gear is attached to the front fork end and the arrangements for adjusting the five or six ball bearings in its neighborhood are as simple as they are efficient.

WILL MAKE FRONT DRIVERS.

Another important firm—perhaps the third in rank amongst London manufacturers—also engaged in preparations for a big front driver trade next year, is Begbie & Twentyman, of Hadley fame. Their factory is situated in Fortress Road, Kentisto Town, N. W., and I recently had a long chat with Mr. Beagbie concerning the past and future of his business. In the long ago the Hadley ordinaries enjoyed an immense reputation and this fact will ensure the go-ahead partners, who are no less successful in making road records than in directing their large business, a very considerable share of patronage. The Hawley f. d. safeties will weigh thirty pounds for thirty-six inch size, and thirty-four pounds for thirty-eight inch. The back wheels will be twenty-two inches, and the Crypto gear will be adopted. I have ridden two ordinaries in the past built by the firm, and must say I think a lot of their work. I have seen an early edition of their f. d. novelty and hope to try one at an early date. Their mode of fixing the saddle is both ingenious and original, consisting of an L shaped tube fixed horizontally between the neck and the spine, the rider's weight being borne by the longer arm. All the Hadley safeties will be from three to four pounds lighter in 1893. Their design is not the Humber pattern and will continue as it has remained for the last three years. The same remark applies to the Hadley tricycles, which have done much to make the fame of the firm. Their speed is peculiar, a result due to the possession by the firm of the real secret of tricycle building so commonly unknown except by a very few houses. Hundreds of Hadley safeties have gone to Ireland this year, where their strength is appreciated. Hadley semi-racing tricycles have been in demand in large number on the continent. Not only are the Hadleys ridden by fast road men all over the kingdom, but aristocrats like Lord Dunsany, the Marquis of Downshire and the Earl of Landerdale are among the firm's customers.

I called the other day on Pollard Brothers, of 32 Spring street, Paddington, to inspect an unique ordinary they are just completing to the order of H. D. Faith, the well-known amateur road and path rider. Faith made a long study of the ordinary as a speed mount and arrived at the conclusion that, with his thirteen stone weight, binding in the bearings retarded his pace when going at above a certain speed. His favorite mount for years, it may be stated, has been a Humber. The Humber company

The James Safety.

"JAMES" SPECIFICATIONS.

DIAMOND Frame, Warwick Hollow Rim, our unequalled Semi-Tangent Direct Spokes, Southard Cranks, Adjustable Handle-Bar and Seat Pillar, Perfect Chain Adjustment, Ball Bearings throughout (including head), Lamp Bracket, geared to 64 or to suit purchaser, quality ABSOLUTELY PERFECT, FULL GUARANTEE.

ROAD RACER, Weight 28 Pounds,	-	-	-	-	-	\$150 00
FULL ROADSTER, Weight 35 Pounds,	-	-	-	-	-	\$150 00
TRACK RACER, Weight 25 Pounds,	-	-	-	-	-	\$155 00
TRACK RACER, Weight 23 Pounds,	-	-	-	-	-	\$160 00

We Guarantee These Weights.

A BIG OFFER!

There are machines in the market, the makers of which claim to have revolutionized everything in connection with cycling—except amateurism!! That's their peculiarity!!

We have never yet subsidised Amateur Riders—being a contravention of the rules and regulations of the National Cyclists' Union, and a breach of Amateur Law—we do not intend to depart from this principle, but will present

A Prize Value \$500

to the first Amateur rider who succeeds in lowering the One Mile [Amateur Record on one of our "CHAMPION" RACERS. We will also give to the first Professional who succeeds in lowering the World's Record at One Mile on our Machines

\$500 Hard Cash.

are not the people to bother about a fad. Faith's fad was to increase the size of the bearing balls. This he has had done in the mount I inspected, a fifty-seven-inch, tangent-spoked ordinary, with Smith's laced pneumatic tires to both wheels. There are twelve balls in the front bearing and the same number to the back bearing. The balls alone weigh three pounds, being no less than one inch in diameter. The hubs are barrel shaped and altogether too remarkable to admit of concise description. The tread is only eight and a quarter inches over all, and I don't think the weight will exceed fifty pounds. Of course this will militate against the success of the mount, but all the same I am very curious to learn how it turns out after practical trial. Mr. Faith's ideas in the past have worked out into successes, notably in the case of a tandem he designed a year or so back. This was not heavy—scaling only fifty-five pounds. Pollard Brothers are building a thirty-six pound tricycle for a lightweight lady customer, and will be fully prepared with an f. d. safety for next season.

General opinion is forming very rapidly in favor of the 1893 pattern Dunlop, which I endeavored to describe in my last letter. Its simplicity has taken the cycling world by storm, and the fact that the old price will be charged and will include the special rims, will greatly influence purchasers in its favor. A novelty of secondary importance, appealing more to pathmen than to quiet riders, also being produced by the Dunlop people, is the "Edwards cover" for attachment to new or existing Dunlops. These covers consist of light bands of rubber, with transverse butts or blocks moulded in them, with spaces between of about one inch. They give the tire a better hold on greasy surfaces or in rounding sharp curves. They also remove the clinging of the tires to soft surfaces and have been found to accelerate path speeds. The covers weigh about seven ounces each. M. B. Fowler used these tires when he recently lowered the two, three and five-mile records. I have tried a safety with the invention applied to its back wheel tire, and except when going very fast I think the device reduces comfort. Nevertheless, great interest is being taken in the novelty by speed men on both the path and road, and I have already seen several samples in use.

STANLEY.

The New Dunlop Detachable Tire.

It is now an open secret that the Dunlop tire for 1893 will be of a startlingly novel pattern; and although it is generally understood that it will be a "wired" tire, the exact construction and action are not clearly to be comprehended without a technical description, because, unlike other tires held down by wires along the edges, there are no couplings whatever, the wires being continuous along the edge of the cover. The main points to be noticed are that a special rim is used, unlike any other rim; that the tire is considerably lighter than of yore; that it can be opened and closed more quickly than any tire hitherto made; that the construction allows of the use of the same beautifully soft and resilient rubber, in both the air tube and the cover, as have rendered the Dunlop so speedy and comfortable, and that there is no increase in the price. The "canvas bag" is done away with; and repairs are not only a matter of but a few minutes, but (unlike some other quickly-repaired tires) they are permanent.

ANYBODY CAN PUT IT ON.

The accompanying diagram (fig. A) shows the section of the tire and solid rim. Hollow rims are being made by

Warwick's, the Surrey Machinists' Company and the Nottingham Machinists' Company, the section in each case being exactly like the solid rim at the top, with a semi-elliptical bottom; and cycle makers will be free to order any of these makes they prefer, although they will all (like the solid) be obtainable from the tire makers only, the rims and tires being supplied complete, together. When the wheels have been built the makers can

put the tires on in two or three minutes, the only fixing required being to stretch a piece of tape over the spoke heads, with its ends solutioned together for three inches. Thus it will be easier to put Dunlop tires onto wheels than to stick solid tires on; and a broken spoke can be more easily replaced than with solids.

HOW TO FIT ON AND REMOVE.

The fitting on and removal of the cover is somewhat mysterious at first glance, but when its principle is understood it becomes admirable in its simplicity. By the diagram it will be seen that the cover is a graduated one, identical with the old Dunlop cover, but instead of its edges being solutioned outside the rim they are cut down to the wires. The wires are enfolded in a strip of canvas, which lines the cover—canvas and cover being permanently solutioned together—so that no part of the wire is exposed. In case wet should soak through the cover, the wires are first electrocoppered to prevent rust. Now, the

circumference of the wires being smaller than that of the rim edges, it is not immediately apparent how, being joined up, they can be put into the rim; but it will be seen that, although the wires are smaller than the edge of the rim, they are larger than its bed, so that by pushing the wire, at one side of the wheel, down into the bed of the rim, there is sufficient surplus wire at the other side of the wheel to form a loop, as in the diagram (fig. B), and by slipping the finger tips under this loop and sliding them round the periphery the whole loop of wire can be drawn over the edge of the rim. One edge of the cover being thus slipped into the rim, the air tube (joined into a continuous ring) is placed in the rim under the cover, and the other edge of the cover is then pressed down into the rim in exactly the same way.

The tire being inflated, the pressure of air tends to expand the cover, but the wires prevent expansion beyond the limits of their circumference, which is exactly that of the dotted line in fig. B, so that the edges are forcibly pressed into the recesses furnished for them into the rim, and the tire assumes the shape depicted in fig. A. To open the tire for repair, all that is needed is to deflate, press one side down into the bed of the rim, slip the finger tips under the loop formed on the opposite side of the wheel, slide the fingers along until all one edge of the cover is free, and pull the air tube out of the rim bodily, without having to unjoin the ends of the air tube.

SAME STYLE OF VALVE.

The valve is the same as the 1892 patent deflating valve, but made altogether smaller, and with several little improvements. To prevent the loss of the round washer (a common experience when repairing) a flat plate is used, with a nut which holds it firmly outside the air tube, and need never be disturbed—even when completely removing the tube and valve from the rim. This nut assists in making the connection between valve and tube absolutely air-tight. The nut outside the rim is a milled round-edged nut, to be turned with the fingers, so that the clumsy use or the spanner can no longer do damage. The mouth of the valve body has two nicks cut in it, and the air plug has corresponding shoulders to fit, in order to prevent the plug being turned round, twisting or ever cutting the rubber tube covering it.—*Bicycling Times.*

Chicago Trade Jottings.

George E. Lloyd is seriously ill at his home on Leavitt street.

R. D. Garden was at his desk for a brief time late last week.

The Western Wheel Works will use 17,500 pairs of pneumatic tires the coming season.

H. J. Winn, of the Illinois Cycle Company, has returned from an extended trip through the east.

Charles H. Stephens is engaged in the manufacture of a line of wheels at his store near Douglas Park.

Fred Patee passed through Chicago on Thursday of last week on a rather hurried trip to New York.

C. H. Tobey, formerly with the Kenwood Manufacturing Company, has entered the employ of A. G. Spalding & Brothers.

Frank Silvers, of Albany, is now in Iowa in the interest of the Derby Cycle Company. Mr. Garfield, of this concern, is at home sick.

Thorsen & Cassady contemplate enlarging their cycle business and may open a large retail store independent of their other business.

N. E. Turgeon, assistant manager of the Pope company's Chicago store, was united in marriage last Wednesday to Miss Gertrude M. Chapman, at Andover, Vt.

J. D. Adams, of the Chicago C. C., had his Humber road racer, No. 14,713, stolen last week. He would like to hear of it, his address being 172 Twenty-second street.

One large manufacturing concern is reported to be stalled late in the season with no less than 10,000 medium grade safeties, mostly youths' wheels in solid and cushion tires.

A local wheelman, who, like many others, thought the cost of importing was greatly exaggerated, planned to break the market (he's a board of trade speculator) by importing a number of high grade wheels and advertising them

at \$100. He imported the wheels, going to England himself, and when the cost was figured he found to his dismay that they cost so much he must sell at full list or make no money.

Thorsen & Cassady report a very fair fall trade and place their season's sales at 4,000 wheels, principally, of course, of medium grade.

Thomas Kane & Company will continue to handle the old line, making the Stover wheels their specialty for 1893. This house still has a few Bronchos for sale.

Gormully & Jeffery show their patriotism this week. Their window is beautifully decorated in the prevailing shade of terra cotta, and a handsomely enameled diamond Rambler in the same color attracts general attention.

Percy Harris now sells wheels for the Indiana Bicycle Company, of Indianapolis. During his career in the cycle business Mr. Harris has worked for more than a dozen dealers and has been in the business on his own account.

A. H. Radell has completed a racing wheel, built to his own measure, the seat of which is on a projection of the upper bar of the frame, which rises from its junction with the head. The wheel weighs but twenty-five pounds.

The Coventry Machinists' Company will very soon have the finest appearing cycle store on the street. The building at 296 Wabash avenue is being entirely remodeled. The shipping department will be larger and lighter, a new elevator construction will make the repair shop easily accessible, and the stairway in the front of the store is to come out and the entire front as well. The plate glass for the window will be the largest on the street.

Rouse, Hazard & Company, Peoria, report that their trade outside the United States has been much larger this season than ever before. They have done a nice business in Mexico and Canada, while they have also made shipments to England and South America. Last week they received an order for four bicycles from Java. The fact that this house is drawing trade from foreign countries is a pretty good indication that its goods and prices are right.

Louis Jordan, of 71 Randolph street, occupies one entire floor for his repair shop, salesroom, office and gun shop. This is four or five times the space occupied by the old firm of Graf & Jordan. Mr. Jordan has coined money this season. He has used over 400 pairs of pneumatic tires, 300 of these being the Bolte, and has also used 300 pairs of cushions. Seven men are given constant employment. Twenty-five wheels will be built the coming winter on lines after Mr. Jordan's own ideas. These will all be very light, from twenty-five to thirty-two pounds. Mr. Jordan does not do cycle work exclusively. His gun work is large and he is now engaged on several shot guns for exhibition at the world's fair.

Effect of the World's Fair.

"How will the World's Fair affect trade next year?" is a question often asked.

One of the leading manufacturers recently spoken to on the subject by the REFEREE thought that the fair would certainly not be beneficial. "People in the country," said he, "are now, and will be right along, saving their money for a visit to Chicago. Many a young man who would otherwise purchase a wheel will use his money to visit the fair. I do not mean by that that there will be a falling off in the volume of trade, but that the other's calls on young

BIDWELL

PNEUMATIC TIRES, 1893.

During the past season we were at the head of the Pneumatic Tire business in the United States, looking to improve the tire for the season of 1893. Naturally we have not been idle in experimenting. We are **now ready** with our **new tires**, which surpass anything ever put on the market.

They Cannot Burst,

They Cannot Come Loose,

They Cannot Leak.

Before placing your order see them. A full description will be sent you at once.

GEO. R. BIDWELL CYCLE CO.,

306, 308 and 310 West 59th Street,
NEW YORK.

Tire Factory, 49-51 West 66th Street, New York.

people's pockets for cash may prevent any such vast increase in the demand as some seem to think is assured."

Another gentleman, connected with a Chicago wholesale and retail house, said that the principals had been trying to make up their minds what to do for next season. "We hardly know what to do," said he. "I am afraid the fair will bring us no end of trouble and little or no benefit. It has already raised rents, and has a tendency to increase salaries and other expenses. The traffic in this neighborhood [Wabash avenue] will be enormous and the stores will no doubt be filled constantly with visitors bent more on inspection than on purchasing. Of course we must attend to them and that means a large increase in the staff of salesmen. The renting business may be good. No doubt every means of conveyance to the fair will be overtaxed and wheels will be rented by people who desire to travel in comfort. Taken all around, however, I doubt whether the fair will be beneficial to the trade."

Another New Tire.

George A. Burwell, of Highlandville, Mass., has invented a tire which may prove quite popular with the tourist. It is a pneumatic, but when deflated is a solid. The tire has an air chamber (a2) and thickened sides or walls (a4, a4). The valve (b2) is connected to the tube (b), which in turn connects the air chamber.

The tire (a) is connected to the rim (c2, c2) in the ordinary manner. When the tire is inflated the pressure is entirely on the tread (a3), which is of thinner rubber than the walls. The walls (a4, a4), as soon as the tire is deflated and the tread becomes depressed, act as a solid tire, so that a puncture will not prevent the rider continuing his journey.

An Electric Lamp.

An electric lamp for bicycles, neat and compact, has been invented by Arthur McMillan, of Chicago. It is all contained in the space of a King of the Road lamp and attaches to the wheel in the same manner. The weight is four pounds, two ounces, but is to be greatly reduced. It is charged by a gravity battery, the entire expense being only fifty cents a year. This useful adjunct of a bicycle burns steadily for five hours and the light may be closed off without dismounting. It is fitted with a three-inch lens and is capable of eight candle light, which will be increased should present experiments be successful. By another contrivance the body of the lamp may be suspended under the seat like a tool bag, and a wire extended through the upper bar of the frame to the head, where the light would occupy only the space of the lens. Mr. McMillan is quite a young man and is elated over his success. He already has orders for a number of the lamps, which will list at \$13.00.

Has More Capital Now.

The March-Davis Cycle Company is now incorporated under the laws of Illinois. Some capital has been taken in. Stanley Crafts and W. E. Davis, of Austin, being the principal stockholders. The plant is to be increased at once, and next year's output will be many times

larger than this year's. The March has had most flattering success this season having, like the Moffat of old, captured a majority of prizes in city road races and the twenty-four-hour world's record. Boles, of Denver, recently captured all Colorado championships on a March, and not on another machine as has been stated. The success of the March is due greatly to the fact that only the very best material is used and the highest-priced workmanship.

Recent Patents Granted.

The following is a list of recent bicycle patents, reported especially for the REFEREE by W. E. Aughinbaugh, patent attorney, Washington, D. C.:

483,990, tire for bicycle wheels; George A. Burwell, Highlandville, Mass.; filed Aug. 30, 1891; serial No., 403,159.

484,389, cycle saddle; John B. Brookes, Birmingham, Eng.; filed April 8, 1892; serial No. 428,366; patented in England Sept. 30, 1890.

484,390, cycle saddle; John B. Brookes, Birmingham, Eng.; filed April 8, 1892; serial No. 428,367; patented in England April 20, 1888; April 13, 1891; Dec. 3, 1891, and March 16, 1892.

Chicago Honored.

The Triumph Cycle Company, limited, has just finished the first of its next season's patterns, and the experimental machine was ridden by G. Jenkins on Saturday, when he beat the 100-mile Midland record. Like all the Triumphs it is very rigid and fast, and should further enhance the reputation of the firm. On account of the World's Fair at Chicago next year this machine will be named the Chicago Triumph—and a very good name, too.—*Bicycling News.*

They Are Laid Off.

There is an unusual number of excellent cycle salesmen unemployed at present. The dealers have adopted the plan of stopping their pay immediately they come in from their last trip of the season, leaving the men to shift for themselves until they are wanted again.

New English Inventions.

These abstracts are prepared immediately after the patents are applied for by G. Douglas Leechman, consulting engineer, Coventry, England:

[All persons interested in opposing the grant of a patent on any one of the undermentioned applications may, at any time within two months from August 31, give notice in the prescribed form of such opposition.]

No. 17,432. W. T. Shaw and A. Sydenham's "Improvements in driving gear for velocipedes and other like purposes" Oct. 13, 1891.—This

driving gear may be formed as a driving box on the pedal shaft of a tricycle or bicycle, in which case the box rotated at the increased velocity is provided with suitable means of conveying the motion to the driving wheel. But the gear is preferably built as an integral part of the axle and hub of the driving wheel, in which case it is constructed on the following plan: The fork (F) within which the driving wheel runs carries ball bearings (B) at the two lower ends, through which freely runs an axle (A) armed with cranks and pedals or other convenient means of propulsion. The hub (H) of the driving wheel is not fixed to the axle so as to move at the same velocity, but is connected with the axle by the interposition of mechanism which imparts to it a higher velocity, as follows:

The bearing (B) in the fork end (F) on one side is enlarged into a tubular form (T) continued inwards for a short distance and exactly embracing the axle (A). The external surface of this

portion is formed into a spur wheel (S) which is held fast and prevented from rotating by reason of its being firmly fixed to or in one piece with the bearing (B) of the fork end. By the side of this wheel a second spur wheel (S2) of somewhat larger diameter is formed upon the axle and of course moves around with it. This is the motor wheel of the mechanism. Beyond this wheel is placed the hub flange (H3), which is of special construction, and at its periphery sails over toward the fork, forming a short cylinder (H2), which incloses the mechanism. The hub flange proper (H3) carries four equi-distant studs or spindles (P) upon which are placed broad pinions (W) of a total width equal to the combined width of the two spur wheels (S and S2) described above. These broad pinions are of two different diameters, the smaller end gearing with the motor wheel (S2) and the larger end with the wheel (S) fixed to the bearing (B) in the fork end. The spindles on which the two-ended pinions run are supported on the side next the fork by a broad, flat ring (R) fitted tightly into a recess formed on the inside of the cylindrical continuation of the hub (H2). The flat ring thus forms on that side a casing for the gear wheels, which are in this way perfectly inclosed. It also carries, in the intervals between the spindle ends, four equi-distant supports at right angles to its inner surface, and of such a length as to butt against the inside surface of the hub flange (H3) to which they are firmly screwed from the outside. It will be obvious that this arrangement of pinions forms an epicyclic train, and that upon the motor wheel (S2) being set in motion, the broad pinions (W) will be rotated on their spindles. But besides being rotated, the broad pinions being in gear with the fixed wheel (S), will receive a motion of translation and will carry around with them the hub flange (H3) at a higher velocity than that of the axle (A). The amount of increase depends upon the ratio which the various components of the train bear to each other. The special hub flange described above has a web or projecting ring on its cylindrical portion to carry the spokes, and is continued by a tube (U) to the other end of the hub, where is a flange of the ordinary kind for the reception of the spokes on that side. Then follows the fork end (F) on that side, with ball bearing (B) for the axles. The hub proper also runs upon the axle, supported by a ball bearing at either end (B2 and B3), and the broad pinions (W) are likewise provided with ball bearings (W2) at either end, upon their respective spindles.

[All persons interested in opposing the grant of a patent on any one of the undermentioned applications may at any time, within two months from Sept. 7, give notice in the prescribed form of such opposition.]

No. 20,483. J. R. Rickard's "Improved means for repairing pneumatic and other hollow tires for velocipedes and similar vehicles." Nov. 25,

1891.—When the tire has been punctured a plug is inserted with the head (A) in the interior of the tire and the shank (B) filling the hole the pressure of the air when applied through the valve forces the head (A) against the inner wall of the tire, making an air-tight joint. To insert the plug, a hole of suitable size is made in the tire where the puncture has occurred. The plug is coated with india rubber solution or some other suitable cement, and forced with the head (A) first into the interior of the tire, as shown on the drawing; the shank (B) is then pulled outward, thus pressing the head (A) against the inside of the tire. The tire is then inflated and the pressure on the head or flange (A) forces the plug against the inside of the tire and effectually holds it in position, thus making a perfect repair.

No. 19,032. J. S. W. Edmund's "Improvements in safety bicycles, tricycles and other velocipedes." Nov. 4, 1891.—This invention has reference to the parts by which the saddle is connected to the machine, and has for its objects to prevent the saddle from inclining either to the right or left, should the fixing screw become loose, and to prevent the support of the saddle from turning in the saddle post or other part of the machine in which it may be inserted. The socket on the foundation of the saddle is formed with an internal projection or rib, and the horizontal branch of the L-pin is formed with a corresponding longitudinal groove for the said projection to engage with. A similar projection on the interior of the saddle post, and a similar groove in the vertical branch of the L-pin, are formed. The positions of the engaging parts of the L-pin and socket may be reverse, as shown in the figure, where the V-shaped slot in the socket (B) is marked H and the V-shaped projection on the horizontal branch (D) of the L-pin is marked I. The applicant does not limit himself to the use of the projections and grooves before described, as the same effect may be produced by making the socket and the horizontal branch of the L-pin square or triangular in cross section, or of such other figure that, while the said eye or socket is capable of sliding

freely on the L-pin, it is capable of turning thereon. Similarly the vertical branch of the L-pin and the interior of the top of the saddle post may be

made square, triangular or of such other figure that the L-pin, while capable of sliding freely in the saddle post, is incapable of turning thereon.

General Trade Notes.

C. F. Stokes, of the Charles F. Stokes Manufacturing Company, is in California.

George K. Barrett is well pleased with a Raleigh which he received last week.

Morgan & Wright gave their employes a half week's holiday this week, owing to dedication.

Ainsworth, of H. A. Lozier & Company, expects to start out with samples in two weeks.

E. N. Bowen, of Buffalo, is working on a new stand, one that will answer every purpose.

R. D. Garden goes to Hot Springs this week for his health, which has been very poor for some time.

J. Jay Ross, for Ames & Frost, is now in Alabama and expects to reach Key West, Fla., before returning.

L. Fewsmith, of the Eclipse, is skir mishing around. The Eclipse people have a good man in Fewsmith.

Among the horsemen in Indiana, Kentucky and as far as Nashville, Tenn., the Morgan & Wright tire is very popular.

The Coventry Machinists' Company, Chicago, has just received a half-dozen twenty-three pound Swift racers—beautiful machines.

James Josephi leaves Cleveland for Chicago this week. He will work for one of the foremost manufacturers of the latter city.

"Imitation is the sincerest flattery." Four firms at least are making tires which are nearly duplicates of the Morgan & Wright tires.

Bayliss & Thomas, of Coventry, seek an agency for Excelsior wheels in Chicago. Herbert Hadden, their representative, is now here.

Luthy & Company, of Peoria, expect to import 2,000 machines this season. The past season has been a most successful one with this firm.

Mr. Lozier is thoroughly convinced that he has the best tire on the market and never tires of talking of its good points, and it has them.

It is understood that the Warwick company is making a Pilgrim that "for weight knocks them all." We presume this means light weight, Kennedy.

William Henrick, who returned last Thursday from a trip around the trotting circuit, disposed of a great number of Sterling attachments for sulkies.

Imperial safeties another season will probably be fitted with twenty-eight inch rear and thirty inch front wheels, the racers to be two inches smaller in each wheel.

Geared ordinaries fail to catch on in this country. The dealers who feared a revulsion similar to that when the pneumatic tire came in, are correspondingly happy.

Ned Oliver did a sweeping business in Buffalo and Toledo in Garford saddles. In the former place his contracts amounted to 15,000 saddles, consequently he is one of the happiest mortals on the road. There is no man to-day better posted in the cycle trade than Oliver,

Other equally as good bargains to be had now. We also import the RUDGE, manufacture the SYLPH and OVERLAND, and job the Western Wheel Works' line and others. Sundries in great variety and prices right,

ROUSE, HAZARD & CO., - 89 G STREET, - PEORIA, ILL.

and it is the opinion of shrewd business men that he is one of the best salesmen.

We expected to announce in this week's issue the closing of a contract whereby H. C. Martin & Company will take the entire 1893 output of the Buffalo Cycle Works.

F. P. Prial was unable to be at the Chicago tournament on account of sickness necessitating his return to New York from Indianapolis. Mr. Prial had contemplated a trip to Denver.

The Winton Bicycle Company is showing a tremendous amount of energy at the present time and will soon be on the market through Ned Oliver with its samples. The company has plenty of capital.

Lozier, of Cleveland, says Ned Oliver has the most profitable cycle business in the states. He handles Garford saddles for all territory east of Cleveland and Winton cycles for all territory east of the Pacific.

Penseyers & Haberer, of Buffalo, are laying themselves out to build 100 Globes the coming season. Their aim will be a twenty-three-pound racer, twenty-eight-pound roadster and a thirty-two-pound ladies' wheel.

Kingman & Company of Peoria control Centaur cycles in the west, and tripled their last season's order with Mr. Mushing, nearly one thousand being ordered. Mr. Mushing returned to Coventry with Mr. Lucas this week.

Mr. Lucas, the great English lamp manufacturer, placed the agency for the entire west, of King of the Road lamps, with the McIntosh-Huntington Company of Cleveland, who, it is reported, placed an order for 5,000 of this popular brand of cycle lights.

The G. & J. company has threatened George W. Shamp, of Buffalo, with an action if he does not at once stop making the Shamp saddle. Mr. S. has placed the matter in the hands of his attorneys. If he finds he is infringing he will stop making at once.

The cycle business of Evansville, Ind., a town of 10,000 inhabitants, lies between M. W. Dunham and W. C. Paine. The former has tried many wheels but has finally settled on Kenwoods as his leaders. He also handles Aerials. Paine handles Raleighs, G. & J.'s and several others.

Two Imperials are reported stolen by the Ames & Frost company, which offers a reward of \$50 in each case for the recovery of the wheel. No. 4672 was taken from Boston, and No. 4386 from Chicago. Both were model A pattern and had pneumatic tires and Garford saddles.

Morgan & Wright's employees held an eight-mile handicap road race last Saturday over the Oak Park course. William Tobin won, Charles Valentine second, F. W. Morgan and F. W. Osmun, handicap thirty seconds, tied for third place in 26:35. Four prizes were given. Fifteen men started.

A. J. Holmes is in charge of the bicycle department of the McIntosh-Huntington Company, of Cleveland. He returned recently from an extensive trip through England, and while over there became a benedict. Mr. Holmes is a valuable man and his trip did him a wonderful amount of good.

The Elmore Manufacturing Company, of Elmore, O., will soon have its samples out. The manager, J. H. Becker, is well up in the manufacturing business and thoroughly experienced. His father, H. V. Becker, is president of the company. He is also one of the oldest and wealthiest manufacturers of that place. The treasurer of the concern is a brother

of J. H. The company will put on the market medium grade bicycles. J. H. Becker has been the manager of the Buffalo Wheel Company and leaves Buffalo Nov. 1.

The Marion Cycle Company is much elated over the outlook for next season. Its wheel is to be a diamond frame, the bracket over the sprocket wheel having been discarded. It will weigh under thirty-five pounds. The company has orders for nearly 1,000 wheels, of which 620 are for St. Louis, 100 for Buffalo, and 250 for Chicago. The past season has been a profitable one.

The McIntosh-Huntington Company, of Cleveland, has secured the Southard crank for America. This company is laying itself out for a large trade in sundries and wheels. Mr. Bishop, the manager, declared himself as well pleased with the past season's trade. The company will have more territory for the Centaur wheels in the future. The contract with Lucas is a very important one.

All admire the Sterling road racer now on exhibition at C. F. Stokes & Company's. The wheel weighs twenty-seven pounds, stripped, thirty-three pounds all on, has forty-three inch wheel base and ten and one-half inch steering head. The hubs are reduced one-half from last year's size. The Humber pattern is used. It is a handsomely-finished, splendid-appearing machine and a credit to Chicago manufacturing interests.

A contract was signed last week between the Rudge Cycle Company of Coventry, Eng., and Rouse, Hazard & Company, whereby the latter will manufacture the Rudge in America. The new factory will be located in Peoria and will be equipped with as fine tools as money can purchase to construct high grade bicycles. A number of the parts will be imported from the Rudge factory in Coventry, and when a machine is put together here it will be as good and as finely finished as any wheel of the kind turned out of Coventry. Samples of the 1893 Rudge are shown by Rouse, Hazard & Company.

The C. F. Stokes company has gained, through hustling Billy Herrick, the order for a thirty-eight pound Sterling sulky for Nancy Hanks, the great world-beating trotter, who will lower all records at Nashville, Tenn., hitched to this sulky, the present week. The Sterling people are making a special effort on this sulky, the frame for which will be of twenty-gauge tubing, wheel spokes drawn from special wire tested to 950 pounds tensile strength on a Reible Brothers' testing machine. The tires are Morgan & Wright specially-tested racing tires. Altogether it is the finest built pneumatic sulky yet manufactured.

J. A. Hunt & Company, of Westboro, Mass., are now ready to submit their 1893 line of saddles to the trade. During the past few months they have been very industriously engaged on their samples for the coming season and have succeeded in hitting upon several decidedly novel features in saddle construction, besides producing some unique patterns. To obtain strength combined with the greatest lightness, beauty of design and finish, and comfort in riding has been the special object of their experiments and they are confident that their resulting samples will demonstrate the successful attainment of their object.

The Garden City Wheelmen secured quarters at Thirty-first street and Indiana avenue after disagreeing with their landlord at 1549 Michigan avenue, which premises they occupied rent free.

FOREIGN PRESS OPINIONS.

"Zimmy" Gets a Goodly Share of Advertising Still.

[British Sport.]

If the proposed match between Zimmerman and Nancy Hanks should come off, it is bound to create no end of a stir. We should not mind laying a dime on Zimmy, provided bicyclist and gee-gee start level.

Last week's tall, well-made figure of a man walked into the Coventry Machinists' Company's Manchester depot and saluted Mr. Watson with a long stare and "Don't you know me?" Who do you think it was?—none but "Sandy" Sellers, once England's champion. Sellers, we hear, has at last settled down and soon hopes to become a full fledged doctor. He says "the men have not the ole jiggers to push, and their work is not half so hard as that of the old-time racing men." Stay a moment, Sandy, they ride faster nowadays. 1 min. 56 3/5 sec. Phew!!!

[Northern Wheeler.]

What puzzles me more than anything else is why the cycling papers that clamour most for English records to be properly authenticated are the very ones to accept an alleged foreign record upon the uncorroborated statement of a cablegram.

[Wheeling.]

They say that Corbett, who licked Sullivan, is a cyclist. When Corbett meets Jackson he will have his work cut out for him. By the way, we see that a club of colored cyclists has been refused admission to the Associated Cycling Clubs of Chicago. The Associated Cycling Clubs of Chicago are "off color," and they don't show well so.

[The Cyclist.]

A project is on foot in America to arrange a match between Zimmerman and Nancy Hanks, the celebrated trotter. We suppose this would end Zimmy's career as an amateur. Pretty well all America would go to see the race, though.

[The Athletic and Dramatic News.]

As a rule we may take it that the mile bicycle record is lowered once every year. Zimmerman's record (2:06 2-5) beats the previous best (Osmond's 2:16) [How about Windle's 2:15 that stood all last winter, and many other American records which are still better?—Ed.] by 9 3-5 secs. If the record were beaten to this extent annually for the next ten years, the time for the mile in 1902 would be just 30 seconds, thus we may take it that record breaking so far as the mile is concerned must shortly arrive at its limit, at least until some more wonderful invention than the Dunlop pneumatic sees the light. It is worthy of note that the Dunlop has proved itself to be almost 400 yards faster than the fastest time ever accomplished on a solid tire. Of course, our calculations are made irrespective of the recently claimed record of 1:56 3-5 made by Johnson.

[Irish Cyclist.]

Some of the cycling papers have been exercising their minds over the question

of ladies' pedals; whether the ordinary pedal is too broad for the American market; whether English women have bigger feet than their transatlantic sisters, and so on. One English paper declares that pedals as at present manufactured are just right for English women, in spite of the bitter complaint raised by American lady cyclists about unnecessary width. Surely this rather overstates the matter—the average British girl does find stock-sized pedals too wide, as is proved by the enterprise of one or two firms which have started making specially narrow pedals for ladies' machines. Clever men of business are not usually in the habit of taking considerable trouble to meet a demand which does not exist.

[Sport and Play.]

When Holbein and Shorland mounted a tandem and went for the London to York record, it was a case of Greek joining Greek, and no mistake, and it surprised no one to hear that the famous highwayman's time in his ride to York has been completely eclipsed. We have come on a bit since the days of Bonny Black Bess, and could give Richard and his brave mare a bit of start on a ride like this. Although it has been out that Shorland had given over record-breaking for the season, he seems to have compromised the arrangements a little by getting upon a tandem tricycle. This doughty pair—Shorland and Holbein—rode the distance between the cities mentioned in 13 hrs. 19 min., beating the previous best by 2 hrs. 1 min. F. T. Bidlake, who accompanied them through on a tricycle, put up a new record for the three-wheeler. Pacemaking for a trio like this would be nice, wouldn't it?

Will Break Ground Shortly.

The plans of the National Columbian United Wheelmen's Association are progressing rapidly in regard to constructing the World's Fair club house and home for wheelmen. Land has been purchased on Madison avenue near the corner of Fifty-seventh street on which to erect the large club building, and within two blocks of the Fifty-seventh street entrance to the fair grounds. The architect is now at work upon the plans of the building, which will be a four-story structure. This will be a World's Fair headquarters for wheelmen, run by and supported by wheelmen and for wheelmen only.

J. M. Erwin is manager of the Lincoln Cycling Club indoor ball team.

25 CENTS

For the "Perfect" Pocket Oil, the best and neatest oil can in the world. Superior to all others in neatness, appearance, general utility and durability. A necessity to all riders who wish the best of everything.

"PERFECT" POCKET OIL HOLDER
Best and most convenient device for carrying an oil can on a bicycle. Thoroughly adjustable and easily attached to any part of the machine; no rattling; handsomely nickel-plated. Price, 25c. each.
CUSHMAN & DENISON
172 9th Ave., - New York.

"PERFECT" Pneumatic Pump Holder
Similar to oiler holder, but slightly larger. Pump is always convenient and vexatious delays avoided; handsomely nickel-plated. For sale everywhere. Price, 25c. each.
CUSHMAN & DENISON
172 9th Ave., - New York.

THE MORGAN & WRIGHT TIRES

Have now been before the public for one year, and it is upon the record which they have made on road and path that we must base our claim to further patronage. We trust it will be remembered that we have never made exaggerated claims for our tires. As we have always held the opinion that such claims, in the present state of the art, would be premature. We are still seeking improvement in our tires, and have the satisfaction of seeing those we have made during the past year imitated and copied by a number of makers whose ideas as to what constitutes a good tire have not in the past met with public approval. We have seen letters and heard trade arguments put forth by our competitors, who are now copying our tires, to the effect that they are using better material and making better tires than we can produce. We are perfectly willing to leave these claims to the test of time.

We ask our friends and patrons, however, to consider carefully these claims of superior quality and material. The selection of material for the **Morgan & Wright Tire** has been the work of over a year, and after innumerable tests in our factory and on the road, we have made such changes as experience has shown to be needful. During the past year we have made all repairs free of charge, and this has enabled us to learn from the experience of thousands of riders throughout the United States the weak points in our tires, and the public can rest in confidence that we know more about the quality of our goods and what is necessary to produce a perfect article than competitors who simply copy our methods and depend upon the stretching of a **SAMPLE** of rubber, before the eyes of a customer, to convince that they have more ability as rubber manufacturers. The head of our concern has been an experimenter in rubber fabrics for twelve years, and the business of our concern has been built up from very moderate beginnings, under the pressure of necessity. We do not claim superiority over every one on earth, and we are still experimenting, as we wish to keep up with the times. We shall never descend to detraction of the goods made by others; and what we have to say is in self-defense, against trade arguments being used by competitors, which, should they appear in public print, would give good grounds for an action for libel. We can assure our friends that we use the best material obtainable, that we shall improve our tires just as often as experience points the way, that we have manufacturing facilities and abundant capital to fulfill all our contracts, and with this we know we shall receive all the patronage which our product may deserve.

We have applied for patents on our tires and have every reason to believe that our work of the past year has discovered patentable features, and that our claims to such will be allowed.

All tires made by us after November 1st will be branded with our firm name and be markey "Patent applied for."

MORGAN & WRIGHT, CHICAGO.

CHEAP

Only one thing CHEAP about the
CLEVELANDS.

It does not cost much to sell them. After a man rides the "Thread Tire" he talks about it to his friends. It's different, you know. **CLEVELANDS** are fitted with the Cleveland Pneumatic only.

BEHIND CLOSED DOORS.

The racing board is a creation of the League of American Wheelmen; the league a creation of the majority of the wheelmen of the United States. It is the custom of this racing board to meet once in so many months, weeks or days to pass upon records and pry into the true standing of the amateur, and it seems to be the custom of that august body to do its prying behind closed and bolted doors. To make matters worse, its members close their mouths tighter than clams, and until the weekly hand-organ arrives the 30,000 people who created this same racing board must wait to know what their servants have been doing. In the case of the suspected amateur, he must wait until every body knows he has been suspended before he can make his defense, and then, quite often, it is too late to do him the last part of good. There is no rule which says the board must lock itself up during its deliberations; nor is there any law against giving to the daily or cycling press the general results of a meeting. To be sure, the board has power to make rules for its own government, but that is all. There is no valid reason for the members of the board being secretive, nor is there cause for withholding the findings of the body from the cycling public. The fact that the news is given to the press at large does not prevent the publication of the board's report in the official organ. That is merely a record. The doings of Congress are published in the *Congressional Record*, but the country is given the cream of the news and no fuss is made about it. Nowadays when a member of the racing board is approached there is such an air of secrecy, so chilly, in fact, that it is only too comfortable to keep out of his way. Under the present system of doing business the racing board and its members as individuals can put on an intense amount of agony, all of which explodes in just a week's time. Open the doors of the meeting room, let the press tell what is going on, and things will be running much more smoothly.

SANGER'S MANY TROUBLES.

If Walter C. Sanger would succeed on the racing path he must first learn to treat competitors with at least a little respect; he must learn to be modest. Just as long as he charges others with trickery, and continues to claim the only way he can be defeated is by throwing him, the longer will he be in getting to that point in the racing world he seeks.

It is folly for him to think that no one can defeat him without resorting to foul play. Since he has left Milwaukee and been at two or three race meets we have heard of his kicking qualities. There has hardly been a race in which he was defeated that he did not claim some one fouled him. Why cannot Sanger have the same quiet, modest way that characterizes all the best men—Zimmerman, Windle, Tyler, Taylor, etc.? Sanger is cross and surly; he appreciates nothing good; he lays all his defeats to the trickery of others and is the most consistent kicker we have ever known. The sooner he gets over such actions the quicker he will be popular among his fellow racing men. Kindness and a generous disposition will accomplish more than bulldozing tactics. Poor Sanger; the whole world seems against him. He was in a peck of trouble regarding the Pullman road race, at Columbus, Parkside, Washington Park and at his own home. Sanger should call to mind the way he treated Bliss at Parkside and then wonder to himself if he is right in making all the fuss he does.

TIME TO MOVE.

Having, in the course of the racing season just ended, given four successful tournaments, the Chicago Cycling Club has proved that profitable and entertaining meets can be given in the west. It is customary in some places for associated cycling clubs to give such meets, but the Chicago organization bearing that title seemed to be a little wary about the matter. The last tournament of the western circuit was to have been under its management, but the organization seemed so shy about taking up the matter that the big club stepped in, gave the meet and pocketed a snug profit. The year 1893 will need some very active work if we would have the world know that cycling and cycle races can be carried on as successfully as any other one thing in the World's Fair city. Chicago has a reputation of carrying anything undertaken to a successful end, and now that the south side club has shown that race meets can be run at a profit, it behooves the Associated Cycling Clubs of Chicago to bestir itself and prepare to handle everything that shall pertain to cycling during the World's Fair. There is no reason why the clubs should not control everything; but they cannot hope to do so if their delegates do not soon wake up.

THAT COMMITTEE OF SEVEN.

The wheelmen of the country announce that from this time forth the wheel will be a potent factor in American politics. They send out a declaration of principles in which they speak for a gold standard, tariff for revenue only, and the abolition of the spoils system. They decline to vote for the presidential electors of any party, preferring to go on record as remonstrants against both the old parties. Their plan of campaign is to vote only for such congressional and local candidates as may at some time before election day declare themselves plainly in favor of Columbian principles. Strange to say, the Columbian platform says nothing about good roads, but we presume that goes without saying.—Indianapolis News.

This, we presume, refers to the "Committee of Seven," which intends to turn things upside down and run things in cyclopedom its own way. We shall be surprised if any wheelman is inveigled into believing in any such scheme. The Indianapolis News has no authority for making the statement that the wheelmen of the country speak for a gold standard, tariff for revenue only, or that they prefer to go on record as remonstrants against both of the old parties. There is no truth in it whatever. But the wheelmen are for good roads first, last and all the time.

If some of the Chicago papers keep on, the next time the racing board holds

a meeting the proceedings will be handed each member before he enters the meeting room. The way some papers manufacture news regarding what the board does is wonderful. According to one paper the racing board has decided to permit the makers to pay expenses of a team, salary included, when, as a matter of fact, the board has taken no action on the question, or if it has it will not be known for a week. It settled the cash prize question by letting it severely alone; that was all.

WHY is it the racing board picks out the small fry first upon which to inflict punishment? We notice that every time it meets some second or third rate rider is made to suffer, while the big rascals go free. The board is fully informed of violations of the racing rules by some of the biggest and best riders in the country, but not a word to them. Dare the board do its duty? If it were a fact that Zimmerman and Windle and two or three other cracks were selling prizes, and the board knew such to be the case, would these big offenders be suspended? We doubt it very much.

SHOULD YOUNG CHILDREN CYCLE?

Dr. Turner. Prominent as Cyclist and Physician, Gives His Views.

The question whether young children, between the ages, say, of six and twelve, should be allowed to cycle, and, if allowed, how much they may indulge in the pastime without incurring the risk of injury, is one of considerable interest, and has of late provoked discussion. This, like most medical questions, is a subject on which no man, who forms his opinion after due investigation, can pronounce dogmatically, or lay down any strict and invariable rules. For there are children and children, and what for one small boy or girl might be merely healthy and beneficial exercise, for another might mean physical ruin. But while each case must be judged on its own merits, one fundamental principle may be clearly enunciated, namely, that no young child with any organic weakness, whether of heart, lungs, joints or nervous system, should mount a machine under any circumstances whatever. Eliminating, then, those who, at this period of their lives are disqualified by nature, there is no doubt that the exercise of cycling, properly regulated and adjusted to the capabilities of the individual, is one of the very best forms of recreation that can be partaken of by children of both sexes at an early age. It develops the body, and the self-reliance and resource entailed by the management of a machine tends to strengthen and enlarge the mental and intellectual faculties. But, granting all this, great care is still necessary, and a few simple precautions, easily taken, may ensure good and avert evil. First, at what age should a child begin to ride? For most children, six is quite soon enough. There are, and will be, exceptions to this rule. Some children are much more forward than others, while the offspring of experts may be expected to develop, under paternal supervision a capability which to others not so favorably placed would seem abnormal. But for the average "English child" six is quite early enough, and even six for many is too early. Great care should be taken in choosing and fitting a machine to a young rider. Any old cast-off creak will not do, and may even produce disease and deformity. The machine selected should be light, of course, the gearing low enough to admit of a short crank throw (four inches is generally ample for a child of six or seven), and the saddle and spring properly adapted to the

weight and size of the rider. But most important of all is the length of reach. This should be quite short; the child should be able easily to touch the pedal at its lowest point with the heel. Nothing is more injurious than a reach so long that the unfortunate boy appears as if riding on a rail, just touching the pedals with the tips of his toes. Then the position must be carefully studied. Young, growing tissues are easily distorted, and a saddle too far back and handles too far forward would certainly cause a curved spine and a permanent camel's hump. The peak of the saddle two inches behind the crank axle, and the handles so brought round and back that the child can sit perfectly upright on the machine, are two things that must be insisted on in buying either a bicycle or a tricycle for a young rider. If these essentials are present the question of tires may be left to the pocket and inclination of the parents. But when the child is pronounced fit, and is provided with an ideal machine, the very important question arises, How far may he ride it? This is a question that cannot be answered in miles and furlongs. No absolute rule can be laid down, as no two children of the same age are alike. The only thing that can be said is that anything more than moderate fatigue is injurious. A young, growing child suffers much from over exertion. Though at the finish of a ride he may seem fairly fresh, still, if he has done too much the results will be apparent soon after, and a sleepless night and distaste for food will show that the system is poisoned by the products of its own waste. And it must be remembered, while treating of this subject, that excessive speed is more injurious than excessive distance—the excessive hill-climbing than either. The great test by which a judgment may be formed as to the distance which is sufficient for each child is to observe—(1) How he sleeps the night after the ride. (2) How he takes his food. (3) How he is the day after. If he sleeps well, eats well, and is bright and lively the next day, the riding has not been pushed too far, and has done good, not harm; but if he is feverish and sleepless, refuses his food, and is languid, dull and thirsty the next day, then it is certain that too much has been accomplished, and that such rides, if persisted in, will lead to mischief. Of course, in the case of children, as in adults, condition is attained by practice, and at the end of a few weeks the distance ridden may be increased with impunity. To sum up in a few words, a sound child six years old, properly fitted with a machine, and riding in proper form and position, may cycle within the limits of moderation, and suffer no harm from the exercise.—Dr. E. B. Turner, F. R. C. S., in *Bicycling News*.

Our Trade With America.

It is interesting to note that, despite the operations of the McKinley tariff, British trade with America in cycles, parts and sundries has rather increased rather than otherwise since the passing of the act. From the returns of the consular general for the Birmingham district (which includes Coventry) we find the following interesting figures for the corresponding quarters of the previous year:

Dec. 31, 1890, \$47,760.86; March 31, 1891, \$152,197.39; June 30, 1891, \$293,709.43; Sept. 30, 1891, \$128,107.41. Total, \$621,664.99.

Dec. 31, 1891, \$58,209.50; March 31, 1892, \$292,911.57; June 30, 1892, \$333,741.33; Sept. 30, 1892, \$76,400.25. Total, \$761,352.65.

The only falling off is in the last quarter, but it must be remembered that in the corresponding quarter of last year much stuff was being sent over in view of the projected tariff, which upsets the calculation of legitimate trade.—*Cyclist*.

Among those who called at the eastern office of the REFEREE, 21 Park Row, New York, the past week, were: S. Golder, Glasgow; A. Barrows, Coventry; Horace Bell, Chicago; Percy Stevens, Coventry; L. J. Phelps, Passaic, N. Y.; Fred Patee, Peoria, Ill.; L. B. Whymper, New York; Samuel Snell, Birmingham; S. G. Whittaker, Boston; W. H. Kirkpatrick, L. Crondel, Newark, N. J.; Dr. C. H. Winans; W. Perrett, Philadelphia; Guy P. Wilson, Baltimore; George M. Hendee, New York.

* * *

The spirit of intolerance has cropped out badly in Brooklyn in regard to Sunday riding, and a prayer meeting (more likely a gossip meeting) recently paid attention to "those wicked cyclists" who dare give the musty old vestry the go-by these days and seek a little of God's sunshine and pure air in the fields and woods, where the tinted leaf falls from its lofty perch to the ground, making a sort of double pneumatic for the rider and a carpet of gold for the pedestrian. The long-faced Christians of intolerance may just as well try to turn back this age to the dark days of the inquisition as to try to prevent men and women exercising their own free will in regard to church and cycling. The church is all right; so is cycling on Sunday for pleasure and health, but there is no use trying to hurry one to heaven by the disease route, and if a young man is shut up in his office every week day, surely he should have a living chance to fight the world, the flesh and the devil on Sunday in his own sweet way. Sometimes he prefers to commune with nature and nature's God in the park or in the suburbs, and sometimes patronizes the street, which he has every right to, even should it lead by a church. A paper says:

The asphalt pavement on Bedford avenue, Brooklyn, makes that thoroughfare a favorite field for the wheelmen, and on Sunday morning they fairly swarm through it on their way to the park. Many women are among the riders. The presence of the bicyclers in such large numbers on that particular day has, it seems, excited some unfavorable comment among the church people in the district, and anti-bicyclist sentiment has found expression in this humorous circular, which has been widely distributed the past few days:

The fall series.
Grand professional exhibition of beautifully developed calves.
Attractive cavalcade of male and female bicycle riders on the Bedford avenue course on Sunday mornings from 10 to 10:30 o'clock.
No sawdust stuffing to be allowed.
Only naturally formed legs will be measured.
The committee on prizes will make and record the measurements at the goal.
Contestants connected with respectable families will be dismissed in time to enable them to attend church service.
Wheels must be housed during the hours of public worship.

Many members of the Central Congregational Church, which is close to Bedford avenue, have seen the circular, but none of them admits having had a hand in getting it up. The Rev. Dr. Behrends, the pastor of the church, said:

"Beneath the humor of this circular there are considerations of a grave and regrettable nature. Many members of my church have commented on this bicycle riding on Bedford avenue on Sunday mornings, and at a recent prayer meeting the matter was referred to. I can't agree with the circular when it hints at any improper exhibition, although it is true that the majority of the male riders wear tight. The attire of the woman riders is also modest.

"The regrettable part of the whole business is that these young men and women are apparently setting at defiance the beliefs and wishes of thousands of people. Somehow or other it always seems to me that these Sunday bi-

cyclists parade themselves in an especially aggressive manner. I don't call this Sunday bicycle riding a sin or even evil. It is rather a something not in good taste, a violation of the principles of good breeding."

Ex-Fish Commissioner Eugene G. Blackford, who is a strict Baptist and lives on Bedford avenue, said:

"This circular was sent out by some malicious person and is rot, pure and simple. You can't ride a bicycle with comfort and safety unless you wear tight. The costume of the women, from my observation, is modest in the extreme. I can see no sin in Sunday riding. Sunday is the only time that most of these wheelmen have an opportunity to get the dust out of their lungs."

This is the comment of Mrs. J. W. Hilde, who has a mansion on Bedford avenue and is an enthusiastic wheelwoman herself:

"This circular is evidently the work of a woman, and an elderly woman at that, who was a spinster and afflicted with biliousness."

And, Schwalbach, Whymper, Potter,

Park Row, you will hear all about it, and can possibly give some information of the workings of the cash prize plan in Australia."

"It is a great success with us," went on Busst, and it has stopped 'roping.' There's little of that now on Australian paths, and the straight-out cash is responsible for the favorable change. The men ride better and harder for the rocks, and it is only a short time before the giving of medals will be entirely out of date."

On being asked how the giving of cash had stopped "roping" (or selling races), Busst said: "Why, don't you see, if we went to a country meeting and were short of cash for expenses, we would stand in with the bookmaker and drop a race, and secure money that way. Now we go in to win, knowing the cash will pay our expenses besides having the honor of securing wins."

Busst is a finely developed young man, who don't think much of Chicago. He

his club in the two-mile bicycle race at the championship meeting, Oct. 11, but refused to go because he preferred to stay at home and pick up a few prizes at a local meeting. Such a man evidently rates his trophies by their cash value instead of the honors they represent, and would prefer forty-one dollars worth of local prizes to a forty dollar championship medal. We had some curiosity to learn what kind of prizes are given in Philadelphia, and have now obtained the information in the Philadelphia Sunday Item of Oct. 19. The meeting was held at Base Ball Park, given jointly by the Quaker City and Park Avenue Wheelmen. The list of prizes included bicycles, gold and silver watches, suits of clothes, sweaters, pins, lamps, pictures, medals, cups, bugles, wall machines, alligator grips, bicycle suits, clocks, revolvers, locks, bells and cyclometers. Mr. Taxis won a silver cup in the quarter-mile, a silver watch in the two-mile lap race, a bugle in the one-mile team race, and a full-dress suit in the half-mile. He also won the slow race, and the Item says: "For having performed this difficult feat Mr. Taxis will have his laundry 'done up' for one year by the Oxford Laundry free of charge." Thus we see the Philadelphia amateur gentleman sallies forth to the races at high noon and returns to his wigwam at even tide with a bugle slung over his shoulder, a silver cup under his arm, a silver watch in his fob, a receipted bill for an evening suit in one pocket and an order for a year's washing in the other. A suit of clothes is an odd prize, and must be tolerably near the line which divides amateur from professional trophies. But a wash bill is worse. A gentleman's laundry bill would hardly be less than a dollar per week, and the difference between this prize and \$52 in cash is too small to be seen without a microscope.

When the racing board of the League of American Wheelmen tire of dallying with the regulation of traveling, training expenses, they might profitably investigate the prize business. If a laundry bill is a genuine amateur prize, why not a board bill, or a bill for room rent, or a tailor's bill, or a baker's bill, or a milliner's bill. There is food for thought here."

I wondered what William thought of teams, pianos and real estate, so sought out the "Father Bill" in Newspaper alley. The veteran was busy, and after making known my errand, he said: "Yes, I'll tell you what I think—come in to-morrow," but on the morrow I failed to catch my man.

Some Factory Facts.

Here are two American items in "R Jay's" *Irish Cyclist*, on which I want to put him right if possible. The first is excusable, but the second —:

Gormley and Jeffery, in the list of the Stanley Show exhibitors, should read "Gormulley and Jeffery."

The Whitworth has commenced to score in America, and we learn that Mr. J. C. Pratt won the five-mile championship of his club on this mount in the extraordinary time of 11 min. The course he rode on was, however, 800 yards short, and the wind assisted the rider. The machine was a twenty-two-pound racer. A few days later the fifteen-mile handicap of the same club was won by Mr. C. Watson.

Gormully, McCreedy, just plain Gormully: the firm is fairly well known in America. In regard to the Pratt five miles in 11 min., less three hundred yards, that's a corker. Tell us who Mr. Pratt is; with even such a good machine as the Whitworth, the time seems too good for an unknown. I guess that track was about thirty hundred yards short.
